

## Super D. S 3211

Chapter 3211: The cruel crisis

Warfare, armor, battleship!

With the three most basic stars and treasures all upgraded to the starry sky to the treasure level, Ye Xuan's combat power has suddenly climbed a lot.

But this is not over yet, A Nao Yuan Jing and the robbery of Longhua are still useless. If there is no accident, these two things should be able to make Ye Xuan's and the Dragon's blood, and both enhance and make themselves The combat power has also been greatly improved.

Coupled with the help of the three warriors in the battlefield, then Ye Xuan's comprehensive combat power must be reborn, not comparable today!

However, considering that the integration of the warfare has taken several days, coupled with the time spent in the sixth house of the tenth, it has been half a month since then, and Ye Xuan is somewhat worried that there will be a change in the Arc de Triomphe. After a slight indulgence, he even stopped using it to continue to stay here, and he was tempted to use the nose and the robbery of Erdan.

This matter can only be put aside for the time being, first return to the Arc de Triomphe, and wait until the situation is stable before making a calculation!

After the decision, Ye Xuan even took the blood of the dead magic into the body of the immortal world, waved a hole in the wave, step by step, and soon drove the battleship into a purple mang, and looked for an exit!

After a small half day, the virtual passage that left the death star whirlpool was finally found by him. Ye Xuan's heartstrings were suddenly loose, and he did not hesitate. The speed of the virtual shuttle suddenly increased, and the blink of an eye turned into an invisible weak man. Swirling, go straight to the triumph of the death of the Western Regions!

Although only a short ten days have elapsed, the changes in the death star field are as varied and completely different.

Since the thousands of years ago, the whole death star field has spread all over the crowds of various ethnic groups. It is like a star-level virtual mine. Although the conditions are tough, the popularity is quite prosperous!

Now, with the disappearance of the source of the source of the phagocytic source crystal, this ruined death star field instantly loses its original appeal and is no longer valuable. All the star-studded powerhouses that have been stalked here are almost all evacuated.

Even the Tenth Heaven Palace and the immortal dynasty set up in this star field, the Xiongcheng City and the Old City, are also the same. The Black City was originally a magic weapon of the city, and it was taken away. Very convenient.

As for the old city of Su, the demolition of the demolition, the abandonment of the abandonment, and now there is no previous momentum, dilapidated!

Only the triumphant city of Ye Xuan is still rooted here. The vast expanse of the vast stars, not only the ghosts can not see half, even the endless void and countless stars, have completely died and died. A shocking feeling of loneliness!

Ye Xuan drove the speed of the hole and swept through the void. Even the figure of half of the starry sky was not seen along the way. Even if he was psychologically prepared, this kind of boundless sorrow was still cold, but he still made him feel a little. Shocked, the uneasiness of my heart is getting stronger, and the fear of triumph is like this. I have already gone to the sky!

.....

After repeated jumps, Ye Xuan only took less than a day, and he rushed from the dead east to the Triumph City in the western star field. The familiar Xiongcheng was in sight, clearly holding the defensive mask. Not abandoned, Ye Xuan sighed, finally relieved!

During the meditation, the hole was turned into a purple mang, and the head was tied to the surface of the superstar. Soon it was near the Arc de Triomphe, and then stepped out, waving the hole to the immortal world, and the body shape has passed through the defense. Mask, enter the Xiongcheng!

Everything in the Xiongcheng is still in order, there is no change, there are mosquitoes and old ghosts sitting here in this town, no one dares to offend the mighty power of Tiankun!

Of course, Ye Xuan is an exception, and this morning has been fierce, and many strong stars have talked about Xuan, and dare not provoke him.

It is that some powerful forces and ethnic groups have already given birth to jealousy. This time, the sixth house of the tenth is really tossed enough. The brains of Qiankun's mighty have been smashed into oily black eggs, which are too ferocious. Too scary!

Even the strongest players in the triumphant city were scared. At this moment, seeing Ye Xuan suddenly returning, he did not change in the same place. Although he was not afraid, the look on his face was eccentric, and he looked at Ye Xuan. Full of fog, I suddenly became paralyzed after I realized it!

After Naples and Yingtai, returning to the sea, and Li Wen, they quickly rushed after hearing the news. The mosquitoes and old ghosts were still old-fashioned. After seeing Ye Xuan, they grinned and laughed, and they ran trembling all the way. Ye Xuanton felt a strong, wretched breath, and immediately frowned!

Dignified and powerful, but there is no strong power, can not see a little bit, can be a long and short with the turtle, the old things this wretched disease is absolutely no cure, has long been deep into the bone marrow, it seems that it was true before Not loaded, this is the nature!

Ye Xuan looks strange, but her heart is comfortable. At least at this point, the old guy did not deliberately deceive. As for the invisible cultivation, it is even less, and there are countless stars and strong people. Have you done it?

After being rushed in the middle of the crowd, Ye Xuan took a break and quickly dispelled other people, leaving only the mosquitoes and ghosts, and the doubts in his heart were too many. I have no thoughts about other things, but I want to solve them immediately!

It's a pity that the old guy is really not good at it. When he listens to Ye Xuan's question about his identity, and the purpose and plot of using it in the side of Ye Xuan's condescension, the mosquito and the old ghost immediately started Tai Chi. In short, there is no serious words, for a long time, Ye Xuanzhen is a little useful information, did not get, the heart of the question remains, no progress.

In the end, he reluctantly closed his hand. This is a great power. If people don't say it, who would dare to force it? I didn't know the identity of the other party before, but now I know that if Ye Xuan still lives as a master and screams, it is self-deprecating.

However, he did not give up on this. There is a chance to knock on the side, and one day he will dig out all the truth.

After breaking the matter, he immediately asked about the secret of phagocytizing the source crystal, and admitted that he needed a kind of spiritual resources to replace the source of the nine-level nine-color star. The bottleneck effect of the latter in the breakthrough of the realm seemed to be useless to him. Now!

When I first entered the black hole, I encountered this kind of problem. It is obviously quite serious. The road to go is still very long!

"I don't know much about the phagocytic source crystal. I think there must be some special use. You have to explore from the immortal dynasty. The general existence is difficult to know. As for the bottleneck breakthrough effect of the nine-level nine color, the black hole After the situation is gradually weakened, it is even more impossible, unheard of!"

Didn't wait for Ye Xuan to finish talking, the mosquito-killing old ghost immediately took over the words, watching the idiot-like Ye Xuan shook his head and sighed: "It should be your own, or a problem with the practice of practice!"

Ye Xuan's brain banged and banged, like a slap in the top, and instantly realized.

Damn, I forgot this thing. The hole that he cultivated is a ruin. It is only the practice of the eight major realms in the past. When it comes to the black hole, it is gone. The road is broken and cannot go forward. How? breakthrough?

Chapter 3212: Another path of evolution

The illusion of the hole is that Ye Xuan used the high-order star nucleus to bid from the official auction house of Tianhe Star. It is said to be the top-level merit of the starry sky to the treasure level. The value is immeasurable, but unfortunately there are only the practice methods of the first eight realms. Extremely serious!

If this is not the case, it will not fall into the hands of Ye Xuan. The original owner will not be able to come out to bid openly. Other strong players involved in the auction will not easily miss it, and they will definitely fight for it!

Before practicing this, Ye Xuan actually decided after careful consideration. For him at that time, the black hole was too far away to be touched in a short time.

You can practice this practice while you are looking for the practice of the eighth world! He has a phagocytic system as a foundation and is quite confident.

Unfortunately, the world is unpredictable. In less than half a year, his cultivation has been promoted to the current black hole, but the search for follow-up exercises has long been forgotten, and he has never looked for it.

It was only today that I was shocked that the crisis had quietly arrived unconsciously!

At present, the road to cultivation has been broken. Before finding the follow-up exercises, Ye Xuan's repair will stop at the first stage of the black hole, and it will be difficult to enter.

This nickname is the starry sky to the treasure level, the value is infinite, the vast expanse of the sea of stars, and it is obviously unrealistic to find a follow-up exercise in a short time.

Although Ye Xuan's hands are actually not without clues, as long as he has the heart, he can completely find out the person who was originally commissioned from Tianhe's official website database, but that doesn't make any sense. If there is a little bit of hope to find a follow-up exercise, the other party will never. The front part of the wreckage was handed out.

In addition, the two towers of the ancient heritage tower and the headless baby corpse, originally had the hope of gathering the whole body, the former is of extraordinary origin, and the secrets and talents of the vast majority of the ancient creatures are passed down in the tower, even if Incomplete, all inheritance is a weakened version. If this tower is truly a false record of inheritance, even if it is still incomplete, it is impossible to have only the cultivation of the first eight realms.

At least let Ye Xuan have no worries in the short term!

The same is true of the headless baby corpse. Its origins are too amazing, and it can command all the existences in the camp of the ancients, including the ancient supreme!

If the giant tortoise in the battlefield had also participated, the clues about its inheritance, the headless baby corpse even knows only one scale and half claw, it also has great use for Ye Xuan, can guide him, find a half-time!

It is a pity that all this is just a luxury. Ye Xuan can basically conclude that no matter whether it is the ancient heritage tower or the headless baby body, the inheritance of the cave giant turtle must be completely unknown!

Because Ye Xuan saw the ancient and peerless battle in the inheritance picture, the cave giant has never appeared before!

Although it should be the same as the headless baby corpse, the golden dragon, and so on, it is too mysterious. If you did not participate in the war, it is very likely to be alive and not degenerate.

Even if the illusion of the blood that has been passed down on its behalf has already been born, it will never be able to flow out before and after the World War. There must be hidden feelings. If you want to recover from the ancient tower and the headless baby, you will surely In vain!

"Thousands of avenues of practice, although there are strengths and weaknesses, the speed of entering the country, but in the end, the same way, the road has been broken, why not change the path, take another path of evolution? Practice, while looking for the follow-up remnants of this embarrassment, what are the two things that are not wrong, what can you worry about?"

Seeing Ye Xuan's brows locked, worried, and the mosquitoes and ghosts on the side of the mosquitoes turned their eyes again. Obviously, they didn't take this matter to heart. The tone was extremely relaxed: "For example, the gene culture solution popular in the Terran Science and Technology camp is A good choice, the biggest drawback of taking this road is that the high-grade culture fluid is hard to find, and the value is too high. It is not a problem for you, what are you hesitating?"

Ye Xuan awkwardly, the initial is really a bit of a move, but then immediately reacted, and slammed the mosquitoes and the old ghosts: "Can you not make a good idea?" Back is enough, can the Emperor be able to make the same mistake again? Can the head be kicked?"

Ye Xuan had previously learned about breaking the human body's potential with the help of genetically modified fluids and using this impact bottleneck to enhance the evolution of the realm.

Although this evolutionary method is highly efficient and direct, a tube of genetic culture fluid goes down. If it is effective, it can immediately break through the bottleneck and enter the next small step. Even if it fails, at most, it will only be tried several times.

The first-stage gene culture solution is suitable for the first large-scale star nuclear environment, and the secondary gene culture solution must be used after entering the meteor environment, otherwise it will be unbearable and will be in danger of exploding!

The black hole is used by the strong, eight-level gene culture solution!

The nine-level liquid corresponds to the ninth big original point!

That is to say, if you decide to take this road of reinforcement, Ye Xuan will at least be able to enter the tenth dimension of the environment, because the nine-stage gene culture solution can be obtained at any time.

But it is also limited to this. After the cave, he has to face the dilemma of the front road, because the nine-level liquid is the highest level of the immortal dynasty. The so-called ten-level liquid, Ye Xuan has never heard of it. Over!

"Even if you end up breaking the hole in the end, it's better than stopping at the black hole now? The gap between the two realms is different!"

The mosquito-killing old ghost does not agree with Ye Xuan's point of view. He shook his head and said: "The evolutionary path of breaking the human body with genetic drugs is completely different from the ones you practiced, and they do not conflict with each other. No matter how far you can go, as long as you can find the follow-up exercises of the hole, you can continue to practice at any time without any influence."

"In addition, don't think that this road is destined to stop at Dongtian. This is outdated. Because the ten-level liquid has been determined to be successful, just a few days ago, the entire dynasty was sensational, because the family of the ten-grade liquid was developed. It also revealed a more alarming news that the dilemma of the development of culture fluids has been broken for many years and has achieved significant milestones!"

"Perhaps one day soon, the eleventh grade and even higher grade culture fluids will be available one after another! This evolutionary road that has been traversed for many years can make great strides!"

"What? Is there such a thing? This prince has only left a few days, and even the ten-level liquid has been developed?"

The news was too shocking. Ye Xuan almost couldn't believe it, but the mosquito-killing old ghost couldn't make such a joke with him. What's more, he could get the truth after he looked back, so he immediately believed, immediately Asked: "In addition, has the message been confirmed? Is it true that the family that developed the ten-grade liquid is reliable? I dare to say that the quality of the eleventh level will be launched soon, so arrogant, not a bit embarrassed. Is it public?"

"This is a fact, no doubt, because the first bottle of liquid has been used, and many strong witnesses witnessed it. On the spot, a hole in the 9th stage was successfully completed and broke into the eleventh world. Now it is The first order of Xuanguangjing exists..."

Chapter 3213: Opportunity and turmoil

"so smart?"

Ye Xuan was shocked, and the nine-stage liquid allowed the black hole to enter the origin. The ten-level liquid allowed the origin to enter the hole. In theory, this is true, but if it is really used, it may not be effective once, even in the early stage. Those who use genetically modified fluids to break down the body's potential, and thus break through the bottlenecks of the big world, often need to try many times to succeed, not to mention later.

But now, the ten-grade liquid that has just been developed by this tube has directly let the star-studded powerhouse break through on the spot. This is no coincidence. It seems that this family is not empty. They are indeed in the genetic fluid. Significant progress has been made in research and development, and new milestones have been erected.

The road to technological intensification of the Terran camp has ushered in new opportunities and will shine.

Cultivation, physical strength, spiritual strength!

These are three different forces, and ultimately they have to reach their peak. Ye Xuan was originally a fellow practitioner of three roads. In the past, it was mainly based on the practice of vain, and the physical and spiritual strength was only an aid.

Now it's just a temporary adjustment of the direction of the focus!

With such a thought, Ye Xuan's mind was very determined, and soon he had a decision. He had the technique of quenching the blood of the ancient dragon, and then supplemented with the effect of breaking the human body with the genetic fluid. On this road of physical repair, he must make rapid progress.

"There is a lack of the latter part of the hole, and the practice road has been broken. Before finding the follow-up exercises, I can only take the road of physical rehabilitation that breaks the body, but the genetic fluid after the 9th level has now been monopolized. !"

"This kind of situation is too passive, the lifeblood is in the hands of others, and will be controlled everywhere in the later period!"

Having said that, Ye Xuanzhen's fine mang flashes: "The genetic fluid must be in its own hands, others can refine it, why can't we?"

"Do you want to develop your own genetic culture solution?"

The wretched mosquitoes nodded. "This idea is also feasible, and now it is just the opportunity to come, don't miss it!"

"In the Terran Science and Technology camp, there are many large families that develop genetic fluids. Each of them has mastered different mysteries. If you can combine the secret techniques of the secrets of the major families, most of them will have a bigger breakthrough!"

"It's a pity that the Terran has always been like this. Whether it is inheritance or all kinds of secret techniques, it will never be shared. The concept of the door valve is too strong and ingrained."

"But this time, the development of the ten-grade fluid is like a bombshell, which touches the nerves of the big families. They can't sit still."

"The family name of the ten-grade liquid is called the top-notch. It is the top gate of the Tiandi Empire, and they obviously want to use this opportunity to get some different refining secrets from other families. Develop and create opportunities!"

"So, after the introduction of the ten-level liquid, the Tuoja family has issued a call to invite all the top families of the development of the genetic fluids in the three empires of the dynasty to gather in the Tianxing, exchange ideas and discuss together!"

Speaking of this, the mosquitoes and old ghosts have a glimpse of the triangle eyes, and the thief slams the leaves and screams and smiles: "One of the three great emperors, the Xuanyuan family of the day, is one of the invited families. If you want to go to the sky People who meet Xuanyuan's family are best to keep a low profile!"

"I heard that the Xuanyuan family had an angry roar from time to time in the past few days. The golden turtles that have been settled have been squirming again and again. Every time they make such a big

movement, they are unscrupulous. This has already become a thing in the sky. The laughing stock, Xuanyuan old man was mad!"

When I heard this, Ye Xuan was as big as a bucket!

This must have been the cause of his marriage with the tenth housewife ugly ghost. Before that, he had a slap in the face of the smashing of the prince, and he had to return to the emperor to get married. It didn't take long before he came again. Xuanyuan's home was It is inevitable to laugh at nature.

Although all this is a misunderstanding, Ye Xuan is also very innocent, but he is not without responsibility. When he first boarded the Xuanyuan family, he was originally an ordinary visit, but he sent out nine grades and nine colors, who would think more.

Therefore, the misunderstanding is getting bigger and bigger at the moment, which brings confusion to Xuanyuan's family. Ye Xuan always has a sense of dim.

"In any case, the sky warrior must go. Isn't it now being distributed? It's just that the name of the emperor doesn't have to be worth it. It's no big deal."

After the follow-up trip was set, Ye Xuan quickly asked about the current situation of the third cosmic human race. Whether it was the change of the previous death star field or the smashing of the sixth house in the tenth house before his return, it was no small feat!

"You are still very embarrassed to ask this! The entire Wanluo Federation is almost broken by you!"

When the matter was raised, the mosquitoes and old ghosts turned their eyes, and then they said everything, and Ye Xuan was stunned. In short, the situation was too chaotic, and the situation was more serious than he had imagined.

First of all, the federal people of the Second Universe simultaneously launched difficulties. Their losses were too heavy this time. The fleet stationed in the Death Stars only escaped a few 100,000-meter-diameter star fortresses, almost completely destroyed.

At present, it is basically possible to determine the formation of the death star field. It is the result of the tenth house of the sixth house, which was formed by the lord of the heavenly palace. Even if the Ten Heavenly Palace has always denied it, the second universe of the Commonwealth does not buy at all. Accounts, pressure on the Federal headquarters of Varo, demanding severe punishment, otherwise they will never give up, will withdraw from the Federation, and even claim that it does not rule out the possibility of fighting with the Ten Heavenly Palace!

In fact, in addition to the federal family of the Second Universe, the crisis and pressure faced by the Ten Heavenly Palaces even include the heavenly planet of the First Universe and the immortal dynasty of the third cosmic humanoid inside the science camp!

This time, the Tianji people also lost a lot of money. Although there is no movement at present, it is bound to brew a certain kind of big action. This time, the federal civil strife is a rare opportunity. The Second Universe Federation and the Ten Heavenly Palaces really want to fight. May come in!

The dynasty was obviously not mad at the other side, facing the troubles of the various families of the Second Universe. This time, the immortal dynasty, which was also the Terran Palace, remained silent.

In the marriage of the Emperor and the Emperor of the Emperor, the Emperor of the Emperor and the Emperor of the Dragon, and the desire to use the dynasty to resist the plot of the Second Universe, the plot to resolve the crisis is not mentioned, only the formation of the death star, and the end of the death The accidental exposure of the phoenix is enough to make the dynasty dissatisfied.

The third universe is shared by the human race. Tian Qianzi has destroyed such a vast expanse of stars because of his own lusts, which is hard to accept.

The undead phoenix exposure undoubtedly proves that the Ten Heavenly Palace must have some sort of shocking arrangement. This is not an ordinary starry beast. It exists only in some ancient legends, evil and ferocious, like the ancient creatures such as the ancient dragons and dragons. It is extremely shocking to represent the robbery and destruction, but it is extremely ominous, but it is deeply hidden in the ancestral land by the sixth house of the tenth.

This is only the sixth house of the tenth, and the other nine temples? Are there any similar ancient existences in the snow? What do they want to do?

The Ten Heavenly Palaces secretly arranged such a terrible big hand, the intention is unpredictable, and also deliberately concealed the dynasty, which is beyond the bottom line of competition between the two camps within the Terran, and it is very likely to endanger the entire third universe. Tiangong gave a saying that the crisis of trust has come...

#### Chapter 3214: Thinking hard

"In one sentence, this time, the Tianganzi was miserable by you. The bamboo baskets hit the water and the catastrophe collapsed in the sixth house. The key is to inflict the entire Ten Heavenly Palace, except from the immortal dynasty and the second. The external crisis of the various ethnic groups in the universe, the interior of the Ten Heavenly Palaces, has long been chaotic."

When it comes to this, the look on the face of the mosquito-killing old ghost is more and more weird: "The swallowing treasure should have been refining into an avatar? Although Tian Qianzi strongly denied it, he insisted that the avatar is yours, he was buckled a \*\*\*\* pot!"

"But no one believes in this kind of remarks. Even the Tiangong Palace asks him to personally return people. It is obviously also doubtful. In this way, it has completely disappeared. It is said that Tianganzi has been insane in recent days. He has dispatched all the strongmen in the sixth house and tried his best to search. There is a skyrocketing over there!"

"Oh, yes, your wife seems to have disappeared. On the same day, the undead phoenix pursued unsuccessful results and returned to the collapsed sixth house ancestral giant peak. Someone once saw her being scented with a thick scent. The black light was taken away, and it disappeared with the undead phoenix. It is said that after the egg melamine smelled the incident, it bled on the spot..."

"Row egg white?"

Ye Xuan a sigh, his mind immediately revealed that the Tianganzi was smashed into a black head by Lei Yuanzhu, suddenly stunned, touched the nose, did not mean to snoring again.

"Isn't it a halogen egg? I don't think you have this kind of means. It's just a god. The great power of the fifteenth world is not able to recover. It is estimated that it will be like this in the future. The head of an oil dark-haired egg!"

The mosquitoes and old ghosts laughed even more ridiculously: "The scene is estimated to be ecstasy, but unfortunately it has not been seen with your own eyes. Hey, a squirrel that has become a fine halogen egg is like a rogue, screaming, thinking about it is also drunk. It's rare to see it!"

"Cough..."

Didn't recover? Is it because the beggars are too miserable and have been finalized?

The thought flashed through my mind, and Ye Xuan was even more embarrassed. She coughed twice and quickly shifted the topic: "Yes, what is the end of the dying phoenix? Is it amazing?"

"In short, it should never appear in the present world. It is related to the ancients. I don't have much to say about other things. I don't know much. If you want to explore these things, you don't have to ask them. How dare you talk?"

When I mentioned this matter, the mosquitoes and old ghosts were hard to get serious, and the face showed a dignified color. I don't know if it was an illusion. Ye Xuan clearly captured his sight and quickly glanced at his left front chest. That was the corpse lamp. The location of the tattoo.

Under the micro-shock, he suddenly remembered that the crazy mosquito king seemed to have similar words at the beginning. He originally said that he would give Ye Xuan a good taste, but later he laughed at the existence of the headless baby.

The mosquitoes and the old ghosts in front of us are clearly the same, but he is also aware of it. The reason why he relies on Ye Xuan's side is not to move his nest. Everything is because of the headless baby body.

The so-called amount of Scorpio is so powerful, can you guess that the sky is not a success? If this is the case, the mosquitoes and old ghosts must know the origin of the headless baby body!

Ye Xuan's heart jumped slightly, almost inquiring, just thinking about the crazy mosquito king, he finally gave up, the two old guys are as mysterious, the former mentioned the headless baby body, and immediately sighed, the latter Can you be an exception?

Asked is also a white question, but instead of stunned snakes, it is better not to know what to do, go back and look for opportunities to knock sideways!

As for the undead phoenix, the meaning of listening to mosquitoes and old ghosts seems to be related to the ancients. This is too alarming. Ye Xuan was shocked. Is it really a wild creature with the same period as the golden dragon and the wild night fork?

Ye Xuan's thoughts fluttered, recalling the battle of the ancient world that had been seen from the inheritance picture several times. In the vagueness, he really captured a breath of breath, and fought in the wild and empty air far from the picture. It is exactly the same as the breath of the undead phoenix that was felt in the sixth house of the tenth day.

And there is a high probability that the relationship between the two is not the blood of the inheritance, in all likelihood, the same existence!

An undead phoenix in an ancient era, has lived to the present?

Not only did he survive in the savage world before the endless years, but he also had a relationship with the overlord of the Terran camp.

A cold chill suddenly picked up from the back of Ye Xuan, and almost made him shudder!

If all this is true, the trouble can be great. In the wild world war he saw from the picture of the sacred bow, the existence of the suspected immortal phoenix in the distance is clearly the power of the hostile camp!

Although its strength can not be compared with the existence of the ancient night fork, gold dragon, etc., not the same level of the ancient supreme, but definitely not weak, should be the same as the empty veil, is the second-class power behind the ancients supreme!

This kind of horrible existence Ye Xuan can not dare to provoke, even if it is far worse than the former for some reason, the strength reflected only surpasses the mighty power of the fifteenth world, but it can be restored after one day and return to the era of the ancient times. What is the peak strength?

Moreover, since there are no dead phoenixes, who can guarantee that there are no similar wild animals in the ancestral homes of the other nine palaces?

All these thoughts are extremely scary. Ye Xuan did not dare to think about it. The back has already burst out of cold sweat. What secrets are there, and it is related to the hostile camp of the endless years before the endless years. ?

What is the relationship between the Ten Heavenly Palace and the hostile camp of that year? What is their plot?

"You don't have to worry about swallowing the avatar. He is enough to protect himself. It just makes him grow up in the self-defense camp controlled by the Ten Heavenly Palace."

After some indulging, Ye Xuan told the scorpion mosquitoes: "As for me, since I am about to leave and go to the Heavenly Empire, then the news of returning to the Arc de Triomphe will not be revealed, lest the goods of Tianganzi be cited. Come, he knows that he has swallowed the bottom of the body. If he can't find it there, he is very likely to turn around and kill here."

"Hey, what happened? I had an old account to be liquidated with him. I am afraid that he will not succeed?"

When I mentioned Tian Qianzi, the wretched mosquitoes sank into the face, and there was obviously an old grievance between the two people, so that Ye Xuan's heart had a variety of conjectures, a demon person, and the sixth house of the Terran The Lord has old grievances, and this matter is indeed fascinating.

"That is, you are a powerful man, naturally no fear of him!"

Ye Xuan's eyes are straightforward: "Is it his best man? It doesn't matter if the undead phoenix is attracted. It is just a direct blow!"

"Oh..."

The mosquitoes and old ghosts have nothing to say, but they still have no face and no skin, and they scream at Ye Xuan, and they are screaming.

"Get ready, let Naples send me some genetic fluid, one to nine!"

Between the talks, Ye Xuan has already got up, and the fine mans in the middle of the flash has flashed: "Since I decided to focus on the road of physical repair, between the departures, I must first solidify the foundation..."

Chapter 3215: Break

Ye Xuan does not know much about the details of gene culture fluid research. Many core technologies are secretly declared by some big families, that is, they are all in the database of the phagocytic system, and they only collect some well-known information.

Of course, if he wants to acquire the core secrets that are in the hands of a large family, he can directly steal it by invading the internal star network of the other family through the personal starry communication system.

In fact, this is one of the many plans that Ye Xuan has embarked on to follow the path of genetic fluid research.

In general, the gene culture fluid is actually a super-energy biopharmaceutical formulated in proportion to various natural materials. These treasures can be some of the spirits in the universe, or some Minerals are melted by special means and then included, even the blood, bone marrow and other materials of the savage beast!

In short, the totality of the forest, extremely complex, can be described as all-encompassing, contains countless changes, everything is possible!

In the entire Terran science and technology camp, the family and power of developing genetic culture fluids are as good as the hair, and even some personal dispersal are also keen on this, and never tired!

However, the research powers and families of countless big countries and small countries under the three empire's territories can basically only formulate one to seven grade liquids. Only the top three families of the three emperors can be formulated.

As for the nine-grade liquid, only a few top families on the emperor's imperial star can be formulated. The Xuanyuan family of Tianxingxing does not have this ability!

The preparation of the gene solution requires the use of a large variety of natural materials, each of which requires a very strict requirement for purity and the proportion of addition. All of this is a combination of changes, so the changes are unimaginable. Every time the liquid is at a higher level, the difficulty climbs innumerable times. The difficulty is certain, and the most important thing is the foundation and experience.

But this time, the Tianzhe Empire Emperor Tiantian Star's extension of the home, actually can only prepare the level of the eight-level liquid, skip the experience accumulation of the nine-level liquid, directly possesses the preparation capacity of the ten-level liquid, and later came to the top, even The top gate valves of the imperial star were all left behind, and this incident was not only a sensational sensation, but also shocking. In some eyes, it is even more doubtful.

Undoubtedly, soon after, all the top families of all the genetic fluids in the entire dynasty will gather in the sky, and then there will be a torrent of turbulence.

Ye Xuan has already learned this point, so he is not in a hurry to get on the road. If he wants to gain something in the sky, he must do some preparatory work before he leaves, and he will not cut the firewood.

Soon after the mosquitoes and old ghosts left, Naples and others came one after another, chatting with Ye Xuan for a while, and finally left a space box and left.

The small box contains the gene culture solution required by Ye Xuan, from one to nine!

Although the nine-stage liquid is precious, it is extremely difficult to prepare. Several top-level door valves of the immortal star can only be formulated with ten pipes per year. The nine-stage liquid produced by the entire Terran technology camp has only dozens of tubes.

Even so, apart from the normal consumption, the emperor will leave some storage resources as a backup resource every year. Even the congressional share of the Vatican Federation has a lot of exchanges. Ye Xuan has exchanged three tubes at a time. It is possible to roughly calculate the nine-level liquid stock of the Imperial Treasury.

I dare not say that I can squander at will, but for some important royal members, the ten can easily get it.

This time, Ye Xuan left the immortal star and was sent to the death star field. Not only did he squander a lot of resources from the imperial official through the efforts of the emptiness, it was the five emperors, he also personally went to the door and slaughtered it again, eventually from immortality. The star carries a lot of resources, and the gene culture fluid is one of them.

Before the establishment of the Arc de Triomphe, Ye Xuan only left some of the treasures, and the rest were handed over to Naples as a backup resource for the development of the Arc de Triomphe!

In the space box that is sent right now, there are ten tubes in each of the first to the ninth grades, which is enough for Ye Xuan!

The gene culture solution stimulates the body's flesh and blood cells to excavate the potential, triggers genetic changes, breaks the human body, and thus realizes the evolution of life level and enhances the strength.

This is an independent evolutionary system. Even though Ye Xuan is now the eighth largest black hole, if you want to embark on this genetic evolution, you still need to start with the first liquid!

Different grades of genetic fluids have different colors, and the first-grade liquid is bright red as blood. Although the energy atmosphere is not very strong, it is extremely unique.

The role of the first-stage fluid is to stimulate the human body's potential, to complete the first transformation of the cellular genes, and so on, if the first door of the evolutionary path is pushed, the ordinary people will step into the hall of human genetic evolution and become the first-order of the star nuclear. Strong starry sky.

Ye Xuan is now a strong place in the black hole. The energy contained in the first-class liquid has little effect on him. Ye Xuan does not expect to have a significant improvement in his strength.

This is also true. The stimuli of this tube is very weak to him. If you don't feel that the whole body is slightly numb from the inside to the outside, he even suspects that the first tube of liquid has failed.

Subsequently, Ye Xuan one tube and one tube swallowed one after another, all of which were effective, and within a short one hour, they swallowed a whole eight tubes.

The front seven tube leaves Xuan did not feel anything after swallowing, only the last eight tubes of swallowed, finally let him see the effect.

The eight-level liquid can make the existence of the ninth-order large-scale perfection of the seventh-largest star river directly into the black hole. Although Ye Xuan has already been the first-order existence of the black hole, it is the power of cultivation, not the power of flesh and blood.

After the last tube of eight-stage liquid was swallowed, he immediately had a feeling that all cells inside and outside the body were strongly stimulated. In addition, he even faintly touched the invisible chain that represents the potential of the human body, in the body. , entangled all the flesh and blood cells, invisible power!

All over the body!

Finally, as the feeling that the flesh and blood cells are strongly stimulated gradually dissipated, Ye Xuan clearly feels that these invisible shackles are less, which is the effect of the eight-level liquid!

Since then, Ye Xuan has stopped!

He is currently unable to take the nine-level liquid, and its role is to make the eighth-order black hole in the ninth-order big perfect star-studded power directly break through to the ninth big original point of the first order!

Ye Xuan's flesh and blood force is only a black hole, it is too early, it must be waiting for the power of blood to reach the black hole nine-step great perfection, in order to continue to swallow the nine-level liquid, step into the original point!

"The path of evolution of flesh and blood has been opened, and the power of blood and repair have been synchronized, and the same has reached the first stage of black hole. Then, by using various means, the force of my blood is pushed all the way to the black hole. The ninth order is perfect."

With clenched fists, Ye Xuan at this moment is full of confidence: "Whether it is the origin of the star or other cultivation resources, you can use it again, but there are better choices now..."

Chapter 3216: Robbery

The better choice that Ye Xuan pointed out was the other two treasures that were exchanged from the system exchange shop in the death star whirlpool not long ago.

A nose yuan crystal: energy crystal, gather endless, a nose and nine secluded and condensed! Grade: Starry epic! Quality: pure and flawless!

Robbery Longhua: According to the inheritance of the ancients, the Daxiehua Longduer must have Qidan! Grade: Starry epic! Quality: Excellent product!

At the moment, Ye Xuan has already opened the path of human body evolution, and can continue to practice as before, except that the star nuclear energy received from the source of the star nuclear will not be used for the improvement of the power of the hole. It is used to forge his body and improve the power of blood.

But in addition to the energy of the star's nuclear source, this path of physical evolution has many other ways to achieve the effect of improvement.

For example, the heterologous fruit of some strange trees in the universe, if there is the role of cutting the marrow, forging and quenching the bone marrow, then the same can be used to swallow, also has the effect of improving the strength of the flesh.

Ye Xuan is the two treasures exchanged from the system exchange store. A Naoyuan Jing is prepared for the It should have no effect on the improvement of the flesh and blood. But it can enhance the magical power of Ye Xuan. Power can be as beneficial to the improvement of combat power.

As for the robbery of Longhua, it is prepared for the blood of his dragon, and the improvement of blood is actually the growth and transformation of the power of flesh and blood.

Therefore, according to Ye Xuan's estimation, if this robbery Longhua Erdan does have a miraculous effect, he is now in the realm of the physical strength of the flesh and blood, and he will surely be able to achieve a transformation and advance to the second stage of the black hole. Big!

After some indulgence, Ye Xuan decided to take both the robbery and the sputum and the sputum.

Because this is not a conflict.

A nose yuan crystal is a crystal, Ye Xuan can not directly swallow like a medicinal medicine, can only be handed over to the phagocytic system, let the system absorb its energy, inject into the golden small bow hanging in the sea. .

All of this does not require Ye Xuan to intervene and pay attention, he can fully devote himself to the remedy of the drug refining.

After the decision, even if he took out the two treasures, he was thrown into the body's phagocytic system, and when he robbed the dragon, he raised his hand and shot it in the mouth, even if he swallowed it.

Later, Ye Xuan came to the outside courtyard and closed his eyes. The reason why he was not indoors was that in the event that there would be a magic dragon in the shadows, the vision would appear behind the scenes, fearing that it would be the trend of the arrogant Even the whole house has to be opened.

"Hey, congratulations to the host, found a nose crystal, do you immediately extract energy?"

At this point, the familiar system sounds sounded at the right time, and Ye Xuan even injected the energy into the golden bow after giving the deterministic reply and indicating that the phagocytic system completed the extraction.

Then he concentrated on the drug's ability to take advantage of the dragon.

This Dan is different, the entrance is self-integrating, turning into an invisible hot energy, directly rushing to the sea of Ye Xuan, not into the black gold dragon scale.

"boom!"

"Hey..."

As Ye Xuan expected, as the invisible hot potion that the tyrannical dragon was melted into the black gold dragon scale, the original silent dragon scale was activated for the first time. The magic dragon is under pressure, and at the same time there is a clear sound of dragons!

A phantom of a dragon covered with mysterious black gold dragon scales appeared behind Ye Xuan, rushing up to a kilometer...

Fortunately, the starry sky defensive cover over the city above the Arc de Triomphe has a height of several kilometers. Otherwise, the energy hood will be shaken.

Even so, all the strongmen in the Arc de Triomphe were still alarmed, and they turned their heads to the direction of Ye Xuan's central domain castle, and all the faces were shocked and shocked.

This creature of the dragon is not found in the world. It only exists in ancient legends. At the moment, what they see is only a virtual shadow of a dragon, not a real body. This is enough to prove that Ye Xuan's body has some kind of body. The inheritance of the ancient dragon.

How can you not be overwhelmed and excited?

For everything in the outside world, Ye Xuan did not pay attention to it. This is the Arc de Triomphe. It is the safest place for him. Even if he does not guard during cultivation, there is no need to worry about danger.

At the same time, with the power of the black gold dragon scales being fully activated, the magic dragon's shadow appeared behind Ye Xuan, which rushed to the surface, which represented the invisible heat of the dragon's drug, after passing the black gold dragon. After the energy conversion of the scales, it quickly came back, and the black gold dragon scales seemed to rush out of the Nujiang River.

As soon as he arrived at Ye Xuan's knowledge of the sea, the hanging Nujiang instantly exploded, turning into countless channels of trickle, radiating out of Ye Xuan's knowledge of the sea, heading in all directions, began to nourish every cell inside and outside Ye Xuan, Every inch of flesh and blood marrow!

"Oh la la..."

From this moment on, Ye Xuan once again sensed the fine chains entangled in countless cells in the body. They represent the potential of the human body and impede power.

This time, the feeling is clearer, and with the numerous tricks of the robbery of Longhua, the numerous chains of shackles on each cell in Ye Xuan have all been issued. The abnormal sound is like being pulled by an invisible force and tearing.

An indescribable tingling sensation suddenly came, and Ye Xuan only felt that his entire body was being cut by countless invisible knives, which was the trickle of the ravages of the dragon. Pulling the chain of shackles, the effect of the evolution of flesh and blood cells.

The more intense the pain, the more obvious the effect of this medicinal force. Once this evolution has been completed, the shackles of the flesh and blood cells in Ye Xuan can be broken more, and the power of qi and blood will skyrocket!

The heart gave birth to Ming Wu, Ye Xuan suddenly excited, this moment of him, can be described as painful and happy, feeling really ecstasy, can not be named!

At the same time, the nine fierce energy of the A Naoyuan Jing has been harvested by the phagocytic system at this moment. The whole A Nao Yuan Jing is truly flawless. After the energy is collected, the crystal disappears directly. Ding point's residue has not been left.

It turned into a pure black light with a faint blood red color, and was directly injected into the golden small bow that Ye Xuan knew in the sea.

"Hey!"

With this black and red line, the net quilt was injected, and the golden bow hanging from Ye Xuan's sea was also completely activated. A fierce and fierce sound rang, and the dragon's virtual shadow just dissipated. Behind the leaves of Ye Xuan, it instantly shows a illusion of breath and horror, up to a kilometer!

Numerous strongmen in the Arc de Triomphe looked back again, overlooking the illusion of the shadow behind Ye Xuan, trembled and chilled!

It was also this moment, and even Ye Xuan's unexpected unexpected changes suddenly broke out...

Chapter 3217: Eye reappearance

"Hey..."

The sound of this whistling sound reveals the endless sense of the cold, killing the sky!

It comes from the barren night fork, and at this moment accompanied by the whistling sound of the rice in the back of Ye Xuan, it is a back-and-night demon wing, a golden giant bow hanging in the hand, and Ye Xuan The ancient barren cherries in the ruins of the eternal world of the sacred bows are exactly the same.

No, there are still different!

The only difference is the energy arrow that is being displayed on the golden giant bow held by his left hand.

In the ruins of the ancient world, even the true body of the ancient night fork, the bow tire gradually pulled to the full bow, and finally the arrow of the sky, the arrow of the sky and the arrow is the whole body, and the sky The bow is the same as the bow.

When Ye Xuan casts a bow and bows, the arrowheads appearing on the bowstrings are the same!

But at the moment, Ye Xuan is behind the sacred arrow of the ancient yin yin yin yin, although the main color is Yao Jin, but in the rich glory of the true color, there are some black and red colors. The texture of the network.

These lines make a more intense and fierce meaning for the arrowheads in the middle. It should be the variation effect caused by the black-and-red color of the nose, which is from the nose and nose. Sui Jing, and sure enough, the power of the 陨天弓神通 has been improved, like a metamorphosis, reborn!

It is a pity that although this kind of change is a good thing, the power of Hao Tiangong is stronger, but for Ye Xuan, a disaster has come down.

To be precise, the reason why the catastrophe came, is not a factor in the transformation of the scorpion sacred sacred sacred sacred crystal, which leads to the two factors.

First, the mutated dragon's phantom appears, revealing a rich and ancient atmosphere, followed by the variability of the ancient yak, which is also true, and the ancient atmosphere is rich.

The two existed in the distant era of the ancient times, but they are all the most powerful level of the ancient supreme, and belong to the same camp!

This kind of breath appeared two times in a short period of time, and all of them were mutated. The ancient atmosphere was very strong, and the end result was that all of this finally caused some kind of power attention.

This mysterious power may call it the heavenly will!

Since the experience of the ancient cages in the Devil's Star Field, Ye Xuan has been thinking about one thing, that is, in the starry environment in which he is currently living, whether there is a will of heaven.

He pondered this question for a long time and eventually turned to negation.

The level of Heaven's will is too high, and the Qixing River is so vast. If there is a starry sky, the Heavenly Way will control this endless river, how powerful is it? I am afraid that even the wild days of the ancient times, but this is the case?

This is too horrible, not realistic, it should not exist!

In his view, the world of starry sky and sky, although there are stars and avenues, the law is tens of thousands, but the kind of heavenly will, like the dominance of all things, should not exist. Ye Xuan has never heard of the starry sky environment. When a strong person breaks through the realm, there will be a robbery, which just confirms his guess.

However, all of this was completely overthrown at this moment.

"Booming!"

"boom....."

Just in the next moment when Ye Xuan's giant kilometer of the ancient nightshade appeared, the singularity of the stellar river outside the defensive saga of the Arc de Triomphe suddenly came with a thunderous blast, a awning blue thundercloud. It is gathering rapidly, and it has stretched thousands of miles in the blink of an eye, occupying nearly half of the skyline of the Triumph, and continues to expand!

This is clearly the rhythm of the robbery. The countless military cadres in the entire Arc de Triomphe were all stunned. Is anyone going to rob? This is a legendary thing in the starry sky environment, which is unimaginable.

"What the \*\*\*\* is this guy doing? Actually it has attracted the lock of the will of heaven. How can this be?"

Looking up at the sky, this time, even the strength is at least in the fifteenth world of the mighty wrinkles and mosquitoes, and the face also shows a very dignified look, even slightly pale. Intention, muttered to himself: "What happened? This shouldn't be! Starry world, isn't there a avenue of avenues that only one thousand rules merge into one? How can there be a will of heaven? It's amazing!"

"No, the blue robbery cloud is not the condensation of this plane itself, but the cross of the void!"

In the end, there were countless blue thunderclouds in the heights of the triumphant mosquitoes, and finally found out, even when they exclaimed: "In the deepest part of the vast thundercloud, there is a strong presence. What is the ectopic smell, what is it? A huge closed eye?"

"A avenue of the sky? What is the origin? Actually it is also blue, hidden behind a crack in the void, that is another plane, it is what it has sensed, even if it is in a deep sleep at this moment, it has subconsciously torn open the void, Bringing endless blue thunder clouds..."

"Hey!"

At the same time, with the severe pain of tearing all the flesh and blood cells in Ye Xuan's body completely disappeared, the sound of a high-pitched dragon's voice rang again, and the demon dragon's illusion that had just dissipated, once again appeared, and pulled the string. Nearly full of bows, the ancient night forks are juxtaposed behind Ye Xuan. The two powerful and supreme creatures have a strong killing intention, and they are looking at the hollow crack in the depths of the blue thundercloud.

They seem to have also sensed something from it. It is a very familiar atmosphere, but it is very weak now, and it seems to be sleeping.

The medicinal power of the robbery of Longhua was completely exhausted. The shackles on the numerous flesh and blood cells in Ye Xuan were torn apart, and it was useful. The familiar system sounds had already sounded in his mind.

"Hey, congratulations to the host, the power of the flesh and blood is elevated! The current realm: black hole second order!"

"Hey, congratulations to the host, the power of the flesh and blood is elevated! The current realm: the third level of black hole!"

"Hey, congratulations to the host, the ancient gods and the heavens bows have completed the transformation, the power has skyrocketed, and the evolution is gratifying!"

"Hey, congratulations to the host, the dragon's blood level is improved, the related demon \*\*\*\* blood, the power is skyrocketing!"

"Hey, congratulations to the host..."

When the system in the mind prompted to sound, Ye Xuan also opened his eyes, the moment of consciousness return, he was shocked by everything in front of him.

Looking up, his eyebrows and enchanting powers can bloom, and there seems to be an invisible sacred shot from which it has fallen into the deepest part of the blue sky at the height of the Arc de Triomphe.

By virtue of this enchanting glimpse of the source, Ye Xuan clearly saw a void crack, the virtual air opposite the crack is strange, definitely not the third universe, but another distant mysterious world.

"Cyan eyes?"

When the tight blue sky was in sight, Ye Xuan was suddenly stunned and exclaimed.

Too familiar!

This blue-eyed eye is clearly the commander of the hostile camp in the ancient world. At that time, it appeared in the back of another camp in the war...

Chapter 3218: An arrow

Seeing the first moment of this blue-eyed eye, Ye Xuan's heart gave birth to a realization. Although this is only an intuition, he is sure that this blue-eyed eye is the commander of the hostile camp in the ancient world. The ancient heaven will!

It is not only the body of the body, but even the second blue sky of the devil's star in the wild cage, it should be its avatar, and now, Ye Xuan saw the Lord, although the eyes are tight Closed, it seems to be sleeping, but at this moment, he is still being shackled by the cold hair.

After all, I was still eyeing!

Ever since he experienced the ancient cage of the Devil's Star Field, Ye Xuan has always suspected that the enemy camp commander who had participated in the battle of the ancient world should not have fallen, although Ye Xuan did not see the battle from the inheritance picture. the result of.

However, since the ancient cages appeared, his speculation is very likely to be the fact. Otherwise, who is the ancient cage of the Devil's Star Field?

To this day, this speculation has finally been thoroughly confirmed, and Ye Xuan suddenly gave birth to an unprecedented sense of crisis.

For the sudden advent of this disaster, he has already realized it with a little thought, which is obviously related to the evolution of the two variants, the power of the sky and the blood of the dragon!

But this is no longer important. What matters is the danger in front of you. How to resolve it!

He never imagined that swallowing a robbery of the dragon, actually led to such a terrible catastrophe, forced him to go to Hua, this is what robbed the dragon, it is simply a robbery Erdan!

Fortunately, this blue-eyed state is not very good now, and it is closed. It seems to be in a deep sleep. Was it in the original battle of the ancient world?

If this is the case, the situation will not be so serious that it will not be resolved. There is still a chance for the headless baby to grow up!

At this moment, Ye Xuan's heart suddenly gave birth to a mysterious intuition that gave him a sense of foreboding. Perhaps one day in the future, the battle of the world that had appeared in the distant old days, and finally, still reappears in the world. .

But that should still be very far away. At least, at present, whether it is a headless baby corpse or a commander of the hostile camp, the blue sky that is suspected of the will of the ancients, is in a state of poor condition and is in a period of recovery from sleep.

His guess was verified again. At this moment, Ye Xuan's corpse lamp tattoo on his left chest suddenly became hot. He clearly captured the two secret energy, slid through his body, and finally fell into his knowledge of the sea. The golden golden dragonfly hanging in the empty golden dragon scale.

At the same time, after the corpse lamp tattoos shot the two secretive energy, they crouched again, no breath, and the enemy's breath appeared. It did not mean the slightest appearance of a battle.

From the two breathable secret energy did not enter the golden bow and black gold dragon scales, headless baby corpse should want to borrow their hands to resolve the immediate crisis!

I am not planning to show up!

This is the first time Ye Xuan has seen a headless baby corpse, but this should not be a fear, but a stagnation!

"Hey!"

"Hey..."

Ye Xuan's golden bow and black gold dragon scale hanging from the sea were respectively injected with a mysterious energy from the headless baby corpse. The first two hours of the virtual shadow behind him changed.

The Dragon of the Dragon and the sound of the screaming of the ancient nightshade sounded at the same time. Then, the two sinister sacred sacred shadows began to merge, and the scorpion arrow on the left hand of the ancient Yaksha It is a masterpiece of light, in addition to the original glory of the original color, and the black-red dense lines added by this transformation, there is a looming black gold dragon shadow hovering over the arrow.

Ye Xuan's body shape was mad, and his heart immediately had a clear understanding. He didn't even think about it. When he even screamed: "Remove the star defense hood immediately... immediately!"

At this moment, all the fleet strongmen in the entire Triumph City have long been completely sluggish, including Naples and the wretched mosquitoes. They vaguely saw the looming scene in the depths of the blue thundercloud, and they were shocked and stupid.

When I heard Ye Xuan's violent screams, Napoli responded for the first time. When the instructions were issued, with the high-frequency slamming of the slamming, the huge starry defensive hood that had shrouded the entire Triumph City disappeared!

This kind of star defense hood is pure energy form, its condensation needs a lot of energy support, it is very simple to remove, and it is enough to close the energy supply channel!

"call out!"

The starry defensive hood of the Arc de Triomphe has just disappeared, and behind Ye Xuan's body has already heard a very fierce sound of screaming.

The shadow of the ancient night fork has been pulled to the full arrow of the arrow, and finally shot out.

In fact, shooting is not just a simple arrow, or rather a simple arrow.

At the same moment that this powerful and powerful arrow of the sky is off the strings, it has been merged into a shadowy ancient night fork and black gold dragon. The whole virtual shadow is swiftly at an unimaginable speed of horror. Zoom out and fall into the arrow.

When the sagittal tail of the arrow of the sky will also leave the bow tire, the huge golden giant bow of the whole handle is also turned into a golden awn, and the arrow is integrated...

In the blink of an eye, behind Ye Xuan, there is only one energy arrow with a breath of horror. The color is colorful and the breath is terrifying. Even he has a kind of knee-swaying, almost unsteady standing.

A simple arrow, but within the body of the arrow, it is a fusion of two sacred and sinister sacred gods.

The extent to which its power can bring terror is simply fascinating!

Ye Xuan's whole heart instantly mentioned the eyes of the blind man. He has never been so nervous. Because he clearly saw it, he crossed the sky above the Arc de Triomphe in the mighty horrible arrow of the sky, and rushed into the river. Seeing that it is necessary to plunge into the center of the blue thunder cloud that is still brewing.

In the depths of the thundercloud, the cyan sky that is connected to an eccentric plane, the blue sky that has been closed, seems to tremble slightly.

That feeling, like the blue sky, suddenly felt something, and wanted to wake up.

Ye Xuan's body was blown up, and his heart began to pray. Don't wake up, otherwise the consequences will be unimaginable.

Even if I want to grow up for a while, I will be forced to show up in the future, and I will be unable to bear the consequences of this.

To be precise, it should be the third universe, even the entire Wanluo Federation, including the first universe where the Tianji people are located. Today, the three major universe planes are all unbearable!

"boom!"

Half an instant, the horrible sound of the explosion came, and the blue sky in the depths of the void was still unable to open, and it did not have this opportunity.

The arrow of the sky plunged into the blue thunder cloud, and it exploded in an instant. A vast expanse of the void was completely destroyed by a horrible energy, and it was completely destroyed. It turned into a void black hole, and even the road connected to the ectopic plane. The void cracks have disappeared.

An arrow is broken!

Chapter 3219: Re-starting

A simple and squandering arrow, all the thunderclouds collapsed, and even the passage of the blue sky eye that teared the void due to the induction of induction was completely erased.

The end of the arrow is finally finished!

Ye Xuan Changsong breathed a sigh of relief, only to find that the whole person is like a vain, and it is cold and sweaty...

Soon, the star defensive hood that had just been re-appeared again, because the blue thunder cloud in the far distance of the sky has disappeared, and there is also a black hole. The whole city is not suitable for exposure in this environment for too long. The newly formed black hole is still It is very dangerous. Although it is impossible to swallow the Arc de Triomphe because it is too far away, it is unlikely to be at least within a hundred years, but the newly formed cosmic black hole is accompanied by a large number of terrorist rays, which is very harmful.

Then, a group of high-level people from the Arc de Triomphe came.

The wretched mosquito-killer, first, followed by Naples and the early transformation of the imperial dynasty emperor's emperor II into a mechanical tribe, is no longer the one who pursued the love of the butterfly in the past, but instead became silent. station.

Then there was Zuofengtai, Limosa, Ba Guai, Naboshan, the master of the slaves, and the two masters who followed Ye Xuan's two devils and thousands of squadrons, and the squadron and Cang Qingyu.

In addition, Ye Xuan even saw Du Wenxuan Du, who had been staying in the internal research space of the black mosquito, and he followed the thousands of federal elites who had been released from the Black Wind No. Helping the guy has already committed Ye Xuan, pretentious, and declared that he is the so-called triumphant think tank.

In fact, in Ye Xuan's eyes, these guys are a group of pests. They are similar to the stupid mosquitoes and smells. It's absolutely no good thing to get together. This is where the Arc de Triomphe is in the Death Star, and the surrounding voids are all without energy. A large number of dead stars, otherwise, if there is a life planet around the void, I do not know what to do with this group of pests!

Although the crisis has been resolved, even the threats of the future have been eliminated. The other party's tearing of the void cracks to lock the passage of the star field has become a huge black hole. Follow it, let it go through the sky, and definitely can't find it again.

But perhaps it was because the reality that had happened before was too shocking, and the strong people who came one after another, the face was still full of horror.

It's the Qiang Kun's powerful mosquitoes and old ghosts, which have not recovered completely. The slightly pale face is dignified and serious, and the sign-like wretched atmosphere disappears. This is really rare!

"You don't have to worry about everything that happened before, you don't have to think about it, the crisis has been solved, and the possibility of future troubles has been completely wiped out!"

Seeing all the strong people under the squad entering the castle, they didn't say anything. The look on the face was more than a weird one. Ye Xuan was also a big headache. He knew that these guys would definitely want to ask, including the magic dragon behind Ye Xuan. The shadow of the shadows, the shadow of the ancient night fork, and even the unexpected days of robbery.

And it is still across the plane, from another mysterious unknown universe plane.

All of this is full of strangeness. Among the strong players in the field, except for the mosquitoes, the old ghosts may know some truths, and everyone else should be confused.

After all, the movement is too big, too horrified, and their minds are not calm and understandable.

It's a pity that Ye Xuan Guan can't say more about it, and there is no way to explain it!

"After a while, you can safely develop the Arc de Triomphe in the Death Star, and grow up as soon as possible. I have a hunch that the third cosmic and even the entire Whala Federation will have a big change."

"And it is very likely that even the enemy of the first universe will be involved. At that time, all three universes will be caught in a whirlpool of turmoil. We must grow up as soon as possible before the storm comes. The power of protection."

Having said that, Ye Xuan turned around and swept a group of strong men. After a final look, he said, "Do not leak anything about what happened just now, including my return to the Arc de Triomphe, lest it is a curse. As for me, I will leave tomorrow, and I will walk in the territory of the immortal dynasty and change my life."

Speaking of here, seeing Naples and Yingtai and others seem to want to speak out, Ye Xuan immediately raised his hand and shook his head: "No one wants to say more, this time, I decided to go alone, and soon I will return. By then, the Arc de Triomphe will Turned out!"

In fact, this time to start the journey again, Ye Xuan is not only alone, but even the card means on his body is far worse than before!

The ancient heritage tower, the void scoop, the demon dragon shadow, and the \*\*\*\* corner of the soul are all moved by the headless baby corpse, and moved to the body of the phagocytosis.

Ye Xuan's current means, open the headless baby body, not only mention the secrets of spiritual strength: the annihilation of the spear, the destruction of the vortex, the absolute shock, the perfect shock! And spiritual thunder and lightning, spiritual crushing, spiritual charm and so on!

In addition, it is the sacred bow of the gods, the enchanting gods to glimpse the source, and the blood of the black gold dragons, the dragons roar, the eyes of the dragon, scorn!

Of course, there is also a Leidi Baoyin in the sea that still contains seven Leiyuan beads, but he generally does not use it. This time, he goes out alone and he will try his best to resolve the crisis. Can grow up quickly.

After a long period of time, he and the devour of the body tossed both ends, growing simultaneously.

Devouring himself in the ten-day palace of the Terran camp, and he changed his identity, looking for opportunities to study the genetic culture solution in the immortal dynasty of the Terran Science and Technology camp.

At the same time, secretly search for the follow-up exercises of the hole, as well as the mysterious effects of phagocytic source crystals, other sources of production and so on.

As for the strongman who accompanied him, he only brought the blood of the mosquito and beast in the wrist ring! Even the eight-star king scoop, thousands of mosquitoes and 100,000 soldiers and scouts did not bring.

These genus have been exposed, branded with the Emperor Xuanzi, even if they are around, they can not be easily used, otherwise they will directly reveal their identity.

In addition to the treasures outside the body, in addition to the most basic treasures of the strong stars, the warrior's \*\*\*\* blade, the armor does not destroy the glass armor, and the battleship hole shuttle, Ye Xuan only brought the life of the dragon field The giant fort, the other is the black mosquito, the black wind and other big man fortress, and the Thunder fortress these big killers did not bring.

All stayed in the Arc de Triomphe for the use of the wretched mosquito and the Naples, so that the Arc de Triomphe can grow and develop as soon as possible.

Although there is no human smoke in this star death star field, all kinds of mineral deposits are still very rich. Although they do not attract the star power of the three major planes like the phagocytic source crystal, they are still very valuable for the development of the Arc de Triomphe. of.

The key here is still a land of nowhere, and all the mineral deposits on death can be fully exploited!

In this special environment, I believe that the triumphant fleet that has been forgotten will soon grow and develop...

Chapter 3220: Heavenly Empire

Ye Xuan originally planned to go on the road alone, only with the blood of the mosquito king!

But in the end, in the same time, all the families have asked for the same direction, he can only make concessions, and decided to bring a man to the past, but the strong one does not, it is contrary to his experience of this time, relying on his own strength The original intention of growth.

He decided to take away the sword of the sea and the army of one thousand demon slaves under his command!

The reason why this decision was made, Ye Xuan was also decided after a certain consideration. First of all, he returned to the sea and his army of one thousand demon slaves. Although they had devoted themselves to the various cultivation resources of this time, they were able to quickly After upgrading their own strengths, everyone's current cultivation is far from being comparable to when Ye Xuan just got the Black Mosquito Battlestar.

It is the fifth largest realm of the ninth stage of the stellar stellar victors, and the one thousand genius scouts under his command are all in the fourth realm of the planet.

Even so, for Ye Xuan, who is now the eighth-order black hole in the eighth world, even with them, when it comes to real crisis, Ye Xuan is absolutely impossible to give them dependence.

Ye Xuan, who can make the black hole repair, feel the threat of crisis. The magic slaves of the fourth and fifth realms, even if they are a thousand people, can they be used?

That is to say, with them, in any case, it is impossible to violate the original intention of Ye Xuan.

In addition, this time, going out to refine, Ye Xuan, in addition to searching for the follow-up exercises of the hole, the secret of phagocytizing the source crystal and the news of the new source crystal

production, there is a more important purpose, that is, to master the gene as soon as possible. The preparation of the culture fluid is secretive, and it has the ability to research and formulate the genetic fluid by itself.

This is a very complicated project, including the collection of intelligence information from various sources of natural materials, and so on.

Only by Ye Xuan, in some cases, there may be left-right and right-handedness.

Can't you always do everything?

With a knife to the sea and his thousands of demon slaves, you can solve this problem. When you need it, you can send them out to worry. These demon slaves are all demons and scouts in the intelligence gathering and various days. The ability to collect materials is still fully competent.

It was the combination of all of the above, and Ye Xuan finally decided to go with the sea, and at the first time, he sacrificed a hole in the soul, letting the sea lead a thousand enchanted army under his command and quickly entered In the meantime.

In the end, Ye Xuan waved the hole in the body to the immortal world, turned and returned to the main building of the castle, and let him know how to persuade him, such as Naples, and he will never let go!

.....

Like the Heavenly Empire, the Heavenly War Empire is one of the three great empires under the immortal dynasty of the Terran Science and Technology camp, and the Heavenly Battle Star, but the Emperor of the Heavenly War Empire!

This time, the ten-level liquid was suddenly launched, which shocked the entire federal extension family. It is one of the top gate valves prepared by the generation of genetically modified fluids among the many top-level gate valves on the Tianshen!

It is the same as the Xuanyuan family on the heavenly emperor!

There is a lot of top-level door valves for any empire's Emperor's Star. These top-level door valves have different fields, but basically, among all the top-level gate valves of each Emperor Star, they are specialized in the development of genetic fluids, at least There are also four or five.

The sky warrior is like this, and the sky is also the same. The top door valves for the development of the gene liquid on these emperors are basically capable of formulating the eight-stage liquid. Otherwise, they will not be able to stand on the emperor star, or they will not be able to enter the top gate of the emperor. The ranks.

With regard to the basic information of the Tianzhan Empire and its top-of-the-line door-to-door family, Ye Xuan has opened a personal star-to-air communication system, connecting with the internal star network of a flagship fortress under Naples, entering its database and copying it completely. .

After all, it is the fortress fleet of the immortal empire of the imperial star, the basic information about the three major empires under the imperial dynasty and some of its important top-level gate valves. The data center of the internal satellite network of the fortress is backed up.

Of course, these intelligence information must be incomplete, and some confidential resources can only be obtained in the database of the main network of the immortal Star Dynasty.

That requires authority, and the main control center of the immortal star dynasty primary network is a mature body of the immortal starry sky super brain, Ye Xuan does not dare to risk intrusion, it must leave traces, will be exposed!

Only after the immortal starry sky that has already entered the stage of growth in his hands, truly reinvented, and turned into a mature body, he can let go and sneak in without any worries!

At that time, even if there are still traces left, there is no fear of the other party's recourse, and the immortal level of the mature body is super brain, and Ye Xuan has a way to cut off the hope of the other party in the middle!

The entire immortal dynasty occupied half of the territory of the third universe. In the center of this vast and innocent star river, it was the immortal star of the dynasty. The Zhoulian star field was divided into three parts, belonging to the three empires.

The one-third of the dynasty star field controlled by the Heavenly War Empire just happened to be bordered by the Death Star. Therefore, Ye Xuan rushed from the Death Star to the Heavenly Empire. The Star Way is not very far away.

But this is only relative. In fact, starting from the Arc de Triomphe, it is now the full-speed of the virtual shuttle from the starry sky to the treasure level. On the way, the safe natural cosmic worm hole enters immediately, and the long-distance wormhole jumps. ... It takes about a month or so to get to the Sky Battle Star!

The call-up declaration issued by the squad family for all the genomic research valves of the entire dynasty with the ability to refine the eight-level liquid, the official meeting of the exchange meeting is in the forty days.

In other words, Ye Xuan is rushing to the ground and can only reach Tiantian in advance ten days in advance.

After the arrival, I must still make some preparations. After all, he is only personally going, and he is not qualified to enter the venue. This problem can only be solved afterwards.

Ten days are very urgent!

Therefore, Ye Xuan did not dare to delay, and the next morning, he sacrificed a hole in the virtual shuttle, hurriedly on the road, toward the Heavenly Empire, the Emperor of Heaven and the Stars, rushing away!

There is still a month on the way, but this time, Ye Xuan did not use this time for cultivation.

On the one hand, this time, he did not take other giant ships such as the Star Fortress, and the hole was galloping all the way, requiring him to manipulate himself and not to close.

On the other hand, it is because Ye Xuan wants to take a look at this time and study on the way to the detailed information about the Tianxing Star and the Tuoja family copied from the flagship fortress in Naples.

Time has passed slowly. Ye Xuan, while manipulating the hole in the air, is studying the intelligence information in his hands. For a time, he completely forgot the existence of time and devoted himself wholeheartedly...
