

Super D. S 3151

Chapter 3151: The rise of Xiongcheng

"The matter is not a matter of concern, this prince and you are not so familiar! Tell me!"

Ye Xuan sneered, this time the gift of the hand was saved, and the words were turned before they were finished. They led the five men of Naples and swayed to the triumphant fortress. They blinked into it, the whole fleet, the mighty Swinging to the distance, it is not the eastern star field specified by the dragon's crepe, but the direction of the north!

This is clearly the idea to make a point with him, you refer to the East, the old man's northward rhythm, the air of the old Xiongcheng suddenly heard a few bangs, so that the surrounding stars inside and outside the city The strong guys were all shocked, all of them were cold and the atmosphere did not dare to take a sip!

At the same time, Ye Xuan, who returned to the top command post of the Star Fortress in the Arc de Triomphe, was shaking his head and smiling with the help of Naples and others.

After returning, they discovered that it was like a celebration party, which was like a joyful thunder.

It is impossible for the immortal army officers and men of Naples to make such a thing. The moths are the thousands of federal elites who have just been compiled by Ye Xuan!

When I saw Ye Xuan returning, I immediately had a group of guys who came up, excited about what it was like, and the various ideas were overwhelming.

"Hey, are we going to stand on our own feet? Good idea, did the original immortal dynasty grow up so step by step?"

"Playing is a performance. In this way, all of our old folks will be able to become a national meritorious deed. This is a great undertaking for a long time. Let's do it!"

"Hey! What's the matter? What can you say? Can you say it at the beginning? At the beginning of the business, we have to be low-key. We know it internally. If we don't have a big picture at the moment, how can we let the dynasty know that the head has a disagreement?" ?"

"Yes, everything starts with Zhanshan as the king, step by step to grow up, and the ultimate goal, we must now but he is in the heart, can not vent the bottom of the head, affecting our future grand plans..."

This kind of scene, Ye Xuan really did not dare to blend, smiled and gave a look to Naples, and quickly rushed to avoid, went to his cabin.

He just left, the wretched mosquitoes screamed and raised their hands, and the most exciting people who clamored for the guys gathered together...

Three days later, a giant dead star appeared in the void, although it was not as big as the one in which the old town was located, but it was similar.

What is even more rare is that the surface of this star is extremely flat, large patches of plains are clearly visible, and even some decaying plant traces can be seen, indicating that it should have been a life planet, but because it is located in this death star. Among them, like other stars, they entered the dead period in a strange way, and the energy disappeared and disappeared completely.

"That's it, this prince is in the base of the base of the death star, and it is this...the triumph!"

After naming the star, Ye Xuan's triumphant fortress occupied the largest plain even though it led the entire fleet to the surface of the Arc de Triomphe.

The vigorous construction was unfolding.

In addition to warships, fortresses and fortresses, the entire fleet is full of resources and technology. Together with Ye Xuan, the black mosquitoes, the black winds and the saints' scouts are all sacrificed, even Intelligent robots, including the Thunder Fortress, have also come in handy, and the construction of the entire Arc de Triomphe is almost ever-changing.

Tens of millions of mosquitoes and the 100,000 Void Scoops shined in the foundation of the Arc de Triomphe. The number of such huge forces is not enough to be in the old city.

In addition, there are almost a thousand of the federal elites in all walks of life, and there are even a few refiners who are not bad at the rumors. As for the talents in science and technology, there is no shortage of them. It took a lot of time to be built out.

The various iron ore and rare metals required for refining the building alloys are surrounded by countless dead stars, all of which are everywhere. Ye Xuan has released words, double value acquisition, and some ordinary Minerals, the star-studded powerhouses who enter this star field are too lazy to collect, throw them in the void like garbage, and after smelling the news, a large number of strong people flocked.

Under the slogan of storage, the small half of the plain is almost filled with all kinds of ordinary metal ore.

Then there is the large alloy, with the molds designed by the construction experts of the thousands of federal elites, all the refined alloys are directly molded, and finally assembled like a building block, the fusion interface will do.

This has greatly shortened the construction time of the Arc de Triomphe.

In the end, in just three months, a steel city was quietly rising on the starry plain of the Arc de Triomphe. Although it was only a thousand miles away, it was the same as a city in the center, surrounded by a dozen. The seat of the city is slightly smaller, and even the entire Arc de Triomphe is covered, and the huge star-shaped protective cover with a diameter of a thousand miles is made out.

The only trouble is the greening inside the Thousand Miles. Fortunately, there are cabin green belts inside several Star Fortresses, and some plants that grow rapidly are transplanted. In the past three months, the scales of the Arc de Triomphe Finally, it is also covered with eye-catching greenery!

At the same time, Ye Xuan sent a squad to collect intelligence information, and they all returned.

These Scout squad organizations are complex, basically consisting of a three-kilometer captain's star-rated warships. In addition to the officers and men of the Triumph fleet, there are also mosquitoes, soldiers and magicians.

In addition, all the star-class small fortresses under Ye Xuan's squad also went out during this time and patrolled in the surrounding stars. Often more than ten centers of the scouting squad, they guarded a star-class fortress, any A scouting squad is in danger, and the star-level fortress in the central area can start to rush in the first time.

In this way, it is a powerful guarantee for the safety of your majesty. Don't look at Ye Xuan's strength in the hands, but most of them are devils, mosquitoes and emptiness. The people of Naples are not too strong. More, any person is damaged, for him, it is very difficult to bear.

In fact, even with a large number of devils, mosquitoes, and soldiers, Ye Xuan has already left the Devil's Field. In this hand, the original class has died one less, and there is no way to add it. Therefore, He has spared no effort in the measures for personnel safety protection.

In less than three months, all the scout teams have returned, collecting a large amount of intelligence information, which is classified by the professionals of Naples and analyzed by intelligence experts in the thousands of federal elites. Finally, Formed a systematic and detailed information, submitted to Ye Xuan.

The high efficiency is that Ye Xuan is amazed. All the information in the entire star field became an encyclopedia about the death star field in less than three months. He appeared in his hand and finally let him For the first time, I felt how easy it is to have a large and professional team.

Chapter 3152: Star situation

Looking at the encyclopedia of death stars, Ye Xuan quickly got a comprehensive understanding of this star field.

Other information about minerals does not have to be described. In the Death Star, there are almost all kinds of ordinary minerals and scarce metals in the dead stars. Even some epic minerals have been unearthed in the starry sky. Otherwise, it will not be Attracting so many star powers has swarmed.

The best, the legend, the epic, the treasure!

These four major levels can be applied to almost any item in the starry sky environment, whether it is a natural mineral deposit, a man-made warship, or a variety of magic weapons produced under refining technology.

Starry epic metal minerals, even if they are only a fist-sized piece, can be exchanged for a large number of cultivation resources, such as Ye Xuan's hands of up to several cubic nine-color nine-color star nuclear source, which is an epic mineral of the starry sky, one The nine-level nine-color of the boxing can be exchanged for a large amount of ordinary star nuclear source, and there is no price, no price, no market!

In addition to this starry epic mineral, this death star field, like the minerals of the starry sky, is also known as the so-called phagocytic source crystal.

However, ignoring the starry sky of the source crystal to the treasure grade, even in the death star field, it is only a speculation, whether it is really starry to the treasure level, has not been officially confirmed by any official.

Even the crowds swarmed and opened in this vast expanse of stars, dreaming of mining even a source of phagocytosis, from then on, the star-studded powers who can make a fortune, even the specifics of this devour source The use is completely unknown.

Often, every star-shaped source crystal was unearthed, and it was immediately acquired by some mysterious forces or official institutions such as the Immortal Dynasty and the Ten Heavenly Palace.

As for what they are specifically used for, they are not aware of it, and they are not interested in asking questions. As long as they can dig into the source of the crystallization, and exchange it for a large amount of cultivation resources, for them, it is enough!

In addition to the immortal dynasty's old city, and the black scorpion city of the Ten Heavenly Palace in the eastern part of the Death Star, there are a lot of other forces in the vast death star field.

On the bright side, the ranks of the strongest people of the Second Universe Federation are sometimes seen, and there are some strong Zeomic strongmen who can compete with the dragon's plaque.

In the dark, there are servants of the celestial servants and hundreds of strong people competing for each of the devours of the devour, and it is said that there are even several real celestial people sitting here.

In general, although this death star is located in the central domain of the Third Universe, in the gap between the Ten Heavenly Palace and the immortal dynasty, its overall situation is more complicated than the funeral star field. This point is that Ye Xuan is very surprised!

"The place where the official base of the Ten Heavenly Palace is located in the city of Heiyin is also a supreme powerhouse of the celestial world. This person is named Huai Dongzi, but is a deputy palace owner of the sixth house of the tenth."

"Ten Heaven Palace, there are a total of ten Heavenly Palaces. In each Heavenly Palace, there are one, four, and five lords. In general, the existence of the prince-level is equivalent to the royal family of our immortal dynasty."

"In terms of quantity, there are dozens of people in the ten-day palace of the comprehension camp and the vice-presidents. There are a total of dozens of people in the emperor's residence."

After picking up the intelligence manual in Ye Xuan's hands, Naples looked at it and introduced the details of the major forces in this star field to Ye Xuan.

"In addition to Huai Dongzi, in the official base of the Ten Heavenly Palace, the city of Hei, there is another identity with the Emperor of the Emperor, you are the same. It is the third house of the Sixth Palace. It is said that it is also a black house in the past year. Only after Huai Dongzi came to the death star field, it should be for trial!"

"In addition, there are many strong teams in the Second Universe Federation, including the celestial servants and the patriarchs who have not yet been specifically confirmed, but these teams are all liquid. Basically, I took a shot for a place. There is no fixed base like the Black City and the Old Town. I heard that there was a devour of the source crystal, and immediately flew away, threatening and tempting. Means to compete..."

Having said that, Naples stopped the words in his mouth, but Ye Xuan was sighing and sighing: "Hey, a small piece of death star is so complicated, all the forces of the three cosmic planes are either light or

dark. Gathered over, even if only one unearthed devours the source crystal, it is like a rotten egg rotten shell, attracting a large swarm of flies to come... This situation is really a headache!"

"Cough..."

"The emperor, we seem to have to mix in the next!"

Napoli was obviously a bit embarrassed about his flies, and he coughed twice, and reminded Ye Xuan.

"It doesn't matter, I have to be good, flies fly!"

Ye Xuan did not care to wave his hand. In order to devour the source, he did not mind, but he grinned again: "But even if it is a fly, we must be the biggest greenhead fly inside..."

Napoli's face was green, and without waiting for his snoring, Ye Xuan once again said: "The guys at the moment are vying for the devour of the source crystal, but it's nothing more than a confession. On the bright side, the high price is tempted. Lee, or if it is so impossible, it will be secretly grabbed in the dark. It's hard to beat us!"

"Put out the news, the Arc de Triomphe officially opened, and welcome the star-studded powerhouse with a large amount of mineral resources in the hands."

"In addition to phagocytizing source crystals and other rare mineral deposits, even some ordinary minerals and useful metals, we buy, but the purchase price can only go with the market."

"As for the devour of the source crystal, the price of the purchase given by Arc de Triomphe is three times that of the source crystal that was unearthed at the end of the current stage. If it is batched, the price can be turned over again."

"In addition, in addition to the ordinary cultivation resources such as the low-grade star nuclear source, as long as we can produce the phagocytic source crystal, we even offer the exchange of goods, and the cultivation resources, even the eight black and nine grade nine The color of the star nuclear source, we

can provide, and other refinery resources, all kinds of stars and legends and starry epic ore, crystal, even the finished magic weapon, we can provide."

"In addition, the new card of the Arc de Triomphe, naturally, must be a big bargain, and within a year with the devour of the source of the crystal to trade, the above offers, all doubled!"

"Hey? Is this condition too good? Are you going to have a strong monopoly?"

When Ye Xuan finished the rhetoric, Neapolitan had already put his mouth into the fists, and the face was full of sorrow. He exclaimed: "The emperor, let's do this, it is estimated that all of them will be unearthed later. The phagocytic source crystals have to come together. This is clearly the rhythm of eating meat and soup. It's so scary that it's going to be a big mess, it will cause public outrage..."

Chapter 3153: New Zhang Dabao

"Is it heard? The empire of the immortal dynasty came, it is the only guy who has rushed into the top ten in the last ten thousand years, although he only stayed in the top ten for less than three seconds..."

"Rely! Brothers just out of the customs? This is the old smell of a few months ago? You have come out to be sensational, and it is out of date!"

"There is a performance, is it a big triumphant city, we have seen it from a long distance, I don't know how many times, I can't know the news that Xuan Huangzi entered the death star field? Hey, it's better to say that Xuan Huangzi is better than seeing it. When I came, I dared to confront the emperor and the old man. I actually took advantage of the defense duties of the old city. I stood on my own door. In just three months, I made a triumphant city, which made my brother!"

"What you said is nothing. The news I just received is very exciting. Do you know? After the completion of the Arc de Triomphe, it is finally going to be new. Daxie has acquired various mineral deposits, and even the ordinary resources and minerals are collected. In terms of phagocytizing the source crystal, people clearly mark the price, which is three times the last one!"

"Even if you don't want the ordinary star nuclear source, people also provide goods for exchange, eight-level black and nine-level nine-color high-end star nuclear source are provided in large quantities, and the wealth is thick."

"Yes, this news has been confirmed. In addition to the cultivation of resources, people also provide other resources, materials and finished magic weapons are included, as well as starry sky legends and starry epic, as long as you can find enough The devour of the source crystal, go to the Arc de Triomphe, everything has!"

"These are not the most exciting! Didn't you hear about it? Xuan Huangzi's big hand waved, and set a new period of one year. Within one year, all the above conditions are tripled, that is, if you have According to the high price he gave, he was able to trade a nine-grade nine-color, and he would trade in the first year. There will be three in the nine-color nine-color."

"Oh, my tyrant, this is, isn't the prince of the singer crazy? This is clearly a monopoly in the death star. When this condition is opened, other forces are estimated to be mad!"

"How about that? See you going to the Arc de Triomphe, should you also want to enter this city? Xuan Huangzi released the words, as long as the hands hold certain resources, after the completion of the transaction, they can have the right to live in the Arc de Triomphe, of course However, I have to pay a certain fee each year, but if I can continue trading, this fee is free. This is the opening of the Galaxy, but the old city of Suzuki is not so concession. Anyway, I am sure that this time I went to the Arc de Triomphe. The Xuan prince is so atmospheric, this business partner can't find it with a lantern!"

While talking, a huge star in front is already far away, although the green land on the stars is only a thousand miles away, but all facilities including the star shield are fully equipped, and the Xiongcheng protective cover There is also a huge fleet of ships. There are three star-studded fortresses with a diameter of 100,000 meters. At first glance, it gives people a strong sense of security.

This city is the Arc de Triomphe!

In the vast expanse of the death star, including the Eastern Region within the sphere of the Tenth Heaven, the current Arc de Triomphe has become famous, and it is the third fixed city in this star field. base.

The guys who gathered together in the encounter with the stars in the sky quickly went to the Arc de Triomphe in front. No one noticed the crowd. From beginning to end, there was a young monkey like a skinny monkey who had never spoken. Even his eyes looked around and looked very unsettled. After

following the crowd into the starry shield of the Arc de Triomphe, the nervous look on his face was slightly relaxed...

In the Arc de Triomphe, Ye Xuan also made a triumphant platform based on the practice of the Tianhe Star Federal Affairs Platform. He listened to the high-level, but in fact, the departmental departments inside were simple and only had several classifications.

They are ordinary mineral deposits, starry elite grade deposits, starry sky legendary mineral deposits, starry sky epic mineral deposits, and star-to-treasure-grade mineral deposits, followed by a stationed application.

The so-called star-to-treasure-grade mineral deposits are currently found in this dead star field, and it is still a few major forces that openly recognize its class of minerals, that is, the phagocytic source crystal.

In other words, if you want to trade the starry sky power that devours the source crystal, you can go directly to the starry sky to the treasure-level mineral deposit area.

At this time, in front of the window of the first few institutions, there are some star-studded strong people in the queue, even in front of the trading window of the starry epic mineral deposits, there are two or three star-studded powerhouses, in consultation with the details of some transactions.

This is especially true for institutions that have settled in applications, and more than a dozen windows are all long queues.

Only in the area where the trading star is in the treasure-level mineral deposit, there is no figure in front of the four windows.

Just at this time, a figure has gone, it is the thin star-like strong star, the repair is not very strong, the third-order star, it is not too weak.

His face is still quite nervous, especially when he walks alone to the door of the trading starry sky to the treasure-level mineral deposits. With a lot of eyes around him, his muscles are almost stagnant. In general, the whole person is very old.

Within each of the four windows, there is one expert in mineral identification, from the thousands of federal powerhouses.

At this time, in the window of the thin monkey strong, a middle-aged man around 30 years smiled and asked.

The skinny monkey is still very nervous, but the voice is weak, but the words that are spoken suddenly stir up thousands of waves around: "I... I want to trade and devour the source crystal, but I don't want ordinary cultivation resources, I want to... I want nine grades and nine colors!"

In the death star field, the unearthed of each phagocytic source crystal is destined to be turbulent, even wind and rain, like this one is not surprisingly strong star strong, suddenly said that there is a phagocytic source in his hand. The situation has never been seen before.

Do not dare to scream, lest you be robbed.

This person dares to show up in public, apparently also in the reputation of the Emperor Xuanzi and the strength of the show.

Even so, among the large number of star-studded powerhouses around, there are still some people who have picked up the fine mans, and countless lines of sight swept around the thin monkey strong, with imperfections.

These exist, some are scattered soldiers and brave, occasionally guest robbery, and some are from major forces. At this moment, I heard that the skinny monkeys have swallowed the source crystal in their hands. After some indulging, even if many people are quietly pulling away went.

And Ye Xuan, after receiving the news, also rushed over with the wretched mosquito and the Yingtai and Naples.

Seeing this thin monkey strongman, Ye Xuan Shantou is a sentence: "This is the site of the prince, you can rest assured that the people who dare to rob the road are not too long, even if the transaction is completed, the prince will keep you safe. How long do you want to stay in the Arc de Triomphe, and all

the deals that devour the source crystals in the future will have this treatment... Well, say good business, how many in your hands?"

"Ten... ten!"

"boom!"

There is a big bang around...

Chapter 3154: Jinkou Yuyan

"Ten... ten!"

"Hey? Tenty... Ten?"

Two sentences, it sounds almost the same. The former sentence is that the thin monkey strongman with vigilance, while looking around, said weakly.

In the latter sentence, Ye Xuan, whose face changed greatly, repeated in an awkward manner for confirmation.

Until the thin monkey strong nodded again, Ye Xuan was completely convinced of the words heard in the ear. Suddenly, a huge surprise burst into his heart, and his almost almost straightened up.

Not open for three years, open for three years!

This is really good, the opening of the triumphant city, in the first transaction to devour Yuanjing, actually encountered such a super big customer, it is simply a pie in the sky, no, it is a pie rain, almost Ye Xuan was stunned on the spot.

We must know that in the past 100 years or so, although the phagocytic source crystal has been produced almost every year, it is basically one at a time, the most one, only two.

Even so, the forces that still attract or succumb to this death star have been vying for it.

At the moment, God sent a grandfather, actually opened his mouth and said that he had ten phagocytic sources.

This is really unbelievable, but Ye Xuan has no trace of doubts, is Mao? Who is this kind of thing, who dares to speak in his own hands? If you really want to do this, once you get out of the Arc de Triomphe, it is definitely a place of death.

And if he said it but couldn't get it, Ye Xuan would let him take refuge in the Arc de Triomphe?

Stupid lack of doing this kind of stupid thing to dig for yourself!

In other words, in the hands of the star-studded strong star of this thin monkey, there must be ten phagocytic sources.

Ten!

It doesn't seem to be much, but hasn't you said it before? Once there was an immortal dynasty, who stayed in this death star for ten years. After returning to the anti-immortal star, he brought back more than 20 phagocytic sources. At that time, it caused a sensation, and the old man was consciously credited. Huge, even smugly showing off, this allows some of the imperial powers who are not qualified to access this important resource to see the true face of the devour of the source crystal.

Ten years, more than 20 phagocytic sources!

This is also a royal emperor, representing the harvest and achievements of the official forces of the immortal dynasty in this death star field.

At the moment, Ye Xuan came to the death star field for three months, and actually got ten pieces at a time. If this matter is passed back to the immortal star, it is feared that the royal family who had a huge credit for self-confidence had to spurt on the spot. Now!

Thinking of this, Ye Xuan's breathing was rushed, and it was hard to rush to the floor and rushed to search the pockets of the people's pockets. He took a deep breath and said slowly: "Let's say, what do you want? The prince Just one sentence: safety, guaranteed by me! Resources, you want you to, as long as I have!"

"I... I want to cultivate resources!"

Perhaps it is Ye Xuan's public guarantee that his heart will be fixed. The original nervous color of the thin monkey strong man's face has obviously disappeared. It's replaced by an excited ruddy, not waiting for Ye Xuan to answer. I have already said: "But I don't want the ordinary star nuclear source, I am... I want high-quality goods, which is helpful for breaking through the bottle."

"Of course, I also know that although the nine-level nine-color is only an epic resource of the sky, it is recognized by the three major universes for many years, and this devours the source crystal, although it is called the starry sky, but after all, it is only a rumor, when it is not true, Moreover, the origin of the star nucleus is more practical. I don't know what it is used for this phagocytic source crystal. It is useless to keep it."

"So, according to the current market, three devours the source crystal, you should be able to change a nine-level nine color, I have ten in my hand, you give me three nine-level nine color on the line, more than one... I sent it!"

Once I heard this, the four sides were once again stunned, but all the star powers did not feel that there was anything wrong with this transaction. The words spoken by the thin monkey strong are indeed the current market prices, and it is no exaggeration to say that even If you take three phagocytic sources, you may not be able to switch to a nine-level nine-color.

After all, this death star field does not produce a star nuclear source.

Although the major forces are preparing a large number of cultivation resources to devour the source crystal, the source of the nine-level nine-color star nuclear is not included. This kind of thing, even in the immortal star, is scarce, no one is stupid. Take a strategic resource for another strategic resource.

The immortal star or the ten heavenly palace must have nine grades of nine colors, but the amount they hold in their hands is absolutely no more than Ye Xuan, one cube is thrown, one hundred and eighty pieces are thrown out, and there is no pressure at all.

Perhaps this is also the fundamental reason why the thin monkey strongman came to the Arc de Triomphe today. The high-level star nuclear source has a huge and obvious effect on the breakthrough of the bottle-building. He is just a star, not I don't want to go up, I need this kind of thing.

And there are countless star-studded powerhouses in the surrounding world. In addition to envy and hatred, there is no other expression. When you think of this thin monkey in front of you, you will soon have three nine-level nine colors, some of which have not been moved. The guys in the mind, the gaze of the scorpion, are gradually flashing.

For all this, Ye Xuan did not pay attention to it.

After listening to the thin monkey strong, his heart sighed a silly cute, but his face was a grin and smiled: "According to what you said, ten engulfing the source crystal for three nine-level nine color, I am right and recognized"

When the words came out, the surrounding was once again stunned, and the thin monkey strong suddenly became nervous. As a party, he was naturally the most keenly present. The right words in Ye Xuan's mouth made him a bad thing. Premonition.

The result later made him stunned, and all the star-studded powerhouses around him almost burst the pot.

"But, three nine-level nine colors, I will not give you..."

After licking his mouth, Ye Xuan glanced at the pale skinny monkey strongman and smiled again: "Don't you forget the new year's big bargains that the prince said? All the scarce mineral deposits, at the original price, turn the price So, to give, this prince is also giving you nine..."

"Hey..."

"Nine? I rely! Isn't that the equivalent of a phagocytic source crystal can change a nine-level nine color? Lying a grass..."

"The big prize, the big prize in this kid!"

"Xuan Huangzi really is also a man of heaven, and the nine-level nine-color is even a strategic resource in the hands of the big forces. He is totally wrong!"

"Fart, who is not the same thing? People are the heavy promise, this is Jinkou Yuyan, just your brain, what to do, you must lose money, go to hell, you..."

Around, countless star powers have been yelling, saying everything, the thin monkey strong is even more excited tears have come out, nine nine-level nine color, he never thought about his own life Such a horrible cultivation resource, with these nine colorful things, if he can live out of the death star field, in the territory of any small country under the three empires of the dynasty, you can find two or three, change the administration The star's star length is deserved.

Pingyun Qingyun, the rhythm of landing!

Unfortunately, before he was excited, Ye Xuan gasped and he once again spoke again...

Chapter 3155: Sensitive person

"There are a lot of nine-level nine-color princes in the hands of..."

Speaking of this, Ye Xuan suddenly thought of something, and between the hands, he took out ten jade boxes from the immortal world, and lined them up in front of him.

Then, these ten jade boxes will automatically open.

In each jade box, there are three nine-level nine-color star nuclear source, the size of the baby fist, exudes a bright and shining light, for a time, actually turned Ye Xuan's face into a nine-color color.

Around the moment, a burst of exclamation sounded.

These star-studded powers have basically never seen the nine-level nine-color star nuclear source, but there are thirty pieces in front of them, but they are not exclaimed.

These 30 nine-level nine colors, just take one out, you can exchange them for a large number of cultivation resources, that is, the seven-level purple star nuclear source, can be changed to more than one hundred, so, this The guys were almost red all at once, and there were a few black caves that were repaired. The scorpion even began to flash, if not in the Arc de Triomphe, and there is a huge one above the Xiongcheng shield. The fleet, it is estimated that the spot will be hard to grab.

"Everyone has seen it. Even the nine-level nine-color book has a lot of hands in the hands of the emperor. Not to mention other cultivation resources."

"So, don't think that after the completion of the transaction with the brother today, there will be a follow-up transaction, and the cultivation resources in the hands of the emperor will be stretched. Or, as long as there is a devour of the source crystal, what is it, what to give!"

During the speech, Ye Xuan once again waved his hand and collected nine of the jade boxes. Only one was left floating in front of him, and there were three nine-level nine colors.

At this point, the strong stars around the world came to realize that, for a long time, he suddenly took out so many nine-level nine colors, at the root is to show off the rich, calm people!

Many people suddenly pouted, but they could do nothing!

At this point, Ye Xuan has spoken again, looking at the skinny monkey: "Nine grades of nine colors, I can only give you three!"

The surrounding area suddenly snorted. After the skinny monkey's face slammed, it also showed a bitter smile. Three of them were originally normal prices, and they still had a priceless market. What he had wanted before was only three.

However, Ye Xuan said that within a year, the new Zhang Dacheng bargains, the price of all transactions tripled, so he was shocked by the heart, and was shocked by the nine nine-level nine colors that will soon be available.

Now it seems that everything is just a delusion, the eyes of the Emperor Xuan, afraid that it will find an excuse to deprive him of the qualification of three times the new bargain.

Although it doesn't matter, it is only after an unexpected surprise, but suddenly disappointed, my heart, how a little uncomfortable.

Those who have no words to believe, and then devour the source crystal again, it seems that there is no need to go to the Arc de Triomphe.

Just as his mind gave birth to this idea, Ye Xuan's words came again: "The other six, the prince is replaced by other equivalent nucleus sources, delivered to you! Not reluctant to be nine-color, But instead of using your current cultivation, you can use the nine-level nine-color practice directly. It is too wasteful. This thing is still used as a realm in the future. Break through the bottle."

"The six nine-level nine colors, the prince gave you four levels of green two cubes, five grades of red hundred, six grades of blue hundred cubes, seven grades of purple fifty, eight blacks of ten..."

"In terms of value, in fact, these are still not comparable to the six nine-level nine colors. After all, the latter has no price, but for you, the actual meaning and effect I gave are more than six. Nine grades and nine colors are bigger. With them, you can directly retreat in the Arc de Triomphe, even if it is okay for decades, no one will drive you away, your cultivation resources are enough, I will definitely go out again, and I will go up again. Today's events are gradually being forgotten, and you can leave without leaving!"

"thump!"

"The emperor's great grace, thin seven is unforgettable, only wish to report to death!"

After waiting for Ye Xuan to finish talking, the skinny monkey has slammed down and burst into tears.

All this, I am so touched by him, in the death star field, this kind of intrigue, as long as there is a heavy profit, it is the companion is likely to be behind the knife, only Ye Xuan, who is only trading with him, can imagine His thoughts are really rare.

It is true that Ye Xuan's reason for this is that some of them are pretentious gestures, attracting more of the star-studded powerhouses who have engulfed the source crystals, but more, in fact, they are actually sincere.

Ten engulfing the source crystal, is of great significance to him. In Ye Xuan's heart, he is still very grateful to the star-studded powerhouse who claims to be thin.

As for the moment, the thin seven is moved by sincerity, but it is not expected by Ye Xuan. It can only be said that it is unintentional.

Between the talks, Slender Seven has taken out an ordinary space box from the storage magic, and got up and handed it to Ye Xuan.

Ye Xuan invaded it with the power of the gods, and his face suddenly showed a happy color.

Sure enough, it is the source of engulfing, just ten!

"The number is right, just ten!"

This object Ye Xuan also did not want to look at the eyes of others. When the space box was filled into the immortal world, at the same time, another space box was taken out from the wave, and the jade with three nine-color nine colors was used before. The boxes are suspended side by side.

Then, the space box was slowly opened, and it was seen that it was full of various star nuclear sources. The top one was eight pigeon blacks of eight pigeons.

The quantity is exactly the same as that of Ye Xuan.

The breathing of all the star-studded powerhouses is rushing again. This pile of star nuclear origins, the lowest level is also four-level green, and only the four-level thing is two cubes, eight-level black is more ten. The other red, blue, and purple objects are as dazzling, and the visual impact is even more amazing.

However, for Ye Xuan, the origin of these stars is nothing at all.

In addition to the large number of star nucleus sources he had originally bred in the funeral star field to devour the blood of the beast, the black mosquitoes and the black winds that he later obtained were scouted in the fortress, and these resources were massive.

Therefore, at this moment, the two space boxes are closed, and they slowly float to the thin seven. When they fall on their palms, Ye Xuan's half-waves in the light have not appeared, and everything seems dull. No wonder, I didn't go to the heart at all, as if it was just a normal thing.

However, this just happened to be more firm in the heart of the thin seven, and took over the two space boxes that fell to the palm of the hand. After thanking them, they stood behind Ye Xuan and showed their determination with practical actions. .

In this regard, Ye Xuan could not help but smile. This guy took out ten phagocytic sources at a time. It is extraordinary. In this death star field, he is already extremely sensitive. Now he has invested himself, fearing that it will be a little troublesome.

Chapter 3156: Mixed water fish

After the transaction was completed, Ye Xuan left the triumph trading platform with the thin seven and returned to the main city of the Arc de Triomphe.

The Arc de Triomphe consists of a main nine-guard and ten-city city. The nine satellite cities guarded by the surrounding, all the star-studded powers can enter, but the long-term residents must submit an application to the Triumph Trading Platform. Otherwise, the most staying for three days, you have to leave.

Among the main cities, Ye Xuan's lineage is located. In the center of the main city, there is an alloy castle. Ye Xuan lives in this alloy castle.

At this time, in the first floor of the alloy castle, Ye Xuan has just returned to this place with thin seven, Napoli, Yingtai, wretched mosquitoes and a sea of knives, as well as Li Mo, Zuo Fengtai and other magic slaves, all here. .

The Arc de Triomphe is its own site. The magic slaves who were originally hidden in the Black Wind and Black Mosquito by Ye Xuanxue are almost all released. They also need to be tempered and grown!

In addition to the return of the sea, a group of other magical slaves, controlled by other young masters such as Cang Qingyu, were also released, responsible for the defense and patrol of the main city.

The nine satellite towns outside the main city are under the responsibility of the human races under Neapolitan!

"One time to unearth ten phagocytic sources, this kind of thing has not appeared in the history of the death star. You should understand how sensitive you are, saying that it is the heartstring of all the forces in the entire death star. Not too much."

After sitting down, Ye Xuan turned to the thin seven and looked at it. He smiled and said: "But you can rest assured that as long as the Arc de Triomphe is still there, no one can move you. The old monster of the old city is not afraid of this prince. Other forces are not daring to establish a fixed base in this star field, and the Emperor is even less concerned."

"Let's stay in the main city, retreat or cultivate, or do other things. The prince promised that this triumphant city will let you live until you feel confident that you will be safe after leaving. go with....."

Skinny seven arched his hand and smiled and asked: "I don't want to know that my ten engulfing source crystals, why come?"

"I really want to know that I can take out ten phagocytic sources at once. If you don't have a major discovery, it is absolutely impossible."

Ye Xuan nodded, but it was not esoteric: "However, this secret is extremely important to you. Tell the Emperor, you must not want it. If the Emperor insists on knowing, you refuse to speak, and the final result can be imagined. Knowing that, as a result, sooner or later, the outside star powers know that

when they lose their integrity, no one will come to my triumphal city to trade and devour the source crystal. It can be said that because of the small loss, it is not worth mentioning."

"What if I want to be honest?"

After listening to Ye Xuan, it was because of this reason that he did not ask him actively. The thin seven could not help but stunned. Finally, he smiled and shook his head: "It's not awkward. The origins of these ten devours are really hidden. However, Yu In the case of Skinny Seven, it is lucky to get these ten. Even if there are other phagocytic sources in the place, Skinny Seven will never get that luck again."

"In addition, now the Emperor Mengzi is generous, Slender Seven has received a lot of cultivation resources, and then only wants to retreat and practice, so this is the king, and no intention to ask for more, this secret, naturally should be told the emperor. "

Speaking of this, Slender Seven once again handed a hand: "The previous words of sincerity, thin seven out of the heart, since the emperor is already a thin seven-governor, thin seven will be honestly frank, it should be!"

Ye Xuan frowned, not to mention, this temptation, he is really difficult to refuse, the source of devouring, too important for him.

Seeing his silence, Slender Seven re-engaged his hand, and then he got the roots of the ten engulfing source crystals, and said it in detail...

.....

After a short period of time, the thin seven was retired from everything, and was returned to the central castle by the sea. It was placed in the main city and retired.

The leaves of Ye Xuan and Naples remained in the lobby of the central castle. All the people were indulged in thinking, and they were thinking about the words spoken by Skinny.

For a long time, Naples shook his head and smiled. He sighed and said: "This is a difficult thing to do. I can't think of the ten phagocytic sources in the thin seven hands. It's actually from the vicinity of the Black Dragon City in the Eastern Territory of Death. It is estimated that there is no After grasping that I can shoot there, I still return to the western star field belonging to the dynasty safely, and this is always in my hands until this time..."

"But in this case, the news is of little use to us. If you know the news before he arrives and completes the transaction with the Emperor, we can secretly lurk into the eastern star field controlled by the Ten Heavenly Palace. It's not working now."

"Skinny stayed in the Arc de Triomphe, and other forces of size will surely find that he has the secret of the ten engulfing source crystals, which has been known to the Emperor."

"And they dare not easily enter the Arc de Triomphe to grab people, so the only way to know the ten places that devour the source of crystal production is only the emperor."

"At this moment, I am afraid that all the forces of the entire universe, including the old city of Sushang and the Heilongjiang of the Tenth Heaven Palace, have closely followed our Arc de Triomphe. In this case, we want to slip quietly. Going east, it's impossible to succeed."

"Once we blew our whereabouts, then the forces will know that the ten phagocytic sources are from the eastern star, even if the specific location is near the city of Hei, it is extremely unfavorable to us, at least, the eastern star The black city of the domain will surely obstruct us from entering the range of the stars that belong to them. Although we can act secretly, the heavenly forces that pretend to be the first universe will sneak into it."

"But then, it is extremely inconvenient to act. We can't even officially reveal the fleet, and the constraints are not small..."

These words, which are all other thoughts including Ye Xuan, are being thought of. At this moment, he listened to all his bones and all of them said it. Everyone suddenly looked at each other and was relatively speechless.

"Since I was stared, I couldn't eat a single food anyway. It wouldn't be a big deal. Well, everyone will make a fortune together. When the good things are unearthed, they will be hard to grab each other. What are the tangles?"

Just at this time, the wretched mosquitoes on the side suddenly suddenly snorted and whispered, while still covering his face with a disgusted expression: "Moreover, that place is not good. There must be a thunder to die. This kind of good thing is naturally to let others go to the top of the tank!"

"Damn, next time you dare to lick your black hair stinky face in front of this prince, and immediately smashed you!"

Ye Xuan turned a blind eye, even if there was a decision: "If this is the case, then it will do the opposite. As the saying goes, the water mixes well with the fish. This time, we will first mix the water and then wait for an opportunity. Acting!"

"Naples, send the scout team a few expenses, quietly spread the news..."

Chapter 3157: Stormy

His phagocytic system has activated many complex affiliate systems before the phagocytic system, because Ye Xuan killed the gods and won the award, successfully exited the Nine Stars and upgraded the system to the Starry-level phagocytic system.

For example, you can redeem a variety of things, such as the gods, medicinal herbs, martial arts, treasures, scorpions and other exchange systems.

There is also a forging system that can forge artifacts and make their magic weapon stronger.

Even including the blood system, let Ye Xuan have the blood of various beasts, such as the blood of the sword god, the blood of the **** of war, the blood of the undead, and so on, the ability of each blood is different.

In addition, there is a magic weapon system that completes the tasks delivered by the system and gains the magic of various capabilities.

In general, the phagocytic system can do a lot of things. Although it is only an intelligent system created by the pioneer of the Terran Technology, it has growth.

However, many accessory systems of the phagocytic system need to be activated in order to activate the activation. Before the phagocytic system has been upgraded to the star-level phagocytic system, the activation condition is to consume the source of engulfing, and after the upgrade, this is The activation of ancillary systems becomes more complicated, and the system does not even prompt until the conditions are met.

For example, when Ye Xuan's personal starry-sky communication system was activated, it was because of the fragment of the starry sky and super brain that he had the system to prompt. Before that, Ye Xuan did not know how to activate the personal starry communication system. The system does not have any hints on the activation conditions.

As for the source of devouring, after the system is upgraded to the star-level phagocytic system, it is the currency to be exchanged.

Of course, this is not to say that the role of the source of engulfment is weakened. On the contrary, the role of the source of devouring, after the system is upgraded to the starry level, has not only failed, but has risen.

After the system was upgraded, the original system exchange store's convertible items were also refreshed. It is impossible to enter the starry sky environment, but the low-grade treasures under the starry sky level are also too tasteless.

In the refreshed system exchange store, in addition to various treasures, and even a variety of scarce mineral deposits, as well as the blood of some precious starry beasts, etc., it is more attractive than the previous exchange store!

Some of the treasures and the blood of the starry beasts are the leaves of Ye Xuan, who are now very rich. They are especially heart-warming. They are some rare mineral deposits. They are also the same. If they can be exchanged, he will be able to transform the soldiers. The Star Tears, the Wars, the Glass, and the Battleship Caves are again condensed.

At the moment, these three most basic treasures are all epic level of the starry sky. If you do another fusion of condensate, you have the opportunity to enter the starry sky to the treasure level.

The artificial starry sky is rare. Like Lei Diyin, it is naturally formed in the universe. The only artificial starry sky that Ye Xuan knows today is the life fortress Longye.

If the three basic treasures he used to get into the sky can be promoted into the starry sky to the treasure level, just by virtue of them, Ye Xuan's personal comprehensive strength, will be a new level.

However, Star Treasure is not a small thing after all. It is for this reason that since these three basic treasures have been promoted to the starry epic level, Ye Xuan has never found a suitable treasure of the same kind to re-integrate with them, and this wish, mostly It will fall into the system exchange shop attached to the phagocytic system, where some treasures and precious minerals are enough to match.

Unfortunately, Ye Xuan had only one source of devouring before him. It was still given by the system after his phagocytic system was upgraded to the starry sky level. He had never been willing to use it and could not use it.

Because the starry sky system exchanges treasures in the store, the exchange price is all from the source of one hundred swallows!

Some of the top treasures and mineral deposits require hundreds or even thousands of sources.

Even with the eleven sources of devouring that he has in his hands, it is not enough. Mao can't exchange one!

For this reason, Ye Xuan can be said to be the place where the black scorpion city is suspected of having a large number of devours of source crystals. In any case, you can't miss it!

"Even if this is the battle with the Black Dragon City in the Eastern Territory where the Ten Heavens Palace is stationed, the Emperor is not hesitating."

With his fists clenched, Ye Xuan's sly flashed a touch of fine mans. At this moment, he had made up his mind: "It's the old monsters in the emperor's emperor's cabinet, the prince is not afraid, and it's forced to Like turning your face, the ten-day palace of the comprehension camp, oh..."

.....

Thin seven shots, once is ten devour source crystals, the news spread, the entire death star field is sensational.

The eyes of all major forces gathered all toward the Arc de Triomphe.

Especially after learning that Skinny was actually on the spot, he said that he had lived in the Arc de Triomphe, and he was still the main city of Triumph in the main and ten guards, which proved that he really became the news of the Xuanhuangzi camp. These people who are concerned about the forces of the Arc de Triomphe, all of them, are aware of the fact that it is the channel of the seven devours and the hidden secrets that must have fallen into the hands of the Emperor Xuan.

In other words, the Emperor Xuanzi will soon have some action, and the major forces only have to observe it in secret. After the power is dispatched, they can follow the vine and reach the final goal.

For a time, the entire death star field was in full swing. Different forces, big and small, arranged the eyeliner to wait around the Arc de Triomphe, closely observe all the movements, and at the same time quickly dispatch the strength of the manpower, ready to dispatch and compete. It is suspected that there are a lot of mysterious places that devour the source crystal!

It was also at this time that a news that was extremely explosive, but suddenly spread rapidly, and caught up with it, stunned all the forces that were concerned about the Triumph.

Because this news is from the inside of the triumphant star, and it is also said by a high-ranking high-ranking person of the prince.

The mysterious land that is suspected of producing a large number of devours of source crystals is not the dead west star field controlled by the immortal dynasty, but the death of the eastern star field controlled by the black scorpion.

As soon as the news spread, it sensationalized the entire death star field in the first time, and it was confirmed on the same day. The Triumph City issued an official comment, which recognized the authenticity of the news.

Such an accident, so that all the people who are concerned about the Arc de Triomphe's size and power are not taken care of, and they have not waited for them to come back. A large number of star-studded powerhouses have been in the death west star area controlled by the immortal emperor's old city. It rushed toward the eastern starry field of the Black Power City sphere.

They originally thought that this was only the triumph of the Arc de Triomphe. The purpose was to lead the forces around the Arc de Triomphe to let them take the opportunity to go to the real target area.

At this time, Xuan Huangzi personally went out, the goal, pointing to the eastern star field where the Black Dragon City is located...

Chapter 3158: Black city

Before the expedition, Ye Xuan took the Thunder Fortress and the three fortresses of the Black Wind, the Black Mosquito and the Holy Son all into the immortal world, and, in addition to leaving some necessary strength to stay in the main city of Triumph, seven More than a few mosquitoes, soldiers and scoops, all of them returned to these fortresses and fortresses.

This is a strange soldier. It is of great use in the subsequent positive confrontation. After all, the general strong can basically collect the warships in the body. They are only private small warships, because they even open up storage space in the body. It is also impossible to be too big. Ye Xuan's immortal world is the phagocytic space attached to the phagocytic system. It is a special case.

It is the existence of the mysterious light and the virtual space. The storage space in the body is large. At most, it can only be used as a big fortress. It is like a star fortress with a diameter of 100,000 meters. It is possible to have a stronger existence. Income in the body.

Although Ye Xuan has this ability, it is not a secret, but there are not many people who know it in the death star field. After all, some intelligence news will need to pass from the immortal star to the death star field.

In addition, Ye Xuan left the Arc de Triomphe this time and slammed the death of the East. The battleship on the surface was the Fortress, and the fleet consisted of two 50,000-meter-diameter Star Fortress. There are four large fortresses of 10,000 meters in diameter and ten ships of three-star constant starships!

As for the other 100,000-meter-diameter Star Fortress Kaige, as well as all other small fortresses, large and small fortresses and warships, they all stayed in the Arc de Triomphe, responsible for defense!

As this huge fleet sailed out of the starry sky shield of the Arc de Triomphe and went straight to the dead east, the size and power that was still in doubt, finally completely believed the news that Ye Xuan had released.

Because Ye Xuan's fleet strength in the Arc de Triomphe has no way to divert, there is only one star fortress, which is enough to guarantee the perfection of the Arc de Triomphe, so this is enough to determine the fleet led by Ye Xuan. It is the possibility of a blind eye.

After determining the true reliability of the message, the size of the death star field was fully activated.

.....

"I am going to sneak into the Black City, and I must arrive there before the fleet of the Arc de Triomphe to get the land!"

In the dark void, the sound of a screaming screaming voice rang from a dark starry fortress, and then the starry fortress opened the occult method and disappeared.

Surrounded by the void around it, there are more than ten other warships of different sizes, ranging from a 50,000-meter-diameter star-class small fortress to a 10,000-meter-diameter fortress. These warships are all black and white, and the outer wall of the ship. It is painted with a huge red bull head, indicating their origins.

This huge fleet is clearly from the second universe of the bulls, and the bulls are also one of the alliances of the Federation of the Faro.

At this moment, with the disappearance of the flagship fortress of this barbarian fleet, all other warships in the sky and the sky all opened up the concealed array method, and quickly rushed to the east of the death.

This is just a microcosm. In fact, almost all the federal groups in the Second Universe have a fleet of troops entering the Death Star. However, since this is not the second universe, not their power territory, these second universes The federal ethnic fleets did not establish a fixed base like the Ten Heavenly Palace and the Immortal Dynasty.

This has greatly facilitated their actions to collect and devour the source crystal. In general, the acquisitions can be acquired and acquired, and the fleets of these federal groups conceal the logo of the outer wall of the battleship and immediately become a starry robber. , slammed hard.

Compared with these, at least before the decision to force hard to grab, they dared to show their way. The second universe of the various races in the vast expanse of the death star, the fleet of the heavenly universe from the first universe, can only be more concealed. It's gone.

Whenever and wherever, all the warships in the huge fleet of the Celestials from the First Universe were almost all open to the hidden array, and the hidden signs were secretly acting.

This huge fleet is headed by two 100,000-meter-diameter starry fortresses. The other small-scale fortresses and the 10,000-meter-tall fortress are a large number of servants from the first universe.

At this moment, this celestial fleet from the first universe is also rapidly rushing toward the dead east.

Just after Ye Xuan's Triumph fleet left the Arc de Triomphe, the immortal dynasty fleet headed by a 100,000-meter-diameter starry fortress from the central area of the dead Western Region also drove out of the old city and died in the dead east.

The number of this fleet is not many, it is the private army of the old dragon, but the size of the fleet is not eye-catching, but this commanding fleet is the fourth highest level of the world. The strong, the immortal dynasty royal family, the old dragon 梓本 himself.

Therefore, no one dares to look down on this small fleet that represents the official of the immortal dynasty. It is only a dragon plaque, and it will reach two or three 100,000-meter-diameter star fortresses!

With the size of the entire death star, all of them organized a huge fleet to gather toward the eastern star of the dead. At this moment, the black city in the central area of the eastern star of the death is even more enemies. The land is caught in a state of tension.

Unlike the old city of the central part of the Death West Star, the Black Sea City is the base camp for the death of the Third Universe Terran camp.

If the old city of Supreme is a steel city that is characterized by the power of modern science and technology, then it is also a black scorpion city built on a huge dead star, and there are too many technological factors.

This is also a huge city, but it is covered with a vast black fog all the year round, so that in the distant sky, the whole city is like a fairy city above Jiuyuyu, just because These dense mists like the misty fog are dark, so this city is called the Black City.

Some people say that the Black Dragon City is actually a powerful magic weapon in the form of a giant city. It is a treasure of the town palace of a heavenly palace in the ten-day palace of the human race. It can be powerful and small. It can be made smaller in an instant and easily moved elsewhere.

As for whether this statement is true or false, it has never been confirmed, it is just a guess.

Compared with the more open Terran technology camp, the Ten Heavenly Palace, as the supreme hegemon of the Terran cultivation camp, has always been very mysterious, and rarely interacts with the outside world. It is extremely conservative.

Therefore, in the Black City, basically no star-studded strong people are stranded, and it is even more impossible to live longer. Even some star-studded powers who come to trade with the devour of the source crystals are all completed, and will immediately Leaving interestingly...

Chapter 3159: Death star

There are ten heavenly palaces in the Ten Heavenly Palaces. Each of the Heavenly Palaces has a four-seat and five-seat palace. The existence of the main palace level is equivalent to the royal family of the immortal dynasty.

Sitting in the black base of the official base of the Ten Heavenly Palace, it is also the supreme power of the Zhou Guangjing. This person is named Huai Dongzi, and is one of the four vice-presidents of the Sixth House of the Tenth.

In addition to Huai Dongzi, in the official base of the Tenth Heaven Palace, there is also an identity and the existence of the Emperor Xuanzi. It is the Shaogong Palace of the Sixth House of the Tenth, and it is also the black house in the past. Huai Dongzi came to the death star field for trial!

This person is called Tianchenzi, and it is not weak to cultivate the realm. It is already the seventh order of the black hole!

Tianzizi only has the cultivation of black caves, and its status is only the lesser palace of the sixth house of the tenth. It is still a certain gap with the vice-president of the sixth house, Huaidongzi. It is said that the latter is the supreme existence of the fourteenth state of the world.

It stands to reason that Tian Chenzi should be the rite of the younger generation in front of Huai Dongzi, respectful and unusual, but in fact it is not the case, it is extremely strange.

At this moment, in the central main city of Heicheng City, Tianzizi alone sat on the head, while Huaidongzi sat still, but clearly sat on the side, and the look on the former face was cold and proud, but Huai Dongzi Accompanied by caution, a pair of Gan is the seat of the genus.

This scene is not only invisible to outsiders, but also the internal powerhouse of the Ten Heavenly Palaces in the Black City.

When you are in front of people, the performance between the two is very normal. Everything is dominated by Huai Dongzi. Only when it is private, Tianzizi will reveal his true status.

That is obviously extremely extraordinary. At least, the deputy palace owner who has surpassed the tenth house of the tenth, reveals the mystery!

"Damn Long Xuan, what exactly does he want to do?"

Tian Chenzi clearly saw the abnormality of Ye Xuan's actions. At this moment, he was very angry. All the forces and forces of the entire death star field swarmed in the direction of the Black Dragon City. He said that he and Huai Dongzi were not nervous. That is absolutely impossible.

The fleet of the immortal dynasty, headed by the old town of Sushang, said that although the Terran camp and the science camp are also competitive with each other, they belong to the same family, and they are not torn because of the interests. After all, it is now a starry sky. The environment, in addition to the human race, there are many aliens of the second universe and the heavenly planet of the first universe.

Really do it, only the others can be seen in jokes.

But the alien fleets of the Second Universe are hard to say. The guys are also extremely powerful. In order to devour the source crystal, the forces of the various communities of the Second Universe are quite impressive.

These guys can be able to hide, hide the logo of the ethnic group outside the ship, and immediately become a star, and they are gone.

As for the powerful fleet of the Celestial family, it is obviously even more of a headache. All the warships in their fleet have opened the occult method almost every moment, and the Tianji people's scientific and technological strength in this area, even the Terran technology. The immortal dynasty of the camp was not as good as it was.

It is precisely because of this that the powerful fleet of the Tianji people stationed in the Death Star has not been found, and has always been rampant in this vast death star.

And now, they have gone straight to the death of the eastern star field...

All of this has brought tremendous pressure on Tianzizi and Huaidongzi. Although the Black Dragon City is strong, there are so many fleets of various ethnic groups around it. Once the Black City becomes a target, it is afraid. It is also going to break into the cup, and it is the truth that it is outnumbered.

"That kid is not good! Palace... Shaogong, this is afraid that it is very difficult to end. If there is no accident, the secret of the death star should have been exposed."

Aside, Huai Dongzi sighed: "The ten guys in the hands of the skinny seven devour the source crystal, apparently from the edge of the death star swirl, this secret, must have been mastered by Long Xuan."

"The guy knows that he is being watched by the forces. He can't simply act alone. He just mixes the water and leads all other forces of all sizes to the Black Dragon City. Let them take the lead and he hides. In the back, wait for the opportunity to fish in trouble!"

"Let's be counted by him!"

At the end of the day, Huai Dongzi once again looked at Tianchenzi with a sigh of relief, with the meaning of awe, and the latter's face was already completely gloomy at this moment, and the singer was flashing, showing a coldness. Killing.

"The phagocytosis mother born in the Death Star whirlpool is extremely important to the deity. The success of the deity's strongest engulfing avatar depends on this and must not be destroyed!"

After some indulging, the dust of the sky was flashing through the stern color, biting the teeth, it seems that there was some big decision, and finally said: "Prepare to reverse the Qiankun Five Elements and move the Dafa, let the six six-member elders separately Responsible for a group of eyes, if the guys are desperate, immediately open the array, then they will all be transmitted to the core of the sixth house, the deity does not believe, the existence of several Zhou Guangjing, can not turn over? "

"In one sentence, the devotional devotion of the deity must not be destroyed. It is still gestating, and there must be no mistakes!"

On the side of Huai Dongzi's eyelids, he naturally understands who they are referring to in the dusty mouth. It is clearly all the sizes including the old town of the old city and the core of the sky. Power giants.

Therefore, after hesitating, he still couldn't hold back. He once again asked: "What about Long Xuan? This person is deceitful. Since he has made up his mind to fish in troubled waters, the initial stage is afraid that he will not rush in the front, in case When the formation was started, he was at the rear, not within the scope of the law..."

"Hey, this child is conspiring to calculate, all this is caused by him, can the deity be easily let go?"

The suffocating suffocating gas in the sky dust body is more intense, and a squeaking sound is heard in the nose, and then it is followed: "This matter is your responsibility. Before the formation of the tactics, at the rear, this 撵Dogs are generally forced into the array area."

"You must know that this time, it is also a huge loss for the sixth house of the deity to move the Dafa five lines. The heavy treasures required for several positions are even lost in the process of moving, and even lost the possibility of endless voids. Such a big price, if you can't solve all the things together, can you be willing?"

"But it's just like this. After this incident, the whole death star field should be able to be peaceful for a while. Before the arrival of the investigative forces of the immortal dynasty and the second universe and the celestial family, the deity is the most The strong devour of the body should be able to complete the birth, as long as the deity is stationed in it, the strongest part of the body will be completed in an instant, and will be able to evacuate this place in an instant."

"At that time, even if they look at it any more, I am afraid that I can't find any traces of the beads. It can prove that everything in this death star is my sixth house..."

Chapter 3160: Devouring

Although there are dozens of the existence of the deputy palace of the Tenth Heaven Palace, it basically matches the old people in the immortal dynasty, and the strength is quite the same.

However, in the old pavilion, the top ten elite emperors, and the rankings of the oldest, the gap is actually quite scary.

The same is true in the Ten Heavenly Palaces. The position of the ten palace lords in the Ten Heavenly Palace is extremely detached. This point can be seen from the respectful attitude of the vice president of the sixth house, Huai Dongzi, in front of Tianchenzi. One or two.

Tianzizi, the apparent identity is the younger palace of the sixth house, but in fact, he is the avatar of the sixth house of the palace!

As one of the four deputy palace owners in the sixth house, it is so respectful before the lord's avatar, how powerful the palace master is, you can imagine.

In the sixth house, in addition to his deity, only the four deputy palace owners and the elders in the palace know.

In fact, Tian Qianzi has a lot of avatars, and his practice of martial arts is called incarnation. It is said that he can be transformed into hundreds of millions. This may be exaggerated, but there is a saying in the sphere of influence of the sixth house: perhaps, A worn-out clothing near you, the seemingly overwhelmed lower-level monk, is not known to the lord of the palace master!

This shows the mystery of Tian Qianzi!

Thousands of years ago, Tianganzi inadvertently got a piece of phagocytic mother crystal, and then germinated to promote it, and finally gave birth to a thought of phagocytosis.

And this kind of phagocytic crystal is to be transformed into a complete phagocytic avatar, enough for him to differentiate into a sacred **** in the avatar, and thus to achieve a strong devour, not only takes a long time, but also needs to devour energy. It is also said to be massive, and a whole vast expanse of stars will be annihilated.

This matter cannot be carried out in the cosmic galaxy controlled by the Ten Heavenly Palace. The loss of a star field is too great, the sixth house cannot afford it, and the other nine palaces of the comprehension camp cannot pay the price of this horror. For him to become this thing.

Although the first universe and the second universe are the best choices, it is not the site of the Ten Heavenly Palace. Because the whole plan takes too long, it takes thousands of years and nearly a million years to put in other universes. many.

Therefore, Tianganzi finally chose the third universe domain, which is located in the star field of the immortal dynasty and the ten heavenly palaces. With the secret method of cultivation, the phagocytic mother crystal was planted.

Subsequently, taking the star where the phagocytic parent crystal is planted as the center point, in the following nearly 10,000 years, the invisible phagocytic effect of phagocytizing the mother crystal, like the encroachment, slowly radiated outward, gradually, a large number The stars are invisibly swallowed up by all the vitality, all the light and heat, and even the energy of the universe's galaxy in the void, is quietly swallowed up.

This is how the death star field came. Now, after thousands of years of development, it has now formed a vast expanse of stars, and the one in the central area of this death star field was planted. The star that swallowed the mother crystal has long since disappeared, turning into a death star swirl.

In the depths of the Death Star whirlpool, the phagocytic mother crystal that was born by the celestial masters of the celestial beings has grown to the point of becoming a huge crystal mother egg, and soon, it will be fully matured. Tian Qianzi has already prepared this detached sky dust, which will absorb all the energy in the flesh and integrate it into the sacred **** of the flesh, and then enter the crystal dome that devours the mother crystal.

Then, the strongest swallowing avatar will break out of the shell...

This day, it was already very close, otherwise the dust will not come to the death star at this time. There is a vice-president who is a master of the Zhou Guangzheng, and it is enough to be optimistic about the death star.

According to the calculation of Tianqianzi, the swallowing corpse in the devouring mother egg in the Death Star whirlpool will be matured within one year!

At this critical moment, the death star whirls because of the immortal dynasty of the Emperor Xuanzi, the forces that entered the area have been eyeing, and how many people hate Ye Xuan, can imagine.

But he is helpless in this matter, because the crystal giant egg that has been engulfed by the mother crystal is bred in the death star vortex, but its phagocytic power can spread, just like nuclear radiation, it will be in the devour star. The effect of some similar side effects is left in the domain. The phagocytic source crystals that are occasionally unearthed in countless stars in the death star field are the product of this side effect.

At this point, Tianganzi is helpless, he can't control it. Therefore, once the phagocytic source crystal of the death star field appears, it will surely bring together the forces of the three universes.

Tianganzi had already anticipated this situation. Therefore, under the premise of pretending that he was also attracted, he gave a few pieces of treasures, all of which were used to arrange the reversal of the five elements of the Dafa. A treasure of the eye.

Once the death star whirls, this expensive ancient squad will start, and all the people and things that are close to the death star will be instantly moved to the core of the tenth house of the Terran camp. Tianganzi has already laid a big squad.

The star of the sky that has been moved past will be strangled in the first place. This is the killing!

After the orders of the Tianzizi were issued, six physiques swiftly rushed out of the city of Hei Mo, and rushed to the death star vortex that was not too far away from Heicheng.

The reason why Tianganzi did not set up the Black Skull City next to the Death Star Swirling is to avoid the situation of no silver in this place, fearing to be suspicious, but I did not expect it to be exposed today, since the death star irritated After the ten phagocytic sources were obtained, they directly caused such consequences.

These six figures are the six elders of the sixth house of the tenth. Tianganzi has been stationed in six palace elders for many years, and each hand has given him a secret treasure as a base.

The six secret treasures include the nine-day ten-day escaping the magic **** shuttle and the heavenly positioning shuttle. This is a rare treasure that is rare in the Terran camp. It is the predecessor of the comprehension camp who personally refines and reproduces in the sixth house of the tenth. inherited.

Among them, the nine-day and ten-day escaping of the demon **** shuttle is a millennium fine iron in the deep sea colds, which is made with the arctic ice-cold ice. It does not need a little pure yang, and is shaped like a weaving shuttle, a total of ninety-one. Going to heaven, there is nothing wrong with it, and evil spirits do not invade.

If you don't have this thing, you can't go wrong!

The secrets of the gods, Wusuo, is a black shuttle-shaped secret treasure of the eternal life. Once launched, the stars, the moon and the stars are all inductive, and they can even blast the smoldering flames and hurricanes. With this shuttle, the five elements of the hurricane are reversed. As soon as the big stealing secret is unfolded, it will be able to lock the core area of the sixth house in an instant, and accurately and accurately move the target of this mystery to the target, and accurately position it, no difference!

Soon, the six bases were set up in the void, the vast space around the death star, and turned into an invisible big net, waiting for the fish into the net...
