

Super D. S 3481

Chapter 3481: Do him!

"The shit's Prince!"

Chanas's reminder not only did not let Ye Xuan really calm down, but made his look even more awkward, and sneered with a grin: "He is a young patriarch who is named after the patriarch's emperor. It's just a gift. Amazing, the patriarch has favored it. If he can be defeated, the patriarch will re-establish a young patriarch, which is allowed inside competition within the celestial family."

"If it doesn't get rid of Laozi's head, it's him who is looking for death. If that's the case, then it's no wonder that Laozi has started to smash it!"

Listening to these words, Chanas was completely dumbfounded, his face brushed paler, his lips were stunned, and he looked at Ye Xuan slyly and asked: "Shasha...Sha Daren, what do you mean by this? Ah? I, I... I don't understand very little!"

"What else can you mean? How arrogant the guy was, how many of you did you see?"

Ye Xuan sneered again, and finally gritted his teeth: "I don't mean anything else, just two words... do him!"

"thump!"

Drying his two words into the ear, Chanas scared his face on the spot green, and his **** fell to the ground, his eyes straight, and he was completely desperate.

The gods want to fight, he does not have the ability to stop at all, this is definitely the rhythm of the fish and the fish, and what is it?

"Booming!"

"Boom..."

It was also at this time that a sudden burst of energy roared in the front of the sky.

Ye Xuan's line of sight was attracted to the past, and it fell on the holographic stereoscopic image screen. The scene that I saw in the eye was the eight big star fortresses, and the kinetic energy was fully open, driving towards the dark side of the evil source. Entering the scene.

In the blink of an eye, all eight large and small Star Fortresses have lost their sights and entered the inner star of the evil.

Ye Xuan did not hesitate, even when he gave the body's phagocytic system a positive response to the system title exploration mission.

In the mind, familiar system prompts sound instantly.

"Hey, congratulations to the host! Successfully open the system title exploration mission! If the exploration is successful, there will be a chance to upgrade the system title!"

"The current title of the system: the fourth level, the Star Trail Blazer!"

"The next level of the system: the fourth level, the interstellar devotee!"

"Star Scavenger: The title's own halo effect, based on the original four-level title Star Trek, Interstellar Adventurer, Interstellar Explorer, Interstellar Trail Blazers, will add a new system capability, random activation At the same time, the number of interstellar coordinates imprinted on any cosmic plane, from the previous one, grows to two!"

"System task exploration completion requirements: find the source of all evil, and swallow, refining!"

"Exploring mission failure penalty: the system title is up and down on the current basis!"

by! If the exploration task fails, it will automatically lower the level 1 system affiliate title.

Wouldn't it be necessary to return directly to the third-level star explorer?

If this is the case, Ye Xuan has just acquired the ability to jump in the plane level coordinates of the plane level in a short time and will be lost in an instant!

Realizing this, Ye Xuan's face was instantly dark, and there was no retreat. This time the system title exploration mission must be completed.

The conditions for completing this system title exploration task seem to be very simple, only one sentence, find the source of all evil, and swallow it, and refining!

It sounds simple, but in fact it is not the case. Ye Xuan thought about it and realized the fact that the difficulty is absolutely small.

The source of all evil here is definitely not the whole source of the evil. If that is the case, Ye Xuan will turn around and go. This is a huge star field, with his current ability, how to refine Turn?

Even the star-class geeks who have surpassed the Qiankun environment have come, and they have no such ability.

Therefore, the source of all evils pointed out by the system should be the real core of this star field. It is not easy to find the core of the evil roots.

What's more, the system also requires Ye Xuan to have swallowed up the system and refining it after finding the target.

Refining and refining may not be too difficult. As long as it is successfully swallowed up by the phagocytic system, it is only a matter of time before refining it.

Even if you find the core of this source of evil, but do you have the ability to swallow it?

This place is the first star of the first universe, and it is called the first danger under the stars. Can it be simple?

As these thoughts flashed from Ye Xuan's mind, his mood was not heavy, but now that everything is too late, there is no retreat at all. The system title exploration mission has been accepted. Ye Xuan's only choice is only Can be rushed forward!

What's more, just a few years ago, the eight large-scale star fortresses led by Emperor Shaofeng all entered the starry sky. Even without this system title exploration mission, Ye Xuan will definitely follow up. If he can't swallow, he must have a good liquidation with the guy.

Although the other party is a small patriarch of the Tianji nationality, and this place is not far from the Tianji City's base camp, it is a voyage of about seven or eight days.

But the source of the evil is the star-level danger of a plane level. After entering this star field, all the wave signals emitted by the super-brain of the starry sky cannot be transmitted. In this case, even if Ye Xuan and Emperor Shaofeng turned face to face and the other side did not escape, and the matter would not be revealed.

Thinking of this, Ye Xuan's face screamed again, sneer and muttered to himself: "How about the patriarch of the Tianji nationality? This time, you are looking for death yourself, provoking provocation, and screaming after the old man's thorns. If you plunged into such a starry sky, even the signal of the star network could not be transmitted. If so, then don't blame Laozi for being hot, this time, you must kill you!"

After that, Ye Xuan directly ignored the desperate expression of Chanas, and urged the electronic consciousness between the moments of action. In a moment, the kinetic energy cabin of the magic warfare roared and turned into a black man, facing one side. Not far from the source of the evil, the star field has plunged in...

"Oh!"

As the magic warfare enters the starry field of the evil, the line of sight is dark, and the light source becomes dim. Although the visibility still exists, it is faint.

At the same time, there was a very harsh sound that broke out in the air. There was a huge void crack in front of the war battle, and it was still moving. The huge void gap was like a black lacquered file. The hull of the War of War is coming across.

This scene is too dangerous, the void crack is simply invincible, if the magic warfare is smashed by this void crack, it is definitely a rhythm that is directly divided into two.

Even if it is a life fortress, under such a heavy blow, don't want to use it again in a short time, it needs to recover for a long time.

Seeing this scene, the cold hair of Ye Xuan's back is erected, and the chasing next to him is the round eyes of the eyes, and the whole person is sluggish...

Chapter 3482: major discovery

"call out!"

When the sound of the air broke, Ye Xuan extended the electronic consciousness for the first time, and manipulated the magic warfare to traverse, and dangerously avoided this huge void crack of more than 10,000 meters.

Not waiting for him to catch his breath, Chanas next to him was sharpened: "Right, right again!"

Ye Xuan immediately turned to the first, just to see a small gap in the right side of the gap.

I didn't even think about it. He once again used the electronic consciousness to push the magic warfare to dodge.

However, just after finishing all this, the scream of desperate Chanas sounded again: "Below, there is another one below, God, what a ghost place..."

In this way, Ye Xuan continued to extend the electronic consciousness, and after more than ten traversing, finally, the magic warfare hovered quietly in a void, no longer need to dodge to avoid the void crack.

Until then, Ye Xuan and Chanas two talents finally pulled out and looked toward the distance of the surrounding void. This hope, the two suddenly opened their mouths, and the look on his face gradually became sluggish.

It is no wonder that when the talent comes in, it has to carry out more than ten emergency avoidances.

Where is this a normal universe of voids, it is simply a ruined bag of riddled holes, the emptiness of the sky is full of numerous void cracks of varying sizes, one or two at every distance.

Moreover, these void cracks are obviously not fixed. I don't know what kind of law is moving slowly. Fortunately, the speed is not fast. Otherwise, this place will become a star-studded place that cannot be stepped into, and surpasses the star-level masters of Qiankun. The geeks are coming, they have to drink hate.

At this time, the magic warfare hovered in the void, seemingly safe, but in fact it is not the case, whether forward or backward, or up and down, will soon encounter other void cracks of varying sizes.

Even if I have been parked here forever, it will not work, because these hollow cracks in the void are slowly moving. The corner of the magic warfare is safe at the moment, but after a long time, there will definitely be some The void crack moved to this...

At that time, if there is no evasion, the only end will be split into two!

"Rely! It's no wonder that the plane is at a dangerous level. This is clearly a place of emptiness. It is like a whole star field. It is covered with void cracks, and it is still moving slowly. This is just a star. A large-scale killing at the domain level, any presence and substance entering it, one accidentally has to be crushed!"

Looking at everything in front of him, even Ye Xuan was shocked and screamed, and the voice was exclaimed, and the chasing on the side of his body was green. The whole face was urging: "Shasha..."

sand Adults, let's just withdraw. This place is not for people at all. If you are not careful, it will be ruined!"

"It is really not a place for people to wait, but since this place is so dangerous, Emperor Shaofeng still rushed in with the fleet, indicating that the benefits are absolutely not small, at least, it is worth taking a chance."

Ye Xuan thought about other things. At this moment, the words in the mouth seemed to respond to Chanas. In fact, he was muttering: "It's strange, they are advanced for a while, why are they all gone? ? A full eight-size fortress, in this environment, it is impossible to speed up, why is it so fast disappearing?"

"Hey!"

Ye Xuan's words just fell, and there was a sudden movement in the far side of the front right side of the sky, which attracted his attention.

A huge knife with a body shape of several thousand meters is squatting, and it passes through two hollow cracks in a smart way. After falling into a corner of a farther space, it crouches for about a few seconds, and then another bouncing again. And start to go forward!

This knife is clearly changed by a small fortress of 50,000 meters in diameter. The body shape can be reduced to such a degree, showing how compact the internal machinery is. This degree of mechanical fusion ability, even Sha Baofeng Can't do it easily.

With his mechanical fusion ability, if it is fully integrated with a small fortress of 50,000 meters in diameter, at most, it can only reduce the mechanical warfare that has changed to about five kilometers.

"It turns out that these guys seem to be prepared, and I have already explored this source of evils many times before. Otherwise, if I come in for the first time, it is absolutely impossible to think of this so quickly. Kind of method."

Ye Xuan stunned, and then immediately realized that the dawn was bright.

Obviously, the huge knife that was just seen close to five kilometers is one of the six 50,000-meter-diameter small fortresses that followed Emperor Shaofeng into the starry field of evil.

The eight large and small fortresses in the opposing fleet, the first time in the rushing into the starry field of the evil, the high-level members of the internal control of the warships immediately launched the mechanical fusion ability, turning the eight-size fortress into eight Different mechanical warheads with different head types.

Then, it spreads out, using the mechanical warfare dexterity to the extreme sharpness and the super-elastic bounce force, while evading the void crack, quickly move forward...

This discovery made Ye Xuan realize once again the extraordinary things hidden in the source of evil.

Because in the Tianji family, it is not the general core high-level that can possess this kind of mechanical fusion ability. Two conditions must be met. One of them must be the patriarch of the patriarch, so that it will be opened to the most powerful. Secret technique.

Second, it must also have a certain talent. Otherwise, even if the patriarch of the patriarch is open to the fascination of this mechanical fusion, if the talent is not good, it will eventually be impossible to grasp.

It can be said that any high-ranking elite who has mastered the mechanical fusion of secrets, even if they are only partially mastered to varying degrees, but their status, in the entire Tianzu family, is absolutely a kind of extraordinary, important class. It is.

At the moment, Emperor Shaofeng took a fleet into the starry field of the evil, and with him, eight star-studded fortresses of different sizes, all of them used this kind of mechanical fusion to advance into the depths of the star.

That means that including the Emperor Shaofeng, the Tianzu people are dispatched this time, but the eight patriarchs with high talents are full of enthusiasm!

Ye Xuan has now completely taken over the memory of Sha Baofeng. With his understanding of the Tianji people, the so-called Shaozu Emperor Shaofeng has absolutely no such ability. At the same time,

he can also invite another seven seniors with mechanical integration ability to help him. Explore together.

Therefore, if there is no accident, their action this time should be the inspiration of the patriarch.

That is to say, the target in the depths of the source of evil is the need of the patriarch of the Tianji nationality!

Realizing this, Ye Xuan sneered again, and the ambiguity of the corner of his mouth was also obvious: "This is really a rare major discovery. Since I was hit by Laozi, if it is not broken, the good thing of the old guy, How can you be willing?"

Chapter 3483: Change

Although Ye Xuan did not know what the patriarch of the Tianzu nationality wanted to do at the end of the day, first of all, he started to look at the black hole of life and searched for the hollow crystal. Now he sent a powerful core team of the heavenly family to enter this source of evil. Domain, search for something deep in the star field.

But since it is a thing that the emperor wants, he must fight for it. The other is the patriarch of the celestial family. What is useful for him?

Moreover, the Tianji clan is the ultimate enemy who eventually needs to be destroyed. It is a good thing for the other party. There is no harm to Ye Xuan.

What's more, here is the source of all evils. What Emperor Shaofeng is looking for is most likely to be the same thing as the source of evil that Ye Xuan's system exploration mission requires. In this case, Ye Xuan has no retreat and choice. Not only must we snatch, but we must also succeed.

Otherwise, the cost of failure is too great, and Ye Xuan can't afford it!

"I have to look at it. You are willing to take the risk of this, and enter the source of the evil, and what you are looking for is exactly what it is."

In the muttering, Ye Xuan does not hesitate any more, because there are already two void cracks of varying sizes that are slowly approaching in the right side of the sky. At most, there will be a few minutes, and will come to the front of the War.

At that time, I was afraid that it would be like the previous one, with a huge and bloated hull, in this imaginary void that ravaged countless voids, screaming and avoiding.

In the first place, he issued an order to the Devil Wars to change to the state of the mechanical monster.

"Card!"

"Card!"

"Card..."

In the next moment, inside and outside the ship of the magic warship, a large piece of crisp and dense noise was suddenly heard at this moment! The click of the card continued to rang, about a minute or so, followed by a sudden big work.

In this process, the whole battleship of the warship has changed inside and outside, and all changes in the ship's body are invisible, but the changes in its external shape are clear, that is, Chanas next to Ye Xuan. You can see the whole process through the holographic stereo screen.

As the long arm of the machine stretched out, the outer shape of the warship's ship changed rapidly, and the time before and after the ten breaths was completely changed. It was no longer a small fortress. Turn into a huge mechanical monster!

This huge mechanical warfare has both the sharp and sharp horror of the mosquito, the sharp arm of the knife, and the long legs of the spider that are full of thorny barbs, and the scorpion is like a pair of scissors. The huge iris, even on the back of the ridge, has a pair of huge wings like a light, but it is not used to fly, but to play the role of energy shield, wings can be used to protect the entire body of mechanical warfare body of.

At this point, these two huge lights become a complete circular energy defensive hood, covering the entire body of the mechanical worm!

The size of the frigate's hull was originally 50,000 meters, but now it is necessary to carry out the action in such a star field full of void cracks. Naturally, the smaller the better!

Therefore, under the guidance of Ye Xuan, the whole world of insects has been operating innumerable micromolecules from the derivatives. There is no change in the whole ship and the inside and outside. The 50,000-meter-diameter ship is reflected in the mechanical monster that has changed. The overall size is only a few kilometers, it is simply condensed to the extreme.

Even the high-level mechanical fusion of the top of the Tianji ethnic group that Ye Xuan Shicai saw, the mechanical warfare formed, its body size is about five kilometers, from this point of view, to the mechanical fusion ability, the other party obviously Far less than Ye Xuan, of course, Ye Xuan does not have this ability. Everything is done by the Xingye Life Fortress. As a living star fortress, this ability, the mechanical tribe is stronger, and there is no way. The Hoshino is quite beautiful!

"God, the small fortress of 50,000 meters in diameter, turned into a mechanical magic insect only a kilometer in the blink of an eye... Is this the ultimate mysterious mechanical fusion ability of the Tianji people? Sha Daren, you are really amazing. It!"

On the side, Chanas, who saw this happening, had already been shocked. Until the transformation of the War Warrior was completed, he made a loud voice, and the color of his face was obviously eased.

At least, after the previous 50,000-meter diameter has been reduced to the current length of about 1,000 meters, the chance of the mechanical monster being inadvertently hit by the void crack has definitely dropped indefinitely, no need to worry about the danger of life, this old guy Naturally relaxed.

With the transformation of the Devil Warfare, the original 50,000-meter-diameter hull was condensed to only one kilometer, so it was left to the room of Ye Xuan and Chanas, and naturally it was infinitely reduced.

The top-level command module of the original Devil Wars is a huge space that is wide to the end of the invisible. Because the space folding technology is used internally, all the points and details of this

technology are listed in the data repository of the phagocytic system. The world insects can also realize the space folding inside the hull like the self-derivative group.

But now, the space they are in is only about 10,000 meters in diameter, which is the result of using space folding technology, otherwise it is estimated that there is a diameter of 100 meters is not bad!

"Inspected the leader, sitting steady, the other party has gone, we must catch up, it will start soon..."

After the magic warfare completed the mechanical transformation, Ye Xuan even greeted Chanas, who turned to the side, and then did not hesitate to reach the command of full speed.

"Hey!"

In the next moment, the mechanical magic worm suddenly slammed and bounced, and the blink of an eye was close to the front kilometer. In the whole process, it was completely in a state of a meandering curve, like a meteor, generally crossed the void, avoiding at least on the way. After hundreds of large and small void cracks, the whole process is almost at the extreme, and even Ye Xuan is amazed.

The huge hull of 50,000 meters in diameter, after shrinking to only about a kilometer now, the mechanical magic insects, whether they are jumping or sensitive, have improved too much, in this blink of an eye, the speed of crossing a thousand miles. Although it is still far from being able to compare with the state of the 50,000-meter-diameter small fortress at full speed, it is also extremely impressive in this harsh environment.

At least, the knives of the celestial machine that Ye Xuan saw before, after a sneak peek out of more than a hundred emptiness, still need to lie in the stagnation time, in order to start the second hopping again.

In comparison, the mechanical devil is a thousand miles away, and there are no pauses in the way to avoid hundreds of hollow cracks of different sizes. This is not a level of ability...

"God, this is too horrible, Shasha... Sha Daren, can we be a little slower? This is a emptiness of a lot of cracks!"

Beside him, Chanas was already scared, and his face turned green again, stuttering toward Ye Xuan, and his knees were slightly trembled.

At this moment, he finally began to regret it. As long as he knew this, he would not end up with this sand man, and stay in the magic war star to enjoy peace, how good...

Chapter 3484: a black bug

In the star field of the evil, the peripheral area is close to the void in the buffer zone of the hinterland of the star.

"Hey!"

"Hey!"

"Hey!"

After a series of broken sounds, you can see a few huge figures, jumping up in different directions, dexterously avoiding the gaps in front of the big and small, and the blink of an eye will move one after another. The group has advanced forward hundreds of miles.

In total, there are eight figures, which are the mechanical warfare changed by the eight small fortresses and big fortresses of the Tianji people!

Eight figures are big and seven small, the big mechanical war worm, the body is about seven kilometers, which is obviously changed by a 100,000-meter-diameter large fortress in the eight large and small fortresses.

The other seven mechanical warfare insects are all about 5,000 kilometers. Among them, six mechanical war insects are changed by six small fortresses with a diameter of five kilometers. For the other one, it is by Emperor Shaofeng and The 100,000-meter-diameter large fortress under the seat was transformed into a mechanical fusion.

After the 100,000-meter-diameter big fortress and the mechanical fusion capability are fully integrated, the changed mechanical warfare can reach a minimum of five kilometers, and the other six small fortresses generally have the same degree. You can see the talent of Emperor Shaofeng.

It is also the ability to use mechanical integration, but his level of comprehension in this ability clearly exceeds the other seven.

This point, Emperor Shaofeng has always been proud of it!

Because in the whole celestial family, the younger generation of patriarchs can do this, and integrate with the 100,000-meter-diameter big fortress, and finally control the changed mechanical warfare body to about 5,000 meters. He is alone.

If it is a small fortress of 50,000 meters in diameter that is mechanically integrated with him, then Emperor Shaofeng can even control the body shape of the changed mechanical warfare to about 2,500 meters!

"Hey!"

It was also at this time that a sharp and unpredictable sound of breaking through came from behind, and then there was a black, like a meteor-like ray of light, crossing the fan-shaped camp area formed by eight mechanical warfare. Straight through, it was a dexterous to shocking figure that continuously avoided twenty or thirty void cracks, and the blink of an eye stopped in the void hundreds of miles ahead.

It is also a mechanical war worm, but the shape is strange, not seen before.

And more crucially, the body length of this mechanical war insect is only about a kilometer!

After the mechanical fusion of Emperor Shaofeng, the changed mechanical warfare can also be reduced to a size of about a kilometer, but it must be combined with the 10,000-meter-diameter fortress.

However, in this case, the performance in attack and defense will drop too much. The kinetic energy of the Wanmi Fortress can be compared with the small fortress of 50,000 meters in diameter and the fortress of 100,000 meters in diameter.

If it is really necessary to expand the mechanical reinforcement with a 10,000-meter-diameter fortress, the mechanical warfare that eventually changes will be only about a kilometer. In this dangerous zone filled with voids everywhere, it is more flexible to avoid the slow-moving void crack. .

But in that case, there are various deficiencies in other aspects. Needless to say, the bounce force is far from satisfactory. If other dangers are encountered, most of them will fall.

Therefore, the eight people of Emperor Shaofeng started this action. The car that was chosen to expand the mechanical integration was the smallest fortress with a diameter of 50,000 meters.

Even in order to ensure that in the event of other dangers, the combat power will not become a short board for elbow, they also specially prepared two large fortresses with a diameter of 100,000 meters.

In the two 100,000-meter-diameter large fortresses, the size of the head is about seven kilometers. It is only the one that is integrated with the emperor's peak. Although it looks like it, it and the other six seats. There is no difference in the mechanical warfare of small fortress changes. They are all five-kilometres, but if you really want to fight, you can definitely pick one!

Its bounce, attack and defense are far less than the other six mechanical warriors of the same size.

After all, the difference is that the mechanical warfare of 50,000 meters of small fortress changes, and the mechanical warfare changed by the 100,000-meter small fortress, even if it is the same size, how can it be compared?

For this reason, after suddenly seeing a strange mechanical warfare with a body shape of only about a kilometer in front, the top leaders of the eight celestial groups such as Emperor Shaofeng did not go to the heart initially. The first thought was Which one did not know the dead, got a big fortress, and maybe even a small fortress with a diameter of five kilometers. After the mechanical fusion ability, it reached the source of the evil.

Moreover, the possibility of the latter is even greater. After all, even the talented genius of Emperor Shaofeng, who is highly talented and fused with the 10,000-meter-diameter bastion, can only change the mechanical warfare that can be changed. The size of the kilometer is only.

If it is the top level of other celestial beings, unless it is the older generation of the family, otherwise, in the younger generation, after the fusion of mechanical warfare is only one kilometer, the one he chooses to merge must be a small fortress of five kilometers in diameter!

Then it is even more dead. You must know that this source of evil is not only a large number of scattered and slowly moving void cracks.

The void crack only exists in the peripheral area, and the front is already the buffer zone of the periphery and the hinterland.

In the buffer zone of millions of miles away, there are many powerful terrorists. After breaking through the buffer zone, there will be even more terrifying murderous beasts, neither the former nor the latter. A mechanical warp that has been transformed from a small five-meter-diameter fortress can cope with it.

It is a mechanical warfare that changes in the 10,000-meter-diameter fortress, and there is no vitality!

As a young patriarch, it is natural for this blundering guy to be reminded. After all, in the celestial family, the ability to be open to mechanical integration, whether it is the older generation's strongman or the younger generation's celestial ethnic group, It must be the patriarch of the patriarch.

That is to say, the other party must be his own person. I really want to die here. For Emperor Shaofeng, it is also a kind of loss. However, he always regards himself as the future patriarch of the future. The patriarch of the present is confident. Is his future man?

As soon as I read this, Emperor Shaofeng immediately wanted to make a sound reminder.

At this time, his brain suddenly flashed a fascinating light, and he remembered the scene in the void behind the other side, such as a meteor.

Also, he passed through the center of his eight-headed mechanical warfare, and when he blinked to the front of the sky hundreds of miles away, the dexterous action of evading twenty or thirty virtual cracks in the whole process was simply called a flowing stream. Even Emperor Shaofeng can't do it himself.

As soon as I read this, Emperor Shaofeng's heart suddenly stunned, and a possibility suddenly thought of in his mind made him whole bad...

Chapter 3485: It is this young master.

The one that was parked in the void in front of the sky was dark and the body was weird. The mechanical warfare, which was only about a kilometer in length, made the Emperor Shaofeng not good.

Because he suddenly thought of a possibility, although in his opinion, it was like a night and night, completely impossible.

For now, this kind of guess is the possibility of fact, at least 80%!

The dexterity exhibited by this black mechanical war worm can also be explained by experience, but the speed is only affected by the basic performance of the warship. That is to say, the mechanical warfare that is only a kilometer in front is definitely not The change of the small five-meter-diameter fortress is at least a small fortress of 50,000 meters in diameter.

In the younger generation of the Tianji nationality, there is no such terrorist figure at all. Even the emperor Shaofeng, who is known as the first talent of the younger generation, has mechanically merged with the small fortress of 50,000 meters in diameter. The worm, its size, is also about 2,500 meters, much more than the other.

Among the elites of the older generation, there are several great powers. After mechanical integration with the small fortress of 50,000 meters in diameter, the mechanical warfare that has changed can reach a kilometer or so.

But those great emperors and emperors are familiar and even know what they are doing now.

Most of them have been closed for many years, and only two of them have been active for a hundred years. Among them, one of them was sent by the patriarch, to explore an unknown space plane.

The other one, who is sitting in the base camp of the Tianji nationality, is absolutely impossible to appear here.

That is to say, the front of this suspected mechanical fusion with a small fortress of 50,000 meters in diameter, and finally the body of the changed mechanical warfare is controlled to a person of about a kilometer. It is absolutely impossible for the several people he knows. The older generation is capable.

In addition, the dark color of the hull is exactly the same as that of Emperor Shaofeng's small fortress, which was encountered before entering the star of the evil. This made him subconsciously associate.

The guy who is mechanically integrated in the opposite kilometer war insects...will not be Sha Baofeng?

If it's the firewood, it's really a ruin. In the case of Emperor Shaofeng, it's just like a blue sky!

If Sha Baofeng is mechanically integrated with a small fortress of 50,000 meters in diameter, the mechanical warfare that has finally changed can be reduced to only about a kilometer, so what is the horror of his mechanical fusion capability? What?

This level of breakthrough is simply unbelievable, and Emperor Shaofeng did not even dare to think about it. Even now, under his full force, he condensed to a maximum of 2,500 meters.

Previously, the limit of Sha Baofeng was 10,000 meters, and suddenly it jumped to such a degree. How amazing is this guy's breakthrough.

This may even affect his position as a young patriarch. After all, the patriarch's emperor is only interested in talent. Don't look at the emperor's patriarch, but he and the patriarch's emperor have nothing at all. In the blood relationship, in the dictionary of the Tianji nationality, there is no such thing as a blood relationship.

Therefore, the young patriarchs simply want to stand up and want to withdraw.

It is for this reason that Emperor Shaofeng has been working hard. He must guarantee his own growth rate. At the very least, he must not surpass the younger generation of his peers.

Before that, he did, and did a very good job. One person suppressed everyone else in the young generation of the entire Tianzu.

Today, the sudden emergence of Sha Baofeng is such a metamorphosis, and the comprehension test in the ultimate mechanical fusion of the Tianji nationality, the fact that the geometric level is soaring, this fact makes him unacceptable!

"Impossible, I don't believe it, it can't be you..."

Because the heart was too shocked, the inside of the mechanical warfare that was formed after the mechanical fusion of Emperor Shaofeng and the big fortress under the seat was at this moment, his subconscious voice was whispering, with trembling meaning. There is also a line of fear and madness.

The sound is not small, spread in a large piece of emptiness, whether it is Ye Xuan or the seven high-level people in the other seven mechanical war worms, all clearly heard.

In the next moment, hundreds of miles ahead, a lazy voice came over. It was Ye Xuan's response to Emperor Shaofeng's muttering: "Sorry, I'm afraid I'm going to let you down, guess. It's all right, isn't it this grandfather?"

"Hey, what is impossible? If you don't believe it, it won't happen? It's really speechless. The celestial celestial family and the patriarchs are not connected with the courage of reality. If the matter is spread out, don't know the three universes." In the plane, how many big stars of the starry sky are going to laugh!"

"what....."

"This is impossible, it is impossible!"

"what....."

As Ye Xuan's words came out, the speculation of Emperor Shaofeng's heart was finally confirmed, which made him feel desperate, too unwilling, emotionally excited, completely plunged into the violent, mechanical warfare body. There was a crazy roar.

Four other mechanical warriors remained silent, because their hearts were equally shocked. As the core of the core of the Tianji ethnic group, who also mastered the mechanical fusion ability, they naturally knew that after a fusion with a small fortress of 50,000 meters in diameter, It is difficult to control the mechanical warfare that has changed from a small fortress to a kilometer or so.

Even among the strongest of the older generations of the Tianji family, only only ten powerful ones can do it, and that is the same as the existence of the star-class eccentrics of the Wanluo Federation.

Now, a younger generation of the same celestial beings, like them, is actually at the level of mechanical integration, and possesses this kind of horrible comprehension. What a horrible gift, can it be a star owner that transcends the hustle and bustle? The level of old monsters is comparable, and this alone is enough to shock all the celestial people!

"Sha Bao Feng, you are simply not in the right place, actually dare to call this uncle in front of the young patriarch!"

After a violent thunder, the heart of Emperor Shaofeng immediately rushed out with a strong killing. The horrible mechanical fusion ability of Ye Xuan's enthusiasm for enlightenment talent really made him afraid.

If you let it go back to the base camp, then there is no doubt that after a long time, the aura of Emperor Shaofeng's head will surely be taken away. In the end, even the position of the patriarch who he has stabilized will eventually be easy. The Lord, since then, has been devastated and has become the laughing stock of all the tribes of the entire Tianji nationality.

Instead of doing this, it is better to fight now, and to slay the genius of Sha Baofeng, who was just born out of the sky, in the cradle.

Anyway, here is the source of the evil, the signal of the interstellar network can not be transmitted at all, even if you do too much, the other side also has no way to ask for help.

What's more, he was so arrogant that he gave the handle to himself.

As soon as I read this, the voice of Emperor Shaofeng was instantly smashed...

Chapter 3486:

"Sha Bao Feng, you are simply not in the right place, actually dare to call this uncle in front of the young patriarch!"

With the heart sprouting, the voice of the words of Emperor Shaofeng from the mechanical warfare of the five-kilometer body has become extremely smashed, revealing the meaning of deep cold: "This is clearly a contempt and insult to the patriarchs. The young patriarchs must not sit idly by and ignore you today!"

Speaking of this, the mechanical warfare's body suddenly came with the sound of mechanical smashing of the card, the insects of the huge war worms turned, and ordered the other seven mechanical war worms on both sides of the body. "A few of you listened, this guy is disrespectful to the patriarch. Now I am ordered as a patriarch, and everyone will immediately join forces to encircle them, regardless of life and death, and kill Sha Baofeng on the spot!"

"boom!"

As soon as the voice fell, the mechanical warfare that changed by Emperor Shaofeng suddenly shocked and suddenly stood up. Then, with a huge roar, a two-kilometer-diameter black dead light gun energy beam From the belly of the war worm, it rushed directly to the mechanical moth in the void in front of hundreds of miles.

The recharge of the antimatter energy dead light cannon takes a certain time, and it takes about a minute to shorten it. Now the words of Emperor Shaofeng have just fallen, and the energy light column of this dead light cannon has been shot, indicating that it has already been The beginning of energy storage, if there is no accident, it should be the moment when his mind gave birth to speculation.

The city is too deep, and the style of acting is too harsh, and my heart has just become suspicious of the identity of the black mechanical monster in front, even if the charge of the dead light cannon is started...

Realizing this, the other seven mechanical warfare in the emptiness of the sky could not help but look at the side of the Emperor Shaofeng. Apparently, there was a shocking vigilance in the heart.

Even so, the seven mechanical war worms are still moving, because Emperor Shaofeng has stunned Ye Xuan's disrespect for the patriarch's emperor. This point, they can't ignore it, otherwise they will pass on to the patriarch's emperor. In the end, they are also extremely disadvantageous and will fall into a passive position.

What's more, Sha Baofeng is not dead, and it is not good for them. Instead, it is better to take advantage of this opportunity to sell a small patriarch, Emperor Shaofeng, a person, and how much can be recovered.

After all, the Emperor Shaofeng is considered to be too irony. He wants to kill a top genius who has just emerged and is still growing up in the future. In order to avoid leaking things, he has to pay a little price to seal it. of.

Thinking of this, the seven top-ranking high-ranking people who had mechanical integration in the seven mechanical warfare had a decision. The seven large war worms were almost simultaneously plucked out, from different directions, toward the front. The black mechanical beetles in the void outside the area were killed.

They will also be able to recharge the antimatter dead light cannon in the future, and now they can only sneak away and launch a melee fight.

Even so, in the case of a seven-to-one situation, it is absolutely enough to suppress Shabaofeng.

What's more, the young patriarch, Emperor Shaofeng, did not stand by and watched. He also joined the battle circle. The black anti-matter dead light gun energy beam in the muzzle of the mechanical warfare was just whizzing out, the five-kilometer body-shaped machinery. The battle insects have already plucked out and went to the black mechanical moth in front of the void.

Eight to one, this is clearly the rhythm that wants to kill Sha Baofeng!

"Let's go together? This is just the right time, save your grandfather one by one to pack up your time wasted! Today, this uncle will be a pair of eight, one singled out your group!"

Seeing that the eight-headed mechanical war worms rushed over at the same time, they were fanned out in the void in the back, and even a two-kilometer-diameter black antimatter dead light gun energy beam was launched in front of it. It's ridiculous, and the black mechanical devil in the length of a kilometer is full of laughter.

Even the words of a group of eight, one heads-up each other, are frankly stated.

Then, the black mechanical machine's body surface was turned into a spherical shape, and the energy of the whole body was shrouded. From the bottom of the abdomen, it was a sharp point, giving up the defense and directly changing to the back of the mechanical moth. A pair of small, light, abrupt...

"Hey!"

A whistling sound like a vacant whistle sounded, and the void of the black mechanical worm seemed to sway a circle of emptiness.

Then, the body of the black magic bug, about a kilometer or so, is like a shell of a smashing bullet. The blink of an eye has entered the state of extreme volley from stillness, and even made more than ten fine-tuning fluctuations along the way, because the way In front of it, there are just a few dozen cracks of varying sizes that have become obstacles.

However, with the more than ten times of fine-tuning and dynamic fluctuations, it seems that the black mechanical moths like the artillery shells have crossed the hundreds of miles of voids in the short time. Emperor Shaofeng merged with the mechanical warfare that changed from the car.

Then, there was no pause at all, and the shape of the black mechanical monster once again changed from extreme speed to static, and the mechanical giant hammer behind the tail like a tail, with a slap in the chain, and a card. The sound of mechanical movements, suddenly shot down...

"boom!"

"Booming..."

A huge roar sounded, and the five-kilometer long mechanical warrior ridge on the lower side collapsed a large piece, close to the root of the right main arm, which directly affected the cockroach. The flexible operation of the arm was originally brought to the top of the mechanical magic insects, but at the moment it was a stagnation in the middle.

Then, in the mechanical warfare, there was a tragic sound of Emperor Shaofeng as a pig.

"Hey..."

"Sha Baofeng, do you dare to hurt the patriarch?"

"Hey..."

After roaring, Emperor Shaofeng screamed again and again. The reason is that it is so painful that it is too painful to bear. Although it is painful to say a few words, it is at least a kind of venting. If you do, it is estimated that people are going crazy.

It is also very likely that it will be forced to fall directly from the state of this mechanical fusion capability.

Although the Tianji people are not flesh-and-blood life, they have always followed the example of human beings. This may be a psychological crux, so that many people of the Tianzu nationality and even the taste buds of human tastes of food have tried their best to transform themselves.

Not to mention the pain, touch, etc. of the flesh.

What's more, the current Emperor Shaofeng is a mechanical warfare with a five-kilometer body length, which is based on the electronic consciousness that represents the root of its existence and the fortress.

The equivalent of a human monk is a fusion of the gods and the warriors.

In this case, once the mechanical warfare is damaged, Emperor Shaofeng is definitely feeling the body. At this moment, the back of the war worm is pulled out by a smashing hammer from the tail of the Ye Xuan mechanical worm. The intensity of the peak electronic consciousness is so strong that it is conceivable...

Chapter 3487: It's you

"Hey..."

"Sha Baofeng, do you dare to hurt the patriarch?"

Under the great pain, Emperor Shaofeng screamed, and the whole person was mad, and he was simply angry.

In the next moment, the other seven mechanical warriors on both sides of the figure suddenly stumbled and turned around.

Unfortunately, although their movements are quick and fast, the shape of the black mechanical devil that Ye Xuan's life fortress has made is really too small, only about a kilometer, a few laps smaller than them.

However, the foundation of the people is not weak. It is also a small fortress with a diameter of 50,000 meters. It is only a little weaker than the 100,000-meter-high fortress of Emperor Shaofeng and another high-ranking elite.

This kind of connotation is extremely condensed in such a slim body, directly letting the black mechanical magic insect's bounce and spiritual sharpness to the extreme.

For the eight-headed mechanical warfare of Emperor Shaofeng and other opponents, Ye Xuan's mechanical magic insects and the body of terror bounce and sensitivity are just like the Nether, they simply can't touch the shadow.

"Booming!"

"boom!"

The seven-headed mechanical warfare flocked at the same time. On the surface, it seems that the mechanical war insects of Emperor Shaofeng and the mechanical magic insects of Ye Xuan were surrounded, but in fact, this kind of envelopment has no meaning at all.

Just before the seven mechanical war worms waved a sickle or a hammer to the black mechanical moth, the black stalk suddenly flashed, and the body was dexterous to the almost abnormal mechanical monster. It was suddenly slammed and smashed from the huge slashing knives that ran across the two sides, and arbitrarily rushed out of the encirclement.

At the same time, the seven-headed mechanical war insects also immediately took over the move, but unfortunately one of the guy's hammers could not control it, and directly slammed into the mechanical warfare that the Emperor Shaofeng merged. Head on the melon.

A huge roar came out instantly!

This blow was awkward, and directly on the back of the head of the mechanical warfare that was integrated by Emperor Shaofeng, a large electric spark was born!

So, in the next moment, the horrible sound of a three-pointer than killing a pig, it will be heard again without any suspense, resounding through the vast void, with echo, for a long time.

"Hey..."

In the face of all this, at the moment, the other seven mechanical war insects around the Emperor Shaofeng were suddenly sluggish, and the huge body was directly petrified in the void.

They are all young geniuses who master the mechanical fusion of the Celestials. They naturally know what it means to be attacked by mechanical warfare after integration.

Although this hammer was squatting on the head of the mechanical war worm, it actually did not differ from the shackles on the head of Emperor Shaofeng.

That large piece of sparkling electric spark is clearly equivalent to a large blood flower splashing on the brain behind Emperor Shaofeng.

This shows how painful this hit is, how terrible!

The seven guys all shuddered and shuddered. The celestial celestial family and the patriarchs were directly smashed into the brain and splashed with a large **** rain. This was a terrible thing. It's hard to imagine the heart of Emperor Shaofeng at the moment. Angrily grievances.

The key is that my own people have lost their hands, this is a trouble... It's estimated that the dog's day is not sad!

"Less... little patriarch, I, I... I didn't mean it. That kid is too fast... too fast!"

The guy who shot the hammer was already scared. At this moment, the mechanical warfare that he had merged into, the stuttering voice came out, and he quickly explained to Emperor Shaofeng.

I didn't wait for the emperor's screaming, and I'm still talking about it. Not far from the emptiness, Ye Xuan's yin and yang's snarling voice has been passed away: "You guy, what can be explained, 揍I'm so embarrassed, dare not do what?"

"The celestial celestial family, the patriarch of the celestial family, smashed into one or two. If you don't know, you think you are killing the pig. Don't say it is you, even if the uncle is angry, he wants to give him another two." !"

"This kind of miscellaneous goods, what is the blasphemy is him, brother, how to call it? You are a big man, look back and cooperate again, catch the opportunity and give him two more..."

"puff!"

As soon as I heard this discourse, the young high-ranking seniors who were still explaining it, I wanted to spurt on the spot, even though it was mechanically integrated with the driver's fortress, it changed into a huge mechanical war worm, spurting blood. It was not sprayed, but the body of the mechanical warfare was clearly squirming like a spurt.

Then, the guy's screaming resounding voice came out: "I rely on you! You are the surname of Sha, don't you say it well? What a big heart? What kills the pig? Who listens to the fire? I am... ..I just said that I was not careful, I just confiscated my hand!"

"The right pair is the confiscation of the hand, and the little patriarch who believes in the back of you is not convinced, anyway, the uncle is a letter."

Ye Xuan once again ridiculed, and all of them laughed out loudly: "Big brother, I still remember this for a while, remember, no matter who you are, you will die in one breath, but you will confiscated your hand... The same is true for brothers. Whenever there is a confiscation of the hand, this excuse is not overwhelming, and you don't have to worry about the same!"

"I, I, I... lie!"

It was so blocked by Ye Xuan that the guy was even more convinced. I finally slammed it up for a long time, and it was completely close to the rhythm of madness.

"Idiot, still telling him what to do? Going around and killing the young patriarchs alive..."

Didn't wait for the guy who was mad by Ye Xuan to fall, and finally stopped the miserable Emperor Shaofeng and screamed, and the body shape suddenly jumped up, the handle on the left was still very flexible. The huge sickle is lifted up high, and I want to come to a mountain top, and the mechanical magic insects are two and a half from the top.

Unfortunately, at this time, before the slashing heavy hammer, a guy who squatted on the head of the mechanical magic insect on Emperor Shaofeng, at this moment, it just happened to shake the handle of the tail of the war worm again. hammer.

This guy was originally listening to Emperor Shaofeng's reprimand, as the dream awake, thinking that the best explanation is to redeem the crime and use action to prove himself. So, he wants to incite the end of the war insect. The huge thorny chain of the giant hammer, the black mechanical magic insect where Ye Xuan is located is heavily wounded.

The sound of his words in his mouth was revealed: "The patriarch, you look, I use action to prove myself..."

"Hey!"

"Booming..."

"Hey..."

The voice is still not falling, a huge sound of the sound has already come out, followed by a large explosion, and a sparkling electric spark, the thorn that picked up from the tail of this guy. In the process of instigation, the heavy hammer was accidentally squatting on the back of the head of the mechanical war insects of Emperor Shaofeng, and the body that had just bounced up was awkward. This risk has fallen from the void.

More fierce screams, suddenly come back...

Chapter 3488: Poisonous in the mouth

"Dry beautiful! Brother, you have successfully proved yourself with action!"

At this end, the more horrible sound of Emperor Shaofeng is still ringing, and the other seven mechanical warriors, including the guy who is poisoned, all fell into petrochemicals.

At that end, Ye Xuan clearly with the voice of the schadenfreude that almost smiled, but it has been passed away again: "But you can't be too honest, brother, remember, no matter what, this time I still have to bite and let go. Whenever and wherever, I have an explanation, not intentional, so as not to bother to know that..."

"I, I... I didn't mean it!"

When Ye Xuan's words were just finished, the body of the poisonous hand's mechanical warfare, a voice with obvious indignation, was heard.

However, this time only explained one sentence and then stopped. It must have been that this guy himself felt too much to lose, not counting for two consecutive times, and it seems that he has been cooperating with the **** Shabaofeng opposite, which is simply It's the yellow mud, and it's not awkward.

With this in mind, the young high-ranking elite is simply mad, and the snarling roar is coming from the body of the mechanical war insect: "Ah..."

"Sha Bao Feng, you kill a thousand knives, your broken mouth is poisonous!"

"what....."

"Rely! Brother, this is you are not kind..."

Without waiting for his hateful roar, Ye Xuan's ridiculous words came again: "Is not all taught you, is it not intentional to bite a bite? You are stupid, push the reason To this uncle, this is not reliable. Even if this uncle is really poisonous, can you not do it in your mind? What do you do, telling you that you are sincere, mentally retarded?"

The implication is that this is clearly the opposite of the tragic guy, it is deliberately embarrassing, although it is said by Ye Xuan, but it is deliberate.

"what....."

"I don't want to live! Sha Baofeng, I want to kill you..."

This time the other party was completely mad, roaring like thunder, and the hammer of the handle behind the mechanical warrior was shaken again.

"There are few patriarchs, be careful, this kid is ready to go black, don't be the third, or you will become a concussion..."

"In addition, the kid who is under the black hand, you brother is not kind, so filthy this uncle, isn't it afraid that the next hammer will directly hit your own head?"

"Oh, you really have to get it, you should be deserved, isn't it something..."

Just as the mechanical warrior swayed the huge spur hammer behind the tail and bounced toward the void where the mechanical monster was, Ye Xuan's ridiculous words came out again, but this time it was against Judah. The Emperor Shaofeng, who was still savage and tragic, said that he finally lost a few words to the guy who had been black and white twice.

It is said that the emperor Shaofeng is not aware of this because he has even smashed three notes. The latter two are still the same companions who have been poisoned by less than a minute.

Or because the latter two are all on the head, and really shocked his electronic consciousness to the effect of a concussion.

At the moment, after hearing the words of Ye Xuan's ridiculous words, he immediately stopped the screaming voice before, and then he screamed and warned: "Que, if your kid really dare to come again, look back. The young patriarchs will not kill you, and will not be a man!"

The implication is that this is more or less a little bit of a letter to Ye Xuan's teasing, and began to suspect that the young Tiandi, who is called Qu He, is in the midst of a secret opportunity to retaliate against him.

This is really an unexpected joy, even Ye Xuan did not expect that there would be such an effect, he just sneaked a few words, but did not expect to actually succeed in causing a discordant crack inside the opponent's camp.

Among the other seven mechanical war insects, the six guys who had nothing to do with the incident were obviously shocked. It was clearly because of the words of Emperor Shaofeng that they were slightly affected. At least, the wariness was even heavier.

The mechanical warfare that killed the Emperor Shaofeng twice after the poisoning of the hand, the reaction was obviously stronger.

The figure was just bouncing, and the huge barbed alloy weight with a long chain attached to the tail was also waving. The body shape that was ready to bounce was close to Ye Xuan, and immediately blasted out. To hit each other.

At this moment, with Emperor Shaofeng clearly moving the suspicion of the sound of warning to the ears, this guy was shocked, and the bouncing body shape suddenly stagnate in the void, completely panic.

Unfortunately, although his figure was stopped in the void, he paused, but the huge alloy spur hammer behind the mechanical monster was still in a rapid rotation, this kind of turbulence There is a strong centrifugal force that stops without the stagnation of the huge body of the mechanical moth that is connected with the chain.

Then, the huge spur hammer in the rapid movement, under the violent centrifugal force, and another great force from the forward bounce of the mechanical warfare body, it slammed The cellar is on the back of the machine warrior's own...

"Booming!"

"Oh la la..."

"Hey..."

The original was originally sent with hate, and the power was pushed to the limit. So close to the back of the guy's head, a huge roaring explosion was heard, and then it was a comparison with the previous emperor. After the Shaofeng brain, the more sparkling electric spark appeared for a long time.

In the end, it was just a fierce and horrible sound that was almost the same as that of Emperor Shaofeng.

This guy actually got the last words of Ye Xuan, as if he had been cursed, and he really took this huge hammer from his own head and went to the back of his head.

Such a scene is too strange, in the distant sky, the horrible sounds of Emperor Shaofeng's mouth, but the huge mechanical warrior body is suspended in the void, and instantly thundered.

As for the other six mechanical war insects with no heads, the body shape is once again in shock. After a full amount of interest, one of the mechanical warfare bodies has a haunted self. Voice of the voice: "Really... really upset? This is... this kid is really poisonous!"

In fact, such a result is not even expected by Ye Xuan.

At this moment, in the small black mechanical moth in the central space of the body, Ye Xuan, who was originally looking at the holographic stereo screen in front of him, the boss of the eyes, the light is straight, and the mouth is slightly open, obviously It is also not light by the thunder.

As for the demon emperor under his body, Chanas, the expression on his face was even more exaggerated. Finally, he subconsciously turned his head and looked at Ye Xuan's mouth. He suddenly remembered what he had said to himself before, and went to Tianji City. The opportunity will definitely come.

Suddenly, Chanas stunned and the whole person was not good...

Chapter 3489: First

"Booming!"

"Oh la la..."

"Hey..."

Qu and this hit with hate, the power rushed to the limit, so close to the back of his head, a huge roaring explosion came, and then it was a scorching Electric sparks appeared.

The fierce and horrible sound resounded through the whole piece of the void, and after his body suddenly collapsed, he was temporarily out of control and fell to the bottom of the void.

Seeing this scene, Ye Xuan's smashing brilliance flashed through, even when he gave a command of sniper to the life fortress.

At this time, the other seven mechanical war worms, including Emperor Shaofeng, are still in a sluggish state. It is a wonderful opportunity to take the opportunity to take the lead.

"call out!"

Unsuccessful and savage, the tragic sound of the tragic, black small mechanical moth has already made a bouncing, the whole body is turned into a black streamer, with a broken voice across the void, blink of an eye Has reached the top of the song and the body shape.

"call out!"

"Oh la la..."

The next moment, the mechanical devil shot.

It is not the use of the Shanwei Hammer behind him, nor the use of the four tubes to reduce the number of times of dead light cannons, but to directly wave the pair of energy lights on the back, the machine that changes to the music and the fusion car. The neck of the worm fell.

There was a large electric spark that was flashing at the moment. At this moment, it was smashed by the energy of the mechanical magic insects. In a moment, the sparks were blazing, and the short half-spots were not enough. The head of the mechanical war insects was directly exposed by energy. Fallen.

At this point, Qu He's fierce and horrible voice also came to an abrupt end.

"Booming!"

"Karma card..."

The body of the mechanical warp that lost its head suddenly made a huge roar, and a large number of mechanically-running sounds came out, dense and deafening.

In the blink of an eye, the body of a mechanical warp that was only about 5,000 meters long turned into a large, irregular shape with an irregular sphere of about 30,000 to 4,000 meters.

The head of the mechanical war worm, which is only a few hundred meters away, has not changed.

This is because the main body of the electronic consciousness of Qu He is in the head of this mechanical war insect. Because Ye Xuan motivated the mechanical moth, the head of the mechanical war insect was smashed, and the body of the mechanical war insect was directly lost. The manipulation of the electronic consciousness of Quhe.

You should know that this mechanical warfare was originally a small fortress with a diameter of 50,000 meters. After the mechanical fusion ability is developed, under normal circumstances, its volume does not change much, even if it changes into a mechanical warfare, It is also a huge body of 50,000 meters. In this case, even if the skull is paralyzed, its body will not change much, just losing control.

However, in the state of extreme condensation, the small fortress of 50,000 meters in diameter, because of the suppression of the fusion of mechanical and mechanical, the huge size of the small fortress will be reduced to only about five kilometers. In this case, if it is electronically conscious The suppression is still in place, and the body shape of the mechanical warfare can be effectively controlled.

But once the skull is paralyzed, the body loses the repression of the song and the electronic consciousness. The internal machinery that was originally condensed will collapse in an instant, and it will collapse randomly and disorderly, eventually becoming the fortress. The fortress, the war worm is not like the ghost of the war worm, it is completely ruined!

At this time, in the mind of Ye Xuan, the familiar system prompts to sound: "Congratulations to the host, found that it can devour intelligent life! Quhe: Mechanical life, moderate degree of evolution! Is it swallowed immediately?"

This is obviously because the head of the mechanical war worm has been smashed, and the song has become a tiger without teeth. It has been seriously injured and can be swallowed up easily. Otherwise, Emperor Shaofeng and others can be swallowed up. The electronic intelligence is a living body, but the system does not emit a corresponding prompt tone.

This opportunity, of course, Ye Xuan will not let go.

Nowadays, although the mechanical warfare has collapsed, it is huge to a diameter of 30,000 to 40,000 meters. It is impossible to swallow the body shape of Ye Xuan, which is about a kilometer away. But the head of this mechanical war insect is still because of its electronic consciousness. For the sake of the interior, it is still in a state of condensation. It is only two hundred meters. Even a mechanical monster of more than a thousand meters can barely be swallowed.

Ye Xuan immediately launched the action, the mechanical moths resounded through the sound of a large piece of mechanically smashed, and the position of the four barrels of the lower abdomen traversed, revealing a giant mouth of more than two hundred meters, angry Underneath, directly swallow the remnants of the mechanical war insects.

Then, at the first time, Ye Xuan issued instructions to the phagocytic system to devour and refine the electronic consciousness of Quhe.

All of this has been done before, it is a light road, and the current song and still in the head is stunned to the state of dizziness, its electronic consciousness has no resistance at all, refining is simply smooth.

In the process, the mechanical devil did not attack again, but it was not far away. It was always in the void around the sky to avoid the encirclement of the other seven mechanical war insects.

After just over a minute, the familiar system sound finally sounded again in Ye Xuan's mind, and the electronic consciousness of Qu He was finally completely refining.

"Hey, congratulations to the host, successfully devour the mechanical intelligence life! Get a mechanical core!"

The so-called mechanical core, on the surface is an ordinary crystal, but in fact this crystal is the intellectual nuclear crystal of the mechanical intelligence life, the heavenly family evolved from the self-consciousness of intelligent robots, their The body is not flesh-and-blood, nor is it born, but after self-consciousness, it evolves step by step.

The real core is actually a string of electronic consciousness similar to data, like the human gods, the spiritual power of the devil!

And this mechanical wisdom core is the condensation of this electronic consciousness, which is equivalent to the magic core in the brain of the devil, or the soul of human beings!

Ye Xuan had only one mechanical core, Sha Baofeng, and now there is another mechanical core crystal, which belongs to Quhe. That is to say, his hand is equivalent to the **** of two human monks. If necessary, you can change your identity at any time, from the current Shabaofeng, to Quhe.

Because the electronic consciousness of the Tianzu ethnic group is unique, similar to the genetic sequence of flesh-and-blood life such as human beings, most of them are the same, but the key gene chains are different.

For him, this is significant.

After all, the next thing to go is the Tianji City's base camp, which is only the electronic consciousness of Sha Baofeng. It will be restrained in many things and it is not convenient to carry out the action.

But if you can have more electronic awareness of the top of the celestial family, then the situation is completely different.

After all, these guys have different identities, different responsibilities and duties. Ye Xuan now has the electronic awareness of Quhe. After entering Tianji City, if there is a need, the part of the scope of authority related to Quhe For him, there will be no more obstacles...

Chapter 3490: Second head

However, the fall of Quhe, along with the other seven high-level leaders including Emperor Shaofeng, witnessed the fact that Ye Xuan had to shut up the seven guys if he wanted to use the electronic consciousness of Qu He.

Here is the source of all evils. They can't pass any message at all. Ye Xuan has the opportunity to kill them one by one. By then, they will not only get the electronic awareness of Quhe, but also include the other seven guys.

There is even a young patriarch, Emperor Shaofeng. As a guy, the authority in Tianji City is bound to be unimaginable. If Ye Xuan can get his electronic consciousness, then he will enter Tianji City and act. Get the most convenience.

Thinking of this, Ye Xuan was excited, including the emperor Shaofeng, all the eight elites in this fleet, in his eyes at this moment, all of them have been squatting for prey, Ye Xuan is completely confident of them. Kill all the kills.

"So now, start with the second prey!"

In the muttering, Ye Xuan's line of sight swept over the holographic electronic screen in front of him, looking for the second target.

Behind him, the demon emperor who had never recovered from the previous song and was degraded, led Chanas, and heard the body shape again mad, his face was green, stuttering and asked: "Shasha... ..Sha Daren, you don't want to kill them all? My mother, Emperor Shaofeng is the young patriarch of the Tianji nationality. This is to break the rhythm of the sky. If you are known, you can It's really going to be finished."

"What? You intend to inform you?"

Ye Xuan crossed the view of Chanas, the latter scared his neck and shrunk, his face full of bitter look, shaking his head and laughing.

He and Ye Xuan are now on the ropes. If you want to sue this secret, I am afraid that I will finish it with Ye Xuan.

Anyway, they have already been on the thief boat, and they can only go black with him.

Seeing Chanas shaking his head and smiling, his face was frustrated, and he no longer spoke. Ye Xuan's heart was funny, but he did not pay attention to it again. His eyes turned to the holographic stereo screen in front of him.

At the same time, the other seven mechanical war insects, led by Emperor Shaofeng, were finally recovered from the shocks of the previous songs and accidental slaughter. They once again bouncing and jumping toward the mechanical moths. Surrounded by killing, there was a loud roar of roaring, which resounded through this void...

"Sha Bao Feng, you actually killed Qu He, do you know how serious this is?"

"The Tianzu ethnic group allows the tribes to compete normally, but does not allow life and death to kill, you have committed the family rules!"

"In addition, you have been disrespectful to the patriarch and have been humiliated by the patriarchs. Now we doubt that you want to be a traitor."

"I will immediately smash it, and we will bring it back to the family. Perhaps the patriarch can still leave you a life, otherwise it will die."

"Yes, no need for the patriarch to start, I will wait for six people. Today, I can help the patriarchs to implement the family rules and kill you here..."

"Booming!"

"boom....."

As the roar of this road rang, there was a violent roar in the surrounding air. Three or four mechanical warfare insects even directly launched the anti-matter energy dead light gun on the ship. The diameter of the three or four roads was two. A huge black anti-matter energy light column of about a kilometer spurt, want to kill the mechanical magic insects on the spot!

"It's really funny, it's like you didn't shoot this grandfather before!"

Ye Xuan sneered, and there was a deep disdain and sarcasm in the discourse: "But even this, isn't the lord smashed a war worm? Since you don't know what to do, then the second one is... Today, you all have to fall here!"

"This uncle is not in a hurry, line up the team, pick you up!"

"call out!"

The voices fell, the mechanical monsters suddenly jumped up, and the small figure of only a kilometer was as smart as a butterfly, passing through the anti-material energy beam from the three or four lasings, turning into a The black flow vector tears the void, and the blink of an eye has reached the top of another mechanical war insect.

"call out!"

"Oh..."

Two rapid blasts sounded, and the two knives of the mechanical worms instantly hit the body of the mechanical war worm, and opened two cracks. For a time, the back of the mechanical war worms suddenly flashed. A striking electric spark.

Just two times, on his huge body, there are two hundreds of meters of gaps, which look very incomparable, and there is a familiar voice of sorrow and sorrow!

At the same time, another six mechanical warriors, including Emperor Shaofeng, turned around and were once again wrapped up. After all, the number is dominant. No matter which one Ye Xuan chose as

the target of attack, the other six mechanical warfare Can help in the first time, will never give Ye Xuan a chance to kill.

The mechanical magic insects did not fall in love, and the body laughed out of Ye Xuan's hearty laughter. A bounce, the blink of an eye turned into a black flow vector quickly, and easily passed through the blockade line of six mechanical war insects. Encircled the circle.

In the face of all this, Emperor Shaofeng and other popular anger and roaring sounded again, accompanied by the savage and fierceness of the mechanical warfare that was marked by Ye Xuan on the back of the ridge with two huge gaps. A huge void is bothered.

"It's too passive. The figure is only about a kilometer in shape. It's agile, but it's changed by a small fortress of 50,000 meters in diameter. The kinetic energy is not inferior to us, but the speed and dexterity are far better than many. The grievances of the war!"

"The key is that there are too many elbows in the surrounding environment. There are large and small void cracks everywhere, and they are still moving slowly. I am too big, and I have to be careful when I fight. I have to be careful about these void cracks. After this increase, the advantages I have waited for are infinitely weakened!"

"If this doesn't work, it's really possible that he will be broken by him. You must do your best and kill this kid as soon as possible..."

"call out!"

"Oh la la..."

Not waiting for the roaring roar of these guys, the mechanical devil has once again turned into a black flow, breaking through the blockade line, and once again came to the shape of the wounded mechanical war insect. rear.

The huge smashing hammer at the end of the spurt was swiftly swaying, and it went straight to the death of the battle insect's abdomen.

The latter was shocked and his body was about to retreat.

It was also at this time that the pair of energy light on the back of the mechanical moth suddenly vibrated, and the original development was only about a kilometer, but at this moment it suddenly surged, and the blink of an eye was two or three kilometers, one of which was lightly stretched. Straight, turned into a huge translucent energy light blade, while the other side avoids the hammer, while falling from its neck.

The slap of the electric sparks resounded, a huge two-hundred-meter-long alloy warrior skull, separated from the body, fell into the void, and was swallowed by the mechanical moth, the first time to swallow the belly!
