

Super D. S 3161

Chapter 3161: Boom

The Death Star whirlpool is located in the void of millions of miles away from the Black Dragon City. The star whirlpool looks like a black hole, but the diameter is only about 10,000 kilometers. What is deep in it? No one knows except the celestial.

Since the formation of this death star, only the deity of Heavenly Man has entered it, but only once!

The entire swell of the death star has been slowly rotating, but this rotation is too slow, and it is much slower than the rotation of the star, and it is simply not noticeable.

The tens of thousands of kilometers of a hollow like a black hole slowly rotates, and it has been thousands of years and nearly 10,000 years of age, gradually forming an invisible horror sucking force, turning into a kind of engulfing power, radiation The distance to go out is getting farther and farther away, and all the energy in the sky, the vitality of all the stars, and the light and heat are all swallowed up.

At this moment, the six elders of the Sixth House from Heicheng City, after setting up the base in the void around the Death Star, have used the secret method to gather everything, and the breath is not diffused, but the Death Star swirls. A large piece of the void of 100,000 kilometers away has been quietly turned into a fierce place.

Once the formation is opened, all the people and things in this area will be instantly moved to the smashing of the sixth house of the tenth.

All this, no one knows!

Among the large and small fleets of death stars in all directions, because Ye Xuan's triumphal fleet is the first to set off, and they are straight, unlike other forces' fleets, they must always pay attention to the navigation direction of the triumphal fleet. , modify at any time.

Therefore, the Triumph Fleet, the first to arrive at the Death Star whirlpool.

With the arrival of the Triumph Fleet, the news spread out, and the other major forces fleets that followed from all sides finally knew where the final target was, and they immediately started to use their horsepower. No scruples, come at full speed!

"Is it here? Once a few months ago, some crystals were blasted from the inside. Among them, there were ten phagocytic sources, which were hit by the thin seven-handed kid. In the distant sense, it was collected!"

At this time, the Triumph fleet had stopped in the starry sky of the tens of thousands of kilometers away from the Death Star. In the top command cabin of the flagship triumph, Ye Xuan looked at the death star in front from the huge holographic virtual screen in front of him. Xuan, muttering to himself, there is always a strange feeling in my heart.

It is hard to imagine that it is such a place that looks like a small black hole on the surface, and it can spurt the starry sky crystal that devours the source crystal from the inside.

Even if this kind of thing can be sputtered out like garbage, what is the inside of it?

Of course, the huge benefits also represent a huge danger. Therefore, although Ye Xuan was the first of all the forces of different sizes, he did not recklessly shoot.

At least, the city of Haicang, which is not too far away, has been letting it exist, but it has not been explored. This alone is enough to make people suspicious.

Ye Xuan's plan is still the same as before, and after the arrival of other forces' fleets, let them first thunder!

The fleet of other forces is still coming, Ye Xuan will sacrifice the Black Mosquito, the Black Wind, the Holy Scout, and the Thunder Fortress, and let them open the hidden array and retreat to the void. At the office.

All of this, Ye Xuan's movements are very fast, plus the empty air in the vicinity of a million miles away, any breath of existence is not detected, so he thought that all these gods did not know, but I don't

know, I was seen by the six elders of the Sixth House, who had been smothered by the secret law, and they were stunned by the special communication method of the Ten Heavenly Palace.

At this point, Ye Xuan's immortal world, there is only a small private battleship, the virtual shuttle, and is evolving toward the 10,000-meter fortress, not far from the life fortress Longye.

As for the Triumph Fortress he brought here, two 50,000-meter-diameter star-class fortresses, four large 10,000-meter-diameter fortresses, ten three-kilometer star-rated battleships, and a total of seventeen large and small battleships. With the fortress and the fortress, it formed a formation, hovering in the void, and did not open the concealed array.

That is also meaningless. When the fleet sailed out of the Arc de Triomphe, it was closely watched by all parties.

Soon after, in the distant sky around, the figure of a fleet of ships appeared one after another.

Even the fleet from the old city of Susie has arrived.

However, in addition to the fleet from the old city of Supreme, representing the immortal dynasty, the dozens of fleets of the base, not only the formation of warships, but also the color of the hull, but on the outer wall of the hull, All of them were masked with the unique logos of their communities.

This is just the fact that some of the forces that have come to the concealed array have not been opened up.

In fact, in the imaginary air around, there are obviously some fleets that have been swayed and sneaked in, and nothing else, at least the fleet of the celestial family will not easily reveal their tracks, even if they will be on the outer wall of the ship. The logo of the celestial family is hidden!

"There is an estimate that has arrived all the time. If it does not appear, it should also be the opening of the hidden array method, crouching around!"

The giant holographic virtual screen in the top-level command cabin of the Triumph slowly shifted the view, and Ye Xuan's line of sight moved with it, and soon all of these fleets were included in the field of vision.

What made him a little depressed was that the guys clearly guessed his intentions. At the moment, like the Triumph Fleet, they all stopped in the void around the death star tens of thousands of kilometers, swirling the death star in the center. It's not clear, but no fleet is swaying.

Obviously, although I don't want to take the first step, I will go to the minefield where the danger is unknown.

"Unfortunately, this situation has already been expected by the emperor. This time, you are led to the black star field, not a conspiracy, but a conspiracy!"

In the muttering, Ye Xuan grinned and laughed. Before he set off, he did indeed use the deductive and deductive power of the phagocytic system to carry out the calculation of this death star to the extreme under the current conditions. I have fully understood its mystery, but I can say a little bit about it.

Therefore, Ye Xuan's emboldenedness is very good.

And knowing what to do next, in order to let the four forces, like the other, keep the restraint and wait-and-see state, quickly lead to the front, for him to thunder, to understand that part of the devour system can not be deduced The core mystery.

With this aim, under the eyes of dozens of large and small forces of the surrounding forces, the squadron's main guns of the ship's main guns began to charge quickly.

The strong and powerful people who did not wait for the shocking shocks of the surrounding forces returned to the world. The sound of Ye Xuan, which was specially enlarged by the Triumph, suddenly appeared, and it rang through the void: "Target: Death Star in front! Now give this prince... Boom it!"

The distance around the sky is awkward.

In the main city of Hei, the Tianzi who is paying close attention to this star field is stunned and stunned:
"Wang Ba Gu, what do he want to do..."

Chapter 3162: All red eyes

The black energy beam of the Death Light Cannon has a diameter of 20,000 meters. It is terrible, and it is bombarded into a small black hole like the Death Star. What happens at that time, no one can imagine.

After all, the energy light column of the dead light cannon has its particularity, and the energy that forms the light column is anti-matter. As long as it is not offset, it will always exist, with inertia, forever ahead!

After all, Tianchenzi is just a detachment of Tianganzi, and this avatar is used to devour the phagocytosis that was formed in the crystal giant egg formed by the phagocytosis. Therefore, the focus is on Yuan. The cultivation of God, the cultivation of the flesh is not too strong.

With the cultivation of the sky duster as the realm, it is impossible to calculate what kind of chain reaction will occur after the energy light column of this dead light gun rushes into the death star.

Other strong and powerful forces, because of the unexpected situation under the Cangjie, did not have time to use the smart hub of the fortress to calculate.

The starlight fortress's death light can take two or three minutes, but this procedure, Ye Xuan apparently has already started before, completed 99%, leaving the last one percent before now. Recharge, just do it.

Therefore, when his screaming voice resounded through this vast void, in less than ten seconds, a 20,000-meter-diameter black phoenix light column whizzed from the triumph of the triumphant fortress. Instead, at an extreme speed, violently swayed toward the death star tens of thousands of kilometers ahead.

Tens of thousands of kilometers, for a starlight fortress, the dead light cannon can be regarded as a close-range shot. This black energy light column, in less than half a second, has already slammed into the center of the death light.

This moment, whether it is the star-studded powerhouses of all the forces of the surrounding forces, or the Tianzizi and Huaidongzi in the main city of Hei, including the six who have already used the secret of the comprehension camp to gather all the breath. The elders of the sixth house of the tenth, without exception, all held their breath, widened their eyes, and looked blank.

A dead silence, only the death light cannons screaming away, the faint but sharp continuous humming sound that ruins the void along the way.

Then, a shocking explosion, suddenly came!

"boom....."

One side is an anti-material energy light column, and one side is a person like a black hole, devours all the energy, light and heat of the death star vortex, and brings together each other, and instantly bursts into an extreme bloom of energy level. Unlike the ordinary, the huge explosions did not have any waves and ups and downs. The only change was the black hole-like death star swirl, which made it even deeper.

In addition, there is a faint light that sputters out from the ruin of the Death Star, like a tiny water polo splashed when a raindrop falls to a pool surface.

Very weak, but a lot, dense, in a divergent shape, lasing in all directions.

It is clearly a crystal, the same size, only the size of the pigeon, but the light is different, all kinds of colors.

Different colors represent different attributes, indicating that although these crystals are the accessory products of the energy that phagocytose the medulla to engulf the star field, but they belong to different mineral deposits, some of them are Engulf the source crystal.

"Sure enough! Thousands of crystals are lasing in the blink of an eye. At least about 10% of the phagocytic source crystals, and other crystal grades are not low. They are all important minerals. These guys... estimated to be collective Red eyes!"

Looking at the gorgeous scene of this massive crystal sputtering, Ye Xuan suddenly got excited. All this is exactly the same as the deductive analysis of the phagocytic system. This death star is really related to the formation of the entire death star. Inside, there are a lot of high-quality different mineral crystals, and the phagocytic source crystal is just one of them.

The dead light cannons blasted, and under the violent energy impulse, some of these crystals spilled out in an instant.

And these spilled crystals, especially the phagocytic source crystals that are more than 10% in the inside, are the ace of the red-eyed squad that Ye Xuan will watch around.

These guys are sure that after losing one of the ten devours from here, one by one has already been unable to hold back. I can't wait to explore immediately. After all, some of them, even for decades, Can't get ten phagocytic sources.

It was only because Ye Xuan's actions were so strange that they were suspicious, so this impulse was temporarily slammed down and forcibly endured.

At this moment, the large number of crystals spurted out from the front star of the Death Star, the effect is nothing but the last straw that crushes the camel!

All the people, at this moment, all looked red, and the sound of exclamation suddenly rose.

"God, what have I seen? Devouring the source crystal! A lot of phagocytic sources..."

"That is called the thin seven guy, it really got the ten phagocytic sources from here, it should be a slight overflow of the intention, let him get ten, and what we see now is a lot of overflow How many, how many, at least thousands of phagocytic crystals!"

"It's made, it's made, this time it's really developed!"

"What are you doing? Just collect it all at once. God, there are dozens of devours that go straight to us. This is the resource that can only be obtained in the past 100 years. Today, it is automatically sent to the door. The rhythm?"

As these exclamations rang in the large and small warships, all the warships, fortresses, and fortresses that were still quiet in the surrounding emptiness were all moved, and they sent out a beam of energy, like a net. It is chased by a crystal that is sputtered in all directions, shrouded and captured.

In the process, some of the fleets that had opened the hidden array method and did not reveal their tracks, did not calmly remove the cover of the hidden array, and participated in the action of capturing these lasing crystals.

However, the huge fleet belonging to the Tianzu nationality has never appeared. In addition, the triumphant fleet at the foot of Ye Xuan, after blasting the energy beam of the dead light cannon, also fell silent, and there is no follow-up move.

In less than a minute, the thousands of sputtered crystals were captured by a series of light beams, all disappeared in the void.

Then, among the small and powerful warships around the sweet taste, the red light of the road, together with the death star swirling in front of the star field, gathered together.

At this moment, the sky dust in the city of Hei Mo has a chill, and suddenly he has a thought that emerges from his mind, making him all fall like an ice cave. His look is suddenly changing, and there is no such thing. The sign suddenly roared: "Damn Longxuan, this is the rhythm of being killed by him..."

Chapter 3163: Blowout

In the Death Stars, there are only two imperial cities that represent the ten sacred palaces and the sacred cities that represent the immortal dynasty.

Other forces of all sizes, including the Second Confederate Commonwealth, and the First Universe's hegemonic celestials and their servants, have no fixed bases in this star field, and live in warships all the year round.

Even the old city of the emperor, who represented the immortal dynasty, got more than 20 pieces of engulfing crystals in ten years. At that time, the emperor who was in charge of the old city in the old city was excited to return to the immortal city.

It is conceivable that other large and small forces are in the death star field, and how rare the phagocytic source crystals can be harvested under normal conditions.

This was originally an extremely scarce resource. Otherwise, after discovering that it was able to produce phagocytic source crystals, the major forces of the three major universes would not have soared together.

It is for this reason that at this moment, when the large and small forces gathered together, in just one minute, they harvested the phagocytic source that they usually got for hundreds of years, the seat of this fleet It's conceivable how the heads of the Kui class existed and how excited they were.

Just a shot, there are more than 10,000 crystals from this death star whirlpool, not only all scarce mineral deposits, but also more than a thousand phagocytic sources!

Where can I find such a good thing?

This is the case with a single shot. What about the ten shots?

Can't you blow on the spot?

As soon as I thought of the exciting picture, the commanders and the seated people of the various ethnic fleets in the imaginary air were immediately screamed like a shot of blood.

The commanders of some fleets seem to be afraid that other fleets will not participate. They have all passed through the flagship starry voice system of the fleet, and the excitement of their voices has been unscrupulously transmitted.

For a time, all kinds of excited screams resounded through this vast star field. I don't know if I thought I would enter the wolf nest.

"Why are you still squatting? There are more than a thousand devours of source crystals in one shot, and there are countless other rare minerals. This dead star must have hidden secrets!"

"Yes! Fortunately, we were discovered today, or can we not all be cheap?"

"Ten Heaven Palace is really not a thing. This death star is so close to their base, Heicheng. How could they have never explored it? Haven't they found any hidden secrets?"

"This is absolutely impossible. Even the thin seven is originally an immortal dynasty camp. It's just that the ants passing by here have slammed into the Universiade and found ten devours of the source crystal. From such a dark city, how can it be? Will you never notice its anomalies?"

"According to the deity, they may have been stationed a large number of people on the circumference of the Death Star whirlpool on weekdays. If there is a small spill, immediately collect it!"

"So, the black scorpion city must have countless devours of the source crystal. It is no wonder that the major forces are vying for the source crystal in this death star field, but only they are not warm, and they have been in the middle of the day. Muffled and made a fortune!"

"This is not the key! The key is that there are more phagocytic sources and even more valuable mineral deposits in the Death Star whirlpool. Heicheng City may have sent the fleet into the area for exploration and mining..."

"Why are we tired and tired outside, only a dozen years have passed for a hundred years, but they can send the fleet into the death star swirling a boat and a boat to install? Eat broth without leaving a bit, too shameless !"

"This is the rhythm of anger. Everyone fires together and bombs them..."

"Boom out!"

"boom!"

"Booming..."

.....

After waiting for it, some of the warships have been fired directly. The starry sky fortress is bombarded with dead light cannons. The 20,000-meter-diameter black anti-matter energy light column has six or seven roads in all directions and is swirling toward the death star. Boomed over.

In the meantime, there are a lot of energy beams that are shot from the star-class fortress, the 10,000-meter-diameter fortress and even the five-meter-diameter small fort.

The latter are the largest, large and small, and the thickness is not equal to hundreds of channels, all of which converge toward the death star.

The colors of these energy beams are also different. After all, warships and fortresses and fortresses come from various ethnic groups. The construction techniques are different, and the driving energy used is different. This directly leads to this result!

Large and small energy light columns, hundreds of roads appear at the same time, the targets all point to the same direction, this tens of thousands of kilometers of dark dark air, like an instant weaving a large energy network, is extremely embarrassing Eyes, eye catching.

In the face of all this, the main city of Black Skull has always been concerned about the Tianzizi and Huaidongzi of this star field, but it has long been stunned.

The fortresses and fortresses of so many warships have been fired together. In case the death star whirls, it is directly smashed to the fragmentation, causing the void to collapse. At that time, the Tianganzi who is still bred inside is still With the strongest devour, I am afraid that it will not break out of the shell, and I will die in the middle.

The situation has reached a critical level, and the dust will not be taken care of. The body will be ordered immediately.

It was also at this time that the scene in the huge holographic virtual monitor screen in front of him had changed dramatically again.

What is shown in the monitor screen is the situation around the death star.

At this moment, with the hundreds of thousands of different sizes of the energy of the star guns, the continuation of the blast of light, all of them rushed to the different positions of the big death star vortex, and the sound of the huge explosion of the blast It also suddenly appeared in the first time.

"Booming..."

"boom!"

.....

In the huge explosion, like a small black hole, the whole death star whirls within a thousand miles, and in a moment, it was torn open for more than ten hundred kilometers of small mouth, and there is a faint light in it. The spurt is getting closer and closer...

"puff!"

"Puff puff....."

More than a dozen huge dull sounds came out. From the crater of the death star swirling, more than a dozen crystal giant columns formed by countless crystals, like a blowout, instantly rushed out and rushed. After a few hundred kilometers, it was like a water column, and it splashed around.

The only difference is that it is not a drop of water, but a spotted crystal with different colors. Among them, the number of phagocytic crystals, even if it is less than 10%, is already unimaginable. The horror number is gone.

Blowout, finally broke out!

This moment, Ye Xuan has opened his mouth, he never expected, in this death star swirl, there is such a huge amount of devour source crystal...

In the stunned, Ye Xuan whispered to himself: "God, even the rare mineral deposits and the phagocytic source crystals can be sprayed like water without money. This death star is swirling... What else? "

Chapter 3164: Rapid retreat

"God! It's a rich man, this time it's really rich, and at first glance, at least a hundred thousand devours the source crystal, the deity has never seen so much in his life..."

"Don't say that I saw it with my own eyes. The old man has never heard of it. This time it really hit the Universiade!"

"Have you seen it before? I have never even thought about it. This death star is a huge treasure trove of minerals. It is hard to find the three universes!"

"Damn, I don't know how much the black guys in the city have benefited in it. Haven't you found out? Until now, they haven't appeared. It's obviously guilty. I know that I have already made a lot of anger, plus the benefits have been If you have enough, you will not show up!"

"Yes, the fact should be like this, didn't you see it? In the empty side of the west side, a huge silver fleet appeared. It is clearly a celestial fleet from the Tianji nationality. Such a massive phagocytic source crystal spray generally appears. The public enemy Tianji people can't sit still, and they don't hesitate to show up and fight for it. The black city has not yet arrived, which is enough to explain the problem!"

"No matter what, they ran the monk and couldn't run the temple. They first took advantage of the immediate benefits, and then went back to the city of Heiqi. The immortal dynasty was also kept in the drums this time. Heicheng City ate a single food, presumably This time, I will join forces with the federal people from the Second Universe to join the Ten Heavenly Palace!"

"You must let them spit out some, deceive me for so long, thousands of years, it is too hateful!"

"Everyone works together, devours the source crystal like a massive amount, don't rob, I am a federal family. At this time, I have to have a group consciousness, and I can't let the Tianji people get too many benefits..."

"call out!"

"Hey..."

.....

As the voices of these words rang, from the dozens of nearly a hundred fleets in all directions, a large or small camera beam appeared in an instant, even the west side of the star field just appeared, from hundreds in the fleet of large and small warships and fortresses and fortresses, there are also a large number of silver-white light beams that have been bombarded.

In an instant, a large number of rare mineral deposits and phagocytic source crystals from the dozens of false cracks in the Death Star vortex were intertwined with the light-like column of the light, and they plundered one after another. Lively and crazy, for a fleet of forces surrounded by the surrounding forces, today is definitely the happiest moment since hundreds of years.

All the forces' fleets, including the Tianzu, are gradually becoming crazy in this plundering harvest...

Only Ye Xuan's triumphant fleet, at this moment, quietly began to retreat, he knows that the guys in the front who are in a state of ecstasy, after more and more crazy, must be like him, will think of that place. What kind of treasures do you have inside the squirting such a large amount of rare mineral deposits and the death star vortex that devours the source crystal?

Ye Xuan's purpose is to devour the source crystal. Even the current state of blowout has exceeded his biggest estimate.

This was originally a happy thing, because it meant that this time it was a great joy and a big harvest.

But Ye Xuan has always believed in a philosophy, that is, there must be a demon in the abnormal situation!

This death star whirlpool can have such a huge amount of phagocytic source spewing out, there must be heavy treasures, and this level of heavy treasures also means great danger.

Ye Xuan retreats at this moment, not because he realizes the danger, he is ready to retreat. He just wants to pull the safety distance a little longer. For a giant star of the death star that is vastly more than 10,000 kilometers, it just keeps with it. The distance of tens of thousands of kilometers really made Ye Xuan's heart not stable.

What's more, Heicheng City sat in this star-studded tens of thousands of years, to say that they did not know the secret inside the star-swirl, and killed Ye Xuan did not believe it.

The people who have been in the city of Hei Mou have not appeared yet, and this matter is also suspicious.

Ye Xuan quietly retreats at this moment, watching the follow-up response of the Black Dragon City is also one of the reasons.

As for the piece of death star that has been stared at him, he is not worried at all. The former gangs who are already faint and ecstatic are not a whole. Instead, they are made up of dozens of nearly 100 aliens. The fleet consists of even the natural enemies of the Faroese Federation.

Even if there is no treasure in the death star vortex, in a short time, it is absolutely impossible for any fleet of forces to instantly suppress all other fleets and dominate the squad!

In this case, Ye Xuan has the time to retreat to the distance to see and see, it is best that these guys are killed and killed. At that time, he is better than the final fight for the benefit of the fisherman...

"Long Xuan that little **** really has problems!"

Just as the Triumph fleet under the command of Ye Xuan, slowly and orderly retreating backwards, in the city of Hei Mou, millions of kilometers away, the face of the sky is already incomparably, but it is extremely angry. The line of sight is staring at the holographic virtual screen in the hall, and gnashing his teeth: "All other fleets are madly scrambling for the rare mineral deposits that spurt out and devour the source crystals. Even the stable and mysterious sky fleet can't stand up. At the beginning, he ordered the fleet to retreat at this moment!"

"The legendary Emperor Xuan is not so timid and awesome. Obviously, this guy has a bigger plot. It is clear that he wants to temporarily withdraw from the game. After everything is clear, he will benefit the fisherman!" "

When I talked about it, the look on the face of Tianzizi has become more and more embarrassing, and even there has been some madness. He hated: "All this today is all made by him."

"Even if the deity ordered the activation of the reversal of the Five Elements and moved the Dafa, all the fleets within the 100,000-kilometer radius of the death star were removed and filled in the void that had already been laid in the core of the sixth house. But now the death star vortex has been tossed out such a large movement, fearing that it is in the farther star field beyond 100,000 kilometers, it can also clearly see."

"The scope of the formation method can only reach a distance of 100,000 kilometers. The strong stars in the area outside this area will not be affected by the slightest. Even if the black scorpion city is fully chased afterwards, it is difficult to protect such a vast death star. There will be some fish that slip through the net."

"That is to say, the deity is the strongest devour to the birthplace of the bred, this time it is really afraid to be leaked out, the **** Longxuan, caused so much trouble to the deity, actually thought about taking the fishing Benefit?"

"Ha ha ha..."

At the end of the day, Tianzizi was extremely angry and laughed. The whole person was in a state of madness. When even roaring with the secrets of the Ten Heavenly Palace, he went to the sixth house elders who were crouching around the death star. The order to activate the reversal of the five elements of the Dafa movement was issued.

"Hey, since you have already entered the game, don't expect to retreat again, the little bastard, the deity will give you a ride!"

In the complex, Tianchenzi rushed out of the Black Dragon City. Behind him, Huai Dongzi, the vice-president of the Sixth House of the Sixth House, followed closely, and he also received the instructions of Tianzizi at the same time: "I will stop Long Xuan immediately. In any case, he and his triumphal fleet will not be able to withdraw from the void area covered by the array..."

Chapter 3165: Intercept

"Booming!"

"Hey..."

.....

Just in front of the death star whirlpool around the void is a mess, all kinds of broken sounds raging, countless beams of light intertwined flashing.

At the foot of Ye Xuan's triumphant fortress, there are two other 50,000-meter-diameter star-class fortresses that make up the triumphant fleet, four large 10,000-meter-diameter fortresses, and ten three-kilometer star-rated battleships. A total of seventeen large and small warships and fortresses and fortresses formed a defensive formation with each other, suspended in the dark void and began to slowly retreat.

In the other directions around the entire fleet, the Black Mosquito, the Black Wind, the Holy One, the Devil's Scout, and the Thunder Fortress all open the hidden array, which is also accompanied by a slow retreat...

In just a little more than a minute, the entire Triumphal Archway is far from the edge of the vast expanse of the death star, and it is already sixty-seven thousand kilometers away. If you continue to evacuate, there will be another two minutes or so. Can retreat to 100,000 kilometers.

The fleet apparently did not stop here, still slowly withdrawing!

It is also at this moment, the shock is steep, and ... is from the rear of the fleet evacuation direction!

"boom!"

A terrible atmosphere of horror came from the distance, and the distance was more than a hundred thousand miles away. In the blink of an eye, it was close to 100,000 kilometers behind the fleet.

The gloomy gray airflow slammed open, and the two figures carrying their hands hanging over a cloud of clouds appeared.

It was just the dust and the Huaidongzi that had just rushed out of the city of Hei.

The distance of millions of kilometers is actually a blink of an eye. This is clearly the reason why Huai Dongzi is fully committed. The full force of the 14th Daoist Zhou Guangqiang is far more than 100,000 meters. Star Fortress.

All of this was not even expected by Ye Xuan. When the figure of the two people appeared on the giant holographic virtual screen in the top command cabin of the triumph, his face changed instantly, and his mind flashed and subconsciously murmured. Silenced to himself: "Black City? Huai Dongzi! The young man should be the fifth house of the sixth house of the little house, but... Why did Huai Dongzi stand behind him half a step? "

At the same time, the side of Naples, his face is also abruptly changed, and the voice is exclaimed: "The speed of horror, Huai Dongzi clearly displayed the full speed of the rush, this is the trend, directly blocked us. Lu, what do he want to do? Emperor Huang, expand space, I have an ominous premonition, I am afraid that something is going to happen..."

"boom!"

Didn't wait for Naples to finish the words, the canopy of the 100,000-kilometer-long rear of the fleet was like a mountain ash cloud, and the sneering Huai Dongzi on his face had turned to the edge of the fleet's east, where the Son was No. and the area where the Thunder Fortress is located.

Then, after Ye Xuan returned to the gods, Huai Dongzi actually raised his hand directly, and did not see any shocking momentum. It was actually a hundred thousand kilometers away, and the Thunder was silently The fortress and the vacant space of the Son of the Son blew out a huge fireball out of thin air, showing a large void.

The diameter of the fireball is about 10,000 meters. It was smashed by his fist and it was clearly the Son.

Ye Xuan turned pale, and at the same time, he quickly received the prompt of the phagocytic system. The personal star communication system attached to the system just received the message from the Thunder Fortress. The moment before the opponent's shot, the central star of the Thunder fortress Quickly analyze the crisis and start a teleport in advance. Now it has reached hundreds of thousands of kilometers...

Just a hundred kilometers away, it was an understatement that destroyed a 10,000-meter-diameter demon squad, and the cultivation of the 14th dynasty of the dynasty was so terrifying.

Ye Xuan looks like a blue-green, although the number of the saints is initially followed by his demon slaves, even the mosquitoes and soldiers are not stationed in it, but after all, there are three devils on the saints. The slaves of the thousand people, for a moment, he lost a big fortress, there are three thousand magic slaves!

In addition, the other party's move is nothing more than a description of the problem, that is, the four fortresses and fortresses, such as the black mosquitoes that have opened the hidden array method, are simply undefended in his eyes.

The annihilation of the Son of the Son can be withstood, but if the black mosquito and the black wind are also annihilated, Ye Xuan can be completely mad, the first to follow his genius, including mosquitoes and soldiers. The scouting army is all in the two fortresses of the Devil.

There is absolutely no loss!

"Naples, leaving behind a small fortress and all the ten star-studded temples, desperately bombarding the cover, all other battleships, led by you to jump immediately, including the black wind and black mosquitoes... immediately!"

In the shape of the madness, Ye Xuan suddenly roared, and at the same time turned to the side of Yingtai: "You and Neapolitan evacuation, the emperor will arrive soon!"

After saying that it was step by step, the top-level command module of the Triumph Fortress was instantly released, and the figure appeared in the dead space outside the ship.

In accordance with his orders, in addition to the black mosquito and the black wind, the other triumphant fleet, the triumphant fortress where Naples and Britain are located, and another stellar fortress, and four 10,000-meter-diameter fortresses, a total of six A giant battleship will quickly expand its space and evacuate.

As a sacrifice to the back of the temple, there is only one small fortress and ten permanent stars, which is definitely not enough to drag Huaidongzi.

These eleven battleships, together with the sacred son that had been annihilated before, are the limits that Ye Xuan can bear. If it is lost again, it is feared that the defense of the Arc de Triomphe will be stretched.

Therefore, Ye Xuan can only take his own shots, that is, he and the British and Taiwan have stayed. In the face of the supremacy of the 14th dynasty, the British and Taiwanese are also sent to die. Only he can rely on the magic dragon. Shadow, sorrowful blood corner, Lei Yuanzhu or headless baby corpse, under the premise of ensuring their own safety, successfully dragged and even hit the enemy!

These four Ye Xuan hands are currently the strongest killer, and you can achieve this effect if you choose one of them.

Therefore, Ye Xuan is completely fearless!

"The prince is an adult..."

At the same moment that Ye Xuan's figure was on the side of his body, Naples suddenly exclaimed, letting him drop the Xuan Emperor alone and take the big troops to expand the space and leave, he could not do it anyway.

What makes Naples even more awkward is that this moment, the wretched mosquitoes that have been shrinking their heads, suddenly smashed out in the body a horrible atmosphere that is not weaker than Huai Dongzi, and even more distinct.

"Let's go, staying is also a burden! Although the territory is strong, but there is a veteran, no one can hurt him, not to mention... he doesn't need it!"

This momentary wretched mosquito swatter has completely changed from person to person, with both hands carrying, a pair of masters and styles, looking at the void outside the ship, muttering to himself: "What is the breath of Heaven? It turned out to be him. A avatar, but actually weak like this... a little bit interesting!"

Then, one step took the triumph...

Chapter 3166: Mosquito killing

"Booming..."

"boom!"

.....

As the Son was bombarded, a large number of battleships in the Triumph fleet fired at the same time, except for the Death Lights of the Triumph Fortress, which had just fired a shot and were still charging. Other warships and big fortresses and small fortresses. All of them blasted the energy beam of the Super Stars gun of the Star Artillery, and rushed toward the Tianzizi and Huaidongzi.

"The death light can still make the deity have some taboos, but only such an attack... is invalid for the deity!"

Huai Dongzi sneered, and once again, this time it was not a punch, but a wave.

After repeated blows, five or six three-kilometer-long star-rated warships exploded into a horrible huge fireball, reflecting a void, while also attacking the triumphant fortress and other big fortresses, but After the annihilation of the Son, all the warships had opened the energy shields in the first place, so the other big fortresses were still innocent.

The three-kilometer captain's star-rated warship, even if the protective cover is fully open, can't resist the blow of the strong champion of the universe. Of course, this is because the attack of Huaidongzi seems to be random, but in fact it is It is well prepared, even if it is not fully implemented, at least it is quite deliberate.

"Stop, as a state of the universe, but take some weak star battleship Sawei, old things you are not too flustered?"

At this time, Ye Xuan was just taking a step from the triumphant fortress. He suddenly saw this scene. In fact, he lost six or seven stellar warships in the blink of an eye. There were more than a thousand Neapolitan officers and men in the game. A convulsion in my heart, I have already witnessed splitting.

Suddenly roared: "This prince will come to you!"

"Just by you?"

Not waiting for Ye Xuan to finish the words, Huai Dongzi has been extremely angry and laughed, and was scorned by a small ant colony in the sixth realm of the nebula. As the palace of the sixth house of the tenth, the matter made him face. I can't hang it: "The old man knows that you have some means. He used to smash the waste of the dragon scorpion in the old city of Susie. However, he just entered the glory of the universe. The old man is already the sixth-order of the celestial light. Big flashed my tongue..."

Between the words, there are still tens of thousands of kilometers away, and I want to make a fist to Ye Xuan.

At this level, the power of the magical technique is horrible, but often a random punch, no fancy, its power, like a crack!

"Zhuguang sixth-order is a fart?"

Just at this time, the wretched mosquitoes took a step from the triumphant fortress, and the white eyes turned over. They didn't look at Huaidongzi. The triangle eyes were flashing, and the smile was settled on the body of Tianchenzi. It is even more powerful than the Huai Dongzi, which is far from the same realm, and at least the supreme power of the fifteenth realm.

At this moment, Tian Chenzi, Huai Dongzi and Ye Xuan all turned to look at the past subconsciously.

Ye Xuan's body shape was like a ghost, and he opened his mouth directly.

The dust of the sky is a fascinating look.

Huai Dongzi is even more exclaimed: "Mosquitoes and old ghosts? How are you here? Are you not dead? This is absolutely impossible..."

"Death, your sister is dead! Just rely on you a little deputy, and dare to call the name of the old man?"

The wretched mosquitoes and white eyes turned again, and then the face sank, and suddenly screamed: "Roll!"

"Booming..."

A horrific and horrible spiritual force that swept over the sky, from this moment, without any warning, emerged from the body of the wretched mosquito, and instantly whizzed away, turned into a huge whirlpool, and directly slammed into the sky. And Huai Dongzi two.

"boom!"

A huge bombing came, and the awning gray clouds like the giant mountains at the foot of the two men collapsed instantly. The mouth of Huaidongzi's mouth was hung, and the kite with a broken shape was generally flying out. It blinked tens of thousands of kilometers. remote.

In sharp contrast to this, it was the dust that stood before his half-step, but the figure was not moving, but his face was pale, so he bit his teeth tightly, though he did not speak, but he was in the middle of it. It reveals the color of despair.

Obviously, the reason why he was not bombed is not that the strength is stronger than that of Huai Dongzi, but that the wretched mosquitoes are deliberately intended to leave him. This is clearly a rhythm to be cleaned up.

Its so powerful attack, the effect achieved is so accurate, one person was tens of thousands of kilometers, but one person does not move, this is the control of the power of the micro, this is no different, so that Ye Xuan body shape again mad.

"Spiritual storm? Nine-level spiritual strength? Who are you?"

In the madness of the body, Ye Xuan turned to look at the wretched mosquitoes and screamed.

What the other party has just played is the spiritual storm of the spiritual power that Ye Xuan also masters. Of course, the effect of Ye Xuan's display is definitely only the phoenix and the glory of the moon. Strength is here.

However, with only one kind of mysterious technique that even the supernatural powers can't count, it is possible to seriously injure a supreme strongman of the celestial environment and fly tens of thousands of miles. This confirms the repair of the wretched mosquito swab from one side. realm.

Absolutely far beyond the state of the universe, at least the supreme existence of the fifteenth state of the world, even stronger.

It is Yingtai, and in front of him, even the ants are not as good.

However, such a strong person, but called his own master of six months, the matter is just to recall, Ye Xuan feels the back of the cold, the whole is like an ice cave.

More importantly, this guy's spiritual strength is clearly the ninth level, which shows that his spiritual source core has completed the eighth transformation, and now it is a nine-level source.

This point Ye Xuan can't accept it anyway. You must know that even the crazy mosquito emperor is only an eight-level source nuclear. The legendary first-generation demonic emperor is also an eight-level source nuclear.

The one in front of him has a nine-level source core. Doesn't he mean that he can invade Ye Xuan's knowledge at any time?

The spiritual brand of the eight-level spiritual power left by the crazy mosquito king could not stop his nine-level mental exploration.

"Master, I am not a mosquito killer? The old thing is just called, you didn't hear it..."

On the eyes of Shang Ye Xuan, the master style of the wretched mosquito and insects is gone, and the face is smiling, the triangle eyes are with a smile, and the incomparable wretchedness.

While talking, while raising his hand to his forehead, he rushed out of his mind, and he was held in the palm of his hand, spread out and showed to Ye Xuan: "Look, This is the two spiritual imprints that you have implanted into my source core before and after. Is this always true?"

In the palm of his hand, it is exactly the spiritual source nucleus that Ye Xuan implanted into the source nucleus of his brain twice before and after. The grade is different, absolutely correct, the breath of Ye Xuan is completely certain, and more importantly, this spiritual branding has been clearly In the loss of the devil's group, in addition to Ye Xuan, others can't be condensed.

But all this has proved that the wretched mosquitoes in front of me are indeed the ones that they first saw, but he... actually called his master now, why is this?

Ye Xuan's whole brain is messed up!

On the other side, after seeing the wretched mosquito and killing Ye Xuan as the master, Tian Chenzi suddenly changed his face. When he looked at him again, the dawn in his eyes was already very complicated.

Then, I turned to look at the wretched mosquito, and sighed: "I didn't expect you to be alive..."

Chapter 3167: Heavenly dust

"The old man did not expect that he would meet so soon! Although he had already predicted that he would see a friend in recent days, he did not expect that it would be you, and it was just a avatar..."

The eyes of the wretched mosquito-killer were taken back from Ye Xuan, and they were thrown at Tianchenzi. Then they raised the hand and the back of the death star, and they grinned. "Looking out, you can't do it. But the divergent Yuanshen is very stable. Should this be used to win the battle? It seems that the death star swirls should have a very strong avatar, like an unconscious baby. Only when your Yuanshen settles in can immediately become a new avatar."

"It can make you pay so much attention. Presumably, the value of this avatar is not only low, but it is also very important. Hey, how lucky is this old man? Although he is not interested in that avatar, according to the calculation of the old man, it also I have no chance..."

"But it's just a good thing that can destroy you. For me, it's already a very good thing, not to mention the fact that according to the old man's calculations, the avatar will eventually be cheaper. This is your jade... Thank you!"

"puff!"

Listening to the words in the sleepy mosquitoes, and then looking at his wretchedness to the extreme, revealing the shameless, clearly belonged to the face that was cheaper and sold, the face turned from white to black, and turned from black to green, eventually became A piece of purple dust in the sky, actually gas to the mouth of the mouth will spurt a blood arrow, the spirit immediately wilted three points.

Obviously suffered from a minor internal injury, but also the **** of the gods.

This suddenly put aside the side of Ye Xuan looked silly, gas to vomiting blood, but I heard that, I am angry with the gods, this is what the ghost?

"Lord? Just rely on him? Hahaha..."

Raised his hand and wiped away a trace of blood from the corner of his mouth. The dusty face smirked and smirked. He glanced at Ye Xuan, his face was stunned: "Don't think that the deity can't see it. This kid's cultivation is really strong. The first step of the nebula is not concealed. The so-called Xuanzizi gods are just a scam. The immortal dynasty is really speechless!"

"Only even your mosquito killer, but also entered the game, you counted for a lifetime, and finally turned out to be a servant of a nebula, ah, hahaha..."

"Mosquito slaughter, your amount of scorpio is really too disappointing to the deity..."

"More than nothing, in the future, the most important thing is that in front of you, you can break a big thing in your day, the old man is not too small today! Old friends, bye..."

"boom!"

The wretched mosquito smack grinned again, and the triangle eyes were fine and sloppy, and there was no endless wretchedness in an instant. The voice of the mouth was still unsuccessful, and an equally insane mental storm suddenly emerged from his body. In an instant, it was wrapped in the sky.

The latter knew that this part of the body must be smashed, but it was a step in time to explode, and the whole body suddenly exploded. The voice of the voice was like a screaming scream, and the sound of the endless emptiness was empty: "The squad! The little doll, the deity is in the first The Sixth House is waiting for you! Hahaha..."

"call out!"

At the same time, from the flesh and blood of the sky dust, a gray and faint glory is also an instant violent blast, even the spiritual storm of the wretched mosquito can not be blocked, instantly spanning

hundreds of thousands of kilometers As far away, the blink of an eye rushed into the dead star vortex in front of the void, and plunged into it and disappeared!

"Isn't it still alive? Unfortunately, there is absolutely no mistake in the amount of the old man's scorpion. The avatar in the death star whirlpool is already out of your reach!"

The wretched mosquitoes frowned and turned to look at the direction of the death star swirling, grinning.

"boom!"

"boom!"

.....

Just at this time, the virtual sky outside the death star vortex, in six different directions away from 100,000 kilometers, suddenly burst into the sky.

From these six directions, six astounding energy light columns rushed up, revealing a rich and ancient atmosphere. This moment, like the stars, the sun and the moon, are all inductive, within the imaginary sky within a radius of 100,000 miles. From the six towering energy beams, there were countless flaming flames and hurricanes in the sky.

In an instant, this 100,000-kilometer-long emptiness of the sky will be turned into a caged place. Six huge energy light columns will be the base pillars, which will bloom and bloom and spread on the endless high sky. Into a huge giant network.

This is the power of the ancient treasures of the six bases to avoid the magic gods in nine days and ten days.

This treasure is forged and quenched by the millennium fine iron in the deep sea cold, and it is made by the Arctic 10,000-year-old cold ice. It does not need a little pure yang, it goes to the earth, it is all right,

and it is not evil. Invading, the formation of the formation at this moment, instantly turned into a total of ninety-one giant shuttle-type magic weapons shaped like a weaving shuttle.

Between the six energy beams, the end of the energy, with a short burst of energy, the entire piece of void is woven with countless arrays of chains, banned everything.

Including Ye Xuan, including wretched mosquitoes, including thousands of ships of dozens of forces and forces around the void, all were banned.

Only Ye Xuan's triumphant fleet, except for the six or seven star-rated battleships that had been annihilated by Huai Dongzi and the other sons, all of them, all expanded before the formation of the formation. Jumping and fleeing to the area of the array of 100,000 kilometers away, at this moment in the void of hundreds of thousands of kilometers to look at this side, all the strong inside the battleship, all exclaimed.

In the 100,000-kilometer virtual sky outside the death star, thousands of large and small warships, fortresses, and starry fortresses were actually given a pot. Now they are only trapped by this huge wilderness, but then There must be no good things, everyone knows that something big is going to happen.

With such a big game, Black Skull is really big!

"Reversing the Qiankun Five Elements and moving the Dafa?"

"Is it still used nine days and ten places to avoid the devil's gods and the secrets of the gods, such as the gods of the gods, and the ancient treasures of the gods? What kind of powerful avatars are born in the death star whirlpool, which is so big, even the town is the ancient treasure of the palace level not hesitating to use it?"

Seeing this scene, the face of the wretched mosquito and tortoise changed. What suddenly seemed to be thought of in the speech room, and the voice disappeared and exclaimed: "No, with these two treasures of the ancients, the five elements of the rebellious and unconventional movements will be unfolded. Locking the core area of the Sixth House of the Ninth, accurately and accurately shifting the target of this mystery to the target, precise positioning, no difference!"

"The old guy is going to move all the people in the area of the formation to take the place back to the core of the sixth house of the tenth house, silently destroying the mouth. There must have been a void in the air..."

"There is only one chance, and it rushes into the death star swirl. Only in this way can we avoid being removed by the formation!"

Turning to the first sweep to Ye Xuan, the wretched mosquitoes suddenly screamed, and a strong spiritual force in the body instantly rushed out: "Destroy the whirlpool..."

Chapter 3168: Chaos and great escape

"boom!"

This time, the wretched mosquito swabs are still the spiritual power secrets that Ye Xuan also masters, but Wei Neng is much stronger than the previous mental storm, destroying the whirlpool!

The magical power of the demon from the body has surpassed that before, and instantly formed a huge spiral of spiritual power, which rushed.

Coupled with the spirit of the mosquitoes up to nine levels, it has reached the extreme of the magical power of the devil, powerless.

In an instant, this piece of hollow cage formed by the innumerable energy beams of different sizes rushed out of a huge gap.

Unfortunately, this gap does not point to other directions, but to the front of the death star swirl.

Obviously, the wretched mosquitoes are still obsessed with the most powerful engulfing of the secrets of Tian Qianzi in the death star vortex. This time, the whirlpool of ruins was opened for Ye Xuan, but it was also directed.

Ye Xuan had no choice but to smile and wave his hand to sacrifice the hole. He stepped into it and immediately turned it into a purple man, rushing to the death star.

At this moment, the shape of the wretched mosquito-killer disappeared, but it was not the death star vortex that rushed forward. Instead, after rushing out of the cage, it was a certain supernatural power at the moment of entering the death star. Life and health set a figure, and then suddenly a stagnation, the teleportary rushed to the direction of the triumphant fleet.

At the same time that the hole in the virtual shuttle was immersed in the death star, the sound was also clearly introduced into the ear: "The old man has measured the amount of the scorpion, and the owner has to go through the crisis, but in the end it will be able to make a fuss, and there are Great harvest, since then, fly to the sky, rest assured, the triumphant star has a husband sitting in the town, as long as the ten masters of the ten palaces do not come, will be innocent..."

At the same time, thousands of warships, fortresses and fortresses of dozens of fleets of small and small forces within the 100,000-mile-long void cage also thoroughly fried the pot at this moment.

The scene that happened in the void in the tens of thousands of kilometers before, is long, but in fact, from the appearance of Huai Dongzi and Tianchenzi, to the dust of the sky, it is only about half a minute before and after. .

Such a short period of time, and the death of the stars in the vicinity of the dozens of the fleet of all the strong, the original mind is also all in the competition for the rare mineral deposits and phagocytic crystals from the star vortex, no one pays attention Everything in the distance, in a hurry, no one can react.

Until the dust of the sky blew itself, and when the reincarnation of the Five Elements moved to the Dafa activation, all the star-studded powers suddenly realized that they had entered the trap and were counted by the Black House.

It is a pity that the formation has already started. Not all of them exist, and they can all look at the ability to escape.

Before this void cage was completely formed, there were only six star fortresses that managed to escape.

Five of the flagship fortresses of the five large fleets of the federal forces of the Second Universe, and the other one of the two flagship fortresses of the Celestial.

The rest, including the other starry fortress of the Tianji nationality, and the stenciled star fortress in the old-fashioned scorpion, are all trapped inside the void cage formed by the law.

Large and small warships, fortresses and fortresses are still thousands of, dense and shocking.

Some of the three-kilometer captains' star-rated warships are in the midst of reversing the movement of the Dafa and the five elements of the Dafa, within the imaginary air within a radius of 100,000 miles. From the six towering energy beams, there are countless poisonous flames and hurricanes. The next moment of blasting, it was completely blown up into a huge fireworks.

At least two or three hundred!

All the warships and fortresses have been vying for the devour of the source crystals, and even the defensive shields have not been opened. The big fort above 10,000 meters in diameter is good, and the martial arts can be smashed in a short time. The shield will open, at least temporarily.

However, this led the three-kilometer captain's star-rated warships, but there was no such opportunity at all. The first time of the reunification, it exploded under the arrogance.

In an instant, within the void of the 100,000-kilometer-wide cage, hundreds of huge flame **** exploded, accompanied by the radiance of the energy beam and the rare mineral deposits that spurted out. It is so gorgeous!

The vast expanse of the void is like a dream, so that all the star-studded powers who are escaping from the void in the distance, are stunned and disappointed...

It is also this moment, the wretched mosquitoes show their destruction of the whirlpool, and they spurt a channel in the reversal of the five elements of the Daqin, pointing directly to the death star.

Immediately afterwards, Ye Xuan's cave rushed into the room. At least, he left the empty cage that was banned by the Dafa and the Five Laws.

And staying here, there must be a major disaster in the follow-up, and all the star-studded powers trapped in the cage are all well-informed, even though they are as jealous of the death star in front, but At least someone has taken the lead and rushed in. This is the only way to live.

And compared with the empty cage that only the infinite crisis is about to come, at least there is a large number of phagocytic source crystals in the front of the death star.

Maybe you can grab more when you die.

Do not enter the tiger's den, do you have a tiger?

For a moment, all the star-studded powers trapped in the void cages were all red-eyed, and a large fortress and star fortress, as well as those surviving star-rated battleships, all rushed to flock.

In the blink of an eye, several Star Fortresses followed the Ye Xuan in time and rushed into it.

Then, several star-class small fortresses rushed in.

Finally, there are more than ten large bastions with a diameter of 10,000 meters.

In just five or six seconds, as many as ten battleships rushed into the death star whirlpool, the smallest one was the 10,000-meter-diameter fortress.

It was also at this moment that this escape route, which was smashed by the ruined whirlpool, finally disappeared completely. The reversal of the tactics of the five elements of the move of the Dafa was offset in less than ten seconds. The spiritual power of the vortex will instantly repair the gap!

At this point, the chaotic escape of all the warships trapped in this hollow cage was also over.

Remaining in the scope of the array, as the beasts generally left and right, the guns are even more violent, but no effect, the size of the warships that can not be rushed out, but there are still nearly a thousand.

"Hey..."

The sound of the emptiness of the emptiness caused by the frequency is coming to an extreme.

This 100,000-kilometer-long death void, steeply Guanghai masterpiece, bursts with dazzling dizziness, and all the star-studded powers who are horrified at the center of the void are subconsciously closing their eyes at the same time.

In the next moment, when they opened their eyes again, the entire star-shaped cage was empty, and all the people and things in the 100,000-mile void, including the rare mineral deposits of the blowout and nearly a thousand battleships. , completely disappeared without a trace!

Until then, Huai Dongzi, who was smashed by the wretched mosquitoes, was able to rush to the scene. At first glance, the array had already been moved, and there were still nearly 100 ships of various forces in the imaginary air in the distance, almost all of them. It is a fortress and a small fortress. Obviously, it is impossible to destroy it all.

He suddenly made a horrible sound, and he was ashamed in the face: "When it is over, there are so many people who have escaped from the formation area. The lord's avatar is self-destructive, and the black scorpion city is going to be chaotic..."

Chapter 3169: Another egg

"call out!"

"Booming..."

"call out!"

.....

The sound of the emptiness sounded densely, and it was accompanied by some huge roaring sounds. Here, it was already inside the death star whirlpool. Outside the dead star field, the void was reversed and the five elements moved. After the Dafa was fully launched and completed, it was again Nothing happened.

All the people who successfully escaped into the whirlpool of Death Star, including Ye Xuan, also had no idea to think about the outside world at this time, because they themselves are still in crisis, and they are innocent.

To be precise, it has just escaped from Longtan, and it has fallen into the tiger's hole. The people have not slowed down, and new troubles have already arrived!

The Death Star vortex looks from the outside, and is similar to a small black hole. It is for this reason that there are many strong stars in the place where it is located, but the ones that have actually entered are not one except the celestial being.

Black holes are extremely dangerous, even light can be swallowed, let alone other, so no one will be bored to explore an unknown black hole.

In fact, the interior of the death star is not much different from the general black hole.

Here, the same is a dark world, not even light and heat!

In a sense, the death star is actually another kind of cosmic black hole. Their essence is almost the same. The black hole is formed by the ultimate collapse of the universe void after the big bang, engulfing all light and heat, including Light.

The death star whirls, although there is no big explosion before it is formed, but because it has a phagocytic medulla inside, it devours all the light, heat and light, so its meaning and essence, really and black holes There is not much difference!

The only difference is that all the light and heat engulfed by the Death Star whirlpool, as well as the light, the universe's void energy, are all in one place, where is the deepest part of the core of the Death Star whirlpool, where there is a giant crystal. Big egg.

It is also the place where Tian Qianzi's strongest devours are born!

At this moment, all the scenes inside this death star whirlpool have already stunned all the star-studded powerhouses including Ye Xuan who fled into the area.

More than a dozen starships, except for Ye Xuan's Dongxu shuttle is just a small private battleship, the other ships are at least the level of the 10,000-meter-diameter fortress.

There are seven Great Fortresses, five Star Fortresses, and three 100,000-meter-diameter star fortresses, for a total of fifteen giant warships.

Among them, three 100,000-meter-diameter star fortresses, one is the silver fortress of the Tianzu nationality, and the other two fortresses belong to two of the two families of the Second Universe.

The other twelve large fortresses and small fortresses are also belonging to different second cosmos groups. The giant warships that entered this death star are divided into different forces, and none of them belong to the same force.

The three starry fortresses in the town are all the existence of the twelfth realm of voids, even the top of the Tianji tribe in the Star Fortress.

The strongest person in the death star field of the Tianji nationality, although the same is the supreme existence of the 14th state of the world, but the existence is in another starry fortress of the Tianji nationality. At this moment, it has been reversed and moved. Dafa moved to the core of the sixth house of the Ten Heavenly Palace of the Terran Camp.

At the moment, these fifteen powerful warships of various forces and Ye Xuan's small private warships are separated from each other. After entering the Death Star vortex, they are not clustered in the same area, but all the warships are now facing the same place. The goal is galloping at full speed.

There, there is a giant crystal big egg!

It is a giant, it is relative to its material. In fact, this crystal dome is not too big, it is also a high-profile look, but it is formed by the phagocytic source crystal. And it is natural, can not see the slightest gap, clearly is a whole.

Therefore, it is said that it is a giant egg. After all, the general engulfing source crystals are regular pigeon-sized crystals. It resembles this strange crystal. After the size of the pigeon egg, it is difficult to continue to accumulate. It is to a greater extent.

The reason why this crystal dome has such a large scale is naturally because it has swallowed up all the energy in the vast sky of the vast expanse of death, all the light and heat of the stars.

The original phagocytosis of the mother, only the size of the baby fist, was planted in the core of a star, and has since triggered a huge change that lasted for thousands of years, and a vast expanse of stars has become a victim. The innumerable stars annihilate, the price of death to death, the devour of the giants, and the rare crystals and phagocytic crystals in the death star.

In addition to this huge phagocytic egg, there are a large number of rare minerals and phagocytic crystals in this death star vortex. The energy, light and heat of the entire star field are all captured into the death star vortex. It is not uncommon to have so many rare crystals in the Death Star vortex, coupled with the effect of phagocytizing the nucleus.

If not, the previous blowout is not possible.

Nowadays, the dozen or so gaps in which the Death Star vortex has been torn have healed by itself. The death star whirls and blows, but a large number of crystals inside the star vortex still exist.

As soon as Ye Xuan's hole squid entered, he immediately launched the ultimate speed, and collected it with all his strength. A large number of crystals were like a rolling torrent, like a sea of rivers, and were taken away by the hole.

Although the interior of the hole shuttle uses the folding space technology, it can't help such a huge amount of rare crystal perfusion. The reason why it has not been blasted is because Ye Xuan in the ship has been collecting all the time.

All the crystals of the rare minerals that entered the hole of the shuttle were all absorbed into the immortal world of the body. In the process, an equal amount of rare minerals poured into the hole, and then was taken away by Ye Xuan... , looping endlessly.

In less than a minute, the rare mineral deposits and the phagocytic source crystals suspended in the void inside the Death Star whirlpool have been taken away by him for 60% to 70%!

Then, the fifteen major warships that followed the cave and rushed into the death star whirlpool finally returned to the gods, like crazy, like Ye Xuan's cave, swirling the star All the rare minerals in the void and the phagocytic source crystals have been plundered.

It was two minutes passed, and the remaining 40% of the resources were all divided by all the warships. Among them, nearly 10% of them fell into the bag of Ye Xuan.

At this point, from the beginning to the present to the present, the entire death star vortex, except for the crystal dome, all the subsidiary resources, were taken away by Ye Xuan by more than 70%, while the other forces of the fifteen warships, Only only about 30% of the time...

After doing all this, including Ye Xuan's cave shuttle, the 16 large and small warships in the Death Star whirlpool, as if they had made an appointment, they all have a tacit understanding of the giant crystals deep in the core of the star vortex. Egg... spurt away!

Chapter 3170: Ruthless usurp

The speed of the hole shuttle is fast, but at the moment it is not fully motivated. Ye Xuan is still busy collecting all kinds of rare minerals and phagocytic crystals inside the ship.

The other fifteen large and small warships, due to the slower reaction rate, only collected about 30% of the rare mineral deposits and phagocytic source crystals in the death star.

Although the entire death star whirlpool is vast, the inner rare mineral deposits and phagocytic source crystals are not filled with the sea water in the ocean. Therefore, although the amount of this 30% exceeds the total amount of external blowouts before. But in fact, it is not a lot. At least, it is distributed to fifteen large and small warships, and it is not enough to fill the inner space of the warship.

Therefore, the star powers in the three starry fortresses do not need to be like Ye Xuan. Because the internal space is filled, they have to be busy collecting the rare minerals and phagocytic crystals in the ship to the storage space. Go inside the magic weapon.

After collecting the rare minerals inside the Death Star whirlpool and phagocytizing the source crystals, they put their energies in the depths of the stars in the distance, and the fifteen large and small warships all started. Speed, go and go.

In less than ten seconds, the fifteen large and small warships all surpassed the hole shuttle, and rushed to the front, among the three fastest star fortresses, the distance from the crystal dome was less than 100. Kilometers.

More than a hundred kilometers, placed on the land, especially for ordinary living, may still be a distance, but in the starry sky, it is really nothing.

Especially in this black hole-like environment, the sense of distance is really weakened too much. For the 100,000-meter-diameter starry fortress, it is even more negligible.

It can be said that these three starry fortresses have completely reached the front of the crystal dome, and they are almost smashing.

It is also this moment, the difference is steep!

"boom!"

The shocking explosion suddenly came out, and the large crystal egg of the size of the singer, in the absence of any warning, was suddenly blown at this moment.

The elliptical big egg instantly split into numerous small pieces. The whole big egg is formed by the phagocytic source crystal. It was originally a phagocytic medulla who was engulfing the void energy of the entire death star, all the stars. Light and heat, which lasted for thousands of years, grew up to this day and turned into a giant egg.

At this moment, it is blasted out that the existence of the egg is mature, and all the essences of the phagocytosis have all gathered in the existence of the giant egg. At this moment, it is only ordinary. The phagocytic source crystal.

Although the phagocytic source crystal is also a treasure, it is an important strategic resource for all the forces of the three major cosmic planes. Its specific role in these forces is still unknown, but they are so eager to send large fleets to death. The star field can be seen.

At this moment, after the smashing of the big egg, all the people ignored the devour of the splatters, on the one hand because they had already collected a lot of them, but more importantly, What they really care about is actually the existence of the crystal giant.

Can be nurtured in such a huge overall phagocytic source crystal, even the entire death star vortex, the formation of the entire death star is related to it, such a huge price, shocking handwriting, gestation in the giant egg, How come it is!

In the first moment of seeing this crystal dome, all the people have been blinded by the huge greed of their hearts, and they have not realized that it may be extremely dangerous.

At this moment, the crystal giant egg suddenly exploded, and the consciousness of the strong people was all attracted to the past by the whole of the giant egg, but it was not taken care of.

Therefore, when the crystal body exudes a crystal clear and brilliant light, just like the perfect human body that was carved out by the engulfing source crystal, including all the people who are hanging from the back, Ye Xuan Zhang opened his mouth, as if he had been thundered. In a short period of time, there was no other reaction, and the whole brain was in chaos.

It is at this moment that the horrible crisis... is coming!

A strong horror of horror, suddenly emerged from the crystal body inside the giant egg, although invisible and inferior, but more than the ordinary black hole can have more power It's soaring.

In an instant, the three 100,000-meter-diameter starry sky fortresses closest to him were sucked up and suddenly stopped.

However, this is only a beginning.

This mysterious crystal human body is like a newborn horrible beast. He has just hatched from the crystal dome. The first consciousness... is actually eating!

And his existence as a star-to-treasure of the phagocytosis of the mother-of-pearl, although the self-destructive soul of the dusty dust that entered the body at this moment has not yet obtained the control of the whole body, but only this crystal body The attribute instinct of the body has already been destined for its eating, only a way.

That is to swallow!

Just as the phagocytic mother in the process of gestating him, plucked countless void energy, the light and heat of countless stars, and even a whole vast star field, turned into the general devouring of the dead land!

overbearing! Frenzy! Red fruit is ruthlessly usurped!

"boom!"

"boom!"

.....

The three starry fortresses closest to the crystal body were instantly blasted without any suspense, fragmented, and all the star powers and materials in the fortress were exposed to the dark void in the interior of the Death Star, and instantly The speed visible to the naked eye is swift and violent.

Including all kinds of resources in the fortress, including those who are caught off guard, and all the star powers are flustered at this moment.

Then, the other 12 small fortresses and the 10,000-meter fortress behind the three starry fortresses also followed the footsteps.

A huge sound of explosions rang, and it was strange that such a huge space fortress and starry fortress had completely disintegrated, but none of them showed the flame of the explosion.

It is as if they are all being invisible and indiscriminate, causing a sudden disintegration.

In the same way, this is closely followed by the twelve space fortresses and small fortresses. All the resources and star powers are like the three starry fortresses that were in the first half of the second. All resources and powerhouses are all It quickly began to stagnate and decay, and the extracted energy turned into an invisible storm, and the eyes of the crystal body that seemed to be completely unconscious were poured into the body.

He seems to... devour everything!

Seeing this scene, Ye Xuan's face instantly changed wildly, and there was a sense of life and death that had never been seen before. The moment came, and his entire body and mind were completely shrouded.

Because of this moment, he suddenly felt the hole in his feet, and he violently trembled inexplicably, seemingly disintegrating at any time...
