

Super D. S 336

Chapter 336: Beastmaster blood!

Megatron smashed, and immediately nodded. It has only been a few months since birth, and it has reached the level of the holy beast. Ye Xuan is also indispensable.

In addition, Ye Xuan is its owner, and now needs its power, it naturally has to help.

In an instant, Megatron began to collapse and then reorganized.

This time, not a cute rabbit, a kitten, but a stone giant of up to three meters, holding a big stone sword in his hand.

"Hey!"

Megatron's sword slammed on the ground, and the entire passage was violently shaken. The power of this sword, I am afraid, can also open the shell of a large crab.

"It's so strong, I don't want to train you to kill you, kill!"

Ye Xuan was overjoyed and worked hard to run the second heavy eight winds.

The second heavy eight winds and squalls are very difficult to squash. Even if the martial arts Naga Haixue is used, it can only be self-protected and cannot move forward.

Now there is another enemy of Megatron, and his pressure immediately increases.

"Damn, what is this?"

The Naga Sea Daddy supported the teeth. He had to resist the sharp cones from the eight directions while avoiding Megatron's big sword attack. This is not the way.

Therefore, he gave birth to retreat, while resisting, while withdrawing, looking for an opportunity to escape.

"Want to run?"

Ye Xuan saw the intention of the other party and immediately shouted: "Small day, full strength!"

Megatron understands and changes again.

This time, his back actually grew two pairs of arms, three big swords, and marched toward the Naga sea enchant.

"What the **** is this?"

The Naga Kraken was shocked and immediately lifted the long knife on the top of his head.

However, when the three big swords fell, they suddenly changed, and the top of the blade actually extended directly, forming a barb.

"Oh!"

Three sharp barbs pierced the scales of the Naga Kraken and stabbed him into his body.

"good chance!"

Ye Xuan's light flashed.

Eight sharp cones took advantage of this opportunity and plunged directly into the body of the Naga.

"Oh!"

The green blood in the Naga Sea Demon body spewed out instantly, and the screams echoed throughout the passage.

"Small day, give him a fatal blow."

Ye Xuan shouted.

The eight-handed blade was stabbed into the body of the Naga, and it not only hurts the Naga, but also limits the action of the Naga.

Megatron heard the words, but also recovered three big swords, and then gathered a long gun.

No, this is a javelin!

Megatron held the long shots in three hands and then spared all his strength.

"call out!"

The long gun instantly cut through the tens of meters of space. In a crisp sound, the rifle stabbed into the chest of the Naga Siren.

The Naga Kraken can't believe it and look down.

"This is impossible!"

After he spoke such a sentence, he closed his eyes and died.

The eight-handed blade plucked from his body, without support, and his body was soft on the ground.

"call!"

After seeing the death of the Naga Kraken, Ye Xuan relieved with a sigh of relief. It seems that he still has the ability to kill the master of the two dragons.

Megatron also changed back, but it was a look of prostration.

"Well, these weapons are all for you."

Ye Xuan directly took out the weapons that the shrimps and crabs would hold.

"Fortunately for you, go back to rest."

Ye Xuan continued.

He also understands that Megatron has to add after each battle, and has to rest for a while, which is not the same as other holy animals.

Megatron returned to the pet space.

Ye Xuan hurried forward, and collected the weapons, corpses and scorpions of the Naga.

He would have to look at this, there is something good in this Naga sea sorcerer.

However, when he put his heart into this ring, after a review, it suddenly revealed the color of surprise.

"The body of the dragon is actually the body of the dragon, and there is a dragon body in this ring!"

Ye Xuan was shocked and happy.

This dragon, he has never seen it, that is to say, this dragon is not a dragon or a black dragon.

His blood will be distinguished by the phagocytic system.

"Haha, it's really helping me!"

Ye Xuan laughed three times and gave the body of the dragon to the corpse.

The third dragon blood, got it!

This means that he can raise the blood of the beast to the blood of the Beastmaster.

"Hey, the host gets the blood of the beastmaster, the current level can be fused, is it fused?"

"Yes!"

Ye Xuan answered in the heart, the next moment, he felt that there was endless power in the body, and in his ear, there was a loud noise.

The roar of the tiger, the scream of the lion, the roar of the dragon...

A variety of beasts fell into his ears.

"Hey, the host fuses the blood of the beastmaster successfully!"

Ye Xuan quickly checked and found that the beastmaster's blood, there are many abilities.

First, the attack power of non-human beasts is enhanced.

Second, the devour of the corpse gains gains.

In addition, I also got a skill: Beastmaster violent.

After the Beastmaster was violently used, he was able to temporarily increase the power of 30%.

"Sure enough, it is the top blood, it is really strong!"

Ye Xuan couldn't help but say that he clenched his fists. Then, there were three mini dragons rising.

The power of three dragons!

He felt it and found that the force in his golden dantian had grown a lot.

"Although only the strength of the two dragons has been improved, this is enough for me to kill the Dragon Palace. If I use the Beastmaster Rage, then my strength will be close to the power of the Four Dragons!"

At this time, his body could not help but rush out of an unprecedented self-confidence.

His mind sank again and found that there are three more advanced routes for the blood of the Beastmaster.

Beastmaster Bloodline:

Advanced Route 1: Power, the current advance is zero, each step improves the strength of both hands.

Advanced route 2: Agile, the current advanced is one, each step increases the speed of 10%.

Advanced Route 3: The pet growth rate, the current advance is zero, each step increases the growth rate of pets.

Advanced Route 4: Pet Attributes, the current level is zero, and each level increases the pet's full attribute.

Advanced Route 5: Pet expansion, the current level is zero, and one pet can be tamed each time.

Advanced Route 6: Beastmaster Wei Wei, the current advanced level is one, each step up to improve the attack effect of the beast.

Advanced Route 7: Engulfing the proceeds, the current level is one, each time the level of the corpse is increased by 10%.

Advanced Route 8: The Beastmaster is violent, and the current advanced level is three. Each level increases the power increase by 10%.

"Fortunately, after the blood of the beast is raised to the blood of the Beastmaster, the agile advancement has not returned to zero."

Ye Xuan was relieved.

Now his strength is at least ten times higher than before. If he is allowed to face the Naga Kraken again, he can punch each other.
