

Super D. S 3531

Chapter 3531: Talented people

This time, the Tianji national mechanical ratio, although the gimmick on the countertop is only the position of the chief and deputy commander of the Pioneer Fleet, in fact, all the top secretaries of the Tianzu are well aware, this is the secret selection of a new junior patriarch. The winner will have the patriarch who can become the next celestial family.

Of course, this has to wait until the news of the current Shaoyang Emperor Shaofeng's fall is confirmed!

The mechanical comparison ratio test project is the ultimate mysterious mechanical fusion ability of the Tianji people. This ability, the patriarch of the patriarch is only open to his ancestors, so it is doomed that there will be many younger generations of the Tianzu ethnic group. Unable to participate.

Not all tribes have the qualification to become patriarchs, and they are closely related to their talents!

The mechanical ratio is more than the mechanical fusion ability, but the ultimate secret technique of the patriarch is open, and only the confession, the existence of this kind, even the younger generation of the Tianji High level.

Therefore, its car is at least a small fortress of 50,000 meters in diameter, most of which are large fortresses with a diameter of 100,000 meters.

As a result, the mechanical ratio of the venue is obviously not too small, it is a vast void of 100,000 miles, in the outer domain outside the industrial circle of Tianji City.

Early the next morning, when Ye Xuan rushed with Chanas, the vast void of 100,000 miles was already full of dense fortresses, even some big fortresses and small fortresses.

In addition to the millions of celestial people watching the game, there are a large number of intelligent robots also have such honors.

The people of the Tianzu nationality are born from these intelligent robots, and they have the wisdom to be born. Therefore, in the base camp of the Tianji nationality, all the celestial people will consciously guide themselves to countless intelligent robots under their leadership.

Like this kind of war to watch the high-level mechanical integration ability of the high-level people, some intelligent robots may have a certain chance to make their electronic intelligence change after the observation, thus giving birth to self-consciousness, which means a new one. The tribe was born.

In addition, there are some fortresses that are carried by the servants of the celestial servants who sent them to the celestial city. They were originally placed in the imperial prison in the inner city of Tianji City. However, this opportunity to show the genius of the celestial family, the emperor will obviously not let go.

He personally ordered that the celestial guardians of the heavenly host who saw the slaves and the hostages be escorted to see the powerful power of the ultimate mystery of the Tianzu people!

The patriarch of the patriarch did not show up, but there is no doubt that there are bound to be many avatars among the numerous warships, fortresses and fortresses. In this starry mechanical city, the emperor, the ancestor of the celestial family, can be described as Incarnation is hundreds of millions, everywhere!

The mechanical ratio started very quickly, the rules were simple, and it was simple enough to say that there were no rules.

Therefore, the candidates can play the challenge at any time, and until they quit, they will lose their qualifications.

If you are strong enough, you can steadily set up this 100,000-mile-long emptiness center from the very beginning, accepting the challenges of all people, standing until the end, and attracting attention!

Ye Xuan is not impulsive. Although he is confident that he can do this, it is too windy. Here is Tianji City. The other existence Ye Xuan is not afraid, but the patriarch of the Tianji nationality, he is not afraid.

Although Emperor Yi is only an intelligent life created by the pioneer of the Terran Technology, it kills Xingbo, and it has proved its means to be hot.

As a new life of mechanical intelligence, Emperor Yi can gradually grow with a large group of intelligent robots, guide them step by step, and create more mechanical intelligence life among them, and successfully dominate a cosmic plane. For hundreds of thousands of years, this in itself has already explained the horror of its means.

Not to mention that it is a clever mechanical intelligence life. Even a pig, after living for hundreds of thousands of years, can become a powerful pig industry. This kind of existence, Ye Xuan knows that now Fighting, so there is no need to attract too much attention.

The machine is bigger than he really has to win, but at most it is like a black horse. When he plays at a crucial time, it gives him a feeling of winning the big game. Otherwise, Mu Xiu Yulin, who provokes the suspicion of the emperor, can It's really troublesome.

The war began very soon. The core high-level of the younger generation of the two celestial families caught the battle in this 100,000-mile-long emptiness. From time to time, the thunderous blast of the rumble was heard, and a huge void was disturbed.

The two younger generations are not weak in their high-level strength. Their cars are all 100,000-meter-diameter big fortresses, and because the ratio test is the ultimate mysterious mechanical fusion of the Tianzu people, so these two guys Come up and directly integrate with their respective cars.

Two mechanical warfare, it looks extraordinary!

One change is a mechanical knives, which is equivalent to the shape changed by Sha Baofeng at the beginning, but it is more powerful and takes the melee line to strengthen.

The other one turned into a star-studded worm, the whole body is a dense barb and a hose like a mouthpart. Each hose is actually a muzzle. It is a way of strengthening the distance.

Although the mechanical warfare of the two guys' mechanical fusion ability is not new, at least Ye Xuan did not feel any bright spots, but as the battle unfolded, he gradually got an inspiring one. feel.

The Tianji people really have a lot of talents. If they talk about the cultivation of the human race, or the cultivation of the spiritual power of the devil, and the cultivation of the blood talents of the second universe, they may not really be anything. Not outstanding.

But in the field of machinery and electronics, every planet of the celestial family has a unique talent.

The young elites who can become the patriarchs of the patriarchs are naturally the best among them.

The degree of change between the two mechanical warfare is not amazing. Ye Xuan even felt that it was too conservative and backward. However, as the battle began, the two guys fought against the mechanical warfare formed after their own integration with the car. In terms of technical application, Ye Xuan opened his eyes.

All of this, Ye Xuan has not let go, directly through the body's engulfment system, passed to the life fortress that has changed into Baofeng.

I believe that the battle images between these mechanical warfare can also have a certain inspiring effect on the life support of the Hoshino. Ye Xuan is almost equivalent to stealing the teacher on the spot, but also knows nothing about it. !

The first battle ended very quickly, but it was only ten minutes before and after, but Ye Xuan was still unfinished, because he had benefited a lot. Under this expectation, the second battle quickly opened the curtain... ..

Chapter 3532: Who else is not satisfied

In the last battle of the two young generations of the core generation, after the mechanical integration of their car, the changed war worms were a mechanical knife and a star-studded worm, one for melee reinforcement and one for long-range attack. Strengthening, and ultimately winning, is a mechanical knife that has been strengthened by melee.

It must be said that among all the people of the Tianzu ethnic group who have realized the ability of mechanical integration, there are still many people who prefer mechanical knives. In the impression of

Emperor Shaofeng, it should account for about 40%, such as Emperor Shao. Feng himself, its mechanical warfare, is a mechanical knife.

The same is true of Shabaofeng, which was the first to play against the Xingye Life Fortress!

This kind of star zerg is also quite advantageous in all zerg patterns. It belongs to the fighting zerg, especially the melee. The pair of **** like giant blades are extremely eye-catching, so they are favored.

Although there are only a small number of high-level elites who have mechanical integration with their car, the mechanical warfare that has changed is a mechanical knife, but the changes in each person are different, and there are no two mechanical knives.螳 is exactly the same.

This subtle change has its special effects and attack effects. For example, the first mechanical knives that defeated another star-studded worm, the tail has become a honeycomb-like mechanical jet. The dense holes are all spray holes.

These holes are congested together, like a hive, which can launch super-alloy thorns and launch micro-intensity dead-light gun energy beam, and because of the special treatment inside, the speed is super fast and it is hard to prevent.

While the knife flutters the pair of chilling giant arms and wrestles, the tail is violently spurting a wave of super-alloy thorns, and then a wave of dense miniature dead light gun energy light rain, the effect is absolutely fatal.

Ye Xuan is very inspired.

The first winner was named Seines. In the memory of Sha Baofeng, this guy's strength is still on the Shabaofeng. Although the talent is not as good as the Shaoyang Emperor Shaofeng, but the difference is not much, this time The machine was played at the beginning of the game, and then he took the hegemony and pushed it. In just ten minutes, he solved the opponent. He clearly wanted to dominate the game from the beginning and win the first prize with absolute advantage!

There are almost no rules for Dabi. As long as you have this ability, you will be playing from the very beginning. What you will face is a wheel battle after another. This seems to have suffered a big loss, but in fact, as long as it is reflected The power is strong enough, which can deter many competitors.

However, the attractiveness of the commander of the Pioneer Fleet is indeed not small. The temptation of the young patriarchs in the future is even greater. Even if Senas is stronger, the core elites of the younger generation of the Tianji nationality will not be defeated.

The second challenger came on the scene very quickly. The battle was more intense and lasted for nearly an hour. Eventually, Senas won.

However, he still looks like a god, not tired because of two battles in succession. This is related to the characteristics of the mechanical life of the Tianzu people. The total strength of the human race is limited, and it is continuously consumed in the war. Innocent supplements, including the second universe of the various national powers are the same, the strength of the body and the strength of the body, and eventually will be consumed in the fierce battle.

However, the Tianji family can't. After the mechanical integration ability is developed, as long as the energy in the kinetic energy tank of the car is not exhausted, any Tianzu ethnic group can always maintain strong energy and the strongest fighting state.

To put it bluntly, it is a word, the electricity is not used up, always the dragon is fierce!

“Who else is not convinced?”

Two consecutive defeats to the opponents, especially the second opponent, in the core generation of the young generation of the Tianzu ethnic group, is a kind of prestigious one, and Senas seems to be arrogant at this moment, the mechanical knife with a length of 100,000 meters straddles the void. Domineering side leakage, screaming loudly.

Perhaps it was because of his previous battles, the brave extraordinary power to deter, for a time, there was a voice of discussion around the void, but the warriors did not.

Ye Xuan frowned, just as he wanted to go forward, ready to play, the left side of the sky, a sneer but took over the words at this moment, the body shape has entered the big void.

This is a purple-haired young man who looks quite fascinating. His temperament and breath are both cold and cold. The strength of the body is in the tenth order of the mysterious light in the eleventh world, just like Ye Xuan.

And Senas is the mechanical powerhouse of the twelfth big void nine-step great perfection.

On the surface, this war is clearly Seines predominance, because the war between mechanical warfare, although the degree of understanding of the mechanical integration of the top of the Celestial family, and the basic performance of their respective drivers, but the fusion of Repairing strength is actually an influencing factor.

The cultivation of Senas is stronger than that of the purple-haired young people. After the full integration, various manipulations will be more convenient.

In fact, after seeing the purple-haired young man appearing and playing, Senas immediately changed his face and looked a little gloomy. Instead, the purple-haired young man looked calm and did not seem to have Senna at all. Sis is in the eye.

"Yero, when did you come back? Why don't I know?"

In the gloomy complex, Senas queried the name of the purple-haired young man, and the tone was obvious.

Ye Xuan's heart moved and immediately remembered who this person was.

Yero, the talent of the younger generation of the Tianji nationality, is second only to the existence of the Shaoyang Emperor Shaofeng. When Emperor Shaofeng was not a minority leader, only this person had the strength to compete with him.

Although the position of the chief patriarch is still on the head of Emperor Shaofeng, the electronic talent of Jero has not been erased. In the young generation of the celestial family, his electronic talent is still recognized as a leader. Second to the Shaozu Emperor Shaofeng.

However, Yero was sent out to perform a secret mission two years ago, not in the family. For this reason, Senas and other younger generations of the Tianji ethnic group who are weaker than him in terms of electronic talent will move. Thoughts, want to seize the opportunity to fight.

What Seines didn't think was that Jero had already returned, and it appeared in today's Dabi scene, which made him a whole bad person, because he did not have much control over the battle with Yero. The electronic talent is very strong, and the understanding of mechanical fusion ability is even more than that of Senas.

"Can't you fight? Where come so much nonsense? If you are afraid, you can end now, no one will laugh at you, everyone's time is precious, looking forward to the emergence of the next challenger!"

Jero squinted at Senas and fainted out. After that, he didn't wait for the latter's reply. He waved his hand and offered a lavender, a dreamy fortress, and then stepped forward. Into it...

Chapter 3533: Fast pest

"It's really more than a arrogant..."

Ye Xuan raised his hand and stroked his forehead. He had previously felt that Senas was mad. I didn't expect this Jero to be more than he loved. It seems that the core of the young generation of these celestial generations are all virtues. what.

He flipped through the mechanical cores of nine people, including Emperor Shaofeng and Sha Baofeng, and found out that this was indeed the case. Sha Baofeng is also a man who is not so worried.

Ye Xuan had thought about the best victory in this battle, and it was low-key. Now it seems that it is unlikely that Sha Baofeng's temper is arrogant. If it seems too low-key, it is doubtful.

Just as his heart was stunned, the 100,000-mile-long square in front of the sky had already heard a large number of mechanical sounds of the card, accompanied by thunderous thunder.

After Jero stepped into the lavender dream fortress, the mechanical fusion began immediately. The 100,000-meter-diameter lavender fortress began to change in an instant, and the shape changed, and it began to condense inward.

Once the mechanical integration ability of the Tianji nationality is fully developed, the mechanical warfare that has been changed is the largest diameter of the fortress itself, and the smallest is the expansion of the ethnic group, in this ultimate secret technique. The level of comprehension.

For example, Emperor Shaofeng, his car is a large fortress with a diameter of 100,000 meters. Then, after the mechanical integration is completed, the mechanical warfare that Emperor Shaofeng and his car driver will change together can have a body length of 100,000 meters. It is a hard limit related to the original performance of its car.

The smallest, it can reach five kilometers, this is a very remarkable comprehension ability, Ye Xuan in the eight evil people killed in the star of the evil source, there is also a guy's car is also 100,000 meters in diameter Big Fortress, his minimum limit is seven kilometers!

This person's electronic talent is only second only to Emperor Shaofeng and Yero, and ranked third in the senior generation of the Tianji ethnic group.

However, in general, unless it is in a special environment filled with countless voids and cracks, the Tianji ethnic group and its car are mechanically integrated, fighting in a maximal form.

At this moment, Jero has gone against the other way, obviously can be changed into a giant war worm of 100,000 meters. At this moment, after the mechanical fusion ability, this lavender dream fortress is constantly shrinking.

What makes Ye Xuan even more surprised is that when he saw this scene, Senas's face was even more dignified, and frowned: "Is it a fast worm?"

Then he did not hesitate, and the same step entered the battle after the last battle, and temporarily disarmed. At this moment, he was hanging on the car's fortress in the empty side of his body. The mechanical friction of Kathy came and came quickly. The mechanical knives that won the two games were once again revealed.

At this time, Yalena's dreamy fortress of lavender has basically completed the change of form. The original mechanical sound of the card is weak, and in the end, it can no longer be heard.

Shown in front of the eyes is a very weird mechanical warfare, the body is only five kilometers, which immediately attracted a burst of exclamation in the surrounding air.

"God, five kilometers? Yero's understanding of the mechanical fusion ability has actually broken through."

"The 100,000-meter-high fortress, his previous limit is six kilometers. Within the entire Tianji family, only the youngest generation of the younger generation of the younger generation can reach five kilometers. I did not expect that Jero would do it now."

"There is no doubt that this battle will be defeated by Senas. When it comes to electronic talent, he is still far from Jero."

"Yes, what Jero has changed is the fast-moving worm. He is the speed field he is best at. Unlike other war-torn species, the smaller the speed, the faster the speed. The first six kilometers, Senas. I have been fighting with Jero once and I have a slight downwind."

"Nero now breaks through again, and the worm has shrunk to a level of five kilometers, and Senas will lose!"

.....

As these exclamations sounded, Ye Xuan's face could not help but also flashed a touch of color.

He was not surprised that after Jero launched his mechanical fusion ability, he could condense a 100,000-meter-diameter big fortress to five kilometers. This is nothing, and Emperor Shaofeng can do it. It is not the same. Ye Xuan's hands?

What really surprised Ye Xuan was that this type of mechanical warfare changed by Jero and his car's fortress was a swift worm that comprehensively enhanced speed!

Swift worm: A kind of starry worm, like the starry knives, belongs to the violent fighting zerg.

The biggest feature of the worms is their speed. They are covered with sharp chimera blades, densely layered and layered.

Under the extreme speed of the worm, these chitinous blades that are covered with the surface of the body are simply invincible. Even if it is a starship warship, the charge against the worm can only escape. If it is shrouded, the final result is the whole. The huge hull is devastated, and there are countless segments directly!

At the moment, in front of the virtual air across the imaginary plane across the machine, it is such a mechanical worm, the whole body of purple super alloy blade, and clearly is strengthened, 100,000 meters diameter hull, reduced to five kilometers, all the alloys have increased in density many times. If these blades are touched, even the star fortress that is also made of super alloys will be easily broken like a thin piece of paper.

Coupled with the speed of the worms, these purple and faint countless alloy blades are a nightmare. You must know that at a certain speed, even a real thin paper can be a golden crack!

Seeing all of this, Ye Xuan's heart couldn't help but sigh. It's really sharp. It's no wonder that even the arrogant Seines have become dignified. This looks like a dozen times smaller alloy than a knife. The fast worm is really not a common problem!

"Hey!"

The low-pitched tremble sounded, and the five-kilometer-long worm spurred out like a string of arrows. The blink of an eye had already reached the front of the knife, and it did not stop there. There was no other means of attack. I ran into the knife at the end.

"Yero, you attacked..."

When the other party disagreed, they shot, and the blink of an eye came to the front. Senas screamed, and the strong and powerful legs of the knife were slightly bent. This is the rhythm that wants to bounce.

With the superb bounce ability of the knife, this bounce is at least hundreds of miles away.

It's a pity that he didn't have this opportunity, because the swift worm hit it and it touched its body. Only the five-kilometer-long worms swept through the abdomen, without any other means of attack. That's not needed, the myriad of super-strong alloy blades covering the entire body is the best and most powerful weapon for the worm!

"Oh la la..."

"Booming!"

The electric sparks flicker, and the flames of the knives blow out the fire, and they are cut by the sharp edges of the worm's back ridge...

Chapter 3534: Guarantee not to kill you

The layer of sharp blade that is densely packed with swift worms is too powerful. The 100,000-meter-diameter big fortress is compressed to a length of five kilometers, and the density of materials climbs many times, plus its horror. Speed is simply unbreakable.

Just a round of the match, the mechanical knives of Senus were opened, and dozens of kilometers of gaps appeared in the belly of the mechanical warfare, sparks flashed, and even the thunder of thunder Out.

Such an injury may not be a big one for a mechanical knife with a length of 100,000 meters. But this is the first round after all, and one encounter is so fruitful. It is hard to imagine how the war will continue. .

There is no need for other attack methods at all, and it is a supreme weapon. The high-density super-strong alloy covered with the body is completely transformed into an enemy nightmare under extreme speed!

Around, the exclamation sounded at the first time...

"God, it's amazing, Senas was injured in the first round, and Jero was stronger!"

"The speed of horror, and after the worms condense to a body length of five kilometers, the density of super alloys is even greater, and it is almost sharp and sharp, and the mechanical knives simply can't resist!"

"There is no suspense in this battle, and Jero must win!"

"Hey, after Emperor Shaofeng, the entire generation of the young generation of the Tianji nationality, it is only Jero is the most powerful, Senas is not an opponent, is the next young patriarch is him?"

.....

"Oh la la!"

"boom!"

"what....."

With the discussion in the emptiness of the surrounding air, the radius of the 100,000-mile-long battle in the central battlefield, the thunder and thunderous electric sparks sounded again, followed by the madness of Senas's anger howl.

He was once again injured, and he was originally satisfied with it. He decided that this time he will be the first to win the title. In the future, he is expected to compete for the throne of the patriarch of the celestial family. He did not expect that only two battles will win, and he will encounter Waterloo and will drink.

However, Senas did not intend to admit defeat. He is still insisting. In the face of this scene, there is a high-ranking senior of the Tianji family standing up in the void. This is the 15th largest manpower. The mighty power of the powerful, announced on the spot that the war ended.

The result of the battle is naturally no suspense, Yero wins, and Senas is defeated.

After all, it's just the internal ratio of the family. It's not the battle between the enemy and the enemy. There is no need to really fall down. There are not many people in the Tianji nationality. The generation is a true genius in the family, and any loss will be very heavy.

Before the emperor Shao Shaofeng and other eight generations of the young generation of the core of the high-level disappearance, life and death do not know, already in the heart of the older generation of core high-level people have cast a heavy shadow, they can not allow in such a big ratio The real death and injury appear!

Senus was unwilling, but after all, he retired. In just two rounds of contact, he suffered a slight injury. The abdomen and back of the mechanical knife had cracks and gaps.

The high-ranking seniors of the celestial family have stopped the follow-up battles. Otherwise, at the end of the day, his car fortress is very likely to be ruined, and its electronic consciousness will be hit hard and it will take a short time. restore!

With the departure of Senus, the front of this piece of 100,000 miles round of the battlefield, only the left of a demon purple hair Yello still stood there.

He has been mechanically disintegrated with his car, the lavender dream fortress is suspended on his side, and Yero is standing with his hands on his back.

Around the void, there was another sigh of sigh.

"Oh, the dust has settled, the commander of the Pioneer Fleet of this battle, not Jeremiah!"

"This was originally an indisputable fact. It was only before that Iro did not return to the family. Perhaps even the patriarchs did not know. Otherwise, this mechanical ratio would not be necessary."

"Yes, among all the geniuses of the younger generation in the family, besides the Shaozu Emperor Shaofeng, who else can defeat Yero?"

"The worm is too terrible, and Yello's perception of mechanical fusion has reached this level. The 100,000-meter-diameter fortress has been condensed by him to only about 5,000 meters. The power of the insects has skyrocketed again and is invincible."

"What is it? Is it already invincible? In the current family, in addition to the older generation, in the younger generation, who else is Yello's opponent? Even Senas has only two faces to be defeated." "

"Oh, this time the mechanical ratio should be able to come to an end. Senas will be the deputy commander of the Pioneer Fleet. This is a shame for him. Two people are working together, I am afraid there will be many accidents. Episode..."

.....

In the surrounding air, some spectators have already begun to evacuate. The black fortress, which carries a large number of slaves and hostages transported from the imperial prison, has also started its kinetic energy and slowly headed for the direction of the mainland. go with.

Obviously, all people think that this mechanical ratio is over, and Jero is so strong that there is no young high-level executive who will take the lead and jump out and look for abuse!

Even Jero himself thought so. He carried his hands and looked around at the void. After watching it, he didn't even say a few polite words. He waved the lavender dream fortress on his side. I earned my income in the body, and then I wanted to leave.

At the same time, the demon emperor of Ye Xuan's side led Chanas, but he looked at Ye Xuan with a suspicious look.

With his understanding of Ye Xuan since this time, at the moment, his heart is absolutely embarrassing and suspicious, what? Sha Daren is this swollen today? Actually, I didn't plan to insert a bar?

In fact, almost in the next moment of Chanus's suspicion, Ye Xuan's hearty voice with a sigh of sorrow has been heard out loudly: "Yero, eager to escape? Rest assured, This is a big ratio within the family, and it is not a war between the enemy and me. I promise not to beat you!"

Quiet!

Dead silence!

The large and small fortresses and fortresses that were being separated from the surrounding air were all stopped, including Jero, who was about to leave.

In the next moment, everyone's eyes converge toward Ye Xuan. After seeing this discourse, Sha Baofeng's words, the look of the faces of the elites of the heavenly family was suddenly weird. The old generation of Seins's seniors frowned.

In his view, Sha Baofeng actually wants to challenge Yero, but also deliberately said such words, this is simply looking for death.

If Yero is ranked second in the genius of the young generation of the Tianji nationality, Sha Baofeng is basically ranked 20, and the two are not at all equal.

Chapter 3535: Thunder

The discourse was degraded, and Ye Xuan's figure was taken one step at a time. He entered the front of the 100,000-mile-long battle against the void.

Originally, the face of the demon emperor, who was standing side by side on the side of the void, was immediately green, and his heart was even more miserable. He knew that this guy was not a stop-and-go, this is not, just still How did he turn to sex, and this suddenly began to toss again.

In the bitter smile, Chanas suddenly flashed an aura in his brain, and then his eyes lit up in an instant.

He suddenly understood why Ye Xuan had to put the Shaozu Emperor Shaofeng in the dead land in the star of the evil. He had wanted to replace it for a long time.

Don't look at the eyes of Yello seem to be strong, but Chanas has seen Ye Xuan how to abuse the Emperor Shaofeng and others. The top of the eight heavenly genres are all geniuses of the younger generation, and they are not able to join forces. His opponent, now only Jero, who is still behind the Emperor Shaofeng, can count what?

As soon as I heard this, Chanas's breathing immediately rushed.

The reason why he followed Sha Baofeng to the base camp of the Tianji nationality was originally aimed at the promotion of the rich and the rich, and if the Sha Daren could become the patriarch of the Tianji nationality, then for him, it would be tantamount to step into the sky!

You must know that this road is hard, but he has been swaying with Sha Daren. Didn't Sha Daren say it himself? Oh, but a rope on the rope!

Thinking like this, Chanas was so excited when he shouted his arms. It was just like a shot of blood: "Sha Daren, come on, just don't beat him!"

This shouting sounded, almost did not let the eyeballs fall in the air around the sky, those who are still in the middle of the gods because of Ye Xuan's previous words, have finally returned to the soul, all kinds of arguments The sound is always in the air, and the vast majority are mocking.

On the one hand, there are indeed a lot of supporters of Yero. On the other hand, more people have decided that he will be the next patriarch of the celestial family. At this moment, deliberately speaking out loud is a good indication.

"Oh my God, it's actually Sha Baofeng? What kind of stimulation is this guy? Is it so dead?"

"There is a good show here, and Jero will surely take him down. It's just that I'm not too addicted. I didn't expect unexpected surprises."

"It's ridiculous. The younger generation is far from the guys who are more than 20, and they have to challenge the second-ranked Jero. This kind of self-confidence is simply unimaginable."

"It is estimated that the fox has been ruined by the head of the fox. This guy has only recently suffered a big loss in the Tianxue field of the Terran technology camp. I didn't expect to be long-term, just come back and find death!"

"It should be like this. The fox lord has broken his brain. Otherwise, depending on where he came from, he will be challenged. It will be considered if he challenges Jero. He even dares to scream for the shackles of others. It is simply brain damage. No limits!"

"Poor, after this battle, Yello in the younger generation's ranking, I am afraid to fall to a hundred people, this is because he had been appreciated by the patriarch before he was opened up for the ability to mechanical fusion, otherwise, At least a thousand people are outside..."

.....

With these one-sided arguments and evaluations, the words of Yeo Xuan, who stopped the pace of departure because of the screaming words of Ye Xuan, also took another step and returned to the center of the battlefield.

Sneer and looked at Ye Xuan: "Sha Baofeng, you just challenged me? Give you another chance, you can change your mouth!"

"Change your mother to not?"

According to the character of Sha Baofeng, if it has the absolute strength to defeat Yero, it will definitely not be low-key. Therefore, even if Ye Xuan does not want to show the limelight, at this moment, it can only come according to the temperament of Sha Baofeng, otherwise it will lead to suspicion.

In the face of Yero's proud words, he looked unceremonious. He turned his eyes and said: "It is you, if you change your mouth now, the promise of this uncle must be practiced, and you will not be able to fight your shackles." come out!"

"Ha ha ha..."

"Interesting fun! I don't think you were really beaten by the foxes."

In the face of Ye Xuan's tough attitude as always, Jero's anger was extremely angry. The last wave of the hand, the faint purple fortress that had just been replenished in the body was sacrificed again. Before stepping into it, he looked back at Ye Xuan and raised his right hand. The index finger crossed the throat and made a throat-cutting action: "I will not give you any promise. You must be careful about this battle. Recently, my mood is not very good. I don't guarantee the size of the shot. If it is hung up, Don't blame me!"

"In this case, if you were in the past, you are indeed qualified to speak in front of me."

Ye Xuan sneered, once again responded toughness, and also gave a shot of vaccinations to the many celestial people in the vain air in advance, so as not to show a too strong mechanical fusion ability, which led to unnecessary suspicion: "However, since I won the battle with the Master of the Fox, you have lost this qualification."

"Yes, that war, this uncle is really miserable by the fox, but the conviction of the loser, the horror of the fascinating world, you have no privilege to fight with it, what else? Is your face proud?"

Taking advantage of this opportunity, Ye Xuan cheeked and praised himself: "Although this grandfather lost, but in that battle, the harvest of this uncle is how you can't imagine how big the brain is. It's amazing. Now, until now, I want to come, this uncle is fascinated..."

"If there is an opportunity, this uncle really wants to be abused by the fox lord again, because the harvest is too big, so big to the lord just to be abused by him, the understanding of mechanical integration ability is enough to exceed You have been acquainted with each other for hundreds of years. In this battle, the uncle will let you see the power. From my progress, let you go to the enchanting posture of the fox lord..."

"Oh, unfortunately, even if you are fascinated again, crying and crying and dying to find a living and wanting people to abuse you, after all, there is no such opportunity. The younger fox is a talented person, already..."

As he spoke, Ye Xuan gradually found his feelings. His body stood in the void, shaking his head and shaking his head, and his face looked regretless. It seemed that he felt that he could not have another chance to be abused by the fox, so he deplored it. Like.

This scene is too strange, the whole scene has been thundered, all the celestial people in the emptiness around the sky are stunned, that is, Chanas is stunned, he suddenly is a bit uncertain, the sand in front of the eyes, looks It's not like the kind of calculations, the old-fashioned look, it's more like the brain is really broken.

With this in mind, the whole person of Chanas is not good...

"Is the sorrow and promotion of the fox lord? Is it really amazing?"

Instead, I was trying to step into Jero, the driver of the car. After listening to this discourse, the color of anger on his face disappeared, showing dignity, and deeply watching Ye Xuan turn, and then stepped into the pale purple Fortress: "Then I will wait and see..."

Chapter 3536: What is this ghost?

"Booming!"

"Card..."

As Jero stepped into the faint purple fortress, the sound of the bang and the mechanical friction of the cymbal came instantly. He once again launched a comprehensive mechanical fusion capability, and the 100,000-meter-diameter lavender fortress quickly changed shape. Finally turned into a five-kilometer long worm!

Ye Xuan also waved his hand and sacrificed the Baofeng in his body, suspended in the void.

Of course, this is not the real Baofeng, but the change of the life fortress Xingye. After all, it is a life battleship, composed of countless world insects and self-derivative micromolecules, a 100,000-meter-diameter starry fortress. It can also achieve micro-level imitation, including electronic wave frequency,

absolutely no defects and omissions, even the patriarch of the Tianzu tribe is here, absolutely can not see.

Then, Ye Xuan turned and stepped into Baofeng, and issued instructions to let Baofeng develop mechanical changes.

The same bangs and the mechanical friction of the cymbals sounded. In the eyes of many celestial people in the emptiness around the outside world, this is the ability of Sha Baofeng to expand the mechanical integration, and the mechanical driving changes with the Baofeng.

But in fact, all of this is the behavior of the Hoshino Life Fortress. Ye Xuan did not participate at all. He just stayed in the independent small cabin inside Baofeng.

Of course, once this change is completed and enters the battle state, Ye Xuan will still be controlled by Sha Baofeng's electronic consciousness. The life fortress is flexible. After all, there is no combat experience. These can only be grasped by Ye Xuan himself.

After all, what is facing now is not the existence of the original Sha Baofeng level, but the second generation of the talent of the young generation of the Tianji nationality. It is not necessarily safe to hand over everything to the life fortress.

Previously, when he started a war with Emperor Shaofeng and others in the star of the evil, Ye Xuan took the electronic consciousness of Sha Baofeng into the life fortress, and used his combat experience to control the mechanical moths to fight. Otherwise, only the life fortress If you go to fight yourself, there is absolutely no such victory.

With the sound of mechanical smashing inside the Baofeng, the shape of its huge hull began to change. All the celestial people in the emptiness around the sky gathered together, including absolutely more than one. The unknown avatar of the patriarch.

They are very curious, what the Baofeng will look like.

In the past habit of Sha Baofeng, it should be a mechanical knife with a length of 100,000 meters. However, considering the speed and attack characteristics of the worm, Sha Baofeng should also reduce the size of the mechanical knives. Because the goal is small, the pressure will be much lighter.

In the past, Sha Baofeng launched a comprehensive mechanical integration, and its body shape of Baofeng was able to condense to a minimum of 10,000.

The four strong neighbors do not think this is the same.

At the beginning, the surrounding elites did think that Sha Baofeng was broken, and he dared to provoke and even anger Yero, but with the words he later said, the powerful people of the heavens have a different perspective.

For Sha Baofeng's recent battle in the Third Universe, the Tianji clan has indeed received news. Many high-level officials have been shocked. The black technology owned by the fox lord is now a fan. It has surpassed the heavenly family that has always had super talents in electronics and machinery manufacturing, leading the three major planes.

In that battle, Sha Baofeng was indeed defeated enough, but in his own words, he was not at all embarrassed by this fiasco, and the fox enchanting posture of the fox lord was even amazed by many high-level elites.

The medicinal array is three, and the horrible starry black technology, such a enchanting posture, the world is indeed only the Xuan prince, the invincible ***** of war, and not long ago in the second universe, and now provoked a The star lord is full of roaring and snarling in the world, but he can't find where he is, and he can match it.

It is absolutely false to be able to fight against such a fascinating world. If there is no inspiration and gain.

Therefore, when Shicai Xuan ridiculed Jero with such a discourse, the latter would not only be angry, but became serious. Although he did not accept the fox, he was actually fascinated by the enchanting of the other party.

It can be said that no matter whether it is the high-level audience of the audience in the surrounding air, or the Jero who is about to start a battle with Ye Xuan, at this moment, in the bottom of my heart, there is actually an inexplicable expectation.

They are all looking forward to Sha Baofeng really gaining something in that battle, not bragging.

The reason why Jero is so because of his fascination with the Lord of the Fox, he can't fight with the sorcerer, because the other party has already been exiled, but if he can be defeated in the hands of the sorcerer, Indeed, Sha Baofeng, who has inspiration and harvest, once again smashed into the fart, at least on the surface, his style, from a certain point of view, when it belongs to the level that can compete with the fox It is.

At least not being compared.

For the many high-level people around the world, their expectations are related to the entire ethnic group.

The power of Yello is unquestionable. If Sha Baofeng can really defeat him, even if it is only equal to the autumn, it is enough to prove that there is a peerless genius in the heavenly family.

Although this genius was tempted by the enemies of the enemy races, it doesn't matter, it can constantly improve itself in the battle with the enemy. This is the attitude and talent that the real strong man should have. If Sha Baofeng did it. The high-ranking people in the family have since looked at him a bit, but what is the point?

For all of this, Ye Xuan did not know. With his instructions, the mechanical smoothing of the interior of Baofeng was resounding. Soon, its mechanical changes were completed.

Ye Xuan did not choose the fighting form of mechanical moths. The speed of the worms was too fast. Although the mechanical moths had strong bouncing force and four anti-matter dead guns, they were very likely to be unable to lock the target.

Therefore, Ye Xuan's chosen battle state is the humanoid alloy **** of war. Of course, while the Baofeng is changing the adult-shaped alloy **** of war, its original 100,000-meter horror body is

constantly condensing. Finally, when the human form of the alloy **** of war is fully presented, its height has reached only five kilometers.

This is not the limit of Ye Xuan. The small fortress of 50,000 meters, the limit that he can narrow down is one kilometer, and the big fortress of 100,000 meters is 2,500 meters.

But that is not necessary. On the one hand, it is not suitable for this battle. On the other hand, Ye Xuan does not want to expose his limits.

Even so, the surrounding air still sounded like a rush of excitement in an instant, and all the celestial people and high-level spectators who watched the battle were all stunned by the scene they saw, which far exceeded them. Imagine...

"God, what the **** is this..."

Chapter 3537: Kill a black horse

After a mechanically smashed sound of the card, Baofeng completed the mechanical change. A humanoid alloy of the **** of war stood in the void, and the 100,000-meter-diameter fortress was narrowed to a height of only five kilometers.

On the left hand, there is a huge alloy shield, and the right hand has an alloy spear that exceeds 10,000 meters. There is a pair of energy light behind it. From time to time, it will be banged and smashed, making the voids look like awe-inspiring, extraordinary and extraordinary...

This scene stunned all the spectators, and there was a wave of exclamations in the air.

"God, what the **** is this..."

"Human-shaped? Actually human-shaped? What does Sha Baofeng mean? Does the mechanical fusion capability not only change into the form of various mechanical warfare? The mechanical changes of human form are unheard of!"

"It is a bit strange. The reason why my family's mechanical fusion ability changes are all kinds of cosmic warfare forms. That's because the characteristics of these Zerg are suitable for combat, but the understanding of each person is different. The shape of the war insects may not necessarily be correct. Sha Baofeng broke this thought, and the emergence of human-shaped mechanical changes undoubtedly opened up a larger window for the mechanical fusion ability and opened up the ideas of my ethnic group..."

"Yes, that's it, mechanical changes, since it can be a variety of cosmic warfare, why can't it be human form, or the form of other beasts? This is a new research direction!"

"Only this point is enough to prove that he did have some insights and gains in that war. It was worthwhile to be abused. The concept has been completely subverted. It used to be a mechanical knife. Now it is a humanoid battle. I really look forward to the performance of this humanoid alloy God of War."

"You have neglected a fact. No one has found that the height of this shape-shaped alloy warfare is only five kilometers? Like the worm, this shows that Shabaofeng's mechanical fusion ability has indeed been greatly improved, and the younger generation of my family. In the middle, it is possible to integrate the 100,000-meter-large fortress into only five kilometers. Only the young patriarch, Emperor Shaofeng, had just one more person. Just now, there was another Jero. I didn't expect the blink of an eye, and the third person appeared again!"

"Yes, it is only because of this that Sha Baofeng is enough to fight Yero. This is really a suspense. No one has been optimistic about him before. Yello appeared. The word is the winner. I didn't expect the last moment. , actually killed a black horse!"

.....

As these exclamations sounded, the sound of Jero's condensate sound came out in the front of the sky in the sky, and the voice of Jero's condensate came out: "Sha Baofeng, I have to say, I was really small before. I am watching you, as I have just broken through not long ago, I have condensed the 100,000-meter-high fortress into a five-kilometer body, and I deeply understand the difficulty of comprehending the mechanical integration ability to this level..."

"I didn't expect you to be able to do it, and it was still after the madness of others in the war. The fox of the Terran is really amazing, but it has been exiled, otherwise I am looking forward to him. war."

"However, although I can't fight with the sorcerer, but if you smash a slap in the face today, how much can solve the loneliness of the moment, so that the fox lord can blow you up, I am the same can....."

The voices were degraded, and the dense and low-pitched humming sounds suddenly appeared in the emptiness. The worms in the emptiness of the sky were suddenly smashed out, and even the void was torn by the high-density super alloy covered with its surface. The blink of an eye has reached the front of Ye Xuan.

"Who is bragging than anyone else? Just because of you, you can't compare it with the younger brother of the fox, because the uncle is abused by him, and you, only the one who was abused by the lord..."

"call out!"

Ye Xuan sneered, released his words, followed by a sharp, piercing sound, and the alloy God of War, standing in the void, shook his right hand, and the super-strong alloy spear that was over 10,000 meters was thrown by him instantly. No one can see the trajectory of its whereabouts, the speed is actually faster than the worm, the first come first, the blink of an eye has turned into a virtual shadow of the worm, and it is stopped in the void of the alloy gods thousands of miles away in.

If the worm is not stopping, the speed is fast enough to the super-strong alloy spear, and the next moment will pierce the body and smash it into the void.

"Hey..."

The low UHF tremble sounded again, turning into a starry sky, and the rapid worms stopped, without any pause, and instantly withdrew hundreds of miles, avoiding the super alloy spear that was nailed to the nail. .

"Booming..."

The sound of the thunderous sound of the thunder came out. The super-strong alloy warp spears on a large fortress in the sky below, and immediately blasts. A 10,000-meter-diameter fortress is turned into a fireball. Fortunately, there is no Tianzuo tribe. All of them are intelligent robots watching the battle.

However, the spears of this spear are still earth-shattering, because the central side of the battle against the void has a radius of 100,000 miles. All the fortresses and fortresses of all the battles are 100,000 miles away. No one expected the explosive power of the humanoid alloy **** of war. So terrible, the power and speed of the super-strong alloy spear is so horrible that a big fortress of 100,000 miles away can't afford to dodge. In an instant, with nearly one million intelligent robots inside, it is transformed into a huge fireball. , a bright corner of the sky!

The screams sounded in an instant, and this was the first generation of senior executives who were responsible for supervising the war.

"Back, get back now!"

"The large-scale site is temporarily expanded, and the previous 100,000 miles has been expanded to 500,000 miles. All the warships are backed up, and there must be no mistakes!"

"Booming..."

In the void, the roar of countless kinetic energy cabins was overwhelming, and all the warships and fortresses and fortresses that watched the battles all rushed backwards. The power of a spear was just amazing. No one wants to be the second unlucky. ghost!

Inside the fortress, which was driven from the imperial prison and carried a large number of first universe slaves and ancestral hostages, there was a large exclamation.

As the royal hostages of the servants of all ethnic groups, the strongmen carried in this great fortress are all true elites of all ethnic groups. Their status and strength are extraordinary, their horizons are naturally low, and their wisdom is even more amazing.

For the Tianji people to bring them to the battlefield in this big ratio, all the people know well, but they are also shocked by the so-called ultimate mystery mechanical fusion of the Tianji people. However, it is not too shocking. The three battles I saw before have indeed been amazing, but they are not as shocking as this scene.

A starry fortress can be turned into a super-alloy **** of war, and this **** of war is just a spear thrown, it destroys a big fortress, the latter suspended in the void in the 100,000 miles, even the dodge. There are no opportunities, no matter the speed or the penetrating power of terror, they are incredible, and the power even surpasses the strongest power of some ethnic groups.

For the first time, these royal family hostages, for the so-called mechanical fusion, were completely taboo, and the name of Sha Baofeng was recorded in the bottom of the heart...

Chapter 3538: God of War

"Stop and don't run, this uncle has just said it, and promises not to beat you, never to talk!"

Seeing the fast-moving worm's body shape is steep and stagnation, quickly retreating in the void, Ye Xuan sneer, the voice of the mad voice from the body of the alloy God of War, resounding into a void, it is eye-catching.

"What is the power of a spear? How could it be so strong? It directly destroyed a 10,000-meter fortress. This is absolutely impossible..."

At this moment, Jero has already been shocked to add up. He just saw the real cut. Sha Baofeng raised his hand and only thrown an alloy spear, even because the alloy **** of war was made up of a large diameter of 100,000 meters. The fortress was formed by the ultimate condensation, so the battleship alloy that built the fortress was molecularly reorganized, and the density increased by countless times, just like the purple blade that was covered with his body.

But the density is even bigger. After all, it is just an alloy spear. Even if it can penetrate a 10,000-meter fortress, it will never be destroyed. Even if it is hit by the kinetic energy of the big fortress, it is impossible. This degree of sight appears.

The warships above the Great Fortress have a kinetic energy protection system inside. Even if the kinetic energy tank is blown up, it will only affect a part of the whole area in a short time. Unless it is uncontrollable, it will be fully exploded. There will be a time difference.

But at the moment, a huge bastion of 10,000 meters has completely turned into a fireball in an instant. This feeling is like a metal shark that is just hitting him at the end, but a super concentrated to the extreme. Strong energy cannonballs are common.

In fact, this is true. The survival of the Hoshino is a whole body evolved from the world's worms. This magical existence between the living body and the non-living body can be used to derive everything, including the life fortress. The antimatter dead light cannons that are fired are all derived from their micromolecules.

Although Ye Xuan thrown out on the surface, it is an alloy war spear. But this spear is made up of countless world insects and self-derivative micro-molecules. The moment of hitting the big fortress, all the micro-molecules The morphological change is directly carried out by super-alloying for a super concentrated energy, which is self-explosive.

In this case, it is really strange that a big fortress is not destroyed in an instant!

Jero is not a general existence. Although I don't know how Ye Xuan did it, I can see the difference. Before he figured out Ye Xuan's means, he dared not to rush again. Retreat, and at the same time tempted by words, is to know ourselves and solve doubts in happiness, and then make plans.

It is a pity that Ye Xuan is not fooled. When the words of the mouth are mad, the alloy **** of war is step by step, and a step is a hundred miles away. The empty right hand slams again to show an alloy. War spear.

Has been lifted high, far away to the fast worm!

At this time, the fortresses and fortresses of the large and small warships that watched the virtual air in the surrounding area had already retreated to 500,000 miles away. The central area was much wider than the void, and the speed advantage of the speedy insects had more room for development.

When Jero saw that the other party was not fooled, he did not disclose any points. He could only bite his teeth, and the whistling sound of the emptiness of the emptiness sounded, and his body shape instantly turned into a starry sky, circling a turn, toward the left arm of the alloy **** of war. Shoot and go.

The right arm of the alloy God of War is holding the alloyed spear of the mighty horror. Once it is thrown out, even the horror speed of the worm can be safely avoided.

Jero did not dare to take risks again. At this moment, he attacked from the left side of the alloy **** of war. As a result, the alloy spear of his right hand was blocked on the other side. It can be said that it was a shield by the body of the alloy **** of war.

Of course, the alloy **** of war can turn and throw again, but the time required for the worm is very short. At its speed, an assault can reach its immediate vicinity. At that time, under the scratch, the swift worm is covered with a super-strong alloy blade. It is easy to break the left arm of the alloy God of War and fall to the void.

"Hey..."

With a whirlwind of whimsical whispers, the blast of insects has reached the left side of the shape of the alloy **** of war. The speed of the spear thrown by the alloy **** of war can be comparable to or even slightly surpassed by the worm, but it does not mean The speed of the alloy body itself can be the same.

Seeing this scene, the sighs of some of the celestial people in the sky.

They seem to have seen the end of the alloy God of War is dismembered. The speed of the worm is too fast. After avoiding the horror spear of the right hand of the alloy **** of war, just hover around its body for a few laps, the humanoid alloy **** of war, Will be turned into a piece of huge alloy scrap, falling into the void!

Jero also thought this way. At this moment, he even gradually let go of the heart that had already hung up to the eyes of the blind man.

It was also at this time that the left shoulder and the left rib of the alloy Ares suddenly burst into flames, and a local energy shield was propped up to protect the small half of the left body of the alloy **** of war, which seemed to want to block the purple alloy blade covered by the swift worm. Cutting.

Jero smiled, and the words of ridicule came from the worm: "There is no use, just the energy shield, it can't stop it."

"Hey!"

"Oh..."

In the next moment, a slight noise like a crack came out, and the super-strong alloy blade on the side of the spine of the swift worm directly cut the energy shield and pressed it toward the left shoulder of the alloy **** of war.

If there is no accident, the next moment, the left arm of the alloy God of War will fall into the void, and the blink of an eye will be cut!

"Yes, it really is useless. This sentence is exactly what the uncle wants to tell you!"

Inside the alloy **** of war, Ye Xuan's sneer sounded: "Forgot? The uncle's left hand still has a shield. The contradiction is one. The spear can make you jealous. This shield can be simple?"

When the voice fell, the left arm of the alloy God of War had been lifted, and the huge alloy shield shielded the left body, replacing the energy shield that had been broken by the alloy blade.

It is also at this moment that the purple knives on the left side of the spine of the worm's back are pushed all the way...

"Hey!"

Seeing that the two are touching the same moment, the last second is still a super-strong alloy material shield, actually transforming the form in an instant, turning into an anti-material dead light shield with a black body!

"Do not....."

"Oh la la!"

As Yerro's horrified screams sounded, a faint but dense squeaky noise was heard, just like the oil splashing into the ice, the dense purple blade on the left side of the spine. The ablation began at a rate visible to the naked eye.

As long as the part of the black anti-matter dead light shield touches, it disappears completely without any suspense.

This is the characteristic of antimatter light energy. All positive matter and energy, in contact with it, will have the effect of canceling each other out. The density of the purple blade is even stronger, and it is impossible to break this law!

This scene stunned all the people, and the worms couldn't easily find the opportunity to get close to the body. It was necessary to cut the alloy **** of war, and the final result was so unbearable. The alloy **** of war was supreme, at this moment, let all Everyone is stunned...

Chapter 3539: Stealing the rules

"Oh la la..."

"what....."

Just like the singularity of the oil splashing into the ice, the small half of the body on the left side of the worm's back is all melted in an instant. At this moment, Jero and his warship fully develop the mechanical fusion ability, empathy, the kind of uncontrollable. The pain, let him make a terrible shout, shocked a void.

All of this is long-lived, but it happens between suffocation. The high-level people of the celestial movements who watched the battles in the imaginary air of 500,000 miles away from the sky only felt that the battle had completely reversed.

At this time, the war spear of the right hand of the alloy God of War has also been lifted up again, and the sharp sharp spear of the cold and cold man is aimed at the fast-moving worm that is still in the future.

The next moment will be thrown, killing Jero on the spot!

It is also at this moment that several core tops of the older generation of the Tianji family plunged into the central domain at the same time, and screamed loudly, and announced that the war ended, the end of the game, the winner... Sha Baofeng!

Everything, the dust is settled!

"Don't be embarrassed, this uncle said, I will never fight you, today, I will leave you a life!"

Ye Xuan's words came out, and the alloy warrior put away the war shield and the spear, and then ordered the Baofeng to lift the mechanical changes.

With the sound of the intensive mechanical movement of the card, the humanoid warfare quickly restored the original fortress form of Baofeng, and Ye Xuan stepped forward, and then waved it to the first time.

While doing all this, Ye Xuan's whole heart was hung up in the eyes of the blind man. He really worried that before the Baofeng was taken away, a certain avatar of the Tianji tribe's emperor Yi appeared immediately.

If this is the case, the other party must find out various excuses to leave Ye Xuan's Baofeng to study. This is a dead knot. Ye Xuan can never hand over the life fortress. There will be big troubles.

Fortunately, his movements are fast enough, and he waved his life to the body before the other party appeared. At this time, even if the identity of the celestial patriarch, Emperor Yi, reappeared and made the same request, Ye Xuan was completely fearless.

Inside the immortal world, there are two identical Baofeng numbers standing side by side, one is the change of the life fortress that has just been collected, and the other is the real Baofeng.

At that time, it will be a big deal to hand over the real Baofeng. Ye Xuan does not feel bad at all. Now the life fortress has grown to this height. For Ye Xuan, even the 100,000-meter-diameter fortress is basically Can't impress him, and life fortress is a ratio, any big fortress is chicken ribs!

"This war, I lost my heart and take it!"

Soon, Jero also lifted the state of mechanical change, and the worm returned to the faint purple fortress again, and the surface was pitted and looked quite wolf.

The super-strong alloy blade that was previously eroded by the black antimatter dead Shield of the left hand of the alloy God of War is the hardest part of the outer wall of the frivolous fortress, which is formed by molecular rearrangement and ultimate condensation.

That is the actual erosion, which directly led to the faint shape of the faint purple fortress.

However, here is the base camp of the Tianji people. There are countless industrial stars in the peripheral industrial circle, which can be easily repaired. In addition, this battle Yero is also deeply touched. Therefore, at this moment, he waved his lavender fortress into the body. Turning to the head of Ye Xuan, the face was surprisingly calm, without the slightest resentment.

It was just a little complicated. When it was said that half suddenly stopped, I stared at Ye Xuan for a while, and suddenly sighed: "The younger fox is really a worldly singer. I didn't expect you to just be abused by him. The sentiment of the aspect has such a big change. The anti-material dead light shield is absolutely perfect. Any attack can be ignored. It is almost melee."

"In terms of long-range attacks, there is also an alloy spear that is horrible at the speed of the explosion. Even the speed of the worms is slightly inferior. Hey, there are ace cards in the wars, which is simply against the sky and the brain is wide open. But I can't think of a way to crack it, it's amazing!"

Speaking of this, Jero seems to think of something suddenly, the words turn around, the look on his face is more strange: "If I guess it is correct, that alloy war spear, there should be another change? Antimatter death Light spear? This is the real invincibility..."

In the end, he smiled bitterly and once again sighed: "You have still had reservations. This battle has not done its best. The real trump card has never been displayed, and I have already lost!"

"When the battle with Emperor Shaofeng, he won, but I did not accept it, but today, this war, I am completely convinced, but it is a pity that this world has no chance to fight with the genius of the genius."
"

As these words came out, there was a resounding voice in the surrounding air.

"God, I didn't get it wrong? With Yello's arrogant temperament, I actually admit defeat and express my conviction on this defeat. This is incredible."

"What is even more shocking is Sha Baofeng. The speed of growth is so amazing that it is easy to defeat Yero. It has not yet been fully exerted. This is simply unimaginable!"

"It's a big brain opening. The anti-material dead light shield is absolutely perfect. Absolute melee is invincible. Any offensive, including energy attack, can be blocked by the black shield. The characteristics of anti-material light energy are doomed. But how did he do it? Can the antimatter light generator be transferred to the hands behind the mechanical changes, and the size of the device can be compressed? This is not scientific at all..."

"Perhaps the guidance is not known. How thick is the alloy of the five-kilometer alloy? The anti-material light energy generator of the big fortress is at least 10,000 meters in diameter. How can it be compressed into the arms? It must be the guiding principle of the pipeline. However, the technical difficulties are too many. This is a new field of research, opening a new door for us!"

"There is still a spear, only the super-alloy state, it has such power. If it is true, as Elo said, it can also be converted into anti-matter dead spear, its power must once again skyrocket. That is absolutely the unstoppable rhythm of nothing, even a fixed super star fortress, may not be able to block, will be worn by a spear!"

"The enchanting! It is absolutely enchanting! Sha Baofeng was alive and savage. I couldn't think of the pheasant becoming a phoenix. Just like the undead bird in the flames, it has grown up completely. This kind of talent for horror growth in adversity can have?"

"Yes, there have been four worldly enchanting sayings before, the Xuan prince, the invincible **** of war, the fox lord and the gloom less respect, in my opinion, now can add a Sha Baofeng, the world's five great enchanting, my secret The family can finally take a seat..."

"The big ratio is over, the patriarch's order is out!"

It was also at this time that the core elites of the older generation who had continued to fight this battle and then continued suddenly said: "Pioneer Fleet Commander: Sha Baofeng! Deputy Commander: Yero!"

Chapter 3540: Wenxing and Emperor Yi

At the end of the big ratio, the chief and deputy commanders of the Pioneer fleet were immediately identified, namely Sha Baofeng and Yero!

Although this result was expected as early as possible, but the core elders of the older generation of the Tianzuo were publicly announced, they still caused a sigh of relief in the surrounding air.

Many people looked at Yarrow in a strange way, but he was quiet and silent, and there was no feeling of shame. It reflected a kind of cultivation and temperament. This scene fell on the core of the older generation of the heavenly family. In the eyes of the top, when they let them secretly nod.

Obviously, Yello is equally rewarding in this battle. Perhaps Sha Baofeng was killed by the fox lord at the beginning, but this phoenix nirvana, but made his miracle, will once again be heavy on Yero. It is not known now, he does have this kind of strength and self-cultivation!

Ye Xuan also realized this, and turned to look at the expressionless Jero up and down a few eyes, slightly frowning, my heart is not too happy.

If this is the battle, it really helped the Tianji people to create a genius of the younger generation of geniuses, and it would be too speechless!

At the same time, in a certain area of the inner core of the mainland, a room with no doors, windows and any passages from all sides, sitting in front of a holographic three-dimensional screen, the priest of the Great Emperor, is also a double-browed The lock, the light and the condensation, seems to be thinking about something.

There is no one else in the entire secret room, and the image appearing in the holographic stereo screen in front of him is the vastness of the sky outside the sky.

The figures of Ye Xuan and Yero are clearly visible.

At this time, a quiet voice that uttered a vain breath suddenly sounded in this secret room, I don't know where it came from: "How? What did you find?"

The object that the voice asked was obviously the old ghost of Wenxing, and he did respond in the first place.

I still twisted my eyebrows and shook my head: "It's a bit weird, but I can't be sure what went wrong, but I don't know why. I always have a feeling. It seems to have met before, I don't know if it is this fortress, or this person..."

"Unfortunately, the amount of Scorpio is simply not able to be deduced, and every time a critical moment is forcibly interrupted, it seems that there is any power to block it!"

Speaking of this, Wen Xing did not speak again, and the silence in the secret room.

After a short period of time, the voice of the suspected Tianji tribe was once again sounded: "Since there is a problem, it must be checked, but Sha Baofeng's words can barely be said in the past, not too recklessly treated. It is rare for the Tianji family to produce such a genius-class genius. If there is no accident, he will be the next young patriarch, and he will not be able to centrifuge for this."

"So, let's start with the Baofeng number for the time being. Check the Baofeng number. If there is no problem with the warship, then it must be a human problem. At that time, depending on the situation, at least the scope of the target is narrowed. Object!"

"You are doubting... Baofeng is the life warship that the old ghost left in the past?"

The words of Wenxing's old ghosts resounded again: "The so-called life warships were only a legend in the past. They have not existed in the past. They have not yet been confirmed. I have been searching for

you all these years, and there is no result, how is it possible? Will it appear in the hands of a senior core of the young generation of the Tianzu?"

"This matter can't be careless. You can see the mechanical fusion ability that Sha Baofeng shows. Don't mention it, it's just the antimatter dead spear and the antimatter dead shield. I can't even do it."

The voice of Emperor Yi suddenly became dignified: "According to my analysis, Sha Baofeng's mechanical fusion ability has been leaps and bounds even because of that war, but it is by no means able to reach this level, so the problem is basically in its On the battleship, there is a great possibility of hiding the hidden secrets of you and me. If Shabaofeng has no problem in itself, then as the patriarch of the Tianzu nationality, can I sit down and watch a enchanting genius that is not easy to appear in the family, and drop the trap? "

"Not to mention the disappearance of Shaofeng and others is too embarrassing. The two breaths that were monitored at that time were clearly superior to the main territory of the star. It is obvious that there is a secret hidden in the star of the evil. "

"I don't know if there is any connection between these two things, but they happen at the same time in a short period of time, and they have to be suspicious. In the unlikely event that a certain arrangement of Xingbo old ghosts started, then Not good."

"But one thing is certain, that is, the old things in the Second Universe suddenly sent troops to my first universe. Even the questions of the Terran and the Faroese Federation are no longer taken care of, and there must be some secrets. It is very likely that it will be related to the mysterious arrangement within the source of evil!"

Speaking of this, Emperor Yi sighed: "Unfortunately, I have explored the star field many times. Every time I can only enter the buffer zone of the central area. I only see some hollow cracks and a lot of black beetles, stars. The existence of the above-mentioned repairs in the main territory cannot enter the core hinterland..."

"I can go for a trip. For the source of evil, I have always had doubts. I once entered the edge of the core hinterland. I almost couldn't come back. I met a star in the head. Black armor emperor..."

Wen Xun took over the words and took the matter: "You also know that my hidden and savvy cultivation is only the late stage of the singularity. It is a great fortune to live in the face of that kind of existence."

"But now it seems that this kind of cultivation has become a kind of convenience, and can once again enter the core hinterland of the source of evil."

Having said that, the Wenxing old ghost who has been sitting cross-legged on the ground of the secret room suddenly stood up, and his body shape disappeared completely, but his voice still echoed in the secret room: "As for everything on the base camp, it depends on you. Then, Sha Baofeng's kid will do what you want. First check the battleship Baofeng, and then decide whether to investigate itself."

For a long time, in the empty room, there was a long sigh of sigh again. It was the voice of the emperor of the Tianji tribe: "Oh, even if it is a avatar, don't want to stay here for a long time?" If you find an excuse, you will leave immediately, but what is the point? Don't forget, your deity, after all, is still in the city of Tianji, after all, it is impossible to separate."

"I know all this, but still escaping from reality, is this patriarch really..."

"Ugh....."

After the last sigh, this room is located in the innermost part of the inner core of the heavenly continent. There is no sound anymore. After a short period of time, the outer industrial circle of the three major regions of Tianji City, which is far away from the heavenly continent, is vast. Big than in the void, the sound of the voice of the Tianji clan chief, one of them, made Ye Xuan's heart suddenly move...
