

Super D. S 3521

Chapter 3521: Metamorphosis of magic insects

The reason why Ye Xuan now studies the eight top-level elites such as Emperor Shaofeng, their respective feelings about mechanical integration ability, is to see how they can open their minds in this ability.

This has the effect of inspiring and learning from the life fortress of Hoshino!

The so-called sentiment is actually creative thinking, that is, inspiration, everyone is different. Ye Xuan can now browse the core of the eight elites at the same time. Inspiration and insight in the field of mechanical integration ability, this opportunity is commendable. !

The Celestials are different from any other life races. They have no flesh and blood, no soul gods, no spiritual power, and some are just an electronic consciousness.

They can't even be regarded as the life born in the real world. They can only be born from intelligent robots. Once they have self-awareness, they can be awakened and become the Tianzu ethnic group.

The intelligent robots are not born by themselves. They are made by themselves and belong to the acquired things. Therefore, the Tianji family cannot be regarded as the world's heaven and earth.

It is precisely because of this that although they can be cultivated in the same way, they can absorb the energy in the origin of the star nuclear and use other various methods to make their electronic consciousness grow.

In addition, they can use a variety of rare minerals, such as precious mineral materials, to create a body for themselves, and in the process of step by step, constantly and countless times Make a new transformation with the body...

However, all of this can't change the most fundamental fact, that is, their roots, the most important source of their existence, after all, is just a string of electronic data streams.

Therefore, no matter how powerful the Tianji people are, it can only rely on modern technology and equipment to reflect their strength.

Either they are the bodies they created for themselves. How can this body be biologicalized, and how to be anthropomorphic? It can only be a robotic body that is infinitely close to flesh and blood.

Either a battleship, a fortress or a fortress!

In a word, if they only have the same string of data that represents the existence of their lives, then unless they exist in the intelligent computer system, they simply cannot exist.

Isn't the so-called smart computer system a technological device?

In the end, this group is actually really sad. Their existence, leaving the technological equipment, has become a joke.

Similarly, the power they use and the power they can control must also be technological.

They can't be like a human monk. They can practice the cultivation of the aura of the heavens and the earth, or forge the body and take the road of refining.

Nor is it like all other cosmic races, with so-called blood, which can be passed down from the blood, gaining secrets, magical powers and power.

They even have a star-shaped super brain that is inferior to the species between the living and the non-living.

There are too many weak items in the celestial family, so in the field where they are only good at, that is, in the field of mechanical manufacturing and mechanical control, their advantages are infinitely magnified.

Because they simply can't study other fields, all the thoughts are all at this level.

It can be said that in this field, there are countless ethnic groups in the entire universe, and no ethnic group can compete with them, and it has a unique advantage.

Therefore, although the core tops of the eight celestial groups such as Emperor Shaofeng, like Sha Baofeng, as the patriarch of the patriarch, the confession is only given the true meaning of mechanical fusion, but for Ye Xuan, These levels of comprehension are different, and the support is only part of the mechanical fusion ability, but still gives him an eye-opening feeling.

It can be said that the real brain hole is wide open!

After carefully studying the feelings and memories of the eight people, including Emperor Shaofeng, on the level of mechanical fusion, Ye Xuan can be described as the top of the house, and the whole people are all open!

He sent all the information to the central database of the Hoshino Life Fortress, and then issued instructions to immediately push forward.

Everything was quietly unfolding. After an hour, Ye Xuan finally received a response, and a familiar system prompt sounded in his mind, telling him that the life fortress had undergone a qualitative change, and his ability was greatly improved. Ask Ye Xuan if Show it immediately.

Quality change!

Great improvement in ability!

Just these two keywords have already made Ye Xuan very excited. He can't wait, even if he gives a clear affirmative reply, he can't wait to see it immediately.

Immediately, the life fortress that changed into the Battle of the Warfare shook a little. Ye Xuan and Chanas all felt that the ground under the foot began to move. The vast top of the command shell and the dome had also changed and gradually shrunk. At the same time, it is no longer possible to see the scene outside the ship directly through the one-way transparent bulkhead.

This can only be achieved by shrinking the holographic stereo screen in the cabin.

In the holographic stereo screen, the entire shape of the magic warfare is clearly visible.

Then the change started!

"Booming!"

"Card..."

The faint roar, accompanied by the endless mechanical smoothing of the sound, sounded at the same time.

The magic warfare first changed to the appearance of the mechanical demon, and then the mechanical warfare of different shapes changed after the integration of the nine celestial tribes such as Sha Baofeng and Emperor Shaofeng with the car, all changed in a circle.

In the end, even the ten different kinds of war worms and monsters were taken and their advantages were changed into a weird, seemingly worm-like mechanical monster.

All of this was expected by Ye Xuan, including the huge gimmicks that were later changed like claws and phantoms. These were all that Ye Xuan had contacted before, or the life fortress had changed.

Only this time, the life fortress has changed too fast, which is obviously due to the understanding of the mechanical fusion ability of Emperor Shaofeng and others.

But this is not the end.

The so-called qualitative metamorphosis, obviously can not only mean the speed of the change of life fortress is increased.

Then the painting style suddenly changed.

The sound of the mechanical wear-in of Cathy suddenly became a big hit. The external form of the life fortress suddenly turned into a nine-nine crocodile, then a **** unicorn, a hollow giant tortoise, a golden dragon, and even a pair of huge flesh-winged apes. Yasha... In short, all forms of life recorded in the data database of the phagocytic system can be easily changed.

In the end, the card screamed with amazement, and the life fortress became a super alloy giant with a height of more than 50,000 meters. The skull and limbs were perfect, and even the light behind them came out. The left hand shield was like a sky. Such a huge, right-handed spear, up to a hundred thousand meters...

Chapter 3522: Mechanical warfare

Looking at the holographic stereo screen in front of you, Ye Xuan and Chanas are all dumbfounded, with a big open mouth and a dull face!

This is really a big brain. They never thought that a small fortress could have so many changes. In addition to the previous mechanical warfare, it can actually change into various forms such as Golden Dragon, Wild Night Fork and so on. Almost all of the life forms that they have seen in their impressions, or that they have heard, have just demonstrated the changes.

In the end, it turned directly into a metal warrior with a height of more than 50,000 meters and a giant shield and a spear of more than 100,000 meters in the hand!

This has completely overturned the mechanical integration ability of the Tianji people. It can't be done, but it can't be imagined!

It is no wonder that the evaluation given by the phagocytic system in Ye Xuan is the qualitative change of life forms.

Is this not a qualitative change?

The meaning of this change for the Fortress of Life is tantamount to opening a door that has never been seen before, and the scope of its existence is broader.

It is no longer just a warship, it can even be a beast, it can be a giant man-machine.

For example, now, Ye Xuan and Chanas are in the inner cabin space of the alloy warrior chest. All the actions of the alloy **** of war are controlled by Ye Xuan. In a sense, it is just like Ye Xuan wearing. On a giant man-machine, rushed to the battlefield, killing people?

In the universe, life species have no objects, and every kind of life species has its inevitable truth and its strengths.

For example, the cosmic zerg, the powerful vitality, and the horrible bouncing force at the time of the explosion are their unique advantages. Other species, the shape of which is what it is now, not the other way, all have their own reasons. .

Being, it is reasonable, it is this meaning.

In different circumstances, different situations, you may need to focus on strengthening different, and Ye Xuan has such a life fortress that can change shape arbitrarily, when you need it, you can think of it, it is perfect pole!

However, compared with other open states such as the Zerg, Ye Xuan is more inclined, in fact, it is the alloy form of the God of War.

Even if he gave instructions to the life fortress to keep it in the existing form, there is no need to continue to change, because Ye Xuan should study the shape of the alloy **** of war.

He even vaguely looked forward to not long after, letting his life fortress change into this form, manipulating it to rush into a large battlefield and killing with the enemy.

This was just a matter of just thinking about it. At this time, Ye Xuan was afraid that he could not think of it anyway. Soon after, his expectation was really realized.

With the instructions of Ye Xuan, the Fortress of Life, even if it stopped the continuation of the form, stayed in the shape of the humanoid alloy **** of war, and was controlled by Ye Xuan to rush out of the underground abyss and came to the surface of this star!

Ye Xuan is very excited and began to study all the skills of the alloy God of War, as well as the various capabilities represented by the internal structure!

The shape of the alloy **** of war is more than 50,000 meters. This is the current limit. If you want to make the body of the alloy **** of war become bigger, then the micro-molecules of the world's insect self-derivatives that make up the life fortress will once again multiply.

Of course, more than 50,000 meters is the upper limit. As for the decline, it has reached 500 meters, which is smaller than the previous mechanical moths. This is also because the life fortress is digesting the eight high-level elites such as Emperor Shaofeng. After the perception of the mechanical fusion ability, just reached a lower limit.

Similarly, if it changes into the form of mechanical magic insects, it can reach the appearance of 500 meters. It is almost inconsistent with the limit of the previous one kilometer. If Emperor Shaofeng is still here, seeing this scene, I don't know. What the horror looks like.

Although the five hundred meters is the lower limit of the body shape, it is really amazing as a human form. Imagine that among the standard warships of the small country and the small country in the territory of the immortal dynasty, the smallest kind of star-rated warships are only Only a kilometer captain.

If it is upright and the alloy **** of war is higher than the height, it is twice as high as the alloy **** of war.

As for its upper limit of more than 50,000 meters, it is even more amazing.

A 50,000-meter-diameter starry fortress hovered in the void of the universe. Everyone is eccentric, and has long been used to it, but if it is next to the starry fortress, there is a humanoid with its height and even a slight excess. God of War, it is absolutely necessary to fall into the eyes of a place.

50,000 meters, that is, 50 kilometers, this height is simply speechless, a big step or a jump, at least hundreds of kilometers, absolutely horrible!

This is still the basic performance, and in addition, in terms of defense and attack ability, the alloy **** of war also makes Ye Xuan feel amazing.

First of all, the energy shield of the Star Fortress defense system, in the normal state, is turned into a pair of lights appearing behind the alloy God of War. Of course, this pair of light, also has a shocking sharp cutting ability.

The combination can protect the body, and the sturdy hull that can open the starry fortress.

In addition, the energy shield of this defense system can appear in any area of the alloy Ares at any time.

For example, the head is attacked. In the blink of an eye, the head of the alloy God of War can have a partial defensive light shield. The same energy shield can also appear in the chest, front, and even limbs.

As far as attack power is concerned, the huge alloy shield of the left hand can be slammed down on the heavy side of the shield, and the alloy spear of the right hand is invincible. It can be used as a melee weapon or as a weapon. Spears are usually thrown directly out.

At that time, under the impetus of the powerful strength of the alloy **** of war, coupled with the inertial acceleration of the spear blasting, this is definitely a big kill, directly through a 100,000-meter-diameter starry fortress, nothing. thing.

This is only the sword and the shield of the alloy form. In fact, if Ye Xuan needs it, the shield and the spear in the hands of the alloy warrior may even be in the form of energy, such as the anti-material light form.

This form of warfare, all attacks can be offset.

This form of the spear, its penetration and lethality geometrically climbed up, it is called a big killer!

In addition, the alloy God of War's knees and elbows also have a sharp attack structure, while also opening the gun, launching antimatter energy dead light cannon.

It includes both shoulders and back!

This is simply a humanoid killer with the flexible advantages of human form in melee, and the long-range ability of warships, fortresses and fortresses.

All of this is perfectly blended together, making the whole alloy war gods perfect...

Chapter 3523: Tianji City

After knowing everything about the alloy **** of war, Ye Xuan was more satisfied, and he couldn't help but smile. When he even grinned: "Do you even have two forms of war shields and spears?" Super alloy form and anti-matter Light energy form..."

"The former one does not have to be tried. In the conventional battle, the super-strong alloy form is used, which can also cause a kind of confusion to the enemy, while the latter anti-material light energy form is the killer, the key moment of the existence of the spear and the shield. A sudden change, there must be miraculous effects."

"I just don't know the kind of anti-material light energy spear, how strong is its penetration!"

Having said that, Ye Xuan licked his lips, his face showed a smug expression, and turned to look at the huge abandoned star in the distant sky.

Immediately afterwards, Chanas, who had not waited for him, returned, and Ye Xuan had already given instructions to the alloy **** of war.

In the next moment, the right hand of the alloy God of War suddenly shocked, and the tens of thousands of meters long thick spear that was originally in the hand quickly contracted, and the blink of an eye disappeared.

Instead, it is a war spear that is the same length and length but with a darkened body.

This war spear is not an entity, but is made up of anti-material light energy. It cannot be touched at all, otherwise it will have to be eroded.

The reason why the alloy **** of war can hold it safely is because its palm and other parts are originally the venting port of the anti-material light energy generator, which is cast for a special material.

"Booming!"

"call out....."

The huge roaring sounds, the alloy **** of war slams a step, the figure instantly smashes hundreds of miles, rushes into space, while the right hand is lifted up, pinching the antimatter energy spear, without hesitation Throw out all the way.

At this moment, the void was torn apart, and a harsh, piercing sound was heard. A black awn pierced the sky, and the blink of an eye went to the huge abandoned star in the distant sky, with a roaring sound. There was no suspense to pass through, and finally disappeared into the void of the universe at the end of the line of sight...

"Hey..."

A spear of throwing, the huge abandoned star was actually shot from the center of a 100-meter-diameter pair of holes, from here on the empty sky, you can directly see the void opposite the stars.

This scene was too shocking. Chanas was directly sluggish. Zhang had a big mouth, but there was no words, but the throat continued to roll, and the sound of swallowing water was heard.

Even Ye Xuan, I already guessed that this might be the result, but at the moment I saw it with my own eyes, but the feeling is different, just as shocking!

"God, Shasha... Sha Daren, how did you do this? Is this the Devil War? I am dripping, almost scared the old man!"

After a long period of stagnation, Chanas finally returned to the soul, looking at the distant abandoned star, a huge abandoned star that pierced the hole, stuttering and smashing, obviously still not able to get from the heart Breaking out from the shock: "This huge star, even the 100,000-meter-diameter starry fortress, can't shoot it out of the hole, this is... it's unscientific!"

Ye Xuan raised his hand and patted Chanas's shoulder, his face of sympathy: "Don't worry, slowly you get used to it!"

The reason why he brought Chanas out of the Magic Emperor was that he did not want to leave this hidden danger on the other hand. On the other hand, he also considered that in some aspects, he might need manpower in case of entering the Sky City. Just bring one around you.

It's really hard to be this old thing on the way, but it's only a five-day interplanetary voyage from Tianji City. When you arrive at Tianji City, Ye Xuan will not be able to leave it when he leaves. Bring him around, for him, it should be considered a relief.

As for whether there is a situation in the east window after the departure, if it does appear, whether Chanas will be implicated, this is not a problem that Ye Xuan considered.

Immediately, Ye Xuan again issued instructions to the Fortress of Life to disarm the form of the alloy **** of war, and regained the appearance of the previous magic warfare. Then he embarked on the interstellar main channel leading to Tianji City and headed for the base camp of the Tianji Nationality at full speed...

.....

Tianji City, as the base camp of the first cosmic hegemonic celestial family, naturally cannot be a lonely city alone!

In fact, it is a collective term for a starry building complex.

Tianji City, located in the central domain of the first universe, the starry sky covered by its territory is extremely vast!

In the broad sense, the Tianji City is divided into three areas: the periphery, the inner circumference and the core!

The periphery is made up of a large number of stars. These stars seem to be no different from the planets inhabited by the human race. The stars have a city, but they are all steel cities.

Inhabiting this planet is either a large number of intelligent robots or some slaves of the first universe.

Tianji has a unique ability in mechanical R&D and manufacturing.

This planet, which is home to a large number of intelligent robots and servant slaves, is actually a star-level industrial manufacturer. A large number of intelligent robots, warships and other mechanical equipment were built from the stars.

There are tens of thousands of such industrial stars, and these tens of thousands of industrial stars surround the inner circumference of the Tianji City, forming a peripheral industrial circle.

As for the inner circumference, it is formed by more than 10,000 star fortresses that have been built into the fortified fortress in the void.

If the periphery is an industrial circle, then the inner circle is the defensive circle.

The center of the inner perimeter defense circle is a huge mechanical city like the mainland. This is the Tianji City!

Normally, Tianji City looks like a flat continent. It is made of the strongest star alloy. It is vast, but it can be changed. If it is needed, this flat void alloy continent can be changed into A million-meter-diameter super starry fortress.

The ball of a million meters in diameter, that is, a thousand kilometers, the interior space is also the use of space folding technology, with tens of thousands of miles wide, such a vast city, even if there are few people, but all are Inside the stars, it is impossible to move.

In a sense, the base camp of the Tianzu people can actually appear anywhere, including the Second Universe and the Third Universe!

Compared with the largest male cities of the Terran, the biggest advantage of Sky City is the ability to change.

It can be either an alloy continent suspended in the void, or a horror star fortress with a diameter of one thousand kilometers. It can carry out interplanetary navigation, can jump in wormholes, and be able to defend...

For this reason, Tianji City will have an unparalleled name in the three universes!

At least, the super fortress of this scale, the immortal dynasty of the Terran technology camp, is absolutely impossible to build, and there is no such technology.

In the three universes, only the Tianji people have such a mythical star city...

Chapter 3524: Warfare

Five days later, the magic warfare arrived at Sky City!

Although I have already seen the grandeur of Tianji City in another form through the memory of Sha Baofeng and Emperor Shaofeng, but at the moment, this piece consists of countless planets that have been made into the strongest alloy star fortress. When the huge building complex, Ye Xuan was still deeply shocked!

The demon emperor's commander on the other side is even more stunned. He has never been to Tianji City, just to hear it, so he is as shocked as everything in front of him.

The population of the Terran is even larger, but it is distributed in countless stars in the third universe and countless administrative stars.

Basically, it is impossible to have a large number of administrative stars in a small area.

Because both the Terran, the other federations of the Second Universe, and even the servants of the First Universe, are almost all living beings.

The living body is required for the inhabited planetary climate environment. For example, the atmosphere is one of the most basic requirements. Without the atmosphere, it is impossible to block all kinds of harmful cosmic rays.

In the universe, there are countless stars, and the word "stars" is the same, but most of them are mineral stars, abandoned planets, and have an atmosphere. Although there are many stars suitable for living and living, there are basically many distributions. Scattered.

This directly caused the current situation of the Terran and all other federal ethnic groups in the Second Universe.

Of course, the starry network of the world is extremely developed. Even in the distant star field, there is absolutely no problem in communication.

However, Tianji City is different. In this small star field, all the stars have been used. There are more than 10,000 stars in the periphery and more than 10,000 stars in the inner circle. Among them, there are nearly 30,000 stars in the atmosphere. For the living body, it is reserved for some slaves.

Other planets that do not have an atmosphere that is not suitable for living habitats, all have cities, are built into a star-level industrial base or a defense fortress, and all of them are intelligent robots!

Ye Xuan looked at it. All the stars visible in the line of sight were all a steel city. No one was bare and was not used. This is just the outer periphery of Tianji City.

Such a vision, exhausting the three cosmic planes, can only be seen in the Tianjicheng star field!

The War of Wars just arrived at the edge of the outer star of the city, and immediately there was a fleet of ten 50,000-meter-diameter small fortresses ushered in.

Here, various fortresses and fortresses are everywhere. After all, it is the base camp of the Tianzu people. The warship manufacturing center of this family is also here. The stars and the sky are full of warships and fortresses, and each star's star dock is full. Various fortresses and fortresses.

Ye Xuan casually glanced at it and saw the 100,000-meter-diameter big fortress, at least tens of thousands. This number is terrible. Once all of them go to the starry battlefield, a star field will be second!

Ye Xuan Dang even if the electronic awareness of Sha Baofeng actively ditched the command ship of this patrol fleet, Sha Baofeng is the core of the Tianji nationality, the patriarch of the patriarch, although the status is lower than that of God, such as Shaofeng et al. In Tianji City, it is definitely a heavyweight.

There are many branches in this patrol fleet. There are ten small fortresses for each patrol ship. But in fact, there is a real Tianzu ethnic group in the command ship. The other nine seats are inside. It is an intelligent robot.

There are not many real-world people. It is said that it is only a few million. Some of them need to be stationed. In the base camp, they have to be scattered to nearly 30,000 stars and industrial bases. The situation of the Tianji people getting together is rarely seen.

Basically, the celestial tribes with missions are all associated with a group of intelligent robots without self-awareness!

Of course, this is actually a kind of experience for them, because the Tianji ethnic group was born from these intelligent robots. The reason why the Tianji people made so many intelligent robots and made them in various fields and regions. A large pile of intelligent robots, led by a real Tianzu ethnic group.

In addition to carrying out their own work and completing tasks, there is also a purpose, that is, hope that this kind of guidance can have more electronic wisdom life born!

As the core high-level of the Tianji nationality, Shabaofeng dare not say that it is unscrupulously rampant in the core city of the three major regions. At least, in this peripheral industrial area, it can still be done.

But on the one hand, Ye Xuan is now returning, not the only fortress that controls Sha Baofeng, but the war of war. On the other hand, it is because he sees in this peripheral area, the atmosphere seems to be with him in Sha Baofeng. The scenes seen by Emperor Shao Shaofeng and others are not the same. It seems that there are a large number of big fortresses and large and small fortresses that are gathering at the edge of the outer area. Just as you plan to go to the battlefield.

This is different from the usual situation. Some abnormalities are that he will take the initiative to contact the patrol fleet command ship that ushered in, indicating his identity and inquiring a few words.

After determining the identity of Ye Xuan, the other nine small fortresses of the entire patrol ship immediately retreated. Only the command ship seated in a Tianzu ethnic group stayed and explained to Ye Xuan that this scene was assembled. The reason for the vision.

The harvested information made Ye Xuan extremely shocked, and it was really preparing for the battle!

This is thousands of large and small fortresses and large and small fortresses. As for the three-kilometer captain's star-rated warships, a large black-pressed piece of at least hundreds of thousands of ships has been stopped in the void farther away.

The preparation for such a scale is clearly to set off the rhythm of the decisive battle.

Ye Xuan has never seen it, naturally shocked!

He originally thought that the Celestials had to fight the human race of the Third Universe, at least with the entire Wanluo Federation, but the facts made Ye Xuan feel surprised.

This time, the preparations for the Tianji people did not have any relationship with the Terran of the Third Universe. Even the United States of America did not participate in it. It was the private action of the various communities of the Second Universe.

Yes, just a few days ago, the **** Yi, Qingpeng and other powerful groups ranked in the top ten of the Second Universe Federation, the second half of the federal community, and the joint statement , claiming that it will attack the first universe at any cost!

This war came out, the two camps of the Terran were paralyzed on the spot, and they did not understand what the winds of the federal people of the Second Universe had drawn. It was originally in the dark with the Terran, and there was no result yet. Too much to go to the full universe of the first universe to fight.

Even the Federal Base of Wanlu did not figure out what happened. Although the warning was issued, the families of the Second Universe did not pay attention to it. At the moment, they were already at the end of the second universe to the wormhole of the first universe. Gathering the army...

Chapter 3525: cannon fodder

This time, more than half of all the federal ethnic groups in the Second Universe have publicly stated their positions and will participate in the war.

Among the top ten second-common federations, apart from the turtle family, other such as the bloody, Qingpeng, warrior, silvery, barbarian, golden eagle, Cailu, and greedy wolves The nine ethnic groups, such as the Tree Spirit, all expressed their attitude.

Originally, the Third Cosmic Terran and the Federal Congress of Wanluo thought that the nine great powers of the top ten ethnic groups in the second universe were just joking. After all, such a warfare was simply unreasonable, too strange, more like a prank. .

But very quickly, from the vast universe of the Second Universe, there was an urgent preparation for the various races, and on the edge of the cosmic wormhole leading to the first cosmic plane, began to gather a lot of news of the various fleets.

At this point, the Federal headquarters of Varo was flustered and realized the seriousness of the situation. This is clearly the second universe of the various races that have lost control and have not listened to the rhythm of federal control!

The Federal Headquarters immediately made a formal official squad, demanding that the first universe of the various ethnic groups, especially the nine top ten leading groups other than the Turtle family, explain this declaration of war.

At least, the internal ventilation, indicating that a reason is always necessary?

However, in the face of the communications and requirements of the federal headquarters, the second universe of the various ethnic groups was unprecedentedly tough, direct joint statement, affirming that this is a large-scale battle between the Second Universe and the First Universe, with Varo The federation has nothing to do with it, and it has nothing to do with the Terran of the Third Universe. I hope that they will not participate in it, otherwise it will affect the internal unity of the Federation.

At this point, the two camps of the Federal Base of Wanlu and the Terran of the Third Universe realized that something went wrong.

It is absolutely impossible for the people of the Second Universe to launch such a war for no reason.

We must know that for many years, the entire Federation of the Vatican has only become a tie with the tyrants of the First Universe. There are countless battles of magnitude and size. Basically, there are mutual wins and losses, and there is no longer a strength or weakness.

The entire Vatican Federation includes the third cosmic and the second universe.

It can be said that the overall combat power of the third cosmic human race is slightly stronger than that of the second universe.

Now the people of the second universe are clamoring to face the hegemonic tyrants of the first universe alone. This is either a brainstorm or a potential factor that they must fight and have to fight!

Because of this war, the odds of the second universe of the various races are no more than 20%!

Basically, it must be the end of a big defeat!

Obviously, the former possibility is almost non-existent. The brains of a group can still explain the past. The entire high-level elites of the entire second universe have collectively brainstormed, which is absolutely unscientific!

In other words, the facts are already very clear.

The families of the Second Universe have the reasons and difficulties to fight.

But what are the reasons and difficulties of this kind? Apart from themselves, no one knows the outside world. After determining that the Second Universe Federation is not a joke, the two camps of the Federal Base and the Terran have sent a large number of scouts. Going to the Second Universe and the First Universe, on the other hand, is the reason for the quest for the Second World Federation to swear to death.

On the other hand, it is precautionary, in the first universe to probe the Tianji family's reaction to this accident and various countermeasures.

In any case, the second universe is a member of the Federation of the Bandar, and its combat power is equivalent to about 40% of the total combat power of the entire Federation.

If the wars of the Second Universe are defeated and the losses are too great, the strength of the entire Federation will be greatly damaged. For the Commonwealth, for the two camps of the Third Universe, it is not a good thing, or even It may be a disaster.

Because the first universe of the hegemonic celestial family, has always been waiting for such an opportunity to separate the two camps of the Second Universe and the Terran, each broken.

This time, the various peoples of the Second Universe are clearly the opportunity to dream of others, and they have dedicated their efforts to go out. What do the heavenly people have to grasp?

Undoubtedly, as long as the families of the Second Universe are defeated, the Celestials will surely make a sigh of relief, aiming at the two camps of the Terran in the Third Universe.

As a result, the entire Wanluo Federation was completely annihilated by this war, and it was not impossible for the Tianji to dominate the three universes.

It is too important, so even if the Federation of the Vatican is extremely dissatisfied, even if the two camps of the Terran are more violent and thunderous, there is a feeling that the people of the Second Universe are shamelessly dragged into the water.

But for the sake of the overall situation, the Terran of the Third Universe was finally forced to prepare for helplessly!

After all, it is an ally of the same front, and the Terran and the Federal Headquarters will never be able to watch the various families of the Second Universe and be annihilated by the Celestials.

It is really a crucial moment to decide the overall situation of the war. The army of the two camps of the Terran must enter the battlefield through the cosmic wormhole, and helplessly participate in this battle, only to maintain the balance of the enemy and the enemy.

It can be said that the three cosmic planes are all due to the sudden brain smoldering of the second universe, and the winds of the three major planes have never been so close, because both the second universe The federal tribes, or the two camps of the third universe, have all begun to gather forces in the vicinity of the space cavity.

The same is true of the first universe's hegemonic celestial family. In the days when Ye Xuan rushed to Tianji City, all the federal groups in the entire first universe, including the demon family, all received the first-class readiness command of the Tianji nationality. .

Countless slaves, ready to fight!

However, for Ye Xuan, although this is not good news, it does not make him anxious. After all, this kind of plane-level cosmic war, once it broke out, is hundreds of thousands of years, not at all. It can be finished in two days a day.

Even the balance of the war, which camp will eventually tilt, will not be able to show up in a short period of time. It is really necessary to have a full-scale war. At least a hundred years later, it will show a little bit of a sign.

It can be said that it is too early and too early to be anxious for this.

But in fact, after Ye Xuan learned of the news, it was indeed the first time that it was aggravated. The reason is also very simple. The patriarch of the Tianzu tribe has already released the words. Not long ago, from the devil's life. The tens of millions of Void soldiers captured in the Black Hole will be dispatched to the first fleet of the battlefield in the Tianzu.

And the only mission of these Void Scoops is simple!

They will be used as the first round of power projected into the frontier battlefield, used as cannon fodder for the second universe federation!

After hearing this news, Ye Xuan was suddenly standing on the spot in an instant, with both fists clenched, a raging anger, roaring out of his chest...

Chapter 3526: Must fight

In the face of the provocative war of the second universe of the various tribes, the heavenly planet is the hegemon of the first universe. For many years, the only enemy of the Federation of Venero can cope with the superpowers of the third universe and the second universe. Nature can't be too low-key.

It is meaningless that Tianji City did not make any statements or declarations.

They just started preparing for the first time, using actual actions to explain everything!

There is no doubt that this plane-level cosmic war, the first universe, the heavenly family must be the core force, but it may not necessarily be the main force, because in the first cosmic plane, there are also the devils. Countless slaves!

There are not many people of the Tianji ethnic group. There are only a few million people in the real Tianzu ethnic group. It is impossible to put them all on the battlefield.

The main force of this battlefield, at least, the vast majority of the war of attrition, still need to rely on the fleet of the slaves of the first universe to fill in, of course, the intelligent robot team under the celestial family is also one of the main forces.

The celestial family is magical!

From the Tianji National Base camp, the participating forces, such as a huge fleet of tens of thousands of warships, perhaps only one of the real Tianzu ethnic groups.

But the terrorist power of this fleet is real and cannot be ignored.

A family of people with an electronic consciousness can control countless intelligent robots at the same time.

Battleships, and even a whole huge fleet, are controlled by intelligent robots, and that's it!

Otherwise, how can it dominate the entire first cosmic plane with the scale of the millions of real tribes?

In the first cosmic plane, there are more than a hundred servant groups!

Among the three cosmic planes, there was such a joke. At that time, the Tianji people did not dominate the first universe. Once, a huge fleet of thousands of warships, fortresses and fortresses attacked a resentment. Surrendered ethnic group.

As a result, the fleet of the Tianji nationality has won, and this ethnic group has become a slave to the celestial family.

At the end of the day, the ethnic group's ancestors sighed and said that it was the Tianji family who smashed thousands of warships, and the hundreds of millions of people were dispatched at the same time to conquer a small ethnic group. Is there a truth that does not sweep?

This is clearly still self-blame, sighing the world is not fair!

As a result, thousands of various fortresses and fortresses of the fleet of the Tianji family opened all the door passages.

Countless intelligent robots lined up one after another, drowning a void, but the real Tianzu ethnic group, but only one!

Only one person with electronic consciousness is enough to lead a large fleet of troops. All the instructions will reach the entire fleet in the form of electronic consciousness, and will be received by all intelligent robots.

Not only will it be fully conveyed in an instant, but the power of execution will not be biased any more, because they are all intelligent robots, without their own consciousness, only the consciousness of executing orders.

This is more effective than humans and other ethnic groups, and the efficiency of command-by-layer transmission is not known.

Therefore, the fleet of the Tianzu people will be so terrible!

Of course, this only refers to the regular battle, which is similar to the war of the ancient Supreme against the Shangtian fleet in the previous star of the evil.

That is a special case. The two sides of the battle are not the same level of power!

In a word, for the Tianzu people, a whole huge fleet, but only one or two real Tianzu ethnic groups sit in the town, it is completely unusual.

For example this time, that's it!

The Pioneer Fleet of the Tianji nationality is large in scale, with 1,000 large and small fortresses and 100 large and small fortresses. In addition, there are tens of thousands of star-rated battleships of three-kilometer star-rated battleships and kilometers of captains!

A pilot fleet of such a large scale, relying on intelligent robots for driving control, there are countless intelligent robots to go to the battlefield, and only the two people who are really responsible for the flagship command of the township are only two!

These two places, the high-level interior of the Tianzu people are vying for competition. In their view, this is definitely a good opportunity to make great contributions. It is only the federal people of the Second Universe who have sent some fleets, and they have taken the initiative to commit crimes. The first universe, on its own territory, has no fear at all.

Moreover, this time the Pioneer Fleet will bring the tens of millions of Void squads that have just been captured not long ago, and put them on the battlefield. As a cannon fodder that consumes the enemy's vitality, it can be said that no matter from which aspect, the fleet of the Celestial family All will surely win, and the federal tribes who have come from the second universe will be beaten and drowning.

If the Shaozu Emperor Shaofeng is here, the authority of the Pioneer Shipowner, no one can take it away, must fall into his hands, and all other top-ranking elites can compete for, at most, the position of deputy commander.

But now the Shaoshou Emperor Shaofeng is missing. It is said that there has been a major change in the source of the evil. The entire joint fleet that sent the support to Emperor Shaofeng has been annihilated, and even the signal for help has not been issued.

This is definitely the case of the catastrophe of Tianda, otherwise why?

There have been rumors in the darkness of the city of Tianji, saying that there is a horrible existence beyond the star's main territory in the depths of the source of evil. The young chief Shaofeng has fallen and can't come back.

For this reason, the younger generation of the younger generation of the Tianji nationality will all be like a chicken, and they will fight for the command of the Pioneer Fleet. In their view, they are not only fighting for it. It was only a pioneer commander of the war, but the future patriarch of the Tianji family.

When the Emperor Shaofeng falls, the patriarch will surely choose new talents to replace the young patriarchs in the younger generation. This time, the commander who led the Pioneer fleet to conquer the starry battlefield will undoubtedly have a greater chance if it performs well.

Under this circumstance, even the seniors of the older generation of the Tianzuo have reached a consensus in secret, no longer vying for the position of the commander of the Pioneer Fleet, and leaving the opportunity to the younger generation.

In the end, because the competition was too fierce, everyone wanted to get the top spot and get the position of the commander of the Pioneer Fleet. The inside of the Celestial family was in a state of turmoil. In order not to cause civil strife, the patriarch's emperor made a statement. This time, the commander of the Pioneer Fleet The position of the deputy commander will no longer be determined by the ethnic group, but will allow the younger generation of the tribe to compete with each other and start a fair competition!

Upon hearing this news, Ye Xuan's sneak peek at the moment, since it is fair competition, then it would be better.

Because, for him, the position of the commander of the Pioneer Fleet, he must be able to compete for the hand, so that the entire Nether Vulture group can fall into his hands without a trace, then the fleet will go to the battlefield, how to deal with it, Still not he has the final say?

There is nothing more comfortable than this, and you must not miss it...

Chapter 3527: Actually than this

Although it has been determined that the commander of the Pioneer Fleet will conduct a fair trial and a competitive finale for all the senior generations of the entire Tianzu nationality, but this comparison is in fact, but there is still no conclusion yet. The patriarch Yi did not make a final decision. Determine the rules of the test!

However, the fleet is about to start, and the rules of presumably competition will soon be introduced. It is not tomorrow.

Ye Xuan has saved the heart of victory, secretly sneer, no more inquiries, even if the control of the war battle number, head toward the core area of the city.

All the way through the peripheral industrial zone, the inner perimeter defense circle, along the way in this vast star field, every star and star that Ye Xuan saw was all built into an alloy city, and the star's land surface could hardly see the rock. The quality of the land, all of them are cold alloys, as if the stars are all made of alloy.

Shocking!

Soon, there was a continent in front, the mainland in the stars!

The cosmic starry sky is only the vastly known three major cosmic planes. It is already vast and innocent. Among these three planes, there are not only stars in the universe, but some strange universes. There is indeed a strangely shaped continent.

However, the mainland is made up of super-alloys, and there are only one of the three cosmic planes. This is the real Tianji City in the narrow sense, the core base of the Tianji people.

The surface of Tianji City does not look big, only a thousand kilometers, that is, millions of meters, but it is divided into two layers inside and outside.

The outer layer is the land surface of this alloy continent, and the inner layer is its inner space. Like the underground area of the mainland, due to the use of space folding technology, the underground interior of this alloy continent has a wider range!

There is a heavy place, except for the patriarch of the patriarch, and the core of his minority, which basically does not allow anyone to enter.

Among the nine mechanical cores mastered by Ye Xuan, only the Shaozu Emperor Shaofeng has the authority to enter the underground core area of Tianji City. The other eight people, including Sha Baofeng, are also the chiefs of the patriarch. One is a confidant, but because it is not a core existence, all of them are only eligible to enter and exit the land outside the city.

Unlike the other ethnic groups, the Tianji people basically do not have the high density of the tribes, because the tribes are originally few, and the entire Tianji family is only millions.

A large number of ethnic groups were stationed, and the ethnic groups stationed in the Tianji City also had to lead a patrol fleet to patrol the vast expanse of the star.

In addition, the outer industrial circle and the inner circle of the defensive circle, all in one place, need one or two people of the Tianzu nationality to sit down.

In addition, the inner region of the celestial mainland also needs some core high-rises to sit on the guards, guarding some heavy grounds, and the pledges sent by the first cosmic servants. Therefore, the external land surface on the mainland is basically cold and clear, but still There is a patrol team composed of intelligent super robots, and sometimes walks by.

Sha Baofeng has a villa on the outer land surface of Tianji mainland. It is his private territory. The upper floors of other Tianji people cannot enter. Only Shabaofeng's own electronic consciousness can be opened.

After the magic warfare arrived at the edge of the mainland, it was no longer allowed to move forward. This Ye Xuan knew that even if he and Chanas went out of the magic warfare and waved their income into the immortal world, they fell. Shape, walk towards your own private villa.

Although this is an alloy space city, because the Tianji people have longed for the life of the human race, even their own appearance, they have tried their best to move closer to mankind. The outer land surface of the Tianji City seems to be inhabited by the human race. The environment is similar, with ground, buildings and vegetation.

Of course, all are built with super memory alloys and super bio-alloys. Even an inconspicuous tree has an impressive high-intensity, even if it is a star-struck battleship. It may not be able to ruin.

All the way to the private villa of Sha Baofeng, did not encounter other high-level elites, but the patrol of super-combat intelligent robots, met a lot, but they can identify the electronic consciousness of the Tianzu ethnic group, so Did not stop, Huang Xuan as Sha Baofeng.

The exterior form and internal structure of the villa are the same as those of ordinary villas in the Terran world, but the materials are made of top alloys, which are extremely strong and can resist the bombardment of the star guns. After all, this is the core base of Tianji Continent and Tianji City.

Ye Xuan has the electronic awareness of Sha Baofeng. For this villa, he is the master, so it is easy to enter. After some searching, Sha Baofeng left all the rare minerals, materials and cultivation resources in the villa. All were swept away by Ye Xuan.

The harvest is quite rich, although the volume is not a lot, but it can be imagined that Sha Baofeng will stay in the base of the base camp, and all of them are top treasures.

Ye Xuan almost didn't hold back. He wanted to change an electronic consciousness directly. He went to the villa of Emperor Shaofeng and others and went to ransack. But in the end, he still stopped working, because in that case, no doubt will be the first time. Exposed!

The eight high-ranking elites such as Emperor Shaofeng are now missing. If it is possible to appear outside of Tianji City, it is possible to find an excuse to smother the past. If it suddenly appears in the core base camp of Tianji City, it will definitely raise doubts. Unless Ye Xuan has already planned to make a ticket and immediately sneak away, otherwise he can't do this.

In the looting of everything in Shabaofeng Villa, the demon Guardian led Chanas, who was always watching, shaking his head and sighing from time to time. In his opinion, Ye Xuan was not robbing, but was packing soft, which was preparation It's slipping away, after all, it's a big deal, there's always a day when the east window is going!

Therefore, when Ye Xuan ransacked everything in the villa and filled it with carelessness, he told Chanas that he wanted to stay here recently. He would open his mouth and allow him to freely enter and exit the villa. This old thing hesitated. Even when I turned my head into a wave drum: "There is no discussion about this matter. Where does the sand man go, where the old man goes, and want to throw me here as a ghost, it is absolutely impossible!"

"what?"

Ye Xuan turned to the head and looked at Chanas a few times. I didn't expect this old guy to be quite smart. Could it be that I saw nothing?

Without waiting for him, Chanas on the side has already made a sound again: "Hey, when you come back, you will pick up the softness. This is clearly the rhythm of running. Sha Daren, I have not added any trouble to you on this road." Don't you say it? We are now on a rope, and it is not kind to leave me at this time?"

Packing up soft?

Ye Xuan stunned, and then dumb, this old guy actually thought so for a long time, it is really speechless.

Just as Ye Xuan smiled, the villa's holographic stereo screen suddenly lit up and flashed a message.

Ye Xuan once again snorted and grinned. "This is good, it's a long time, and finally it's actually more than this. It seems that I really want to pick the rhythm of the new young patriarch..."

Chapter 3528: Ten thousand incarnation

The information displayed on the holographic stereo screen is the rule of the election of the top and bottom commanders of the Pioneer fleet.

Quite simply, all the younger generations in the family in Tianji City can participate in the competition. The content of the campaign is the competition of mechanical integration ability, which limits the only winners who can only win the patriarch Because only the imperial concubine of the emperor will be opened, this so-called ultimate mystery of the heavenly family.

This is clearly the rhythm of picking new junior patriarchs!

Perhaps before the death of Emperor Shaofeng has been confirmed, this matter will not be announced on the table, but everyone knows that the patriarch of the patriarch must be the meaning of this, and the new patriarchs will be selected in advance.

Because for the Tianzu ethnic group, how talent, from its understanding of the ability of mechanical integration, can be seen!

Emperor Shaofeng's talent in this ultimate mystery is far beyond the other generations of the younger generation!

However, for Ye Xuan, this is a good news. He is not rare, but the commander of the Pioneer Fleet, Ye Xuan must win the hand!

If it is a competition in other fields and electronic capabilities, Ye Xuan may not dare to speak big, but in terms of mechanical integration ability, in addition to the patriarch of the ultimate abilities, all other people, Ye Xuan is fearless.

Including several old people in the family, Ye Xuan has not seen them, but through the memory of Emperor Shaofeng and others, basically understand the extent of his mechanical fusion ability.

That is to say, no accident, the commander of the Pioneer Fleet of this time war is already a non-Ye Xuan!

The problem of the Void squad can basically be solved. Ye Xuan is now considering the rescue of the more than ten dynasties of the Devil!

The servants of the entire first universe, after being conquered by the celestial beings, each ethnic group, the patriarchs of the dynasties or the emperors of the dynasty, must send a best-bred elder to the celestial city as a hostage.

For this reason, in the interior of Tianji City, it is said that there is an independent area, called the imperial prison, and the imprisoned are the royal family members of all ethnic groups!

In order to get close to the imperial prison, it is necessary to enter the interior of the heavenly continent. With this authority, among the nine mechanical intellectual cores mastered by Ye Xuan, only the electronic consciousness of the Shaozu Emperor Shaofeng is available.

But Emperor Shaofeng can't take the lead at the moment, otherwise it will cause trouble to Ye Xuan, fearing that he will not wait for him to receive the entire squad, and everything will be revealed.

This incident has obviously fallen into a dead end. If the Emperor's uncles are rescued as Emperor Shaofeng, the rescue of the soldiers will be subject to change.

If you don't move, wait for the commander of the Pioneer Fleet to receive the entire squad, then, at that time, Ye Xuan will have to go to the front line immediately, and there will be no time to rescue the devil's dynasty...

"It seems that I can only wait until I return to Sky City from the battlefield front, and then try to rescue those old guys."

Frowning and thinking, Ye Xuan can only shake his head and sigh: "This is clearly the rhythm of the enemy's long-term stagnation. The devil's ethnic group is powerful. If it is not forced, it is really unwilling to give up. Hey, this is a trouble."

In the sigh, Ye Xuan reluctantly decided the general direction of the follow-up action: first, get the commander's cap of the Pioneer Fleet and receive the squad, and then solve the problem, then return to the celestial family to rescue the demon. uncle!

It was also at this time that the holographic stereo screen in the living room of the villa suddenly flashed again. A Chinese character face, the majestic middle-aged man appeared in the stereo screen.

Ye Xuan's heart jumped and quickly got up and slightly owed: "The patriarch!"

"Hey!"

The voice just fell, and there was a loud noise on the sofa next to it. Ye Xuan turned to look at it, just to see the demon emperor led Chanas's flustered color and hurriedly climbed from the ground, standing in front of the sofa with respect and respect. The figure is a little trembling: "The clan...the patriarch is good!"

For the slaves of the first universe, the patriarch of the celestial family, the emperor, is the god, the supreme being, the entire first universe, his subjects, but in fact, I have truly seen the emperor. There are not many among the entire universe of the first universe.

Even Chanus, who had never thought about it before, came to Tianji City this time and could see the Emperor of the Heavenly Kingdom, even if it was from a holographic stereo screen... so it would be so scary. Lost.

This suddenly and the ordinary people in the dynasty suddenly saw the immortal emperor coming, it is inevitable.

At this moment, Ye Xuan's heartstrings are also tightened. For Chanas, he is not particularly reassured, fearing that the old guy suddenly said something that should not be said.

Originally, Ye Xuan was also considering ways to avoid it, but the Emperor's appearance was too sudden, which made him unprepared.

Fortunately, this is just a avatar image of Emperor Yi, and should not see too much problem.

The core of the life of the Tianzu people is actually an electronic consciousness. Therefore, in the vast city of Tianji, the patriarch of the patriarch can be transformed into thousands of places anytime and anywhere. As long as there is a place where electronic equipment exists, he can appear at any time.

Even if it is an intelligent robot patrolling in the sky, the first moment is still normal, and the next moment may become the carrier of the emperor's electronic consciousness.

For this, Ye Xuan has already learned through the memory of Sha Baofeng. Therefore, in Tianji City, he will be so careful. No matter what his words and deeds, he must always pay attention. Maybe an electronic eye in a certain position will be incarnate at this moment. Became the eyes of Emperor Yi, and are peeping at you!

This kind of horror ability of tens of millions of incarnations, the Terran cultivation camp has a similar practice, perhaps a super old monster also has this ability, at least the tenth house of the sixth house of the lord, in this ability, the rumor is quite Deep.

However, in comparison, in a star-major mechanical city like Tianji City, even if the super-role of the human race is good at this, it must be suppressed by the emperor. Here, people have congenital advantages!

What appears in front of us is actually not the deity of Emperor Yi, but the image of one of his avatars.

"Don't be afraid! The last mission was that I made a mistake. The fox lord is not something you can deal with. Even if Shao Feng personally passed, it is not his opponent."

Not waiting for Ye Xuan's voice, the image of the emperor's avatar in the holographic stereo screen has been opened, and there is no expression on his face. He did not look at the chasing Chanas at the sofa in the distance, just faintly Ye Xuan took a look and then he said: "But this time, you are not completely unrecognized. I heard that the fox master has mastered the mechanical integration ability? You even played with him... Now, Take all the details and details carefully!"

Chapter 3529: Mechanical ratio

Ye Xuan is actually very nervous, although it is only a video in the holographic stereo screen, and this image is not the emperor himself, but the image of his avatar, but the identity of the other party is there, the largest in the first universe. BOSS, based on his current cultivation, if he is in peacetime, he has no qualifications for dialogue with other people's avatars.

Can you not be nervous?

But things are going better than he expected. After all, this is Tianji City, and Ye Xuan is in the private villa of Shabaofeng. In addition to Shabaofeng's electronic consciousness, the whole Tianzu Only Emperor Yi and his avatars can come at will.

Even the super old monsters in the family do not have this permission.

Ye Xuan can enter here, and it has already explained the problem.

Of course, this is also the form of life of the Emperor and the Tianji people. They are too conceited. They simply did not expect the electronic consciousness of the Tianzu nationality to be swallowed up.

After all, he is the mechanical life body created by the pioneer of human science and technology, and the engulfing system is the legacy of Xingbo. In some respects, it is understandable to transcend the concept of Emperor Yi.

With the hustle and bustle, Ye Xuan will detail the details of the mechanical war that took place in the Tianshou Star field on that day. All of them were reported in detail. Of course, it was reported from the perspective of Sha Baofeng. All these memories and Sha Baofeng's own inferences and guesses are all stored in the mechanical core of Sha Baofeng.

Ye Xuan is only reading while reading.

Because it is directly reading the memory data of Sha Baofeng, whether it is his habit of narrative, or the style of various inferences and guesses, it is completely consistent with Sha Baofeng himself, so until he finishes everything, there is no Any doubt that caused the image of this emperor in the holographic stereo screen.

In his view, Ye Xuan in front of him is Sha Baofeng. Everything and heart is in peace. There is no difference in peacetime!

In a word, this level, Ye Xuan passed smoothly!

As the patriarch of the entire celestial family, Emperor Yi could not come to him to talk and ask for him in three days. The younger generation like Sha Baofeng had a lot of enthusiasm.

This time, I will come to Ye Xuan with a avatar, just because he personally experienced the battle with the singer and the master, and mastered the first-hand information.

Otherwise, Ye Xuan will come to Tianji City this time, and may not have the opportunity to see Emperor Yi, even if it is just a holographic image of a avatar!

That is to say, after this level has passed, as long as there is no accidental change, Ye Xuan will not have much trouble in this Tiancheng City and need to be careful to cope.

Of course, except for the upcoming mechanical ratio!

He must fight for this matter, but he must also fight for it. Otherwise, the character of Sha Baofeng, if given up for no reason, will lead to suspicious eyes!

"You should know the news of Shaofeng's accident. This time, for all the younger generations of the confession, it is an opportunity!"

After Ye Xuan finished everything, the image of Emperor Yi did not make any evaluation. Obviously, the Linghu Shaozhu also showed the ultimate mysterious mechanical fusion ability unique to the Celestial family. He is also very confused, and it is difficult to understand the truth in one time.

At this moment, the image of the emperor's avatar continues to say: "Whether or not Shaofeng has encountered an accident, this time the scale selection is of great significance to you."

"You and the sorcerer and the lord have handed over the hand. That guy is really extraordinary. Even now I can't figure out the key points in it. With the starry black technology he has in his hands, in that battle, I must be inspired by you. Not small."

"Good performance, if Shaofeng really has an accident, what does this scale mean? You should be clear, the opportunity is for you, can you grasp it, you have to look at yourself..."

"The Xie people grow up and bring them!"

Ye Xuan sighed with a sigh of relief, and his head was lower. Just as he spoke, the holographic stereo screen flashed in front of him, and he was silent.

At this point, I have been trembled and shivering, but I have never been touched by the Emperor Wei of the Emperor Yi's avatar.

The heart glanced at the holographic stereo screen that had disappeared next to it, and then the face showed a surprise color. The arched hand came to Ye Xuan: "Shasha...Sha Daren, congratulations! The patriarchs have a clear meaning of cultivation. No wonder you were before... hahaha, it was expected!"

When the words were exported, Ye Xuan was scared even if it was a glimpse.

This guy is too savage, actually said this in Tianji City, if the emperor's avatar did not leave, but crouched, I am afraid that only these two sentences, it will be a bad thing.

"Shut up! Don't talk, no one takes you as a dumb!"

Ye Xuan's heart trembled, and immediately sighed, interrupted the words of Chanas, and at the same time warned the general, glanced at the already silent holographic stereo screen.

Chanas stunned, and then his face was brushed all white, this guy is not a fool, just because of the sudden turn of the peak, all of a sudden surprise is forgotten.

At this moment, Ye Xuan sighed and shouted, and suddenly the cold sweat that was full of shocks came out!

"Mechanical ratio is about to start tomorrow. Before that, I have to take back the fortress of the frame. When I went to the Magic Emperor to perform the task, I explained to a fortress in the peripheral industrial circle that I was upgraded. After all, It's your own car. It's more convenient to participate in this big match!"

Turning to the side of Chanas, Ye Xuan finished, and went directly outside the villa.

This is also his careful place. The mechanics are much smaller than others. Sha Baofeng's car is a 100,000-meter-diameter fortress. With his character, he can participate in this ratio. It is impossible to abandon his car and use the devil. The ethnic group brought the replacement of the magic warfare of the temporary mobility.

However, as a result, there is a new problem in front of Ye Xuan.

That is, although the Xingye Life Fortress can change its shape at will, as long as Ye Xuan gets all kinds of performance data of Sha Baofeng, it can be directly changed.

But the scale is hard to change.

Sha Baofeng's car is a 100,000-meter-diameter fortress. The Xingye Life Fortress is just a small fortress of 50,000 meters in diameter. There is too much difference!

Really want to bring Sha Baofeng's car to play, Ye Xuan will be defeated, although he also has the electronic consciousness of the Tianji nationality, basically have research on the mechanical fusion ability, but how can it be with the real life fortress Xingyehao Compared?

In order to win, he can only steal the pillars and let the Xingye Life Fortress change into the seat of Sha Baofeng.

That is to say, in a short night, he must upgrade the scale of the Stars from the small fortress of 50,000 meters in diameter to the fortress of 100,000 meters in diameter.

Otherwise, when the Hoshino is on the scene, it must be worn!

Chapter 3530: Gold slime

After a short while, Ye Xuan and Chanas went to the peripheral industrial circle, and saw the treasure of Bao Baofeng in the star-shaped dock of a huge industrial star!

Ye Xuan has the electronic consciousness of Sha Baofeng, and directly enters the 100,000-meter-diameter large fortress without any blockage. The first time, all the performance data of this big fortress is copied and input into the phagocytic system. The data repository, passed through the phagocytic system, was passed to the Hoshino Life Fortress.

However, even with these performance data, the Hoshino Life Fortress is still unable to directly change to the shape of Baofeng. The scale is hard, and the Hoshino must be upgraded again, from the current 50,000-meter diameter to 100,000 meters. diameter.

If it was in the past, this can never be done overnight, but there is still a life crystal mother in Ye Xuan's hands. If it is used up, it can still be done.

Previously, after winning the system competition task with Yinxia Fairy, Ye Xuan's spoils from the exchange shop attached to the other system were a life crystal.

The reason why I look at this life crystal mother is because this thing has a magical effect on the Slim group of the evil spirits, which has a large and long-lasting effect on the level of life. As a result, the quality of the Elf Crystal that Ye Xuan needs must also A big increase, this is one of the important issues that he has been headaches and unresolved.

The crystal of the elf comes from a creature called the evil spirit Slime, which is the crystallization of the power in the spiritual forest. This crystal is also one of the natural life energy that can be absorbed by the self-proliferation group of the world!

The evil spirit Slime is the heterogeneous group in the first universe, looks very ugly, the surface of the body secretes a kind of blue-black toxin liquid, even in the first universe of the celestial slaves and hundreds of people, this group It is a very unappealing existence, and Ye Xuan is also inadvertently discovering that the crystals in their bodies are one of the energy needed for the growth of the world's worms.

After the life crystal mother was used up, the world insect self-derivative group grew wildly, and numerous micro-molecules proliferated in a massive way. Eventually, the Xingye Life Giant Fort grew into a small fortress of 50,000 meters in diameter.

In the following, Ye Xuan won three system competition missions respectively, the objects are Xiaoyaozi, Yumozi and Mochen.

Among them, he did not find the life crystal mother from the system exchange shop of Xiaoyao and Mochen, so he chose other treasures, which are also extremely precious.

But in the system of the demon's system exchange, Ye Xuan discovered the second life crystal mother, even if it was selected.

And now, this life crystal mother, also came in handy!

Ye Xuan immediately took the life crystal mother from the immortal world and threw it into the phagocytic system.

"Hey, congratulations to the host, get the life crystal mother! Quality: pure and flawless! Efficacy: Life evolution energy crystal, can quickly and continuously improve the life level of the evil spirits Slim group! Is it used immediately?"

The system's prompt tone sounded quickly in his mind. Then, a baby's fist-sized golden yellow irregular crystal was directly absorbed by the phagocytic system and injected into the life of the Xingye Life Fortress in Ye Xuan's body. Among them.

"Shashasha..."

"Boom!"

Soon, the low and continuous muffled sounds from Ye Xuan's body constantly swayed, accompanied by dense faint sounds, giving the impression that there are countless silkworms eating, eating mulberry leaves in a piece of mulberry .

The Hoshino Life Fortress, suspended in the immortal world of his body, is rapidly expanding at a speed visible to the naked eye. Not only the expansion of the volume, but also the external surface of the ship.

Ye Xuan quickly issued instructions to the body's phagocytic system, which allowed it to connect with the intelligent center of the Hoshino, limiting the growth of the hull to a diameter of 50,000 meters. After reaching this standard, the hull's Growth stops immediately, and all the micro-molecules that follow-up are all invested in the details of the battleship performance and internal and external structure, and strive for excellence!

All of this was carried out unconsciously. In just ten minutes, the Xingye Life Fortress in Ye Xuan's body finally grew to a scale of 100,000 meters in diameter. Since then, it has stopped growing, but the second life mother The level of life of the evil spirits of the Slim group caused by the crystal energy continues.

All the subsequent energies are used in the internal performance enhancement of the Hoshino Life Fortress. As a result, it will follow the most important features of the past, on the surface it is a 100,000-meter-diameter big fortress, but the actual performance But it has to go beyond a big cut.

In the end, everything ended in more than half an hour, the energy of the second life mother crystal was finally exhausted, and the life level change of the evil spirits slime group was suspended, giving the world's insects a large population of giants. The energy tends to be steady, and this evolution of the Hoshino Fortress is completed.

At this time, the life level of the evil spirits slime group has swallowed up the mysterious energy of the two life crystals before and after, and has risen to a high degree, all the evil spirits on the Slim back. A golden yellow line emerges from the head to the tail, and the entire body also has a little bit of gold spots.

Even the mucus secreted in their bodies turned into pale gold.

Perhaps, it is no longer appropriate to call them the evil spirits, now called Gold Slim, which will be more appropriate.

After everything was completed, Ye Xuan issued a morphological change to the Xingye Life Fortress, perfecting the instructions of the Baofeng Fortress.

It all started very quickly, but no one knew that everything was done in the immortal world of his body. Then, Ye Xuan waved the Baofeng in the dock into the body. At this time, if someone is in the body, it will be immortal. Seeing this scene must be amazing.

Two identical fortresses lined up side by side, suspended in the semi-air of Ye Xuan's immortal world.

During the meditation, the real Baofeng has been searched by Ye Xuan for the electronic consciousness of Sha Baofeng. All important resources and materials have been searched out and stored in the immortal world. Inside the maple.

Because Ye Xuan always has a feeling, as he blooms in the subsequent Tianji mechanical ratio, by then, this Baofeng may not be able to take it away. Emperor Yi may be interested in it. Of course, it produces The interest is the fake Baofeng, which is the life fortress of the Hoshino.

However, Ye Xuan is unlikely to hand over the Hoshino, and he can only steal the pillars and use the real Baofeng to fill it up!

At the moment, he will vacate all the resources and all kinds of rare materials inside the Baofeng. It is also a plan to prepare in advance.

After all, Ye Xuan took Chanas to leave the star dock of the industrial star, returned to the mainland of the core area, and entered the villa to wait for the mechanical ratio of tomorrow...
