

Super D. S 3491

Chapter 3491: escape

Just as the second warrior's head was swallowed by the mechanical moth, Ye Xuan's mind also sounded a familiar system prompt: "Congratulations on the host, found that it can engulf the intelligent life! Hong Tu: Machinery Life, moderate level of evolution! Do you swallow it immediately?"

The third is the third type of phagocytosis and refining. Ye Xuan does not hesitate. Even if he gives a positive answer, then the figure will turn into a black flow vector, quickly overlooking and avoiding the siege. The attack of six mechanical war insects, such as Emperor Shaofeng.

"Booming!"

"Karma card..."

Almost at the same moment, the body of the mechanical warp that lost its head suddenly made a huge roar, and a large number of mechanically-running sounds came out, dense and deafening.

In the blink of an eye, the body of a mechanical warp that was only about 5,000 meters long turned into a large, irregular shape with an irregular sphere of about 30,000 to 4,000 meters.

Because this process is too abrupt, and the six mechanical warriors such as Emperor Shaofeng are in full swing under the wrath, the sudden expansion of the headless war insects, almost injured one of the war worms, and finally dangerously Candid.

At this point, the mechanical devil has arrived in the distance, and Ye Xuan's mind, the system prompt sound of refining and finishing has also sounded again: "Hey, congratulations to the host, successfully engulf the mechanical intelligence life! Get a mechanical smart core!"

Under the investigation, Ye Xuan discovered that there were two fist-sized translucent crystals in the body. It was the mechanical core of Qu and Han Tu, which was refining at the moment, including the two guys. The memory data is also stored in the data repository of the phagocytic system, and Ye Xuan can check it at any time.

As for the high-level identity of the celestial family that he can use, he jumped up to three, namely Sha Bao Feng, Qu He and Hong Tu!

But this is not enough. Ye Xuan's goal is to kill all the other six mechanical warfare, including Emperor Shaofeng. At that time, he will have nine mechanical treasures after Sha Baofeng's mechanical core. The identity of the high-level people who can be converted at any time, so, with their respective rights, in the city of Tianji, basically will be unimpeded, any action can be guaranteed to complete quietly.

There are still six prey, and the task is arduous. Ye Xuan is not happy with this. Instead, he becomes vigilant because he realizes a problem, that is, with the songs and the two people killed and killed, the other six guys It is very likely that there will be a fear of this, and maybe the idea of evacuating will be removed.

As long as one of them escapes from the source of the evil, the everything that Ye Xuan has done will be instantly revealed. Tianji City, absolutely do not want to go again, one is to cast the net.

At this point, Ye Xuan absolutely does not allow it to happen, otherwise everything that has been done before will be abandoned!

At this time, the anger of the exclamation of Emperor Shaofeng and others has already started again. As Ye Xuan expected, these six guys are angry, but at this time more shocks and shocks, Ye Xuan In the short tea time, two mechanical warfare insects were killed, not only did they suffer the slightest damage, but also the ease of completion.

With such a record and **** reality, the six people, including Emperor Shaofeng, finally woke up, and the mind that had been stunned by anger completely restored calm.

"Damn, Hong Tu is also trembled. Things seem a little bit wrong. They are out of our control. If they continue this way, they will be the result of being killed by each other."

"Did you find out? Every time you kill your opponent, the head of the war insect whose electronic consciousness is located is swallowed by Sha Baofeng and the black magic insect changed by his car. What does he want?"

"This must be a plot, otherwise the surnamed Sha can't do this boring thing. Is his final plot, the electronic consciousness in the heads of the two war insects?"

"It should be almost the same. This may be closely related to his sudden increase in the level of comprehension in mechanical integration. This guy has mastered some kind of taboo means, can swallow the electronic consciousness of the same family, and peep into my electronic life. Memory, including our various insights!"

"Yes, it must be like this. This is a terrible secret. It is too important. I don't want to be a patriarch. I suggest to end this exploration mission immediately. When I evacuate at the same time, I must ensure that there is a person who rushes out of the source of evil. Reported in the family, otherwise Sha Baofeng will become a cancer, this kind of thing that can engulf the electronic consciousness of the same family is unheard of, is simply horrible, and the threat to my celestial family is too great!"

"Immediately evacuated! Now the young patriarchs ordered, suddenly changed, the mission was temporarily cancelled, everyone covered me and helped me evacuate..."

With the sound of these exclamations, the six mechanical war insects all stopped the offensive, did not retreat, and withdrew toward the road.

They have all entered the depths of the outer area of the source of evil. The front is the buffer zone between the outer area and the deep hinterland, but now it suddenly suddenly withdraws, which makes Ye Xuan feel a headache!

In any case, you must not let these six guys escape, otherwise the trouble is big!

Six mechanical war insects, one after the fifth, the front is Emperor Shaofeng, this guy can not stay behind the temple, issued instructions, let the other five mechanical warfare cover, he launched a speed, toward the source of the evil At the edge, you can escape.

Ye Xuan did not hesitate, the mechanical devil also launched a speed, turned into a black flow vector to cut through the void, simply did not pay attention to the five warlords responsible for the cover of the temple, tightly locked in the front of the sky Emperor Shaofeng, looking for this guy, chasing it.

At this point, the advantages of mechanical moths are fully demonstrated.

Among the six mechanical moths, the four heads are made up of small fortresses of 50,000 meters in diameter. In terms of kinetic energy, they are not as good as the survival of the Xingye.

Although the appearance of Hoshino is only 50,000 meters, in fact, it was Ye Xuan that restricted its growth and was controlled to this extent. Without the limit order, Hoshino could not grow to 100,000 meters. The level of the Great Fortress is at least 70,000 meters.

The part of the world's worm auto-derivative micromolecules that could have been used to grow the size of the hull is all used to enhance its internal performance.

Therefore, although the size of the hull of the Hoshino is finally controlled to the extent of a small fortress of 50,000 meters in diameter, its real performance is to catch up with the fortress of 100,000 meters in diameter. It is similar in terms of kinetic energy and other aspects. .

Among the six mechanical war insects, although two of them are also made of a large fortress with a diameter of 100,000 meters, the size is too large, one head is five kilometers, one head is seven kilometers, compared with the mechanical magic insects which are only about a kilometer. It's not a level at all. At this moment, both sides are developing at a very high speed. The advantage of mechanical worms in terms of dexterity is too obvious...

Chapter 3492: Who will die?

The kinetic energy of the Hoshino Life Fortress is not much worse than the 100,000-meter-diameter big fortress. Even in the empty and safe void, under the speed of speed, it can compete with these six mechanical warfare. Four of them will even be left behind.

At the moment, in the harsh environment where all kinds of evil sources are covered with void cracks, the mechanical devil has occupied the advantage of dexterity. The other six mechanical warfare insects, due to their large size, cannot expand at full speed or even In the occasion of the occasional outbreak, encountering the oncoming void cracks, but also have to slow down and avoid...

Under this circumstance, the advantage of the mechanical devil is not a little bit. A short black and white, which has turned into a black flow vector, has passed the five mechanical war insects behind the cover.

Then, after counting the past, even the Emperor Shaofeng, who had been rushing to the front, was also behind Ye Xuan.

In the next moment, the body shape of the mechanical demon stagnate suddenly, and stopped in the void, and then turned over the body shape, the four guns of the 100-meter-diameter antimatter energy dead light cannon, while rotating, Far away is the mechanical warfare that is changing from the front, the emperor Shaofeng and his car!

"call out!"

"call out....."

The sound of the piercing sound broke, and in the four barrels, the black energy beam of four antimatter deadlights was shot in an instant, all aimed at the mechanical warfare that changed by Emperor Shaofeng.

The four antimatter dead guns of the Hoshino Life Fortress are all 20,000 meters long. At this moment, they are in the form of war worms under extreme condensation. The caliber of these four antimatter dead light cannons has been compressed to the extreme, only about 100 meters.

As a result of the ultimate compression of the caliber, the density of the energy beam of the dead light can be greatly increased. Even if the ratio of the caliber is not proportional to the degree of compression, the power is also improved, and the speed is even faster. .

In the blink of an eye, these four black dead light energy beams have come near.

At the same moment, Emperor Shaofeng's screams full of fear also sounded abruptly: "Ah..."

"How can it be so fast? There are still four muzzles. When will the ship's dead light cannons be volleyed? This is exactly the same as the Stars and Blacks of the singer!"

For the horrific battle that occurred in the third universe, the first universe, the first universe has also received news. Although I don't know the detailed process, the general situation is mastered.

At least, the horrible little fortress of the fox lord has the amazing news of four 20,000-meter-caliber dead-light cannons. They still master it. After all, this is too subversive and does not conform to today's warship manufacturing technology. Just one sentence: not scientific!

The mechanical moth had previously shown four long tubes like mouthparts, but since they did not emit the energy beam of the dead light gun, Emperor Shaofeng and others did not realize that the four could be like a universal tube. Any hose in the direction of rotation is actually a four-tube anti-material energy light cannon.

Until now, Emperor Shaofeng was shocked.

Then, in his mind, there was a flash of light, which seemed to be related to it, and sent out a scream of horror: "No, this is not right. In the news, the seat of the fox lord." Mechanical moths, it seems that there are also four such hoses, God, this is not true, you, you... Sha Baofeng, you actually colluded with the Terran? You and the Linghu Lord are a group!"

I have to say that this guy's mind is still very flexible. The mechanical mob just just fired an antimatter deadlight. He realized the problem and almost guessed the truth.

In a word, the stone was shocked, regardless of the top of the five-headed mechanical warfare in charge of the back of the temple, or the demon emperor led by Ye Xuan, who was shocked, and the latter was even more The first look at Ye Xuan, the look of the face, the body shape is shaking.

"I don't want to tell me, do you think so? It's just brain damage!"

Ye Xuan did not pay attention to this guy. He turned his eyes and said: "If this grandfather has a relationship with the younger fox, he will solve them all the time, and wait until now? The masters of

the goods are not in the hands of the celestial family. Starry Black Technology! Too fascinating, hey, unfortunately missed."

The implication is that if there is an opportunity to get to know the lord and the lord, I really intend to collude with it and renege on the celestial family.

Realizing this, Chanas was anxious to cry on the spot. This is really a thief boat. Can you blink your eyes? Swelling, I'm looking for such a guy to go to the knot?

Thinking that he and the other party are already on the rope, Chanas has a messy feeling in the wind, and once again, the whole person is not good.

"Oh!"

"Booming!"

"Hey..."

The sound of the oil splashing water is loud, the huge roaring sound is accompanied by a large flash of electric sparks, followed by the horrible sound of Emperor Shaofeng!

Four anti-matter dead light gun energy beam, he just avoided three, this is also dangerous, almost touched a void crack not too far away.

The last one that has not been avoided is the tail of the mechanical warfare. The characteristics of the antimatter energy beam are invincible. All positive energy materials will be melted when they encounter it.

There is a big hole in the tail of the mechanical war insect. Although it is only the diameter of the rice, it is a suspense to pierce the hole. The pain is simply unimaginable. At this moment, the tragic sound of the emperor's mouth is so sharp that it is extremely extreme. Super previous.

This guy was really scared, and his stature not only stopped, but he did not even dare to move forward, and quickly retreated, including the five mechanical warfare that had been left behind him.

The speed of the mechanical devils is extremely fast, and the figure is dexterous. In this environment, they can catch up with them at any time. At that time, the four-pipe anti-material dead light cannon energy beam is a volley, which can basically block all the retreats. Say that all of them are in the air, to ensure that one or two energy light pillars hit the target, the other party can still do it.

This situation has been several times in a row, and they are clearly the rhythm of being killed alive on the spot.

In contrast to this, it is better to retreat to the buffer zone of the evil source behind the enemy. After entering there, although the environment is more sinister, there will be some powerful starry beasts, but this sinister is the same for Shabaofeng. Or maybe you have the opportunity to use those starry beasts to kill them.

Just at this time, the sound of the arrogant words of Sha Baofeng in front also passed: "Isn't it a good one-on-one single-choice group? Now that the war is over, I want to run. Isn't it bad for my celestial family? Fame? This lord will never allow, in one sentence, who will return who died..."

This is simply shameless, and the five emperors of the Emperor Shaofeng are sorrowful and angry, and they are almost insane on the spot!

Chapter 3493: One more

The source of all evils is vast, divided into three regions: the deep hinterland, the peripheral region, and the buffer zone between the two regions.

There are only countless voids in the outer area.

In the buffer zone, in addition to the void cracks, there are some powerful starry beasts that are extremely rare in the outer universe.

As for the inner deep hinterland, these starry beasts are even stronger, and there are some unknown dangers!

Three major areas, one is more dangerous than one!

But at this moment, the six-headed machine-machine warrior, headed by Emperor Shaofeng, chose to retreat to the buffer zone in the middle.

In the peripheral area, they were subjected to the elbow of the void cracks, and they were not smooth at all, but the small body and the mechanical magical worms did not care at all, and they were able to exert all their combat power against them.

After entering the buffer zone, although the dangers they face have improved, in addition to the void cracks, there are various kinds of starry beasts, but the same is true for the mechanical monsters. Under the restraint of the starry beasts, it will not be fully engaged. Come to fight against the six people of Emperor Shaofeng.

By then, the six people will wait for an opportunity to move, and may not have the opportunity to use those stars and beasts to degenerate the mechanical devils.

At least, the opportunity will be even bigger than the outside area that is left outside and has no effect on the other side!

For this, Ye Xuan is also well aware that although he has no fear, he has not been at all in mind, but for the sinisterness of the buffer zone in front, Ye Xuan can basically guess that it is far from being comparable to this peripheral area.

At the moment, there are still six opponents. In any case, before they all enter, they have to find another way to stay one or two.

In this way, the pressure will be even smaller when you enter it later.

As soon as I read this, Ye Xuan even ordered the life insurance fortress of Xingye to lock the biggest war worm of the seven-kilometer size. The other party is the most inflexible because of the largest size, because it needs to be vigilant against the slow-moving void cracks. It is the best hunting target.

"call out!"

"call out!"

"call out!"

When the sound of different vacancies sounded, the mechanical demon slammed up and swayed into a undulating black flow vector, all the way to the extreme speed and dexterity to the extreme action, avoiding dozens of emptiness of varying sizes The crack, the blink of an eye has reached the front of this mechanical war insect.

At the same time, there are four millimeter-diameter black anti-matter dead light gun energy beams, which lock the four parts of the body of the mechanical war insects, and cut off the virtual cracks around them. Escape the possibility of evacuation in either direction.

The latter also immediately discovered this situation, realizing that it was in a dead end, even after the dodge was no longer possible, the body of the war worm screamed with mad screams, full of fear!

"Sha Baofeng, what are you doing? Not saying who is going to die? Who will die? I will not retreat at all. It is clearly moving forward, you and you... you are not credit!"

"Oh la la..."

"Hey..."

Not to wait for his words to finish, the kind of squeaky noise like the water splashing has already come out, followed by the horrible sound of savage to the extreme.

The four energy beams, except for two, are used to match the void cracks around their body shape, locking their body shape, so that the mechanical warfare can not escape from any direction, and the other two energy beams aiming at their bodies, all hit The goal.

There is no suspense to leave two millimeter-diameter pairs of holes in the body of this mechanical warfare, one on the back and one on the right shoulder. The black hole is extremely scary.

At the same time, after a very fast bounce, it was now at the moment of the mechanical moth, and the pair of translucent energy fins that had been wrapped around the whole body were stretched out. One of them quickly straightened and extended. For an energy light blade that is hundreds of meters long.

Aligned with the neck joint of this mechanical monster, slammed down.

"hiss!"

"Oh la la..."

After a crisp cracking sound, followed by a large number of electric sparks, the neck was directly cut, the huge head of the mechanical warfare rolled down the body, and the body exploded in an instant, a diameter of seven 80,000 meters, but the surface is like a shit, the uneven iron and steel objects of a starry fortress are not seen in the sky.

In the range of 780,000 meters, there are a lot of void cracks, big and small.

At this moment, this huge alloy object suddenly appeared, and was immediately divided into dozens of alloy crucibles of various sizes by the void cracks. The entire starry sky fortress was damaged and could not be broken again, and it was completely ruined.

Only the war-torn head that was about three hundred meters or so was intact, and it was rolling down under the void.

When Ye Xuan gave instructions, the mechanical devil bounced at full speed, avoiding some void cracks, chasing him near, and then creeping again under the abdomen. The original huge gap of only two hundred meters was enlarged. Reluctantly swallowed the rolling mechanical head.

"Congratulations to the host, found that you can devour intelligent life! Qitian: mechanical life, moderate degree of evolution! Is it swallowed immediately?"

Just in the mind of Ye Xuan, when the familiar system sounds, the five different directions in the distance, the mad roar of the last five high-level elites such as Emperor Shaofeng also passed.

"what....."

"Sha Bao Feng, this time you will die undoubtedly, killing three people in succession. Once this matter is known to the patriarch, it must be said that you can't live or die, torture for thousands of years!"

"You wait, we won't stop here, have the ability to follow up, this buffer zone is your hometown of bones."

"Don't escape, you must chase in, otherwise we will return to other directions, exit the buffer zone, enter the peripheral area, and then open the source of all evils, report everything you do to the family, then you can't escape! "

"Come on, little bastard, you have no retreat, or you have married five of us, or you can wash your neck and die, ah..."

Although the roaring anger is mad, but the five guys did not dare to continue to stay in this peripheral area for a minute or two, the body shape did not stop for a moment, with the resentment of Haotian, directly rushed into the front of the evil The source of the central domain buffer zone.

Ye Xuan did not chase, but stayed in the same place, and at the same time issued instructions to the system to immediately start full speed extraction and refining.

After more than a minute, the second system prompts the sound: "Hey, congratulations to the host, successfully devour the mechanical intelligence life! Get a mechanical core!"

"I want to motivate the uncle to follow up and kill you? Hey, no matter whether you really want to fight back, or want to squat, this uncle will never let you down."

Turning to the edge of the buffer zone, Ye Xuan sneered: "However, these broken copper and iron can not be wasted, can be used to strengthen the power of the super dead light bomb, you have to collect it first... .."

Chapter 3494: Cave Day 9th Steps

Today, Ye Xuan has a total of four mechanical cores. These four mechanical cores represent the lives of the four top-level people. They are Sha Bao Feng, Qi Tian, Qu He and Hong Tu!

Among them, Qi Tianhe Qu He and Hong Tu three are in the outer star field of this evil source, which was just killed by Ye Xuan.

The electronic consciousness of these three guys was refining and refining by the phagocytic system in Ye Xuan's body, and after condensing into a mechanical wisdom core, the car was all disintegrated and split, and now it is still in the periphery of this peripheral star. Floating in the middle.

Two small fortresses of 50,000 meters in diameter and a large fortress of 100,000 meters in diameter.

Although it has been completely ruined, it can no longer be used, but the components and internal space oscillators, kinetic energy cabins and anti-objective light energy generators are still there.

These things are very difficult to get their hands. If you are in peacetime, Ye Xuan will not look at his eyes. With his character, he has to grab a good fortress and fortress, but he can't grab it. This kind of broken thing is fundamental. Can not afford his interest.

But now he has prepared a giant anti-material void bomb, still in good shape, and is in need of these important, powerful parts and kinetic energy cabins.

Therefore, the remains of these three large and small fortresses, Ye Xuan, could not be let go of this. They must be in the immortal world of the body and handed over to the phagocytic system to strengthen the power of the giant anti-material void bomb.

Since it is a gift for the Tianji City Base Camp City, then its power is naturally stronger and better!

In addition, these three large and small fortresses are, after all, the drivers of the three top-ranking elites, and there are still some treasures and resources for cultivation.

It's a bit too wasteful to throw it here.

With this in mind, Ye Xuan's remaining five mechanical warfare insects, such as Emperor Shaofeng, entered the buffer zone of the central domain of the evil, even when they stepped out of the belly compartment of the mechanical moth.

Appeared in the void outside.

If this scene is seen by the top of the five celestial groups such as Emperor Shaofeng, I am afraid that I will lose the eyeballs on the spot and immediately guess the true identity of Ye Xuan.

Because the mechanical integration ability of the Tianzu people is impossible to achieve this state of self-inflicting with the war worms at the same time, once they are independent, the war worm form will be immediately released, and the original fortress or fortress form will be restored.

Ye Xuan has done this and can only explain one problem. That is, the roots he uses are not the mechanical fusion ability of the Tianji people. The fact is very clear. He is not a Tianzu nationality, but also has such capabilities, even A younger fox with a stronger starry black technology.

It is a pity that the tops of the five celestial groups, such as Emperor Shaofeng, could not see this scene. They have all retreated into the buffer zone and are isolated from the outer star field, while the demon emperor led Chanas. Really, but he is not a Tianzu ethnic group. He does not understand the mechanical integration ability of the Tianji nationality. It is also a white look, and it is impossible to analyze any information from this!

Ye Xuan left the mechanical magic insects in a temporary safe void, and then formed into a stream of glory, rushing to the remains of the three large and small fortresses in the void.

First, enter it, start a search, and collect some treasures and resources into the immortal world in the body separately. Then, in the wave, use the wreckage of the useless fortress, together with the kinetic

energy cabin, the virtual oscillator, and the antimatter light generator. Equipment, all bones and brains are all in the body and thrown into the phagocytic system.

Used to strengthen the power of the giant anti-material void bomb.

The three large and small fortresses have all been searched. The treasures and treasures of the various treasures and cultivation resources that Ye Xuan has harvested are not too small. Even for him, it can be said that it is extremely impressive.

After all, these three guys are the top of the Tianji clan, and they can still carry out the search task together with the Shaozu Emperor Shaofeng, and it is the confession of the Tianji clan chief, and the net worth is extraordinary.

When the wreckage of the three large and small fortresses in the surrounding air were all collected by him and handed over to the phagocytic system, the meal time had passed. Ye Xuan looked around and determined that there was no residue in the surrounding air, even after the Tianji ethnic group dispatched. After a fleet came in to investigate and absolutely couldn't touch any traces of beads, it nodded and turned to step into the mechanical moth that hovered in the distant sky.

After a meal, it was enough to enter the five-headed mechanical warfare of Emperor Shaofeng, who was in the buffer zone of the central area of the evil, and advanced forward into a star-shaped voyage.

But Ye Xuan did not hurry to chase it in immediately.

In the battle of the right talent, his body's engulfment system collected and refining three times in succession, condensing a mechanical core representing the existence of the high-level life of the Tianji family.

Every time, there is a part of the energy feedback to Ye Xuan himself, which makes his flesh and blood benefit a lot, and in the process, it is also nourished.

However, because it is in battle, Ye Xuan has been suppressing, and now that he has taken his leisure, naturally he needs to first digest this harvest before continuing the battle.

Otherwise, it must be faced with bottlenecks in the battle and cannot be suppressed. Therefore, the situation of passive breakthrough is also extremely unfavorable to Ye Xuan himself. The situation and rhythm of the battlefield are changing rapidly. If there is a slight difference in the pool, it will make the other side get into the loophole. Threat.

It is the truth to sharpen the knife and cut the woodwork. It is the same meaning to drive the outside.

It is necessary to continue the battle in the back, chasing the buffer zone of the central domain of the evil, and killing the core tops of the five celestial groups such as Emperor Shaofeng one by one. Ye Xuan must first digest the previous achievements and break through.

After all, it is the mechanical core of the three high-level cores of the heavenly family. It contains their unique electronic consciousness. This is also an energy. Like the spiritual power in the core of the devil, it is the spirit of Ye Xuan. It is also helpful to repair blood.

Although several mechanical cores are controlled by the phagocytic system, even if only a small part of the electronic consciousness is captured by Ye Xuan's body, the body of the nourishing Ye Xuan is the realm of the qi and blood level. It is entirely possible to break through one or two small steps.

The fact is also true. After returning to the internal space of the mechanical devil, Ye Xuan opened a secret room for retreat. In a short period of time, a familiar system sound was heard in his mind.

"Hey, congratulations to the host, the body and blood of the realm of the realm! The current realm: the eight heavens of the heavens!"

"Hey, congratulations to the host, the body and blood of the realm of the realm! The current realm: the cave of the nine-order grand perfection!"

The tenth stage of the cave is finally complete, and then, Ye Xuan only needs to make another breakthrough in the small stage, and will enter the eleventh big territory since then!

It's just that the excitement of his heart has not been stirred for too long, because when he thinks that he is going to enter the country, he must be more prosperous than the zombie king who is going to take the wind. Ye Xuan suddenly feels pressure.

The road ahead is still a long way to go...

Chapter 3495: Entering the buffer zone

When Ye Xuan walked out of the closed room after more than one hour, the demon lord led Chanas in an abdomen cabin of the mechanical moth, because the void area was temporarily safe, but it was a Before the small hours, at the moment, the cracks in the void that slowly moved around are almost coming to an end.

If Ye Xuan does not come out again, he can only find a way to get out of the belly compartment of the mechanical moth.

In fact, if it is not the outer star of the evil source in this film, once it goes out, even with his cultivation, it will be dangerous for a long time, because in this place, whether it is the human monk's knowledge or the devil The spiritual strength cannot extend too far. It is not effective to predict the cracks in the vicinity in advance, but it is not as effective as the electronic wave signal without life fluctuations.

Otherwise he was afraid to stay away long ago.

The current Sha Baofeng, in his eyes is completely a big madman who is not afraid of fear, the big devil, Chanas is on the matter of his thief boat, has long regretted that the intestines are green.

"Shasha ... Sha Daren, can we leave? The deep area of the source of evil is said to be more dangerous, let's not go in."

Seeing that Ye Xuan came out of the secret room, Chanas was overjoyed, and even rolled up to the front of Ye Xuan, begging for him to leave.

"You are stupid? Isn't it time to go for a dead end? The five guys just go out one by one, and we both have no way to live."

Ye Xuan's eyes turned straight, and the last shot of the chest said: "This uncle has always liked to be tired of others, so don't say it is for myself, even if it is for you, you must kill them five."

"Oh... not like this!"

Ye Xuan said this, it seems that the pursuit of the emperor Shaofeng five people, is completely for the purpose of Chanas, the latter grievances are crying, shrugging his face, but there is no way.

Seeing that he didn't say more, Ye Xuan even ignored the mechanical demon, even if he did not pay attention to it, even when he rushed toward the buffer zone of the central source of evil.

As soon as the rushing into this zone, the light will once again be seen.

The line of sight is shortened again. Even with the current cultivation of Ye Xuan, at most, you can see a range around a thousand miles.

And the power of the monks, the spiritual power of the devil, and the electronic consciousness of the celestial beings, all of which have the power of life fluctuations, are all limited here, basically the same distance as the naked eye can see, and there is no help. .

Fortunately, the electronic wave frequency of the battleship is not life-like. Although it is limited here, it is not as restrictive as the power of the gods. The electronic wave frequency of the mechanical magic insect can be within five thousand miles. Everything is well explored, and it is five times that Ye Xuan explores the visual moment.

It is basically enough to keep the mechanical moths in extreme speed!

However, in a short period of time, if you want to find traces of five people, such as Emperor Shaofeng, I am afraid that it is unlikely, but Ye Xuan is not in a hurry, because the other party has entered here, and it is in front, basically there is no way to escape. Previously, they said that the roundabout, exiting the buffer zone from other directions, is simply not feasible.

In this buffer zone, the void crack still exists, and it is more dangerous than the previous peripheral areas of the evil.

On the one hand, the visibility here is much worse. The electronic wave frequency of the battleship can only cover an area of five thousand miles, and the naked eye is only a thousand miles. It is difficult to avoid the void crack in advance. .

In addition, it is because the void cracks in this area are more dense, and the speed of movement is still very fast, but it is obviously no small increase compared with the outer area of the outer surface.

According to Ye Xuan's estimation, the five-kilometer body shape of the mechanical warfare, which changed by five people, such as Emperor Shaofeng, and its dexterity, under such circumstances, have been unable to do so at full speed.

Ye Xuan can basically guess that the purpose of retiring into this area is to dispel the casualness and calmness of Ye Xuan in the periphery, so that Ye Xuan will face a certain crisis, and then they are good. Take advantage of this crisis and start with Ye Xuan.

But now it seems that these five guys are obviously lifting their own stones to lick their own feet.

The mechanical moth at the foot of Ye Xuan really cannot be as uninhabited as in the periphery, but the elbows received are absolutely not as serious as they think. Instead, they themselves, even the speed of movement Already unable to do it, once it is found by Ye Xuan, the final result will be the target of Ye Xuan.

After confirming this situation, Ye Xuan is not in a hurry. The five guys have stepped forward and have an advance time. However, in the face of this kind of environment, they are not expected to go too far, so I will soon be able to Chasing.

In this way, the mechanical devil kept at a constant speed, propelled all the way, and did not encounter any other danger at the beginning, but after about two or three hours, basically entered the depth of the buffer zone, the new one belonging to this area. The source of danger has finally arrived!

"rustle....."

"Shashasha..."

"Shasha...Sha Daren"

With a large number of abnormal sounds like silkworms and mulberry foods, Ye Xuan still had time to carefully explore what was happening around him. The chasing behind him was already in front of him. They were all nervous and looked nervously around.

Fully is a stance of a little ghost girl!

Ye Xuan's almost slammed him out, and the old guy was almost a bit of a squad. Now he only hears the sound, and it's just that this faint rustling is not scary, he's got the atmosphere. It's so horrible, I really don't know how it would be if he really encountered something terrifying.

"Going to the side, this uncle is almost scared by you, the key is that even what is happening now has not figured out!"

Ye Xuanqi's direct sighs, and Chanas next to him seems to feel a little too much. His face is red and he smiles at Ye Xuan. This time he is honest, and he quickly retreats to the side, not dare to scream again. .

These strange rustling sounds are still thousands of miles away. Ye Xuan looked through the small observation window around the abdomen cabin with the naked eye. Nothing could be found at all. The surrounding area was still only a tattered universe with a very faint light.

In desperation, he can only give instructions to the mechanical devil, use the electronic wave frequency of the Hoshino Life Fortress to detect, and then display the results of the detection in the holographic stereo screen of the abdominal compartment.

This process took a long time, and it was less than a minute before and after, and the result came out.

As the holographic stereo screen in front of the eyes flashed, it showed an influence. This time, even Ye Xuan was shocked by the horror, and he was so cold because of what he saw in the line of sight...

Chapter 3496: Zerg world

insect!

Dense bugs!

There is no end to the end, at least, the area detected by the electronic wave emitted by the mechanical devil, except for the inner circle of more than two thousand miles is very sparse, the peripheral insects are almost always.

Although it has not yet reached the point where the whole piece of void is congested to the point where the battleship is inserted without gaps, the density is extremely amazing. The area of the insects seen in the holographic stereo screen in front of Ye Xuan is basically not much. Large blank void.

These insects are large and small, small and hundreds of worms, and a few thousand meters in size. They simply merged with the five high-ranking elites such as Emperor Shaofeng, and the mechanical warfare after the condensed change was about the same size.

And they are all hard-shelled armor worms, not soft reptiles.

All the bugs are black, and the shells of the limbs are covered with oily luster. At first glance, they must be extremely hard.

It has sharp stabs on the limbs and body, as well as limbs and the like, which is a kind of beetle that must be very powerful.

In terms of breath, most black beetles are repaired below the eighth largest black hole, but a small amount is above the black hole. Ye Xuan even saw several twelfth imaginary voids in the holographic stereo screen. Black beetles, judging from the repair, they are even stronger than Ye Xuan!

This is a world of Zerg, and any strong human beings, even the mighty power of the fifteenth world, must be careful.

Because this is only the edge of the buffer zone, if it enters the inner circumference, or even deep in the hinterland of the entire source of the evil, there must be a more terrible black beetle.

It is not necessary that there will be no such thing as the insect king of the Qiankun environment!

Fortunately, these black beetles do not seem to be very violent, and the aggression does not seem to be strong. It should belong to a relatively inert cosmic zerg. Otherwise, any creature entering this source of evil will become the beginning of a nightmare.

In the holographic stereo screen, all the worms are basically not moving in the same place. Even if there is movement, they are swaying around in a small area. The dense scalp is a bit squeaky and strange, that is, their limbs crawl in the void. , touch the sound of some cosmic dust!

Instead of eating or grinding the teeth, the requirements for eating are not very high, which is just the right characteristics of this type of inert beetle.

After confirming this, Ye Xuan sighed. In this case, as long as you are careful, don't disturb these black beetles. It is entirely possible to pass through the area occupied by the ethnic group.

It is no wonder that he did not see the return of five people, including Emperor Shaofeng. It must have passed through the horned worm area that appears on the holographic stereo screen and rushed to the front.

They must not have come for the first time. They have some understanding of this. Otherwise, they will suddenly see such a terrible cosmic zerg, and they will have to turn around and flee.

When Ye Xuan analyzed the results through everything seen in the holographic stereo screen, Chanas, who was behind him, basically had his own judgment. The original greenish look on his face eased a lot, and he apparently realized the cosmic zerg. Not as terrible as they look.

This is true for any inert creature, as long as you don't provoke it, it's basically not too dangerous!

"Shasha ... Sha Da Ren, this worm sea, let's find out the iron worms, I am afraid it is not so easy, maybe the female worms look at the eyes, stay in the worm nest When people go, it is also possible..."

Seeing Ye Xuan staring at the holographic stereo screen in front of him, frowning, the Emperor Wei's commander Chanas seems to think that the opportunity is coming again. The girl's brains are close together and they are encouraged again: "So, in my opinion, we still withdraw first. Well, the five guys are definitely not coming out. Let's take it for granted. If you run into a bad-looking mother bug, you will be in trouble!"

This kind of excuse can be imagined, and it is really difficult for him. Ye Xuan listened straight to his eyes, and he was not interested in taking his cavity. After a little thought, even when he gave the mechanical moth, he continued to move forward.

"Hey!"

After receiving the instruction, the body shape of the mechanical devil suddenly bounced, and the blink of an eye was nearly a hundred miles away, and quickly went to the depths of this buffer zone and went further...

.....

At the same time, the sky in front of thousands of miles ahead!

This place is already in the depths of this buffer zone. It is full of zergs all around, and there are basically not many gaps, but the mechanical warfare of five kilometers long can still move forward, as if they are criss-crossed in a strip. Slowly in the small intestines, the speed is basically no longer considered!

I don't want to get fast soon, unless it's the mechanical moth under Ye Xuan's seat, only about a kilometer or so, how much can guarantee a certain speed!

After all, the black beetles in the surrounding air are all more than a thousand meters in shape, with the dexterity of the mechanical devil, even the small intestines, can quickly intersperse and plunder!

At this moment, the five mechanical warfare of the five high-level people of Emperor Shaofeng and their respective caravans are slowly moving forward in this void.

Ye Xuan's guess is not wrong. This is the first time that they have come, and they have already entered and explored three times before and after. This is the fourth time.

The purpose of the first three entrances was to conduct preliminary explorations, collect some samples at the same time, and bring them back to the Tianji City's base camp Tianji City, and hand it over to the Tianji City General Control Center for the identification and analysis of the immortal starry sky super brain.

In the end, the samples taken out for the third time finally got the exact identification results, so they started the fourth exploration. This time, the number of people coming in is more, and there are eight high-level elites. The purpose is no longer just It's just collecting samples, but it's a bigger plan, taking away an important resource in the core hinterland.

During the first three explorations, the areas in which the top and the top of the elites were involved, including not only the outer periphery of the star field but also the buffer zone of the central domain, even the depths of the source of the evil source, they basically touched three. More than 40% of the area.

Therefore, although Emperor Shaofeng's five people now seem to be careful, they are actually very practical.

In the previous three explorations, they have successfully passed through this central buffer zone. Although there are many black beetles here, they will not attack if they do not take the initiative.

Right now, they just need to advance more than 20,000 miles to the front, and they can leave this central area and enter the deep hinterland of the source of evil. After entering there, although the black beetle is more powerful, there will be other Some rare starry beasts appear, but the number is much less. Basically, the long, long, high-empty voids may not be able to reach one end.

Just as the minds of the five people were slightly loose, a mistake that no one expected, but at this moment, suddenly happened...

Chapter 3497: Star master black armor

"Hey..."

Originally quiet, there were only a few faint dense rustling sounds, and suddenly there was a strange sound of humming, which continued to be similar to the feeling of the space oscillator, and the void was slightly embarrassing. Inexplicably, the scalp is tight, and the bottom of the heart gives birth to a bad feeling!

The five mechanical war worms that were slowly moving forward immediately stopped and watched with vigilance, but in the end, they found that the source of this strange squeaky voice was directly in front, and it did not seem to be. Recently, it seems that it is not in the buffer zone of this central area, but in the deeper hinterland of the deeper source of evil.

In this case, they have not encountered it before entering the satellite exploration three times.

Basically, the three areas of the source of all evils are like having a clear dividing line, and the difference between them is obvious.

In the peripheral area, there are only countless voids of size and no black beetle.

In the buffer zone of the central area, there are both void cracks and black beetles, and there are many black beetles in this area, which are the existence of the thirteenth big horizon.

In the innermost deep hinterland, the number of black beetles is sharply reduced, but as long as one is present, they are all above the beginning of the thirteenth world, and there will be other kinds of starry beasts, all of which are domain beginnings. The above strength.

These powerful black beetles and starry beasts will not come to the central domain buffer.

This time, there was a strange humming sound from the deep hinterland in front to the buffer zone of the central area. The matter was so fascinating that the five people of Emperor Shaofeng were secretly stunned, and they did not dare to move on.

But now it has entered such a deep depth, just need to go forward more than 20,000 miles, you can enter the deep hinterland of the star of the evil source, then it is not too far away from the target location.

If they withdraw at this moment, they are not reconciled.

Moreover, this new situation that has not appeared in the past three times, if it is not clear, what should I do if I come in again next time?

What's more, there is still a roadblock behind them. They simply have no way to go back.

In this case, the five-headed mechanical warfare immediately communicated with the electronic wave frequency, and soon a unanimous decision was made.

In any case, first explore the source of this strange humming sound. If it is a false alarm, then go ahead again. If it does represent a huge danger, then it depends on the situation, and then make a calculation!

However, this cicada sound is clearly transmitted from the deep source of the evil in front of the front, at least 20,000 miles or more, and the electronic wave frequency of a single mechanical war insect, in this environment, the farthest It is not enough to explore a void range of five thousand miles.

The only way is for the five-headed mechanical warfare to adjust the electronic wave emitted by each of them to a band, form a resonance, and then extend it in a directional manner. In this way, it is basically guaranteed to detect the general situation of the directional area beyond three to four thousand miles. !

This is the only way to dispose of it. There is no choice, so there is no need to hesitate. After Emperor Shaofeng's order, the five-headed mechanical warfare immediately turned on the shipboard electronic wave frequency system, adjusted to a band, and successfully formed. Resonance, tied together, toward the front, the direction extended out...

As this powerful and invisible electronic wave frequency smoothly extended to the front, the hearts of the top five cores of Emperor Shaofeng and other high-level people also mentioned the eyes of the blind.

This strange situation has not been encountered five times before. This situation is unbearable, but it has appeared. This does not seem to be a good sign, so that they have a slightly ominous feeling.

However, although they are worried, they are not very worried. After all, the source of the humming sound is still more than 20,000 miles away. If the result of the detection is a huge danger, it will be a big deal to evacuate immediately.

At the same time, the source of all evils is in front of more than 20,000 miles deep in the hinterland.

After entering this area, the number of void cracks was less than half, and the dense black beetles disappeared almost completely. Although the whole deep depth of the hinterland was darker, it was much quieter and colder.

However, occasionally one or two passing singular scent, but it is extremely powerful, at least it is the cultivation of the thirteenth big territory, even the atmosphere of the fifteenth world is not uncommon.

.

At this moment, in front of a virtual air in the four or five thousand miles, there is a burst of humming sounds that are not endless but not very embarrassing.

Along with the bursts of humming sounds, there seems to be an extremely powerful atmosphere mixed in it. This breath, the fifteenth world's great power can never reach, is actually a star beyond the Qiankun The main level of blame.

I just don't know if I'm so worried about my breath being too strong, so as the humming sounds gradually drift away, the unique atmosphere of the star-class monsters that are doped in it is getting weaker and weaker. Close to the edge of this deep hinterland, it is completely undetectable.

This corner of the sinister source of the starry field in the depths of the hinterland, the usual strong atmosphere of the original atmosphere, but at the moment, because of the sound of the singer of the star-class scent, the ordinary is quite active The strong breath, basically all disappeared!

The reason why I didn't dare to take the lead again was because of the fear of the star-level grotesque who made the sound of humming.

On the other hand, it is because they are here for a long time, and all of them know the details of this strange squeaking that will appear once in a hundred years!

This kind of humming sound is the biological wave signal of the black beetle's mother courtship!

The mother of this black beetle is a star-class monster that transcends the hustle and bustle. It is about 10,000 meters in size, but it is very lazy with all other black beetles. Even this kind of thing is a hundred years. Only once.

Perhaps it is precisely because of a hundred years, the number of times is too small, whenever the black beetle is estrus, its requirements for the number of male black beetles are naturally higher.

And the degree of tossing is also fierce, basically the males that are summoned by it, few of them can survive, tossing and dying!

Over time, the number of higher-order black beetle males in the deep hinterland of this evil source is getting fewer and fewer. In desperation, this time, the black armor will summon the male black beetle's courtship bio-wave frequency. Passed to the outer buffer zone.

However, the black beetle in that area has a low degree of evolution. After feeling the breath of the mother, they are scared to the spot. There are few reactions, no motion, let alone the response of the biological wave. It is.

This makes the black armor emperor angry, and now it is in estrus, extremely dry.

Just at this time, an extremely strong wave frequency signal was captured by it. Although it was a bit strange, the black armor emperor in estrus obviously couldn't care so much, and it was rare to encounter an active response, and it was so strong. This makes it a kind of surprise that the firewood meets the companion.

Therefore, the black armored mother did not think about it, and locked the wave frequency signal in the first time...

Chapter 3498: God's will

This wave frequency signal is jointly issued by five pairs of mechanical warfare, such as Emperor Shaofeng!

Either it is a godsend in the darkness, or it is the demon of the Emperor Wei, who is the horror of the poison on his mouth. He was actually said in his words.

In a word, the core of the five heavenly celestial beings, such as Emperor Shaofeng, is really troublesome this time. It has been fancied by a star-level black armor who has surpassed the power of Qiankun.

It happens that the five of them are now the body of the mechanical war insects. Even if they meet the head of the black armor, they will not see the light.

And these five unfortunate guys are now in a state of mechanical integration with their respective cars. Everything that happens on the body of the mechanical warfare will be turned into feelings and consciousness, and will be received by their electronic consciousness.

In a simple sentence, it is... feeling the same!

This is definitely the rhythm of the dead. It is stunned by a horrible giant black beetle. Even if it is not a human being, but a robot, it must live in anger and die!

For all of this, Emperor Shaofeng and other five people are still completely ignorant.

Although the black armored emperor has already captured the wave frequency signals sent by the five of them, but after all, it is a star-level monster that has surpassed the mighty power of the Qiankun, one-sidedly blinding their perception ability, or not at all. The problem is a piece of cake!

In fact, the black armor emperor did not only simply obscure their wave frequency signal perception, but now it is in a period of estrus and eagerness, and it is simply hunger and thirst.

After locking the wave frequency signal sent by the five people of Emperor Shaofeng, the black armor emperor sacrificed an avatar for the first time and rushed toward the source of the wave signal.

It's going to pick up the groom's nephew tonight, and love it a lot. In these years, it's really rare to respond to its courtship bio-wave frequency so much. Bit, let the black armor mother spring heart comfort!

Its avatar is actually a black beetle, but it is in the form of energy. It is condensed by the biological wave frequency unique to the black beetle.

This energy form of the black armor is not too small, it is five kilometers, a few laps smaller than the body, the strength is weaker too much, only the ruin.

For the black armored emperor whose body strength is the main character of the star, the energy split of a Qiankun environment may not be a big deal, but for the five guys of Emperor Shaofeng, it is fatal!

If it is outside, the five-headed mechanical armor may not be afraid of a black beetle of energy, at least there is a possibility of spelling. After all, the five guys such as Emperor Shaofeng are the twelfth big void, with their respective cars. After the mechanical integration of this kind of warfare, it became a mechanical warfare of this kind of warfare. Under the five enemies, even the mighty power has a headache.

But here is the source of all evils. The buffer zone of the central area is densely covered with black beetles. It is simply called the sea of insects. In this environment, the five people of Emperor Shaofeng face the worm king of Qiankun. I am absolutely afraid to resist.

If you don't resist at most, you will be taken away by the other party, and as long as you resist, you will definitely hang on the spot.

Even if it is taken away, it is a crisis, even more dangerous, but at least you can live a little longer and have a little more time to consider ways to solve the problem.

Therefore, when the five-kilometer-long body and the energy black beetle with strong energy and strong breath broke through the front of the sea of insects and appeared in front of Emperor Shaofeng and others, the five-headed mechanical war insects were dumbfounded on the spot, slightly shuddering. I don't dare to scream, let alone flee or fight against anything!

The giant black worms of the energy black beetle swept through five mechanical warfare insects. The initial appearance seemed a bit amazed, but soon there were two violent red awns shot, which seemed to be quite satisfactory for this time, not only the new variety. And there are still five heads. Looking at his body, it seems to be hard enough. If you take turns, you can basically satisfy it.

Thinking like this, the energy black beetle immediately made a scream.

The invisible biological wave is divergent and open, and a large number of black beetles in the emptiness around the sky are trembled and shivering under the natural pressure behind the black armor. At this moment, it is a lazy nature, all crawling in the void. Gradually, they gradually squeezed together and pushed the five mechanical warriors, such as Emperor Shaofeng, to the top of the sea of insects.

Then, a large black sea of insects formed by countless black beetles gradually began to squirm, as the ocean waved, pushing the inexhaustible five-headed mechanical warrior to the front, and the blink of an eye was hundreds of miles. Far away...

Above the sea of insects, the core tops of the five celestial groups, such as Emperor Shaofeng, were frightened. The five mechanical warriors were crowded together and their body shape was obviously shuddering.

At the same time, the five emperors of the Emperor Shaofeng launched a secret communication through the wave signal of the war worm.

"There are few...the patriarchs, is this really swollen? What come to such a **** beetle? It actually drives the whole piece of sea of insects to send us to the deep hinterland of the source of evil, this will not be a wish Go back to the old nest and hide it as a food?"

"Let's have a grass! This guy who doesn't have a long brain, I think we need to remind them now, our materials are incapable of digesting, even if we chew it, it is diarrhea..."

"This is wrong, this thing is very necessary, the sixth, since it was proposed by you, in my opinion, this glorious task will be handed over to you?"

"Get out of the way, why do you come up with an idea and implement it? Are you all dead?"

"Don't make a noise, things are not as complicated as you think. Didn't you see that the black beetle in this ruin is just an energy form? It is clearly a avatar..."

In the end, it was the emperor Shao Shaofeng who interrupted the other four high-ranking elites who were almost in the nest. Then he seemed to fall into some kind of thinking, while thinking, while still muttering: "even the body They are all black beetle kings in the hustle and bustle of the world. It seems that their ontology must at least be the existence of the star-level blame."

"It is said that the blood source of the black beetle, a cosmic zerg, is a kind of black beetle. It is obvious that this black beetle is sent by the black worm at the head of the star, but ...What is its purpose?"

"Motherbug! Motherbug? There is just a humming sound..."

When he got here, Emperor Shaofeng suddenly flashed a ray of light in his mind. At this moment, he thought of a possibility, and then he savagely savagely: "Ah... kill a thousand knives, I understand that What a strange humming sound!"

"That is clearly the biological wave frequency of the black armor, this old monster is estrus, this is the courtship signal..."

"No! Let go of Laozi, Laozi doesn't do it, it's horrible!"

The screams of Emperor Shaofeng just fell, and among the other four mechanical war worms, they immediately struggled, and the whole piece of insect seas turned up the black waves in an instant...

Chapter 3499: Terrible

"Hey!"

When the sound of the air broke, a black streamer swayed in the dark void in the cracks of the size of the void, and it was a mechanical demon with a body length of about a kilometer!

It was the mechanical demon that changed the life of the Hoshino, and Ye Xuan and the Emperor Wei of the Emperor of the Emperor were in the central belly of the mechanical moth.

This dark void is in the middle of the buffer zone of the central domain of the evil source. It has stopped from the core of the five celestial groups such as Emperor Shaofeng, and jointly issued the position of the wave signal to the front. More than a thousand miles.

Therefore, Ye Xuan issued a new instruction to the mechanical devil to stop it, because even with the naked eye, he has already seen that the void in front is a bit wrong!

Since entering this buffer zone, the black beetles in the emptiness around the sky have been densely packed, and it is almost like a cow's hair. Even with the slim figure of only a kilometer of mechanical magic insects, it is almost impossible to guarantee full speed because of the capacity. There is not much void in the gap between the feet.

But at the moment, Ye Xuan looked around, surrounded by a large gap of void, almost no black beetles, which is really strange.

However, because in this buffer zone, his naked eye is only a thousand miles away, and this area is obviously the same situation. After stopping, Ye Xuan, after thinking about it, carefully slammed the mechanical moth Concealedly spread the biological wave of the battleship.

Since the Hoshino is a life fortress, its wave frequency is different from that of other warships, and its autonomic controllability is higher. Therefore, if necessary, the extended biological wave frequency can completely achieve greater concealment.

It was only Ye Xuan who did this because of the habitual care, but he soon discovered that this kind of caution had inadvertently prevented him from a big trouble!

He saw a shocking scene in the scene captured by the biological wave of the Xingye Life Fortress!

In such an environment, the biological wave frequency of the Hoshino Life Fortress can only cover a void of five thousand miles, and just in front of the imaginary space of more than 4,000 miles, Ye Xuan once

again saw a large number of black beetles, densely dense. To a greater extent, it has been congested into a sea of insects.

What shocked him was not the black sea of insects, but the existence of the black waves that formed in the black sea of worms!

Five mechanical war insects!

This is clearly the five guys of Emperor Shaofeng, but their encounters and status quo, but it is really speechless, not only Ye Xuan sees a big mouth, the demon emperor behind him, Chanas, is even more dull The color...

The five-headed mechanical war worm, now struggling, screaming, screaming, sprinkling on the black sea of insects formed by countless black beetles...

The scene was once chaotic to the extreme, and even more fierce to the extreme!

After all, Emperor Shaofeng is the core of the Tianji nationality. The cultivation of the Emperor Shaofeng has reached the middle and late stage of the twelfth dynasty. In addition, it has undergone a comprehensive mechanical integration with its respective driver's fortress. The mechanical warfare of the five-kilometer type has made their comprehensive combat strength soar, basically the same as the strongman who was cultivated in the thirteenth world.

The five-headed mechanical warfare is all the same.

If Fei Ye Xuan has a life fortress, he can't compete with it without using some of the most powerful powers and means!

The black beetles in the buffer zone of this evil source are extremely powerful, but they are basically the strength of the black hole. The strongest is the existence of the thirteenth big territory.

Therefore, at this moment, the five mechanical warfare insects were sprinkled, and the black-spotted sea of the sea was suddenly a **** hurricane, a sickle and a hammer and the like, and I could see a head from time to time. The black beetle was cut open or shattered.

These five guys are clearly being rushed. At this moment, the vast black beetle is holding the ocean at the tip of the wave and moving toward the front, while rolling and rolling, while slashing the knife and stabbing the hammer, even the anti-matter The death light cannons are all started.

From time to time, I can see that there is a black anti-matter energy light column in the abdomen of the five-headed mechanical war insects. At this time, there will be a large hole with a diameter of about two kilometers between the insects in the bottom, which is a lot of black. The beetle was instantly destroyed by the energy beam of the antimatter dead light cannon.

Just like the majestic black ocean, suddenly a large piece of seawater disappeared.

It is a pity that this black ocean is too wide. It stretches for more than a thousand miles. The waves are very turbulent. It is just a hole with a diameter of about two kilometers. It has no meaning at all. A wave will fill the gap and continue. Carrying five mechanical war worms rolling over the waves, moving toward the unknown void in front, moving quickly and constantly...

In this scene, I saw Ye Xuan and Chanas stunned.

The five guys clearly have made all the stops, and the antimatter deadlights that fired a shot from time to time are proof that they are clearly waiting for the recharge to complete, and immediately start the dead light cannon, then cool down, and the cooling period is over. Immediately, it is the second shot.

Even so, but still can not change anything, has been on the horrible black ocean rolling wave, the farther and farther!

"God, what did the five guys do? What caused them to be so angry?"

Ye Xuan's sluggish face, while manipulating the mechanical devil carefully followed behind, muttered: "These black beetles are clearly inert, as long as they don't actively provoke them, even from them. By the side, there will be no attack, but they..."

"Shasha ... Sha Daren, this place is getting worse and worse, let's go back."

Behind him, Chanas's voice rang again, and he brought a crying room. Finally, he raised his hand to the end of the holographic stereo screen in front of him. He shook his face and pleaded: "Look at you, this nest has a distinct head. Children's, the breath of the front of the head... My mother, that is the great power of the fifteenth world. It must be only a mother, look at these five big bugs!"

"Looking at us is a bit too insecure!"

"If you are also seen by the mother worms, don't you have to catch them in their nest? If you don't need anything to do in the future, just wait for the favor of the mother worm to help them make a small bug!"

"Mother?"

Ye Xuan stunned, his face suddenly became strange, did not go to take care of Chanas, but immediately launched a search in the data repository of the body swallowing system.

As for the conditions of the search, it is naturally the black beetle's insect mother.

Soon, the relevant information was found and appeared in Ye Xuan's mind.

This information is very detailed, and describes the ethnic characteristics of the black beetle, as well as its ethnic architecture, including the black mother.

Ye Xuan even exclaimed when he lost his voice: "Rely! This is really terrible. The original screaming sound is actually the biological wave frequency of the insect mother courting. You old things, the mouth must be wiped with poison, actually I was told by you!"

Chapter 3500: More like a dog

"I want to go back! Shasha... Sha Daren, you let me go, I don't go forward, it's too scary!"

Upon listening to Ye Xuan's words, the Emperor Wei's leader, Chanas, was so scared that his face was green and green. This time it seemed to be ironic. He asked Ye Xuan to let him leave the mechanical demon. This guy refused to go forward. .

"you sure?"

Ye Xuan is also speechless. He turned to Chanas and pointed to the way he followed: "Now this is the buffer zone in the central area of the evil source. From here, go out to the edge of the peripheral area, in the void. There is no heaven and earth aura, you have to explore the way all the way, hundreds of thousands of miles away, are you sure you can leave the source of the evil before the force?"

"thump!"

Listening to Ye Xuan said that when Chanuston was smashed, he sat on the floor of the abdominal chamber and his eyes straightened.

In front, the undulating black sea of insects has gradually gone away. Ye Xuan did not pay any attention to Chanas. Even if he provoked the mechanical demon, he added a little speed and stayed behind for a thousand miles. Followed up.

Soon after, the end of the buffer zone of the source of the evil is coming, and the dark space in front of it reveals a dark and dark dividing line. This is the buffer zone of the central domain, and the other side of the dividing line is a darker world. .

There, it is the core hinterland of the source of evil!

The black sea of insects in front quickly crossed the dividing line and entered the core hinterland. The void in front of a thousand miles was empty and seemed to be deserted.

Ye Xuan speeded up again, followed up, and did not hesitate to cross the dividing line, and finally entered the core hinterland of the source of evil, but the system sound that was originally expected did not appear.

Generally speaking, if the target of the system exploration mission is within a certain range and the system can perceive it, it will immediately issue a prompt, but now there is no, only the target is not in this corner, Ye Xuan has to look around!

In front of the line of sight, the raging black sea of insects is still moving. After arriving here, the sound of humming in the void is even bigger, and there is a feeling of irritating sensation. It seems that there is some urgent need.

The vocabulary flashed in the minds of Ye Xuan and Chanas. They immediately let them subconsciously exchange their eyes and then shuddered together.

"This insect mother is actually a star-level monster that transcends the power of Qiankun?"

Ye Xuan also possesses the knowledge of the human monk, the spiritual strength of the devil's strongman, and the electronic consciousness of the mechanical and intelligent life. The perceptive power is extremely keen, and Chanas has not captured anything from these buzzing sounds. It has already sensed the scent of the star-studded Lord.

In the muttering, Ye Xuan did not hesitate, even when he provoked the mechanical demon, he quickly went in the other direction.

Just kidding, this is a star-level eccentric who is beyond the power of Qiankun, and the mechanical warfare of the alloy body is not let go, whether it is to taste a fresh or really hungry to a certain extent, There is a certainty that is certain, that is, if Ye Xuan stays here, once he is discovered by the other party, he must have a cup.

Don't look at the mechanical demon body size is a lot smaller, maybe in the eyes of others is a small and cute little cute type?

That is absolutely life-saving.

Anyway, the Emperor Shaofeng five people did not live this time. Even if they did not die under the black-skinned mother of the main star, the final result was definitely banned, slowly playing and trying to escape. Do not make jokes.

So Ye Xuan doesn't have to stare at them anymore. Since the other party can't escape, there is no need to remember their lives. People can now be the face of the main star-level black armor. Count them, too. Danger, not cost-effective!

Seeing that Ye Xuan is not crazy this time, out of the safe, away from the star field of the star-level black armor, the queen of the queen behind him, Chanas raised his hand and rubbed a forehead. The cold sweat, the whole person is like a vain, and once again sat down on the floor of the belly compartment.

Looking back at the experience on this road, before entering the starry field of the evil, everything is normal. After entering the star field, the sand man is like a demon, completely changed into a person. This is a rumor. what.

"Sure enough, it is the source of all evil. This ghost place, if Laozi can live out, this life will not come again."

Sitting alone on the floor of the abdomen cabin, Chanas muttered to himself, this time it was really scared enough, a star-studded black beetle with a mechanical warfare, which is absolutely absolute. It is the existence of a nightmare level!

Soon, the mechanical worms left the star field where the black armor was located. Gradually, the kind of humming sound of the mother in the void, from strong and weak, finally disappeared completely. Now!

However, everything is not too flat.

Previously in the area where there was a screaming screaming, in addition to a black beetle in the void, any other kind of starry beasts could not be seen, and they should all be scared away.

If it is smashed by a black king of the main star, even for the starry beast, it is absolutely terrible.

But now, with the screams of the black armor's courtship, it is no longer smellable, and some other kinds of starry beasts are gradually appearing in the void.

The initial is only one or two, but soon, with the deepening of the mechanical devil, the number of various starry beasts in the void is also increased. From the perspective of their breath, they are all above the 13th big territory. Repaired.

Ye Xuan did not dare to make a second. After all, this is the core hinterland of the evil source. He controls the mechanical demon, carefully avoids these starry beasts, and opens the hidden array to try to converge the mechanical monsters. Breath, don't let yourself be exposed.

Soon after, there was a giant blood-stained dragon with a body size of a thousand feet in front of the virtual sky. The atmosphere of the whole body reached the late stage of the fifteenth world, and it was extremely powerful.

Ye Xuan's saliva was seen out, and his mouth was muttering to himself: "Hey, the **** dragon in the late Qing Dynasty's dynasty, if the dragon's liver can get a braised red, how much? Delicious?"

"Hey? In the distance, there is still a glazed phoenix in the hustle and bustle of the hustle and bustle? What is this place? Is it a dog like a dog? Is it a back garden where a certain **** man supports a variety of mountains and seas? How are all kinds of The best food in the top?"

"This uncle is looking at it and he can't move it..."

"thump!"

Not waiting for his words to finish, the demon emperor behind him has already fallen down and sat down on the ground again. This guy was frightened and looked at Ye Xuan with a stunned look.

At this moment, he deliberately remembered the two big foods of the singer and the sorrowful, and the one in front of him seemed to be weaker than them.

No, go back to the source of all evil, you must be separated from him, the courage is too fat, and even the rhythm of Qiankun's power wants to eat...
