

## Super D. S 3291

Chapter 3291: The second deities of the world

"Take the old man, you deceive too much! It's too shameless..."

Ye Xuan, who was innocent and lying on the gun, was furious. He couldn't remember that it was the first time that he was smashed into a genius. He was very sensitive in this matter and had psychological shadows.

Although Tuo Xiong and others are only swearing, but not Ye Xuan himself, even Xuan Huangzi is not, but since Ye Xuan has used the identity of others, he has to be responsible for this matter.

What's more, the status of Linghu Chong has to be used for a while. I didn't plan to abandon it now. It was also very affective to him.

In addition, Hu Qing must be extremely concerned about this matter. He now knows the true identity of Ye Xuan, and even the scorpion's legacy of the singer to go to the death star to go to the Arc de Triomphe. For this person, Ye Xuan still Appreciative, in any case, the reputation of the fox is insulted, he can not sit idly by!

This time, he came to Tianchenxing. His original plan was to sneak into the branch of Tianchenxing in secret, and wait for the opportunity to inquire about the ten-level liquid refining pen, and then quietly take it away, although it is not mature ten. Grade liquid formula, but with the research information recorded in this refining pen, Ye Xuan will soon be able to derive it.

But now he has changed his mind!

The refining pen of the ten-level liquid must be obtained. It records the whole process of the research of the ten-level liquid. All kinds of experiences are listed. It is useful for the reference of Ye Xuan, but the complete ten-level liquid formula He also did not intend to miss it.

The right to charge a little interest to the extension of the home!

All of this, he did not intend to secretly steal, but to take advantage of the role of the younger Fox, to discuss.

It is another matter for the empire and the dynasty people to believe it or not. Ye Xuan himself must have a clear gesture. It is this purpose!

"Take the old man, and let the young master roll out!"

With this kind of thinking, Ye Xuan's wrath came directly to the extension of the branch in the Tiancheng Emperor's outer city. This is an incomplete house. Ye Xuan's figure is steep and angry. In an instant, I was alarmed by the extension of the home in the house below.

A large number of strong people and people in the surrounding area were also alarmed, and they came to look at them, and they exclaimed.

Although there is no ban on the outer city of Tianchen Guodu, it is also strictly forbidden to jump into the air. No one in the city gate is in charge of you. It is absolutely impossible in the city. It can only be at a low altitude of 50 meters above the ground. Grab!

At this moment, Ye Xuan is hanging over hundreds of meters above the extension branch. This has definitely passed, and the strong people around the four sides are getting excited. Where is the number one?

In the outer city of the capital, the country's ban on the air ban was so arrogant and loud, and it's too horrible to be afraid of others.

In the lower courtyard, the strongest of the extensions quickly appeared, and there were a lot of people. The master of the family was crowned by the stars and stood in the center. When they first looked forward, they immediately became angry and roared: "Ling Huchong, hello." Big dog gall, colluding with the Tianji family, dare to appear here?"

At this time, the extension of the arrogant and full of anger, as the home of the extension of the home, the Tang Dynasty, the nine steps of the great perfect existence, at this moment actually want to look up to a black hole ants ants, it is really unhappy.

Although it was provoked by people, it is Tianchen's capital. After all, it's from the emperor's capital. Recently, it has just landed safely and softly from the cusp of public opinion. He does not want to be pushed up and grilled on fire.

In the event that someone accuses the Emperor of the King of the Gates, it is too arrogant. When Tianchenguo has ignored the ban on the air, it is too much trouble.

"I think you are the one who can't spit out ivory in the dog's mouth! This young master killed a senior of the celestial family and collected a fighter armor. He smashed into a trench and turned into a second form of war. You are not so old-fashioned, you are not so shy, just relying on this point to smother the blood, smear the Lord and the celestial family collusion?"

"Old man, this young master is coming for this matter today, you humiliate me to make a name for the fox, this matter must be given today, otherwise the young master will destroy your fox family today and wipe out this place! "

"This is the trembling of the Lord's own refining, the starry sky to the treasure level, the two major battle forms are displayed in public today. You are not saying that the Terran cannot have such a high-level armor, so that this is the main collusion. ?"

"Then, look at this, the refining technology of this armor of this young master, is the celestial family possessed? This is the technique of the refining of the Terran camp. Is it the master of the martial arts and the master of the refining camp? "

"Or, you old man has to change his mind immediately, saying that this is the master camp?"

"Ha ha ha... optimistic!"

At the end of the day, Ye Xuan raised his head and laughed. He directly sacrificed the glazed glazed armor in the wave, covering it with his body. In a moment, he became a mighty strong man with a smashed armor, and his body was flowing and glory. Suddenly, a burst of excitement sounded around.

"A beautiful war, it is really a starry sky to the treasure level. This kind of treasure is the few masters of the refining camp." The Tianji people are really good at technology manufacturing, but when it comes to refining, they Just a joke, how can you refine this level of trenches?"

"Is that top fighter jet really the second form of this trench? It's a great blow to my brother. It's a brainstorming. This idea is too constructive. How could anyone think of it before?"

"Playing is a game, a trench, with the different advantages of light warfare and heavy armor, the two battle forms are free to convert, it is perfect, I want one!"

"I am extremely suspicious of whether this is true. Can he really transform this treasure into the so-called second mech form? It is too amazing, a bit ridiculous!"

"These are not the key. Have you forgotten the words that the fox lord just said? He actually called this 铠 for his own refining, my 乖乖, that can be really bad, and the fox The talent is obvious to all, and the ancient king of medicine Wang Sanguan is perfect. I can't think of the enchanting of the refining device besides refining the medicine. Is there another genius of the Terran to be born?"

"There has been one before, in the comprehension camp toss, the wind is perfect, over the scorpion and the magic dust girl!"

"Now, our technology camp has also appeared in a peerless manner, and it is comparable to the sorcerer's sorcerer. The medicinal device is absolutely unique, so bright and dazzling, Xiaoyaozi and Yinxia fairy can't compete with him..."

"boom!"

As if in response to the screams of the surrounding tide, almost at the next moment, Ye Xuan once again waved his hand, and as the sound of a roar of energy suddenly sounded, the smashed trench that originally covered the body surface immediately expanded. And deliberately slowed down the speed of morphological transformation, making people see clearly.

Shortly after three interest rates, it was really turned into a mighty mech that was ten feet high.

## Chapter 3292: Braised dragon liver

The two battle forms that do not destroy the glazed armor can be completed in an instant between the thoughts, but Ye Xuan did not do that, because in that case, there will be people who argue that he is moving too fast and also picking up the trenches. The battle armor was sacrificed, and I wanted to cross the sea.

Therefore, he deliberately slowed down the speed.

The transformation of the form that can be done in the original mindfulness has been dragged down for a long time!

In this way, all the strong people in the four-around view, almost without exception, all clearly and unparalelledly see the entire process of the transformation of the glazed glaze from the first battle form to the second form.

And just like in slow motion, the changes in each step are clear and can withstand scrutiny. Any questioning words are pale in the face of such facts.

Only then, the problem has already been explained.

This kind of refining level, let alone the Tianji people who are good at technology manufacturing, can't get rid of it, that is, the refining masters of the comprehension camp are faintly compared.

At least, this kind of fascination that combines the trenches and the mechs, they never thought of it.

At the same time, this is enough to prove one thing from one side, that is, this epoch-making treasure with two forms of combat is definitely not refining the master of the refining of a comprehension camp. In all likelihood, this is the former Linghu is the master.

After all, if someone really refines this kind of epoch-making new armor, I am afraid that it has been promoted early, how can it never be heard?

Aware of all this, the numerous onlookers around us could not help but cheer, not only because they saw this epoch-making treasure, but also realized that the refinement of the Terran trenches has entered a new era.

The reason why they are so excited is because the second generation of the Terran is born, and now it is finally certain!

At the end of the comprehension camp, it is still impossible to determine whether it is the enchantress of the Emperor or the celestial temperament of the celestial scorpion. The war is unparalleled, and it is impossible to cross the two great realms and the demon scorpion. The rise of the Terran future God of War.

On the side of the science and technology camp, the fox lord may not be as good at combat power as the future \*\*\*\* of war that was born in the comprehension camp, but his significance to the Terran is obviously more significant.

The refining talents crushed the dynasty\* top door valve, and the three-level pass of the drug king's ancient monument was passed perfectly.

The refining talents are not weaker than the top masters of the comprehension camp. The refining trenches are not only the starry sky to the treasure level, but also have two unprecedented combat forms, which is simply perfect.

Once this kind of medicinal device has grown up, it will become the supreme treasure of the entire human race!

In a short period of time, the Terran not only has four generations of arrogant arrogance, but also two more important demeanours, as long as they can grow up, by then, there will be invincible warriors crushing all enemies, inside, there are medicines The supreme master of the doubles leads the human race to grow rapidly...

Before, there was a saying that the human race was prosperous, but it was not the mainstream. Now, all the strong people and the people of the country have been convinced that this is the case. The two great enchanting feet are born, if this is still It's a harbinger of the great trend of the human race, it's just no reason!

For this reason, they only cheered and thundered, it was too inspiring, and the heart was swept away because of the tightening of the three cosmic situations, and the haze that was ushered in at any time could be swept away.

"Misunderstanding! Misunderstanding! This is really a misunderstanding..."

Seeing that Ye Xuan was so relaxed, he reversed the trend and even reversed it. He was supported by all the people and the strong people who looked around. At this time, the lungs of the arrogant lungs were blown up, but the face did not dare to reveal. come out.

Now that the extension has been stormy, it has just landed safely and softly from the cusp. At this moment, he dare not be impulsive again. Otherwise, if the public anger is triggered again, it will most likely put a huge pressure on the shoulders of the three gates and the official shoulder of the empire. Heavy again.

At that time, under the wrath of the imperial rule, it is not impossible to give them a home to unload and kill, to abandon the car and the like.

In addition, for Ye Xuan, who can refine this kind of new style of warfare to the treasure level, the ambition is also extremely shocking. Ye Xuan's refining talent is so scary that no one knows more than him. I can't think of this. The guys are so enchanting in terms of refining, they are already comparable to the top masters of the comprehension camp.

All this made him suddenly realize that the whole person is like a slap in the face, and suddenly he will suddenly become more cheerful.

Before, Ye Xuan had only a simple use value in his eyes. The only thing he wanted to do was to use Ye Xuan, who refines the ancient king of medicine, to lead the gatekeepers of the gatekeepers to enter the remains of the drug king. By the way, he took the opportunity to seize the hand. Half of the drug king who was taken away by the fox's veins in the past.

Until now, he really realized the true value of Ye Xuan.

Compared with the half of the drug king in his hand, this kid is a genius that is unprecedented in ancient medicine. It is a true supreme treasure.

At present, the Terran is swaying, and the times need an invincible warrior like the one that is tossing in the camp. It needs a young genius with this enchanting talent.

Tuo Xiongxiang believes that Ye Xuan's horrible medicine talent will soon be able to rise up in the Terran and become a newcomer of the era comparable to the invincible God of War and the highest federal first idol Xuan Zizi.

If such a talent can be caught in its own hands, the crisis of the extension of the home will not only be able to easily pass, but will even take it to the next level!

This is definitely a once-in-a-lifetime opportunity!

With these thoughts passing through the mind, Tuo Xiong's pair of Ye Xuan still hates the sky, because he always feels that the extension of the wind is related to Ye Xuan to a certain extent, but now, facing the prospect of greater interests. He was unwilling to immediately suppress the hatred of his heart.

In a moment, I changed my face and piled a smile and said to Ye Xuanlian that I had misunderstood. Then, after Ye Xuan reacted, he secretly bite his teeth, and he took care of it with a big hand: "The fox is small." Friends, this matter is indeed a recklessness for the old man. If you have not thoroughly investigated the matter, you will make a premature decision and almost smash the younger friend."

"As the saying goes, there is a mistake to change, and it is so good! The little friend of the fox has come to the door to ask for sin. It is so good that the old man has the opportunity to correct the mistake. The old man must thank the little friend."

"Before Xiaoyou also said, the previous thing should be discussed. Rest assured, the old man of the compensation will not say anything. He must be guilty of this conviction, but one or two sentences of this matter are not clear. Come down, don't want to recruit the city defense army, go back to dinner, let's talk while eating..."

"Gala dinner?"

Ye Xuan's eyes lit up and blurted out: "I rely on! To extend the old man, do you, and hunt for a \*\*\*\* dragon? It seems that tonight is the rhythm of braised dragon liver."

Chapter 3293: Formula to hand

When I heard Ye Xuan's mouth was the braised dragon's liver, the top of the ground was stunned and stunned, his face was green, his legs trembled, and he almost fell on the spot.

Nowadays, the extension of the home is no more than the original, and the emperor's ancestral land is gone. Now it is only in the Tianchen country branch. Although all the important resources have been brought out, the basics are basically nothing to be destroyed, but there is no apparent beauty on the surface.

However, a sub-blood dragon can be a different kind of thing. If you really want to hunt, it is likely to lead to a tribe that has fallen into a cave and the reality is too great.

Fortunately, although Tianchen Guodu is better than Tiandi Emperor, there are still two or three top restaurants that can provide braised simmered dragon liver. Although the price is high and scary, most people simply don't even think about it, but only one or two copies. If you want to push your teeth, it is not unbearable!

At least not to let the family lose the old age of the cave, and the so-called money and cultivation resources, as long as the eyes of this medicinal device are firmly in the hands of the master, these things, in the future How much can you have to do, how much can you roll in?

I thought about it, and I was better off with my ambition.

At this time, Ye Xuan in the air also had a braised dragon's liver. He actually lowered his body and immediately fell into the courtyard. In the vagueness, Tuo Xiong clearly saw him raise his hand and wipe his mouth. A bunch of cockroaches that came out.

This \*\*\*\* foodie!

The heart snorted, and the ambition was overwhelming. Therefore, he remembered the other party's food troubles. So, it's not a problem to master him. It's a big deal, it's a good wine, good meat... wrong. It should be good to have a good liver for the sake of it.

One thought of this, Tuo Xiong suddenly felt that he was a little liver pain in the inexplicable, this kid he ... will not eat dragon liver every day?

Just at this time, with the fall of Ye Xuan's body shape, there was also a city defense army of Tianchen Guodu rushing over in the distance, and the head of the Tianchen branch of the family was turned to the eye. The latter Mind, nodded and turned to deal with it.

However, Ye Xuan, like nothing else, turned a blind eye, grinned and talked with him. While walking toward the inner court, it seemed as if the old friends who had not seen for many years had suddenly reunited, and the atmosphere was warm and harmonious. pole.

This point, directly to the four people around the view of the national people and the strong people look dumbfounded, this style of the fox singer is very strange, just now the wind and thunder, how to listen to eat, immediately violently turned fine What?

.....

When the meal was not enough, the pen left in the study of the ten-level liquid in the hands of the family was sent to a small courtyard in which Ye Xuan was temporarily placed in the extension of the Tianchen branch. I personally flashed into the hands of Ye Xuan.

After leaving the research pen, the family members of the extension family immediately left, and left a message, at the dinner party, the homeowner Tuo Xiong also had a bigger surprise to personally offer.

"Is there any better food than the braised simmered dragon liver? You can't stop it... the saliva can't be stopped, and it's a little hard for a long time!"

"Hey!"

Hearing this discourse, he turned to the door of the extension of the family's old feet, but it was really a farmer's turn to the ground...

Looking at the back of the other side, the sly of Ye Xuan's mouth disappeared magically. When the door was closed, the sneer on his face was once again revealed.

Muttering to himself: "Hey, nothing to be diligent, non-traitor is stealing! This extension of the old man suddenly changed his attitude. If he guessed it, he should finally realize the value of this young master. This is Change the pace of investment from short-term investment to growth line."

"But this is just the case. The preparation of the ten-grade liquid requires more rare herbs and minerals, including the eleventh grade liquid in the future. Since the old guy started to dream again, it is just a good way to push the boat and use them to expand the home. Under the circumstance of resources, let's get the first grade liquid out."

"When the whole extension of the home has been smashed, the younger pats the \*\*\*\* to leave, can they still stop?"

Having said that, Ye Xuan once again grinned. This time it was really a bit cumbersome to laugh: "Hey, let's talk, in addition to free research consumables, you can enjoy a braised dragon liver every three to five. Where do you look for a beautiful thing? Take a knife and hold your neck and don't move your nest..."

Later, Ye Xuan began to study the ten-level liquid research pens sent by the old family, and he gained a lot of benefits in a few hours. He had a lot of thoughts in his heart, and he wanted to put it into practice.

But after all, he still resisted, because if there is no accident, the complete formula of the mature ten-level liquid mastered in the hands of the extension will be handed over to him at the dinner. Now there is no need to It takes too much effort for the configuration of the ten-stage fluid.

Instead of this, it is better to raise the spirit, after the complete ten-level liquid formula is taken, it is good to force the sprint to the eleventh grade liquid.

This eleven-level liquid has not been developed yet, and Ye Xuan can only rely on himself. In this respect, he must do his best to succeed!

Thinking like this, Ye Xuan simply no longer studied, sitting cross-legged in bed, adjusting his breath, and his mind quickly settled down.

I don't know how much. When he opened his eyes, the sky outside was already dark. Ye Xuan got up and pushed out the door. In the courtyard outside the house, two young Tuodui descendants were standing there anxiously. What is the whisper, seeing Ye Xuan push the door out, suddenly like a big man, and quickly greeted him.

It is said that the owner of the family has been waiting for a while in the banquet hall, let him hurry in the past, braised dragon and liver is not delicious.

After a short period of time, Ye Xuan led the two generations of the descendants to the backyard. Tuo Xiong and several ethnic groups and old people have always been waiting there. Seeing Ye Xuan's end of cultivation has finally come, and all of them are suddenly loose. In one breath, I didn't say much, and smiled and greeted him.

Pushing the cup for the room, the complete ten-level liquid formula was finally sent to Ye Xuan's hand, but what surprised him was that, in addition to the complete formula of the ten-level liquid, Tuo Xiong also handed over, there is still a copy. Study the pen.

Ten-level liquid research pen!

Although the eleventh grade fluid of Tuoja has not been successfully researched, all the difficulties and experiences in the research process before and after, all have detailed records on the pen.

In Ye Xuan's opinion, this eleven-level liquid research pen, which has no final result, is precious more than that of the complete ten-grade liquid formula, which allows him to configure less in the eleven-stage liquid. Take too many detours.

At this point, Ye Xuan's recipes and research pens are all in hand. In order to numb the extension, he even laughed when he looked up: "Ha ha ha... With this pen, this young master is in a month. Inside,

must have formulated the eleventh grade liquid, but unfortunately, the material required is too much difference, so I have to set off quickly tomorrow, and go all out to collect it!"

Chapter 3294: Ten grade liquid

"Small friends want to refine the eleventh grade liquid?"

When I heard Ye Xuan's words, Tuo's disappointment was awkward, and the look on his face was a little weird. He said with a sigh of relief: "Little friends, this eleventh grade liquid is not easily refinable, although you already have The formula of the ten-grade liquid, but does not mean that the mature formula of the eleven-stage liquid can be derived immediately, and the way to go is still long and the change is too much."

"Yeah, Xiaoyou, all kinds of medicinal materials and minerals needed to prepare the eleventh grade liquid. Although we have all the extensions, we are not lacking, but there are not many stocks. Now we are basically in the theoretical deduction stage. Taking too many preparation experiments with those herbs, the loss is amazing."

In addition, a family member of the Tuojiang family even took over the words, although the euphemism was said, but the meaning of the words is clearly suggesting Ye Xuan, don't be too good and high, it is a defeat.

Moreover, even if they expand their own homes, this level of loss can not afford, it is impossible to easily let him go so badly.

Ye Xuan's heart sneered, but on the surface, he did not show it. While he was rushing to deal with the red-burning dragon liver that he had pulled to the front, he sang one or two sentences from time to time.

"I didn't intend to match the eleventh grade liquid directly. Now, the materials are too precious, and no one can afford to consume them casually."

"But I just blew out the nine-level liquid scorpion a few days ago. Now I have seen the ten-level liquid formula of your extension. It is quite inspiring. If there is no accident, I will be able to put my own tenth level these two days. Liquid is prepared..."

"Then I started to study the eleven grade liquid immediately. First, the theoretical formulation was deduced, but it will not take much time. At most, for ten days, the mature formula can be formed. At that time, each of the eleven grade liquids will be needed. The seed grass and minerals were formulated for testing."

"The time is still relatively tight, so I can't continue to delay. I will start tomorrow morning, and prepare the ten-level liquid while collecting the various grasses and minerals needed to prepare the eleven-stage liquid..."

As soon as I heard this, the top leaders of the various extensions in the room suddenly stopped, and then took a sigh of relief, and they exclaimed...

"What? So that the little friend of the Fox has already produced a nine-grade liquid?"

"How is this possible? The nine-level liquid was previously only the top three forces of the imperial star, such as Bodhi, Tianzun, and Shennong, and the door can be prepared. Now I have more than one extension, and the whole dynasty can be refurbished. And already..."

"If Xiaoyou also made a nine-level liquid, wouldn't it mean that there are five forces in my dynasty that can refine the nine-level liquid?"

"The key is that I am a top-level door valve or a force. The little friend is alone. Just like a loose repair, I can also formulate the nine-grade liquid. The matter is spread out. I am afraid that no one will believe it..."

"I am refining me, what do you want them to believe?"

After licking his mouth, Ye Xuan turned his hand and then threw a reddish gene solution on the table. It was the nine-stage liquid that he made on the way.

It is worth mentioning that although there are four top gate valves and forces under the imperial dynasty to refine the nine-stage liquid, the four major forces are different from the nine-grade liquid, and the nine-stage liquid collected in their respective hands. The recipes are also different.

Although the different nine-level liquid efficacy is the same, it can make the black hole nine-step big perfection once again break the human body, and jump into the ninth big point of origin, but its formula can actually have many kinds. There are many changes.

As for the nine-grade liquid that measures whether it is perfect, there is only one standard, that is, it is fascinating. If it is the red-red liquid of the nine-grade liquid, it can see the nine-drug faint halo, like a nine-color rainbow, that is Successful completion!

At this point, I saw that Ye Xuan actually threw out a red-brown gene culture solution, and all the top-level executives in the room were all at a glance.

Later, Tuo Xiong Xiong carefully picked it up in his hands, extended his knowledge and looked at it.

After a short period of time, the exclamation came out of his mouth: "It really is a nine-grade liquid, and it is not something that Bodhi Technology, Tianzun Bio, and Shennong Gene have produced. It is not the configuration of my extension. Although this liquid also has Nine-color rainbow, but these nine colors are different from me, and it is indeed a new nine-grade liquid!"

"I said it was my new refinement. You didn't believe it?"

Ye Xuan sneered, screaming, and said indifferently: "That line, anyway, after seeing your ten-level liquid refining pen, I have basically counted it. If there is no accident, then In a few days, you can prepare the ten-grade liquid. Of course, it is not prepared according to the ready-made formula of your extension. It is the thing that you have to expand your home. The lesser one is mainly equipped with your own ten-grade liquid..."

"boom!"

Without waiting for Ye Xuan to finish the words, Tuo Xiong excitedly took a palm on the table, his chest violently undulating, forcing his excitement, his eyes staring at Ye Xuan.

Said: "Lake Fox, good ambition, good strength!"

"I'm going to put aside the words here today. If you can make a new ten-level liquid formula within ten days, then all the grasses and minerals needed for the development of the eleventh grade liquid. Material, I will give up the burden of the family, and the small friend will only concentrate on refining..."

On both sides, the other top-level executives in the room are all dull, subconsciously nodding their heads, they are a little scared, Ye Xuan has any effort to refine the nine-level liquid, and now released Hao Yan, in a few days to refine a new class of 10 liquid!

If it really can be done, this kid is a enchanting, it is simply a ghost, too horrible!

If such a person can hold it tightly in his hand, let alone the eleventh grade liquid, it will be the subsequent twelve or thirteenth grade liquid, etc., and the extension of the home will not take a long time, and they will be able to continue to drum all the way. Out.

At that time, the whole dynasty's gene liquid field, the extension of the family will be a big one, let alone the emperor of the empire of the war, there is no way to fight, it is the immortal emperor on the emperor's side, to treat the extension of the family, you must be polite That is the real exaggeration!

.....

In the following days, Ye Xuan has always locked himself in the independent small house in the inner courtyard of the Tianchen Star Division of Tujia, and studied the ten-level liquid refining pen of the Tujia.

In addition to his own meditation, he also has a phagocytic system to promote his formula from time to time. The system database of the phagocytic system contains countless herbs and minerals recorded in Shennong, including some ancient recipes, all of which are only Ye Xuan is the assistant.

Compared with other top forces and gate valves, he seems to be a person who is studying genetic fluids. In fact, he has a professional supercomputer in the field of genetic fluid research. The speed of formula derivation is almost the fastest.

On the third day, with a tube of blue liquid appearing in Ye Xuan's hands, it belongs to his ten-level liquid... finally refining success!

## Chapter 3295: Open the loser mode

There are always people outside the hospital who are guarding the family. They are working day and night. Once Ye Xuan in the house speaks the words and says which medicine is needed, someone will immediately pick it up and meet him in the first place.

For this reason, when Ye Xuan's big laughter came out of the house, when he finally succeeded, the several extensions of the family waiting outside the hospital were stunned, and the face was stunned. Immediately, someone went to report to Tuo.

The latter did not believe it. It took only three days to refine a new ten-grade liquid. It's incredible, just like dreaming.

With the doubts of my heart, Tuo Xiong and several old family members of the Tujia family soon came, just as Ye Xuan opened the house door and threw a tube of blue genetic fluid.

"Hey, my little ancestors, this is a ten-level liquid, something that Wanjin is hard to find..."

Seeing Ye Xuan, just like a garbage dump, he threw himself over the door directly. The extension was so scared that he was stunned, and he quickly took a few steps, while sipping a cool breath and carefully taking the tube ten. The grade liquid was received in the hand.

Where did he know that after the success of the first tube, Ye Xuan had refining ten tubes, and only one tube was thrown at him. The other ten tubes were all packed in space boxes, and they were filled into the body. .

Of course, the herbs needed to prepare the 10th-grade liquids are all provided by the extensions. Because of this, Ye Xuan is extremely generous and waved his hand. He said: "This thing is not like garbage after it has been refined. If this is what the Lord wants, open it at any time, how much is there!"

Although this is indeed a bit of a match, because the ten-grade liquid has a mature formula, it is not every time it can be successfully refining. The refining pharmacist alchemy of the comprehension camp has a Dandan rate. The reason is the same. of.

However, Ye Xuan said this at the moment. However, none of the extensions and other people felt harsh. Instead, they felt that it was such a rationality. People could easily create a new ten-level liquid in less than three days. It is the enchanting enchanting, maybe the success rate of people is really ten to ten, it is also very likely.

It was also at this time that the group of old people who came along with Tuo Xiongxiang had been looking forward to carefully examining the tube of the blue liquid that had been handed over by the former.

The final result is no suspense, and all the old people are screaming excitedly...

"Ten color! It really is ten colors! The patriarch, this is really a ten-level liquid..."

"Yes, that's right, it's really a ten-level liquid, and it's ten colors that make up a rainbow of ten colors. It's different from the ones that we've expanded. It's one orange less and one more purple. This is definitely another kind. The tenth grade liquid is not smashed out according to our formula!"

"Ghosts, the little friend of the fox is really a ghost!"

"Even if we open up the home, after unintentionally getting out the ten-level liquid, the old men gathered together and studied for a few months. With the ready-made ten-level liquid formula as the blueprint, I want to deduct the first Two kinds of ten-level liquid formulas have never been successful, and they can only give up."

"I didn't expect Xiaoyou to succeed in three days, but afterlife is awesome, and the future is awesome..."

After confirming that Ye Xuan really made a brand new ten-level liquid formula in just three days, Tuo Xiongxiang was completely convinced by him at this time. Now his heart is very excited and forcibly suppressed. Did not keep the mood calm.

There was always a feeling of trembling in the tone, and I asked carefully: "Little friends, I don't know what to expect? First, let me know what to do to collect the 11th grade liquid."

"The genius of refining medicine like you, no, it should be a ghost... In short, how can you do things like collecting materials? You can study genetic fluids with confidence, and we will work hard outside. The lang is guaranteed to do its best."

"That, then I am going to study the eleventh grade liquid. Although you have not succeeded in the extension of the home, the research pens that have been left have a reference to me. If there is no accident, about half a month, it should be Can get the eleventh grade out."

During the speech, Ye Xuan handed a piece of paper to the past: "Hey, this is the formula of the second ten-level liquid that I have screamed in the past two days. You take it to study, and turn back to the eleventh level. All kinds of materials were sent over. In addition, the materials of the 12-stage liquid had to be collected. In the case of the 11-stage liquid sputum, the 12-stage liquid could not be stopped..."

"This kind of research has gotten a sigh of relief. Sometimes the inspiration is for a while. The young master can't stop. At most, when you have a mouth, you can swear by God. Imagine that Wangmei will waste some time!"

"No, no... I don't know what Mei, if you study so hard, you have to add it when you add it!"

Seeing that I haven't asked for it yet, Ye Xuan has taken the initiative to give the new ten-level liquid formula to himself, and listened to the meaning of his words, and then immediately started to eleven or even twelve. Development of grade liquid.

Look at this meaning, and then the formula of the eleven-level isogenic liquid that will be smashed out will be given to himself as it is now. This kid is clearly a research madman. What people care about is the research process, not the final research result. .

The science madman is generally this kind of problem. It is no wonder that the talent of this kid's refining and refining equipment is so amazing. It was originally a scientific madman. All the thoughts have been thrown into the study, and there is no way to take care of the so-called fame and fortune.

This is a good thing for Tianda. It's even easier to control it in the future. There is no other hobby in this kid's eyes. It's just a bit of a slap in the face. Although the mouth is broken, the ability to create wealth is even more horrible. It's scary to think about a new ten-level formula.

With this metamorphosis of the enchanting, it is difficult to expand the home to think of it!

I thought about it, and even if I took the chest to the mountain, I was extremely impressed in the face. "From now on, at noon and at night, the old man will send the food to the people on time. Although I have studied it with one heart, I can't delay my diet."

"Reassure, although the blood of the blood is difficult to do, can not guarantee that there is every day, but the old man assured Xiaoyou that every meal, at least one dish is either braised or simmered with dragon liver, or it is made of the top ingredients of its grade. Little friends can only study with peace of mind."

"As for the various materials needed to study the eleventh grade liquid, I will send it to Xiaoyou later..."

After that, he and Ye Xuanhan sneaked a few words, and Tuo Xiong took a group of old people and hurried away.

After a short period of time, the various materials needed to refine the eleventh grade liquid were delivered. Since the formula has not yet been determined, the amount of various materials sent is very large and numerous, all of which are extremely rare and rare. Lian Yexuan did not have any hands. He couldn't see the golden light in his eyes. When the family's family was gone, Ye Xuan directly used the space box to pack 80% of the income into the immortal world. Only 20% remained outside. It will also look like it.

After doing all this, Ye Xuan grinned and said: "From now on, the loser mode is officially opened..."

Chapter 3296: Pat the \*\*\*\* to leave

"Hey, congratulations to the host, the body and blood of the realm of the realm! The current realm: the second order of origin!"

"Hey, congratulations to the host, the physical state of the flesh and blood is improved! The current realm: the third order of origin!"

With the familiar system prompts in the brain, Ye Xuan also opened his eyes and ended this cultivation!

Feeling the power of the body's suffocating blood, Ye Xuan clenched his fist tightly, and it was a double break. His body's strength of blood and blood increased greatly, and it was much stronger than before. The realm of the blood of the flesh has entered the third order of the origin, and it is about to enter the middle of the original point!

At this time, he was refining his own ten-level liquid, only three days have passed.

In the past three days, Ye Xuan did not even think about the so-called eleven-stage liquid, but has been practicing and forging the body.

Of course, it is intermittent, because in these three days, at noon and at night, the family members of the Tujia family will send a good meal, eight dishes and one soup, and there will be a braised dragon. The liver is either a top-class dish with a level of ingredients and a dragon's liver that is bloody!

After eating for three days, Ye Xuan's body flesh and blood accumulated the energy of the heroic ingredients. This top-grade food can be extracted from the body of a powerful starry beast that has been cultivated from a black hole. A lot of energy, but after eating six meals in a row, Ye Xuan's harvest is still not small.

The reason why the two worlds that broke through the power of the flesh and blood have been repaired twice in succession is precisely because of this.

In the next few days, Ye Xuan did not step out. Every day, in addition to enjoying the top dishes sent by Tuoja, he also began to study the eleven-level liquid research pens that had no results.

The two medicinal materials and minerals that he had left outside without receiving the immortality in the body were used up in just two days. Ye Xuan directly spoke, saying that it has made breakthrough progress and needs more materials, including preparations already collected. The materials used to develop the 12-stage liquid have also been sent to the Tuoja home!

Because in order to ensure the success of the 11th grade liquid, it may be considered to add a top grade material suitable for the 12th grade liquid.

Ye Xuan needs to study their medicinal properties and expand the scales!

This argument is also reasonable. After all, the so-called eleven-stage liquid material and the twelve-stage liquid material are actually based on the grade of the material before a mature formula has appeared. .

The twelve-level materials in the guess may not necessarily be used in the 12-level genetic fluid formula, and the formula of the eleven-stage liquid may also appear!

Therefore, after the release of Ye Xuan's request, Tuo Xuan also sent a large number of herbs and rare minerals, of which dozens of different grades are higher, used to prepare for the preparation of 12-grade liquid.

This is already the last material of the inventory in the hands of the extension. It is a huge amount of space. It is packed in three small boxes. If it is all dumped, it can fill a house.

Those precious 12-level materials, Ye Xuan did not stay, all of them have gained in the immortal world, even the amount of material of the eleventh grade liquid, he also charged a small half, because these materials are in the follow-up In the development of the 12-stage liquid, it can also be used.

It's hard to let Tuoji's family be willing to be defeated by him. Ye Xuan has the opportunity to collect the essential medicine materials and rare minerals needed for the 12th-grade liquid, and collect it as much as possible. As long as the formula study of the 12-stage liquid is basically completed, it can be guaranteed to start refining at any time.

As for the eleventh grade liquid, in the theoretical formula, Ye Xuan has already studied it almost. He is going to fully conquer the eleventh grade liquid before he leaves. As a result, he will no longer be subject to the terminology of genetic fluid in a short time. Elbow, you can completely open your hands and feet to improve the level of the body and blood.

It was another five days, and the time was calculated. From Ye Xuan's successful refining of the ten-grade liquid, a total of ten days passed.

According to his original statement, the eleventh-level liquid refining system was successful within ten days. Therefore, in the afternoon of this day, Tuo Xiong led several old people who had extended their homes, and they came to the hospital incomparably, and did not dare to bother. Ye Xuan, waiting in the hospital for restlessness.

In order to get the formula of the eleventh grade liquid, they can be said to have made a big blood this time.

For ten days in a row, two meals a day with the same level as the braised oyster liver, this is just a horrible expenditure.

In addition, in terms of various elixir and rare mineral deposits, the investment of the extension family is more worrying. The whole family inventory has already consumed nine out of ten. If this time is unsuccessful, the extension will not say anything about it. At least a few Don't want to slow down during the year!

This is because they hold the ten-level liquid formula in their hands. If there is no such thing, this failure will directly lead to the decline of the family, completely finished!

In fact, Ye Xuan does not live up to expectations!

Just last night, the first tube of the eleventh grade liquid has been successfully refining, but he did not sound, but continued to refine the refining with a small amount of material left unreceived outside. As for the immortal world already in the body, It was prepared for the 12th grade liquid in the future and will not be used.

From midnight to the present, Ye Xuan refining ten tubes and eleven grades of liquid, and the materials that had not been collected outside were finally exhausted.

At this time, in the hall of the house where he refines the medicine, there are discarded dregs everywhere, just like coming to a distribution center that specializes in dumping the dregs, and the smell is rushing.

Ye Xuan waved the eleventh-level liquid in the space box to the immortal world, and then placed the only remaining tube in another small box, which floated it in the wave. Flying through the window to the outside of the hospital.

At the same time, Ye Xuan's tired voice also sounded at this moment: "Fortunately, not insulting, the eleventh grade liquid became!"

"But the recipe still needs some minor changes, don't bother, this little master has to study it..."

The voice has not yet fallen, and the space box has been received by the extension. After he opened it, he took out a blue genetic fluid directly from the box and explored it with his knowledge. It turned out to be eleven colors.

The face suddenly showed a surprise color: "Ha ha ha ... eleven colors, it really is eleven grade liquid, Xiaoyou is really a god!"

Although the formula has not yet arrived, but the eleventh grade liquid in the hand can prove everything, at least the eleventh grade liquid has been successfully refining, the follow-up formula is perfect, it will be the same as the last time, the first time will be sent Come in the hand.

Thinking of this, Tuo Xiongdeng entered the old Huai Da Yue, and after waving his hand, he walked out of the two tribes, each carrying a food box and sent it into the house: "Little friends are too expensive, this is two red windings. Long Liver, Xiaoyou hastened to make up a supplement, hey, the body is tight..."

The two tribes quickly retired, and Ye Xuan walked out from the inner room and looked at the two food boxes placed on the table in the outer hall.

Hey, this extension of the old man can be really intimate, just thinking about breaking through again, refining the top ingredients that I have eaten these days, and then patted the \*\*\*\* to leave, I didn't expect to have a good meal in the end. Eat food.

Two copies of dragon's liver, this time, I am afraid that it will be two more sudden...

Chapter 3297: Kill a \*\*\*\* road

After leaving the two braised dragons and livers, Tuo Xiong and several of the extensions of the family have left in a hurry, leaving only a few clan to wait here and listen to the dispatch!

Ye Xuan first used three days to refine the ten-grade liquid, and handed over the finished product and formula to him on the spot. Now, after saying the good ten-day deadline, the eleventh grade liquid was also refined.

Two huge surprises in succession have already made the people of Tuojiang completely convinced of Ye Xuan and completely believe it.

Tuo Xuanxiong never thought that Ye Xuan would do his work on the most crucial eleven-level liquid formula, and did not think that Ye Xuan would not hand over the formula, but did not even think that Ye Xuan was ready to pat the butt. People!

In fact, when Tuo Xiong and other talents just left, Ye Xuan immediately ate the two braised dragons and livers, and then immediately began to practice, refining the flesh and blood in these days because of eating a lot of top-grade materials. The energy saved.

Soon, as he sat down and entered the cultivation state, Ye Xuan's body of 18,000 billion pores all bloomed, and each of the pores shot a faint Huimang.

All of this is intertwined, so that the whole person is like being in a fairyland. The whole body is surrounded by infinite Xia Rui. The whole body is like a supreme treasure, exudes a stronger and sacred atmosphere...

After two hours, everything is finally over. Ye Xuan opened his eyes and the familiar system sounds in his head also sounded at this moment.

"Hey, congratulations to the host, the physical state of the flesh and blood is improved! The current realm: the fourth order of the origin!"

"Hey, congratulations to the host, the body and blood of the realm of the realm! The current realm: the origin of the fifth order!"

The fifth order of origin!

Ye Xuan excitedly grasped the double fists, then he got up and looked at the situation in the body. After confirming that everything was innocent, he grinned. When he even took out the pen and paper, he left a letter to Tuo.

The content is very simple, that is to say, although the eleventh grade liquid has been refining a tube, it always feels that there is still a problem in the formulation of the eleven grade liquid. It needs to be perfected, and it feels that it is contrary to the extension of the owner. Therefore, it is decided to leave without saying goodbye. Refining, looking for opportunities to improve the eleven grade liquid formula.

Of course, all this is a ghost pull, the formula of the eleventh grade liquid has no problem at all, but Ye Xuan can't hand it over to the Tuoja family, leaving this letter is not trying to cover up anything, people are not fools. Can you not see it?

Ye Xuan is deliberately arrogant and arrogant, and people have to be disgusted with the old man!

After doing all this, Ye Xuan directly opened the perfect mystery and perfect shock, and quietly left the extension of the Tianchen Star Division, and then hesitated, and went straight to the stars and defenses of the Tianchenxing high-altitude atmosphere.

Although his identity as Linghu Chong is fake, but as the intelligent center of Ye Xuan's personal starry communication system, the immortal starry sky super brain, now no part of the fragment, but entered the growth level, temporarily suppressing his own federal identity, in You can still do it when you get in and out of an administrative star.

If this is not the case, his appearance will change again, but if the federal identity that has been integrated into the body of the gods is not suppressed, when he enters and exits an administrative star, he has already appeared.

In addition, the interstellar mercenary card, which is bundled with his federal identity, has also been suppressed. Although he has been recording his federal contribution points, he can no longer send signals to the outside world.

Therefore, Ye Xuan has done so many things during this time, and his data in the federal contribution standings has not changed.

This situation is similar to the previous one, except that the last time because others were in the first universe, the interstellar arms were limited by the space plane, and they could not get in touch with the federal main network of the immortal star.

Now, it is because the intelligent center of Ye Xuan's personal star-to-air communication system has entered a stage of growth, and it has already had the temporary suppression of the interstellar arms and the federal identity.

It is a pity that although he can suppress his original identity with the immortal starry sky of the growth stage, he can't quietly pass through the starry sky of the Star Defense Array.

Even if the mysterious technique is perfect, it will not work. It will be bad. Once the star defense system of Tianchen Star detects the spirit of the magical power of the devil, the star burst will be fully opened, and Ye Xuan will be trapped inside the star!

Therefore, he can only remove the perfect oscillation mystery before entering the channel, still like the previous time, with the immortal starry sky super brain in the growth stage of the body, virtualize a non-existent identity information, think To get away with it.

Although Ye Xuan knows that he has made this identity information virtualized by the system, the internal system of Tianchen Star must have been recorded, otherwise it will not go out, because if the system has no records, how did you come in?

So directly exposed, the system will automatically determine that there is a suspicion of fraud, but it is troublesome.

Therefore, Ye Xuan left at this time, using the same virtual identity information as when he came in.

Indeed, Tianchenxing's internal star network system still did not recognize it, but the alarm still sounded the first time...

"Booming!"

"boom....."

As the alarm sounded, a huge roar came and the entire defensive array of stars in the atmosphere of the Tianchen Star was fully opened. The access passages of large and small, without exception, were completely closed.

Ye Xuan lived, and soon he realized it!

It shouldn't be that he used the virtual identity to falsify things and was misunderstood by Tian Chenxing's internal system. Instead, he had already found out that he had left, and most of the time he reported the Tianchen country.

The latter listened to Ye Xuan's mastery of the mature formula of the eleventh-level liquid, and actually started to sneak out, and naturally began a full-scale search. Ye Xuan was unclear, and at this moment, a big thorn came to the atmosphere. The channel is directly exposed!

His guess was quickly confirmed!

Because at this moment, Ye Xuan's space channel is near, those who do not know that they have encountered the cosmic zombie siege, are star-studded powerhouses and federal citizens who are flying around with sharp marks, and are quickly appeased. Tianchenguo guards who provoked the guardian channel greeted them and then took them away.

Only Ye Xuan, standing quietly here, but no one came to say hello, but in the distance there are some shuttles and patrol ships that have arrived quickly, not close, just in the distance, will Ye Xuan Surrounded by a leak.

Ye Xuan clearly saw that the naval gun systems of these small ships have already begun to recharge.

The goal really is him!

At the same time, the Tianchen Star below is inland. At this time, there are also a large number of warships and human strong figures who have sacrificed various magic weapons.

This is clearly to be swarming, the rhythm of Ye Xuan won!

"This situation is really not scary, so it seems..."

Grinning, Ye Xuan shrugged his shoulders indifferently: "It seems that there is only one choice... to kill a \*\*\*\* road!"

Chapter 3298: Turn face

Soon, the star-studded powerhouses of the battleships that came from Tianchenxing land arrived one after another. The three-storey and three-storey three-storey surrounded Ye Xuan.

In addition to the fleet of the Tianchen National Army and the strongest of the family, even the owners of the Gongyang and Changyu families came with a large number of strong people.

At this point, they each swayed Ye Xuan across a starry sky, and all of them were a kind of fanaticism.

Obviously, the former Tujia family wanted to eat food alone, and did not disclose everything to the outside world. Now, when they found that Ye Xuan had to escape, they had already taken care of the others, and they could only put everything out of the truth. In any case, first Concentrate on leaving Ye Xuan to stay.

As for the subsequent sharing of Ye Xuan's eleven-level liquid formula with the guys, there is no way to do it. It's better than letting Ye Xuan escape now.

Moreover, if such a visit comes, the vast amount of resources that Ye Xuan has squandered before the extension of the home will be able to allocate to these forces at that time, and how much will always save a little loss.

It is a pity that I originally thought that the opportunity to be recruited this time will be completely raised. Now it seems that all this is just a dream. Even if this kid is left behind, it will fall into the hands of the Emperor of Heaven. It has nothing to do with their extension of the home.

One thought of this, the extension of the ambition suddenly emerged from the hatred of the sky, step by step, across the distant void distance, pointing to Ye Xuan's nose will smash up: "Ling Hu Chong, you are a little bastard, let us expand The foundation of the dial-up has been lost, and I want to leave it. You are damn..."

"You are a shameless old man, is it good to blame the Lord?"

Ye Xuan did not show weakness, even if he replied to the past: "The Lord has spent a total of 13 days in your extension, not only to help you refine a new ten-grade liquid, including formula and finished products. I am giving you, even the eleventh grade liquid has given you a tube, and I will give it to you..."

"In the past 13 days, in addition to the two meals a day, providing the preparation materials, the Lord has no compensation for any of the rewards. Now the owner feels that the formula has yet to be perfected and wants to go out. Looking for opportunities, do you actually bite a bite and say that this is the main defeat of your family business? Can you be even more shameless?"

Speaking of this, Ye Xuan casually pointed out that the ram did not regret and the long fish stunned dragon, and said: "You ask the two of them, if the young master helped them get the ten-level liquid eleven liquid, just ask them to Eat and drink, provide the preparation materials, do they do this good thing?"

"Dry and dry, too capable, let the little friend of Fox, this is true?"

"Playing is playing, don't you eat or drink, can you still starve? If you want to run the horse, don't let the grass, how can you do it..."

The ram does not regret and the long fish stunned two people are stunned by the words of Ye Xuan Shicai. They are not eager to see Ye Xuan pointing to himself, saying that they should help their home to refine the ten-level eleven-level liquid. I didn't think much, I was excited on the spot, and I should be flustered.

It was not until the words were exported that they suddenly reacted. It seemed that this was not what they thought, too excited. Inadvertently, I removed the platform of Tuo Xiong.

At this time, the old buddy was glaring at them. Even the other strong men and the fleet commanders of the Tianchen State Officials were all eccentric, not knowing what they were thinking.

The faces of the two old guys were instantly red, and they didn't dare to pick up.

"Ling Hu Xiaoyou, this matter should be a misunderstanding!"

At this time, a Samsung general of the Tianchen National Army came out and smiled politely at Ye Xuan, and then he said: "Although the emperor is not there, he went to the Tianfu Star Field in the past few days. But this matter, my Tianchen leader has already reported to the emperor."

"The meaning of the emperor is very clear. I hope that the little friend of the fox can stay and give him a face. Don't worry about it anymore. After returning to the emperor, the emperor will return to the emperor and he will personally host a feast to crush the little friend..."

"Press your mother!"

Without waiting for the Samsung general to finish the words, Ye Xuan was very rude and directly interrupted the swearing. The white eye turned and said: "This is the director of Tianchen or the Heavenly Emperor, and Laozi is not your day and war. Subject, is it necessary to give you face?"

"The nonsense is less, now the Lord is quite uncomfortable. I don't want to stay in the ground of this shit. I immediately open the passage of the Stars and let the Lord leave!"

"Otherwise, if you want to turn your face and force people to stay, this young master will not be able to directly kill a \*\*\*\* road, but in advance, if you really want that, all the consequences will not be borne by the Lord, and you are responsible for it..."

As soon as I heard the words of Ye Xuan, the Tianchen Guoshang's face sank, and immediately turned his face and rushed to Ye Xuan.

"Bold! Little age, actually arrogant, so insulting the country and the emperor, Linghu Chong, what crime should you sin?"

"I still don't squat down quickly, please sin!"

"Otherwise, the general will only have one order, and today you can't escape. I'm afraid I won't talk so well..."

This is clearly the meaning of the upcoming hand, the side of the extension and the ram does not regret, the long fish three people have long been looking forward to this moment, see the Samsung general finally anger, suddenly all sigh of relief After exchanging one eye with each other, they also lifted a finger to Ye Xuan, and immediately reprimanded.

"Lake Hu Chong, advise you not to make mistakes, you see it today, and you want to escape, you have no chance!"

"Yes, the Tianchen Lord and the Heavenly Emperor are still very cherished. If you stay in the empire, you must be the leader of the dynasty. It is better to be degraded or become a prisoner!"

"It's all said to you. It's not a day or two to meet you. Your temper is really bad. When you are young and vigorous, you have all the old people and so on. But haven't they changed now? Young people, be open-minded to accept criticism..."

"boom!"

"I will approve your mother!"

"A group of shameless old-fashioned men, what qualifications are there to teach the lesser master? Isn't it just a face-to-face fight? This is the Lord who wants to see if you have the ability to leave this Lord!"

Not waiting for the three old guys to finish, Ye Xuan has interrupted after a break, and while snoring, the wave will be smashed out of the glare, and directly into the second mech state.

At the same time, the warrior's \*\*\*\* blade was also sacrificed together, and the wind will rise. The blink of an eye will turn into a blood black magic blade with a shape of fierce flames. It is nearly ten feet long and is equivalent to the height of the giant mech. After being lifted by the mech, he held it in the right arm, and stood cross-legged, a fierce and fierce killing atmosphere, and instantly dispersed!

This scene is too powerful, the giant mechs of ten feet high, the knives of about ten feet, the two are perfectly smashed together, and the momentum is unparalleled, and the eyes will stun the powerful people around them...

Chapter 3299: All the way

"God, the magical blade of breath!"

"The starry sky is the treasure! This blood black magic blade is also a starry sky to treasure!"

"Is it his own refining? This is really against the sky. The warriors and trenches are all starry to the sky. This kind of thing has never been heard before, and only the master of the refiner has this kind of handwriting. The future of this child is limitless. Today, I have already offended him. I must leave him anyway!"

"Yes, otherwise, if you let him anger and succumb to the enemy, I will be the sinner of the Terran. Everyone will come together. For the future of the Terran, this enchanting ghost is too important. Once he is allowed to vote for the enemy, it is the disaster of the Terran..."

Seeing Ye Xuan also sacrificed the trenches and the warriors, all of them were all starry to the treasure level. These guys were shocked and once again exclaimed.

It's just that the words are really horrible, and it's as if they are all teachers of justice, and Ye Xuan has become a traitor who wants to renegade the human race.

"Ha ha ha..."

"I have to say that your guys have once again refreshed the awareness of the words of the young masters who have no shame on people. They say that they are useless and they have to fight and fight. Anyway, it is a group of pigs and dogs that are not as good as today. How can the young master kill a good one?"

Listening to these words, Ye Xuan was extremely angry, and the last trace of hesitation in his heart disappeared instantly. The laughter suddenly waved again: "Since today is already the case, this little master will give you a rock-shatter!"

"The three basic treasures of the strong stars, in addition to the war, the trenches, and the battleship!"

"Today, you have a bunch of shameless old men who have joined forces to attack this young master. The warriors and trenches of this young master have all appeared, and the battleships can stand by and watch?"

"Come out, cave!"

With the last scream of Ye Xuan, the hole in the immortal world was sacrificed and hung directly over the top of his head, rising rapidly and reaching a height of 10,000 meters.

"Activate the shipborne killing system immediately!"

Ye Xuan's face has long been gloomy to the extreme, sneer and devour the system to issue an attack command: "Array mode: short-range burst-style killing! Attack mode: no difference coverage in the whole area!"

"Hey!"

"Hey..."

As his instructions were issued, the imaginary shuttle of the 10,000-meter-high head responded for the first time. As the tremors of the tremors of the roads came out, the hull of the snails was steeply brilliance, representing gold. The numerous elements of the symbol of the five elements of the wood,

fire and earth are dense and dense, and the radiant light is shining, and the lasing is radiated toward the hull at a very high speed.

In this moment, countless different colors of the fringe energy are intertwined like a shuttle. In the blink of an eye, the vast void is shrouded. It seems that a light energy giant net is spread over the sky, replacing the sky, covering one side of the world. Eyes!

"Booming..."

The roar of terror soon blasted open, and the five pillars of energy light columns with different colors were displayed around the light energy giant network, representing the power of the five elements, pouring invisible pressure, standing in the air and suppressing one side.

Since then, the vast emptiness of the 100-mile radius of the light energy giant network has been completely banned, including Ye Xuan and the many star-studded powerhouses and warships surrounding him, all of which are enveloped.

It all happened so quickly that no one could react.

By the time their exclamations sounded, the ship-borne killing system of the cave shuttle had already started, and the five energy forms could kill the pile and hang the sky, covering the void below the hundred miles.

"God, what's the situation? It's clearly a small private battleship, but this scene..."

"The starry sky is the treasure! It is the starry sky to the treasure. This kid is crazy. The three basic treasures of the starry sky are all refining to the level of the starry sky to the treasure. What a horrible refining talent? what?"

"Yes, this kind of thing is that the refining masters of the comprehension camp can't do it. The warriors and the trenches are still good. If they are allowed to refine a small private warship into a starry sky, they must The top battleship builders in the tech camp will join hands!"

"These are not the key. I just want to know what the emptiness of the surrounding air is going on. Isn't this a small private warship? How can there be a void? The emptiness of the hundred miles is all banned. We flee. Can't escape, what are the five energy giants above? Look at the breath is terrible..."

"Yes, my whole person is not good, there is a feeling of heartbreaking!"

"Booming!"

"boom....."

"Card!"

As the guys who were killed in the squabble screamed and shrouded the entire edge of the murderous squad, the five ray of light, like the pillars of the heavens, stood in the sky. Masterpieces, the different colors of different powers of killing energy, like a hang of the big river venting, continue to surge, with the overwhelming temperament wrapped in a terrible atmosphere, banging down!

In the blink of an eye, you will kill the vast void of a hundred miles inside, and completely cover it!

Still the same as last time, these killing energy not only have different powers, but even the manifestations are changing. There are round and small thunderballs, big and small, with lightning and lightning, and even magic weapons. , flying swords and other killing soldiers, as well as a variety of beasts of horrible demeanor, fierce flames!

The form of the killing energy is different, and the way of attack is naturally different. At this moment, the bones and brains are rushing away at the same time, making people instantly stunned, and completely do not know how to deal with it.

In the face of all this, looking up from the bottom, the mouth is still exclaiming the constant crowds of the offensive strong collective dumbfounded, one by one completely lap!

This type of attack has never been seen before. It is so complicated and horrible. The number is terrifying and desperate. All the slain strongmen are now dull, even if they see it with their own eyes. They still can't believe it.

"boom!"

"Hey!"

"Booming..."

Without waiting for them to react, the hodgepodge that had been overwhelmingly rushed down, the sound of the explosion was ringing, and the whole siege army was in full chaos.

The tragic and raging, roaring voices are intertwined, instantly rendering a scene of tragic to extreme...

This is still the result of Ye Xuan's failure to fully open the killing power of the big five-line extinction system. Compared to the last time the bombing of the cosmic zombie army, the current killing system of the virtual shuttle only opened. Half of the killings, and the unfolding full coverage attack mode.

Otherwise the image will be even more fierce!

Of course, although Ye Xuan is also in the area covered by the main killings at this moment, all the energy attacks that fall in the sky will not pose any threat to him, even if Ye Xuan actively meets an energy. Attacking away, the latter will also quickly change the bombardment route and avoid Ye Xuan under the control of the five arrays that can be killed.

All of this is the manipulation of the phagocytic system in Ye Xuan. In this environment, Ye Xuan is simply invincible. He is wearing a battle armor and holding a warrior. He is almost all the way, and he is invincible...

Chapter 3300: a fist bigger than a human

With the full-scale launch of the ship-based killing system of the hole, even if it is only half-powered to launch a full range of indiscriminate coverage bombing, but the power is still terrible.

The vast void of the hundred miles that was shrouded and imprisoned by the killing system was completely chaotic.

The sound of ghosts and wolverines is one after another, and it's ringing!

It is also accompanied by the roar of the rumbling ship guns. This is the energy light curtain that some warships are smashing around the void. They want to blast the light curtain and escape from this area like purgatory.

However, everything is just in vain. The system of extinction of the Great Five Elements has been launched. The light curtains formed by the blending of the five basic and five elements of power are so easy to open.

Although there are hundreds of warships that have been banned in this hundred-mile void, they are basically small shuttles and patrol ships. Although there are more than a dozen military warships, they are all star-rated in diameter and three-kilometer-diameter stars. There is no big fortress of 10,000 meters in diameter.

This level of naval guns is not enough to pose a threat to the light curtain of the Great Five Elements extinction system!

In addition, although there are many strong stars in the forbidden place, even the family of the top three gatekeepers and the old people who have not repented, the rams, and the squid have arrived.

However, their cultivation is only in the tenth dimension of the world, and Ye Xuan's last three zombie kings who were trapped in the Tianxing Star's opening of the five-line extermination system are quite .

The three corpse kings were unable to break through the extinction, and these guys naturally had no hope!

However, there are still half of the five elements in the Tianchen Star. The power of the banned light curtain and the strong star of the sky are still there. Just come to a seven or eight 10,000-meter-diameter starry sky fortress, or come to the twelfth. The supremacy of the virtual environment in the

realm of the realm, together with a violent bang, at most, that is, a few minutes, you can open the curtain of imprisonment!

These ship-to-bottom systems for the virtual shuttle can constitute a threatening force and existence, but they have not yet arrived, but will soon arrive.

Ye Xuan had already expected this, and he did not intend to stay here for a long time. Similarly, he did not really intend to have all the star-studded powers that had been covered by the light curtain of the big five-line extinction system. All killed.

After all, they are the strong people of the human race, not the cosmic zombie army. Although they are shameless and they are enemies with Ye Xuan, this large-scale and large-scale killing is very important. Ye Xuan does not want to be a public enemy, even if his heart is angry again. The current plan is just to teach the guys a lesson.

Today's situation, I am afraid of hurting them, but I can't really kill them!

At the same time, he has another goal, that is, to force the general of the Tianchen National Army, who is responsible for commanding the overall situation. Under the miserable circumstances, he has no choice but to open the atmosphere of the Tianchen Xingchen defense system. aisle.

The edge of the emptiness that is covered by the killing system is the atmospheric passage that has been closed. At this moment, there are also many strong stars in the sky. They are guarding the existence of the passage, and it is not strong, but it is Built in a defensive bastion inside the starry sky passage.

It is as strong as it is, Ye Xuan is not inexhaustible, mainly time-consuming, and in that case, it is tantamount to the fact that an administrative star of the Terran and Science camp is facing the battle.

Moreover, this administrative star is also the capital of the Tianchen Kingdom, the official place of the Tianshi Empire.

It is really necessary to forcibly open the defensive fort, forcing the inner channel guards to open the passage. The matter is that Ye Xuan has fallen to the handle, and the other party can make a big fuss, which will occupy the moral peak and is extremely unfavorable to Ye Xuan.

He did not intend to force Linghu to this identity to the opposite side of the Terran camp, so even if he had the ability to do so, he did not intend to implement it.

Anyway, this moment has been imprisoned, and the incompetent Samsung will be able to clean up a meal, and can also achieve his own goals, then take this guy to open the knife, and by the way, can also export bad luck...

"Come and come, Mr. General, what did you say? The young master did not hear clearly, just now it's idle, let's get close and close..."

At this time, Ye Xuan has already put the \*\*\*\* blade of the demon in the right hand into the immortal world. These guys are now being bombarded by various killing energy bodies that can be killed by the five lines of the sky. The wolf is unbearable, and Ye Xuan's past is completely bullying. If you use the blood of the dead, it is definitely a rhythm.

Not in line with his original plan!

He even didn't even use the miniature dead light guns of the combat mechs. Otherwise, I don't know how many people are scared on the spot. This piece of the emptiness of the hundred miles has been completely banned, and it can't escape. It really needs to be killed. A bang, it is definitely the end of ten deaths.

There is no place to escape, and there is no need to hide. In such a small space, there is basically no possibility. The energy beam speed of the dead light can be terrible!

Even so, Ye Xuan at this time is still very easy, no matter which direction he plucks, he immediately scares away a nest, no one dares to let him close.

Including the top ten people and the rams do not regret, the long fish and the dragon and other tenth-thickness of the heavens to cultivate the strong.

On the one hand, Ye Xuan is now the fifth-order existence of the ninth major origin. It is similar to the strength of the masters of this hole. He originally had the ability to challenge the big realm, one-on-one and extension. Xiong and others are definitely not weak.

And now these guys are all being bombarded by the killing energy of the five big arrays of the sky, and they are all self-satisfied. Where are the spare time to deal with Ye Xuan's harassment?

Now he is a giant with a dozen feet, and the fist is like a hill, and it's a life-threatening blow...

For this reason, the original was embarrassed to escape, avoiding the sky and the road to lock up his bombing energy, the Samsung general, at this moment, seeing Ye Xuan rushing toward himself, his face is green, and he will turn around and run. .

"Hey, what are you running? You are not closing the passage. Would you like to close the door to the dog? Now that the Lord has personally sent it to the door, have you swollen and changed your mind?"

Ye Xuan sneered, and the body shape of the speech immediately stopped in front of the admiral of the Samsung. The right fist was pinched, and he was ruthlessly slamming his chest as a punch: "Be bigger than you." Didn't you see the fist? This is the end of the book, the old man called you to install..."

"boom!"

After a punch, although Ye Xuan only used 30% of the force, but the fist is too big, bigger than the whole person in the upper part of Samsung, just 30% of the force, they will be bombarded with a smash, open mouth spray With a blood arrow, the whole person will fall even if it is empty...
