

Super D. S 3561

Chapter 3561: Frenzy truth

The inner space of Shennong Ding, the depth of the bottom of the circular volcano in the central domain!

The Yin dynasty, the Shaozuo, who was regarded as a living medicine by Ye Xuan, was shocked by the singer, the singer of the singer, the singer of the Golden Eagle, the singer of the Golden Eagle, and the sinister wolf, who had been detained here. Blocked in the cage!

Since this time, the big devil has made the fox lord have not been here for a long time, and the stunned rainbows have passed the initial anger, especially when they see the huge lions who are the lions and lions. The lion's head was thrown in and baked, and immediately removed. This morning, it was completely smashed.

There is a feeling of accepting a life, there is no sharpness and staunchness when I was caught by Ye Xuan!

In this space of the tripod, all kinds of heaven and earth are full of aura. After all, the area around the ring volcano is planted with various treasures of heaven and earth. Although they are not mature yet, they are basically rare sights of the outside world. The heaven and earth aura is still very full.

In addition, all the auras are blocked inside the space inside the Ding, and there is no spillover. Over time, there are more than a few famous holy places in the universe.

The four people in the stunned rainbow were idle during this time. In addition to recovering their own injuries, they were diligently cultivated.

They initially held the big devil and the fox did not return. They first made a breakthrough and then tried to break the cage. In the peripherals, once the other person came, they attacked and took the opportunity to escape. .

However, when the four people broke through a small order in the near future, they still found that no matter how hard they tried, they could not shake the cage at the bottom of the volcano, even if it was in a dark cage wall. It's not good to leave a scratch on it...

The four guys were finally desperate.

This is a treasure that is ridiculous and ancient. Nowadays, it has been refining and ruling the fox. It has become a possession of the Lord. It has to be cultivated as a blessing power. It is not impossible to say that it is necessary to break the cage from the inside. It is estimated that at least the fifteenth state of the world must be cultivated.

Then have to wait until the Year of the Monkey?

Even if the fox lord is outside the body, it will not be able to give them a long time to break through the first step. Once they come in, they find that they are practicing and practicing, can you not see their thoughts?

There will be some precautions at that time!

In a word, this road does not work, it is not realistic!

In this way, the four guys have lost their lives for a while.

Just when they were entangled, I don't know where the road was, the circular crater above, suddenly a huge body of golden iron horned rhinoceros, the entire skull was pierced, covered by the celestial body to the lower jaw, a round and huge pair hole.

The four people were shocked because they recognized that this is the genius of a younger generation of the iron-horned rhinoceros. The talent is only a weaker grade than the four of them. And repair is not weak.

What's more, the skull of the golden iron horned rhinoceros is notoriously hard, more reliable than the tortoise shell of the tortoise, and its hardness exceeds the super alloy material of the main structure of the starry fortress hull.

But now it has been directly penetrated by people, seeing the wounds are neat and smooth, clearly like cutting tofu.

Not waiting for the four people to recover from the shock, the ring volcano top has once again fallen into a huge blood body that has been cut into two halves, and is also the genius of the descendants of a certain ethnic group in the second universe.

Then, after a while, the circular crater was like a dumpling, one by one, and the **** beasts were all inside. They were all the elites of the second generation of the second universe. Some of them were shocked and so on. Not only know, but even their people.

In this scene, the four people were shocked and fascinated. Under the heart, they thought that this fox lord was really a big devil. From the perspective of the group of nearly 20 unlucky guys who were thrown in, it was clear that it was a direct attack. The rhythm of the second universe!

When a really awkward life does not need to be explained, only such a thing can be done.

What surprised the four people was that the nearly 20 unlucky guys who were also thrown into Shennong Ding, except for the four or five corpses or corpses, were all seriously injured and could not die. This Shennong Ding is filled with aura, and they will recover soon.

It is a pity that all the newcomers, whether they are alive or dead, are all in the same cage as the four of them. They are locked in a cage that is automatically and automatically displayed along the bottom of the circular volcano.

I want to escape, basically there is no hope.

In fact, the four people in the stunned rainbow did not expect to escape, but it was such a long time. It was so easy to suddenly come to a dozen new recruits, but they were still alive. More than half of them

were not comatose. Frightened and looked around incessantly, the four of them suddenly came to the mood, and they greeted each other with enthusiasm.

No way, it has been closed for too long, and the original arrogant temper has long been smoothed. Now, this excited appearance is almost suspected of being crazy.

With the four people voluntarily getting up, drinking loudly, and calling out the names of some of them, the dozens of people who didn't hang, just the seriously injured, finally saw the existence of the four people, and then they Exclaimed...

Are these guys all dead? They are eaten by the fox lord..."

"Oh, God, are we dead like this? But it shouldn't be, before the sky is dizzy, I clearly remember that my injury is far from being killed on the spot!"

"Don't dream of a brother, you can see a few stunned rainbows and horns. Can you still have a fake? I didn't expect the legendary sac to be like this, but it is a bit like, at least in the underground... .."

This discourse made the stunned four people angry, what do you mean, seeing yourself four proves that you are in prison? This is particularly clear that it is a curse.

No, the bend has not been turned, one is too red fruit, and there is no cover at all!

Under the wrath, the four men immediately roared. They are the young patriarchs of the top ten ethnic groups. In the circle of the younger generations of the second universe, the status and identity of the new recruits are obviously higher than those of the new recruits. , fully qualified for this.

After some confusion, both sides figured out what happened, and then all exclaimed. For a time, the vast plain at the bottom of the circular volcano was completely shrouded in a frenzied atmosphere.

"What? Didn't you die that day? Just being detained by the fox lord? Is it actually the drug king of the fox?"

"Shrimp? The fifth-largest enchanting Sha Baofeng of the Tianji family? How is this possible? How can the king of the fox, the king of medicine, be on him? You know, this trip has long been refining the fox. If it is in the middle of the journey, this treasure owner, falling in the hands of Sha Baofeng, re-refined once, how can I wait in Ding for no induction?"

"Yeah, it wouldn't be the same person? But on that day they had a clear battle, it was a mess, and it was completely chaotic..."

Chapter 3562: Gorgeous starry sky

The first universe, the edge of the devil's star field, the two universe planes to launch the battlefield of the Star Wars!

In less than a minute, the alloy **** of war is full of enthusiasm, killing more than 30 of the geniuses of the ancestors of the second generation of the universe, and in the blink of an eye, the two camps are facing each other. The center of the void has been deserted.

In addition to the shape of the mountain, like an invincible King Kong-like alloy God of War, there is no longer any figure.

At this time, Ye Xuan did not know that the nearly 20 dead or injured unlucky guys had caused a strong fear and confusion after being thrown into the inner space of Shennong Ding.

He simply has no time to take care of those, because Ye Xuan knows that the real Star Wars is coming soon!

The strong men of the two sides, who are far away from each other, are already stunned by the means of the alloy **** of war. All of them are shocked and can hardly believe the facts at hand.

Before Ye Xuan released his words, claiming to be invincible under the stars in the same generation.

At the time, no one believed this sentence at the time, but now it seems that this is very likely to be a fact, even if it is a little bit hydrated, it is absolutely impossible.

This guy is absolutely able to share the same name with the four emperors, the invincible **** of war, the younger fox and the lesser, and the demeanour of the younger generation.

Just the battle just now is enough to prove it!

Only the war and the old ghost and the eyebrowless ancestors sneered, exchanged a look, and secretly confessed: What are the five great enchanting? At the root is a person!

In a short period of time, it has suppressed dozens of descendants of the Second Universe of the Second Universe, and there are more deaths and injuries. This record makes the younger generations of the younger generation of the two camps all very shy.

The two emperors of the immortal dynasty, Long Xiao, the little princess of the Choi Sui, Medusa and others even sighed. Although they were unwilling, they could not afford any temper.

Even Jero, who has already been suspicious of Ye Xuan's birth, can't admire it after seeing such a result. No matter whether the identity of this guy is a problem or not, it's just a form of war god, it's really awkward. It is.

It has already retired to his own camp, and entered the chasing of a Devil's Wanmi Fort. It was as excited as he had just hit a needle of chicken blood. He jumped up and down, and no one was more excited than him.

He stayed with the adults of the sand all the way to the present, and there is even a common secret between them. This is definitely a comrade-in-arms.

Through the war of talents, the foundation of Sha Daren has been completely consolidated. As long as the city of Tianji is in a hurry, it will take immediate responsibility to become the young patriarch of the entire Tianzu nationality, but then the patriarch of the future, with his Enchanting, how could it be like the emperor Shaofeng that the same goods died in the middle?

In this way, I am simply a big red man next to the patriarch of the Tianji nationality. Under one person, over ten thousand people... I think that the whole person is drifting away!

In stark contrast to this, it is the second space coalition camp opposite 100,000 miles away!

Almost at the moment when Ye Xuan took the last seriously injured hapless income to Shennong Ding, the flagship of a huge fleet of the Second Universe Coalition camp immediately rang the crazy roar of the various ethnic groups.

"Roar!"

"Sha Baofeng, a shameless child, has taken away the wreckage of my family and the squad, and wants to bake. Are you going to cause public anger?"

"I will hand over all the prisoners of war immediately, whether it is dead or alive, one cannot be less!"

"Otherwise, we will start the war immediately. We will definitely level the first universe and cover the heavenly family!"

"Roar....."

The roar and roar of this road are all from the fifteenth dynasty of the various ethnic groups. The nine star owners in the flagship of the nine ethnic groups do not express their views, nor will they scream. This level of conflict Not enough to alarm them.

Even so, the anger of a dozen of great powers is amazing enough.

As this roar came out, more than a dozen powerful abilities of Qiankun's powers swept through their respective fortresses, and they bombarded the peerless and independent stalwarts of the central alloy warriors in the region.

This is clearly intended to take advantage of this opportunity, in the chaos, Ye Xuan directly kills the rhythm of the scene, at least vented anger, and not only saved the face of the second universe, but also allowed the other side to camp this huge pioneer fleet Losing the commander and temporarily falling into chaos.

Then, in the face of the comprehensive raid of the second space coalition that followed, the first battle of this plane-level star wars, in all likelihood, will end with the great aggression of the second universe!

This will greatly boost morale and have an inestimable influence on the subsequent wars!

This is the final calculation of the group of Qiankun people of the Second Universe. As for the life and death of the dozens of previous generations, although they are also concerned, it is really impossible to save too much, save and save. If you can't, you will die if you die.

Anyway, although there are more than 30 people, but they are distributed among the ethnic groups. At most, each ethnic group is a loss of a younger generation. It is irrelevant!

For the calculation of these old guys, Ye Xuan has already seen through it. At this moment, there is a roaring voice coming from the opposite camp. The void is trembled by the earthquake. He has no hesitation at all, even if he turns back and withdraws, his figure Turned into a streamer rushing to his own camp, and at the same time with Sha Baofeng's electronic consciousness, to the flagship of all slave groups in his own camp, unified the command of immediate volley, full bombardment.

In a moment, his body shape has already been far away. Through the roaring roaring machine, he wants to leave Ye Xuan in the battlefield's central domain. The dozens of sensible storms of consciousness are all slowed down by Ye Xuan. .

It is also at this time that among the camps of the First Universe and millions of troops, all the warships, whether it is a star of three kilometers, or a starry sky fortress of 5,000 or 10,000 meters, or 50,000 meters or 100,000 The star-shaped fortress of the diameter of the meter, almost at the same time, all the muzzle baffles on the hull, all rumbling open.

Immediately afterwards, the major fleets of the Second Universe, which had not been waiting for 100,000 miles, reacted. Nearly a million large-scale warships and fortresses and fortresses launched a round of volleys.

In the sky, like the fireworks, millions of miles of the vast star river, are illuminated at this moment, gorgeous.

In fact, for those three-kilometer captains of the star-rated warships, their ship-borne main guns could not reach 100,000 miles, which means that they could not reach the opposite camp.

The reason why Ye Xuan let all the warships fire all the guns, including the three-star constant star rating, is not missing this point, but feels that it is also the enemy's resources, and has a half-money relationship with himself? When you look at it, you can see a magnificent starry sky fireworks...

Chapter 3563: Missing opportunity

"boom!"

"Booming!"

"boom....."

The small half of the devil's star field was alarmed, and the rumble of thunderous bangs swayed into the void.

At the moment before the other side's camp had not yet responded, Ye Xuan had already taken the initiative to issue a full-scale bombardment. The entire Pioneer Fleet joined forces with the fleet of the slaves of the First Universe to launch a volley command!

One kilometer of star rating, three kilometers of star rating, five kilometers of small fortress, 10,000 meters of big fortress!

Together with more than 300 small fortresses of 50,000 meters, especially the anti-material dead light cannons of 100,000 meters in diameter, the energy beam is 20,000 meters in diameter...

At this time, the sky whizzed away, and the blink of an eye would illuminate most of the sky.

This is a nearly one million models of warships firing at the same time, the scene is too grand, not only the strong among the federal fleets from the first universe, the first cosmic coalition forces inside the first universe The same is true of the strong.

After all, this star-level battle of the plane level, the last time it broke out, was before tens of thousands of years.

All the people were shocked by this scene.

For a time, the fleet from the second universe of the two universes did not have the right response.

Although the two camps are separated by a universe of ten thousand miles, but for the energy beam of various ship-borne guns, this short distance of 100,000 miles, really does not need any time to be able to directly cross, Time is almost negligible.

Thus, in the opposite camps of 100,000 miles away, some warships were damaged or destroyed.

"Booming!"

"boom!"

Huge bombardment sounds came from the opposite camp, and some of the first battleships were still able to support the ship's energy shield in the future, and they were hit by the energy light column that whizzed.

In particular, the more than a hundred of the guys who were hit by the energy beam shot from the main fortress of this big fortress ship, the first time they had a cup.

This is the anti-matter energy dead light cannon of 100,000 meters in diameter and large fortress. The energy beam of a dead light cannon is 20,000 meters in diameter. If it hits the 10,000-meter-high castle, it will directly vaporize and make it disappear instantly.

The small fortress of 50,000 meters in diameter was hit, and it was necessary to leave a huge pair of holes that occupied the hull's total volume. It lost its power and was wiped out on the spot.

Even a large fortress with a diameter of 100,000 meters was hit, and it would have to be delaminated without dying...

The huge roaring echoes, just a short amount of interest, opposite the nearly one million ships from the Second Universe Federation, and the hundreds of ships in the forefront have blasted directly.

How many traumas have been affected, and the types of warships that have affected the combat power are as many as tens of thousands. The whole void has been completely illuminated. The dark universe is like a white, no smoke, but it is a fierce The breath of the pole.

Then, among the flagships of the Second Fleet of the Commonwealth of the Commonwealth, the roar of the angry and desperate people of all ethnic groups was heard.

Soon, the chaos in the opposite camp became a mess. A large number of ships rioted, moving the position to dodge the energy beam that was still continually blasting, and at the same time try to open the energy shield first.

Previously, they actually had already stored energy early, but it was not a ship-borne energy shield, but a ship-borne artillery system, because according to the plan of the old people of the various ethnic groups, once more than a dozen Qiang Kun could roar The chaos will kill the opponent's fleet commander, the alloy warrior.

Then, in the next moment, this huge fleet of pioneers from the second universe of the Commonwealth will be bombarded and volleyed like the first cosmic slaves of the current universe.

Unfortunately, although they are all ready, but in the end they still can not grasp the first opportunity, the alloy **** of war is too sinister, here is the third generation of the second universe of the various generations of the genius, even killing, the end actually The large units in the rear have already been stored, and the overall volley of the entire fleet will be launched immediately.

The same abacus will be used, but the second universe of allied coalition fleets that have not been decisively attacked will kill the individual.

Killing and decisive, heart and poison!

This guy is simply poisonous. The city is too deep. The townsmen of the second universe of the two universes are counted, and they have lost their chances.

At this level of starry sky wars, opportunities can be described as fleeting, often with an immeasurable effect on the final outcome.

For example, now, although all the warships of the second universe of the Commonwealth have already been stored, but in the face of the other party's overall volley, the commander of his own side has not been able to respond within two or three, then they Passively broke into the passive.

Even though the old guys finally roared, some of the warships and fortresses in the Second Universe's various ethnic groups also counterattacked in the first place, but this sporadic attack and the opposite The entire camp of millions of warships has a rhythm and volley, how can the effects in terms of lethality, deterrence and suppression be the same?

What's more, due to the explosion of a large number of warships and fortifications, and the destruction of the damage, the commanders of some warships have subconsciously issued the command to fully support the energy-borne shipboard defense system and support the energy shield as soon as possible. I simply couldn't take it back immediately...

It is precisely because of these factors that the war has just begun, and the situation on the battlefield has inextricably formed a polarization.

Here, all the warships and fortresses and fortresses of the first cosmic slaves, nearly a million ships, all steadily maintain the camp, not only propped up the energy shield, but also continue to launch one after another. The wave is very rhythmic and the overall volley, the firepower is too fierce, and has always maintained the suppression effect.

And the coalition camps of the various races from the Second Universe, although there are also nearly a million kinds of warships, but at the moment they have become a mess, the command of the command layer is issued, but in this comprehensive counterattack, at the same time Before the instructions were issued, hundreds of warships had already exploded, and tens of thousands of warships had been damaged. More than half of the warships subconsciously began to fully recharge the shipboard defense system, and there was no innocent attack.

Therefore, the million ships, at this moment, launched a counterattack, the formation of which is only a chaotic bombardment, although the giant anti-matter energy shotguns from some 100,000-meter-diameter fortresses are also in the first universe in the first time. The servants of the various nationalities have caused casualties here, but that is only a minority, and it will not affect the overall situation.

From the very beginning, the battle has shown a one-sided trend, but the other side of the million warships volley, and there are actually three-kilometer star-rated warships whose range is less than 100,000 miles away. Maintain a rhythmic bombardment.

These constant stars can't hit the enemy, just aim at some small stars in the middle of the two camps to practice the star-level directional target, and get some gorgeous fireworks!

So easy and comfortable, I saw a lot of strong people in the Second Universe, and they almost burst into tears...

Chapter 3564: Suicide jump

As the first battle finally unfolded, the three observing castles from the third universe behind the Second Universe's Allied Forces immediately rang the sound of cursing.

Whether it is the Zunlong Temple, which represents the headquarters of the Federal Government of Varo, or the royal family of the immortal dynasty, or the sacred palace of the Imperial Palace, which represents the Tenth Heaven Palace, even including the war battalion and the eyebrowless ancestors. Everyone, including others, yelled.

After all, they are also reluctant to see the Second Universe losing in this battle. More importantly, in that case, it will turn into a savage savage for the Shaba Maple commander of the Tianji Pioneer Fleet, and the climate will be even more Even, once he was mixed into the position of the patriarch of the celestial family, I was afraid that it would be more difficult to deal with in the future.

With his ability and means, he really wants to become the deputy patriarch of the Tianji nationality. The various resources and resources of the tribe must not be reduced to the resources for his growth.

"Damn, the clan of the second universe of the various ethnic groups are all in their minds? Actually, this is occupied by the enemy!"

"It's too stupid. Can't you see how slippery the guy is? I've stepped on the temperament of more than 30 of the descendants of the various ethnic groups. The rhythm is too obvious. It is clearly deliberate. It was only in the depth of the enemy..."

"The situation is not good. The huge fleet of millions of scales has been tossed out in the hands of the old guys. If it is in the dynasty, the commander must be on the spot!"

"Hey! I'm mad at the old man. A group of guys who don't understand the art of commanding, a good overall camp, are now being made into a rabble. Here, bombard the defense there, saying good command and unified dispatch?"

"There is nothing in my mind! The first opportunity has been lost. The situation is fixed. What you can do now is to try to stabilize the rhythm, and then find a way to disrupt the other party's camp, otherwise there will be no chance to reverse the turnaround."

"Look at how they deal with it. Presumably, in terms of creating chaos, there should be some unique means for the various ethnic groups who don't have a long brain. Otherwise, there is really no need to continue this battle..."

.....

With the roaring of the three observations from the third universe, the huge second-class cosmic coalition forces in the front gradually passed the initial chaos and paid the damage cost of 70,000 models of warships. Stabilized.

All the warships have successfully propped up the energy shield, so that the casualties will be small, and it is impossible for the previous death to be hundreds of thousands.

After all, with the energy shield of the shipboard defense system, as long as it is not anti-matter dead, almost all other ship-borne energy artillery has a certain defensive buffer capacity, even if it is damaged to the hull, it is extremely limited. .

This is also the reason for the star-level war at the plane level. Once the battle is over, it is the reason for several years or even dozens of years. On the one hand, there are too many warships to fight, on the other hand, there are defensive light shields from home, as long as they are not sneak attacks, The battle-to-loss ratio is still very small, and both sides have a very strong ability to sustain the battle!

After the casualties and war damages were alleviated, the counterattacks of the Second Universe's coalition forces quickly returned to normal, and the initial chaos was caused by scattered energy light pillars. Later, finally formed with the opposite camp. The roughly rhythmic overall volley, after a wave of waves, the battle between the two sides is in full swing, the whole hollow of the void has not been quiet, and has been banging.

Then, from the two camps of the huge army of the Second Universe, there were some small fortresses with special use and even a large fortress with a diameter of 100,000 meters. They rushed into the battlefield from the two sides and wanted to get close to each other. Implement some kind of war plan.

After all, although both sides have stabilized the offensive, in terms of the overall situation, the Second Universe coalition is basically being crushed, and they must break this unfavorable situation.

It is a pity that Ye Xuan is not blind. He quickly saw the other party's strategy. He immediately mobilized dozens of big fortresses, focused on these assault warships, and soon hit them all back, and did not dare to take the lead.

Although the 100,000-mile void is not too far away, it is obviously not an easy task to create a chaos in the enemy camp if you want to cross the past and create a chaos in the enemy's light-filled void.

After the plan was aborted, the Second Universe and Allied Coalition Forces quickly launched the second wave of small and medium-scale operations.

More than a dozen suicidal 10,000-meter-long berths directly launched space leaps across the 100,000-mile void, suddenly appearing in the camp of the first universe of all ethnic groups, and then launched a full-scale blast at the first time.

Although there are several suicide-style big fort, because the nearby big fortress was discovered in time, the 20,000-meter-diameter antimatter dead light gun energy beam was directly smeared and the self-destruction crisis was lifted, but there were still four big castles successfully attacked. .

"boom!"

"Booming..."

A huge roar sounded, and in the huge camp of the first cosmic slaves and allied coalitions, four huge fireballs were blasted. This suicide-type giant fort was loaded with a large amount of high-equivalent explosive energy. A small area around the star is affected.

In an instant, surrounded by the huge fireballs of these four regiments, thousands of battleships of various warships have been wounded, but there are energy shields to support them, otherwise they will be blown up on the spot.

Ye Xuan was in a hurry. He didn't expect the other party to have such a trick. It was a terrorist attack. Are the guys from the second universe all crazy? Not at all.

This is only the ten big fortresses in the first round. If there are a few more waves, the entire huge first space fleet camp will be completely disrupted.

Under the chaos, Ye Xuan even issued a new order.

"Immediately mobilize the 100-meter-long Fort of the 100-day celestial family, and expand the space in the same way, enter the enemy camp, and start to blow!"

"Oh, next door, is it better? This uncle's big fort is not a person at all, all intelligent robots, to see who is better than who..."

Of course, there is still a sentence he did not dare to say, that is, even if all of them are people, this uncle will not feel bad, more dead and more deflated, anyway, now the two sides camp, all of them are the enemy of Laozi, the most It's a good idea to fight together!

"Hey!"

"Hey!"

.....

A whistling sound of a vacant sound, a hundred blocks filled with a lot of high-explosive energy, completely controlled by intelligent robots, the first 10,000 meters in the camp, disappeared in the first camp, when it reappeared, it has reached 100,000 In the enemy camp inside and outside, and in the first time began a self-destruction.

At the same time, Ye Xuan also extended to the rear of his own camp with spiritual strength, secretly contacting the star-studded killer of the devil's group---spiritual war!

This is specially prepared for the flagship of the opposing camp, and it will soon roar...

Chapter 3565: War is roaring

"boom!"

"Booming..."

One hundred thousand meters of the Great Fortress jumped directly and across the 100,000-mile void, appeared in the Second Universe and allied coalition forces, and then launched a comprehensive self-destruction.

The rumble of the rumble was repeated, and a hundred fireballs exploded. Even though all the warships of the Second Universe and Allied Forces had already propped up the energy shield, it was too much to jump into the Wanmi Fort. More, a lot of warships were affected at the same time, and the warships and fortresses that were directly destroyed and disintegrated reached thousands of ships, which was a heavy loss.

This scene exclaimed the flagship of the various ethnic groups sitting in the town, they are preparing to order a second round of suicide raids, did not expect the other side to kill more decisive, the same kind of learning will be considered, actually still intensified, One shot is a hundred million meters of big fort, completely disrupting their rhythm.

Behind the camp, the three observatory castles from the Third Universe, the roar of the Governor of the Federal Institute of Supervision, and other people's voices rang again...

"Pig! Actually and the Celestials are more self-destructive than suicidal jumping? Can you compare the number of warships to the Celestial family? All the people of the family are born to be warship manufacturing experts!"

"In addition, all the suicide-style big castles in the family are all intelligent robots. They don't hurt the roots at all. This is the resource storage of the people's flesh and blood to fight people's lives. It's not worthwhile."

"Either you make a special one? Once you get a thousand suicide-style big castles in the past, you can basically determine the battle situation, but you are distressed. You have a ten-seat. Is this a play-home? Now it's good. , being rebelled against the army..."

"This round has been defeated. Suicide-style jumping and self-destruction will stop here. It is impossible to have follow-up. Both sides will open a directional space turbulence system to block the frontal void, so that the suicide-type big fort can not make a jump..."

"Hey, how good a sneak attack opportunity, eventually fell into the wind and suffered a loss. The problem of the command layer is too big. The other party is obviously a unified command. After all, the Tianzu people are the only hegemon in the first universe, and other slaves. They all bowed their heads, and a destructive commander of the Tianji nationality can guarantee the unity between the attack and defense of the entire camp."

"On the contrary, everyone in the Second Universe Coalition is an equal ethnic group. Even the nine large ethnic groups participating in the war are all mutually restrained and restricted. It is impossible to form a unified dispatching command. It is like a leaping self-destructive sneak attack. It is clear that all ethnic groups do not want to lose the tribe, which led to the first round of only ten suicides. If there are more points, not a thousand, even if there are three or five hundred, the overall situation can be determined. It is."

"It's a pity..."

.....

At the same time, the battleground between the two camps, with the 100-year-old suicide-style 10,000-meter-long fortune blasted by the Tianji nationality, the second-complex coalition army, which suffered heavy losses, immediately had some 50,000 meters and The 100,000-meter-size fortress opened the shipborne space oscillator and formed an invisible vacant zone in front of the fleet camp to prevent the suicide jump of the other side from coming again.

But the same, this also cut off the possibility that they will use this way to attack each other again!

In general, this wave of sneak attacks, the Second Cosmic Coalition camp completely failed, not only did not cause chaos to the other side, but instead lifted the stone and smashed their feet, so that the second cosmic coalition camp faced the form, more obvious Not good!

Vague, even has affected morale!

Faced with this situation, among the flagships of the various national fleets in the Second Universe, the various ethnic groups in the Qiankun family calmed down and did not start any follow-up actions.

But they obviously can't give up on this.

In this battle, they must achieve a certain degree of victory, at least to push their own huge fleet to the other side of the Devil's Star, which is equivalent to occupying the entire Devil's Star.

This is also the death order given to them by the old geeks of all ethnic groups. Only in this way can the follow-up forces of the various ethnic groups come to occupy a certain advantage.

Only in this way can we ensure that in the subsequent wars, let our own fleet slowly advance step by step until the evil source of the Tianji national base camp!

There, it is the ultimate goal of the Second Universe Alliance to set off this plane-level war!

Instead of the so-called Tianji National Base Camp---Tianji City!

Of course, there are still few people who know all of this at the moment, except for the nine star owners who are sitting in the flagship of the Nine Major Groups of the Second Universe, even the Qiankun people who are in charge of the command of the major ethnic fleets. I don't know.

But although they do not know the ultimate purpose of this war, they are clear about their mission.

Faced with this unfavorable battle at the moment, the Qiankun people of all ethnic groups have no choice. In any case, they must turn around the tide. The first battle between the two frontier fleets, even if they cannot reinvent the enemy, must at least Reversing the current unfavorable situation, in order to temporarily break the gold medal, adjust the strategy, and then continue the second battle.

However, from this point of view, from the current situation, it is obviously impossible to achieve the conventional star warfare. At the crucial moment, the Qiankun people of the second universe have bitten their teeth and reached a consensus at the first time.

"Expanding the big-level raids of Qiankun, the other side's Pioneer fleet has more than 100 100,000-meter-high fortresses. I am waiting for the power of 20 Qiankun. If each person solves two, it will make the other party's high-end power break. half!"

"Yes, this is equivalent to turning around, and this breakthrough can be used as the end of this first battle!"

"As long as it succeeds, we will adjust to the second battle afterwards. We will gain a repressive advantage from the beginning..."

"Although it is a 100,000-meter-large fortress, if you dispatch 20 talents, you can take a handful of them. The other party can't take effective and targeted measures. The mission of two big fortresses is still very high. It is possible to complete more than 50%!"

"This is worth a fight. I have two **** people..."

"Two Qingpeng people!"

"The War Lions have a Qiankun old man who is healing the Lions, but only one!"

"One of my family!"

.....

Soon, the old guys reached a comprehensive consensus, and the 20 talents who were able to shoot the talents soon became full.

Then, under the unpreparedness of everyone, the twenty-seven figure walked out from the fortresses at the same time, and they were transformed into a superb stream, and they rushed toward the opposite camp.

Seeing this scene, Ye Xuan suddenly laughed and gave a new order to the commanders of several slave servants in the central camp of the camp that had already been informed beforehand: "All the ships of your family will immediately jump to the two squads, let A way out, hey, the wonderful moment is coming, the battle is going to roar the starry sky..."

Chapter 3566: Void collapse

For Ye Xuan's instructions, the fleet commanders of the first cosmic slaves in the central area of the camp were very confused.

The battle of the own camp is very stable, and the offensive and defensive order is in order. If there is no accident, the first battle of this war is basically able to determine the results.

But now suddenly there is such a large area in the central area, and all the ships of several ethnic groups have stopped attacking and jumping to the two wings. It is bound to have a certain impact on the favorable situation. It is unwise.

But they did not dare to question anything. At this point, the Tianji clan is the only hegemon of the first universe. Once the fleet forces are organized to carry out this level of starry sky warfare, the absolute superiority of the command level is revealed.

Of course, although the fleet commanders of these slave servants did not know what medicine was sold in Ye Xuan's gourd, they could basically guess that he must have a new arrangement, and the movement was absolutely insignificant.

The instructions were conveyed at the first time, and the fleets of these slave servants stopped attacking, fully expanded their space, and moved to the wings of their own camp.

In the blink of an eye, the central area of the first cosmic giant camp line, there is a vast passage hundreds of miles away, nothing is empty, but in fact, the magic man who has always been in the dark behind the camp The ethnic spiritual warfare is slowly advancing at this time and entering this blank area that has just been vacated.

For all of this, the commanders of the Second Universe fleet in the opposite camp all saw the truth. Of course, what they saw was that only the fleets of the slave servants jumped and moved a huge starry sky. The passage, but for the entry of the spiritual war, is not known.

Originally, this kind of monster entered the battlefield. Even if you carefully watched it and then concealed the breath of energy fluctuations, you could still detect some traces of the beads. But at the moment, there is a space in front of the second universe camp that prevents the suicide jumping big sneak attack. The turbulence barrier layer also cut off the possibility of their camp's internal warships monitoring the energy fluctuations of Ye Xuan.

Therefore, until the spiritual warfare entered the void passage in just ten seconds, it was completely in place, and its existence was still not exposed!

All of this is long, but in fact it is only a dozen or so breathing time. At this time, the 20 figures that rushed out from the second space coalition camp in the opposite side have all entered the virtual

battlefield. At the same time, while still needing to avoid the dense rain-like gun energy beam, the speed was affected.

Otherwise, Qiankun can go all out, just a hundred thousand miles away, can you take more than a dozen breaths?

For the anomalous behavior of Ye Xuan's camp, these 20 Qiankun abilities are all in the eyes. I don't know why, all the people inexplicably gave birth to a kind of unpredictable hunch, and the scalp is faintly numb.

Subconsciously, the speed of their advancement was slightly slower, and at the same time they secretly communicated with each other.

"What is the situation? It's a bit like a rhythm to enlarge the move. We're going to go over it, willn't it be a dish?"

"There is really something wrong. The old man has a kind of unpredictable feeling. The commander of the other camp, Sha Baofeng, is not simple. He is decisive and decisive at a young age. He is afraid that there is really a strong back-hand preparation and he has to guard against it!"

"Don't hesitate, don't forget that I am waiting for the mighty power of the fifteenth world. Even if he is doing a great job, he will be able to withdraw it. It will not be a task. Do you want to leave me?"

"Yes, the other party saw me waiting for the shots. It is very likely that the empty city plan under helplessness is simply trying to swindle chicken!"

"Get out, two big fortresses per person, evacuate immediately after completion, in case something changes..."

After some exchanges, the 20 Qiankun people from the second universe and the various ethnic groups will have a heart-to-heart, speed suddenly mentioned, and they will have to split their actions and launch a raid on the vast camp line of the first universe slaves. .

If it is really let them get close and spread out to rush to one hundred more hundred thousand meters of star fortress in their own camp, then the result of this war is basically no suspense.

Although the first cosmic servants also have great powers, but like this pioneer fleet, basically there will not be too many ethnic groups to send Qiang Kun to come over, but also to follow the main fleet.

What's more, Ye Xuan did not mean this at all. At this moment, seeing these twenty figures will be scattered, and his mouth will suddenly show a cruel sneer, whispering to himself: "Hey, this feeling It's really not a wonderful thing to do, to control the life and death of Qiankun's power, hey, play this time..."

At the same time as his mouth whispered, Ye Xuan first got in touch with the devil's clan in the central area of the camp with his spiritual strength, to the devil's star who was at the core of the killer. The Lord blame passed the signal of immediate shot!

The other party did not answer, but did the best response with action!

"Hey!"

"Hey..."

Suddenly, the faint emptiness of the virtual whistling sounds, the effect is far more than the movement of a large number of emptiness oscillators at the same time. Ye Xuan even has an illusion, the whole vast expanse of the devil's star field, all in this sudden Under the high frequency humming, it trembled.

Not waiting for him to react, the vast field of hundreds of miles wide in the central area of his own camp suddenly appeared a terrible behemoth.

A super starry big horn, the largest diameter of the bell mouth, actually reached 300,000 meters, that is, six hundred miles away, the entire vast central channel, are occupied more than two-thirds!

Of course, this is just the bell mouth. It extends backwards along the bell mouth. It is getting smaller and smaller, and it is deferred in one layer. Each layer is a big circle. It consists of countless honeycomb nodes. A quirky pipe made of special materials is connected.

Although I have already seen the spiritual warfare of the Devils, I can see it again and again, and Ye Xuan's heart still has a strong feeling of shock.

Even he is like this, and there is no need to say anything else.

There was a scream of exclamation in the fleet of the first cosmic slaves in the own camp, especially in the ship of the Second Universe coalition. The only difference was the tone.

The exclamation from the own camp has ecstasy, because this big guy knows that it must be powerful at first glance.

The exclamations in the other camp were full of sorrow, because they also realized this.

At the same time as this road or the surprise or the scream of exclamation resounded together, the spiritual warfare that suddenly appeared in shape was also fully launched at this moment.

Power is too horrible, an invisible spiritual storm, in a short moment, collapsed a large piece of void...

Chapter 3567: Powerful Fallen Sixty Seven

"Hey, my mom, is there an illusion? It's a big big horn, it's in the central area of our own camp..."

"Look, the sand man really has a backhand. Although this style is a bit boring, but it is big, at first glance, it must be the existence of the star-killer level!"

"There is no doubt that the battle has been fixed, and the sand giants have sacrificed the hidden big killers. This is the rhythm of a hammer!"

"What happened? What is the big guy opposite?"

"It's not good, it's going to be a big deal, the shape is so strange, the size is so huge, this big horn is absolutely impossible, stop attacking immediately, run the energy shield at full load!"

"Retreat! Retreat immediately, old guys, action canceled, come back soon..."

.....

The spiritual warfare of the devil's group appeared, and the camps of both sides immediately exploded the pot. All the people exclaimed and screamed, and the whole piece of void was chaotic.

As for the 20 Qiankun old people from the second universe, they were just like an appointment. They were all in a stagnation, and they looked at the giant horn that suddenly appeared.

If they said that they had only a faint hunch in the vagueness, then at the moment, the 20th and fifteenth world's great powers are all exceptions. All of them are scalp and numb. It's cold!

One of the top three forces in the universe, in addition to the immortal dynasty of the Tianji and Terran science and technology camps, with a super fortress of more than 100,000 meters in diameter, there are only ten heavenly palaces of the Terran camp. It is said that there are one or two pieces. Although it is not a technological product, its size is as large as a battle boat with a diameter of more than 100,000 meters!

All other forces, including all the federal groups in the Second Universe, the largest war machine they have ever seen, whether it is a science and technology warship or a magic weapon for the repair system, is no more than 100,000 meters in diameter.

In front of me, there is such a big guy, the diameter of 300,000 meters, it is terrible, just the bells of others, can swallow the three 100,000-meter-diameter large fortresses side by side.

This kind of terrorist war machine, Wei Neng will be small?

After realizing this, the 20 Qiankun omnipotent instantly dispelled the idea of continuing to carry out the raid mission, and the body shape immediately wanted to leave.

Some people are deploying teleports, so although the risk is high, because the virtual sky is full of interweaving gunfire energy light columns, in the event of a teleport, the body shape appears directly, and it is directly hit by an anti-material dead light gun. The body, I am afraid that I will get a cup on the spot.

But at least, this can escape the trumpet of this horrible big horn as soon as possible, facing the void of aiming.

Some have adopted a more conservative and secure evacuation method, but they have not started teleportation, but they have accelerated their body shape and danced in the energy-light column of the gunfire, which is like a rain, and speeded away as far as possible...

However, all of this is obviously in vain!

Because at this moment, the spiritual war, finally roared!

The whole psychic warfare has a total of eighteen ring-shaped rings of varying sizes, each with a strange pipe of special material, and the number of three-kilometer honeycomb nodes on each ring is also They are all different. In total, there are thousands of them.

In each of the three-kilometer-diameter honeycomb nodes, there are tens of thousands of magical strongmen at the moment, hovering to the ground, followed by the eyes, fully stimulating the spiritual source of the brain, and commanding the town in each hive node. Under the guidance of the devil, the spiritual power that is stirred out is transmitted.

Thousands of honeycomb nodes, thousands of spiritual powers like the river, all along the pipeline, all flocked to the core nodes of the core circle, and then, under the sudden anger of the Lord of the Devils, Like a tsunami, it will completely collapse in an instant...

"Roar!"

The huge roar is deafening, and there is an invisible tidal wave like a starry sky. It vents out from the core node, and continues to enlarge along the outer nine-layer ring of the spirit war. An invisible force that plunges into the sea, in an instant, will be completely facing the huge void of the huge trumpet... all completely collapsed!

"Oh la la..."

"boom!"

"Booming!"

The sound of a clear, cracking sound like a rainy road was overwhelming, and a void of hundreds of thousands of miles was torn by inch, and a large number of empties of emptiness flowed out, several of which were large void cracks, a large number of The emptiness of the void is a direct formation of a hollow vortex like a black hole.

There are three such emptiness vortices in total, all located in front of the huge trumpet facing the void, separated by a distance.

The first time when Leng Ding suddenly appeared, these three horrible vortexes of vain swallowed countless energy beams of naval guns, and at the same time, the figure of the six or seven dynasties was so powerful that even the terrorist forces they could not compete with The sucking, the blink of an eye did not enter the three vaginal whirlpools, completely disappeared!

In a short half-time, the 20 great powers will fall by a half, so the horrible power will scare the countless powers in both camps.

Ye Xuan, all of them were stunned by the back of this scene!

Originally, he thought that this star-studded killer from the Devil's group could help him to annihilate one or two of the great powers. Even after all, the fifteenth world's great powers are basically three major cosmic planes. All the top forces are placed in the strongest power in front of the stage.

The existence of this level is unlikely to result in large-scale degeneration, which will lead to a major earthquake in three major planes, and the endless universe of voids will tremble!

However, this horrific scene has not only appeared, but it has also been ruined. The six or seven fifteenth worlds of great powers, even the ability and opportunity to resist, have been completely wiped out.

Of course, this is not all the power of spiritual warfare. The key is the three vaginal whirlpools. That kind of power belongs to this universe of voids. It belongs to the non-human resistance of nature, and the power of heaven and earth. May be resisted?

This is also why some of the three major planes are star-studded, and that is why Qiankun's might not dare to get involved easily.

Qiankun is powerful, but in the face of nature's great power, in fact, it can only be regarded as a cock!

In a short period of time, the spiritual warfare has already achieved the horror results far beyond that expected by Ye Xuan. Perhaps even the star of the demon king in the core node of the battle is not expected. There is such a power. After all, this kind of spiritual warfare, the entire demonic group is also the first use.

But all this is obviously far from over. The invisible horror of the storm is roaring away. This is just the departure of the giant lama of spiritual warfare. Everything can only be said that it has just begun!

In this way, in the scream of the innumerable strongmen of the two camps, this invisible terror tsunami slammed forward at an unimaginable speed...

Chapter 3568: It's a big disaster

"What happened? Where did the emptiness of the whirlpool? God, there are already a few people swallowed in, and the great power of the Qiankun will fall?"

"The power of good horror, the hollow of hundreds of thousands of miles away, has been torn apart, and countless voids and turbulent waves have formed three whirlpools that devour everything. This is the latest technology of the heavenly family. The result?"

"No, it has nothing to do with the Celestial family. There is no visible light column, not an energy attack. It is not a wave attack similar to a virtual oscillator. It is invisible and inferior, but it has a horrible speed and penetrating power. This is the spiritual power of the devil! "

"The old man understands the role of the big horn, magnifies, infinitely magnifies, and the spiritual power of any devil's strong can be horrified to this extent, even if it is a super old monster that transcends the star's main territory. This is the family. Wei, the numerous horns of the big horn, must be gathered with countless demons."

"The trickle, gathering into the sea, suddenly roaring, collapsed the void..."

.....

At the same moment of the spiritual war, the battles of all the battleships, fortresses and fortresses of the two camps have basically stopped completely, because the strongmen who control the warships have all been completely scared and forgot to continue their work. .

Of course, the Celestial Pioneer Fleet, controlled by intelligent robots, is an exception. They directly ignore this and are still rhythmically blasting in order.

But all this is really not important, and it can even be said that it is irrelevant, because with the fall of the fifteenth world of the six or seven enemy camps, this invisible and ruthless spirit of horror The shock wave, after ravaging the vast void between the two camps, has now rushed into the opposite camp in the first place.

"Oh la la..."

"boom!"

"Booming!"

.....

The oscillating line of defense built by dozens of 100,000-meter-diameter large fortresses, which was built together, was almost instantly disintegrated, and the sound of cracks was heard. Then, it was like a road. A huge explosion like a collapse.

The scene that followed was too fierce!

This invisible spiritual power, such as the starry tsunami and horror, instantly rushed into the enemy's huge camp. The first and foremost hundreds of thousands of warships, except for a handful of small fortresses and fortresses, could expand space and avoid Except for the farther rear or the two wings of the camp that cannot be covered by the giant tragic tsunami, the rest are almost all affected.

In an instant, hundreds of thousands of warships of all kinds, like paper paste, in this invisible spiritual hurricane, did not even support for a moment, they collapsed and collapsed, the branches broken.

But this is not over yet. Although this invisible spiritual hurricane has blown here, its power has basically passed the most powerful outbreak, but Yu Wei still exists.

After destroying the hundreds of thousands of warships, fortresses and fortresses, the hurricane of the hurricane slammed open, and the blink of an eye drove more ships that could not escape. Although this time there was not much The ship's disintegration has collapsed, but it has been somewhat traumatized, but it is hard to avoid!

At this point, the power of this wave of spiritual hurricanes was basically emptied. The price of the Second Universe and Allied Coalition forces was the fall of seven great powers, as well as hundreds of thousands of warships, fortresses and fortresses.

Of course, there are invisible wars and morale!

All of this is long, but in fact, from the roar of the war to the present, the power can be vented, and it is only a short time of ten seconds.

Ten seconds, the change is like a world!

The whole piece of emptiness, the original dense and burlap full of all kinds of warships, but now, there are countless battleship wrecks flying indiscriminately, hundreds of thousands of miles wide and empty, all collapsed, covered with countless large and small Void cracks.

In every void crack, there are some horrible turbulences of power and horror.

The most densely populated areas have already formed three vortexes of emptiness that are like black holes, which are chilling, and these three turbulent vortexes are obviously expanding outward. The invisible suction force that is diffused is also getting more and more. The land is strong. At this time, a large number of warship wrecks have spurred toward the three turbulent whirlpools...

In this regard, Ye Xuan did not react at first, but the opposite side had already started to jump in the first time, avoiding the big fortresses on both sides of the camp, but at this moment, the roaring roar of several star owners was heard, let He suddenly realized that he suddenly shrank his neck, and instantly there was a kind of consciousness that looked like a big disaster.

"Well, this corner of the void is about to collapse, and the three turbulent vortexes are expanding. Once they reach a certain scale, they will not be able to stop!"

"At that time, a giant hollow black hole will be formed here, and the first cosmic plane will be swallowed slowly. Even if it is wide, there is no fear for a short time, but the natural universe wormhole in the rear plane level that I will wait for will fall. In the future, you will no longer be able to jump from the second universe, directly to the wormhole, to this plane..."

"Block! I must find a way to stop it. The consequences are too serious. I can't afford all the families, and the loss is too heavy!"

"If that's the case, the second universe will be completely clamped down by the Terran of the Third Universe. Because you want to enter the first universe, you can only jump from another wormhole by the land of the people. That is too Passive!"

"There is nothing to say, a few old friends, let's take it all together. In this case, I will wait for the nine people to join hands and fully inspire the power of the one-and-a-half-width cosmic law that they have

mastered, forming a rule of the big net, this will Even if the collapse of the void is stable, it will be able to repair itself under the power of the law of the universe and avoid complete collapse!"

.....

As these voices of utter anger and anger emerged, among the numerous battleships in the chaos of the opposite camp, nine extremely bright columns of light were slammed up, and the colors were different, but the speeds were different. All of them are coming to the extreme, and even the strength of Ye Xuan can't follow its trajectory.

The nine beams of light rushed out of the nine 100,000-meter-diameter large fortresses, straight to the sky, and after a million-mile height, all of them exploded, turning into countless different colors of light, spreading around them. And quickly entangled, slowly rolling down the void under the numerous cracks.

In the blink of an eye, this tens of millions of miles away, the cosmic void that is completely collapsed, was shrouded in a terror network formed by the intertwining of numerous numerous energy wires, and immediately collapsed its collapse. The situation is gradually stable.

What is even more bizarre is that the numerous silk thread in this huge optical network clearly touched a large number of warships in the chaos and the strong people of the second universe, but like nothing, they never caused them. Any influence, even if it passed through, did not appear to cut off people.

Chapter 3569: Law network

Obviously, the nine pillars of different colors are the handwriting of the nine stars of the Second Universe.

Although they did not shoot in the war, even when Qiankun's mighty fall, they were indifferent, but in this void, the horrible power of the spiritual warfare collapsed, triggering three emptiness swirls, which is likely to lead to this. At the moment when the natural universe wormhole exit of the second universe plane connected to the second universe plane fell, he did not hesitate to take it!

Moreover, they also jointly weaved this amazing law network, successfully curbing the continued collapse of this corner of the void!

At the level of the starry sky war, although in the later period, there will be some star owners and strangers involved, but in the early stage, both sides will restrain, it is impossible to put this level of power into the battlefield from the beginning.

Even if it appears, it is at the rear of the town to prevent some unexpected situations, such as now!

This is also a game rule that the top three forces in the three major planes secretly observe each other in this plane-level starry sky war. It can be said that it is a rule.

After all, all the top forces in the three major planes of today's world, the top powers exposed in front of the stage, are the great powers of the fifteenth world. If they are moving, they will be motivated by the stars. There is no point in acting as the strongest force in front of the stage.

From this point of view, Ye Xuan and the Devils group are actually fouls this time. After all, the core node of the spiritual warfare is in the core node, but there is a star-level devil who is sitting in the town, and not only Just sitting in the town, before the horror of the spiritual war, the demon star is the main blame, clearly the core of the host.

However, due to the special nature of the spiritual war, everyone knows that it must require tens of millions of demons and strong forces to simultaneously mobilize the spiritual power, gathered in one place, and added to the special structure of the spiritual war. The power of horror, so as long as the star lord does not show up, basically no one doubts the fact that the democrats have used the power of the star master.

Otherwise, this plane-level star wars, fearing that it will start from the beginning of the Pioneer Fleet confrontation, will lead to a total loss of control and no return.

Really want to talk about the power of the star master level, in the second universe camp opposite, there are still nine such terrorist existences, although the magical war of the devil is stunning, it is enough to shock the audience in a short time. But to say that it has the power to suppress the nine star owners at the same time, afraid that no one will believe it!

For this reason, after completing the first strike, the spiritual warrior opened the occult method again and retreated backwards. This is because of the tens of millions of democrats in a honeycomb node. It

takes a certain amount of time to restore the spiritual strength. After all, it has already been exhausted, and all the spiritual strengths have come out.

On the other hand, it is to worry that the star-level blame in the other camp is angry. If it is a pity to destroy the spirit war horn, if you let the other party pull out a star lord from the spiritual war, then that is true. The trouble is big.

One party has broken the rules that both sides have been obeying tacitly, and the other party must not continue to obey, and will retaliate in the first time to determine this fact, and then fear the entire first universe. The coalition's pioneer fleet does not want to leave this starry sky.

Will be doubled by the other party, becoming the object of venting anger.

Now, with the spiritual warfare, the sneak peek is turned on, and the early return to the void is lost, and the traces are lost. Together with the special structure of the war, and the horror of using tens of millions of demons, the horror of the horror It is an acceptable fact to feel that this kind of power can be demonstrated, and it will not be associated with the star owners.

Therefore, the nine star-class geeks from the second universe in the other camp, although angry, but after cooperating to control the continuation of this void, they did not continue to take the lead, and directly went silent. .

I don't want to be angry with murder, but I am trying to restrain myself. Although the nine stars are strong, they may not be in the eyes of the Tianzu people, and here is the first universe, the people's territory, they dare not use the rules first. Star power level battle!

Seeing that the nine star owners in the other camp did not follow up, the heart of Ye Xuan hanging to the eyes of the blind man completely fell.

At this point, the battle of this war was completely laid, the second cosmic coalition defeated, even the fifteenth world's great powers have fallen seven!

Although this result is painful, it is obviously far from being able to withstand the entire second universe. Therefore, after the overall collapse of the void in this corner has been effectively curbed, the opposite The two camps of the various families of the universe also began the reorganization after the war.

Ye Xuan did not continue to pursue the victory, and beat the dog. If he saw it, he would still understand the truth. He really wants to push the other side. If the dog jumps to the wall, it is not good.

Anyway, the harvest is amazing enough, there is no need to continue to entangle.

What's more, including the thousands of miles of the battlefield in front of the central field of the battlefield, and still in a shackle of power that relies on the law of the big net, it has stopped the total collapse, and at this moment in the process of slow self-healing, It is no longer suitable for launching Star Wars immediately.

Therefore, seeing each other is not irritating, and desperate to counterattack, the entire huge camp line is shrinking inward and withdrawing backwards. Ye Xuan sighs with relief and immediately reports to the flagship commanders of all slave groups. The order to release the troops, rectify the camp, and count the instructions for the damage!

The first battle of this plane-level star wars ended like this!

At the first time, Ye Xuan contacted the spiritual warfare with spiritual strength and asked about the situation of the tens of millions of democrats in the thousands of hive nodes.

He also possesses a spiritual source of nuclear, and he is extremely knowledgeable about the spiritual power of the devil. It is extremely crazy to act like this momentary overdraft of all spiritual power. Not everyone can stand it, and some people can cultivate it. Come back, and some people are very likely to be on the spot!

This is also true.

Uncle Mo Qigong quickly responded to Ye Xuan, and tens of millions of demons are now fully recovering. It takes at least three days to use the spiritual war again.

And in the hit of the talented person, there are more than 30,000 demon strongmen on the spot, and although the spiritual warfare has not been attacked by the enemy camp, it is only the damage ratio caused by one's own factors. It has reached nearly one thousandth, and it must be said that it is definitely a very heavy price!

Knowing this result, Ye Xuan is also very depressed, shaking his head and smiling. It seems that although the big killer is easy to use, it is not completely flawless. Once you use it, you have to bear nearly one thousandth of the normal damage. It's amazing...

Chapter 3570: Famous three planes

At the end of the first battle, both sides of the battle were evacuated tens of millions of miles away. Although the two camps are still facing each other, the distance between them has exceeded the range of the 100,000-meter-diameter fortress.

Therefore, the atmosphere of the tense war has been shrouded in this void for a while, and it has finally disappeared and has been alleviated!

In the land of the previous war, the piece of the void that was almost collapsed was completely restored in the short time of the half-day.

After all, it is a huge cosmic plane. It has its own rules of operation. It is extremely mysterious. Even if it is a great power, it only has the qualification to touch this field. When it comes to the star territory, it can only be said. It was exposed to some shallow fur.

It has a strong self-healing ability, and this small-scale void collapse is not a serious problem.

After retreating to a relatively safe distant void, both camps launched war damage statistics and various adjustments, and these data were quickly revealed. This is a result of the war, which can boost morale, so it is not necessary. Covered with a squat.

Of course, this refers to the first cosmic servant of all ethnic groups led by Ye Xuan. As for the second universe of the various ethnic groups, the defeated party in this battle is only able to hold the nose and endure ridicule.

However, in the dark, they are obviously planning their follow-up battles. The star-level battles of the plane level often last for several years or even decades. The victory and defeat of a start-up battle can't really explain too much!

But for Ye Xuan, to be prepared, it should be that for the name of Sha Baofeng, this war is completely letting it famous in the three universes.

The reputation of one of the top five enchanting priests in the world, a hit!

In this battle, Sha Baofeng's personal talent and command ability are extremely amazing.

In terms of personal talent, he became more and more frustrated. After being ravaged by the fox lord, he went against the current. In terms of mechanical integration ability, he had a qualitative change and realized that he was singled out the second universe. The younger generation of Tianjiao has a big nest, killing and killing, and the hustle and bustle of the crickets.

The extent of its ferocity is definitely not weaker than that of the fox or the sorrow!

It can be said that this battle, the invincible grace of the alloy Ares under the stars, was once passed down as a beautiful talk.

As for the personal star warfare command, although this war did not reveal too much too grand commanding art, the achievements won by others cannot be ignored.

In this battle, in the camps of the Second Universe and all ethnic groups, various types of warships, forts and fortresses destroyed more than 200,000 ships, and Qiankun's powers fell by seven!

As the first battlefield on the starry sky, and the younger generation of commanders in the face-to-face Star Wars, it is enough to be proud of this amazing result!

All this spread, the three major planes were together, the Tianji family issued an official statement at the first time, commended the commander of the Pioneer Fleet Sha Baofeng, and commended all the slaves and servants who participated in the war.

In the second universe, the major groups roared like thunder, especially the group of more than 30 young strongmen who were either squatting or captured by Ye Xuan's hand, and even let out the words, let Ye Xuan wash his neck and so on. The next battle, take his first level!

In addition, the group behind the dozens of second-generation young cosmos who were oystered was even more shouting, letting Ye Xuan immediately release people. Otherwise, once he was captured, he must die.

He also said that Ye Xuan's opponents in the fair battle against the individual level and claimed to turn back to eat, simply anger and grievances, have touched their bottom line, if not immediately released, the second universe does not Exclude the possibility of launching assassinations.

At that time, don't say that the seniors can bully the younger generation!

Faced with this threat, Ye Xuan sneered, and immediately appeared in the front field of the battlefield, in the presence of the second space coalition camp all the strong.

Still good to say what fair fight? It is clear that I am single-handedly picking you up!

Why don't you talk about the truth when you are in the air? Now that the defeat is so thorough, but this method is too scornful!

In addition, is Qiang Kun's ability to be a big cow? Looks like this uncle just killed seven in this battle? All of you are the old people of all the second universe federations. Is it too much?

If this is the case, let's send it over, and how much it will cost, never give up!

Later, as if to prove his determination, Ye Xuan waved a set of tables and chairs, swayed in the void of the central field of the battlefield, and sat down with a big thorn.

There are cutlery on the desktop, but the plate is directly saved, and the big desktop is the plate!

At the same time, Shennong Ding's inner space is the central volcanic bottom of the ring.

It is the gold-finished iron rhinoceros of the body of two thousand feet.

The head of this golden iron horned rhinoceros was completely penetrated from the top cover to the lower jaw. It was then fallen, but the corpse was left by Ye Xuan, because he had never tasted the rhinoceros.

At this moment, the huge body of the golden iron horned rhinoceros automatically floats, and the right hind leg is separated from the body instantly, and floats upwards, while the rhinoceros body lacking a strong right leg is once again falling to the ground.

Anyway, everything in Shennong Ding can be eternal and fresh. Ye Xuan is not worried about corruption and taste. He can eat it at any time and use it at any time.

However, considering that there are still some live mouths in the cages at the bottom of the volcano, it is necessary to keep the blood for a long time. If these bodies are rotted, they will be thrown into their sight for a long time. However, I am afraid that I will be scared of madness and the mental pressure I bear is too great.

Therefore, at the moment, the body of this fine gold iron horned rhinoceros fell to the ground, and the ground of the central area of the volcanic bottom plain automatically cracked a gap, and all the wreckage fell into the ground along the gap, where Ye Xuan Opened another separate confined space dedicated to preserving flesh and blood.

Including the dozens of savage and ridiculous wrecks that had been made from the star of the evil source, he was silently stuffed in. He was not alarmed, and he was afraid to put these four guys. Scared to death.

At this moment, with this underground confined space opening a gap, the general scene inside, through this gap, was captured by the stunned rainbow in the cage around the bottom of the volcanic plain.

And there is a awning breath horror to the unbelievable power of the powerful faint scent.

It's all amazing. It's been shocked by the sudden appearance of all the sudden shocks, such as Jinghong and others. On the spot, I was scared of white sweat, and I fell down on the ground and shouted...
