

Super D. S 3171

Chapter 3171: Scoop is coming

When the crisis came, Ye Xuan's entire body and mind sank to the valley!

The crystal body in the depths of the death star in front is too strange, and the invisible phagocytic power emitted from the body is terrible. The 100,000-meter-diameter starry fortress is torn by this invisible force.

The reason why Ye Xuan's Dong Xuan was still surviving did not suffer the same disaster. On the one hand, it was the farthest distance, and it was smashed by the fifteen large fortresses and fortresses. The horror of swallowing power has been weakened a lot when it comes to this side.

On the other hand, it is because the hole shuttle is a star-space epic battleship. It was merged six times by Ye Xuan. It even consuming a special material to expand the universe in the wormhole. A wormhole ship with a plane-level wormhole jump, it may not be as strong as a starry sky fortress, but in terms of strength, there is definitely a fight.

Even so, the hole squid still trembles violently at this moment, and it is possible to completely disintegrate the rhythm at any time!

"It broke the treasure ship of this prince, and this is not over!"

When he slammed his teeth, Ye Xuan did not hesitate to take it one step at a time. At the same time, he waved his hand and directly absorbed the hole in the body.

This ship is his brainchild, and some of the same types of warships incorporated into it are even a matter of chance. It is now that Ye Xuan re-integrated and forged a ship, which may not be possible. He did not dare to gamble.

Although he took a hole in the hole, if he directly exposed himself to the influence of the horror of horror, but Ye Xuan's heart was determined, there was no head baby, and he would never sit down and watch him fall, but the hole It may not be!

What surprised him was that as he stepped out of the hole and the ship was in the immortal world, the figure was unprotected and exposed to the void inside the death star, but Ye Xuan did not feel the slightest. The power of devour.

It is as if the invisible power of swallowing is only useful for warships.

But this is obviously impossible. The star-studded powers that fell from the fifteen large fortresses and fortresses in the front of the sky are clearly being frozen in the rapid terrain. Some of them are weaker, and now they have become dead bodies. It is.

Floating in the void, lost all life!

However, Ye Xuan was completely innocent and became a special case, which made him confused and stunned for a while!

In the next moment, Ye Xuan suddenly felt the sea trembled a little, and a whistling whistle, from his eyebrows!

Suspended on the top of the head, it squirts an invisible mysterious atmosphere. This is also a kind of power. Although Ye Xuan can't understand it, he can feel it. Because of his knowledge of the sea, this mysterious atmosphere has already been extremely rich.

That is the empty medullary crystals slowly accumulating over time.

But at this moment, the hollow medullary crystal hanging over the top of the head is rare and generous once. The mysterious atmosphere poured out inside the crystal is like a spring spouting, turning into an invisible waterfall, covering Ye Xuan's body and protecting it.

Until then, Ye Xuan was suddenly realized. It is no wonder that he did not feel the power of the horror to swallow the crystal body. The power has been blocked by the mysterious atmosphere of the hollow crystal.

The emptiness of the medullary mother is the expansion of the entire cosmic plane to the extreme, and the destruction into a black hole in the universe, and the ultimate condensation will eventually form.

When it condenses to the extreme, the big bang will come, and then it will expand again, so repeated, like the cycle of life.

The hollow medullary crystal is the essence of the emptiness of the medullary mother of Ye Xuan. For it, all the forces related to the law of the universe's void should be ignored!

It is itself a manifestation of the extreme enrichment of a cosmic plane!

The mysterious atmosphere diffused from the interior of this hollow medullary crystal can not be explored even by the phagocytic system. Even if there is contact, it still can't analyze the characteristics of its attribute power, and only then, it can see its high-end degree, blocking The power of the crystal body to swallow, naturally nothing to say!

After all, the other side was also plundered by a whole force of the universe's universe, and the power of this aspect could not affect the voided medullary crystals, or even the subsidiary products of the formation of the hollow medullary mother...

"call out!"

"Hey!"

Almost in the next second, hanging in the hollow crystal of the head of Ye Xuan, suddenly shot a black mang, rising in the wind, while screaming out, a strong horror, a moment of fierce, affecting a void, Trembling, rushing toward the crystal body in front.

It's the emptiness of the emptiness of the emptiness of the emptiness of the sacred crystals of Ye Xuan.

Previously, when the void was passed down the tower, this empty vault was only an energy form, and it was extremely large, about 5,000 feet, or 15,000 kilometers, bigger than a 10,000-meter-diameter starry

fortress. Big circle. There are nine golden giant horns on the back of the scoop, plus the larger one on the top of the head, a total of nine small ten golden horns!

Nowadays, its size is a few small laps, about a thousand feet, that is, three kilometers!

But it is no longer an energy form, but an entity!

Obviously, it is the phagocytosis of the medullary crystal that captures it into the body and uses its own power to condense it. The flesh and blood body can be weight-plasticized. This crystal exists between the living body and the non-living body. It is even more difficult to mold a physical body!

Although it has shrunk, it should continue to grow!

It's just its power, but it's clearly weakened too much.

When the void passes down the tower, the void-shaped body is five thousand feet, although it is not the ancientest, but it should be the only one of this level. At the moment, after the solid body is gathered, the vulgar atmosphere radiated from the void It is clearly weaker, and the feeling of Ye Xuan is only stronger than the dragon 梓 pattern and Huai Dongzi. It should be between the fourteenth world and the fifteenth world.

Although it is weak, it is not like the wild dragon that was taken away by the headless baby corpse. Because it is still in the form of energy, every coming means consumption, and one day, it will be completely dissipated due to the exhaustion of energy!

In just a short ten seconds, the Void Scoop is across the endless void, and the speed is more horrible than a 100,000-meter-diameter starry fortress. When Ye Xuan reacts, it has already reached the front of the crystal body, but a thousand miles away. It is.

In front, there are a lot of dry and dead bodies, some of which are still dying, especially the two second cosmic federal giants sitting in the three starry fortresses, and the core of the heavenly family, especially these three. The position is the existence of the universe, although it can not resist the loss of the body power by the power of invisible devouring, but it has not been greatly affected in a short time.

At this moment, the positive rushes toward the crystal body and wants to kill.

With the advent of the void, these three people have a sense of insensibility, looking back subconsciously, and then exclaiming, this is the moment, always closes the crystal body of the eyes, and suddenly opened his eyes at this time. eye.....

Chapter 3172: Fighting star shift

"Half-steps? This is impossible..."

"The emptiness of the beast? And it also grows a golden giant horn, which is clearly a emptiness of the beast, how can there be such a presence in the third universe?"

"Long Xuan! It must be what he did! What is the secret of this son? Can you turn out the emptiness of the animal from the emptiness cave of the first universe of my celestial being?"

Looking back, with the emptiness of the veiled figure, the three top powers who are rushing to the crystal body have exclaimed in the air.

These three exist in the body to disperse the breath, all of which are the universe.

One of the two giants from the second cosmic federal group is a strong man, a humanoid, with a pair of huge wings on the back, silver light overflowing, glowing, extremely gorgeous.

It is faintly revealing the cold texture of the metal!

The other body is extremely tall, like a giant, in the top ten feet, a human-like bear, but the body surface is like a hair. The skin is like the bark of a hundred-year-old tree. It is wrinkled and extremely dry. It looks like a body. Huge bark old demon!

As for the core high-level of the Tianji nationality, at this moment, the true body cannot be seen at all, and the whole body is covered by a purple fighter jet of about ten feet.

Fighter armor is also very common in the third universe of the Terran technology camp!

If the warship is a weapon for satellite navigation and long-range attacks, then the fighter jet should be a well-deserved melee reload!

A good combat mech can not only be combined with the controller, but also greatly increase the defense and attack index, and even reach the level of terror across a big realm!

However, in the science and technology camp of the Terran, due to the refining technology of the real camp, more Terran strongs prefer the light war. Therefore, although there are also fighters in the Terran camp, the research in this area is Not too hot, the fighters that are built are far less prolific than the Tianzu people!

In front of the top of the Tianji tribe, who appeared in the fighting machine, the scent of the man who came out after the unity was one, and it was only in the middle of the period, but it was invisible to the crystal body. The force can resist, and the points are not damaged, which is enough to see its grade.

It should belong to the kind of armor that can make the controller play a powerful force across a big realm.

If this is the case, then the top of the celestial family in the mech, its own cultivation of strength, should be in the thirteenth world boundary, and did not enter the universe!

"Hey!"

Just as these three giants who all have the power of the universe, they are already exclaimed. At the same time, they have already come to the emptiness of the recent emptiness. The huge body of a huge body is like a black mountain, without hesitation, booming. Long land directly down!

Its goal is not the crystal body, but the three silver-powered people such as the silver-winged monk!

"Damn! What does it want?"

"Is it really waiting for me to wait for the situation?"

"Hey..."

This scene allowed the three strong eccles to scream and roar. At the same time, they stopped their physiques, and they rushed to the void and scolded them.

Half-step, Qiankun, has surpassed the existence of the nine-order grand perfection of the Zhouguang, and has stepped into the fifteenth realm, far from being comparable to them.

The bark old demon's body instantly bursts out countless black vines, each with a diameter of Mi Xu, not only all of them are as a snake, but when they rush out, they circulate in the void, and they are like a smashing, no end. Then, the blink of an eye is intertwined in the void above the head of the head, and it is intertwined into a giant hammer of a hundred feet. Like a meteor, it quickly slams into the void of the body.

At the same time, the silver-winged scorpion squats behind the wing, and the figure disappears instantly. The law of the universe's void in the death star is already disordered, and it cannot be teleported. Even the warship wants to expand the space and does not work. At this moment, his body The shape of the blink of an eye disappeared, clearly the speed is the ultimate performance.

When it appeared, it was already above the back of the veiled veil, and the silver wings on the back were steep, the silver light creaked, and the void was split, like two handleless blades, which were sharp. Feng, at the same time, smashed into the void!

As for the purple fighter armor that was stationed at the top of a Tianzu nationality, it was also a slamming sound. The surface of the ten-foot-high mech was instantly covered with a layer of black-violet energy shield, and its figure was also washed away. From the beginning, a simple punch was thrown out, but its huge right fist was completely covered by a black ball around the group at this time.

Clearly anti-matter energy!

This punch is like a small dead light cannon. It is invincible, and all matter and energy will be melted under the impact of anti-matter death!

Even the emptiness of the crystal body, which is known as the strongest body of the crystal, can not resist!

This fist can go down, at least it can also blow a hole in the void!

"boom!"

The bark old demon's vines and giant bangs slammed in the hollow of the scoop, and made a huge roar, but unexpectedly blasted directly. The only effect was to make the scooping body shape slightly stagnate, but below The bark old demon has opened a mouthful of green liquid at this moment, which is the counter-attack caused by the collapse of a large number of vines.

I punched myself out of a fist!

At this time, the black mangol on his side flashed, originally still in the distance, just opened the crystal body of the eyes, it was an instant, and the hand was directly inserted into the back of the bark old demon. In the capture and devouring, the huge body of the bark old demon, the naked eye can be seen, and it is already dying!

"No, this crystal monster is awakened!"

"Hey!"

Above the back of the scoop, the silver-winged monk's face changed and exclaimed.

Not waiting for the voice to fall, the emptiness of the emptiness of the whistle has already been shot, the nine golden corners on the back of the scoop are picked up at the same time, intertwined in the void, the speed is almost to the extreme, the whole piece of empty space is engraved The cracks, like a piece of tofu that was being quickly cut by the high-frequency of the nine-handed blade, were completely confused.

This kind of space secret technique is extremely strange. The shape of the silver-winged scorpion is filled with numerous space cracks. The turbulent space in the chaotic space makes it faint, and the figure is abruptly stopped. It's a mess, otherwise it's hard to come back once it's getting involved!

In the blink of an eye, the vignette and the crystal body have solved a strong Zhou Jing. Only the top of the Tianji who is driving the fighting machine is still innocent, but his fist is doomed. The body that slammed into the void, the latter, when the anti-material dead light energy light ball of the mech right fist appeared, it was already stared.

"Hey!"

The fierce emptiness of the whistling sound, the huge golden horn at the top of the empty void suddenly trembled at a high frequency. This seems to be a space secret that involves the law of the void. It should belong to the blood of the emptiness. It was changed in an instant.

The purple mech is like being moved in the direction. The deadly light fist that was originally smothered to the vague scoop is so strangely smashed toward the crystal body that has just solved the bark old demon, and the transformation is fast, such as Fighting the stars, there is no trace to follow...

Chapter 3173: Cattle across the mountain

"Space law supernatural powers? How is this possible? It is only a half-step process..."

In the purple mech, the exclamation of the top of the Tianji clan sounded, and my heart was shocked.

The whole fighter's armor was inexplicably lost. The original shape itself, the arm of the arm blasted to the top of the head, and it turned into a flat body, a punch to the other side of the crystal body... ..

This scene is too strange, and the key is still traceable. As a party, he does not even know how this change happened. There is no sense of it. There is no other explanation except the supernatural method at the level of space law.

The power of the law of the universe is clearly the power of the fifteenth state of the world, and the field that is qualified to touch a little, even the vast majority of the great powers of the universe, may not really touch the level of the law of the universe. Power, this requires sentiment and opportunity.

The Void Scoop is only half-step, and it is impossible to display the magical power of the law!

Where does he know that the emptiness of the **** in the era of the ruins, but a horror that exists only after the ancients of the ancients, although the brand of the ancient inheritance tower has been preserved, is only the **** inheritance of the horror of less than 30%!

Even so, the level of the sacred deity, even if it is only a 30% inheritance, is enough for the current level to touch the power of the space law.

"boom!"

Without waiting for the death of the purple mech, there was a huge explosion of sound in the sky above the back.

The piece was cut into rags by nine golden edges on the back of the scoop, and the void that covered the cracks in the space finally collapsed completely. A large area, about a few miles away, instantly turned into a small black hole. The silver-winged monk who is in this area has not yet returned to the gods, and the body shape has been swallowed up and entered the emptiness of the black hole.

Even if it is not embarrassing, it is like eternal exile, but don't want to come back again!

At the same time, Ye Xuan, who came at full speed in the rear, finally arrived. The skull covered his head and rushed into the shape of the body. The vague scoop that pressed down to the bottom shouted: "Violence, you? In addition to the pressure Can you use some other tricks? The crystal body is also very useful. In addition, the purple mech is also the prince's. The guy inside doesn't matter. If you toss it... the mech is not bad!"

Void Scoops obviously can't understand these words, but its crystal body is reshaped by the refinement of the void crystal. The latter is like a signal transfer station at the moment, Ye Xuan's words mean, the first time passed The emptiness of the medullary crystals was passed out and received by the void.

Its shape is abruptly abrupt, and it stands firmly in the void, like a giant peak, straddle the top of the purple mech and the crystal body!

In the next moment, the high-frequency tremor of the golden giant horn at the top of the void scoop suddenly changed. The sound of the screaming in the void in the sky suddenly became as heavy as a drum.

This must be another kind of **** magical power that touches the power of the law of the universe. If the previous **** is called to turn to the stars, then the kind of sacred magical power that can be used by the vampires can be called a mountain smashing!

Because the purple mech that had just stabilized the shape of the body under the shift of the battle, it was a sudden shock, and then it was completely quiet, and the anti-material dead light ball of the right fist disappeared. The tall figure is suspended in the void, like a sculpture.

If there is no accident, the top of the celestial family in the mech, the moment when the purple mech suddenly shocked, it has already fallen.

Live was born on the spot, but the mech was intact!

This is also the power of the law of the universe's void!

The Void Scoop was originally a half-step, and the **** magical powers formed a powerful shock by the force of the void. The high-level talents in the mechs were repaired at the beginning, almost weakened by two big realms, and naturally hit, Not unusual.

This kind of attack, in fact, Ye Xuan has already seen it before.

It was in the black hole of life in the first universe. At that time, at least the front of the arsenal of the squadron, which was at least a thousand miles away from Ye Xuan and Ba Gu, was suddenly in the air, and suddenly there was no sign. A sound of screaming.

Its horror and horror, the vast black hole of the hollow was shaken, and the sound of thunder and screams rang out in an instant, sweeping over and sweeping.

It was actually led by the whistling, and the force of the void in the large black hole area was instantly swayed into a cage, which was completely crushed from all sides!

This kind of void cage can only be regarded as a mystery, not a supernatural power, nor a true universe void rule, but it is also the inheritance of the blood of the soldiers.

Although the Void Scoop is not a living body, and even if it is counted as a living body, the squad in the black hole of life has nothing to do with the one in the era of the ancient times. The sergeant is an accessory product in the formation of the hollow medulla. The soldiers born in different emptied marrow mothers have nothing to do with each other.

The nature of the emptiness of the medullary mother is the same, although the rank may be different, for the reincarnation products of the extreme contraction and expansion of different cosmic planes, the size of the power depends on the scale of the cosmic plane.

And their formation reflects the essence of the law of the void of the universe. Therefore, if the soldiers are scooped up, whether they are the same nest or grow to a certain height, they can comprehend some laws of space and space, like the blood of the soul, never will Broken!

For these, Ye Xuan has vaguely guessed that it was this high-level squad that was seen by this celestial being, and was killed by this strangely-known sacred sacred earthquake. After a sigh of relief, it was quickly relieved.

"Rely! Raise your hand and turn the stars, and cover your hands and beat the cows. The blink of an eye is two kinds of magical powers related to the power of the void. Oh, great!"

In the muttering to himself, Ye Xuan's face could not help but reveal a fascinating color. These two kinds of supernatural powers have to be jealous. Although they can't communicate directly with the sergeant, the virtual medullary crystal is not very good as a transit station. Buying his account, but Ye Xuan did not intend to give up on this, at this time has been remembered, and then look back and find a way.

After abandoning this thought, Ye Xuan even turned to look at the crystal body standing in the sky not far away, the other party just took over all the vitality and strength of a strong Zhou Jing, and closed it at this time. Both eyes seem to be digesting and quiet.

However, this process of digestion is obviously extremely rapid. When Ye Xuan turned around and looked around, the crystal body with only a few seconds of closed eyes, once again opened the eyes, this time, the confusion in the dawn It faded most of the time and was replaced by a strong resentment and murder.

Moreover, actually speaking, and yelling at Ye Xuan's teeth, it is a bit of a big tongue, the voice is dry, and it is ambiguous to say: "When the king is dismissed, the deity is ruined by Nirvana, and the neck paper is washed. See you next time, if you can't take your head by hand, I am me..."

Chapter 3174: I am a big tongue

The other party's words have not been finished yet, and Ye Xuan's mind has already sounded a familiar system sound.

"Hey, congratulations to the host, found the innate treasure! Attributes: Congenital energy crystal form! Level: perfect purity level! Grade: congenital defects! Status: Consciousness into the Lord, lack of fit, integration is not completed!"

"Hey, congratulations to the host, the system startup conditions are met, is the activation activated immediately?"

"Hey, congratulations to the host, if you choose to activate the split system, the affiliate system will reach three, and you will get the main system reward: the success rate of 10% is swallowed, only once!"

"Hey, congratulations to the host..."

One by one, the system sounds in the mind, and Ye Xuan's whole person is suddenly sluggish. What's behind the prompts, he didn't pay much attention to it.

Fortunately, it doesn't matter, you can check it back to the system.

At this moment, his entire body and mind have been shrouded in a huge surprise, and even there is a feeling of rain on the pie.

Split system?

It's a cow when I hear it!

Previously, Ye Xuan had activated the fusion system and the personal star network communication system twice. Now the system is reactivated, so there are three affiliate systems that devour the main system.

And all are extremely practical, especially important for Ye Xuan, luck is so good!

The so-called avatar system refers to a system ability that allows Ye Xuan to have a body outside the body. Although those martial arts and martial arts are practiced, Ye Xuan has also touched a lot before entering the starry sky environment, but enters the starry sky. After that, everything before it was cleared, and now it can't be displayed at all, and those exercises and supernatural powers are obviously lower in level, which may not be suitable for cultivation now. Under the background of the stars, all the rules are different!

It used to be a small world, but now, Ye Xuan is in an endless starry sky, and the law level has reached or is close to the top!

Therefore, he had never thought about cultivating a avatar before, and he did not encounter the appropriate star-level martial arts practice.

Unexpectedly, I accidentally bumped into the Universiade today, and encountered a body of innate energy crystal form. I didn't have to practice hard. Listening to the meaning of the system, it seems that as long as I am in the same place, it is enough to fit together. Integration, you can successfully have an incarnation of the body.

This is the innate treasure that was formed at the expense of the annihilation of a vast expanse of stars.

I don't know how much energy is being consumed, and it is matured in the giant phagocytic source. If there is no accident, this matter should be the masterpiece of the sixth house of the sixth house. These, before the wretched mosquito and the dusty two When people talked, Ye Xuan already guessed it.

At the moment, the celestial **** who escaped after the blast of the dust and rushed into the death star whirlpool should have entered this innate treasure, and the consciousness of the system is the intention.

However, although the **** of Tianqian has already entered, but because of the lack of fit, the integration has not yet been completely completed. That is to say, this innate treasure is not his, and others have to grab it, or there is a chance of success.

Especially Ye Xuan!

After the activation of the satellite system three, the main system of engulfing rewarded a forced devour of a success rate of 10%. This is simply helping yourself to cheat. With this reward, Ye Xuan can directly swallow the other party and pull it into the body. The engulfing space is the immortal world.

At that time, there will be a phagocytic system and a headless baby corpse shot, but also afraid of pinching the death of the sixth palace, the master of the day, the sacred **** of the gods?

This matter is to let Ye Xuan do it. He really has no such ability, but this biggest problem has been solved before he has had time to worry.

Is there any hesitation in this situation?

In view of this, Ye Xuan even issued an order to immediately provoke the affiliated avatar system to the phagocytic system. At the same time, he proposed to seize the opportunity to forcibly devour the system. As for the goal, it is naturally the innate treasure of the voice of the front. Body.

Just after a reply, the system's prompt results came out, and it sounded in Ye Xuan's mind.

“Hey, congratulations to the host, the activation of the avatar system is successful! Current level: Level 1! The current level can apply for the number of avatars: one!”

"Hey, congratulations to the host, have successfully activated the three affiliated systems, and get the system reward: the success rate of 10% is swallowed once! It has been determined to use immediately! Target determination, system energy adjustment: progress 1..."

Actually have to adjust the system energy? It seems that this kind of success rate of 10% forcibly swallowed is not white, the so-called system energy, is not the resources of Ye Xuan? The phagocytic system is integrated with him, and all the energy that keeps the system running is provided by Ye Xuan, and the wool is on the sheep.

All the resources harvested in the immortal world, the system is called anytime, anywhere, Ye Xuan did not manage, this time afraid of bleeding.

Fortunately, the harvest is huge, but it is acceptable.

Just at this time, the innate treasure standing opposite the sky, just finished the words, but in the end I was for a long time, the anxious neck seemed to be thick, and the words behind it were not squeezed out.

At the sight of this posture, Ye Xuan was happy.

This is the side effect of the incomplete fusion. The tongue is not straight. It is the truth that you can't eat hot tofu.

In a good mood, Ye Xuan's bad taste also came out, and the innate treasure of the opposite face screamed and laughed. He took the other person's words: "I am my...I am a big tongue!"

"嘎"

"I am... seven kills the deity!"

A big tongue, almost did not take the Tianganzi who had already entered the innate treasure of the body to burst into the air, the tongue in the roaring is actually more and more unwilling to listen, the body shape has been shaken twice, almost plunged into the void.

In the next moment, Ye Xuan's mind came again with the system's prompt tone: "Hey, the energy adjustment is complete! The target is locked! Forced to swallow open..."

"call out!"

If there is a sound of emptiness, the invisible treasure in the front of the sky is still thundering, and disappears in the blink of an eye. It is pulled into the immortal world of Ye Xuan by the system. The means of Ye Xuan is still incomprehensible, but it makes sense to have everything in place. He believes that one day he will be able to fully understand all of this.

Of course, it's only possible to wait for Ye Xuan's growth in the starry environment to reach a high level!

At the moment, as the innate treasure was successfully swallowed up by the system, Ye Xuan's heart suddenly collapsed, and the brain flashed a flash of light in an instant, and the face suddenly became stiff.

Big tongue?

Not so smart?

If you remember correctly, in the first few prompts of the system, it seems that the level of this innate treasure is perfect and pure!

In this case, what kind of ghost is the evaluation of the innate defect in the grade?

They are all perfect and pure, and are still incomplete? This is not scientific!

This is the innate treasure that has come out of the phagocytic crystal giant egg. It has not yet fully matured. The celestial **** of the celestial being is also discovered because the death star vortex has been discovered. Ripening, and then entering the treasure of the Lord?

One thought about this, Ye Xuan is not good for the whole person, his first avatar... actually got a stutter?

Chapter 3175: Distribution tower

Although the innate treasure has already arrived, but there is still a **** in the treasure body, he must first get him out, Ye Xuan can go to implement his first body incarnation, he did not intend to intervene. Directly issued instructions to the phagocytic system, while trying to communicate with the corpse lamp tattoo on the left chest, but still no response, can only give up.

Fortunately, after receiving the instructions from Ye Xuan, the system did not hear a bad sound. I must be dealing with this matter, and it should be successful. Ye Xuan just let go of it.

Taking advantage of this time, just pick up the end of the scene.

As soon as I read this, Ye Xuan turned to look around the void.

The whole piece of the vast star-shaped inner void is now dead, not only the innate treasure, but the three guys with the power of the universe are exiled to the emptiness, one becomes one The dry corpse, the last high-ranking celestial family, was knocked on the sap and fell directly into the huge purple armor.

The fifteen large fortresses and fortresses that rushed into the whirlpool of the Death Star were all disintegrated. The resources within them and the energy contained in some treasures were all taken and seized. The starry powers that fell from the inside of the fortress. And without exception, all of them are for the dead bodies.

It was the shards of the giant eggs that had been blasted before, and the phagocytic crystals that fell from the fifteen large fortresses and fortresses. All of them disappeared. After this highly pure energy was absorbed, the hairs could not be left half. Disappear directly!

The power of engulfing before is too horrible. It is estimated that it is not under normal conditions. It is like the first cry of a baby after birth. It is always loud and loud. It is a truth. After Ye Xuan takes over the innate treasure, he will display it again. This kind of talent can not be so strong.

At this moment, looking at it, a large piece of the ruins of the fortress and the floating corpses are all shocking and shocking.

At this time, the Void Scoop has returned, once again into the void of the marrow, and the latter, is also the first time into a mans, from the Ye Xuan Tianling cover flashed and entered the sea.

"Sure enough, it is the innate treasure that was born out of the source of engulfing. The appetite is really not small. This kind of devouring power should be some kind of supernatural power born by the treasure itself. Going back is this prince. It!"

In the muttering, Ye Xuan was excited again, and then turned to the purple mech that quietly hung the void!

This mech, he is equally interested!

Even the three 100,000-meter-diameter starry fortresses, under the first horror engulfing power after the birth of the innate treasure, were instantly disintegrated and collapsed. Even the star-studded epic ship was a virtual shuttle. Most of them can't help.

But after the high-level squad of the celestial family fell out of the silver fortress, lying in the purple armor, it was not far from the innate treasure, but it was safe and sound, and there was no melee thing, which showed its quality!

Ye Xuan does not like mech, but since it is a rare good thing, he can't easily miss it. It's nothing to play with, but if you can use it and your own armor, you can't kill the glass. Sub-integration, maybe there will be unexpected surprises.

Of course, the mech has not yet been identified, and Ye Xuan is just thinking about it and going back to it.

Soon after, after a dozen or so laps around the huge mech of ten feet, Ye Xuan finally saw some doorways and tossed it again. This opened the entrance and left the atmosphere in it. It is estimated that the high-level genius of the intelligent center was knocked out, and originally wanted to lose it. This guy is a middle-aged man. It looks quite awkward.

I can think that this is the top of the Tianji nationality, at least the repair of the domain, and that the people are mechanical people, and the repair can still be used. It is not the original consciousness after changing the smart center. It is difficult to say. .

When it's not good, people's parts can be removed and continue to play their value. The robots in the beginning of the fourteenth realm of the realm, what is the body of the body?

Thinking this way, Ye Xuan immediately changed his mind, and threw it into the immortal world of the body, and kissed the earth in an inconspicuous Qijiao!

Later, he began to study the purple mech in front of this unconstrained object!

Although I don't know the name of the mech, Ye Xuan doesn't care, and maybe he will turn into the glass.

After studying for a long time, I finally didn't figure out how to operate. Now, the phagocytic system is obviously busy tidying up the **** of heaven in the innate treasure. It is inconvenient for Ye Xuan to confuse.

Therefore, after some unsuccessful exploration, Ye Xuan simply waved the mech also into the immortal world. At this point, the internal void of the death star has no need to stay, and it is time to rush out and return to the triumphal star.

However, this death star whirlpool is the same as the black hole. When you come in, you can walk straight, but you can go out, but there is no channel, you can only find some virtual passages like natural wormholes, in order to earn away.

Just as Ye Xuan prepared to sacrifice the hole, and went around to see if he could find the exit, the mind of the system, but suddenly it sounded again, the surprise came too fast, the yuan in the body of the innate treasure God was finally forced out, but the system could not be erased. After all, it was a sacred **** of great power.

"Throw it into the ancient heritage tower and throw it directly at the ninth floor!"

After a little sinking, Ye Xuan made a new decision to the system even after making a decision.

The ancient heritage tower recognizes Ye Xuan as the main, has been refining, and now suspended in Ye Xuan's knowledge of the sea, the devouring system including Ye Xuan, although they can not easily use its power, because there is a seal, but throw things inside Still ok.

The ninth floor is a big scene, and it is also the supreme creature of the ancient level of supreme, and it is also the giant eye of the wilderness. Even if it is thrown in, it is an ant.

Tian Qianzi's old goods didn't know how to lift them up. They actually claimed that they had to pick up their heads. Now, with him, he's a good man, and he's right to make a face!

So, with the instructions of Ye Xuan, the Tianganzi Yuanshen in the innate treasure was expelled in the first time, and then, in the ninth floor of the tower of the ancient heritage, a sharp and fierce tip was suddenly sounded. Xiao Xiao, actually resounded, the tone has changed, I don't know if a little girl is being shackled, and the hustle and bustle is endless!

Unfortunately, Ye Xuan can't hear it. At this moment, he is querying the phagocytic system for the split system. Since the treasure has already been fixed, then he is not in a hurry to leave. This place is quiet, and no one is okay. Looking for things to rush into the death star, just retreat here, get the first body avatar out.

At the thought of the horrible power of the devour talent that this treasure had previously shown, Ye Xuan was mad at the heart, and there was a singularity of such a cow. After seeing who is not pleasing to the eye, it is swallowed directly...

Chapter 3176: Plant a god

After some inquiries, Ye Xuan was stupid on the spot!

This avatar is really not very easy to get, although the process is simple, but the requirements are extremely special, it is definitely another way, not taking the usual path, at least Ye Xuan never thought about it before, the original avatar can also do this!

Generally speaking, the practice of avatars is divided from their own gods, so that they can be separated into the lord, and if they are a god, two or more bodies, of course, there will be a distinction between primary and secondary. This is also the reason why the avatar is generally weaker than the deity. The sacred **** that is divided out may not be too large in weight, otherwise it will have a great influence on the deity itself.

Although the damage of Yuanshen can be repaired, it takes a long time and is generally difficult to accept!

When Ye Xuan left the emptiness mark in the first black hole of the universe, he once differentiated into a faint meta-god. At that time, he did not want to toss him, and the deity of the deity was left behind. It was not long ago that it just healed and recovered completely!

This time, in order to get a powerful devour, Ye Xuan has already prepared for the Yuanshen differentiation again, and the weight of the Yuanshen that has been divided this time must be no small, at least far before.

But at this moment, after understanding the details of the forging system, he immediately realized that he seemed to take it too much. The differentiation of the gods is not necessary, but Ye Xuan is not happy at all, because... the system provided by the system The way is too long!

To condense this avatar successfully, all of Ye Xuan's consciousness of the Yuanshen must leave the deity, enter the innate treasure, and then follow the secret technique provided by the avatar system, as the Yuanshen retreats, slowly in the body of the innate treasure. Gather a seed of the god, then...

Basically, there is no such thing. After completing this step, it has been successful for more than half. Ye Xuan's Yuanshen can lift his foot and return to the deity. What should he do?

As for the innate treasure, it can only be put away, let the seed of the gods left in its knowledge of the sea grow slowly, and gradually grow stronger. At the end of the broken shell, a perfect avatar will be successfully condensed!

The benefits of this condensed mystery are obvious. First of all, the deity does not have to bear the creation of the gods, and the seeds of the gods in the body are not as difficult to grow as the ordinary avatars.

When it breaks into the main body of the body, it has also grown into a complete god, and if you copy the leaf of the **** of Ye Xuan, instead of dividing it.

In this way, the significance of the future growth of the avatar is simply incalculable.

But the only flaw is that it takes too long, according to the estimation given by the system of the innate body of the innate treasure... about a hundred years!

If you really have to wait a hundred years to use this devour, I am afraid that the daylily is cold.

At that time, Ye Xuan's deity had no idea how far it had grown. This is a slap in the face of ninety-nine, and it's not a busy life.

In addition, after the deity of the gods enters the innate treasure, although it is necessary to immediately condense the seeds of the gods, the process requires a whole day. In order to gain a hundred years later, in the current situation of complicated affairs, the whole day is delayed. This made Ye Xuan really unwilling, and he fell into hesitation on the spot.

After a short period of time, he suddenly fell into thoughts of what he was thinking about. He was so bright that he raised his hand and took a look at his forehead. He shook his head and smiled: "I actually got a horn of the horn, and even forgot the change, it was speechless!"

The work he said is actually very simple.

That is to change the concept!

The seeds of Yuanshen still have to be condensed, and this time cannot be saved.

But after the successful destruction of the seed of the gods, it may not necessarily remain in the body of the innate treasure!

The deity and the treasure can be used interchangeably!

Just like the two powers are different, but all need to embed the energy crystal in order to start the energy laser sword. Although there are two energy blocks, one is full, and the other is energy-consuming and needs to be recharged.

Then, when you need to use which handle, you will fill the full energy block, and the unused handle will be inserted into the energy-consuming space, just charging.

There are different needs in the next time, and then the energy block will be replaced and replaced.

Ye Xuan's **** is the full energy block, the **** of the gods, it needs to be recharged! It's a bit of a hassle to lose it, the key is not to delay, and it's worth it.

After the decision, Ye Xuan even called the innate treasure from the immortal world.

At this time, because the **** of heaven has been expelled, this congenital treasure has closed its eyes, and there is no such thing as any. Ye Xuan immediately sat down on the knees, hung in the void, and entered the state of cultivation. Quickly rushed out of the heavenly spirit and broke into the opposite body of the body.

Then, according to the method of condensing the Yuanshen seed that has been thoroughly understood from the avatar system, the condensing began.

Unconsciously, a day and night passed...

Ye Xuan's first Yuanshen seed finally condensed successfully. The next thing to do is to send the Yuanshen seeds into the body of the deity, and then return to expand the relationship between the gods and the innate treasure. After the completion of this step, Ye Xuan can completely control the power of this treasure.

Not only can you pay for the deity in the body, but even the treasures in the sea of the deity can be summoned to the imperial concubine.

As for the deity, the first step of the sixth-order nebula is to repair, and it is necessary to retreat a lot, leaving the deity in the body of the innate treasure, and the innate treasure, so that if the deity has been retreating, and the leaves Xuan's Yuanshen is temporarily stationed in the treasure, using his horrible engulfing talent to quickly improve the cultivation of the innate treasure...

It's a double-edged sword, and both ends are not delayed!

With these brains flashing, Ye Xuan suddenly realized one thing. After seemingly entering this innate treasure, he only looked at the seeds of the Yuanshen immediately, and even how the realm of the treasure is now Forgot to check.

It shouldn't be too low. After all, when it was just smashed out of the devastating source, it devours the energy of the entire fifteen fortresses and fortresses, including the cultivation and vitality of those strong stars. There is even a place in the universe that has all the power in the body.

Even in the process of energy conversion and refining, which is indispensable when it is swallowed, the repair of the treasure is absolutely impossible to weaken to the extent of disapproval. Have the opportunity.

With such expectations, even if Ye Xuan launched a probe, the result was greater than his expectation. The strength of this innate treasure is only equivalent to the grandeur of the 9th order of the Galaxy, and the black hole in the eighth realm. Still a little breakthrough!

Slightly disappointed, Ye Xuan even wrapped the Yuanshen seed and left the innate treasure, entered the deity, just threw the seed of the gods into the sea of knowledge, a huge surprise that made him unprepared, without any warning Suddenly came...

Chapter 3177: Half step black hole

Previously, the cultivation of the innate treasure made Ye Xuan disappointing. It was a breakthrough from the black hole in the eighth realm. It was not like having just swallowed fifteen fortresses and fortresses, and including a coordinator. All the people in the light environment were repaired and lived, and Ye Xuan was disappointed.

But that may be because the innate treasure is being ripened in advance. The innate defective grade suggested by the system should refer to this, and the reason why he is so swiftly swallowed is still less than the cultivation of the black hole. It should be Used to repair one's own innate defects.

This makes Ye Xuan quite comforted. At least, the big tongue of the innate treasure should be only temporary. After the restoration of the treasure, it will disappear.

What he never imagined was that at this moment, when the Yuanshen returned to the deity and threw the seeds of the gods into the sea of knowledge, then the sea of knowledge was suddenly expanded, and the cultivation of Ye Xuan's deity was a realm. Blinking is already a breakthrough in two small steps, but it has not stopped.

Looking at all of this, Ye Xuan was stunned and briefly slugged for a moment, then suddenly realized.

This time the cultivation is skyrocketing, apparently thanks to the innate treasure!

The first is the seed of the god, its successful condensing consumes a huge amount of treasures, and now it is invested in Ye Xuan's knowledge of the sea, rooted in this cultivation, how much energy will overflow like a rumor, injecting knowledge The sea has led to the rapid rise of Ye Xuan's esteem.

In addition, Ye Xuan's Yuanshen entered the innate treasure for the first time, not only staying there for a night and night, but also concentrating the seeds of the gods. In the process, unconsciously, his own **** is also due to the innateness of the treasure. There was a slight change in the perfect attribute, and returning to the deity at the moment immediately led to the change of the deity.

Under the superposition of these two factors, the cultivation of Ye Xuan's deity has risen from the first step of the nebula, and finally stabilized directly in the seventh stage of the nebula, breaking through six small steps. Today, Ye Xuan is the first. The six realms of the nebula in the later period have been strong.

However, compared with the innate treasure that is about to break through the black hole, there is still a gap, and the pressure is not small!

After the sea is restored to calm, Ye Xuan's Yuanshen once again rushed out of the deity and entered the innate treasure. What is still needed to be done is the last step, refining and refining, and improving the fit between the deity and the innate treasure. Perfect, thorough integration.

After completing this step, Ye Xuan's first avatar was completely condensed successfully!

Originally thought that this process may last for at least a day or two, the result is only less than half a day, this may be because Ye Xuan has already condensed the Yuanshen seed in the innate treasure, the deity is innate by the treasure. The perfect attribute has been subtly changed, and the fit has been greatly improved!

"boom!"

Just in the moment when Ye Xuan's deity and the innate treasure were completely integrated, a huge roar sounded in Ye Xuan's god, and then he felt a tremendous and powerful power. , like rolling the river, in the body of the innate treasures rushing...

"Is it a half-step black hole? Really... very powerful!"

At this moment, Ye Xuan suddenly opened his eyes, the face of the innate treasure can change with his mind, including clothing and so on, can do whatever he wants, after all, is a pure energy form of the body, change all this, just energy. A small conversion of the embodiment.

After a little sinking, Ye Xuan's mind was fretting, and the face of the innate treasure immediately began to change. Although the original appearance was extremely heroic, he still felt that his original appearance was more pleasing.

Soon, the appearance of the innate treasure has undergone a complete change. It is exactly the same as Ye Xuan's deity. The body of the original red fruit is also covered with energy-converted clothing, and the opposite side of the sky is closed. The deity is exactly the same.

In the wave, the deity was absorbed by Ye Xuan, and then he began to try to connect the deity to the sea and the devouring system!

At present, the gods are stationed in the treasure body. Although they have the power to devour the horror, and the cultivation has reached a half-step black hole, at some critical moments, the black hole is afraid that it is far from enough, and the deity knows the sea. The various treasures and supernatural powers are often miraculous.

If you can use all the things in this sea in the state where the gods are in the body of the body, then it will be perfect!

But that is obviously not very likely. Ye Xuan found out that he can't even connect with the deity's knowledge of the sea. It is even more impossible to use the treasures and magical powers that the deity has.

In order to do this, you should wait until Ye Xuan will completely integrate with the deity, and when they can be combined, it is not like this. It is just a simple income into the body like a magic weapon!

In addition, after Ye Xuanben's understanding of the Yuanshen seed in the sea is fully mature, it should be possible to achieve this through the connection with the deity of the gods!

Fortunately, the phagocytic system is merged with Ye Xuan's deity. At this moment, the focus of the self-cultivation and understanding of the sea and the magical powers are no longer available, but the phagocytic system is not subject to this restriction.

At a critical juncture, Ye Xuan can call all of this acquaintance in the sea through the phagocytic system, but it takes a little time, but it is better than nothing!

At this point, Ye Xuan's first treasure body was finally completely condensed, and there was one more means. After the peace of mind was settled, he immediately counted the gains even if he gave instructions to the phagocytic system.

He was anxious to know how much he had swallowed the source crystal this time. This is a real scarce resource. Ye Xuan has been searching for a long time, and he has finally got what he wants.

The inventory is soon over, and the system's prompt tone sounds as always in Ye Xuan's mind. This should be the effect on the level of the Yuanshen. After all, the treasure body can have no real brain or internal organs, it is A pure energy crystal body!

The final inventory data made Ye Xuan's spirits soaring, and the harvest was huge. Even he was quite surprised. After breaking into this death star, he went to the crystal resources of the virtual air in the surrounding air. There is no detail at all.

In terms of phagocytizing the source crystal, the harvest of this time is 56,207 pieces, and the one originally given by the system, Ye Xuan's hand currently holds a total of 56,208 pieces of phagocytic crystals, enough for him to go to the system exchange store for a lap!

In addition to phagocytizing the source crystal, other rare mineral deposits are more harvested. After all, even in the inner void of the death star, the proportion of phagocytic source crystals is only about 30%.

These rare minerals range from hundreds to hundreds, and there are only a few hundred. There are more than 100,000, and there are more than 100,000 in total. In total, some of them are not only named, but even the phagocytic system is still In the analysis and identification, it is obviously a product, and it will be of great use in the future!

When I was happy, the system's prompt tone suddenly sounded again: "Hey, congratulations to the host..."

Chapter 3178: Interstellar Trailblazer

"Hey, congratulations to the host! Found an unknown transmission array!"

"Authentication result: one-time top-level one-way transmission array! Transmission destination: unknown! Risk factor: unknown! Do you explore immediately? Tip: If the exploration is successful, there will be a chance to upgrade the system title!"

"The current title of the system: third level, interstellar explorer!"

"The next level of the system: fourth level, interstellar pioneers!"

"Interstellar Trail Blazers: The aura effect of the title, based on the original three-level title Star Trek, Interstellar Adventurer, Interstellar Explorer, will add a primary plane coordinate jump ability."

"Primary plane coordinate jump: the ability to expand the coordinate jump between different cosmic planes, ignoring the cosmic plane barrier and directly jump to arrive! The primary stage is limited to the adjacent cosmic plane with cosmic wormholes!"

"Hint: The position of the plane coordinate jumping ability can only reach the coordinates of the cosmic wormholes that have been imprinted in advance! Activation conditions: in more than two cosmic planes, one or more of the coordinates are branded! If not branded, the ability to jump in the coordinates of the universe, can not start!"

"Hey, the system is finished, is it explored?"

Unknown transmission matrix?

As the system prompts in the mind, Ye Xuan immediately stunned and then ecstatic.

Since the last time I upgraded the system title to the third-level interstellar explorer in the Starry Thunder in the First Universe, and possessed the cosmic plane jumping ability, he has already had a random-triggered system title exploration task. A very special expectation.

The accompanying aura ability of the third-level interstellar explorer has enabled him to jump in the cosmic coordinates in the same cosmic plane, and then the fourth level?

As expected, the fourth-level interstellar pioneer's attached aura ability is more practical, it is simply cheating, and can actually achieve coordinate jumps between different cosmic planes, even the universe wormhole is not needed.

Although the primary stage is limited to the initiation of a plane jump between two adjacent cosmic planes with cosmic wormholes, and a coordinate mark must have been left in both cosmic planes, but this Everything is not a problem!

There are natural cosmic wormholes between the three cosmic planes known to the present, and Ye Xuan has already branded a jumping coordinate in the black hole of the first universe, and only needs to re-print it in the third universe. Once the exploration is successful, the system title will be upgraded to the fourth level, and he will immediately be qualified to start the primary plane coordinate jump!

As for the second universe, I will find an opportunity to go around there in the future, leaving a coordinate mark on it!

Excited for a while, Ye Xuan's mood gradually calmed down, calmed down and thought about flying, and began to think!

The exploration mission of the system title is naturally not to be missed, and the temptation of the fourth-level interstellar pioneer's aura ability is indeed great, but the harvest and the risk are equal. The target of the transmission matrix is unknown, if it is in the third universe. That's it, even if it is to the other two major universe planes, Ye Xuan is not afraid.

As for the starry sky like the Star Trek, he is even less concerned. Any Jedi will have a chance, and he will have a headless baby body, and he will be safe and secure.

But what if the target of the transmission array is an unknown universe plane, or an infinite stream of emptiness? This is a one-time one-way transmission array. It is destroyed once, and there is no return ticket. Is it true that it is not like the silver-winged monk, if it is eternal exiled?

In this case, I am afraid that even the headless baby body will be helpless!

Under the circumstance, Ye Xuan swayed in the middle of the battle, and it was always difficult to make a decision. At this time, the system's prompt tone has sounded again. It is still asking whether to accept the exploration task. If it is silent three times, this opportunity will be missed. Will refuse by default!

One thought of this, Ye Xuan's heart suddenly jumped, and he was unwilling to bite his teeth. Even if he gave a reply to the determination, he applied for a delay, because he had to prepare the coordinates of the third universe first, and he was prepared. !

The reason why this matter has not been implemented after returning to the third universe is because every cosmic plane can only leave a coordinate mark, and choose to be cautious, but at the moment it is not enough. Ye Xuan decided to solve it immediately. This matter, then the exploration mission of the system title!

The death star field is located in the central domain of the third universe. The geographical location of the two camps of the Terran is also suitable. The brand of the third universe is branded here, and Ye Xuan is still acceptable.

Without further ado, after the decision, Ye Xuan immediately set off, and sacrificed the cave to rush in the death star whirlpool. Soon after, he locked in an optimal position and began to mark the jumping coordinates...

A glimpse, nearly two days have passed!

Ye Xuan, who was sitting cross-legged in the void, opened his eyes, and there was a touch of exhaustion in the sputum. Although it was the second time, everything was light, but the great pain of this **** was divided, even if Ye Xuan Today's cultivation is far from being comparable to the first coordinate in the first universe, but still tired!

Fortunately, everything is extremely smooth. The jumping coordinates of the third universe have been successfully branded and integrated into the void. From then on, and there is no trace of traces, Ye Xuan himself can not sense it, only when starting the system jumping ability, Will appear!

Later, it took another two days to nurse the gods. When Ye Xuan opened his eyes again, it was four days before he entered this death star.

Originally, it was time to return to the Arc de Triomphe. Unexpectedly, all kinds of accidents frequently occurred. In the end, it was dragged on for so long, and then the exploration task of the system title will be launched immediately. In a short time, I was afraid that I was innocent.

However, there are mosquitoes and old ghosts, and there is no need to worry about the head of the triumphant star. The old wretchedness can even be a shock to the supremacy of the universe, and it is not known to what extent the cultivation is strong. Before, I have always pretended to be a demon

slave. I even said that after I showed my strength, it was still so. This is really speechless. Ye Xuan's heart is already full of doubts, but at the moment there is no thought.

Everything can only be done after the completion of this system title exploration mission.

Aside from these thoughts, Ye Xuan even issued instructions to the system to immediately begin the exploration mission. The familiar system prompts sounded in the brain: "Hey, congratulations to the host, the system title exploration mission is activated! Exploring the target: Unknown transmission target Ground! Mission completion conditions: Unknown!"

As the hints in my mind sounded, the empty void in the distance suddenly burst into ripples, and a small but extremely primitive transmission array suddenly appeared without warning!

"call out!"

Ye Xuan swayed his shoulders, gritted his teeth and swept away, and his eyes were already on the transfer stage, his face was gloomy!

Until then, he suddenly remembered the condition that he had forgotten to ask the system for the completion of the task. The task was activated at the moment, and the completion condition of the system prompt was actually unknown. This is clearly a pothole...

Chapter 3179: The tenth sixth house

"call out!"

Ye Xuan's body shape just fell, and the faint quaint transfer stage suddenly burst into a gorgeous light!

I didn't know what kind of material was cast in the whole array. I changed the shape in an instant and turned it into an energy ball. I wrapped Ye Xuan's entire body and finally condensed into a micro-mang, with a broken voice. I plunged into the void and disappeared!

At this time, Ye Xuan is afraid that he still doesn't know. This is actually a nest that has been plunged into a deadly enemy. This top-of-the-line transmission array is extravagant and disposable. It is

destroyed when it is used up and can only be transmitted in one direction. It is clearly that the old ghost of Tianganzi was originally set as a backhand.

After all, the devour of his devouring avatar is amazing, but it has just been bred, and it is stronger. With this transmission array, the **** of the dust in the day enters the engulfing treasure and completes the refining. After the integration, if there is a change, it will be able to safely return to the sixth house of the tenth in the first time.

At the moment, although it's true that the embarrassment of the transmission array is the devour of thousands of years of devouring treasures, the gods who have entered the Lord have already changed their minds...

.....

Ten absolute temples, the absolute hegemon of the Terran camp, occupying the semi-hanging universe in the third universe, and the immortal dynasty of the technology camp is both a close friend and a secret competitor.

The immortal dynasty of the science and technology camp is the imperial system. The semi-trailed universe that is under control is the territory of the imperial court. Although there are three major empires and countless big countries and small countries below, they are nominally imperial dynasties!

However, in the starry territory controlled by the comprehension camp, there are basically different factions. Although there are some emperors or other forms of the country, they all belong to the small fish and shrimp.

In addition, in the semi-hanging universe of the comprehension camp, whether it is the state or the revisionist sect, they are independent of each other, at least in nominal terms.

The Ten Heavenly Palace is also a self-cultivation sect, but its status is unique and transcendental. Although it is not nominally like the immortal dynasty, it orders the entire comprehension camp and has the power to dominate!

But in fact, it is far from being able to compete with several sects and countries that are closely followed by the rankings. The fact that its comprehension camp has no hegemonic status has been invisible in the past!

The ancestral land of the Ten Heavenly Palace is located in the first house, also known as the Heavenly Palace! The palace of the Heavenly Palace is the supreme leader of the entire Ten Heavenly Palace!

The second house of the second is called the Palace of the Earth! The palace of the Imperial Palace is responsible for the external affairs of the Zongmen, and the exchanges between the immortal dynasty and the Federation of the Vulcan are all responsible for the Palace of the Palace!

The third house is a palace! The palace of the people in the palace is also the punishment of the entire ten heaven palace!

This third house is the most powerful and mysterious place in the Ten Heavenly Palace, and its status is detached!

After the fourth until the tenth house, it is slightly weaker. The palace owner is generally only responsible for the palace, and the power cannot be extended to other nine palaces!

The entire comprehension camp occupies the semi-hanging star river of the third universe. The territory is as vast and vast. The ten heavenly palaces of the Ten Heavenly Palaces stand in different directions. They sit in the void and form a big net to control the entire comprehension camp!

Tianmeng Palace, located in the central domain!

The palace and the palace are not too far from the central area. The first three palaces belong to the core center of the entire Zongmen, and they stand in the central area of the semi-linked river.

The other seven palaces, like the vast rivers of the borders, are located in the marginal areas of the different directions of the comprehension camp!

Among them, the fourth, fifth and sixth heavens are the border with the immortal dynasty!

The closest to the death star field is the sixth house of the tenth. Perhaps it is for this reason that Tianganzi will finally choose the strongest part of the death star field to breed him.

From the edge of the dead east to the comprehension camp, it is already the star field controlled by the sixth house. If you want to go to the sixth house headquarters and sail at full speed with a 100,000-meter-diameter starry sky fortress, you still need two It is only possible to arrive in the month.

There are two cosmic wormholes on the way. If you enter the wormhole and start the wormhole jump, the time will be cut in half, and you can get more than a month!

The headquarters of the Ten Temples is located in a different environment. Some are a huge star, and some are a vast expanse of the mainland, a place in the sky!

There is even a place similar to the ancient cages, such as the Heavenly Palace, which is not visible in the central star of the comprehension camp. It is located in a small ectopic void, and third. The universe has a virtual passage connected, and the portal passage into and out of the universe is in the central area of the comprehension camp, guarded by the local palace and the people's palace.

The headquarters of the sixth house is a supercontinent, with a vast territory of millions. If you consider some ordinary body-shaped stars as chess pieces, this piece is suspended in the void of the six palaces of the mainland like other stars, and its vastness is almost chessboard!

It can be seen as a state in which a normal star is crushed and crushed!

The surrounding edge is 嶙峋, the lower part of the bottom is aura, and the vitality is not obvious. It is not a livable choice. Only the top land surface is filled with aura, and it is full of vitality. Not only the lakes are scattered, but also the mountains are rolling...

Although the shape is special, it is not the spherical shape of the ordinary star, but all the features of the living star, this super continent is all available.

Including gravity, the atmosphere, the vitality, and so on!

The headquarters of the Sixth House of the Ninth House stands on the top of a giant peak in the central area of the starry sky. A large palace is surrounded by the peaks and valleys, and the scale is grand and extraordinary!

But at this moment, this vast palace area has not seen many figures in a quiet way. Except for those who are retreating or going out, the top six high-level and disciples of the Sixth House are mostly, all of them went to Jufeng North several days ago. Somewhere in the domain.

There, the main lord of the palace had already laid a huge starry sky before the 10,000-year-old, and the number of former squadrons was stunned. Tianganzi was furious and screamed with a large number of six-strongmen. , start to kill!

This is a full four days, and now, the killing seems to be still not over, so the Sixth Palace headquarters of the Kyoho will appear so cold, only some ordinary disciples and a very small number of high-level stay!

Here, it is also the target of the top one-way transmission array that Tianganzi stayed in the Death Star whirlpool. This lineup is designed to return as soon as possible. The transmission site chooses the headquarters of the Sixth Palace, which should also be!

It was just that the peak of this huge peak was too wide. The target of the transmission set by Tianganzi was not precisely positioned. Yes, Ye Xuan, who was sent with the shackles of his heart, randomly fell into a pool!

Still not an ordinary pool, but a hot spring pool!

A pool of dreams is like a dreamy, floating pool of hot water!

The mist in the mist reveals a strong aura, and the hot spring water in the pool is clearly a kind of spiritual spring!

These are not the main points.

The point is that this Lingquan pool is not only located in the harem of Tianganzi, but also in the pool at the moment, Yan Yan, more than ten red fruit and white tender body, is splashing water and playing.

Ye Xuan plopped and fell in the middle of the center, splashing countless splashes...

Chapter 3180: Damn mission

"what....."

"God! I lost my personal, actually a man!"

"Smelly thief, dare to arrogate the tenth house of the Nine, just looking for death!"

"What are you doing? We all let him see the light, and must kill him! No... first dig out the eyes and then kill!"

"Hey? Is it okay? Is it in a daze? It still has a nosebleed! The **** guy must have been frightened by him..."

.....

With this flustered and angry voice coming into the ear, just because the transmission was completed, the foot was slammed into the Lingquan, and Ye Xuan, who was so shocked that he was shocked, felt a bang in his head. The whole person will be paralyzed in an instant!

Then, in the line of sight, there are more than a dozen delicate bodies that are extremely inflammable. All of them are all the pieces of red fruit. There is only one glance at all. Anyone who can see and see cannot be seen. I got a thorough!

what's the situation?

Say good danger?

Say good turmoil?

The **** transmission array actually threw the prince into a Lingquan bath full of women's baths!

Those women who are angry and shouting and screaming and killing will stop. At least they look quite eye-catching, but now they are facing themselves, what kind of ghost is this figure?

The face of black pockmarks is no problem. The thick lips of Weiqi actually extend a big tooth, and the more important thing is... This ugly ghost is a nosebleed? Actually still staring at his face with this obsessive look!

anthomaniac?

When the last thought flashed through my mind, Ye Xuan shuddered and the cold hair on the back was immediately erected. The whole person felt bad.

This is simply terrible, and it was remembered by such a ugly ghost!

In particular, the identity of this ugly ghost is obviously not ordinary. Can it be called Miss in the sixth house of the tenth, and also the people who lead such a large group of prostitutes in the open air?

It must be related to Tian Qianzi. It is not a Taoist but a daughter... Well, the former is excluded, the ugly is like this, and the Tianganzi blinks and can't see it!

If it is the latter, it will be even worse. If it is cold, it will fall to the old nest of the dead, and it will still look at the body of the daughter. By the way, it will be looked at by others.

This matter can no longer be good, even if Tianganzi does not play for life, it is decided to turn it into a jade, smile, enmity, and the final result must be to put Ye Xuan on the shelves, and to slap the slang, so that the unsalable goods in the hand are thrown out first. Say it!

This is not as good as a vain, it is a life!

Thinking of this, Ye Xuan's entire face was all green at the moment. At this time, he had no choice but to listen to the other words. Even after a chill, he turned and slammed out of the pool. !

It's not that he doesn't want to teleport or vacate the distance. It's the moment when the figure is standing up. The invisible force of the mighty mountains has been pressed for a moment. With Ye Xuan's half-step black hole, he's going all out. Only a few feet were lifted, and they were forced to fall to the edge of Lingquan Pool.

That is clearly the power of the array here, and the ban is also banned, but also suppressed the cultivation of Ye Xuan.

If it is the effect of getting stuck again, then it is really miserable, and can't escape!

In the shape of the mad rush, Ye Xuan thought to fly, thinking of the last possibility, the whole heart instantly sank to the valley!

At this time, the dozens of prostitutes in the Lingquan pool also responded, but they did not care about the film, so the red fruit and fruit land swept to the shore, and quickly chased Ye Xuan, the mouth of the Jiao The anger is even more resounding.

"Smelly thief, where to run!"

"Stop, make sure you don't fight you..."

The repairs of more than a dozen Shantou are all good. They are all in the nebula. Although they are far from the treasures of Ye Xuan, they are obviously not suppressed by the force of this array. The speed is faster than Ye Xuan. When they are about to catch up, several of them have waved their own magic weapons and want to kill them!

Ye Xuan subconsciously glanced back, his eyes full of waves, his face slightly red, and then immediately white, too unlucky, he never thought that one day will be chased by a group of women Shouting and killing, but still can not escape people, once caught up, the consequences must be horrible!

"stop!"

"Who asked you to chase him? Actually, he also sacrificed a magic weapon! Anyway, if he can't escape, he will let him go around first. If he is tired, he will come back naturally..."

Just at this time, the female ugly ghost who still stayed in the pool of Lingquan had a shock, and finally returned to the soul. He immediately screamed and screamed, and the gas field was very full, but when it came to the end, the tone suddenly A change, incomparably gentle: "Jun brother, don't be afraid, they are playing with you!"

"Go and go, run a few laps to vent, or know!"

"Everything has to have a process of adaptation, no hurry, anyway, the spirit of the body has been seen by you, after all, can only be your people, you adapt slowly, I can wait..."

"Oh, yes, don't be a negative lover, abandon the spirits and go. Oh, this outsider can't get in and out. Taking a step will lead to the full force of the whole Guardian ancestor. No life, half-step black hole repairs... on the spot spike!"

Hearing this discourse, Ye Xuan felt that he was black in front of him, and he almost slammed it, but his feet did not stop, but he fled faster.

The sixth house of the ancestors who can smash the domain starter is not really in the heart, there is no head baby corpse, can guarantee innocent!

The key is that the soft and chilly meaning of this female ugly ghost makes him uncomfortable, not only ugly, but also a scheming, absolutely a snake niece, too dangerous, this place can not wait for a second!

Behind him, the dozens of prostitutes had stopped their bodies in the first time when the female ugly ghosts screamed, and put away the magic weapon. Continue to pursue, let Ye Xuan panic into a purple bamboo forest not far away, disappeared.

At the same moment of rushing into the bamboo forest, Ye Xuan's brain once again sounded a familiar system prompt: "Hey, congratulations to the host, the transfer is completed, and the target is reached! The system title exploration mission is successfully launched!"

"Task completion time limit: 30 days!"

"Task completion requirements: Obtain the target heritage, and refine it!"

"Special reminder: Before the completion of the mission, it is strictly forbidden to get involved in the area outside the target area, otherwise it will be regarded as a failure to explore!"

"Exploring the failure penalty: the system title drops one level!"

"Hey!"

Just after the system sounds in the brain, Ye Xuan headed into a purple giant bamboo with a waist thickness. Although there was no pain, he still felt that the stars were in the dark and dark!

The **** task, I am afraid that I will be killed and killed this time. I want him to take the inheritance of the sixth house of the tenth house and refine it, and before the completion of the mission, you can't take a step forward!

Otherwise, it will directly return to the original shape, and the system title will also be deducted to the first level, and will be reduced to the interstellar adventurer! This is clearly the ability to jump the coordinates of the cosmic plane that has already arrived, and will lose the rhythm...
