

Super D. S 3501

Chapter 3501: The star owner walks everywhere

The little half day passed quickly!

The source of all evil is a vast expanse of land, which is very wide. Even if it is not a month, it may not be able to reach the end. Therefore, even if Ye Xuan is somewhat intolerant, the long-awaited system prompts never appear. .

It is a variety of starry beasts with different forms and breaths, and they are all along the way, seeing too much.

Ye Xuan also tweeted a few words at the beginning, but later, even he was a little scared, closed his mouth, carefully controlled the mechanical moths slowly, did not dare to say anything more !

Because as time goes by, the starry beasts seen in the emptiness around the sky are getting stronger and stronger, and the dragons are more like dogs. The real situation is that the stars are everywhere!

For example, at this moment, the virtual air in the far side of the right side clearly has a similar look and unicorn, but it is a green starry beast. It is not very big, only about a thousand feet, more than the average Qiankun To be a small lap, is crouching in the void, but the smell of the body is clearly the star's main territory.

It is a bit stronger than the previous black armor!

Not far away, the left side of the void is far away, there is a humanoid beast, the body of the body, the body is full of mouths, not to say how many heads it has, the head is still only one, those The mouth is directly on its limbs and torso.

And they are still swallowing and eating. As for food, they are small beasts of the thirteenth big territory, including black beetles.

This multi-toothed beast is absolutely extremely fierce, because there are no other starry beasts around the emptiness of this emptiness, and there are countless big mouths that are being swallowed and swallowed by it.

Ye Xuan even saw a Taikoo konjac, suspected of having some kind of strong blood from the ancient times, and they are close to returning to their ancestors.

This Taikoo konjac has three heads and six arms, and even three of his torso. The back is backed by a konjac that is like a three-headed person. It is thousands of feet tall and has a terrible atmosphere. It reaches the level of the star consortium in the late stage. More powerful than the mouthful of the beast and the black armor.

This is not the most critical.

What is even more shocking is that the three bodies of this ancient konjac are completely different.

The first is the flesh and blood, the whole body is black, the fur is shining with faint light, and it is hard at first glance.

The second is the body of the cheekbones, which is full of gray gold and exudes a metallic texture, giving people a feeling of being cold.

The third is an illusory black fog body, breathless, as if there is no generality at all, it is completely a black mist, only two smashing two horrible blazing red awns.

This Taikoo konjac is the most powerful of all the creatures that Ye Xuan has seen in this horrible source. Even the most powerful one I have ever seen since Ye Xuan's life. It is.

Of course, the ancient sacredness he saw in the pictures of the ancient gods and other ancient gods passed through, such as the headless baby corpse!

This kind of existence, he did not dare to approach, but still nearly 10,000 miles away, he hurriedly manipulated the mechanical magic insects in a different direction, far away.

The wave frequency signal of the mechanical monster can only explore a distance of about three thousand miles in the core hinterland of this evil source, and Ye Xuan's consciousness can only explore the distance of seven or eight hundred miles.

Nowadays, he can also sense the atmosphere of the ancient konjac beyond thousands of miles, including the existence of the previous multi-mouth beast, because these existences are too powerful, and the atmosphere is the core of this evil source. You can't cover and block the void!

If this is not the case, one end hits, in the face of this level of existence, the mechanical magic insects have no chance to struggle, and most of them have a cup on the spot!

Gradually, after changing the direction, as the mechanical magic worm gradually drifted away, the horrible Taikoo konjac was finally invisible.

But in front of the void, there are some other starry beasts. It's really like a dog. The star owner is walking all over the place. Chanas has already been scared. Even Ye Xuan, the whole heart has sunk to the bottom. I haven't spoken for a long time.

This source of evil is too strange, whether it is the buffer zone of the periphery or the central domain, or the core hinterland of the present, all of which are covered with numerous large and small voids, as if this large star field is at the root of it. A tattered big bag that has been cut with countless knives.

However, it has not collapsed. After entering this place, as long as it is not touched by those void cracks, it will be innocent.

This is not a big deal. The key is the starry beast in this star field.

Those black beetles in the buffer zone of the central domain are still acceptable. After all, even in the normal cosmic sky, there is no boring such zone, which is occupied by a certain ethnic group and inhabits a large number of such ethnic organisms.

But this core hinterland is too strange and not in line with common sense.

If only the same kind of starry beasts are gathered together, but in this core hinterland, the density of the starry beasts is not very high, but various, Ye Xuan walks all the way, just one and a half days. At the time, I saw at least hundreds of different starry beasts.

And the strengths are all above the beginning of the thirteenth world, and there are not a few of them.

It is said that a mountain can not accommodate two tigers. Under the background of the starry sky, this sentence applies equally.

Exhausting the three major cosmic planes, basically can't find the same situation as the core hinterland of this evil source. It is a miracle that a large number of different kinds of strong and fierce beasts of different ethnic groups live here.

A miracle of a strange and strange atmosphere!

In such a sinister environment, to complete this system title exploration task, the difficulty is too big, we must know that the system title exploration task is only one month.

Now that two days have passed, Ye Xuan has entered the core hinterland of the star of the evil, but other clues have never been obtained. He now even the target of the mission, the so-called source of evil. What is it, I still don't know it.

A sway, three days have passed, and the calculation time, this time the system exploration mission has passed for five days, and the rest of the time is only twenty-five days, but Ye Xuan still has nothing to gain, and the time limit is still there. No results, it will be automatically determined by the system to explore failure.

He couldn't help but be anxious.

It was also at this time that the dark void in front of the scene finally appeared in a different scene from the previous one. After entering the line of sight, Ye Xuan suddenly opened his mouth and his face was shocked.

Behind him, the demon emperor led Chanas, and he fell down again on the ground. This time, his eyes turned, and he almost fainted on the spot!

For a long time, Ye Xuan whispered to himself: "God, what did I see? This is an illusion, or a prison..."

Chapter 3502: Holy furnace in the prison

The reason why everything in front of the sky and Ye Xuan's previous sights are only different, but not completely different, is because of the distant space in front, but also a large number of starry beasts.

This is the same as the scene along the way.

The only difference is that these starry beasts are all dead!

The body is huge, and it shows the blood and the body, so it straddles the dark void in front, and most of them are crippled.

Ye Xuan even saw a Taikoo konjac, the breath is stronger than the one he saw on the way. The blood is full of tens of thousands of feet, but at this moment he is lying in the void.

Among the three different corpses, the black flesh and blood has no head, and the body is still full of defects. It is still flowing with golden blood and revealing a rich and ancient atmosphere.

In the other two bodies, the body of the cheekbone is almost completely broken, and only the head is still hung on the shoulder. As for the dark foggy illusory body, it has dissipated...

In addition, there is a silver dragon in the distance, leaving only the second half of the body, the first half including the dragon head, all gone.

Further away, there has even been a huge phoenix. Although it has fallen, but above the body, it still sizzles with phoenix flames, and it also shows a strong sense of ancient...

There are too many corpses of this kind, and any one is beyond the horror of the star master. Ye Xuan is too afraid to approach. He tries to approach a multi-armed monster, just approaching the edge of Wanli, mechanical. The huge body of the worm began to tremble, and even the numerous micromolecules of the world's worms were resisting and unwilling to approach.

Ye Xuan's heart is a touch of enlightenment. If it is too close, the mechanical devil will disintegrate, and he and Chanas hidden in the abdominal compartment may be seriously injured or even fallen.

These creatures are too powerful. I don't know how many years have fallen here, but they are just the breath that comes out of the broken body. They are all powerful, and even Ye Xuan's cultivation is only a thousand miles away. Closer, you will encounter ominous!

What shocked Ye Xuan most was that the bodies of these powerful creatures and wrecks all exuded a rich and ancient atmosphere, so that after arriving here, even the void was full of the prisoners in the valley of the Forbidden City. The same breath in the cage.

The only difference is that the empty cage, the whole is coming from the wild. It is suspected that the void of the ancient era was degraded and turned into a cage.

Here, it belongs to the world, but before the endless years, it was torn into the void, and a large number of ruins of powerful creatures in the ancient times were put here. The rich and ancient atmosphere radiated from these wrecks gave Ye Xuan the illusion.

Let him almost think that he had encountered another ancient void like the cage in the valley of the Forbidden City.

"Who is it, is there such a big handwriting? It is not weaker than the old cage that the Devil's Star is bound to the valley."

"These corpses are extremely powerful. They come from the ancient times. Although they are not the ancient sacred ones of the Golden Dragon, they are even weaker than the sacred sacred and **** lions. Some. But they are, after all, the creatures of the ancient times, is it also fallen in the battle of the world?"

"I was actually posted here!"

"What is the purpose? And...what year did they belong to which camp?"

"In addition, the stars and monsters that I encountered when I walked all the way, even the stars and monsters of the star-class monsters, including the black armor mothers... Are they descendants of these wild creatures?"

"It is for this reason, so a large number of powerful beasts of different races will all gather in the outer peripheral areas, and will not leave, because the wreckage of their blood ancestors is at the deepest point of this evil source? ?"

These words, like a nightmare, followed Ye Xuan's muttering to himself, and a sentence from his mouth, after the introduction of the Emperor Wei's ears in the back of the ear, this guy finally could not bear the shock of his heart. Regret, the white eye turned over and directly fainted!

Ye Xuan's whole heart has also sunk to the bottom!

For this time the system title exploration mission, he has become more and more bottomless.

Although the core hinterland of this evil source is not like the ancient prison cage connected to the valley of the Forbidden City, it is a mysterious void from the ancient times, but after all, there are so many wild and dead creatures appearing, and the relationship with the ancients Everything can't be simple.

The remaining deadline is only a short twenty-five days, Ye Xuan is really not sure!

But he still did not give up, after the shock of his heart, Ye Xuan took a deep breath, adjusted his mentality, forced to calm down, and then urging the mechanical demon, and moving forward again.

Of course, on this road, it is basically a thousand miles away, far away from those ruins of the ancient ruins that exude a strong atmosphere, and dare not be too close, so as not to be unfortunate.

It's really too weak to be repaired. Even if Ye Xuan has the strength of the fifteenth world, he will not easily let these old wrecks pass. Every broken body is a treasure. Some of them are still flowing with golden blood.

These things can all be true flesh and blood medicines. If they are used in the Shennong Ding to cook and refine, the Dan Pills that have been refining must be extraordinary, and it is not impossible to live and die.

Unfortunately, I can only give up now.

Fortunately, no one dares to explore this piece of void. Even if it comes, it will go to the periphery of the core hinterland, and see the mighty and star-studded monsters who have gone all over the place, and they will be scared to turn around and quit.

In fact, this is true. Even if Emperor Shaofeng and others entered the previous three times, they stopped at the strip and did not come to the depth of the core hinterland.

I didn't dare to move on!

At this moment, Ye Xuan can only keep going on the scalp, because this time the system title exploration task can not be defeated, otherwise the cost is too great.

Three days later, the time has passed for eight days. In front of the sky, there are finally different scenes.

For three days, Ye Xuan did not know how many sorrows and sorrows were seen on the way. Both he and Chanas were numb.

At this moment, this dark and incomparable void, suddenly appeared in front of a silver-white luxuriant, in this dark endless void, revealing a rich sacred atmosphere.

In the next moment, the demon emperor behind him, Chanas, took a sigh of relief and shouted: "God, what the **** is this? Say good hell? Is this the deepest?" How could a sudden emergence of a holy furnace?"

Yes, in front of the void, a huge size like a star, the whole body exudes a sacred milky white giant ding, so suspended in the void, slowly turning, regretful, even Ye Xuan, have been watching Up...

Chapter 3503: The truth of terror

The huge furnace that exudes the sacred milky white luxuries is like a huge star, and it is slowly turning, indicating that it has a certain power, and this power still exists. The power of the sacred furnace is still running.

On the outer wall of the furnace, there are countless crepe lines, which are densely packed. Ye Xuan does not know anything. Any one of the patterns, he stared at a little longer, and felt the pain in his eyes. Even the gods were somewhat unstable. .

In addition, on the top of this huge furnace, there are countless chains, one end of the chain is connected with the body, it seems that it has not entered the inside of the furnace, the other end, it goes deep into the end of the empty end. In the void of the void.

There are almost no such chains, but their roles are distinct.

On each of the chains, there are some fascinating flows, but the direction of these luxuries is different.

Some of the fascinating chains on the chain are flowing from the end that extends to the depth of the void to the inside of the ding, seemingly conveying something to the furnace.

And some of the brilliance on the chain is from the head of the connecting furnace, along the chain, deep into the cracks in the distance, there seems to be something, is being transported out of this chain...

If this is the case, then this star is generally a huge furnace, clearly a transfer station.

Some things have been transported in from some of the void cracks, transformed through the furnace, and then transported out along with other chains.

No one knows what is being transported into the stove, and no one knows where they came from.

Not even knowing what the material being transported is, and the final destination they are transporting to, where is it...

Just as Ye Xuan was shocked by all this, I don't know why, the star in front of it, suddenly suddenly changed.

"Booming..."

"boom!"

The loud roar of the sound rang, connected to the numerous chains of the furnace, and suddenly dozens of lights lit up, and the luxuriant mans flowing above the chain, instantly made a big hit.

Ye Xuan noticed that these chains are all the kind of Huimang that is from the cracks in the distance and toward the furnace.

In other words, these dozens of suddenly lit chains should be conveying something to the furnace.

Each chain is a section, not a pipe, but Ye Xuan clearly has this feeling, and some things are moving along the chain, turning into a fascinating, conveying to the furnace.

This situation lasted for about a minute or so, and the radiance of the dozens of chains suddenly returned to normal, and the speed of the furnace was also fast, but it was still very slow, after all, its huge size was there. .

The strange thing is that no matter how the furnace turns, there are countless chains, but they never move. They lie in the void, and they are silent. Only the faint glow is flowing...

Soon, the star-like giant furnace swayed suddenly and suddenly, and the top of the tripod was sprayed with milky white light. It seemed that something had to be rushed out from the inside. Such a scene, and

some visions of heaven and earth before the birth of the treasure, Quite, there are treasures that rush to the ground.

"God, big creation, this is definitely a big creation!"

Behind Ye Xuan, I don't know when the wrestling Devil's Guardian Chanas was suddenly excited and exclaimed: "The treasure is rushing, this is definitely the singularity of the birth of the treasure, Shasha...Sha Daren, This time we are developed."

"call out!"

His words just fell, a golden light rushed out of the huge furnace, seemingly quite clever, actually came to the void of the mechanical magic insect, so, in Ye Xuan and check In the holographic stereo screen in front of the Nass, it seems that the golden glow that is coming from the parabola in the huge furnace is getting bigger and bigger.

A strong sense of crisis suddenly hit the heart of Ye Xuan, he did not hesitate for a moment, immediately issued a retreat command to the mechanical war insects.

"Hey!"

"Hey..."

When the sound broke, the mechanical devil jumped all the way, but this time it was pulled back, for hundreds of miles, followed by the second jump.

In this way, within a short period of time, after several bounces, the evacuation of more than two thousand miles has been evacuated, and the golden glory that is coming from the front is fascinating, hanging over the miles. Outside the void, no more movements.

In the next moment, Ye Xuan and Chanas saw the true face of the golden awning.

That was a corpse!

A single-horned golden eagle, a thousand feet in size, but only half of the body, flesh and viscera are all pale gold, the body surface is black feathers.

There is a little golden glow on the black feathers, and the whole body is covered with golden fireworks from the body. However, these golden fireworks are not pure and have gray spots.

Its breath is also beyond the existence of the star master, the mechanical magic insect can only be seen from a thousand miles away, once approached, the alloy body of the magic insect will collapse.

"Mom..."

After seeing the so-called heavy treasure, it was this ghost. After a moment of excitement and excitement, Chanas's **** fell down again on the ground, and his mouth screamed, his eyes turned and he was scared. past.

Ye Xuan also opened his mouth, this scene is too strange, even he was somewhat shocked.

Then, with a flash of light in his mind, Ye Xuan suddenly thought of something, his face suddenly changed wildly, and turned to look at the wreckage of other ridiculous creatures scattered around the void.

Lost voice exclaimed: "Don't all the chains that Huimang flowed from the end of the void to the furnace, and the corpses sent to the furnace are the dead bodies of this ancient creature?"

"Where is the source of these chains? Is it similar to what I saw in the sea of the tortoise, the mysterious void of the skeleton of the giant tortoise?"

"But this pedigree is not pure, the one-legged Jinwu, including the ruins of the ruins of the ancient dynasty in the imaginary sky, are all the defective products spit out by the huge furnace?"

"Even if the wreckage of this existence is unqualified and unacceptable, and when the waste is thrown away, how powerful is the wreck that can be left in the huge furnace?"

"Is it the power of the ancients... or the wreckage of the ancients?"

"If everything is true, then, this huge furnace will refine the ruin of the ruined ancient ruins, and what is the final result? The final product, through another chain, is transported away. Where is it?"

This truth is simply terrible!

What kind of existence is there, and has created such a refining system? The existence of such a sacred level as the Nether Giant tortoise may be regarded as a raw material. Perhaps, when it is in the mysterious void, it is finally annihilated by the magic blade that is inserted into its back, its body, Will also be delivered here.

Realizing this, Ye Xuan shuddered and the whole person fell like an ice cave...

Chapter 3504: Baby scream

Ye Xuan's guess is too amazing, it's a big horror!

Although Ye Xuan is not willing to believe and accept, he knows that it is true.

And most of this is the commander of the hostile camp of the year, that is, the heavenly eye that is suspected to represent the will of the wilderness!

The old prisoner connected to the Valley of the Forbidden City is his handwriting!

This is more complicated, more purposeful, and it is his handwriting to create a larger virtual refining and large-scale battle!

In the battle of the ancient world, the camp of headless infants was clearly defeated. Therefore, after the war, all the defeated parties were not qualified and spared no effort to pay attention to them. Only the one who defeated was able to go to leisure to get rid of all this.

Ye Xuan had doubts before. There were so many powerful ancient supremes in the ancient times, and even the existence of the heavenly eye, why did you not see it in this world?

Now it seems that they are clearly not degraded, all crouched up, perhaps because of serious injuries to be recovered, perhaps because of some other plot!

For example, in front of this virtual refinery, Ye Xuan has a little understanding of its basic operation, and even the raw materials refining in the huge furnace, he has amazing speculation!

But for its ultimate purpose, Ye Xuan still knows nothing about it. Even if he opens his mind again, he will never be able to guess the existence of Tiandao Qingyan!

In the war of the past, there were obviously many powerful wild animals, and they were seriously injured.

For example, the Void Giant Turtle is like this, and there are more similar wild creatures in the mysterious unknown plane where it crouched.

Heavenly green eyes are terrible, and they are killing their vitality. Once they are completely degraded, they will use their physical wrecks to refine them with this huge furnace.

What is it extracted?

Following another kind of Huimang chain, where is the extracted material transported?

What is the end of the benefits?

All of this, entangled in Ye Xuan's mind, turned into a huge problem, circling, and for a time, he even forgot the task of the system title exploration this time, one mind is pondering, this is the front The secret of the horrible wilderness!

It is also at this time, the difference is steep!

Just turning around in Ye Xuan's mind, thinking about all this in front of him, his chest position suddenly became hot, and then a whistling sound filled with sorrowful resentment suddenly sounded.

The headless baby corpse, which has been in a state of silence for a while, seems to have suddenly felt awakened because of what it has sensed.

Ye Xuan was shocked, and then the look on his face was dignified. All of this was the same as the old prisoner connected to the Valley of the Forbidden City. It was the suspected hostile commander, that is, the hand of the heavenly eye. It is the enemy of the headless baby corpse.

And this place must be a plot with some kind of secret, but it is some sort of arrangement after the other world's war in the past, from the distant ancient times to the present, if the headless baby body does not know it, Now that I know it, how can I not be angry when I see it with my own eyes?

"what sound?"

The sound of the whistling of the headless baby corpse is too shocking. Not only is Ye Xuan surprised by it, but it is just scared to faint the past, and the demon emperor led Chanas, who was also awakened and shocked. I climbed up in fear and asked, while looking around, because he felt that the horror and screams he had heard in the middle of the squad did not seem to come from outside the ship, but inside the belly of the mechanical worm.

It was also at this time that a **** mans rushed out from the chest of Ye Xuan, and the blink of an eye turned into a headless baby corpse, suspended in front of Ye Xuan, the neck of the baby corpse without head, skull He was held in his arms, but he had been closed his eyes, but at this moment he suddenly opened his mouth. The middle of the coffin was full of blue-colored lines, stunned and horrible, just intersecting with the sight of Chanas who just got up.

"Mom..."

This kind of love is too horrible, a baby who is not too big, actually holding his own head, wide-eyed eyes, looking at him with all eyes, no one can stand it.

Chanas screamed, his eyes turned, and he fainted again.

However, Ye Xuan did not look at him at all. His sight was already locked in the headless baby body suspended in front of him. His chest was up and down and he looked very excited.

Out!

Finally came out!

At this time, there is only one such thing in his mind.

Of course, after this sentence, there are countless questions, but at this time, Ye Xuan did not know how to talk about it.

Although since the beginning of the encounter with the headless baby, the latter has been with Ye Xuan, turned into a corpse tattoo, attached to Ye Xuan's left chest, and even many times to help Ye Xuan get out of trouble.

But in fact, there are very few opportunities for Ye Xuan and the headless baby corpse to actually meet each other. Even in the old cages, they joined forces with the Tiandao Qingyan avatar. Ye Xuan is also shooting a record. After the Tianzhu magical power, even if the force lost consciousness, it was enough to have a face-to-face communication with the headless baby.

While the other party is attached to him, no matter how Ye Xuan calls it, the headless baby will not respond. This is called Ye Xuan is speechless and even angry.

But he has no choice.

At the moment, the headless baby body has finally come out, and Ye Xuan even thinks that this is not true, so it is inevitable that it will be so exciting at one time.

"What is going on with all this?"

"Why did you choose me? Attached in the form of a corpse lamp tattoo?"

"And, I saw the body of the Void Giant Turtle, which is in an unknown universe plane, where there are many similar wild creatures."

"On the back of the Void Giant Turtle, there is a huge black magic blade that has been inserted there..."

"In the battle of that year, I saw the scene from the inheritance scene several times. Isn't the void giant turtle not participating in the war? Why is it injured?"

"You... is there any way to save it?"

"Hey..."

I didn't wait for Ye Xuan's gun to finish the sentence. The headless baby corpse suspended in front of Ye Xuan once again screamed. This time, it was more angry than before. It was clearly because I heard Ye Xuan's mention of the void giant. The reason of the turtle.

But in the end it was because the Void Giant Turtle itself made him angry. After all, the Giant Turtle did not appear on the battlefield that year.

Or because the emptiness of the giant turtle is dying, making him angry... Ye Xuan has no way to judge.

What made him speechless was that after the sound of this whistle, the original eyes of the headless baby corpse were closed again. Before closing, it seemed that I was stunned by Ye Xuan, and the light was revealed. A touch of tiredness.

Then, after Ye Xuan returned to the world, the headless baby corpse suspended in front of him was once again turned into a **** man, and he broke into Ye Xuan's body and disappeared...

Chapter 3505: Creation in the furnace

When Ye Xuan reacted, the headless baby body had once again turned into a corpse lamp tattoo, and now his left chest, let him completely stay in place, the whole person is not good.

After a long time, Ye Xuan screamed and thundered.

It's too irritating, and it's hard to catch this guy out. I'm shocked. After all, I've asked a part of my heart's doubts, but it's good, just screaming again, then throwing a look at myself. I slowly realized it, and then I went back again.

The doubts of Ye Xuan's heart have not been answered, but one more.

For example, when he mentioned the Nether Giant Turtle, how is the reaction of the headless baby body strong?

The reason why the sudden anger is because of the virtual giant turtle itself? Or is it because it was dying?

This is a completely different concept. If it is the former, it means that the reason why the giant turtle in the war did not appear in the same year may be because of the two hearts. In this case, Ye Xuan will still follow the old turtle. The ancestors confessed to find ways to rescue it, but the purpose is different.

Not only did the headless baby body not answer, but even the half-sentence prompt did not, simply called him crazy.

Roaring for a while, there was still no reaction on the chest. Just when Ye Xuan was dejected and wanted to give up, the corpse tattoo on his chest suddenly became hot again. Then, in Ye Xuan's mind, there was a voice. It is secluded, but there is a kind of childish tenderness.

"Go, go into the furnace, I will protect you!"

"How much can I get, when I have to withdraw, I will warn..."

Furnace? Protect yourself?

How much can I get?

After recollecting the contents of these two sentences, Ye Xuan's initial glimpse, and then he jumped up in his heart.

The meaning of the headless baby corpse is obvious. It is to let him enter the huge furnace in front of him, to fish fortune, and how much he can fish.

Originally, Ye Xuan even couldn't get close to the waste that was not visible to the eye in the surrounding air, let alone enter the so-called furnace.

However, since the baby corpse has such a confession, it must be innocent. In addition, when it is necessary to withdraw, it will warn Ye Xuan.

What else is there to worry about?

Don't you get into the tiger's hole?

Although the idiot also knows that this huge furnace in front is absolutely terrifying, there is a murderous murder, and it is feared that the star-class geeks that transcend the hustle and bustle will not be close, let alone enter it, and the surrounding emptiness is thrown everywhere. The star-level ruins of the ancients are the evidence.

But for the ability of headless baby corpse, Ye Xuan is still very confident.

Although this virtual refining and large-scale battle was set up by the heavenly eye that was suspected of being a wilderness, but the headless baby corpse is a kind of existence that can compete with it. The guy is not here now, the headless baby corpse even state Poor, guarding yourself to go in and out, there should be no problem.

With such a thought, Ye Xuan immediately became tempted.

Just now, Chanas has already passed out and saved trouble.

At the moment, he stepped out of the belly compartment of the mechanical devil, and his body appeared in the void of the outside world. Then he waved the mechanical demon into the immortal world.

Of course, it was taken in when everything was closed, so that Chanas would not wake up and see what he should not see.

Just after doing all this, Ye Xuan felt that the chest was once again hot, and a smudge of the **** color of the green was transmitted, and then spread and flow, eventually the whole body of Ye Xuan was shrouded, just like in him. The surface of the body is coated with a film of blood-green color.

Oddly enough, Ye Xuan did not have any perception of this layer of **** green film. It clearly existed and the line of sight was available. Ye Xuan couldn't touch it at all. He raised his hand and touched it, and touched his body and Changed clothing.

The means of headless baby corpse is really extraordinary.

Obviously, the protection method it refers to is this layer of blood-blue film. Such an inconspicuous layer of film can protect Ye Xuan from the horror of the front, even the star lord is inaccessible. The furnace, this is really incredible, but Ye Xuan is convinced that this matter does give him a very strange feeling.

Although the means of headless baby corpse is extremely determined, but out of habitual caution, Ye Xuan was very careful at first, slowly approaching, and soon entered the emptiness of a star-studded monster in the surrounding air. Within a million miles.

Sure enough, the feeling that the body almost broke open did not appear. This layer of blue-green film was really different and directly isolated the original pressure.

Ye Xuan's heart jumped and his eyes swept to the head. Even after many years of ruin, the pressure of the smoldering in the wreckage was far beyond the ridiculousness of the lord's eccentric, some wounds of the other's body, and There are some golden blood flowing in the air, Ye Xuan wants to collect, in the future can use Shennong Ding to refine the big medicine.

Just as he wanted to get close, the corpse light tattoo on his chest was once again hot, showing a hint of urging, which seemed a little impatient.

I don't know if the headless baby corpse thinks that Ye Xuan is too tempered, and the speed is too slow. I still think that he is throwing watermelon in the sesame seeds, and putting the good things in the sacred furnace in front of him, he still dissatisfied with these wastes.

No matter which kind, Ye Xuan can only give up the original plan, shake his head and smile, his body shape swiftly sway, all the way directly ignores the blood and treasure of some horrible creatures seen along the way. After a few moments, Then he came to the front of the huge star-shaped furnace that was called the furnace of the headless baby.

When I arrived, the star-shaped general furnace seemed to be bigger. Ye Xuan stopped and looked up. Just glanced at it. The corpse lamp tattoo on the left chest was once again hot, meaning the same, and it was urging.

"I don't have to worry so much about reincarnation? I have to see where I am going from."

Ye Xuan was speechless, rolled his eyes, and then his body was lifted up, and he reached the top of the star giant Ding. He saw a milky white mist, like the atmosphere, covering the upper entrance of the star giant.

Although this thing is huge, it is a tripod. Therefore, the entrance should be on the top. In fact, the ruined corpse of the one-footed Jinwu was actually sprayed from the top of the trip.

Ye Xuan did not hesitate, and then jumped down, through the thick, liquid-like milky haze, and soon came to the inner world of this star giant.

In the process, Ye Xuan's entire body was slightly cool. He felt some substance or energy. He touched the body's skin through the blood-blue film of his body, and entered the pores. In the body, he gave him a feeling of fluttering in a moment...

It is so comfortable.

Obviously, these energies are related to the milky haze, which is beneficial to him, so it was released.

Chapter 3506: First-order

These milky white smog is thick and liquid, the energy is very pure, and it has no attributes. It has a lot of physical benefits for Ye Xuan, and it is a kind of warming-like improvement.

All along, he used the genetic culture solution to break through the flesh and smash the invisible chains in the human body. This will leave some hidden diseases, but at the moment, with the nourishment of these milky white energy, Ye Xuan feels the whole body in an instant. Turin moved, and some of the hidden diseases left in the path of evolution were being quickly repaired!

The stars are very big, and the layer of milky white smog energy is also very thick. Together with the **** blue film of the headless baby body, it is deliberately taken, in the process of falling down in the shape of Ye Xuan. The **** blue film poured into his body, and the amount of liquid white smog that entered through the thin pores of 108,000 was extremely large. Just a short ten-degree interest, a familiar system sound was heard in Ye Xuan's mind.

"Hey, congratulations to the host, the body and blood of the realm of the realm! The current realm: Xuanguangjing first order!"

The first step of Xuanguangjing?

Actually, this broke through?

Ye Xuan's face is dull, and he has a clearer understanding of the superficial effect of these milky white smog to repair the physical invisible disease.

"Sure enough, it is a good thing. I don't accept it. Anyway, before the baby body said it, the benefits can be how much to fish. When it is necessary to withdraw, it will naturally alert."

Under the ecstasy, Ye Xuan muttered to himself, and then easily removed the bottle from the immortal world to remove a bottle of space magic weapon, and he was in the depths of the second universe of the Yinmo family, collecting that pond pool water. Like the bottle, the interior space is huge and can hold a lot of liquid.

As the bottle was removed, the layer of blood cyan film covered by Ye Xuan's hand quickly flowed, and the bottle was wrapped up, and a thin layer was placed over the bottle.

If this is not the case, the space vial will not last long, and will soon be crushed by the invisible pressure of the surrounding air.

When Ye Xuan even provoked the power of the body, he began to accept the milky white spirit in the surrounding air. All this was in sync with his own body, but Ye Xuan's own Canes was slower, and his left hand held it. The space vial was extremely fast, and there was a distinct tiny vortex at the mouth of the bottle.

Ye Xuan even felt the touch of a liquid flowing fast, and the direction of the thick, liquid, milky haze, apparently the space bottle held by his left hand, was injected into the bottle and was stored!

Just a short ten-digit interest, Ye Xuan's space bottle has been filled, it is because this piece of milky white smog like the atmosphere of the stars is too broad, and the speed of the capture is fast, between ten interest rates, There are more than 10,000 cubic meters of milky white liquid in the bottle.

The efficacy of this liquid has been tried by Ye Xuan. It is absolutely against the sky. In the future, on the road of physical evolution, some refining can be taken at intervals to repair the hidden diseases and dark injuries left on the way of physical evolution.

However, for the name of this milky white spirit, Ye Xuan still does not know, although the system has been in contact, but did not give any identification results.

Ye Xuan decided to call it a soaking lotion for the time being!

After turning over the space vial that has been filled with the Molten Milk Emulsion, Ye Xuan took out a few more. This time it was taken at the same time. Fortunately, the headless baby seems to agree with Ye Xuan's practice. With full cooperation, he just took out the space bottles, and there was a whirlpool immediately at the mouth of the bottle. A lot of milky white liquid was pouring inward.

This shows one thing, that is, this kind of furnace emulsion is really a good thing, otherwise, how can the headless baby body cooperate?

The speed is very fast. When Ye Xuan's figure passes through this layer of thick and incomparable atmosphere, the small bottles that are taken out in his hands are also filled.

The process of the numerous pores of the Gina Furnace Emulsion has also been completely stopped. On the one hand, it has already passed through the atmosphere of this layer of the furnace, and on the other hand, because the atmosphere of this layer of the furnace has changed extremely. It's thin, and there's no such thick, liquid feeling.

After all, the floating atmosphere is thicker and wider, and it can't stand the arrogance of Ye Xuan. It has already installed several space vials. Each space vial can hold 10,000 cubic meters of liquid. This is tens of thousands of cubic meters. The oven has a lotion.

He still doesn't know that if this kind of thing appears in the outside world, even some of the great powers will have to break through the head, even if it is only a few dozen drops.

Because this kind of thing can not only repair the hidden diseases and dark wounds of the flesh, even the wounds of the avenue can be repaired, including the creation of the soul and the gods, which can be described as the treasure of heaven and earth!

Its divine effect is second only to a few legendary treasures such as Chaos God Liquid!

But Ye Xuan has stored a few cubes, which is simply shocking.

However, this is also done because of the existence of a headless baby corpse, otherwise even if a horrible existence beyond the star's main territory is coming, don't expect it.

It's impossible to connect to this huge star-like stove, but let's talk about the oven cream in the Dingkou.

At this moment, with Ye Xuan's body shape falling above the Dingkou, into the stars of the giant tripod, the scene inside the giant trip, finally reflected in his sight.

This scene is too amazing. It is far better than what I saw before Ding. Even though Ye Xuan has already been psychologically prepared, it is still shocked at this moment. The whole person is sluggish, so it is suspended in the space of Ding. In the air, staring at everything in sight, the figure could not help but tremble slightly, and was completely uncontrollable.

It is no wonder that the headless baby corpse called this giant tripod a sacred furnace. Here, it is like a prison.

Before Ye Xuan saw the remnants of the ancient creatures around the void when he was outside the void, he already had this feeling, but at this moment, after entering the inside of the furnace, after seeing everything inside, he suddenly I feel that everything I saw before was really nothing, too unusual.

In contrast, everything inside this huge furnace is really regrettable, this is the real prison, even before!

At this moment, Ye Xuan deeply understands the true essence of the word "make furnace".

The so-called furnace, the former is the meditation, the latter is the furnace.

All of this in front of me, beyond the horror of Sensen, is indeed worthy of meditation.

The reason why the word is attached to the back of the furnace is not only because of the shape of the giant tripod, but because of its internality, it is really a **** furnace for refining countless powerful wild creatures!

Ye Xuan has no doubt that even in the real prison of the legend, there is absolutely no such a horrible **** furnace. Such a big hand, only the heavenly eye that represents the will of the wilderness, Can you make it out...

Chapter 3507: Blood meat furnace

"Booming..."

"Carneka!"

Both of the sounds are very low, and they are not very rushy. They seem to be slow and sluggish. They shouldn't have that kind of regretful effect, but they are introduced into Ye Xuan's ear, but they clearly make his body tremble more. incredible.

The sound of the rumble is the movement of the **** furnace inside the huge furnace.

The abnormal sound of the Kazakh card is a large number of powerful wild animals, whose flesh and blood wreckage is crushed by the red furnace and turned into a broken bone and meat!

This scene is a big horror!

Really big horror!

There are two areas inside the huge furnace, the center is a huge grinding disc, the grinding disc has two layers, and there is a hole in the middle. At this time, there is a large number of remnants of the ancient creatures in this huge hole. The two-layer grinding disc rotates in the opposite direction and undulates.

This is the real flesh furnace.

Ye Xuan even saw the remnants of the golden dragon in the blood of countless corpses in this huge hole. Of course, the golden dragon that passed down to him was not the one that has not yet grown to the ancient Descendants of this family.

Even so, this golden dragon should be extremely powerful. Even after the ruinless years, only a half of the remains are left, and Ye Xuan still feels a powerful and powerful pressure.

Far beyond the huge furnaces, the existence of those abandoned in the void!

In addition, Ye Xuan also saw a barren night fork, the breath is also very powerful, close to the veteran of the empty vows.

Although it is absolutely impossible to pass on the sacred bow of the sacred bow to the leaves of Ye Xuan, the blood relationship must be very close, not a direct descendant, but also a vein within three generations.

In addition, the **** mad lion, Qingtian Dapeng, nine-headed **** scorpion, **** sea konjac and other wrecks of ancient wilderness close to the ancient sacred or slightly weaker than the ancient sacred, are everywhere.

But without exception, they are all remnants, not complete, and they are crushed into pieces of broken bones and fats of varying sizes.

This is not the end. With the slow operation of this huge flesh-and-blood furnace, the wreckage of all the ancient creatures in the central hole of the hung furnace is constantly being crushed. Gradually, even Ye Xuan has not recognized their original It looks like it.

Whether it is the Golden Dragon or the Wild Night Fork, whether it is the **** lion or the blue sky, the flesh and blood wreckage of all the ancient creatures, afterwards, all were stirred into meat and mixed together.

The meat and bones exuding all kinds of Xia Rui Baoguang are mixed with each other, and the various blood and mixed blood of different colors are mixed, and finally the blood and the meat are no longer

separated from each other. The solid material is no longer visible in the huge holes. However, in order to be semi-liquid, there are endless Xia Rui Baoguang, and some of them are dissipated directly in the void.

That should be something that is difficult or past, and is considered an impurity-like thing, not to be preserved by this **** furnace.

Some of them are turned into a milky white mist that rises slowly and merges into the already extremely thin atmosphere above the red furnace...

These milky white mists should be something like the origin of the innate avenue or the source of the gods. They are broken into micro-molecules like traceability, and become pure energy, which merges into the atmosphere above the red furnace. As the concentration increases, the concentration is finally divided into the glory of the furnace!

It's no wonder that these scented lotions have such a miraculous effect. They are actually the wreckage of a large number of powerful creatures that are close to or even reach the level of the ancient powers. They are crushed into pieces of bones and bones. Condensation, it is simply shocking and awkward.

However, they are obviously not the real purpose of this flesh and blood refining and refining a large number of wild and ruined flesh and blood. It can only be regarded as a by-product of the process that can be used and discarded.

The real treasure is a transparent liquid that flows out of the gap that is almost non-existent between the two layers of grinding discs!

If it is an ordinary grinding disc, it should be the grind of grain grain from the slit of the circle around the grinding disc, but for this fleshy furnace, it is the center of the hole that flows out of the slit. The true core essence of those powerful wild animals.

These powerful wild creatures are different in kind, some flesh and blood are golden, and the blood is like a brilliant sun, emitting a thorny golden awn.

Some are full of blood transpiration, endless murder and suffocating.

After their flesh and blood marrow and so on are crushed into mud, it is an unspeakable quirky color, and the atmosphere is even more horrible and terrifying.

But at this moment, as some things like memories, causal and other impurities become the disappearance of blue smoke, and some unwanted innate energy is rejected, it will rise into a liquid, and finally, from the edge of the fleshy furnace The liquid flowing out is completely incomparable, colorless and tasteless, and even no pressure of any pressure.

It is so pure, like the purest crystal of the world, Ye Xuan just looked at a few eyes, I feel that the whole mind is quiet...

This kind of pure liquid like a top crystal is not a lot.

In the huge hole in the center of the fleshy furnace, there are a lot of colorful blood mud rolling, and the causal impurities and milky haze that are turned into blue smoke from time to time are also quite a lot.

However, the transparent liquid flowing from the slits around the red furnace is dripping down by drop, and there is only one drop in a long time, falling into the groove under the slit.

This is the inner layer of the interior of the furnace.

In the outer layer, there is a chain of chains. These chains should not be the kind of flesh and blood raw materials that are transported to the flesh furnace, but the one that outputs to the end of the hollow crack in the distance.

Because Ye Xuan clearly saw that the inner end of these chains is connected to the circle of the inner layer of the furnace, from time to time, a drop of transparent mysterious spirit drops into the chain, and at this time, the chain immediately shines. There is an endless crepe pattern that spreads all the way to the distance.

Seeing this, Ye Xuan suddenly became as envious as a squatting.

The function of this flood furnace is to collect the flesh and blood of a large number of powerful ancient creatures, and to refine this transparent crystal-like unknown treasure, through these chains, into a void crack.

At the end of each different void crack, it is either a group of people, they are being cultivated, and they will bloom in the future, and follow the heavens and blue eyes to conquer the Quartet again!

Either the end of the chain is a supreme warrior of the ancient times, who have been hit hard and need these things to repair themselves.

In short, the role of this flesh-and-blood furnace is to gradually restore and strengthen the strength of the camp of Tiandao Qingyan.

No wonder the headless baby corpse will start, and let Ye Xuan be able to fish how much!

Realizing all this, Ye Xuan's shackles instantly shed light of green energy. This is the enemy's material, and it is also a strategic level of material. Can he let it go?

Nothing to say, either don't get it, you have to get it right...

Chapter 3508: This is the source of all evil

The enemy's strategic materials, Ye Xuan naturally will not be a guest, he is ready to go black, a pot end is a must.

If it is possible, he even imagined that the core of this virtual refining and large-scale refining, that is, the Hongding giant Ding, was also refining and taking away.

It's just that this thought just floated from the brain, and Ye Xuan's left chest was suddenly hot, and the headless baby was warning.

Obviously, this is unrealistic, either Ye Xuan can't do it, or it will cause unpredictable serious consequences, and the headless baby is not allowed.

Ye Xuan sighed and could only retreat to seek his capital, and made up his mind on the resources in this huge furnace.

After looking around, Ye Xuan locked the target. The central flesh disc is very large. Although the amount of transparent liquid dripping from the slit around the disc is very small, there is only one drop for a long time, but this thin line is long enough. Therefore, the amount is still quite considerable.

Of course, there is no match with the thin mound lotion that has changed over the sky.

Ye Xuan took out a space vial in the first place, and then he got busy and began collecting the transparent liquid around the huge furnace plate.

"Boom!"

A drop of clear liquid falls into the bottle, giving off a very pleasant and pleasant sound. Ye Xuan moves his body and puts another transparent liquid that is falling down into the bottle.

Around the grinding wheel, I took a circle and collected only seven or eight hundred drops of transparent liquid. At this time, the slit around the Hong furnace has temporarily stopped dropping down, but the colorful flesh in the central giant hole is still surging, obviously Contains the next round of transparent liquid.

Waiting for it, Ye Xuan tried to take a drop of transparent liquid from the jade bottle and let him float in front of him and observe it carefully.

This drop of liquid is pure and transparent, and the top crystal is the same, but if you look at it, you can find that there are some mysterious symbols like symbols and chains.

This is very strange, obviously a pure and transparent thing, but it can peep into the mysterious symbols and chains inside, so that Ye Xuan almost doubts that he has an illusion.

It was also at this time that a familiar system sound was suddenly heard in his mind.

"Hey, congratulations to the host, to get the source of all evil! Grade: Starry Treasure! Attribute: The law is innate and innate! Is it refining?"

what? Is this the source of all evil?

As the system prompts the sound in his mind, Ye Xuan is mad and his face is floating with an unbelievable look.

Too unexpected!

This drop of liquid that is more pure than the top-grade crystal, does not know how many times, is actually the source of all evils?

Such a beautiful and dreamlike thing has such an evil and extreme name, which is fascinating and leads to infinite divergent thinking.

Moreover, such a small drop of liquid, its grade is actually the starry sky to treasure, it is simply unimaginable, but, again, its attribute is actually the congenital spirit related to the law source, which can be explained.

Anything that is related to the magic of the stars is absolutely impossible.

And this kind of spirit, Ye Xuan has just stored hundreds of drops, that is to say, he has hundreds of stars and treasures at the moment, which is scary to death.

Soon, Ye Xuan recovered from the shock and then ecstasy, because this time the system title exploration mission can finally be delivered.

When he even put the drop of transparent liquid in front of him into the body, he handed it directly to the phagocytic system and gave instructions for immediate refining.

What surprised him was that the refining instructions had just been released, and the system's prompt tone was heard again.

"Hey, congratulations to the host, the source of all evils succeeded in refining! The system title exploration mission is completed! The current title: Star Scavenger!"

"Star Scavenger: The title's own halo effect, based on the original four-level title Star Trek, Interstellar Adventurer, Interstellar Explorer, Interstellar Trail Blazers, will add a new system capability, random activation. At the same time, the number of interstellar coordinates imprinted on any cosmic plane, from the previous one, grows to two!"

"Hey, after the system has been explained, is it possible to get random system capabilities right away?"

At this point, this time the system title exploration mission was finally completed successfully, Ye Xuan body devouring system system title, entered the fifth level, became a powerful interplanetary destroyer!

At this moment, Ye Xuan's pressure plummeted, and his mind quickly put it on the matter of usurping enemy resources.

It was also at this time that a familiar system sound was heard for the third time in his mind.

"Hey, congratulations to the host, the improvement of the realm of the dynasty! The current realm: the black hole is the 9th order!"

"Hey, congratulations to the host, the body and blood of the realm of the realm! The current realm: Xuanguang second-order!"

"Hey, congratulations to the host, the body and blood of the realm of the realm! The current realm: Xuanguang third-order!"

"Hey, congratulations to the host, the blood of the dragon, the roaring, etc. can be improved! Current level: Intermediate!"

"Hey, congratulations to the host, the blood of the magic dragon eye can be improved! Current level: Intermediate!"

"Hey, congratulations to the host, the blood of the gods can be improved, etc.! Current level: Intermediate!"

"Hey, congratulations to the host, blood and fascination can be improved! Current level: Intermediate!"

"Hey, congratulations to the host, spiritual power, supernatural power, reversal, etc. can be improved! Current level: Intermediate!"

With this large string of system sounds ringing in his mind, Ye Xuan was stunned.

The effect of this source of evil is too much against the sky, perhaps because the first refining and nourishing nourish the gods and the flesh, so the most obvious effect, in addition to let Ye Xuan's body and blood level break through Even the practice of the practice of the hole, which has been stagnant, has also broken through from the first step of the black hole to the great completion of the black hole.

Of course, this may also be due to the fact that Ye Xuan's flesh and blood is far beyond the black hole.

In short, Ye Xuan's comprehensive combat power has soared in a flash.

This is not over yet. In addition to the improvement of the realm of the body and the blood of the flesh, the various blood and magical mysteries that he has mastered have a certain degree of improvement.

In terms of blood and supernatural powers, the dragons and blood vessels related to the black gold dragon scales have all been upgraded to the intermediate level from the previous level. However, there is no change in the bow of the heavens. This kind of magical power has no grades, only with the self-cultivation of the exhibitors. Change for the strength of the realm.

In addition, the **** magical powers attached to the Nether Body are also the same, there is no grade, only the morphological changes, the first form is the dark green claws, the second form is the clawed Nether, now Ye Xuan, Stopped in the second form, this time did not break through.

At the level of skill and mystery at the level of spiritual power, the annihilation spear, the whirlpool of destruction, the absolute shock, the perfect shock, and the spirit of lightning, mental reversal or intermediate. The two mysteries of spiritual crushing and spiritual charm have been advanced in the past, but this time there is no improvement...

Chapter 3509: I have to spit it out when I eat it.

A drop of the source of all evils has given Ye Xuan such a huge advantage. Not only has the practice of both the practice and the flesh and blood been improved, even the various blood and magical powers he has mastered. And so on, they have all improved their ranks.

In general, its overall combat strength has risen a lot compared to the previous one.

This made him realize the preciousness of the mysterious spirit of this evil source almost instantly. Even if this harvest is only because of the first refining, the subsequent use may not have this effect, but its The fact that you can't meet the demand is still not to be ignored.

Under the ecstasy of the heart, Ye Xuan did not rush to open the right to open a system new ability to complete this system exploration task, but to sweep the line of sight to the mysterious grinding disc in the center of the huge furnace.

At this point, the thin slits around the grinding disc have already had some faint transparent water stains appearing. Obviously, there will be some new sources of evil spirits falling.

Ye Xuan was pleasantly surprised. His figure flashed in an instant and swam around the huge grinding disc. Every time he saw a drop of spiritual liquid coming down, he immediately reached out and took the space vial.

Then you can hear a soft bang and a pleasant sound. This represents the source of the evil that is contained in his hands. Since then, another drop!

This time, perhaps because the colorful flesh in the huge hole in the center of the grinding disc has been reduced a lot, the transparent liquid flowing out of the thin slit around the grinding disc is significantly less than the previous first round. Some, and the dripping speed is slower.

After tossing for a while, Ye Xuan's harvest this time was only about half of the previous one, and the two sources of evil spirits that were added together were more than a thousand drops!

Look at this situation, the third round of dripping spirit will be less, unless the chain around the inside of the furnace dingling to transport the flesh and blood raw materials in a circle, once again from the surrounding a void crack, transport a batch of new The ruins of the ancient ruins came over and were thrown into the huge holes in the center of the grinding disc to replenish the raw materials.

Perhaps the speed of this kind of spiritual drop will rise again.

But Ye Xuan can hardly wait, because he feels that the corpse lamp tattoo on the left chest is already slightly faint, although the headless baby has not issued a warning sign, but Ye Xuan knows it is, I am afraid that I am here. There is not much time to wait for the Hong Ding Giant Ding.

God knows when the wreckage of the next batch of ancient creatures will be transported over? This is not the fruit picked from the ground. It is possible to send a batch of it in a hundred years.

In a word, it is unreliable to expect those chains responsible for transporting flesh and blood raw materials. Only by basing on the existing ones, it is king to try to gain benefits.

With this thought, Ye Xuan casts a line of sight on the large number of output chains around the groove below the grinding disc. The slamming slams suddenly: "Before the spirit liquid is collected, there is already a round of spiritual droplets falling into the groove. These chains are absorbed, but they should still be on the way and not be taken by the beneficiaries at the end of the chain."

"In this case, it means there is still an opportunity to reverse them back!"

"Hey, this is what the uncle sees, and it is awkward. If you eat it, you have to spit it back to Laozi..."

Thinking like this, Ye Xuan was moving intently, his eyes were green, and hesitated, and he went straight to the huge groove in front of the circle, and extended the space vial to a chain connected to the groove. When even urging the space vial in the hand.

A suction instantly rushed out, and the chain end of the chain illuminates the pattern and quickly spreads away into the distance.

This is just an attempt. Ye Xuan does not know if there is any effect, and his heart is awkward.

After a short break, a sweet voice screamed into the ear, followed by two more sounds. Just like this, it is hard to **** back from the chain of three drops of evil spirits that are still being transported in the middle of the chain.

"Rely! It really works, this is developed!"

Ye Xuan looked up and glanced at the chain. At least hundreds of chains around the groove. If each chain can grab two or three drops, it adds up to more than a thousand. This is absolutely exciting. Less and more, it is clear that it is necessary to make a big rhythm.

It is also at this end that the end of the void that the chain is connected to at the end of the gap, a distance from this source of evil and evil stars is not far away, I do not know how many mysteries of the universe plane.

A strange animal with a red blood scale suddenly turned over and made a loud scream.

If Ye Xuan is here at this moment, it must be scared by this beast covered with blood red scales, because the breath that has been dispersed from the body is clearly the same level as the golden dragon and the ancient night fork.

This wild ancient supreme belongs to the camp of Tiandao Qingyan. It was seriously injured in the battle of the world, and the wheel of the avenue was cracked. It has been hidden in this void.

During this time, through the chain of the furnace of the avenue, it can enjoy a few drops of the source of the evil spirits that have been condensed by the starry law of the innumerable powerful ancient creatures. The injury has recovered seven or seven. Eighty-eight.

Just now, the three drops of the evil source that was about to be delivered suddenly disappeared, and it was hard to go back. This made it hateful, almost wanting to follow the emptiness of the sky above the head. The furnace chain is traced back to see what happened.

It is a pity that after all, because the injury is too heavy, it is impossible to tear the void, and it will fall directly across the plane. At this moment, it can only vent the unwillingness and anger of the heart with the sound of roaring noise.

For all this, Ye Xuan is completely ignorant.

In the first chain, three drops of evil source liquid were taken. Ye Xuan's spirit was greatly shaken. The second chain closest to him was just over ten meters away. Ye Xuan stepped over and stepped over. Draw the gourd and point the bottle of the space vial in the hand to the position where the chain is connected to the groove.

Then it ignited the power of the space vial, and then, because of the blessing of the headless baby, the extremely powerful force of the force spread out from the bottle of the space vial.

The second chain also immediately lit up, the striated flickering, after a good breath, a pleasing squeaking sound, a drop of evil source liquid fell into the bottle, Ye Xuan waited for two, but there was no other The movement is gone.

It seems that this chain is only assigned to a drop of evil source, which makes Ye Xuan very dissatisfied, and muttered in his mouth: "Poor egg, stupid..."

Then, with a black face holding the bottle and walking to the third chain next to it.

At the same moment he left, the second universe was a corner of the void, the deepest part of the nest of the top ten strong ethnic group, the **** emptiness of the bloody, a violent whistle of the dragon. The sound suddenly sounded...

Chapter 3510: Waste shame

The **** family is the top ten leader in the second universe.

It is said that this family is a **** descendant of nine **** scorpions in ancient times, and the **** ancestor of the nine **** scorpions is the **** konjac in the legend of the ancient times!

At this moment, in the secret of the deepest part of the **** ancestral ancestral lands, the distant emptiness is clearly defined in this instant blood, and a huge blood cloud is rolling.

This **** cloud is magnificent and majestic, and there are faintly visible nine **** scorpions that are swallowing clouds, and the momentum is awkward, although the breath is not comparable to the ancient gods of the Golden Dragon and the Wild Night Fork. However, compared with the sacred power of the Void Scoop, it is not weak.

However, the nine heads of blood were clearly and seriously injured. At this time, there were only three of the nine blood-colored daggers, and the whole body was full of scars. In the void above the head of the head, there was a chain of locks. It fell so suddenly.

In the past, every other year, at the end of this chain, there will be a drop of all the evil sources falling, but not all of the nine **** ones will be consumed.

There is only one drop of the evil source every year. The nine **** scorpions will only collect about three-quarters of the energy to repair themselves. The remaining one-quarter, nine **** will be injected into the mile. The **** giant egg in the undulating and undulating center of the blood cloud.

It is the blood of its descendants. Once it is born, it will have the cultivation of the Qiankun, and there is no limit to the future.

But today, it was the day when the drops of the evil source were falling this year, but just now, I saw that the drops of evil source will drip, and the nine **** scorpions have even smelled its sweet smell, but At this time, everything has changed.

The drops of the evil source that was assigned to him suddenly collapsed back and breathed, and even it could not be perceived.

Waiting for a year is the result of this, nine **** hateful, but because the injury is too heavy, it is impossible to tear the void across the plane to pursue, at this moment can only vent the general roar.

Beyond the mystery, all the tribes of the entire **** family, including the patriarchs, were all stunned and shivering. They did not know what happened within the ancestral secrets, and they made the blood ancestors so angry.

But at this moment, no one dares to go in and ask for a sentence, it is absolutely going to be a disaster...

.....

At the same time, in the depths of the hinterland of the first universe, the source of the evil earth!

Ye Xuan just collected the evil source liquid from the third chain. This time, he was barely satisfied. Although there are no three drops, there are at least two drops, compared with the case where the second chain is only one drop of the evil source. It is already quite good.

"It seems that the chains lead to different destinations, and the amount of allergens that can be distributed each time is different."

While walking towards the fourth chain, Ye Xuan frowned and muttered: "At the moment, the most chain is divided into three drops, it is estimated that it is much more limited than it is, even if it can be divided. Four drops and five drops are estimated to be very few. Fortunately, there are hundreds of chains in total. If you have two drops on average, one thousand drops are guaranteed."

"In this case, plus a thousand drops that have been collected from the swarf of the grinding disc, the total number has more than two thousand drops, and it is still sloppy."

The evil source liquid condensed by this kind of furnace, even if it is the superb existence of the ancient power level, is a hard drop. When he arrives here, the harvest of more than two thousand drops has become a slap in the face.

If the matter is to let the golden dragon, or has been seriously injured, the emptiness of the giant tortoise that is in urgent need of this thing, I am afraid that it will be angry on the spot!

Subsequently, Ye Xuan continued to work hard, following a direction, in turn at the source of a chain of locks has been dripped into the chain, is moving toward the end of the evil source.

From time to time, in the circle of the huge grinding disc behind him, there are occasionally one or two drops of evil source drops, Ye Xuan also did not let go, let them drop into the chain, generally They immediately turned around and hurriedly rushed over and took the two drops of evil source into the space vial, and then continued to deal with the fringe chains that circled the groove...

The grinding disc is huge, the groove is surrounded by a circle outside the grinding disc, and it is not small. Hundreds of chains connected to the groove say that there are not many, saying that it is not too small.

Fortunately, every chain Ye Xuan only needs to delay the time of one or two interest, so hundreds of chains are only ten minutes, and Ye Xuan has been patronized for more than half, and the rest is only a hundred.

At this time, the sinister source contained in the space vial in his hand is already more than two thousand drops, and if there is no accident, the remaining hundred chains should still be able to capture more than two hundred drops. Basically, it is almost the same as Ye Xuan's initial estimate, with a total of more than two thousand drops.

And time, just less than ten minutes, can end it all.

When I think of the evil source liquid dripping out in the slit, or before it has already dripped into the chain, the all-natural source liquid that is being transported in the process will be completely stored by myself.

Ye Xuan's line of sight began to sweep into the hole in the center of the huge grinding disc.

It's been so long, the inner chains that are surrounded by the inner wall of the furnace, and the second batch of wild flesh and blood materials have not been transported again. That is to say, in a short time, this thing is not a play.

Maybe there will be a batch in a year, or two years, ten years and a hundred years!

After all, this mound is standing here for an endless year. It is estimated that every time there are one or two unqualified ruins of the ancient sacred spirits spit out like garbage.

However, there are quite a few such wrecks in the imaginary sky, but the number is more than that. There are hundreds of tens of millions of heads in the sky. According to this ratio, Ye Xuan will soon infer that this kind of wilderness is estimated. The raw materials of flesh and blood residue will come in one or two years.

This is basically a fact!

In this case, after collecting all the evil sources in the chain and taking away all the harvests of the flesh and blood for a year, Ye Xuan has basically no advantage in fishing here.

Unless you wait another year!

But that is obviously impossible, there will be a change, and the headless baby who protects him may not last for so long.

"I really don't want to be reconciled. The harvest is still a bit less."

Thinking of this, Ye Xuan sighed, just two drops of the evil source in the last chain were also chased back, he even turned the space vial into the body of immortality.

Then it was easy to mutter into the words, and in the immortal world, took out a blank new bottle and plucked it into the huge hole in the center of the grinding disc: "When the evil source liquid is finished, but inside the hole There are also some residual nine-colored flesh and blood, which can be all the powerful wild meats of the treasured blood, crushed into a mud fusion, used to refine large medicine is the best raw material, can you miss it?"

"Waste is shameful..."
