

Super D. S 3541

Chapter 3541: Swing

The patriarch, Emperor Yi, did not appear in real body. He came only with a avatar, but he was also strong, and the voice of the discourse was not loud, but it spread throughout the void. All the intelligent robots in the virtual air and the warships were all crouching. The land, while the people of the Tianzu ethnic group bent down and saluted.

The content of the discourse is very short. First, it is an official way to evaluate the big ratio. Then, one day later, the Pioneer Fleet will open the battlefield and swing the Devil's Star Field, which will be the wormhole leading to the Second Universe. Fighting with the coalition forces of the Commonwealth from the Second Universe.

In the end, Emperor Yi's avatar turned around, mentioning Sha Baofeng and Yero, and with the reward of the head, let Sha Baofeng leave his car and hand it over to a senior core of the Tianzu nationality. One star dock, upgraded.

In this regard, Ye Xuan sneered, but there is some cold sweat on the back, fortunately, I expected this in advance, otherwise this time it is really troublesome!

After confessing to all this, Emperor Yi's avatar floated away, and the senior executives of the elites of the Tianji family also turned to Ye Xuan and looked at it. The look on his face was a bit strange.

Obviously, everyone is not a fool. The patriarchs suddenly want to leave Sha Baofeng's car, Bao Feng, and everyone sees the problems, but they don't think about other aspects. Sha Baofeng's previous ability to integrate the sky is actually related to his driver's fortress.

All along, all people think that the mechanical fusion of the Tianzu people is strong, and it is only related to the Tianzu ethnic group who is capable of mechanical integration. As long as the level of understanding in this aspect is deep enough, then even with one of the most common battleships. Fully integrated, the same can show the strength of the powerful.

Now the actions of the patriarchs have reminded them of them. Many people are thinking about the deep meaning of them. Some people even have a look of ignorance on their faces. The alloy **** of war

changed after Sha Baofeng and his car The spear and the shield, the anti-material dead light energy form is indeed a bug, basically impossible to achieve.

But if the warship itself has been transformed, it is still possible!

It was Yello who seemed to be aware of it. He suddenly remembered that when Sha Baofeng performed his last mission, Baofeng had been left in the family to carry out the transformation. After returning, he had just recovered from the renovation star dock.

"It must be like this..."

Yero clenched his fists and his face showed a touch of excitement. He finally discovered the secret of Sha Baofeng. This discovery opened a new door for him.

He realized that the true mechanical fusion ability is not only related to the fusion of the Tianzu ethnic group, but also related to the warships with which it is integrated. After all, the mechanical warfare or the humanoid alloy warrior changed after the fusion is, after all, It consists of two aspects.

The understanding of the mechanical integration ability of the Tianji ethnic group is of course important. It is like the control software, but it cannot be ignored as a hard-working fusion warship.

Jero decided that this time, his dream fortress will not be taken away, will stay in the family, and ask an older generation of high-level people to open the joints, so that the first star dock to carry out a comprehensive transformation.

"Sha Bao Feng, wait, next time I fight again, I will never be defeated, it must be counterattack!"

Holding the fists tightly, Elo muttered to himself, confidently!

Ye Xuan waved the treasured maple leaf that had already been prepared in the immortal world. Of course, it was the real Baofeng. Then, among the elites of the older generations, several people entered Baofeng. Within the number, drive it away.

As for the other people, they will come forward and deliver the handsome commander of the Pioneer Fleet commander to Ye Xuan. Of course, it is also an electronic device, a black scorpion that can be connected to the communication port of the battleship, with two fingers.

After Ye Xuan took over, he turned his hand into the body.

At this time, Chanas on the side has been excited to pick up his hands again and again. In his view, since Ye Xuan successfully obtained the commander of the Pioneer Fleet, the future patriarchs of the Tianji ethnic group basically did not run.

Now the entire Tianji nationality still does not know that the former Shaozu Emperor Shaofeng has fallen, although doubts, but it has not been confirmed, but in the view of Chanas, this matter must be confirmed soon, then it should be the time when the Sha Daren is in the upper position. It is.

For this reason, seeing Ye Xuan turned and walked toward himself, Chanas immediately nodded and smiled. The pair seemed to be the posture of his promotion of the government: "Sha Daren, congratulations, promotion and wealth, Promote your fortune!"

"Get ready, send the Devil's Star Field tomorrow, then you will return to the Magic Star..."

This is not a slogan, the old guy refused to stay in Tianji City, Ye Xuan can not always be with him? It can only be where and where to go, and he will be packaged back to his original home.

Upon hearing this, Chanas was sluggish on the spot. After a long time, until Ye Xuan had turned and left, he finally returned to the soul and quickly followed up, although he did not say much, but his eyes were dripping. Twisting, obviously it is to figure out how to stay in the future of the young people, and follow him to get rich and get some light!

The entire Pioneer Fleet of the Devil's Star Field has been fully assembled, and it has stopped at the edge of the industrial circle outside the Tianji City. After Ye Xuan arrived, he entered the flagship fortress in the first time.

The Pioneer fleet of this Tianzu nationality is large in scale, with a total of 1,000 large and small fortresses and 100 large and small fortresses. In addition, the three-star star-rated battleship and the kilometer-captain's star-rated warships have tens of thousands. Ship!

As for the various small patrol ships and battleships, there are tens of thousands, and each of the big and small fortresses and fortresses carries a lot.

A large Pioneer shipman has occupied a large starry sky in the void. Ye Xuan has never seen a huge fleet of this size. The total number of ships has reached tens of thousands, which is simply shocking and can be seen. The scale of this battle is ambitious.

After all, this huge fleet is just a pioneer!

A pilot fleet of such a large scale, relying on intelligent robots for driving control, there are countless intelligent robots to go to the battlefield, and the top of the Tianzuo who is really responsible for the flagship command of the town, there are only two people, it is Ye Xuan and Yero!

Most of the authority is in the hands of Ye Xuan, and Yello is just his deputy. He can manage the following intelligent robots!

All instructions must be completed by the handsome character in Ye Xuan's hand, which is an electronic black box!

As for the tens of millions of Void squadrons that Ye Xuan was worried about, it was the morning of the next day, and was escorted by a senior high-ranking core of a celestial family. It was directly placed on a 100,000-meter-diameter starry fortress. Inside.

Since then, everything is ready, with Ye Xuan's order, the entire Pioneer fleet, fully open...

Chapter 3542: This command is also useful.

From the Tianji City's base camp Tianji City to the Devil's Star Field, all the way to the distant star, even if you do not let go of every small wormhole along the way, the wormhole jump, it takes nearly a month.

The other tens of thousands of small patrol ships, kilometer-class star-rated warships, etc. in the entire fleet do not have the ability to continually wormhole jumping. Fortunately, the size of the fleet and the size of the fortress are enough. Many, basically these small warships are used as sub-ships to enter the large warships to jump.

Although the fleet is slow to sail, it takes nearly a month to reach the battlefield. However, the first-hand battle on the battlefield can be transmitted to the flagship of the Sky City and the Pioneer Fleet through the Star World network of the First Universe.

Therefore, even on the voyage, Ye Xuan is in the same position as the battlefield situation in the Devil's Star Field!

As the hegemon of the first universe, the Tianji people are only the vanguard fleet. There are more than 10,000 warships of more than 3,000 meters. The size of the fleet of the other first universe is naturally more terrifying.

Of course, the participating fleets of the slave servants cannot be dialed to the battlefield at one time. They will arrive in the same batch as the forces of the Tianzu people. The first to be dispatched is the Pioneer Fleet.

The Tianji clan, as the sole hegemon of the first universe, has always had the saying of slaves and mortals, but in fact this is obviously exaggerated. A cosmic plane is too large, and it is impossible to have more than 10,000 scales. The vast majority of the intelligent community are some weak ethnic groups, if they are zerg without wisdom and so on.

The servant group under the celestial family has a total of nearly a thousand. Even if only one squadron of the size of a hundred ships is dispatched, each group can have a scale of 100,000 ships.

These 100,000 ships refer to the main battleships of at least three kilometers of captains, including large and small fortresses and small fortresses, and large fortresses of 100,000 meters in diameter. The Tianji people are not open to their slaves.

In addition, there are various small patrol ships, the star of the captain of the kilometer, etc. In short, if all the pioneer fleets of the slave servants arrive in the devil's field, Ye Xuan's hands will hold a Each model ship has more than 100,000 super pioneer fleets.

And, the fleet that he is about to unfold in his hand is the first cosmic star war in the war between the two cosmic planes!

This shows the horror of authority in his hands!

If it was placed before, Ye Xuan could not even think of dreaming!

Looking back on the past, two years ago, he was an indigenous who had just stepped out of the closed planet and came to the universe of the universe. He didn't understand anything, and everything started from scratch.

But now, the first battle of a full-scale battle between the two universes will be carried out under his command... The encounter of life is really awkward, full of possibilities, even Ye Xuan, the witness It is not a matter of emotion.

Two days after the entire fleet of the Pioneer Fleet left the Tianji Star Field, the first wormhole jumped and completed the wormhole jump. The entire fleet was far away from the Tianji Star Field. Ye Xuan was still somewhat suspended. The heart is also completely put down.

He first came to the 100,000-meter-high fortress that contained tens of millions of squadrons. After a patrol, he determined that all the emptiness soldiers were here, and that the two eight-star kings were not big. After that, this is reassuring.

After a little hesitation, Ye Xuan directly refining the starry fortress and earning it into the body. At the same time, he gave instructions to the phagocytic system to brainwash all the intelligent robots inside the big fort.

This big fortress, he did not intend to pick it up again, find a suitable star field in the future, and then find a new habitat for the Voids, but for now, they can only stay in this cannon. Even the black hole of life can't go, otherwise it will have to be arrested sooner or later, even on the spot.

"What do you mean by collecting those cannons?"

Just returned to the flagship fortress, the deputy commander of the Pioneer Fleet, Jero, came over, his face of suspicious color, and asked Ye Xuan why he was acting.

"Is this command another useless? Is it your commander or the uncle? You are not honest at the top of the head, it is really tidy!"

Ye Xuan did not pay attention to it. When he turned his eyes, the number fell, and the commander's glory was full. Finally, the big hand waved: "Now the command of the fleet is temporarily handed over to you, this commander must close a close-up Anything, if you have something big, remember not to make a good idea. You must report it to the commander, otherwise you will be treated with your military law!"

"Chanas, you are now the guard of this command, give me optimism about him, what is the change, the first time to report..."

After that, the nose that no longer cares for the air has been taken to the side of Jero, and with his arms, he walked into a cabin. After closing the hatch, he waved a cloth to ban the ban, and then he let go of his heart.

This trip to the Devil's Star Field, the road is far away, there are more than 20 days of nearly a month's voyage, Ye Xuan can not waste these time, he did decide to use for retreat.

He has already refining the 12-level liquid. He is ready to use it. He only needs the repair of the body and blood to achieve the ninth-order great perfection of the realm. He can use a tube of 12-stage liquid. If one tube is unsuccessful, There is also a second tube, in short, breaking through to the twelfth big void, it is definitely a matter of nailing!

Although he has been a real-time improvement in the realm of this period, it is now the eleventh-order power of the third-order realm, but as soon as he thinks of the zombie king, he will feel pressure immediately. Shanda.

That guy is a cosmic zombie, able to devour all the flesh and blood in the universe and enhance his own strength. The speed of his cultivation is that Ye Xuan is shocked.

If there is no accident, then the zombie king of today is the best, and it is very likely that he has already entered the twelfth virtual void. Therefore, Ye Xuan can no longer slack off. It is necessary to seize all available time and improve itself as much as possible. The cultivation is strength.

In addition, the research and preparation of the thirteen-level liquid is also imminent. Once Ye Xuan enters the twelfth virtual void, the matter will become more urgent. Otherwise, if it is the twelfth big void The nine-order great perfection of the environment, the thirteen-level liquid in the hands is still not refining, and then it is too much wrong to stop before the beginning of the thirteenth world.

With these thoughts, Ye Xuan was full of strength and soon entered the state of cultivation.

I don't know how long it took. When he finished his cultivation and opened his eyes, he heard a familiar system prompt when he was neutral: "Hey, congratulations to the host, the physical and physical breakthroughs! The current realm: Xuanguangjing fourth-order!"

Finally broke through!

Ye Xuan sighed and adjusted his mood. Then he waved and removed the barrier, opened the hatch, and stepped out...

Chapter 3543: Devil's Stars gather

The first universe, the devil's star!

Nowadays, the devil's star field can be described as a gathering of the wind. Not only the pioneer fleet of the first cosmic slaves is being opened, but even a large fleet of the Second Universe Federation is connecting the two universes. The face-level cosmic wormhole in the face is gathered in succession.

This time the plane-level starry sky war, the initiator is the second universe, the first universe of the heavenly family and its subordinate servants, but only the war.

Therefore, the battlefield is destined to be in the first cosmic plane.

Neither the Tianji nor the Devils have sent heavy troops to guard or set up at the exit of this plane-level cosmic insect.

The Tianji people also hoped for a war to disrupt the situation of the three cosmic planes. Therefore, it is completely unnecessary to export the wormholes and prevent the Second Universe from entering the First Universe.

As for the set-up, it is even more unnecessary for the Tianji people. The first universe is the base camp of the Tianji people. The family is known as the only hegemon of the first universe. If even the second universe of the various nationalities join forces, they will not face the battle. And to play these intrigues, it is a joke.

For this reason, in the recent period, the first universe has entered the first universe from this plane-level cosmic wormhole, and the second cosmic fleet that has been camped in the void near the exit of the wormhole is one after another.

The void near the exit of the wormhole is already full of various battleships, fortresses, and fortresses. It is densely packed, and a star-studded river is covered with a layer of cold steel coat!

Among the top ten second-common federations, apart from the turtle family, other such as the bloody, Qingpeng, warrior, silvery, barbarian, golden eagle, Cailu, and greedy wolves The nine ethnic groups, such as the Tree Spirit, all sent powerful fleets of people to come.

In addition, the other families of the Second Universe also have fleets.

Even the black lions, led by Yinyin, Yinba and Yinjiu, who led the 10,000-plus sinister tribes, also came to the Devil's Field.

Of course, the Black Lion is now a cosmic wandering fortress. It is not a member of the Second Universe Federation. Even the patriarch of the Yin Mozu, who is not ignoring them, has long been mad.

In addition, the Black Lion originally belonged to the War Lions and was taken away by the Nether. This is a shame for the War Lions. There is no doubt that as soon as you see this small fortress, the War Lions are absolutely It will not be polite, and will be shot on the spot. Anyway, it has succeeded in condensing

the body of the Nether, and has become the master of the star-class eccentric, and has abandoned the entire ethnic group.

The current Yin Emperor is the starry sky in the universe. He is wandering around. Whenever there is a star field where he appears, he will often hear the thunderous roar of anger and roar around the world.

In fact, even if the Yin Emperor still cares about the 10,000 remaining Yin Mozu people in the Black Lion, the War Lions have no fear at all.

Because of the War Lions, this time, the second top nine large ethnic fleets in the Second Universe are said to have a star in the main family, although it is highly likely that they will not participate in this time. The conventional warfare came, but the entire second cosmic coalition army has nine star-level eccentrics sitting in the town, and its role in stabilizing the military is unparalleled!

Therefore, the strongmen of the second universe of various ethnic groups that came out this time were all morale-like, and the steel warships that stretched for thousands of miles occupied a void, and even the stars were shocked by this momentum. The stars in the distance It is bleak.

Although the Black Lion did not know for what purpose, he even sneaked away to make a fun, but did not dare to appear in this huge coalition fleet, has always opened the hidden array, and occasionally no longer dive out The head is full of gas, but also in the distant sky at the edge of the joint fleet, did not dare to approach, otherwise the war lion must be shot!

It is said that even the former patriarch of the Yin Mozu, the emptiness of the starry sky, is now rushing to the first universe. It is said that this class of plane level starry wars, with less urinary urgency, absolutely I won't miss it, I will definitely come over and swindle something, so he will come to revenge.

The news came that the top leaders in the Pioneer Fleet of the Second Universe Federation were all bad.

On the one hand, it is because today's Yin Emperor is not only a star lord, but also seems to have a bit of crazy trend. Such a solemn and sacred bit-level starry sky war, it is really worrying that he is crazy and hurriedly inserted. If this old thing is full of joy, what the situation will be in the final battle, it is really unpredictable.

Although the major ethnic groups, including the celestial beings, and even the first cosmic servants of their majesty, are not without the super-royal monsters that transcend the star's main territory, the existence of this kind of existence is basically not going to happen, and I want this level of existence. For a little crazy star lord to take a face, it is basically a luxury!

In addition, the more critical issue is still the Nether!

For the second universe of the Commonwealth, this name is definitely an eternal pain in memory, especially among the top three bloody, Qingpeng and warrior in the second universe.

At the beginning of the Turtle Star Field, they were simply unable to breathe by the sorrow of a singer, and that thing had already become the first laughing stock in the history under the stars.

Of course, the star powers who are qualified to joke are basically some scattered, and the larger forces are not, because in the scandal, the big forces of more than 60% of the three universes were involved. It is really a big brother who doesn't laugh at the second brother!

However, if the Netherland is really coming over, this plane-level star war that has never existed in the past 10,000 years will eventually become what it is, and it is really unpredictable. This shameless means of enchanting has been recalled. The top officials of the second universe of the Commonwealth are still white and sweaty.

Some people sigh, but unfortunately, the fox lord died, and the prince is even more silent. Like the disappearance, the invincible **** of war is still in the territory of the third universe, and plays with a group of old monsters in the Ten Heavenly Palace. Star-level peekaboo, there is no time to come.

Otherwise, the three of them will come to one of them, and basically they will be able to restrict the Nether.

It is also at this time that just as the people of the Second Universe Federation are coming to this starry battlefield because of the starry sky, the mad dog, the eccentricity and the ignorance of the ethnic group, the news of the starry battlefield is coming, and there is a lot of discussion and worry. Another heavy news was also passed over from the base of the first cosmic tyrant's celestial family.

One of the celestial family members was recently born, and it is very likely to become the next young patriarch, and it is said to have the same horror talents as the Nether, the fox, the singer, the invincible **** of war.

Sha Baofeng, who is known as one of the five enchanting princes of the world, has led the pioneer army of the Tianji nationality. He will come and arrive in the Devil's Star Field in a few days...

Chapter 3544: Thirteen grade liquid

Ye Xuan stepped out of the closed room, and Chanas, who heard the movement, immediately greeted him, nodded and said hello, and then found that Ye Xuan's repair broke through a small step, and now it is the fourth stage of Xuanguang. Strong, and suddenly it's a slap in the face.

Not far from Jerome, I couldn't listen, and turned and walked away.

Ye Xuan did not pay attention to it. When I asked, I learned that this retreat took a full three days. It seems that the more powerful the repair, the harder it is to improve the realm. This is what he has already expected. Although it is a bit depressed, it seems that it has to fall behind the zombie king's extension of the wind, but it is helpless.

Even though this time it took a full three days to retreat, it was still a long time away from the Devil's Star Field, and there were still twenty days.

Fortunately, the situation on the battlefield there has not changed. The scale of the cosmic wormhole exit, the scale of the united army from the Second Universe is becoming more and more horrible, but the first cosmic slaves are also extremely powerful. The scale of the assembly of the various ethnic groups is stronger than that of the other party.

For this plane-level star wars, Ye Xuan is still very much looking forward to it. After all, it has nothing to do with the Terran, but it is between the Tianji and the Second Universe.

Ye Xuan did not have a good impression on the two sides of the battle. He did not care how many star-studded powers he died. He could use such an opportunity to pass a bite-level Star Wars commander's addiction, which is simply unattainable. Good day!

In the following time, Ye Xuan did not retreat, but took some of the oven cream to repair some of the dark and hidden diseases that may be left in the body.

After all, the path of evolution is the shortcoming. It is necessary to break through the limits of the human body and tear the invisible human potential. This is definitely harmful to the body of the evolver. It may only be a weak point every time. However, after a long period of time, once it breaks out, the consequences are absolutely serious.

However, Ye Xuan now has a large number of scented lotion emulsions, and even more than 2,000 drops of all kinds of sinister source fluids. It is enough for him to take a little bit of each time after the breakthrough of the promotion, to prevent the accumulation of such hidden dangers in the body. Stayed.

In addition, he spends more time on formulating the 13th grade liquid. This is a brand new field. For the third universe, the top gatekeepers in the field of genetic fluids, Although there are very few finished products of the eleventh grade in the hands, for example, there is one tube for the extension of the house, and there are also one tube for each of the three women in the Xuanyuan Ziyan.

However, the formula of the eleventh grade liquid has always been in the hands of Ye Xuan, and there is no leakage.

As for the 12th grade liquid, you don't have to say more.

To the thirteenth level of liquid, for them, it is simply a night of the night, the top door valves in the field of major genetic fluids, may not even be able to spell out a defective formula.

The field of genetic fluid research is step by step. Without the formula of the 12-stage liquid, it is impossible to know what the key elements of the 13-level liquid are, and even the basic elements are not certain.

Although Ye Xuan has not entered the field of genetic fluid research for a long time, he has mastered a large amount of resources through various channels and methods, including the communication system attached to the phagocytic system, which has been stolen from major gatekeepers and other official forces. The preparation of the pen and a large number of disabilities, coupled with the powerful derivation of the phagocytic system.

So directly led to his rapid development in this field, all the way from the first liquid to the later twelve-level liquid, and now Ye Xuan, is definitely the first person in the field of genetic fluid research.

The famous name of the three main medicinal devices of Linghu is not just called out.

Even so, the formula study of the thirteen-level liquid still makes him a headache. On the way to the Devil's Star Field, the next twenty days, Ye Xuan's whole mind is immersed in the formulation of the thirteen-level liquid. Among them, he even managed to match the formula of another 12-stage liquid, but the 13-stage liquid has not been successful.

The prepared genetic fluid, either only twelve colors, or a mess of color, can not be stabilized and become a waste drug!

As time approaches, it is not far away from the Devil's Star Field. Ye Xuan is a little bit stunned, because once he reaches the Devil's Field, he may not have time to immerse himself in the genetic fluid. The study went.

And now he is now at the fourth level of the realm of the physical and qi and blood, and there are five small-order breakthroughs, and you can take the 12-stage liquid. At that time, the demand for the 13-level liquid will be even more. For the sake of urgency, it is imperative.

Finally, it seems that only three days will soon reach the Devil's Star Field, Ye Xuan will simply put a heart, in the final 13-level liquid formula, added a small amount of nine colored meat!

This is completely a dead horse right to live a horse doctor, just take a chance, anyway, there are only three days left, he basically has no possibility to push a new 13-level liquid formula.

The reason why I have not added nine color paste to other 13-grade liquid formulas is because Ye Xuan does not understand the characteristics of these nine-color meat.

Yes, they are indeed the top things. Even the wreckage of the ancient creatures that transcend the star's main body will be spit out as a waste, so that those who can be left in the furnace and crushed by the grinding disc can be seen. How old is the wilderness.

Among their wrecks, even a single drop of blood is better than the precious treasures of the world.

The colorful meat mud is too complicated, and it is formed by the crushing of the flesh and blood of various powerful ancient creatures. These powerful wild creatures, some of which are gold-colored, some are flame red, different, now all Being crushed into mud and mixed together, they all become nine colors.

I would like to ask this kind of raw materials whose properties are undetermined and undetermined. Even if the grade is higher, how do you add them to the formula?

However, what Ye Xuan did not expect was that this time, he completely put a small amount of nine-colored meat puree into the recipe of the last 13-level liquid, and finally carefully followed this formula. After the configuration, two days later, when the results came out, he actually got a successful 13-level liquid.

This is a tube of faint liquid, but with the knowledge of the gods, you can see that each of the liquid micromolecules has the same, clear and unparalleled thirteen colors!

“Successful? What is going on?”

Looking at the precious thirteenth liquid in his hand, Ye Xuan was on the spot.

He suddenly remembered a sentence, only knowing it, I don't know why!

Isn't that the case now?

Although the thirteenth grade liquid was configured successfully, but for Mao to succeed, Ye Xuan was confused, and did not understand at all...

Chapter 3545: The magician's big hand

Although the configuration of the 13th grade liquid was successful, this is a happy thing, but Ye Xuan's interest is not high. I use a small space box to collect the 13th grade liquid, and put it into the body after the immortal world. He was even in the sinking.

Now, he is not even sure that this time he successfully refines the thirteen-level liquid, is it because of the addition of that small piece of colored meat.

This is probably just a coincidence!

Of course, the chances of coincidence are still very small. The bigger possibility is that the success of this formula is the reason why it has joined the small piece of meat. If this is the case, for Ye Xuan, this is the case. It's a big news.

In this way, he will develop a higher level of genetic fluid such as fourteen grade liquid and fifteen grade liquid in the future. When encountering different bottlenecks, he may try to add a small amount of nine color meat mud again. .

If it is still effective, then there will be no big problem in researching higher-level genetic fluids in the future. It is only necessary to deduct the basic formula and then add a small amount of color as a whole. Meat can be!

But now there is no time to verify this, because there is still a short day, the Devil's Star Field is coming!

"What the **** are you doing these days? You will arrive at the battlefield right away. If you enter the inner cabin, you will not show up for several days. Do you regard the commander of the Pioneer Fleet as a play?"

This time, the 13-level liquid was prepared. Ye Xuan said that it took a lot of effort. The command of the entire fleet was always handed over to Jero, and anyway, it was a hurry. Nothing else could be done.

He himself hangs in the inner cabin, basically does not take the lead, at this moment, one day, he will go to the devil's star field. The latter is obviously anxious. Seeing that Ye Xuan finally comes out from the inner cabin, the skull cover is a question.

"The second child, please pay attention to your words!"

Ye Xuan immediately became unhappy, his face sank and turned to look at Jero. A second child almost did not let the latter continue to swear on the spot: "This command is the commander of this Pioneer fleet. You are just the big man. The little follow-up class, the next time you pass, the more you will be ruled on the following, expelled on the spot!"

"As for the last big thing that this commander is busy with..."

Subsequently, Ye Xuan turned and turned his hands to the command cabin hall, directly ignoring the expression of Jero's teeth, and said slowly: "The commander has dozens of battleships under his command, and the intelligent robots are numerous, shouldering this plane-level universe. The command of the war can be described as a day-to-day plan. I have been thinking about strategy and tactics all the time. What can you understand when you are in the class? Listen to the command and you will know what is your mission, and other nonsense!"

"Otherwise, it will delay the warplanes, disrupt the battle, and be careful with this uncle! You are asking!"

One bit of a command, one bite, one uncle, plus a word like a second child or a small follower from time to time, so this kind of reprimanding, Jero was almost smothered by his training, the whole person was paralyzed. The brain is chaotic, it is simply messy in the wind!

One day later, the Pioneer Fleet entered the Devil's Star Field, and within a short two days, it launched six wormhole jumps and finally reached the Magic Emperor.

Just arrived at the outer edge of the Magic Emperor, Ye Xuan was shocked by a big guy suspended in the void.

In addition to the Tianji continent in the core area of the Tianji National Base Camp, the largest Star Wars machine he has ever seen, there is only a fortress of 100,000 meters in diameter, even in the immortal dynasty. Never seen a star war machine bigger than a 100,000-meter-diameter fortress.

At the moment, he saw it, and there is one in his vision!

This is a large steel ship with a shape like a giant big horn. The diameter of the bell mouth reaches 300,000 meters of horror. It can side-by-side insert three large 100,000-meter-diameter large fortresses from the bell mouth.

To be precise, this giant star-shaped big horn is not a separate individual. The bell mouth is composed of a ring, from the outside to the inside, for a total of nine layers.

The outer layer has the largest ring shape, and the inner layer has the smallest ring shape, just like the last part of the bell mouth.

Behind this smallest layer, there are nine layers, one layer is smaller than one layer. These nine layers, together with the smallest layer of the inner ring of the bell mouth, form a giant, gradually narrowing bell tube!

Whether it is the nine layers of the bell mouth or the nine layers of the bell tube, each layer has a large number of nodes, and there are some huge tubular connections between them. These dense nodes are independent of three kilometers in diameter. The battleship, but it is not a boat-shaped standard warship.

They are more specially built for the purpose of constructing this giant star-shaped big horn. Although the battleships at each node are only three kilometers in diameter, they are all honeycomb-shaped, with numerous small cross-sections. I don't know exactly. What is used for it, because Ye Xuan did not see any muzzle from the surface of the hull of this numerous small hive warships.

As if they together formed this giant starry sky horn, it was not for the Star Wars, but for decoration, just a giant art of horror.

But that is obviously impossible!

Even if the devil's brain is broken, the devil's family can't make a useless starry sky artwork at this time!

As the Pioneer fleet temporarily stopped in the void of the Magic Emperor, Ye Xuan took Chanas when he went out of the flagship expulsion and went to the Emperor Star, while the deputy commander Jero was ordered to stay in the expulsion. The number is in the fortress.

This clearly does not want him to participate in the rhythm of the Pioneer War. After all, the battlefield is on the front edge of the Devil's Star Field, the first battle between the Pioneer Fleet and the Second Universe, the Devil Element is definitely an important part, Ye Xuan Meeting with the top of the Devils is definitely a matter of discussing the war.

Although Jero was extremely angry, he was helpless. He found out that his so-called deputy commander of the fleet had already been emptied and completely became the follower of the commander Sha Baofeng. It was still small and had a head ahead. Chanas!

Ye Xuan and Chanas just entered the Devil's City, and they saw the Emperor Mo Wentian and the two emperors. Chanas was left outside the hall, and Ye Xuan began a secret conversation.

"What's going on with the big horn outside the sky? Looks like you don't have any attack power. The dense hives are quite a lot, but there is no muzzle."

After the isolation method was propped up, Ye Xuan opened the door and immediately asked the biggest doubts in his heart.

"There is no muzzle right, because it does not have the ability to blast the energy column."

The devil's uncle Mo Qigong took over the words and saw Ye Xuan heard a dumbfounded color. Then he said: "That is the result of many years of research by our devil, called the spirit war!"

Chapter 3546: Void war

"Ah? Spiritual war?"

Ye Xuan's face was constipated, and it took a long while to pick it up: "I swollen into a top restaurant but eat the feeling of dark dishes? This name is too sloppy? It is not a good thing to listen to. Are you sure that it really can be on the battlefield?"

Next, the emperor Mo asked Tian to shake his head and smile, and even the two uncles also turned their eyes. Finally, Mo Qigong patiently explained to Ye Xuan, let his eyes gradually light up, clearly it was born a lot. interest.

Spiritual warfare is actually a fighting horn with spiritual power as an attacking means.

The big horn is just the appearance of this star weapon. The reason why it is a horn is obviously exquisite. You can understand it with a little bit of tempering. This can play the role of amplifying the power of the spirit, and the speaker The reason is the same.

Among the huge three-kilometer-sized honeycomb-type knot warships in this huge spiritual warfare, there are a large number of devil strongmen. It can be said that the eight tribes of the devil's group, and the tens of millions of devils, Almost all will be in there.

Within each hive node, there will be a high priest of the demon group or a strong person who is good at spiritual power.

Basically, every three-kilometer-sized honeycomb-type knot warship has tens of thousands of demons, who will fully motivate the brain under the command of the high priest or the devil's royal strongman who sits on the battleship. The magic core, exerting spiritual power, turns into a powerful pulse of spiritual power, which is connected to a huge special material tube of one node, and gathers toward the inner layer of the smallest layer of the bell mouth.

In the end, all the mental power pulses gathered by thousands of nodes will be blasted together under the joint of nine devils and royal powerhouses sitting in the nine-node hive in the smallest layer of the trumpet.

Then through the nine layers of the bell mouth to enlarge, form a horrible and invisible star-level spirit hurricane, killing the enemy battleships in the opposite camp.

This is a big killer, killing a large piece, and the star-level fine society that blasted out is a hurricane invisible and inferior, and it is impossible to resist. Even the energy shield of a battleship, fortress or fortress is useless!

"I rely on! This is a good thing, can you give me one?"

Ye Xuan's brain also has a spiritual source nucleus. It also has spiritual strength. Even many secrets and magical powers that he has mastered, even the devil and others will not. Therefore, the horror of the spiritual power is also The most understandable.

Mo Qigong casually explained a few words, he immediately understood the horror of this spiritual war, not to mention that the devil is not good at science and technology, basically not enthusiastic about the manufacture of warships, but this is made by others. Four is not like, but it really has the spirit of technological innovation. It has definitely brought out the characteristics of Star Wars technology and the spirit of the Devil, and it is definitely a pioneering work.

Therefore, even Ye Xuan is extremely excited, even if the request is made.

"Do you want to hijack the entire demonic group?"

It is a pity that for his words, Emperor Wu Qigong and others turned up their eyes on the spot and said nothing to them: "This 300,000-meter-diameter spiritual war is not the limit of the devil's group. If we send the people of the Magic Emperor Star, we can make a mental battle of 500,000 meters in diameter, but... What do you want the kid to do?"

"A 300,000-meter-diameter spiritual warlord, the magic man who needs to settle in reaches the 70% of the entire demonic group. Do you have it?"

It is no wonder that the tops of several demonic groups are all dissatisfied. This kind of spiritual warfare does not have a large number of devil strong people. It is simply a pile of scrap iron. Ye Xuan wants to fight for the war. It is clearly the idea of wanting to beat the devil's strong. It's shameless, I really want to give him the war. Maybe after the devil's star field, there will be a large number of demons who have disappeared in batches in batches!

These words Mo Qigong did not directly say it, but it is clearly the meaning. The next emperor Mo Motian and others are also deeply impressed by the color. Apparently, they all belonged to the devil dynasty in the name of Xuan Xuanzi. The toss, the memory is still fresh.

"Don't look at me like this, anti-wolf, say good cooperation? Say good friendship?"

Ye Xuan's face is full of sorrow, righteousness and resentment: "You can rest assured that this person has always been the most principled, and I am absolutely not going to start. Oh, this... well, talk about business, this kind of spiritual war is me. I really need it, although I don't have so many Devils on hand, but I have a Void Scoop!"

Ye Xuan is playing this idea.

The Void Scoop has a unique biological wave frequency. Unfortunately, the mysterious biological wave frequency of the individual is too weak, and basically does not have much lethality. However, the empty space Shenxuan, which is displayed by the Void Scoop, is already seen, but also Give a name, such as fighting the stars, crossing the mountains and cattle, etc., are the magical powers related to the law of the universe.

If there is a spiritual war, Ye Xuan can completely let the tens of millions of Void soldiers get into the camp. At that time, all the soldiers will be led by some high-ranking people like the eight-star king, and the mystery unique to the soldiers will be issued. The biological wave frequency does not necessarily have the opportunity to show the virtual law of the void.

The Void Scoop is the only ancient power that is second only to the ancient and supreme. Although it is just like a new life, it has not yet grown up, but its magical power can be weakened?

However, the statement of the spirit war is not suitable, it can be called the virtual war, it seems that the name is more high-end atmosphere.

Of course, it's impossible for these Ye Xuan to explain too much to the Mo Huang Mo Tian and others, but he is only a mention of the Void squad, Mo Zhentian and others can basically guess a bit, after all, the void As a mysterious living body, although there is no spiritual power, the biological wave frequency is still there.

As long as it is not a scourge to their devil strong, the other appointments Ye Xuan to toss is.

However, it is absolutely impossible to directly deliver the spiritual warlord to Ye Xuan. Ye Xuan did not expect them to do this. With the magical man's ability to build science, it is estimated that the current use of this does not know how many years have been created. He can't wait.

Immediately, Emperor Wu asked Tian Tian to hand over all kinds of data and drawings and other information built by the spirit war to Ye Xuan, and the latter did not immediately study it, directly thrown it into the phagocytic system, let the system push twice. Refined.

As for the subsequent construction, Ye Xuan has not decided yet. Looking at the situation, perhaps after returning to Tianji City, a star-studded dock will be built independently in the outer industrial circle of Tianji City.

Perhaps after returning to the third universe, the various data and drawings directly derived from the second degree will be directly transmitted to the Triumph City of the Death Star by using the Star Network, so that the mosquitoes and the old ghosts will lead the entire team of the Arc de Triomphe. Build...

Subsequently, Emperor Wu Moqigong turned a corner and asked Ye Xuan to go to Tianji City this time, in the specific progress of the rescue of the devils of the emperors.

Chapter 3547: Ye Xuan beats chicken blood

"The Void squad has been rescued, but your dozens of emperors are still in the imperial prison inside the mainland..."

Ye Xuan's hands are spread out, and the face is helpless: "The emperor wants to put the entire squad group in front of the battlefield and let them make cannon fodder. Otherwise, it's not so easy to get it. Moreover, the squad is also handed over before the fleet's departure. Give it to me, then the Pioneer Fleet set sail, and after the soldiers arrived, I simply didn't have the chance to do your work again."

"And if you start before this, you will definitely be discovered, and the soldiers will be in danger. In addition, no one in the sky city can enter. In the identity of Sha Baofeng, which I am replacing now, there is still no one. Permission."

Having said that, Ye Xuan stopped the words, and he was not allowed to leak the things that the Tianji tribe chief Shaofeng and others were falling into his hands.

The Emperor Mo asked Tian et al. apparently understood that Mo Qigong nodded, did not care, and even the look on his face did not change much. Then he said: "The situation is similar to what we guessed, so this time We just took our teeth and took out the previously unrecognized spiritual war."

"This way, on the one hand, it can paralyze the Tianji clan, and let them doubt the anti-heart of our devil's ethnic group. It is no longer so strong as before, and lays the foundation for your successful rescue of the ancient emperors."

"On the other hand, this time the spiritual war is the first time in the starry battlefield, the key moments to start, there should be unexpected effects, then, if this war is a big victory, and Emperor Shaofeng still has no news of the fall, you are extremely It is possible that after returning to Tianji City, it will soon become the new patriarch of the Tianji ethnic group."

"At that time, you will have the right to enter the inner city of Tianji. At that time, the emperor's enthusiasm for you will definitely reach the weakest time. After all, I just threw a chief prince's official hat, I can't think of it. You will make things that are bad for the celestial family at this time."

"It turned out to be..."

Ye Xuan suddenly realized that he had been squatting at the devil's ethnic group since he had decided to reverse the celestial family. Why is this war still so bloody? For a long time, it was for the dozens of demons who were detained in the Imperial City of the Imperial City. Uncles of all ages!

"In the vicinity of the cosmic wormhole on the edge of the Devil's Field, the coalition's pioneer fleet from the Second Universe has been assembled, and there are nearly a million warships. On our first universe, the slaves are also at distance. The imaginary air gathering outside ten million miles, the strength is quite!"

Seeing Ye Xuan, the general situation has been clarified. The Emperor Mo asked the gods to be a true color, and then said: "As for our devils, this war will only send out a hundred large fortresses as a cover on the surface, but true The big killer is the spiritual war."

Among the nine honeycomb nodes in the inner layer of the smallest layer of the trumpet, eight are seated by several uncles and royal high-levels. As for the core one, it is a family ancestor who has not

been born for many years. The cultivation of the main character of the star, by then, the whole spiritual battle of the Lama's nodes will gather the pulse energy of the past spiritual power, which will be led by him!"

"Before this, the spiritual warlord will always open the concealed method and retreat to the last side of our army camp. When it is needed, it will move forward in the hidden state. After arriving at the appropriate position, follow your instructions. Boom out a strong blow!"

"This time, among the nine major conglomerates of the top ten in the second universe, it is said that there is a star in the main family of the lords, although it is highly probable that they will not participate in this regular warfare. Nine star masters sit in the town, the main role played is to stabilize the military!"

"At least, this is basically the case before the plane-level star wars go to the final stage."

"And a star-level battle like this scale will last for at least a dozen years. Therefore, in the short term, the star-level monster will not be shot, even 100,000 meters in diameter. The Great Fortress is just sitting behind the camp and will not participate in the war too early."

"The fleet of the Celestials you led is only a Pioneer Fleet. Anyone who follows the slaves or the Celestials will have a stronger force to join the war. The Tianzu will lead the battle. The commander-in-chief must be at least a star-level older generation."

"So, basically, before they arrived, the battlefield of the Devil's Stars would have no chance to evolve to the extent of white-hot, whether it was the servant of our camp, the commander of the various races, or the commander of the enemy camp. This is all known and will be restrained."

"But that way, it will have an impact on your exploits. When the star-class grotesque of the celestial family arrives, the amount of gold in your hands will have to drop by half, and you will only be able to get it if you have some exploits. It's just a small head, which is inconsistent with the original intention of our Devils to use the spiritual war."

Speaking of this, the Emperor Mo asked the gods to suddenly and positively, and said in a serious tone:

"So, what we mean is that the spiritual warfare will start to open the hidden battles from the beginning of the journey to the battlefield, except you, Basically, there will be no strong people other than the

Devil's family to know its existence. At that time, the star-class monster of my family will communicate directly with you with spiritual strength."

"And our requirements are very simple, the spiritual war is only under your control, and can not be used in the consideration of the battlefield overall situation, to use, to use at the most critical moment, the moment that allows you to get the most combat"

"If you say this, the spirit war will come out, isn't both camps surprised? This is the rhythm of not playing cards according to common sense. The plane-level star wars are actually used in the contact warfare at the Pioneer fleet level. This kind of big killer is estimated to be the second Universe coalition on the spot."

Ye Xuan nodded and fully understood the meaning of the Emperor Mo's question, and he was extremely excited. The little hand was picked up: "Hey, the spiritual warfare has a star-level demon person who is dominated by the town. Attacked, plus the tens of millions of giants in the hive of thousands of nodes, and the infinite power of the infinite invisible spirit of this star super..."

"Oh, ah, come here so coldly, shouldn't you kill the nine star-class geeks sitting in the Pioneer Fleet of the Second Universe?"

"Hey, this time I'm playing big, let me think about it, which group should I pick? The **** people? The Qingpeng people? No, no, and their hatred is not the biggest, or the lion, I ate a little patriarch last time..."

Looking at Ye Fengan's words, like a chicken blood, excited and excited, the Emperor Mo asked how many people face each other, and suddenly there is a feeling of not so good, the whole person is not good...

Chapter 3548: Two mysterious old ghosts

After everything is settled, Ye Xuan is ready to swing again. The front of the devil's star field, two super-stars of nearly a million stars, are separated by a tens of thousands of miles, and may be rubbed at any time. The possibility of a gun fire.

After all, Ye Xuan is a pioneer commander. The nearly one million warships composed of the pioneer fleet of the first cosmic slaves all have to listen to his own command.

He has been eager to feel the wonderful feeling of this kind of pointing, and the opportunity is rare!

However, although the spiritual warfare of the devil's ethnic group does not swing at the same time, it is necessary to open the concealed array method after Ye Xuan's Tianji Pioneer Fleet leaves, and quietly follow it.

However, the Devil's group is also a strong group in the forefront of the first cosmic servant. If there is no fleet, it will cause the enemy's suspicion and vigilance. Therefore, the devil's ethnic group is cover-up. A hundred thousand meters of fortress will be dispatched.

At the moment, the 100-meter-long bastion is embarking on the Star Dock for assembly, and will then depart with the Tianjian Pioneer Fleet, which is commanded by Ye Xuan.

Leaving the hall, Ye Xuan, accompanied by the emperor Mo Wentian and the uncle Mo Qigong, just appeared in the core area of the inner city of the Devil's Imperial City. Onwards, there was a gray-haired demon old man.

Seeing the devil's old man, Mo Wentian and Mo Qigong both stopped their steps. The latter stepped forward and respectfully called an uncle, and the Emperor Mo asked how to even talk to him. No, stand by and stand by.

Ye Xuan suddenly stopped, even Mo Qigong called him the emperor? The generation of this old family is not as high as the devil's royal family.

Immediately after his flash of light in his mind, he immediately realized that if there was no accident, the gray-haired old man should be the demon star who was the core node of the spiritual warlord. It's strange, it's no wonder that Ye Xuan doesn't feel any strong breath from him. At this level, if people have the heart to hide, Ye Xuan's only the eleventh aspect of the cultivation is not inductive. .

"Hey? You little doll, the source of nuclear in the brain has reached seven levels? Hey, although not a demon, but the talent of spiritual power, among the young people of the contemporary devil, no one can fight with you. Male, it is the older generation of the devils who have such talents, there are only a handful of talents!"

The old man of the gray-haired gray-haired man didn't pay attention to Mo Qigong. For the Emperor Mo's question, he didn't even look at it. The line of sight fell on Ye Xuan's body and looked up and down.

Ye Xuan Ming Ming did not feel any fluctuations in spiritual strength, but in a moment he gave birth to a feeling of being seen by the other party. Even the level of the inner nuclear core of the brain was seen by the other party.

Of course, regarding the phagocytic system in his body and the corpse lamp tattoo on his chest, the old man of the gray-haired demon is obviously completely unaware of it. The star lord is strong and strong, but it is far from strong enough to be able to and the human race science pioneer star. The horror of Bo, and the mysterious background of the headless baby corpse are comparable!

As long as the two strongest cards are not exposed, the other Ye Xuan does not matter. He is not aware of the source nuclear level at a glance.

However, listening to the meaning of the other party, among the older generations of the Devil's generation, the core of the spiritual source has reached the seventh level, and it seems that it is not a minority.

One thought of this, he suddenly changed his face, the other side can see his spiritual source nuclear level at a glance, it is absolutely impossible just because of the high level of cultivation, no doubt, his spiritual strength level should also exceed himself. That is to say, the other party is at least an eight-level source core.

Doesn't it mean that only the spirit of the first generation of the emperor reached the eighth level in the entire demonic group? As for the legendary nine, no one has ever reached it.

How can you just take out a demon person who is a senior of the devil, and you have an eight-level spiritual source?

Ye Xuan stunned, and then he shook his head and smiled. At this moment, he had doubts about the intelligence messages he had contacted about the various ethnic groups and forces in the three major planes.

The information that is known to the world is basically used to deceive people. If you believe in it, you can be stupid!

Obviously, the strong man with the eight-level source nucleus in the demon group is definitely more than the first-generation demon emperor. At least one more person is in front of him, and he has to count the old things of the mad mosquito king. Oh, right, the cockroach The spiritual core of the slaughter must be at least eight, or even nine!

I have been convinced that I have always believed in the remarks of the devil's group on the table. Now it seems that it is completely fooled.

"Hey? You still have an eight-level spiritual brand in your body? Is it that the crazy mosquito left? And... the breath of the mosquitoes and old ghosts?"

Ye Xuan just thought of the crazy mosquitoes and the mosquitoes and the old ghosts. The old gray-haired devils mentioned the two of them. His spiritual source is really at least eight, otherwise it is impossible to detect the crazy mosquitoes in Ye Xuan. The protective spiritual brand left by overseas has even smelled the wretched mosquitoes from Ye Xuan's body!

The two old guys, of course, are related to the devil's ethnic group. Even the uncle of the previous generation of the devil's royal family, a star-class grotesque who has not been known for many years, knows their existence, which can explain the problem.

Ye Xuan's eyes immediately lit up. This is the best chance to explore the secrets of the two old guys. How could he let him go?

So even when the voice asked: "Older generations, do you know the crazy mosquitoes and the wretched mosquitoes? What are the two old guys? What is the bottom?"

"Crazy mosquitoes? Hey, he is also called the emperor?"

"As for the mosquitoes and old ghosts, it is really wretched. This evaluation is correct, but dare to call him, your kid is still the first, the newborn calf..."

Seeing Ye Xuan asked, the old man of the gray-haired demon immediately pouted and listened to his tone. The evaluation of the crazy mosquito king and the wretched mosquito trap did not seem very good.

However, these Ye Xuan do not care, he only cares about the details of these two old guys.

From now on, I can hear from the old gray-haired demon man's head that I have always wanted to know the secret. I think the other person's speech is a big turn, and when the front turns, he turns over and looks at it again. Road: "As for the two old guys, although the old man knows and has seen it, but if you ask their origins and details... You ask me, who do I ask?"

"When I saw the two old guys, the old man was still a devil's younger generation. It was only a black hole, but at the time they were already the super-powerful people of the 9th-order grand sacred, even have It may be the result of the invisible cultivation. This kind of existence, how can the old man be qualified to explore their details?"

"Hey? Don't you play like this?"

When I heard this, Ye Xuan was half-cooled. He didn't expect it to be the result anyway. If he didn't ask for it, he asked, the confusion of his heart was even stronger...

Chapter 3549: Million army confrontation

Suddenly, in the city of Mo Huang, I met a star lord who knew the crazy mosquito king and the wretched mosquito, and Ye Xuan was overjoyed, thinking that he finally got the chance to explore the mysterious origin and background of these two old guys.

I didn't expect the result to hurt him.

It's better to not inquire, and the confusion in my heart is even stronger.

Originally, Ye Xuan thought that the two old guys, the crazy mosquito king and the wretched mosquito, were only the mighty power of the fifteenth world. Now it seems that this is far from being able to stop.

In the eyes of the star lord, when he was only the eighth-world black hole, the two old guys, the crazy mosquito and the wretched mosquito, were the fifteenth In order, and at that time, it is still possible to conceal the cultivation...

What is this concept?

Ye Xuan almost wants to marry her mother. How deep is the water of the two guys? The more you dig, the more you can't see it. Now, Ye Xuan has some doubts about whether they will survive the ancient times from the ancient times. They are challenged by the mysterious origins and backgrounds of these two old goods. Ye Xuan is fast. Numb!

"Kid, the two old guys are not simple. The old men of the old man were quite jealous of them. They dare not touch too much. You dare to mix with them. Be careful not to know how the last head fell."

Finally, the old man of the gray-haired demon said this to Ye Xuan. He looked strange and looked at him deeply. Then he shook his head and sighed and left.

Ye Xuan opened his mouth and felt a sulking sigh in the chest. He couldn't figure out whether it was stirred by two old guys, the crazy mosquito and the wretched mosquito, or the old man in gray who was turned away. Give the gas, in short, the claws scratched the heart, almost on the spot to lick the old blood.

As the old man of the gray-haired demon turned and left, Ye Xuan was depressed for a while, and turned to the demon emperor Mo Wentian and Mo Qigong and other two devils, the uncle, looked at the past, and did not give up and said: "The two Old guys...do you know more?"

All three looked at him with a strange look, and the head was shaking with the waves.

Ye Xuan was completely desperate, and his heart sighed. It seems that he still died this heart. Don't always think about the origins and details of the two old goods, not sad enough.

As for the warning of the old man of the gray-haired demon, Ye Xuan did not pay attention to it at all. He has his own emboldened spirit, and there is no head baby. Is he afraid?

Of course, the headless baby is more mysterious than the two old guys, including the swallowing system in his body. Since encountering other system carriers and passively receiving the first system competition, Ye Xuan There is a bit of suspicion that the phagocytic system only selects and trains talents for the human race.

However, the strength of the headless baby corpse and the phagocytic system, if they are really unfavorable to Ye Xuan, is a bomb that lurks in his body for a long time, then there is no way, with the strength of Ye Xuan, even the demining is done. To.

After being repaired to be strong, it is another matter, at least for now, there is no need to worry about it, it is a worry!

Later, Ye Xuan left the Magic Emperor Star and returned to the flagship expulsion of the Celestial Pioneer Fleet. He led the entire fleet and rushed toward the edge of the Devil's Star Field, where the two million-strong military stars confronted each other.

The 100-meter-long bastion of the Devil's group was also opened at the same time.

As for the huge spiritual warfare of 300,000 meters in diameter, it will open the hidden array in the follow-up and quietly accompany it...

The Devil's Star Field is vast, and it takes half a month from the Devil's Star to the entrance to the second-world universe.

Even in response to this star-level battle in the plane level, the Devils prepare in advance, in addition to some natural cosmic wormholes along the way, they also use some stable void cracks to build some temporary jumping wormholes. Heavy soldiers guarded, but from the magic king star field to the virtual battlefield near the wormhole, it still takes about three days.

In these three days, the pioneering forces assembled by the two camps have basically arrived, and even have been completed through the emptiness of thousands of miles. Only when the time is ripe will they be ordered and started for a million years. There is no prelude to the prelude of the plane-level star wars.

However, the top leaders of the Second Universe Federation have apparently received news that the Pioneer Fleet from the Celestial Family has entered the Devil's Field and is about to arrive at the battlefield.

After all, the celestial family is the only real hegemon of the first universe. Right now, they are facing each other with thousands of miles, but they are slaves of the celestial family.

The top leaders of the various ethnic groups from the Second Universe are self-proclaimed. They feel that the Lord has not come, and they are anxious to start their servant forces. It is really a loss of identity. First, it weakens morale. Therefore, all of them are tempted by temperament. The opposite side of the thousands of miles waited patiently.

Only when the fleet of the main celestial family came, it officially launched this plane-level star war!

The first cosmic servants of the celestial family are not all good birds, and not all slaves are like the demon, and they have a rebellious attitude toward the celestial family.

Some of these ethnic groups can even say that there is a strong servility in the bones. They are not ashamed of being a slave to the celestial family. Instead, they are proud of this. Maybe they still want to pass this starry war, so well. Please please your own master.

Therefore, when the fighting power of both camps is in place, and after the empty array of thousands of miles away, the second universe of allied coalition forces is only a quiet day, here the first cosmic slaves I can't wait.

From time to time, some strong servants of the servant group began to rush out from the camp, yelling at the opposing second-community allied forces. All kinds of ugly words were said. In short, they were degraded and degraded, reflecting their own fearlessness and openness. Provocative challenge posture.

Of course, the commander of the Pioneer Fleet of the Celestial Family, Sha Baofeng, did not arrive. They could not really dare to go to war. In fact, these guys did not think about actually playing, but they were only taking advantage of the sand. Before, I'll show myself well, hoping to earn some impressions on the sand.

The second universe of the various ethnic groups did not care about it at first. After all, they all blamed themselves, lazy and servants of the celestial family. They only waited for Sha Baofeng to arrive, and directly bombed them with a drop of water.

The helpless slaves are almost all cows and venomous snakes. Seeing this one is not screaming, and the arrogance is getting worse. The more the words are, the harder it is to hear. In the end, even dozens of hundreds of fortresses and fortresses open the starry sky system, loudly Cursed, the whole piece of void was stirred up by the smoke.

In the end, I don't know if I was irritated or irritated. The second universe and the various ethnic groups finally began to respond to some ethnic groups. The arrogance was extremely arrogant and directly called the war.

Wherein they are too angry and mad, and the first few of the universe have lost their squad. I look for various anesthesia to keep evas.

Chapter 3550: bring it on

When the two-day army reached the third day of confrontation, the first cosmic servants and all the tribes had basically all heard the sound. They just wanted to show their faces in front of the Tianzu people to make a profit. If it is true. The advancement of the war in advance, disrupted the overall strategy of Sha Daren, fearing that it will be liquidated when he turns back.

Therefore, even if the heart is really hot, the strong people of these slave servants are all ignoring each other and never responding.

As a result, the opposing families of the Second Universe were even more arrogant. The other side's first choice was now a response. It immediately smashed, which made their morale strong, and the top officials were happy to see it. They will no longer control the bundle, letting the strong men of the underarms scream through the tens of thousands of miles.

Anyway, Sha Baofeng is coming soon, and the right to encourage morale before the official war, first brewing the war and the like.

For this reason, when Ye Xuan arrived at the Pioneer Fleet of the Celestial Family on the third day of the evening, what he saw was a scene of great contrast: the opposite side of the sky, a large number of second cosmic coalition forces Like the sly daughter-in-law, they are on the street across the tens of thousands of miles of the void, and on their own camp side, the first cosmic allied forces, one by one, like the stinking little girl, the tortoise Didn't dare to scream, shivering...

In such a scene, both Chanas and Jero are looking silly. As for the other existences in the fleet, they are all intelligent robots. They have no self-awareness, and they have no emotions. They can't see the fluctuations of emotions.

As for Ye Xuan, it was angry on the spot.

Under the command of the Pioneer Fleet, the first time he crossed his own camp line and came to the forefront. Then, in the star-borne sound system of the expelled Fortress, there was a roar of his roaring thunder.

Resounding through a void: "The opposite girl from the second universe, you are not going to fight? Come, this uncle, with these smug sluts, can turn your people back to believe or not? The commanders of the ethnic group came out to speak and lined up in a row. They first smashed their buttocks high, and the grandfather took a favor and took turns to burst the chrysanthemum!"

Lying grass!

Lying grass! ! !

Starburst?

And the explosion is still the commander of the coalition of the second universe?

When Ye Xuan's words came out, the surrounding air would burst into the nest!

The commanders of the first cosmic servants of all races repented of their intestines. They knew that the Sha Daren was such a cold-hearted temperament. What pretend was it? It's just a matter of opening up with the other party, and you can still make a good impression.

Now it's good, all the servants of the servants have become the useless **** in the eyes of Sha Daren. The words that were just called 器 also specifically mentioned this word, showing how deep the belly is.

In this regard, the top leaders of the first cosmic servants of all ethnic groups suddenly became embarrassed and shy, and felt that this time they lost the face of the sand man, lost the face of the celestial family, and must look for it in the star war. These are all not found, and they must be redeemed and saved back the impression of loss.

As for the second cosmic united army in the opposite world, it is completely overwhelming.

Before the first cosmic servants of all the people, even if they yelled again, for the whole day, no one dared to mention the command of the various national fleets, because that is at least the fifteenth big world, even the flagship of the nine ethnic groups. In the middle, there are also nine star ethnic star owners sitting in the town.

I really want to mention this level of existence in the screaming words. The other party is really angry and does not mention it. It is estimated that even if a Qiang Kun can rush out, he can scream on the spot. The offender is dying.

But the Lord who suddenly came at the moment was really fierce. Once, the coalition commanders of the Second Universe all sorted out the team in the void, took off their pants and licked their ass, and let him take turns to spoil, and burst into a daisy.

Even when I opened my mouth, I swept the entire second universe. They said that they are **** and only know the street...

It's just too deceiving. It's obvious that they first opened up. In the end, it's wrong.

These thoughts flashed through my mind. The strongmen in the Second Universe coalition had a kind of dig in the pit, but they jumped on their own and enjoyed a happy anger.

In particular, the commanders of the major groups of the clan, even more sorrowful chrysanthemums, and then the heart of the fire, the most temperament of the violent war lions pioneer fleet commander, a 14th state of the world For the Golden Retriever old war lion, it is the impulse to take the flagship of the War Lions fleet and show the bleeding veins in the void.

It became a golden war lion with a body size of more than a thousand feet, and screamed at the flagship of the expulsion title of Ye Xuan...

"Roar!"

"Where is the little boy, come out to the old man, the old man and the lions command the lion to set up, dare to humiliate the old man, will definitely eat you!"

When the voice just fell, Ye Xuan's lazy voice came over, but it was not loud, but because it was said by the star-borne voice system, it was smothered by the whole piece of void, and the numerous camps of both sides listened. A real cut: "Gryphon hurts? Rely! You hurt the first one to jump out? According to this uncle, you should be a lion itching? Can you find it?"

When this sentence was exported, the sky was dead, and all the people were shocked by the opening of Ye Xuan's brain.

This is the sand man?

This is the leader of the Tianji clan, Sha Baofeng?

The celestial genius that the Tianji people have only recently turned out to be born?

One of the top five enchanting singers who are known to be the best in the world, such as the Emperor Xuanzi, the Invincible God of War, the Linghu Shaozhu, and the Nether.

I have a grass!

The degree of shamelessness can be compared with that of the Nether, but other aspects are really not seen!

The strongmen who did not wait for the camps of the two sides returned from this state of being thundered, and the lions of the Warrior Pioneers, the commander of the lions in front of the imaginary stream, had already made a sound again.

The old man is the old man. His mind is a little bit fascinating. Actually, he did not hear the fault in Ye Xuan's discourse. He still stupidly said: "Bad boy, can you not have a back? The old lion is set to spur, not a lion. Dingyang..."

In this case, in the coalition fleet of the War Lions, more than 80% of the warrior lions all raised their hands and covered their faces, and their face was covered with green. This time, they were ugly, and the family had an old antique. Can't keep up with the generations, it is really the unfortunate of the family!

It was also at this time that in the flagship of the **** clan's fleet, a snoring voice came out, and the anger was stunned: "The old lion, come back soon, this kid should be the shabaofeng, the slick tongue, play this set You are not his opponent. Besides, a yellow-haired younger generation is not qualified to talk to you. Hey, I am going to play with my own peers and teach him how to behave... Hey, they are not human, say These words are all raised!"

Hey?

Actually dare to marry this uncle is not a person?

Ye Xuan stunned, and then he was angry on the spot...
