

Super D. S 3381

Chapter 3381: The ultimate secret of the heavenly family

The War of War has just ended a space jump, of course, is a regular space jump, not a wormhole jump, there is no cosmic wormhole nearby!

However, after completing this space jump, the Magic Warfare has just appeared in this void, and unexpectedly fell on the edge of the area affected by a large number of spatial oscillators.

The hidden system that the small fortress originally opened was directly invalidated, and the hull appeared!

There was some accident in this scene. All the star-studded powerhouses in a fleet of imaginary air were all noticed, and then there was an exclamation...

"The little fortress is so strange, it is dark and the appearance is quite awkward, not like the production of my people."

"It's just the Terran, and the Union of the Faro has never seen such a small fortress. It's like the demons in the funeral domain.

"Enemy attack! Enemy! This is the small fortress of the first cosmic celestial family. It should be a slave servant from the celestial family. It can have such a small fortress of 50,000 meters in diameter. The commander in the middle must be in an ordinary position. At least an important member of the royal family of the Devils!"

"Can't let it go, this Devil's Little Fortress has been crouching nearby, and must have collected a lot of information. Once it is returned to the First Universe, it will be detrimental to my people and the Federation!"

"Yes, the top of the Devil's Royal Family is coming to the third universe, and it is a matter of heart and soul. It is necessary to take this person down and examine it carefully."

"There is also the starry black technology of the fox lord, and he can't let him escape. All the warships, now that we have lost less, still have the ability to suppress, immediately surround them and take them together. At least bombard."

"One can't be less..."

"Hey!"

"Hey..."

As the exclamation sounded, more than a thousand warships, fortresses, and small fortresses in the emptiness of the sky once again opened the space oscillator again, and then dispersed, and soon formed a larger encirclement. The two wild fortresses, the Hoshino and the Devil War, are surrounded by the space oscillator area.

The two small fortresses are separated by a distance of thousands of miles, respectively, on the left and right sides of this large void envelope.

Ye Xuan sneered, and again issued a new order in the wave: "Four guns, lock the prey, a small fortress of 50,000 meters in diameter, free to attack!"

"Hey!"

The humming sounds immediately, the surface of the hull of the small fortress of Hoshino, and the muzzle of the four black holes gradually disappeared.

This scene fell in the eyes of the star-studded powerhouses in the major forces' fleets. They thought that the Hoshino was afraid, gave up the attack, and prepared to wait for an opportunity to escape.

However, they were wrong, because the four 20,000-meter-diameter black hole muzzles were only hidden for less than ten seconds. The surface of the Hoshino hull has changed again, and a larger muzzle has appeared.

40,000 meters in diameter!

Even the 100,000-meter-diameter starry fortress, its main gun is only 30,000 meters in the sky, but now, a small fortress of 50,000 meters in diameter, it shows a super cannon with a diameter of more than 40,000 meters. .

This scene transcends the routine and does not conform to common sense. All the people around are stunned. They are completely dumbfounded. Is this just a starry black technology? Is it just dreaming?

"God, what the **** is this big guy?"

"I was just a four-door 20,000-meter-diameter main artillery array. I even made a 40,000-meter-diameter super main gun. Is this a trick?"

"It's one! This horrible super-ship gun is definitely a fusion of the four main guns before, but... But this is not scientific, when did the guns actually have this fusion technology? "

It was from the first universe of the magic warfare, Mo Qigong and Sha Baofeng also issued a voice of exclamation at this moment, inexplicably.

"What? This small fortress... God, 40,000 meters of the main gun, this is too abnormal!"

"What is even more horrifying is that it was clearly a four-door 20,000-meter-diameter main ship gun array. How did it blink like this? Has the Terran mastered the technology of this kind of naval gun fusion? This time it really is not white. This information is too important..."

"No! This small fortress is a bit familiar. It seems to be similar to the five-meter-diameter small fortress Longye, which was originally taken by Long Xuan, but how is it possible? Can a small fortress still expand itself? Only five kilometers in diameter, but now it has reached 50,000 meters, which is unscientific!"

"Long Xuan? You mean to say... The fox lord is the prince prince? This is even more impossible..."

"boom!"

Just at this time, the super-main ship gun of Hoshino opened fire.

A huge roar sounded, and a black energy light column with a diameter of about 40,000 meters spurred out. It was still an antimatter dead light cannon. In the blink of an eye, it was already hit by another small fortress in the second universe. Direct annihilation.

With a small fortress of 50,000 meters in diameter, more than 80% of the hulls disappeared instantly, leaving only some corner wreckage left in the void, and some of the second cosmic incarnations were dropped from the inside.

Some have even manifested the body of the bleeding vein, which is the tribe of the Golden Eagle family.

This small fortress belongs to the Golden Eagle family, including the powerful old man who had the thirteenth state of the earth in the beginning. Under the horror of this gun, it has already vanished.

The short tea time is not enough. Three small 50,000-meter-diameter small fortresses have fallen into the Xingye, so the fighting power is too horrible. All the star-studded powers in the virtual sky are scared and trembled. The sound reappeared and all the warships were fully charged.

This time is true, they can't let the Hoshino to be murdered again, and they must be killed as soon as possible.

At the same time, the magic warfare from the first universe was also locked by some warships. In the eyes of the commanders of the major forces around the world, the importance of the war battle number is equivalent to that of the Hoshino, and must be left behind.

More than a thousand warships and fortresses, small fortresses, and at the same time locked the Hoshino and the Devil Wars respectively. This is clearly the tempo of the squadrons.

On the other side of the Hoshino, Ye Xuan sneered, not afraid.

On the other side of the war, Mo Qigong is frowning. This accident is in danger. He is also very helpless. The whole piece of void around him has been imprisoned. The space is turbulent and he cannot jump and leave. The warfare is not as abnormal as the Hoshino. It is difficult to break through in the case of such a thousand ships.

"It seems that the only thing that can only make me merge with the War of War, thoroughly blend! There may be a chance to break through, at least, before the bombing, can pull a few backs..."

The celestial body of the virtual environment of the core of the high-level Sha Baofeng face smirk, suddenly said such a sentence.

Next to Mo Qigong's words, he suddenly thought of a legend. It is said that the core tops of the Tianji people have a kind of ultimate mystery, which can be fully integrated with the star-space warships above the 10,000-meter-diameter fortress level. The level of mechanical warfare is invincible.

Listening to the words of Sha Baofeng, it is clearly this meaning, to fully integrate with the magic warfare, let the legendary fortress-level mechanical warfare appear in the world.....

Chapter 3382: Fortress level mechanical war insect

"Booming!"

"boom....."

Around the void, a fleet of all the top gates and forces from the Terran, the fleet of Zongmen, and all the ships, fortresses, and small fortresses of the remaining fleets of the Second Universe and allied forces, totaling more than a thousand, at the same time Open fire.

The huge roar resounded through the heavens and the earth, and this movement was so amazing that it was rare to see such a huge star when the Warhol Federation and the First Universe's celestial family and their slaves fought hundreds of years ago. Battle scene.

It was the change that happened in the Death Star field before, and the scale could not be compared with this. Although the number of warships was similar, the warships did not fire at that time, and there was a change.

At the moment, more than a thousand warships are gathered around and fire at the inside of the encirclement.

The target is two 50,000-meter-diameter small fortresses that are placed around the inner circumference of the encirclement!

For a time, the whole piece of the void was smashed, and the smoldering ship's light was intertwined in the void, and this huge piece of void was interwoven into a huge colorful network, which is good-looking.

However, this kind of beauty represents the ruthless killing of blood and blood. This is a kind of irony and sighs.

At this moment, the Little Fortress from the First Universe has already opened its protective cover, and a layer of blood-colored energy mask covers the entire huge hull.

In the face of this scale of volley and bombing, Mo Qigong did not dare to care about it. He had already given up the resistance. All the kinetic energy of the Demon Warfare was all used to support the energy shield. Even the guns were no longer charged. .

He is fighting for time, so that the core of the Celestial family, Sha Baofeng and the Fortress, will be fully integrated!

Sha Baofeng has disappeared at this time, he activated the ultimate mystery of the Tianzu people, the battleship fusion!

At present, Sha Baofeng, the entire body has been decomposed, into some mechanical parts, biomass energy, etc., into some important positions of the magic warfare, such as the intelligent center, power system, etc., is fully integrated.

Once the fusion is successful, the entire Fortress will be temporarily given life, just like a small fortress also gave birth to self-awareness, wisdom, and become a small fortress-level robot!

By then, its speed and responsiveness will be greatly improved.

These are not the key, the key is that its shape will also change, the mechanical parts of each part are given life, can be displaced, reorganized.

In this case, the shape of the whole small fortress will be different, and it will become more conducive to fighting. Everything changes with the intention of Sha Baofeng.

To be straightforward, Sha Baofeng is equivalent to the life of the main fighter, and the entire Fortress is a 50,000-meter-diameter super fighter.

This is the ultimate mystery of the Tianzu people. Even in the first universe, the ultimate mystery of this mechanical life is still only a legend, and the Terran and the Federation of the Vulcan have never seen it.

When the Warhol Federation and the Tianzu people fought a battle hundreds of years ago, this kind of mechanical life fusion technology has not yet been born.

It was only mastered by the patriarch of the Tianji nationality in the last hundred years, and not all the core elites of the celestial family can master it. Only the celestial celestial celestial empire of the celestial family is given this ability...

A minute passed quickly.

In this minute, the War of Wars has been subjected to a large number of gunfire energy beam bombardment, and now its energy defensive hood has begun to flash, and some can not support.

It was also at this time that the mechanical integration of Sha Baofeng and the Magic Fortress was finally completed.

From this moment on, the Devil War is no longer a small fortress. It is transformed into a super-combat armor of a small fortress. In the meantime, it is a fusion of the super-fighting mech and the control of it. The core of the family is Sha Baofeng!

"Card!"

"Card!"

"Card..."

The densely packed card screamed and rang out, and it rang through the void.

This is not the sound of lightning, but the sound of mechanical operation that comes from inside the squad.

The structure inside its huge hull is changing in all directions, and all the parts and mechanical devices are rearranged. All this is the result of the control of Sha Baofeng's consciousness. Now it has been perfectly integrated with the magic warfare. This small fortress of 50,000 meters in diameter has been born with wisdom and become a mechanical life of a small fortress!

The whole process of change is very fast, first the internal structure changes and rearranges. Then, this change extended beyond the hull, and the hull shape of the entire Demon Warfare began to change rapidly...

"Card!"

"Card!"

"Card..."

The sound of crisp and intensive mechanical operation is even louder. The shape of the small fortress of the original warfare has begun to change at a speed visible to the naked eye.

A strip of steel limbs stretched out, and there were also horns and tentacles. There was a black razor blade like a giant trowel. In just a minute, it was completely changed. The previous small fortress.

Completely disappeared, the magic warfare is turned into a mechanical warfare that looks like a knife and a knife.

The size is huge to horror, and a sickle arm has a huge 10,000 meters!

This is not just a change in appearance. Its internal structure is also developing towards the talented nature of the knife. It has a horrible bounce force. When you jump, you can endlessly empty the sky, and the speed is amazing.

Even the strip is like a giant blade-like arm, and it is the edge of the blade to the extreme. With a knife and a knife, the same level of small fortress can be directly split into two halves.

In addition, the original hull main gun of the magic warfare was also preserved, but it was moved to the abdomen of a giant mechanical knife, which is a giant muzzle that can be opened and closed.

When the mechanical knives use their horrible bounce to rise up and straddle the distant void, it can even be easily bombarded in mid-air.

This is absolutely fatal.

The mechanical knives leaped up and were in high-speed motion. The ordinary small fortress of the same level could not lock the attack, but the main gun of the mechanical knives and abdomen could strike the enemy fortress in this case.

Under the blast of a gun, the other party has not yet reacted, and the knife has already reached the front, and the sharp and unremarkable 10,000-meter knives have fallen.

This scene is simply chilling!

The mechanical fusion mystery of the core of the Tianji family is really extraordinary, it is against the sky!

And this latest mechanical family talent ability, now only the patriarch of the Tianji nationality is fully mastered. In addition to him, his true confidant has mastered some of the true meaning.

As the emperor's confidant, Sha Baofeng has also been given an incomplete mechanical fusion talent. Now, for the first time in front of the world, it will be surrounded by the top gates of the void and the starry powerhouses in the forces' fleet. We are all scared.

At this moment, the exclamations in the emptiness around the air rang again, no more than the four horror main guns that they saw before the Hoshino, and the whole piece of emptiness was lost...

Chapter 3383: Derivation

"God, I saw no, a giant mechanical war worm, and the shape should be a mechanical knife. How is this possible?"

"There is a ghost! The whole process is clearly visible. This giant mechanical knife is actually a small fortress of the devil's group. What kind of technology is this? The great fortress and the small fortress of the Tianzu people can be transformed. ?"

"What the **** is it today? The technology of our human race and the federation has fallen behind to such a degree. Whether it is the Heavenly or the enchanting sorcerer, the horror technology that belongs to the black technology of our human race is mastered. It's amazing."

"Yes, the former's big fort and small fortress can be changed into mechanical warfare, the latter has the random transformation technology of the main gun, the human crisis has come, unprecedented!"

"The big event! This is definitely a big event! The fox and the celestial family have mastered the star-studded black technology of the ethnic group. Unprecedented challenges and threats have come. The human and technological forces have entered the dark age and are left too far. Too far!"

"Behold, the giant mechanical knife is swaying, the speed of horror, a tens of thousands of miles!"

"I rely on this kind of speed to actually bombard the main gun. It is located in the abdomen of the mechanical knife, and a light beam is shot, just like a fart in the leaping process..."

"A horrible knife and a fart, actually directly destroyed a small fortress!"

"Booming!"

"Card..."

.....

In a large scream of excitement, the concrete large-scale mechanical knives use their horrible jumping power to rise across a distant void, and it is really easy to carry out long-range bombardment in midair.

This is indeed fatal.

Because with the mechanical knives leaping, no one expected that the main gun of his abdomen could be bombarded in such a way, so that when the huge energy light column of more than 10,000 meters in diameter was blasted, The target of the lock was completely unrecognizable, there was no dodging action, and even the energy defense shield was not supported.

Then, a huge bombing sound came, and the small fortress of a top-level power of the Terran was blown into a huge fireball.

In the next moment, the mechanical knife smashed into a horrible position, and it was already near. The sharp and unrelenting 10,000-meter knives fell and the huge fireball was cut into two halves, completely ruined!

At this moment, Ye Xuan's mind suddenly sounded a familiar tone of the phagocytic system.

"Hey, congratulations to the host, discovering a new evolutionary direction for life fortresses! Is it branded and explored?"

New evolutionary direction?

Suitable for life fortress?

Ye Xuan lived, and then the heart will give birth to enlightenment, and suddenly it will be awkward.

In the next moment, his sight swept toward the other side of the encirclement circle, and the mechanical knife that killed the Quartet was in a hurry, and the breathing was rushing.

Obviously, the new evolutionary direction of the phagocytic system refers to this mechanical knife.

To be precise, it is the ability of the magic warfare to change into this mechanical warfare!

Although Ye Xuan does not know how the Magic Warfare is done, it is too ridiculous and does not meet the level of warship technology of the three major universes. But in comparison, just understand some of the key issues, Ye Xuan The Hoshino can do this completely.

After all, it was originally alive, and the internal main guns can be changed at will, so the appearance and even the combat form, why can't it change?

I just didn't think about it before, because this concept is too avant-garde and transcends the times.

But now there is a living example in front of you. With the attributes of the survival of the Hoshino, and the full power of the phagocytic system, Ye Xuan has at least 70% of the grasp, and can reproduce this stunt in the Hoshino. come out.

Of course, even if the Hoshino is transformed into a mechanical warfare, the internal nature of the two is different. The warfare is only temporarily transformed because of the core of the Tianji ethnic group Shabaofeng and its Completely integrated to achieve.

In contrast, the transformation of the Hoshino is obviously easier, lasting, and even maintaining this form forever. It was originally alive!

"Booming!"

"boom!"

A large number of dense explosions came, and the hull of the Hoshino was slightly shaken.

On the side of the encirclement, the mechanical knife smashed the square, but a ship in the void around the side did not stop the bombardment of the Hoshino.

Faced with the volley bombardment of most of the ships, Ye Xuan did not dare to care about it. He temporarily gave up the attack and fully supported the defensive cover to launch defense.

However, this is not a long-term solution. Although he has other methods, there is a ready-made success example at the moment, and the Hoshino is not impossible. Why is it far from being close?

With the excitement of his heart, Ye Xuan even gave instructions to the phagocytic system, and he made a full effort to realize the transformation of the fortress as soon as possible!

With the release of Ye Xuan's instructions, even if the devouring system was launched, the Xingye small fortress was still quietly suspended in the void, supporting the energy defense cover at full load, resisting the rotation of the surrounding warships. Shelling.

In general, even an ordinary small fortress, in the case of full energy, fully supports the energy defensive cover, and can support a period of time when facing the same level of warship shelling.

The Hoshino is even more perverted, so this time will be longer. According to Ye Xuan's estimate, if there are no more warships and fortresses and small fortresses to join in, just the current level of bombardment, Hoshino can at least support Small for a long time!

For such a long time, enough swallowing system to turn the fortress into a key detail of the avant-garde ability of mechanical warfare.

Time passed slowly, unconsciously, and the meal was over...

In the process, the Hoshino has never launched a counterattack, so quietly suspended in the void, the energy defensive cover is fully open, and the teeth are hard to support the bombardment of a large number of warships, fortresses and small fortresses.

It seems that just like the Hoshino has no way to deal with this situation, it can only be passively defended, waiting for the miracle to happen, for example, all the warships around the world are exhausted...

This is obviously impossible, too whimsical!

Therefore, in the star wars among the warships that have been looted around, the threat of the Hoshino is basically lifted, and the fox lord will soon be finished, surrendering or falling.

Just look at how long the energy shield of his small fortress can be supported, but in the end it is inevitable that it will be a difficult time to exhaust the end, sooner or later.

In this case, some warships even began to shift the battlefield and rushed to the area where the mechanical knife on the other side of the encirclement was raging.

In any case, the horror fortress of the black-tech warships and the celestial family of the fox-small masters cannot be released today. Even if they are all ruined, there will be research value for the human race and the federation. Warship manufacturing technology will have a major inspiration...

Chapter 3384: Magic bug

"Card!"

"Card!"

"Card..."

At this time, I have been hanging in the void to open the energy defensive cover to resist the infinite fire and bombardment, but there is no other moving star field, and suddenly there is a crisp and dense card noise!

This movement was exactly the same as before the transformation of the magic warfare into a huge mechanical warfare.

I don't know if it's because of the psychological shadows. The star-studded powerhouses in the fleet of the top-level gates and forces in the virtual sky all over the world, after hearing this movement, all of them are wide-eyed, slightly open-mouthed, face It floated up in a stunned color.

Even the huge mechanical knife that was still on the other side of the encirclement with a large number of ships, fortresses and small fortresses, turned to the side and looked over here.

The click of the card continued to rang, about a minute or so, followed by a sudden big work.

At this time, the appearance of the Hoshino is also beginning to change. The long arm of the machine has been extended, and the outer shape of the ship has changed rapidly. The time before and after the ten breaths has been completely changed. I can't see a small fortress anymore.

But turned into a huge mechanical war insect!

This huge mechanical warfare has both the sharp and sharp horror of the mosquito, the sharp arm of the knife, and the long legs of the spider that are full of thorny barbs, and the scorpion is like a pair of scissors. The huge iris, even on the back of the ridge, has a pair of huge wings like a light, but it is not used to fly, but to play the role of energy shield, wings can be used to protect the entire body of mechanical warfare body of.

At this time, the huge light has become a complete circular energy defense cover!

In addition, the entire body of the knives is covered with various barbs, and there are four long tubular soft limbs like tentacles. The caliber is amazing, reaching a height of 20,000 meters, which can be changed at will. Direction, this is the four-tube energy muzzle used for long-range attacks...

The shape of this mechanical war worm is extremely strange. It is particularly embarrassing. It seems that there are various characteristics of the cosmic war worms. It absorbs its strengths, and combines it into one.

His shackles are so fascinating that they are unexpectedly stunned by a kind of worm that had been ravaged by the third universe that was ruled by the Terran.

As the body of this mechanical demon appeared, the surrounding emptiness was already a horrible exclamation...

"Behold, it is a mechanical war worm. This time, it was changed by the small fortress of the singer."

"I understand that the legend of the outside world is really true. The fox lord has collusion with the tyrants of the first universe, and the relationship is still shallow. Otherwise, how could this horrible starry black technology be?"

"It turns out! It turns out!"

"I said, the fox lord himself is already a medicinal squad. How can he still have a horrible talent in the manufacture of warships? It turns out that all of this is derived from the dominant universe of the first universe. This is reasonable. It is."

"The test of the Terran has arrived. The first cosmic hegemonic celestial family has mastered such a terrible starry black technology. This is definitely a great turmoil that has never been seen before. The celestial beings must be prosperous, and the Terran turmoil will start!"

"Leave it! You must leave these two as long as the level of mechanical warfare, the Terran is far behind too much in the starry black technology. With these two mechanical warfare, we can try to narrow the distance from the Tianji family. Otherwise, this battle will be defeated..."

These guys were preconceived, and they took the **** pot of the singer.

Only Xuanyuan Zijing, Duanmu Xiaocha, and Zhao Qianru's three gimmicks are bright, and they have witnessed the growth of Hoshino, knowing that it has nothing to do with the shit.

As for the fact that Hoshino is now a huge mechanical monster, they were shocked at first, but they soon realized.

Although I don't know how the small fortress of the Tianji family did it, the Xingye is a small fortress of life. It was originally alive, formed by the numerous micromolecules of a world insect self-derivative.

In this case, as long as the numerous micromolecules of the world's insect self-derivatives are rearranged, it is too simple to transform the appearance.

It is no wonder that the Xingye No. has not been moving before. It should be that its intelligent center is imitating and deducting after seeing the ability of the small fortress of the Tianji.

I did not expect a short meal, actually succeeded!

This discovery is even more horrible, because it means that Ye Xuan's star field will have unlimited possibilities in the future, and the ability to imitate and deduct is too strong.

This technology and ability to change warships into mechanical warfare, even in the first cosmic hegemony, is definitely the most secret technology, but now, the Hoshino has never been in contact with the war, just across Wanli's emptiness saw the whole process of the transformation of the other side.

It was so easy to copy the technology out of it and express it on yourself!

In the long run, what other technologies can there be in the sky?

From this point of view, the Hoshino is a supreme jewel-class warship. Because the celestial family has always surpassed the human race in terms of mechanical manufacturing and research and development capabilities, this is well known to the world, but it is unable to change. After all, people The people of the Tianji nationality are mechanical life. This aspect is originally an area that people are good at.

For this reason, it has always been thought that all kinds of technologies of the Tianzu people are in the forefront of the Terran.

For example, folding space technology, a large number of warships and fortresses of the Tianzu people have long been widely used, but on the human race side, basically only the military's big fort and above battleships are used.

Military warships of less than 10,000 meters in diameter and large fortune have not been used, let alone federal warships!

However, with the Hoshino, in the future, as long as the Tianji people show an advanced technology application, they can be copied and copied immediately. They can be reproduced on the Hoshino, and some can solve some of the key technologies.

It is a pity that such a gem-level, strategic-level life fortress is now being branded with the genius of the celestial family. At this moment, Ye Xuan is already mad at the moment, which makes Xuanyuan Ziyang three women very helpless and deeply speechless.

At the same time, the other side of the encirclement is empty.

The mechanical knife was still in a fierce battle with a large number of star-ship battleships and fortresses and small fortresses.

Since the meal, the mechanical knives have also suffered some injuries. Two of the eight huge sickles have been smashed, but there are dozens of battleships and fortresses and small fortresses that have fallen into its hands during this time. .

At this moment, the inside of the body of the knife, the exclamation of Mo Qigong suddenly sounded: "How is it possible? The small fortress of the Terran fox family has also demonstrated the ability of mechanical warfare, and the degree of change. More horrible, is this a joke..."

Chapter 3385: Legend of the life battleship

"Impossible! This is absolutely impossible!"

"The shape of the mechanical warfare that the other party has changed is not only a mechanical arm, but also an energy barrel. Actually, there is also a defensive wing. This degree of integration and change has exceeded the technology I have obtained. Is it the one? In the small fortress, did you have a more powerful Tianzu ethnic group than me?"

"It's ridiculous, it's ridiculous..."

With the exclamation of Mo Qigong, the inner space of the battle knife, the voice of the shocked voice of the top of the core of the Tianzu national group, Sha Baofeng, is also ringing.

The Hoshino was suddenly transformed into a huge battle demon. This scene was seen by his own eyes and has already been shocked!

This kind of mechanical fusion secret method, even in the core high-level circle of the Tianji people, is still a secret at present, only the confidant of the patriarch, the confidant, is given, and even the No. 1 confidant of Emperor Yi has not been given completeness. The integration of the righteousness, there are defects.

As for Sha Baofeng, although he is also one of the confidants of Emperor Yi, but the ranking has reached a hundred, so the integration of the meaning of the esoteric is more simplified.

But now, he saw with his own eyes a mechanical change of a small fortress, but it showed a higher degree of integration than his own, although it was more than the ten confidants of the top ten, not the gods, this fusion The level of mastery and mastery, but at least the top 50!

However, according to Sha Baofeng, the celestial tribes of the top ten people of the Tianji clan have never left the first universe. They are basically in the base camp of the Tianji nationality and rarely go out.

Even the first universe will not go out, let alone the third universe that the Terran is in control.

That is to say, in the small fortress opposite the fox lord, it is impossible to sit on the core of a celestial family, but it has shown similar mechanical integration ability, and it is still better than Sha Baofeng. To be profound, this is really a mystery, telling him that he can't figure it out anyway.

"Is it..."

Sha Baofeng's voice once again sounded. This time, he brought a trembling voice: "Unless the other party is on the spot, so that all this can be achieved, just now, I used the mechanical integration to capture the meaning of the other. Throughout the process, the other party reproduces this through the derivation of the intelligent hub!"

"Never impossible..."

Mo Qigong scared a big jump and vetoed it categorically: "The change of this mechanical warfare does not seem to have much technical content on the surface, but in fact it is the opposite. If there is no one who has mastered this kind of mechanical fusion technology. The core of the core is the center, and a warship is a dead object. How to change the internal structure and shape?"

"In this case, even if the other party can deduce the general technical difficulties, it can't break through and can't solve it!"

"A typical warship can't, but there is an exception in the legend!"

After the words of Mo Qigong were just finished, Sha Baofeng had already taken over the words, still with a vibrato, and continued: "In legend, the founder of the patriarch, the leader of the human race, Xing Bo, has left A life warship, this thing is a mystery. No one knows what the life warship looks like and where it is, but rumors say that the whole warship is alive, it can grow up, this technology Even surpassing the Tianji family, the most advanced battleships nowadays have too many self-recovery capabilities..."

"If the opponent's warship is the life warship, it is originally alive. Naturally, there is no problem. As long as the key technical points are derived, the mechanical integration can be immediately reproduced."

"After all, the core technical parameter of the mechanical fusion capability is to use a core of the Tianji family to integrate with the warships and temporarily give them life. The life warship can just omit this link. People are living and have life. So, once the changes are made, they will be more thorough and easier to master."

"This will explain the extent to which the other party's changes have changed, and it's still above me..."

Speaking of this, Sha Baofeng no longer speaks and falls into silence, because he knows in his heart that compared to a top-ranking core of a top-ranking family, he came to the third universe, and the other's small fortress is the legendary one. The possibility of a life battleship left by Xingbo is even smaller and less realistic!

Just now he just suddenly thought of this possibility, and he said it!

In fact, I have never believed in my heart...

But the speaker did not intend, the listener had the heart, Sha Baofeng's words just fell, Mo Qigong's face changed, and it was a big change.

There was a flash of light in his mind, and he remembered the small fortress of the Hoshino that was taken away by Zhang Wuji from the Weiwei Star.

The little fort is indeed a year old, and it's roughly calculated. It's really existed before the Terran technology pioneer Xingbo was born, and the Tianji people had not rebelled before the Terran.

Later, when the star was degraded, the Terran was rushed to the Third Universe, and the small fortress also experienced many years of battle in the hands of the Tianji, and finally retired and was thrown to the Devil as garbage.

Just before I arrived at this star field, I couldn't see the face of the small fortress. Mo Qigong's heart gave birth to a feeling. It seems that this small fortress has been seen there, vaguely and the one that was taken away by Zhang Wuji. The Hoshino is somewhat similar.

But that is obviously not very likely. A small fortress of five kilometers in diameter, in less than a year, how could it be transformed into a small fortress of 50,000 meters in diameter?

Therefore, Mo Qigong just thought about it at the time and put the idea away.

Now that he heard the legend of the life battleship, his breathing was rushing, and there was already a certain ambiguity.

"It seems that the kid is really Long Xuan, and now it is also known as the Linghu Shaozhu, hey, it really is one of the two geniuses of the Terran."

Shaking his head and smiling, Mo Qigong screamed in a voice that only he could hear: "Whether it is Zhang Wuji, or Xuan Huangzi, or Linghu Shaozhu, three identities are all smashed out." Out of the wind, now I have a cross-reference, it really is the style of the kid, the secret of this shock, was actually inadvertently stunned by the old man..."

"In addition, the kid was really unpredictable at the beginning. He thought that he was going to take a piece of rubbish. I didn't expect it to be the unique treasure of the three planes, the life battleship!"

"My devil has suffered a big loss in this matter. The kid must give a statement. Otherwise, hey, the old man will never agree!"

Just now, Sha Baofeng's voice has already sounded again: "In any case, there is a small fortress on the side of the Terran camp that is similar to the mechanical fusion technology of my Tianzu. This matter is very important and must be investigated."

Then, the mechanical knives were stagnate and suddenly bounced. They were actually the hundreds of warships that had been entangled with them. They crossed the 10,000-mile void and rushed toward the mechanical magic insects that changed by the Hoshino.

Chapter 3386: Knife against the worm

"It is!"

"Ha ha ha..."

With the mechanical magic insect successfully transformed, and its appearance seems to be more embarrassing and complicated, at least the mechanical knife changed by the small fortress of the Tianji nationality is very powerful, and Ye Xuan's heart is overjoyed. I laughed up in the fortress.

For him, this time's success is not only the ability of the Hoshino to have a mechanical transformation of the Celestial warship.

He waited for Ye Xuan and Xingye to even open a window in front of the phagocytic system, a brand new window, which made their vision more open.

The original creation of technology is like this, a brand new idea that represents a brand new field!

Today's success has made Ye Xuan and the phagocytic system have this kind of consciousness. In the future, once they encounter the strengths and advantages and characteristics that can be learned, they don't have to think about it at all. Derivation, reproduce everything on the Hoshino.

The future of this life battleship is absolutely limitless. With this harvest, it has taken a solid step from the dream of the perfect battleship of Xingbo!

Perhaps, in the future, the life battleship will grow into a super-perfect warship that surpasses the expectations of Starbucks, and it is not entirely impossible.

At least, this kind of mechanical transformation ability, Xingbo did not think that although he is a technological pioneer of the human race, but after all, tens of thousands of years ago, it has already fallen, and the technological vision at that time is different from the present, when the star I did not expect this field, it is also normal!

If the former Hoshino No. faced this huge fleet of more than a thousand ships, it was only the ability to leave, but did not even think about sweeping the army, to one thousand, and to use this one. With the huge fleet repression, now, with the full control of the new capabilities of the Hoshino, Ye Xuan is extremely confident about this.

The mechanical monsters that Hoshino changed, not only have the ability of various star-space war worms, such as the horrible bounce force, the sharp knife wall, the horrible pliers and so on.

There are even four universal gun barrels with a diameter of 20,000 meters. The shot is an anti-material dead light cannon!

There is also a pair of energy wings that can both function as an energy defensive cover and turn into a huge light energy slash...

In the back, these kinds of abilities and characteristics, the mechanical knives of the Tianji people are all gone, even the mechanical knives will contain hundreds of warships and remain invincible. After the meal, they are still fighting, Xingye It is even more unnecessary to say that the mechanical bugs that have changed.

Absolutely enough to sweep the army!

It's time for these guys to taste their own power. Before they always wanted to suppress the foxes and the masters, they're too bullying. Now, everything is reversed, and the foxes are all in one, now they're all Repression!

"Hey..."

"You guys who are shameless, take the opportunity to buckle the young master!"

A screaming scream of screaming from the long mouth of the mechanical worm, followed by the voice of the screaming scream of the singer: "Today's lord is on the battlefield." The simulation deduction made the ship get a new ability to transform the mechanical magic insects, just to take you to worship the worms, one by one is too shameless, not to blow you all!"

"call out!"

The voices fell, the huge mechanical moths and the strong legs and legs suddenly jumped up and jumped across the miles, rushing out of the encirclement of hundreds of warships, and the group was moving towards it. Continuously shelled in the battleship group.

Ruthlessly killing blood, it started...

"Booming!"

"boom....."

The sound of four huge explosions came out. When the mechanical devil was still halfway, the four barrel-like barrels on his body had turned around and aimed at a small fortress on the three warships. And instant bombardment.

Four 20,000-meter-diameter black anti-matter dead light gun energy light columns roared out. When the body of the mechanical devil fell, four magical black flames were blown around, and the four different levels of warships were thoroughly The fly is gone.

This is just a beginning.

"Oh!"

"Oh..."

"boom!"

"Booming..."

The huge sound of the two cracks came out, followed by two huge explosions that were comparable to the previous ones, and two large 10,000-meter-diameter fortresses for two huge fireballs.

When the mechanical demon figure fell, the two huge energy lights on the back were directly turned into energy sickles, and the hulls of the two 10,000-meter fortresses were cut into two halves. The kinetic energy cabin caused a big bang.

This is too good for the energy diaphragm. It is originally an energy form. It can be put up and discharged. The harvest disappears instantly. When it is released, it is 50,000 meters. It is like a two-handed energy sickle. It is a black anti-matter. The energy is solidified and it is almost indestructible.

When you touch the hull of the big fort, it is like pouring oil and pouring ice. It is directly etched into it, and it is easy to cut it in half. It is not so easy to cut tofu.

This is just its ability to attack. In fact, it is more about defensive ability. It is just that the mechanical devil is like a tiger into the flock, and there is no need to show this ability.

Really want to unfold, this pair of energy is as straightforward as the energy of the sickle, and it can be turned into an arc in an instant, wrapping the entire body of the mechanical devil and turning it into an energy defensive cover for protection!

Such ability is that Sha Baofeng and Mo Qigong are both jealous. They are only seeing the ability of this pair of energy and fins in terms of attack power, and some are not calm.

What's more, in addition to this pair of energy fins, the mechanical bugs that the Hoshino has turned into have other external structures that are not available in mechanical knives...

"Ling Hu Chong, you really have stolen the mechanical integration ability of my Tianzu people, this is simply too much!"

Under the wrath of the heart, the sound of Sha Baofeng, which is fully integrated with the War Warfare, has suddenly turned into a huge mechanical knife. "No matter how you did it, this matter must give me a confession." That's it, you will return to the first universe with me, and my patriarch will personally fall and fall!"

"boom!"

As the sound of Sha Baofeng's voice rang, the huge mechanical knives had already swayed from the distance, a horrible bounce, and instantly straddled thousands of miles, falling into the void beside the mechanical monster. It was actually directly pressing two three-kilometer captains' star-rated warships into a huge discus.

"What do you count? It is the patriarch of the celestial family, you may not be qualified to speak with the Lord. Do you need to take care of you?"

In the sharp mouthparts of the mechanical devil, the sound of the words of the fox lord proudly came out, and then the huge tail tongs suddenly whistling, and the mechanical chain was connected to the body, like a mechanical hammer. For the meteor, smashing the past with a mechanical knife hundreds of miles away...

Chapter 3387: Unfinished

"boom!"

The tail of the mechanical magic insect is like a giant meteor hammer. The speed is faster than the meteor. The volley is gone all the way. Even the void is torn, and the blink of an eye is hit by a mechanical knife. On the limbs.

The sound of the huge roaring sound came, and the leg of the mechanical knife was bent at a strange angle. Although it was not directly broken, it was severely damaged. Even if it can be repaired, at least this leg is temporarily It is losing some features.

"what....."

"Lake Fox, you **** it!"

In the body of the mechanical knife, Sha Baofeng's almost roaring roaring sounds, hateful and mad.

At the moment, he has fully integrated with the Devil War. The Devil War is like his body. At this moment, one leg is discounted. Although the mechanical damage is a magic warfare, the pain is Sha Baofeng.

After all, the Devil War is just a lifeless steel fortress. Although Sha Baofeng is a mechanical life, from the beginning of his self-consciousness, there is already a pain. Otherwise, there is no painful life. Even if it is mechanical life, it is not complete!

Although there are many legs and legs of mechanical knives, when there were hundreds of warships, fortresses and small fortifications, there was already a limb that was abolished and temporarily lost some functions.

Now with the second leg, the action of the mechanical knives is immediately more affected. Sha Baofeng's anger at this moment may be due to this, or it may be because Ye Xuan's rebellious, even the patriarch of the Tianzu nationality The Emperor was not in the eyes, which made him extremely angry!

"You are not qualified to say this to the younger master. It seems that you need to teach you a good meal!"

In the long mouth of the mechanical moth, Ye Xuansen's cold voice came out again. At this moment, just like a meteor hammer, the mechanical knife smashed a leg to the end of the fracture. The hammer has been recovered, but the huge shape of the mechanical monster has suddenly risen.

Gently a bounce has crossed the void of hundreds of miles and landed on top of the mechanical knife.

"Is it a knife? I don't think so. I just broke a leg and just didn't fight it!"

Ye Xuan's ridiculous words came out, and then two of the large number of limbs of the mechanical devil smashed out, and it was also two knives.

"call out!"

"Oh..."

Two rapid blasts sounded, and the two knives of the mechanical devil instantly hit the body of the mechanical knives, and opened two cracks. For a time, the body of the mechanical knives flashed. A striking electric spark.

Just two times, on the huge body of the mechanical knife, there are two tens of meters long gaps, which looks very embarrassing.

There is a wide hall in the gap, and there are a lot of devil strongmen in the face, stunned and looking through the two gaps of the Lord to the outside empty space.

The two compound eyes of the mechanical demon worm are just facing the huge gaps of these two horrible horrors, so for everything inside, Ye Xuan saw it clearly.

For this reason, the body shape of the mechanical devil is obviously abruptly delayed.

The back was originally stretched out of the two energy wings, and instantly stopped in the air.

Originally, these two dead light wings, which were condensed with anti-material light energy, were to be slammed down directly. This mechanical knife was completely solved with one blow, but now Ye Xuan changed his mind because he saw the love on the vast square in the space inside the knife.

Among the large number of devils, there are quite a few acquaintances!

The vast majority of the devil, Ye Xuan, can't name it, but he has only seen it, but there are two guys who have a relationship with him. One is the big collar of the black mosquito, Zuofengtai, but the demon slave of Ye Xuan. Before it was repaired, it was the ninth largest point of origin, but now it has reached the ninth big point of origin.

It seems that this time is quite an adventure, but the slave print in his mind is still there, there is no problem, still in the control of Ye Xuan.

At this time, while Ye Xuan's line of sight captured Zuo Fengtai's figure, the latter's slaves were clearly sensed, and when they looked at the mechanical moths where Ye Xuan was located, they radiated a glowing glow.

When Ye Xuan was appeased with a spiritual source, he would not be exposed. The hot light in Zuo Fengtai's eyes faded and quickly returned to normal...

And the other guy, actually the demon king's demon royal family uncle Qi Qigong!

It was cultivated as the original environment in the tenth world. Now it has reached the twelfth emptiness. This is not an adventure. It can only explain the repairs of Mo Qigong that he saw before. Something is hidden.

If you think about it in a divergent way, it is very likely that the emperor Mo Motian and others will also be concealed!

With this sudden speculation, Ye Xuan's heart suddenly moved, and the white hair sweat on the back crawled out some time.

If this is the case, most of the old ghosts of Wenxing also concealed the cultivation. The repairs he showed at that time were the same as those of the Emperor Mo Wentian and the uncle Mo Qigong. It is the first time to enter the world, but if other people have concealed the cultivation, how can he alone be a real one?

If he is not the existence of the tenth dimension of the heavens, but the existence of the twelfth emptiness, then the gun of Naples will definitely not kill him.

That is to say, the old ghosts of Wenxing are very likely to swindle the golden shackles, not only Ye Xuan was deceived, but even the Terran and the Faroese Federation were deceived.

If this matter is taken seriously, then no matter what the purpose of Wenxing is, this person is too terrible.

But all of this is just speculation. Unconfirmed, the current situation is not suitable for the matter. Ye Xuan soon threw it behind his head, but his heart was on his mind and he planned to explore it later.

At the same time, Ye Xuan suddenly thought of the first priest of the Devil's City at the same time. At the same time, the depth of the first cosmic domain far from the entire universe was one million meters. A thousand-kilometer-diameter super-star fortress, a certain place deep in the hinterland of the Tianji family.

An old man who was kneeling like a retreat suddenly opened his eyes, and a flash of fine smudges in his squats, and his mouth was slowly sketched out with a cold smile, as if he had suddenly felt something in this moment.

However, he did not say much, and soon closed his eyes again and fell into a state of retreat.

This person is the Devil's City High Priest Wenxing!

.....

The third universe, the land of war near the Tianchen Empire.

After the moment of opening the old ghosts in the brain, Ye Xuan's gaze quickly caught a smile from the mouth of Mo Qigong's mouth. Ye Xuan sighed and then sighed, the old guy guessed. Out of my identity!

As a demon royal family uncle, Mo Qigong has always been unsmiling to people, only to Zhang Wuji to look at each other, quite a vote, a bit old feeling.

Chapter 3388: Read the old feelings

Now, he is facing the smile of Ye Xuan, clearly and when he was in the Devil's Star Field, Ye Xuan was exactly the same when he was in front of him.

Do not say that the identity has been recognized by the other party, even if not, Ye Xuan can not continue to shoot, Zuo Fengtai is his magic slave, there is a big use, although Mo Qigong is a demon

royal family, but the opposite Xuan is still quite good. If he bombed this mechanical knife, they would fall into the hands of the human race and absolutely could not escape!

In the thought of this, Ye Xuan changed his mind in an instant. He not only did not intend to destroy the Devil War, but also had to find a way to help it rush out of the surrounding warship encirclement. After the periphery, with its small fortress scale, it has its own way. Jumping and jumping, taking the opportunity to leave... It's like reading the old feelings of the past, helping one!

However, all this can't be done too clearly. In that case, the younger fox must be identified as the traitor of the celestial family, and the iron-like facts cannot be refuted.

Although Ye Xuan does not care, he does not want to do this.

If he does not care about this, he can now directly screw the mechanical knives out of the encirclement and help him to leave, but now he can only use concealed means to achieve this.

"boom!"

"Booming..."

During the meditation, the tongs of the mechanical worms slammed out again, and they smashed out again and again, shaking the entire body of the mechanical knives.

However, after a dozen or so times, the huge gap that was opened by Ye Xuan on his body was forced to be forced by this brute force. Although there are still some small gaps, they are already innocent, at least, In the next big wave, this level of gap has not allowed people in the space to fall out.

"what....."

"It hurts me!"

"Ling Hu Chong, the deity must kill you, definitely..."

Every time the heavy hammer is pulled out, Sha Baofeng's tragic moments will sound. He is really hurting. At this moment, he has repented and mechanically merged with the magic warfare. Because of this, the goal is too big, and any time he is suffering, eventually it is all he is suffering from that kind of pain.

Everything shouldn't have been like this, but because of the enchanting appearance of the fox lord, all of them have changed. It is said that it is crushing the enemy, but now it is being abused by the public. This is too grievous, so Sha Baofeng Hateful and mad, repeated screaming shouts, violent roar!

For all this, the star warships, fortresses and starbursts in the fortress around the sky have already been shocked!

How strange this scene is!

The so-called Star Wars they have seen and participated in, the scale is big, the heart is shocked, and it is not shocking, but what is happening in front of them is really shocking and shocking. Circle dumbfounded!

What are the two guys who are fighting?

If they are two-meter-long, thousand-foot dragons and fierce beasts, they are more likely to accept some, but at the moment they are fighting in the starry sky, but they are clearly two mechanical warfare insects, huge in size, like small-scale mechanical warfare!

And all of them are changed by two small fortresses with a diameter of 50,000 meters!

This kind of mechanical warfare, the Terran and the Wanluo Federation had never seen it before. Today, not only did they see two ends at a time, but they also fought in the void, a small piece of void was disturbed, and they were shocked by the large number of them. The starship hurried back.

This two mechanical insects horrible war, especially mechanical Mochong other end, though he is now fat beat the other end of the mechanical knife bore, but in fact, as long as people are willing, at any time it can concentrate all of the other people around the family The battleship was launched.

The four large hoses with a diameter of 20,000 meters represent four anti-material dead light cannons with a diameter of 20,000 meters. Once they are shot, the small fortress of 50,000 meters will be destroyed in an instant.

In addition, the pair of black antimatter diaphragms on the back of the mechanical moth are also as terrifying as the huge light that is formed by the antimatter energy. Under one squat, the small fortress is directly cut into two halves...

This is simply a mechanical killing. This has already been agreed. Didn't you see another mechanical knife being mad at him?

The latter had been able to spend a lot of time with hundreds of warships, forts and small fortifications that were besieging it, but did not fall under the slightest wind, but destroyed dozens of starships.

But now, under the madness of mechanical devils, there is no such thing as a resilience. This is really a powerful demonstration of the power of mechanical devils, which is too chilling!

"boom!"

"boom!"

"what....."

"Lake Fox, I want to kill you!"

"boom!"

In this way, in Sha Baofeng's hateful roar, the huge mechanical moths of the body are shot again and again, no longer embarrassing, all of them are gravity bombardment, and the mechanical knives that are already close to the semi-residence are once and for all. I quickly approached again and again, chasing the past and launching bombardment again.

Along the way, all the warships, fortresses and small fortresses were rushed to avoid as ghosts and gods. They saw it, and the fox lord was really angered. This is clearly a mechanical knife from the celestial family. Hard to blast, the rhythm of killing on the spot.

In this case, they are not in a hurry to shoot.

I don't see more than a thousand warships in the surrounding world. However, in the process of fighting these two metamorphosis guys at the same time, nearly 100 ships have been destroyed. At the same time, on the other two such metamorphosis, more than a thousand ships of various types are really A little not enough to see.

It's rare for these two guys to fight on their own, and it seems that there will be results soon. One of them will soon be degraded, and they will be happy to take advantage of it and wait until the battle has a result.

At that time, more than a thousand battleships concentrated their firepower to crush a mechanical warfare, and the chance of victory was increased by a few.

why not?

It is precisely because of this consideration that as long as the two mechanical warfare in the fierce battle come to the forefront, all the starships will immediately retreat. After all, it is the fox who has the upper hand. This guy is too arrogant, and there is no such thing. I thought about running away.

It has been enough to explain the problem twice before.

Therefore, they are not worried at all. They have never thought that this is the strangeness of Ye Xuan. In this way, he secretly helped the Devil Wars and helped him to escape from the encirclement of these thousands of warships.

And he did it quickly.

After a short period of tea, the two pairs of mechanical warfare, in this repeated bombardment, finally unconsciously broke through the encirclement of the thousands of warships, and have left the area where the void is oscillated.

Ye Xuan did not make a sound reminder, it would expose itself, but Sha Baofeng was not really stupid, just after the mechanical knife was smashed by mechanical moths for dozens of miles, finally shocked the void area. Let him feel the next moment of a loose body, Sha Baofeng's angry roar stopped.

Then, the nearly half-residual mechanical knives began to change shape at a speed visible to the naked eye, and the number of interest has returned to the previous small fortress, but it is already riddled with holes and many areas. It's all concave, it seems to be straightforward...

Chapter 3389: Fighting and slaughtering

Then, inside the hull of the Little Fortress, the physique of the core of the genius of the nose and the face of the celestial body, Sha Baofeng, appeared, not only the wolf to the extreme, but even the limping of the walk, the drawback of this mechanical fusion is the battle. Although the hull will be damaged, the Tianzu ethnic group that merges with the hull will be affected to some extent.

This is the case with Shabaofeng now.

"Ling Hu Chong, you wait, the deity Sha Baofeng, will not let you go, ah..."

After releasing the last swearword, the Magic Warfare Small Fortress instantly started the space jump and disappeared directly.

"Go to your old mother, have the ability to stay, fight for three hundred rounds!"

In the void, the mechanical magic insects screamed and screamed.

This scene happened to be in the field of vision of the two figures that were coming from the distant sky. In an instant, the two men's whole brains creaked, all smashed...

These two figures are powerful and strong, and they are the great powers of the fifteenth world. One of them is the Qiang Kun ancestor of the Heavenly War.

The other person is also a man, about sixty years old, no need for white face, no eyebrows, triangle eyes, a glimpse of a feminine gloom in the shackles, this person called a brooding ancestor, is a starry sky, However, because of the research and development method, it is one of the few remaining masters of the Marathon Science and Technology camp, so it is highly valued.

Although he is a dissertation, even if he is a warrior of the Tianzong Emperor, he wants to invite him to help him, he can only run it for himself to show respect!

At the moment, the eyebrowless ancestors of the war-torn finally arrived, but after arriving here, the unexpected trapped squad did not see, but it was a chaotic battlefield.

Around the void, a large number of ruined starships were dazzling, and at random, at least hundreds of various starships were destroyed and destroyed in the void for the universe.

The wreckage of some of the starships can even be seen as a small fortress from a diameter of 50,000 meters, which has already been bombarded, leaving only a few corners.

Seeing this movement, these small fortresses are clearly caused by the anti-matter death guns, but there is no 100,000-meter-diameter starry fortress in the surrounding air. The largest warship is only 50,000 meters. The fortress is only.

I don't know where these antimatter dead light cannons were fired.

You should know that every antimatter dead light cannon needs to be equipped with an antimatter light energy generator, and its volume is not smaller than the anti-material gun. Therefore, the small fortress of 50,000 meters in diameter cannot be equipped at all, only 100,000 meters. The true starry sky fortress of the diameter has this ability to be loaded!

But this is not the most shocking.

The most shocking thing is that in addition to the disappearance of the stagnation, the stars of the giant dynasty disappeared, but there were a large number of starships destroyed by antimatter deadlights, and there were two more large-scale mechanical warfare. .

This kind of mechanical warfare is actually built both in the first universe and in the science and technology camp of the third universe. But it is basically a fixed defensive force on the inland city of the administrative star.

It is impossible to open up to the universe.

Because they are impossible to transform.

But just now, the war battalion and the brooding ancestors clearly saw that the two mechanical warfare that were fighting in the war had changed into a small fortress of 50,000 meters in diameter within a short period of ten, although it was broken. Unbearable, but the basic ability has not been lost. It was actually before the two of them had reacted, they had already started a space jump and escaped far away.

The remaining mechanical war insects are still screaming, and the sounds in them make the war looms feel a little familiar!

"War, one, two, get out of the old man..."

"What about the big crowd? Stars and giants? You guys!"

"How long did the old man leave? How did it become like this?"

At this moment, the distance between the war and the brooding ancestors is still quite far away, and there are thousands of miles away. The reason why the land of the war is clearly seen is that the two people have noticed that the front of the sky is extremely Strong energy fluctuations are based on the use of certain magical powers.

At the moment, the two men stepped up under the foot, and the positive speed rushed in. The voice of the war and the words of the war was brought forward in advance, and the vast battlefield void was resounded.

All the people were shocked and subconsciously looking away in the direction of the roaring roar.

Some surprises, some sighed, and some were excited, because they knew that the ancestors of the Heavenly War Empire finally returned, this is the great power of the fifteenth world. His coming, the fox lord, even if he is enchanting again, this time has to be suppressed.

Although his mechanical moth is powerful, he is absolutely unable to hold on to the powerful means.

Of course, the fox lord can now immediately appoint the star giant Ding, but that is useless. After hiding inside, it can block the footsteps of the Tianzu Emperor's ancestors, but it can't stop the war. If the ancestors invited the old friend of Qiankun, if this person does not have this ability, it is impossible to come forward with the war ancestors.

In the line of sight, a group of star-studded powers are far away from each other, and they are clearly faintly able to see thousands of miles away. There are two streams of glory and speed.

The ancestors of the war and the sorrow have already visited their old friends, and the two great powers of the fifteenth world will soon come to this place!

"I rely!"

"Pharaoh is actually back?"

Everyone was surprised that after hearing the roar of the roaring ancestors of the war, all the people were shaking, but the foxes in the mechanical devil were a little scared. Nothing is meant.

It was a swearing slogan on the spot, and the mouth was another old man who went out.

Moreover, the sound is not deliberately suppressed at all, but it is a bit like deliberately loud, and all the star-studded powers in the entire battlefield are clearly audible.

It's so quiet, it's impossible to hear the two big rushes that are coming from the positive speed in the distance.

This kind of arrogance and daring stunned, and all the star-studded powers in the imaginary sky were stunned.

This kid has a daring, but it's not a normal fat. Seeing that Qiankun's ancestors are about to come, I dare to be so provocative. Do you never know how to write dead words?

"Card!"

"Card!"

"Card..."

At the same time, with the words of Ye Xuan, the huge mechanical monsters began to change again.

The sound of a crisp and dense mechanical operation resounded through the heavens and the earth, and the short three-seven interest rate was restored. The mechanical devil was restored to its original state and turned into a small fortress of 50,000 meters in diameter.

Seeing this scene, a large number of star-studded powerhouses in the virtual sky all changed.

The emptiness of the Heavenly War Emperor's Voids, the Second Battle, and the War Four, were all exclaimed.

"No, this kid is clearly the rhythm to escape!"

"I will start the space oscillator at all times, and I can't let it expand into space and escape from here..."

After the words of their words were degraded, the Hoshino continued to change after recovering the shape of the Little Fortress, and once again shocked everyone...

Chapter 3390: Qiankun angered the void

In the face of the fifteenth world's fifteenth world, the only choice for Ye Xuan is that he can only take it away immediately. Anyway, this is not a shame. He is only the tenth level of the heavenly level. The five great worlds are powerful, and they are still two. Are you still left behind and desperate?

Everything I have done before is already enough to deter, and I am sure that these guys will never dare to touch his mold and take the initiative.

From this point of view, Ye Xuan's purpose has actually been reached!

However, walking is to go, but how to go, but he needs to make a decision.

If this is to let other strong stars know, in the face of the two fifteenth world of great power, Ye Xuan has more than one way to calmly leave, afraid that it will be eye-catching again!

In fact, if Ye Xuan does not want to leave, he is even fully capable of stunning the two great fictitious powers of the fifteenth world, whether it is a headless baby or a Lei Di Yin.

Even with the bow of the sky, after Ye Xuan's cultivation has reached the tenth level of heaven and earth, how much can pose a certain threat to the mighty power of the fifteenth territory.

In addition, he has more than one choice to say that he has to leave.

The quickest way is to activate the cosmic coordinate jumping ability attached to the system title. Once this is done, the two great geniuses will be dumbfounded, and they will not even understand how Ye Xuan disappeared!

Although the virtual transmission carried out by the transmission array can reach a very long distance, once it is unfolded, it is the powerful **** of the fifteenth world, which cannot be captured.

However, Ye Xuan's cosmic coordinate jumping ability does not depend on the transmission matrix, and it looks more like a teleport on the surface.

It is only the star of the tenth world, and the speed of the teleport is far away, and it is impossible to go beyond the scope of the powerful sense of the universe.

What's more, at this moment, this void has once again fallen into the forbidden effect of the space oscillator, and the teleportation and transmission of the starry sky cannot be carried out at all.

Therefore, once Ye Xuan uses the cosmic coordinate jumping ability to leave, this matter will certainly be concerned by a large number of forces and strong people. If Ye Xuan has exposed a kind of means from then on, some people may come up with targeted measures to guard against this. For Ye Xuan, it is not worth the candle.

For this reason, after Ye Xuan hesitated, even if he abandoned this idea, he decided to leave it in a normal way. It is more cost-effective to go. In any case, the ability of Hoshino has been exposed, and it is not too much exposed. .

That's right, he intends to take it easy with the ability of Hoshino!

At this moment, after releasing the mechanical demon state and returning to the shape of a small fortress of 50,000 meters in diameter, the Hoshino is still changing. The strong people around the virtual sky have seen this scene, and they have been sluggish again, all of which have been shocked.

"Card!"

"Card..."

The sound of mechanical operation is still resounding. Under such a wide view, the body shape of Hoshino is rapidly shrinking. The short three interest rate is reduced from the previous 50,000 meters diameter to about 10,000 meters.

Still not stopping, everything is still going on!

In the past, the tens of meters of the Xingye number has been reduced to a kilometer!

This is still not the end. Finally, the three interest rates disappeared, and the diameter of the kilometer was reduced to a hundred meters...

At this point, the Hoshino is almost a solid sphere, and its density has reached a horrible level. The inner space is only ten meters, and Ye Xuan is in the inner core space of the ten-meter circle. .

The small fortress of 50,000 meters in diameter is extremely condensed, and finally becomes a small ball with a diameter of 100 meters and a space of 10 meters inside. The density of this ball can be imagined.

The surface is also covered with a 50-meter-thick meter energy shield.

This is simply a sturdy king of eight shells, Ye Xuan hides inside, at this time suddenly burst into a touch of strong sense of security.

This is not just a feeling. He even started the phagocytic system in the body and started the derivation and calculation. The final result is that the current Hoshino, even if it stops here, does not move, let the fifteenth environment There is a violent bombing of the supreme order.

Can also persist for more than one hour!

In this one hour, Ye Xuan will be no loss!

The reason why the Hoshino No. in this state can no longer provide him with security after an hour is because the energy stored in the interior is exhausted, and the self-propagating group of the world

insects is temporarily extracted from the evil spirits. By supplying energy, it is necessary to consume the innumerable micro-molecules of the energy barrier and the entire world of insect self-propagation.

If this energy supply can keep up with the rate of consumption caused by bombardment, then the time limit of this hour can continue to be extended...

With this result, Ye Xuan was completely relieved.

At this time, the war battals and the old-fashioned ancestors, who were still thousands of miles away, finally reached a thousand miles.

The two old guys are now dumbfounded, and the whole brain is awkward.

What monster is this encounter today?

It used to be a horrible giant mechanical bug, and then changed its shape into a small fortress of 50,000 meters in diameter.

I haven't waited for them to digest what I saw with my own eyes. Then, this small fortress of 50,000 meters in diameter has turned into a 100-meter rolling ball that covers the 50-meter-thick energy shield, just a glance You can know that its protective power must be abnormal.

All of this makes the war and the brooding ancestors feel a little scratched. It's really a ghost. When did the Terran's starship construction ability metamorphosis to such an extent?

The 50,000-meter-diameter small fortress can be turned into a mechanical demon, and the guardian can be reduced to a diameter of 100 meters, and the density of the infinite king of the eight shells, this is simply a dog, unheard of the starry sky black technology!

"Small bastard, do you think that this will be safe and sound, will you be separated?"

Looking at the small sphere of 100-meter diameter in front of you, not only has nowhere to start, but also is rapidly rushing toward the periphery of the area surrounded by a large number of starships. Because of its small size, the effect of the Void Vibrator plays on it. The effect is simply negligible.

At this speed, the 100-meter ball will soon be able to break out and then expand the space for a moment.

The beard of the war was trembled, and the mouth was squashed. Then he turned to the side of the eyebrowless ancestor and looked at it. He said in vain: "Old friend, this king eight shells in a short time. I am afraid that it is impossible to open the door. The old man has a suggestion. With the strength of you and me, the two great men can shoot at the same time, bombard the void, and let it go to the emptiness of the void?"

"So great!"

The eyebrows of the old ancestors did not flash, and then they shot with the war.

"Booming!"

"boom!"

The two great men and sorcerers shot together. In an instant, two giants of energy like a canopy slammed into the air, covering the void of the 100-meter ball.

This scene is too horrible, the heavens and the earth are cracked, and the gloom is angered, and the void is to be shattered...
