

Super D. S 3621

Chapter 3621: Large plane migration

Although the main city of Tianji is not a life battleship with the ability to repair and grow itself, it is the base camp and nest of the Tianji people. Its ability to repair damage is astonishing.

In this respect, there are countless mechanical intelligent robots inside the city.

For this reason, although the imperial prison was ruined by the super dead bomb, it was even damaged by the folding space supporting structure used in this layer.

However, with the overwhelming mechanics of intelligent robots going to the past, in a short period of half a day, the imperial prison, but still quickly recovered as ever.

At this point, the entire Tianji City Star Field has completely restored the order. Whether it is the peripheral industrial circle, the inner perimeter defense circle, or the Tianji main city road, all are calm and orderly.

Only the edge of the peripheral industrial circle, due to the emptiness of the emptiness of the emptiness of the Void War, still exists, and is slowly expanding outward.

In this regard, the Tianji people did not intend to repair, they are already preparing to carry out the large-scale migration of the base camp, and moved to a closed small independent universe plane with great value that was discovered not long ago. Naturally, it will not I am working hard to deal with this matter.

The first universe used to belong to the hegemonic genius. In the future, it will belong to the first universe. If this is the case, these emptiness swirls will keep them fixed, just to delay these groups. The energy!

Although the restoration of the imperial prison was completed, but the interior was empty, there was no need to sit in the town. The emperor was stationed in the three main stars of the main city of the

celestial plane. In addition to the one who adhered to the core area, the other two were sitting in the main city at the same time. All permissions are activated in one time.

"Card!"

"Card..."

The sound of mechanical wear and tear that never happened has been overwhelming, and the vast expanse of the vast sky city is clearly audible.

The main city of Tianji, in the core of this star field, has been in the form of a piece of steel continent suspended in the void, which has lasted for nearly 10,000 years.

Today, after a long period of nearly 10,000 years, the main city of Tianji has finally begun to change, from the first form of the Netherland to the second form of the Super Fortress.

The former is a regular form.

The latter is the battle form!

As the behemoth of the main city of Tianji enters the second form of the Super Fortress, this also represents the Tianji City and the entire Tianji Nationality. After experiencing the great outbreak of the ethnic group that occupied the first universe, the second comprehensive The strength of the family has risen sharply. After nearly 10,000 years of age, it has finally begun to expand again!

After all, it is a giant whose diameter reaches one million meters, that is, one thousand kilometers. It only takes more than an hour to convert this form. Finally, it is suspended in the steel continent in the core area of the Tianji City Star. Turned into a round silver super fortress.

With a diameter of one thousand kilometers, the interior uses a lot of space folding technology, as well as the cutting-edge technology of all kinds of celestial beings. This is definitely a star-studded star-killing squad, even if it is the horrible existence of the Void War. It is vulnerable to it.

A main cannon beam can make it completely smouldering, and the hair can't stay one!

Because the ship's main gun of this super fortress has a diameter of 500,000 meters, far exceeding the diameter of the 300,000 meters of the virtual war, and a main gun beam, it will cover the whole.

In addition to the 500-kilometer-diameter super-anti-substance light energy main gun, there are a large number of other auxiliary guns in the fortress, some use anti-material light energy, and some use other driving energy, which are the most sophisticated starry sky. Technology.

Some of them have even been secretive, and even the immortal dynasty of the Third Cosmic Terran Science and Technology camp has not yet mastered it. Among the three universes, it can be described as one.

It can be said that as long as this million-meter-diameter super fortress still exists, the Celestial family will not be able to destroy the family. It is only this fortress that has the fighting power of all the star fleets of the entire immortal dynasty!

After half an hour, the sound of mechanical jamming in the void was gradually disappearing, and the internal changes of the fortress were also fully completed.

Then, in the void, the sound of the faint humming sound, the huge horror of the horror, is activating the space jumping ability.

This level of behemoth, a regular space jump, the distance between the stars and the sky that can be crossed is extremely terrifying.

Even so, the Celestial Fortress still needs to make three regular jumps in a row to reach a more remote cosmic wormhole, where it enters, and then expands into a farther wormhole.

It was all done in half a day, and after half a day, when the Fortress rushed out of the other exit of this remote wormhole, it reached the edge of the deepest part of the First Universe.

There isn't even a servant group in the first universe. It's too biased.

In the small half-day period, the Sky Fortress continued to carry out the conventional space jump from the horror, and finally entered a small universe wormhole that was just proved to be stable and not marked on the first universe star map.

Although this universe of wormholes is small in scale, it is not until recently that it was discovered by a fleet of Tianji people.

But its specifications are not low, it is actually a plane-level cosmic wormhole.

The universe void connected to it is not the first cosmic plane, but another small independent plane. Although it is smaller, it is far beyond the so-called secret level. Its territory is vast and there are ten heavens. The extent of the star field. 】

What's more, there are only two cosmic wormholes in this small universe plane like the access channel.

One is the small plane-level wormhole that is connected to the fortress of the heavenly universe, connected to the void of the most marginal star field of the first universe, and the other is connected to another more hidden cosmic plane.

The reason why the two avatars of Emperor Yi decided to expand the plane and migrate the base camp of the Tianzu people into this small universe plane is because the more secret universe is connected with a cosmic wormhole. Plane.

They can't wait to explore this mysterious universe that is still unknown to the extent of danger.

The last time the universe wormhole jumped, it took a whole day. After all, the void connected by this small universe wormhole is no longer the first cosmic plane. This is a plane-level wormhole jump.

One day later, the Sky Fortress finally came to this vast new plane with ten heavenly city stars. Since then, the base camp of the Tianji people is here.

Then, with the two avatars of Emperor Yi, they sent a fleet to rush out of the fortress of the celestial plane and sailed to the cosmic wormhole that was connected to the mysterious void in the depths of the plane...

Chapter 3622: Big horror and big opportunity

Just arrived at the new base camp, the two avatars of Emperor Yi couldn't help but feel the excitement of the heart. The first time they dispatched a fleet of explorations and rushed to the cosmic wormhole deep in the plane.

This cosmic wormhole is connected to a mysterious void, which is dark.

But not long ago, when a fleet of explorations of the Tianzu people discovered it, they discovered the mysterious void, and there were a lot of ruins of the ancient ruins that no longer existed in the world.

The wreckage of these ancient creatures is strong, the wreckage of the outermost regions, the breath of the body, and the starting point of them are all the main points of the star. The more they go inside, the wreckage floating in the void, the more powerful the atmosphere.

The expedition fleet of the Tianzu nationality could not be penetrated at all. Finally, the whole army was annihilated, and no warship returned. For this reason, the Tianji nationality not only lost ten large bastions of 10,000 meters in diameter, but also ten people of the celestial tribe. this.

But at the last moment, this exploration shipman did not disgrace the mission, desperately, and successfully delivered some messages and images.

They only discovered a little deeper, and they discovered the wreckage of the wilderness that transcends the star's main territory, that is, the horrible existence of the domain's main territory.

This is only the deeper part of the periphery.

What is certain is that if you go deeper, you will be able to discover the ruins of the main and even more powerful wilderness.

This is an infinite treasure. For the Tianji people, this is definitely a great development opportunity. These powerful wilderness wrecks are still shed tears and blood, and their wreckage is not rot, any The flesh and blood materials are absolutely the top substances used by the Tianji people to create the shells of the tribes!

However, the big opportunity also represents a big horror!

The pressure of the ruins of these ancient ruins is terrible. Even a 100,000-meter-diameter starry fortress will, after reaching a certain level, collapse completely because it cannot withstand it.

The emperor even suspected that the deepest part of this mysterious void, whether there is still a fall, just squatting here to restore the injury, recuperating the ancient life!

In short, this is a treasure land, but it cannot be traded. It can only be slowly touched and developed slowly.

This is also the real reason for the emperor's two avatars, who decided to move the fortress to the small universe outside the void.

In this way, they are equivalent to building the old nest at the gate of this empty treasure, and they can explore at any time and slowly eat it...

At this moment, with the arrival of the fortress, the first exploration fleet consisting of ten starry fortresses will continue to enter the small universe wormhole that connects the mysterious void, sitting in the two fortresses in the fortress. The emperor was separated and his heart was full of hope.

I watched this big fortress exploration fleet disappear at the entrance of the wormhole, and the two emperors whispered to themselves...

"The three major cosmic planes today represent only the starry environment of the world, but before the endless years, there is an old age, more mysterious and more powerful..."

"Now, in the three major planes, the land has continued to discover some secrets that have been imprinted in the era of the ancient times or starry grounds. For example, the source of all evils is one of them. If there is no accident, the second universe of the various ethnic groups The big invasion of the first universe should be directed at the source of all evil."

"Let them go to the dog to bite the dog, and rush to grab the creation of the starry sky. Our heavenly family is sitting alone in a mysterious void. In time, once the secret of the ancients of that year is excavated, then my family will rise again. When you dominate the three planes!"

"All this, starting today, has been fully launched..."

.....

Overnight, the celestial continent disappeared and transformed into the second battle form of the Super Fortress. It left the First Universe. Apart from the Celestials themselves, no one knows within the three universes.

With the departure of the fortress, it can be said that the base camp of the Tianji family has basically completed the migration.

The inner perimeter defense circle and the peripheral industrial circle left in the Tianji Star Field can only be regarded as the attachment of the Tianji Fortress. Even if you throw away all this, in the near future, the Tianji Fortress can recreate it in the small universe plane. A stronger, more horrific defensive circle and industrial circle.

From now on, the small cosmic plane can be considered a name. Perhaps it would be more appropriate to call it a small universe.

With the departure of the fortress, the inner perimeter defense circle and the peripheral industrial circle of the entire Tianji Star Field began to undergo vigorous demolition. All the large-scale mechanical equipments will be dismantled by countless intelligent robots from one star. Loaded into countless large and small warships, fortresses and fortresses in the star-studded industrial circle.

Every time I fill a fleet, I set sail immediately...

The Tianji people are using this method to leave them all the technological power and infrastructure of the Tianji Star Field. Soon after, the whole sky of the sky will no longer see even an alloy scrap. All the traces of the first cosmic tyrants who have lived here for tens of thousands of years will be erased!

Here, it will become a ridiculous star field. Except for abandoned stars that have been disarmed from the alloy and disarmed by the terrorists, there are only a few large vaginal whirlpools.

When all this was learned by the outside world, the Tianji family had already disappeared completely, and the three universes were no longer traceable!

The first cosmic servants who had just been released were only able to unite with each other, and to clean up the broken stalls left in this starry sky after the disappearance of the base camp.

For the first universe, the cosmic planes are their homes and the foundation of their existence. Even though the formation of the turbulent turbulences of the celestial spheres has nothing to do with them, they have nothing to do with them. I can only pinch my nose and try my best to resolve it.

Otherwise, if it takes a long time, when it is turned into a super black hole, there will be no possibility of bridging. In the end, the entire first cosmic plane will be swallowed up by this super black hole...

Of course, all of this is afterward. Today's Tianji City, the inner perimeter defense circle and the peripheral industrial circle, countless intelligent robots, are still nervously disassembling all the equipment and facilities on the Star Fortress.

In the outside world, no one has realized that the Tianji City Star Field has already had a change that is destined to shake the three cosmic planes in the future.

However, this only refers to the migration of the family of the Tianzu people.

As for the accidental riot that happened in the Tianjicheng star field, it has spread throughout the three universes.

The royal family hostages of the first universe of all pledges in the imperial prison of the main city of Tianji, escaped completely!

This disappeared as a superstar bomb of the same starry sky, shocking the three major planes of countless forces, and the first to be affected is the frontier of the first universe, the two planes. Starry battlefield...

Chapter 3623: Fall apart

The ancestral lands of the giant martial arts are located in the western part of the first universe. This star field is called the giant stalwart.

The tens of thousands of giants who are stationed on the giant urs on the edge of the celestial sphere are just a tribal branch of the tribe.

In the giant stalwart domain, there are hundreds of administrative stars inhabited by giants, and this servant group, among the first cosmic slaves controlled by the celestial family, is far less powerful than the powerful Terran, but not too weak.

The news about the 10,000-strong giants who were stationed in the tribal branch of the Tianji Star Field, has already been reported to the giant royal star of the giant.

The entire tribe branch has fallen from all the 10,000 people. The Tianji family has never been the same thing. There is not even a condolence notice. This matter makes the giants and princes quite angry, but they dare not even scream.

This ethnic group is bullying and fearing evil, and the nature of fear of bullying has already gone deep into the bones. The Tianji is the hegemon of the first universe. Even the giants, they dare not discuss privately in the territory of their own. words.

In the event that there is a spoiler in the giant mega-stars, it will be a disaster!

He will never know that for such a slavish ethnic group, in fact, the Tianji people have always believed that it is simply a waste to install such a fine act.

Even so, among the royal families of the giants, they still have their hostages detained in Tianji City. Each generation of giants will succeed in the same way, and like the devils, they will be asked to send one of the most talented giants. Go to Sky City!

From generation to generation, old and old, dead and dead, today's giants, still alive and detained in the hands of the heavenly family, the total of six people!

The repairs of the six members of the giant majestic royal family, the three are the nine-order grand perfection of the Qiankun, and the other is the star territory!

Nowadays, six powerful giants of the royal family have returned to the giant mega-stars one night before. They are now in the majestic imperial city, and they are discussing the big things with the giants and the royal family.

At this moment, the emperors of the six giants are making speeches, although the six emperors have successfully escaped from the Tianji City, and even returned to the giant singer without any danger, but they have six faces. The look is very worrying, and the look of other giant members of the royal family in the hall is basically the same.

In the entire palace, there is a cloud of mist!

"This time it was really too much for us. With the words of the Devils, I was deceived by the Emperor!"

"Hey, who can think of the devil's family so that the hands and eyes of the sky, even the new Shaozu of the Tianzu nationality, Sha Baofeng, can be bought by them, and participated in this conspiracy? It really is the first slave group. The means are too sinister."

"This time, our weaker slaves are horribly miserable by him. When the imperial prison is empty, the celestial beings must be annihilated."

"Unfortunately, there was no way to go back at the time. The imperial prisoners were all bombed. Otherwise, for the entire ethnic group, the old man turned around and turned back. Whoever came

here would not be able to make it. The knife holder did not leave on the neck. The Tianji family, who can offend ?"

"Now what is said to be late, all people, whether they are willing or not, can only escape first in the situation at the time. Now they have returned to the giant stellar, even if they go back now, it would be useless, maybe the celestial family I am wondering which ethnic groups to pick out and destroy the whole. Right to kill the chickens and monkeys, let's go back now, and we must be regarded as the first bird..."

"What can it do? What can it do?"

.....

As the six great tyrants of the ancient emperors spoke these words, the atmosphere inside the entire Great King Hall was suddenly dull.

After a short period of time, the giant squad seemed to suddenly think of something, but took a sigh of relief and whispered: "No, we are afraid that this is really a bad thing. The real trouble is not just the celestial family." , including those who are fierce and wicked in the Second Universe, are also the coming crisis!"

As soon as I heard this, everyone stunned, and then they reconciled...

"The starry battlefield at the forefront of the Devil's Star Field, you haven't forgotten it? We have a fleet of giants there, and the scale is not small, there are several royal members sitting."

"Now the Tianji City has such a big change, most of the follow-up main fleet will not go to the past. Anyway, the Tianji City is in the central area, and there are still a large number of slave ancestral ancestors along the way. They are happy to see how we are cleaned up..." "

"The second cosmic coalition is not good, they know that after this situation, we know that the first universe of all the people behind there is no support for the celestial family, it must be like a wolf. In this case, the one of our giants If the powerful fleet is still in the forefront of the battlefield, isn't this a hatred?"

"Now that the main son of the celestial family has been annoyed. If the second universe is offended, we are afraid that it will be completely annihilated. The powerful coalition of the Second Universe will soon kill the giant tyrannical star. Come!"

"Don't look at the first cosmic group, there are many powerful ethnic groups like the Devils. They will certainly lead the formation of the alliance, but we don't have to stay in the frontier battlefield to attract people's attention. To evacuate, we must evacuate!" "

Having said that, one of the giant princes in the surrounding halls is waking up like a dream.

Soon, the giants urgently recalled the secrets of the front-line warheads of the Chinese people, and they passed them out in the first time. It is conceivable that, soon after, this secret passage was transmitted to the front line through the star network of the first universe. After the hands of several royal commanders of the squadron, the entire squadron will soon be evacuated unconditionally...

This scene in the Imperial City of Megastar is not an exception in the first universe of today.

In fact, many of the first generation of cosmic servants were detained in the hands of the Tianzu people. After returning to their respective ethnic groups, they all had secret consultations with the middle and high ranks.

Although the group of cartilage heads like the giant squad is really only a minority, in general, basically all the major groups have made the decision to withdraw the frontier battlefield pioneer fleet.

The same is true for the demonic group!

Like most ethnic groups, they have such a decision not because they fear the Second Universe, but because the great situation of the First Universe has changed, even if they want to form a coalition, they will resist the invasion of the Second Universe. Those, it should not be based on the Tianji.

The temporary evacuation of the various Families' fleets was only to wait for the new First Universe Alliance to formally form a new warship team and form a new First Universe coalition.

But no matter from which point of view, this first cosmic giant coalition in the frontier battlefield of the Devil's Star Field is basically completely disintegrated.

In just half a day, the Pioneer Fleet of the First Universe has been completely withdrawn. Only the Heavenly Pioneer Fleet from Tianji City guards a vast and long space defense line of the universe, alone. Silly, there...

Chapter 3624: Sorcerer

Calculating the time, Ye Xuan stepped down to leave the frontier battlefield of the Devil's Star Field, but in fact it was less than half a month.

Such a star-level war of scale-level scales has been going on for years or even decades. Sometimes, after a regional war, the camps of the two sides have a rest time, which is counted in years. In just two and a half months, it is simply dazzling. Over.

What's more, before Ye Xuan left, the two major space coalition camps have just ended a battle of the Pioneer Fleet, which can be said that the loss is not small, especially the second space coalition forces, it is a heavy loss.

In half a month, it's not enough to rest after the battle!

Therefore, since the departure of the Ye Xuan, the two sides have not said a comprehensive war between the two camps, and even a small-scale and small-scale exploratory war has not happened yet!

However, in the half-month period, basically the camps of both sides have been almost closed. The first cosmic unity of the various races is full of fighting spirits. After half a month of boredom, there has been some temptation to fight and want a big fight.

Especially with the departure of Ye Xuan, the original commander of the Pioneer Fleet, Jero, the fire line was promoted, and became the new commander of the first cosmic servant of all the nations. The servants in this camp The commanders of the Fantasy Fleet are still looking forward to pleading with him with a great battle.

Unfortunately, the changes in the situation are too unpredictable, and it is simply unprepared!

In just half a day, the first cosmic servants and allied coalitions went clean. The original fleet of great stars and long lines of defense formed a fleet of defenses. In a short period of time, they all had no shadows. Without waiting for Jero to return to God, and the warships of the Second Universe and allied forces separated by tens of millions of miles of emptiness, only the 10,000 ships of the Pioneer Fleet of the Tianji Nationality were left.

In the past two days, Yello's enthusiasm has not been high. Nothing is going to push the battlefield situation in the flagship fortress of the expulsion, and the slap in the palm of his hand, which controls the nearly one-million-star battleship, makes him feel so intoxicated. Derivation, often immersed in it for a long time.

In addition, the Pioneer Fleet of the First Cosmic servants of all races who have been evacuated, did not say hello to him... They have already ripped their skins with the Tianji people. What else can you call?

So, until all the fleets of the ethnic groups had left, Jero was still swayed in the face, excitedly immersed in the situation of the war, until he was ready to order a tentative attack, only to find the left and right void In the middle, it is basically the ship going to the building!

The long line of defense that stretches for millions of emptiness, and now it's like a dog, it's clean!

In the face of this scene, Jero was once sluggish and thought that this must be his own illusion. With a large coalition in the hands of Sha Baofeng, he could make such a beautiful glimpse. When it was his turn to command, he still Didn't wait for the war, the fleet of the major ethnic groups ran away in the blink of an eye?

Subsequently, the news about the change of the Tianji City finally came, and realized that what happened to Jero's whole people almost collapsed, and a tragic sound more than a few times more than the killing of pigs echoed in the void for a long time.

Then, the 10,000 warships, fortresses and fortresses of this celestial fleet of the celestial fleet of the celestial squadrons in the void, began to madly withdraw...

In the face of this strange scene, the second universe of allied coalition forces outside the 100,000-mile void is dead, and no warship is chasing!

In fact, just half a day ago, when a fleet of First Universe coalitions was evacuated, they had already noticed that they were not too reasonable at first, thinking that this was just a regular defense control adjustment until the warships in the opposite air were coming. The less the time, the high-level members of the Vanguard Fleet of the Second Universe Coalition finally paid attention to it.

However, they have determined that this is the conspiracy of the first cosmic servants of all ethnic groups, regardless of the other party's true intentions, but obviously not a good thing.

Including the same now, a long and empty virtual defense line, the blink of an eye is completely gone, this is a foolish kid? At this time, it is fooled to take the initiative, and in the end, you may have a way to fall into the trap!

Even in the distance behind the huge camp line, the sky is hidden in the dark. The three headquarters of the Warriors from the Third Universe, and the top leaders of the Terran Comprehension and Technology camp, also face this scene. All are secretive, face to face, no one easily snoring.

I don't understand what happened in the end, what the other party is so strange, what is the final attempt?

Until the fleet of the celestial fleet of the squadron of Jero, the 10,000 ships of the celestial fleet were completely gone, and the vast universe in front of the universe was empty and could no longer see an enemy warship. Then it took another half-day, the second universe. The coalition forces, as well as the two camps of the United States and the United States, were placed in the inner line of the First Universe, and the news came in succession!

Tianji City has changed dramatically!

Sha Baofeng, the new young chief who just accepted the seal, colluded with the former patriarch of the Yin Mozu, and screamed at the Heavenly City. It not only blew up the imperial prison of the inner city, but also let go of the imperial prison. The first cosmic servants of the royal family had more than a thousand hostages, and even caused a comprehensive chaos in the Tianji Star Field. The outer industrial

circle of the Tianji City was shocked by nine emptiness and turbulence, and the entire star field was in chaos...

This shocking news that no one had thought of, would have all the people thundered out.

The two camps of the Federation and the Terran, as well as the top leaders of the Second Fleet of the Second Universe, even thought that the news was false, and it was one of the baits used to confuse oneself, entice oneself, and penetrate the enemy trap.

Until the major forces ventilated each other and identified all the secret channels in the hands of the major ethnic groups and forces, they all suddenly felt shocked and realized that all this... turned out to be true!

After all, the inside of a certain ethnic group was discovered, and false news was sent. It is still reasonable and acceptable. The entire federation, the two races, and the second universe, the various forces, are in the first universe. Internally, even all the inside lines of the celestial family are all framed, which is absolutely unrealistic!

Subsequently, the news spread completely in the three universe planes, and even the official of the Tianji nationality, on the first line of the first universe of the star network, issued a copy of the Shaosha Baofeng, and the evil emperor After the first cosmic joint order of the two, the matter was finally confirmed.

The commanders of the Pioneer Fleet of the Second Universe Allied Forces repented and screamed at them, and they missed a great opportunity to beat the dog.

It is a pity that such an opportunity is fleeting. If you miss it, you will never have it again.

But it doesn't matter, at least the situation is going well, the first universe is in chaos, and the victory of this plane war must belong to them.

Subsequently, the new combat instructions were issued at the first time: the whole army, the whole line attack, the enemy camp, the target magic king!

Chapter 3625: Open meal, meal, meal

When leaving the Tianji Star Field, Ye Xuan adopted the method of interstellar coordinate jumping ability. The selected jumping target point is quite far away from the Tianji Star Field, and is located in the life hole of the Devil's Star!

Since the Tianji nationality sent out the fleet and took away the Voids in the black hole of life, it was empty.

Perhaps in the first universe, there are indeed some forces or ethnic groups that want to use one of the empty black holes of life. This is, after all, a unique void equivalent to a mystery. It is a black hole, but it forms with the universe. The other black holes are different. It is completely formed by the hollow squad, which is the emptiness of the empty beast.

Not only did not devour the light and heat, but also the characteristics of the black hole filled with various emptiness and continual self-expansion, but also because of the departure of the Void squad, and stopped the momentum that has been slowly expanding outward. Stable, it is definitely a pretty good place to live.

But here is the Devil's Star Field, and the Devil's group is not the most powerful among the first universe slaves, at least in the top three, so some small groups simply do not dare to hit the life black hole. The idea.

The devil's group may have had this idea, but since it has formed an alliance with Ye Xuan and knows the relationship between the Void and the clan, the devil's group has also given up the idea of developing a black hole in life and entering it.

Since this time, the black hole of life has been quiet, and in stark contrast to the situation of the outer magical universe and even the entire first universe, like a quiet and peaceful paradise.

Ye Xuan completed this interstellar coordinate jump and came to the black hole of life. He did not rush to leave, thinking a little. He decided to station in the black hole of life in the near future.

With the change of the Tianji City, the situation of the first universe will obviously be greatly affected. The first universe slaves are all escorted by the ancestors of the Tianji nationality. All the royal hostages

have escaped. This has inevitably directly affected The plane-level starry sky that is erupting in the front of the Devil's Star Field is fighting.

How the specific situation will move, Ye Xuan can not predict, but he must plan ahead, because even if the big situation of the first universe has nothing to do with him, but with the anger of the heavenly family, the secret of his identity is revealed, Ye Xuanhe The Arc de Triomphe will be sent to the peak of the peak.

Before all of this comes, he must upgrade his own strength as much as possible. Now he is the eighth-order repair of the eleventh state of the world. He only needs another small breakthrough to take the 12th level. Liquid, since then broke through to the twelfth big virtual void!

Even if it is only a void, the comprehensive combat power that Ye Xuan can show at that time will be completely different from the present. I dare not say that there is a world of difference, but it is absolutely eye-catching.

After all, the various treasures, powerful powers, and so on, which he has in his hands, have a strong potential to be tapped, and the power will be greatly improved with the growth of Ye Xuan himself.

Therefore, for Ye Xuan, self-cultivation for each small-level promotion is of great significance, and it is not just an increase in the strength of a small step!

Outside the chaos, let it mess up, according to Ye Xuan's estimate, once again break through a small stage, probably about two or three days. After the end of this retreat, just leave the life black hole, go out and inquire about the first The situation in the universe, and the reactions of the three cosmic planes to the disclosure of his identity...

As a strong lighthouse, today's Ye Xuan is no longer a general star power strong, and it is only four major realms.

In this realm, a small-scale breakthrough is no longer as easy as it used to be. The general existence often takes several years or even longer to break through.

Even if Ye Xuan has a huge amount of resources in his hands, the situation of successive breakthroughs within a few days is not realistic.

In fact, his last breakthrough was still close at hand. Therefore, in order to ensure the success of this breakthrough, Ye Xuan once again thought about it and took out a lot of cultivation resources from the immortal world.

Ten elements of the nine-level nine-color star nuclear!

A drop of all evil source!

A large piece of the wreckage of the wilderness of the domain!

Of course, the latter is used for roasting. The flesh and blood of this powerful and ancient creature are all precious cultivation resources. Even if it has fallen into endless years, it still belongs to the treasure of blood, even if there is a small amount of energy left before the fall. For Ye Xuan, it is also precious.

"Hey, I found that the nine-level nine-color star nuclear source is ten, is it immediately collected?"

Ten top-level star nuclear sources have just been taken out, and Ye Xuan's brain has a familiar system sound. He even made a positive reply, but the energy of the ten top-level star nuclear sources was not immediately used. It is stored in the phagocytic system.

Later, Ye Xuan sent the flesh and blood cut from the ruins of the ancient ruins of the domain to Shennong Ding, directly igniting the one-color orange fire in the central volcano of the central domain.

This scene immediately alerted the Xuanyuan Zizhen and Duanmu Xiaocha and Zhao Qianru three women in Shennong Ding. The heart of Ye Xuan is now in contact with Shennong Ding. Therefore, the voices of the three women were clearly introduced into his brain. in.

"Open the meal! Eat it..."

"Wow, a good handwriting, just use the ground fire to make a barbecue, and you will know that it must be delicious!"

"Big bad guys, see people have a share, do you have it every day? If this is the case, the three of us will not leave, help you to adjust the animals that are at the bottom of the volcano..."

The voices are still not falling. In the depths of the volcano of the Shennong Dingyang domain, there is a faint spurt of old blood, and the voice of a low-pitched curse that dares to anger and dare not speak. Cried.

Upon hearing these movements, Ye Xuan suddenly smiled. It seems that he was held in the cages of the volcano at the bottom of the volcano, and the horror of the second generation of the second universe, such as the stunned rainbow and the **** day, These days must have been plagued by these three gimmicks.

When they were first detained by Ye Xuanzhen in the cage at the bottom of the volcano, the cultivation resources and various treasures of Ye Xuan did not go to search. These things are too much, and Ye Xuan's current vision is also high. Unless it is a great power, it is generally impossible to hang out his interest in looting.

While Xuanyuan Zijing and Duanmu Xiaocha, Zhao Qianru, three gimmicks were included in Shennong Ding, Ye Xuan gave them a certain authority to facilitate their activities in Ding, except for the bottom of the volcano. In addition to the enclosed space for storing all kinds of flesh and blood materials, these three hoes can even mobilize a few rare birds and animals that are caught in the surrounding mountains.

Now it seems that the guys in the 冀虹虹 have not been harmed by them. It is very likely that all the magic weapons and cultivation resources that have been carried by them have been searched out. Although the three gimmicks can't enter the mountain cage, they can control it. Orange and red fire into the roasting people, or can do it completely...

Chapter 3626: Void first order

There is a strong pressure in the wreckage of the ruins of the wilderness of the domain. The general starry sky is not to be grilled. Even if it is close, it will be hit hard.

However, after the one-color orange-red fire of Shennong Ding, it was not only the various impurities and impurities were rejected. This powerful pressure was also refining and blending into the flesh and blood. Sharp.

The reason why Ye Xuan was able to swallow the poultry head of the former kingdom of Jinwu was the reason.

At the moment, he took out the ruins of the ruins of the ancient land of this large area. After being completely baked, Ye Xuan reluctantly left three copies to Xuanyuan Ziyang and the three women, and then the largest one. Shennong Ding inside the sacrifice, directly on the knife and fork, eat fast!

After the end of this golden oily field, the ancient body of the ruined flesh and blood, Ye Xuan's entire body is hot, and now he has recovered the human body, plus in the black hole of life without external disturbance, Therefore, there was no control at all, and the golden flesh and blood entered the abdomen into energy, which provoked a burst of Xia Rui Baoguang from his body, so that the hundreds of millions of pores in Ye Xuan Zhou were all transparent.

The glory of the sky is rising, and it's just like watching the invincible **** of war from the distant time and space!

Then, Ye Xuan looked up and swallowed the prepared source of all evil sources. Finally, he crossed his knees in the void. After closing his eyes, he issued a warrant to the phagocytic system. The energy will be extracted from the ten top star nuclear sources. , slowly injected into the body.

At this point, this time the retreat broke out and finally started...

"Hey, congratulations to the host, the physical and qi and blood boundary breakthrough! The current realm: Xuan Guangjing nine-order great perfect!"

I don't know how long it took, when the extreme heat of Ye Xuan's body finally disappeared, the familiar system sounds also sounded in his mind and finally broke through.

Opened his eyes, Ye Xuan checked himself, and his body was so full of blood and strength that he had soared.

However, the flesh and blood of the ruins of the domain and the energy of the ten ninth-level nine-color star nucleus have been exhausted, but Ye Xuan still has the feeling that countless cells are being torn.

This is no stranger, it is the sign of the body of the evil source forging the body, tearing the body chain, and revealing the signs of its physical potential.

Although this time only swallowed a drop of all the evil source, this thing is really extraordinary, and the subsequent effectiveness is still exuding.

Ye Xuan did not hesitate, he planned to hit the iron hot, swallow a tube of 12-level liquid, and broke through to the twelfth big void in one fell swoop. Even if he could only stabilize in the first stage of the void, he was satisfied!

Soon after swallowing a tube of 12-level liquid, Ye Xuan began to retreat again. The difference is that this time, he is advancing toward another big realm, not a small step breakthrough in the same territory...

.....

At the same time, Ye Xuan is in the inner space of Shennong Ding in the immortal world!

The golden meats baked by the three main domain-level wild-born scorpions have already fallen, and Xuanyuan Ziyang and Duanmu Xiaocha and Zhao Qianru are the first to enjoy this level of blood, so the effect More obvious, plus the repair of three gimmicks is not as good as Ye Xuan, the breakthrough is easier.

Therefore, this time, the three gimmicks only rely on each person to swallow a large piece of grilled domain-level flesh and blood, and then successively break through, repairing in a short period of time, all upgraded two small steps.

After the end of the cultivation, the three hoes cheered, and the happy ones picked up directly.

This scene and the whole process were seen by the stunned rainbow and the corner of the sky at the bottom of the volcano at the bottom of the volcano in the central domain.

These guys are all a face of envy at this time, but it is not just because Xuanyuan Zizhen has three gimmicks, all of which are even two small steps, and more, they still can see that they can enjoy this level. Bao meat!

They were kept at the bottom of the volcano. Every time Ye Xuan used a color of orange-red flame to bake all kinds of succulent meat, they were the closest witnesses, and the pieces were baked to the golden dripping oil. People's almost intoxicating scent, unconsciously, has already completely eclipsed their appetite.

"哧"

I don't know which guy's mouth is smashing out. It seems that the amount is not small. At this moment, it is a crisp and soft sound.

The three hoes were alarmed, and all the sights were looked at the cages on the bottom of the volcano at the bottom of the central volcano, just in time for the twenty guys who couldn't see the light!

Sometimes, the appetite and **** are in the light of the light, it is difficult to get hot, it is so hot, straightforward, seeing people straight hair.

This time, the three gimmicks are obviously misunderstood. People are obviously stunned, but the faint green light of the glory reminds them of the bad aspects.

At the same time, he was stared at by twenty big-colored wolves. The temperament of the three gimmicks was originally to be shackled. In addition, the former is now a prisoner, but they are prisoners. Therefore, the three hoes immediately rushed. To the bottom of the volcano below, the mouth is lingering...

"Damn guy, it really is a group of animals, this has become a prisoner, and still so unfair, dare to stare at this lady with this look... don't want to live, right?"

"It is necessary to pack them up well. This is a day without a lesson. It is not honest at first. It is just a group of skeleton bones!"

"In my opinion, I simply smashed their eyes, saving every day and turning around, and irritating people!"

"Playing is playing, it is awkward! If not, all changes the body, so that the lady can see which part of the meat is more pleasing to the eye, cut a piece to let us roast the food, the right to apologize Otherwise, oh..."

"Oh, didn't you hear it? Say you, the corner of the sky, is clearly a big fat cow, is it interesting to hold an adult? Immediately, the young man has to cut a large piece of beef meat... not moving. That, the same is true for baking your whole life!"

The words were degraded, and Duanmu Xiaocha had already controlled an orange-red flame, and spurred toward the mountain wall cage where the sun was shining. These days, they did not use this method to sneak up on this. Twenty of the younger generations of the second universe, the younger generation of the genius, were scared.

"Hey!"

Not waiting for this one-color orange-red flame to rush into the cell, from which there was a sound of a burdock that revealed the indignation of the sky, and the eyes of the sky with tears quickly showed the original shape in the first time. A black and sturdy cow of the size of a hundred feet, squatting in a cage, with scars on his body, all burnt and burned. Most of them are new injuries. At first glance, they must be the handwriting of these three gimmicks.

Soon after, the three hoes were screwed with some flesh and blood of various savage beasts, and they left the bottom of the volcano with satisfaction. After the hillside of the crater, they waved three oranges and oranges, and began to roast with enthusiasm. Food...

Chapter 3627: Forging system

"Hey, congratulations to the host, the breakthrough of the flesh and blood! The current realm: the first level of the virtual space!"

As the familiar system in his mind prompted to sound, Ye Xuan opened his eyes, and the sputum was fine, and then the tone in the brain sounded again.

This time, it has nothing to do with the breakthrough of cultivation, but reminds Ye Xuan that he still has a chance of random system ability and has never used it.

The last time Ye Xuan upgraded the subordinate title of the body phagocytic system to the fifth-level interplanetary conqueror, the benefits obtained were not only the number of interstellar coordinates that Ye Xuan had branded on any cosmic plane since then, but the previous one, Beyond two.

There is also the aura effect of the title, which will add a new system capability and random activation on the basis of the first four grades of Star Trek, Interstellar Adventurer, Interstellar Explorer and Interstellar Trailblazer.

However, due to various things that followed, Ye Xuan had never used this opportunity, so that he was almost forgotten. At this moment, he heard the system remind him again that he immediately gave instructions to the system even if it was bright. This opportunity, get a new system of random scale selection!

“Hey, congratulations to the host, successfully activated the forging system!”

Soon, a very short system prompt sound appeared in Ye Xuan's mind, which means that this opportunity has already been used. His body's phagocytic system has once again turned on a capability, that is, the new accessory system is activated. .

However, this forging system, which was just activated, left Ye Xuan for a moment, even when it frowned!

Forging system?

Sounds not so good, is it a forging magic weapon? If this is the case, then it is too ridiculous. Ye Xuan already has a fusion system that can fuse any type of treasure, or other suitable materials, to enhance the quality of the quality.

Doesn't the forging system mean this? Even better than a fusion system!

With these thoughts flashing in my mind, Ye Xuan's heart suddenly floated a thick disappointment. It really was a chance to give away the system randomly. It's cheap and not good, and it's not worth looking forward to!

After sighing a few times, Ye Xuan always feels a little unwilling, and there is a little bit of luck. In his opinion, the phagocytic system is so tall, even if the system is given a new accessory system that is activated by the system, it will not appear. Is this a coincidence with the previous situation?

This is too stingy!

Could it be that this so-called forging system, what other advantages or tricks?

Regardless of it, in the end it has been activated, and it will take a lot of time to study it carefully, and it will be completely lost.

With this in mind, Ye Xuan immediately became refreshed and began to search all the information about the forging system directly in the system data repository that was just updated because the system activated the new affiliate system, and immediately studied it carefully...

Soon after, Ye Xuan thoroughly studied all the conditions of the forging system, and the whole people were excited!

Sure enough, it is different from the fusion system!

It's different, it's totally different!

It should not be called a forging system at all. If it is called a personality replication system, it is more suitable!

To put it simply, the function of this system is to copy one of the magic weapons that Ye Xuan has in hand, and it is a personalized copy, with personality options to retain or eliminate.

Of course, this kind of copying is not copied out of thin air. It requires a lot of various consumables. It feels like it is like using these consumables to recreate a magic weapon. Therefore, it is called a forging system!

But in fact, its essence is different!

Can simple forging and rough copying be the same?

Don't say simple forging, even a complex fusion is not as rude as the copying of others!

To give a very simple example, Ye Xuan's private small warship battleship is a virtual shuttle, and now it's the starry sky to the treasure level, but to reach this level, Ye Xuan has passed through a total of seven fusions, and each time succeeds. Only realized.

In the process of these seven fusions, he has to think carefully every time, carefully select the same type of magic weapon that is used for fusion, or a variety of materials with unique power and attribute effects.

A full seven times can be described as laborious and time consuming.

If it is suitable for the fusion of the same type of magic weapon or material vacant, no need at hand, then you can only wait, and wait until you have the right, can continue to merge!

But if it is for the forging system to do this, it is different. Of course, this means that Ye Xuan's Dong Xuan has reached the premise of the current seven-time fusion and the prospect of the starry sky to the treasure, if it is not in his hands. A reference object, or a template, this forging system is also not used!

In the case of a hole in the hands of the model, if Ye Xuan wants to get another one, he has completed seven fusions, and the private battleship of the order is the starry sky. He can now directly use the

model, that is, The hole shuttle, as well as the various materials needed for forging, can be directly thrown into the system.

All the subsequent Ye Xuan did not care, the length of time is still unknown, but in the end, he can definitely get a similar small private battleship, one-time completion.

More importantly, this kind of copy forging like a cheating tool, there are actually options that can be deleted, and can be customized for personalization!

For example, the function that Dong Xuan has now, Ye Xuan thinks that it is useless, then it is directly deleted in the process of copying the forged new ship.

Another function, Ye Xuan feels that the power is too weak, need to be strengthened, then the same can be directly copied in the process of forging a new ship, check this one, for special reinforcement!

This is simply anti-sky!

It is a pity that the more the system power like this power, the more it is in other aspects, the more stringent it is, the same is true for the forging system that just activated!

Its harshness is to copy the amount of forged materials, too horrible!

Ye Xuan tried to throw the hole shuttle to the forging system, and then issued instructions, required forging, and open authority, the vast amount of resources, materials ... in his immortal world!

As a result, the final evaluation conclusion given by the forging system almost did not scare Ye Xuan to sit on the ground.

The ones that have been collected by Ye Xuan in the immortal world, even if they are star-studded, have to be scared of a huge amount of resources, and can only forge four functionally identical holes.

If you need to customize, cut a certain function, or strengthen a certain function, the loss will be even larger, it is estimated that two or three ships.

This is simply a bottomless pit for eating people!

There is no white lunch in the world. It is more convenient and convenient. The price of the forging is so terrible. Not to mention the general star power. Even Ye Xuan, it's absolutely impossible to use it a few times.

Chapter 3628: Soul war

After a lot of excitement, Ye Xuan gradually calmed down, then he shook his head and smiled!

All along, the resources in his hands are not lacking, and it is not a general affluence, it is called massive, which makes him all have a sense of pride in the rich man.

Until now, the forging system, which was almost to be eaten, was activated. He discovered that after for a long time, he was actually a poor man. The vast resources in the immortal world were only enough to reproduce three or four holes. Only.

This luxury system, he still can't afford it!

The virtual shuttle is just a quasi-star to the treasure, so it burns resources. If Ye Xuan wants to copy and forge a treasure of the thunder, the Shennong Ding, the ancient heritage tower, and even the ancient treasures, isn't it enough to squander?

After all, you still have to work hard and get more resources. Otherwise, you can only step by step yourself and don't want to enjoy this extravagant step!

However, the forging system has been activated, if you do not use it to copy a forged treasure to see how effective, Ye Xuan always feels unwilling, then you have to use it once again, otherwise you are too sorry for yourself!

I thought about it, and Ye Xuan gnawed his teeth, and he began to choose the scales among the various treasures he currently has.

Shennong Ding, such as the ancient treasures, treasures, heavy treasures do not have to think about, can not afford to play, directly skip.

It is not necessary to use the hole in the hole, the glare of the glass, and the blood of the devil. It is not necessary to consume so many resources. In order to try the effect, it is not worthwhile to get the same magic weapon with repeated functions.

But it doesn't make sense to just get a broken piece and give it to the system to copy the forging.

In the end, Ye Xuan's eyes locked in the void battle, and after a little thought, his eyes lit up!

Although the Void War is huge, its power is actually reflected in the tens of millions of Voids that drive it. Before the transformation, it was embodied in the tens of millions of Devils.

Without these tens of millions of Void Soldiers and the Devil's Powerhouse, it is actually not a precious magic weapon.

The current Void War is only an epic of the stars. In fact, this is already very good, and for Ye Xuan, this kind of order is just right to test the effect of the forging system.

However, the Void War is only suitable for the use of the Void Scoop, and Ye Xuan already has one in his hand. There is no need to make another one.

Anyway, the forging system can be customized. Since it can be cut or enhanced in a targeted manner, it is also possible to make small changes to a certain function in a targeted manner.

And the forging system has a very convenient function before copying and forging a certain magic weapon, that is, based on the existing, automatic retrieval, and the final result of this automatic retrieval, to give the host personalized customization suggestions. !

Ye Xuan did not hesitate, even when he handed the Void War to the forging system, and issued instructions, based on the existing, immediately launched a personalized automatic search!

As a result, it came out soon!

What makes Ye Xuan surprised is that there are two suggestions for the system's personalized forging!

They are the soul wars and the wars!

It can be seen from the names of the two war lords to be forged, whose individual choices are aimed at driving kinetic energy, such as the emptiness of war, which was previously a spiritual war, suitable for the spiritual power of the devil, and now After becoming a void war, it is suitable for the Voids to drive it.

The same reason, if Ye Xuan decides to forge the soul war or the war of the years, the driving kinetic energy will also change, the spiritual power of the devil is not applicable, and the hollow squad is no longer applicable. The ones will be the Soul Beast and the Golden Slime!

The sorrowful beast Ye Xuan captured tens of millions of people in the sacred cave of the Black Mountain tribe, the main star of the Black Mountain tribe. Although it later consumed some spiritual power to revive itself, the total amount is now four or five thousand. As many as 10,000 heads, it is more than enough to settle in a soul-stricken war.

Thinking of this, Ye Xuan suddenly felt heart.

Although the two personalized custom warfare forging out will be quite expensive, but it is quite acceptable, and more importantly, Ye Xuan has already seen the spiritual warfare and the void. The powerful power of the war, he is still very much looking forward to the effect of the war.

Since the soul war is driven by tens of millions of sacred beasts, then its power should be similar to that of the spirit war. After all, the spirits are all spiritual energy, but they will certainly be different, according to Ye Xuan. It is estimated that compared with the spiritual war, the soul of the war will only be strong or weak.

It is a strong place, it should be the unique soul-effect of the soul-soul beast, with tens of millions of sacred beasts driving the horror blow of the sorcerer's battle, for any flesh-and-blood life, there will be some fatal blow!

The blow of the gods, spirits, and ideology!

Thinking of this, Ye Xuan does not hesitate, even if the resources for self-extraction are opened to the forging system, in short, all the resources collected in the immortal world will be allowed to be used by the system to create the soul war.

Everything started very quickly, and Ye Xuan did not stop, taking advantage of the forging system to create the time of the soul war, he began to study the beasts that were installed in the small tower of space!

The small space tower was originally refurbished by the old ghosts of Wenxing and provided to the tribe of the Heishan tribe. It was specially used to accommodate the soul beasts.

The sacred beast is very strange. The general space magic can't be collected at all, even if it is directly absorbed into the body, but after it is taken away as a spiritual energy body, the little micro-soul blood left. The corner can be charged directly.

For this, Ye Xuan has always been very curious, has studied, but has no results, and ultimately can only be attributed to everything in the world, each has its own peculiarities, there is no need to do everything, it is not necessary to explore That's it.

However, it is now necessary to use these tens of millions of sacred beasts to make them obedient like the squadrons. After entering the sacred war, they can always converge their soul spirits according to Ye Xuan's instructions. The strongest concentration of strikes, then, Ye Xuan must study again.

Otherwise, if these tens of millions of sorrowful beasts are not listening to the command, then all the spirits of the sorrowful spirits will not be able to converge, or they will not be able to condense into a concentrated energy after the gathering, and blast them out...

Then all this is all white toss!

Fortunately, Ye Xuan is quite familiar with the Soul Beast, and the system is more in contact. At this moment, after carefully searching and searching in the system data repository, Ye Xuan finally found an effective solution. It turns out that the tiny blood horns of the scorpion have special effects. They can be handed over to the system for condensing, and finally refining into a scorpion blood crystal, and this scorpion blood crystal will be set in the soul war. La's core honeycomb node, used as a driving hub...

Chapter 3629: Golden years

The soul beast is a spiritual energy life body, which is related to the blood of the soul. The blood of the soul is the ancient supreme. This guy is mysterious and strange. In the battle of the ancient world, it was neither a headless baby. A camp does not belong to the camp of Tiandao Qingyan. Ye Xuan sees it in the inheritance picture of Yu Tiangong. The ghosts squat in the shadow of an abandoned star, insidiously peeping through the entire ancient starry sky. Big battlefield...

This guy must have a conspiracy. Maybe there are countless sorrowful beasts in the Black Mountain Stars and Souls, but it's all right, but the **** souls of the sorcerer's souls lived in the second world and turned into The soul of the soul, but unfortunately, did not wait for this **** soul to eventually grow into a new **** soul, they met Ye Xuan, and eventually were refining the headless baby.

Nowadays, Ye Xuan and the Void Scoop Replica, along with the towers of the ancients, were transferred to their swallowing avatars, which are now in the invincible gods who are still tossing in the territory of the Terran camp.

In short, even if these sorcerers have any secrets, now they can't look down on the waves. Their **** sources are completely downgraded, how can they toss?

Ye Xuan had collected a large number of sacred beasts before, and a tiny scorpion soul blood corner left by him was all left by him. Now there are nearly ten million pieces.

At this time, nearly 10 million pieces of soul blood and small horns, all taken out by him, a bone thrown to the phagocytic system, for melting!

At the same time, according to the requirements of the system, Ye Xuan also provides some other very special materials, which is equivalent to the treasures like melting holes and the glazed glass, the devil's blood blade, etc., but more thoroughly!

After a few hectares, the melting is completed, tens of millions of scorpion horns and some other precious crystal materials, which are finally melted into a **** crystal, full of blood red, nearly full transparency, like the top **** amber, its Inside, I can see a tiny **** soul, and its shape is exactly the same as the **** corner of the soul, but it has been reduced by countless times, only the palm of the hand is big.

After the refining of the soul, Ye Xuan will be placed in the core hive node of the soul war, and it will be able to control all the tens of millions of soul beasts that have settled in the soul war. They are obedient like the Voids, and they are forbidden, and they are horrible at any time!

Coincidentally, this **** crystal shape is a curved corner shape, just like the horn, it is also a trumpet-like shape. Ye Xuan plays while playing in the heart, I don't know the blood of the kinetic energy center. Make this shape, for those who come from the tens of millions of souls and souls, and finally become a share, the spirit of the spirits smashed out through the blood of the soul, will have an additional increase effect.

If the answer is affirmative, then the power of this dying soul, which is about to be completed, must be more horrible than the Void War, plus the effect of its soul, oh... Ye Xuan can't wait!

Half a day later, the soul of the war was finally forged, and Ye Xuan looked at the consumption of the vast amount of resources in the immortal world. Although it was still acceptable, he couldn't help but twitch. I still have more resources in the future, otherwise the forging system really does not dare to use it casually.

Such a good use of things, but can not be used, this is simply to make people crazy, Ye Xuan must not stand!

After opening these thoughts, Ye Xuan waved out the completed sorcerer's battle, and swayed in the void in front of him. A huge battle of 300,000 meters in diameter jumped into the eye.

Appearance, this soul war is exactly the same as the Void War, the only difference is that the material used is more suitable for the scorpion to drive, and all the honeycomb nodes and the internal structure of the connecting pipe are also adjusted to be more suitable. The transmission and increase of the spiritual power of the soul.

It seems that this is exactly the same two star-shaped killers, the only difference is the color.

Void battle, the gray of the sky!

The soul of the war, the blood of the whole body!

Seeing this scene, Ye Xuan couldn't help but scream: "So it seems that the years of war will not be the golden age of the whole year?"

The gold of his years refers to the gold of the gold slime!

The slime group, Ye Xuan also has tens of millions of hands, and there is also a slime mother's nest, which is now placed on a certain layer of the Xingye Life Fortress. Every time, a new slime is born. The substance secreted by them is the innumerable micro-molecule of the whole world of insects that form the fortress of life, and the favorite growth nutrients!

Ye Xuan has twice released two life mother crystals for his mother's nest.

After the energy of the second life mother crystal is exhausted, the life level of the evil spirits slime has once again changed to a very high degree. All the evil spirits on the Slim back have an extra The golden lines, from the head to the tail, and the entire body also have a little bit of gold spots.

Even the mucus secreted in their bodies turned into pale gold.

Since then, it has been inappropriate to call them the evil spirits, and it is called Gold Slim, which will be more appropriate.

At that time, Ye Xuan felt very curious. I thought about whether this gold slime had other characteristics, and it might not be known that it would be unexpected.

Only then did not take time.

Until then, he decided to copy the forged virtual war, so that the forging system according to the forging requirements of the war, based on all the resources and resources of Ye Xuan, after the automatic search, the two souls and the war As a result, Ye Xuan was once again concerned about the gold slime.

The reason why it is called the war of the years, not the golden war, is because of the unique biological wave frequency of this gold slime, which is suspected to be related to the law of the sky time, with time and energy.

Of course, a single gold slime, its biological wave frequency is too weak, the effect of this age of erosive, is not obvious, even weak to the sense.

But if you let tens of millions of gold slime like a squad and a sacred beast, you will be in the golden age of the whole age, concentrate on its unique time attribute bio-wave frequency, and launch a full blow... That power can definitely be against the sky!

The law of time, originally the most mysterious, did not get involved in this field, and the strong existence could not reverse the years!

At that time, the battle of the years will make a huge number of star-studded powers in the void, in a short moment, such as after thousands of years, the scene will be shocking.

The effect can only be described by big horror...

Thinking of this, Ye Xuan did not hesitate, even when the instructions were issued to the forging system, immediately began a new copy forging, and this time the forged war is the golden age of the whole year!

Chapter 3630: Qiankun slime

As Ye Xuan immediately forged the instructions of the war of the years, the vast amount of materials and resources collected in his immortal world was instantly smaller.

Moreover, since the power of the war is obviously stronger than that of the sorcerer, there are more special materials and rare crystals and minerals, such as star-space epic crystals and minerals. Ye Xuan's hands are only three or five, but this time they are blinded and cleaned up, all gone!

This made his heart twitch again, and it hurts, but when I think that the time of the battle will be activated, the effect of the erosion after the bombardment, Ye Xuan thinks that it is all worthwhile, this kind of age killer, no Dare to say that the three universes are unique, but at least Ye Xuan has never encountered the same type of magic weapon since entering the starry environment.

The power of time law is too horrible, especially the time rule of the universe's starry sky level, and it is not the field in which the general existence can be involved. Compared with it, the law of space space is rather common.

But in fact, the great power that Ye Xuan has touched, the star lord, in the law of space, the people say that there is a little fur, almost no one!

With the forging of the years of war, Ye Xuan began to ponder another problem, that is, the drive of the years!

Tens of millions of gold slimes still have it. It's just transferred directly from the life of the Hoshino. There is a slime nest there. Every time, a new gold slime is born. Ye Xuan removed tens of millions. After a while, this quantity can be added back again.

But besides that, there is another problem, that is the driving center.

The Void Warrior has two heads and eight scoops to go to the core honeycomb node, and there is more hollow crystal control.

The **** corner of the soul also had this problem, but now it has the blood of the soul that has just been smelted by the phagocytic system. It has been put into the core honeycomb node by Ye Xuan, and it is used to control the station. The tens of millions of sacred beasts of the sorcerer's war are as good as no problem.

But the years of war are different. All the gold slimes are of the same rank. There is no king. Ye Xuan does not have the source crystals that contain the laws of the years. They can be used to manipulate them. The kinetic energy center is blank.

In this way, the years of war can not be used at all, and the tens of millions of gold slime's years of biological wave frequency can not be concentrated and blasted out even if they can come together.

To solve this problem, there are only two ways, or you can get a time law similar to the blood of the soul, but that kind of thing is not a rare rarity, Ye Xuan has never heard of it, can not meet, now Basically, I don't even think about it.

Another way is to get a king of slime like the eight-star king, let it sit on the core honeycomb node, and Ye Xuan has to surrender it completely, otherwise people will not listen to the command, it is also white toss.

There is a certain possibility that this method can be realized. The reason why only one parental nest in the gold slime group belongs to the high level of this group, and all other gold slimes are the same level. That's because after they were born, they have been used as batteries, secreting special liquids for the innumerable micromolecules of the world's self-derivatives.

After a long time, it will die, and at the same time, a new gold slime will be born. This is a life-and-death. Although it always maintains a quantity, its individual quality is not only improved by absorbing the mother crystal. There is no single individual that can be taken care of.

What Ye Xuan needs to do now is to get a gold slime out and train it alone, and try to improve his life level as soon as possible, create a king of slime, and surrender it, through it, to lead the battle of the years. Tens of millions of gold slime.

When I thought of it, Ye Xuan even picked out one of the most active and active gold slimes from the life fortress. Then, after a little hesitation, he took a drop of the evil source.

When it comes to improving the level of life and urging the effect of life evolution, all the resources in Ye Xuan's hands are the most counterproductive of this evil source.

After all, people use the nine-colored meat mud in the furnace to make it purely refined. The nine-colored meat mud is made up of a large number of powerful and deadly flesh and blood, which shows the products of the evil source. The horror of the order.

This is even the horror that originated from the ancient times, and now crouched to recover the wounded, all that is needed, some exist even a drop of distribution a year, now Ye Xuan directly throws a drop to the gold slime, in a short time to significantly increase the level of life, it is definitely a nail!

At this time, with Ye Xuan taking out a drop of the evil source liquid and suspending it in front of him, the size of the head is almost the same as that of the general Void Scoop. Only the gold-sized slime of the size of the rice is trembled in an instant. The secluded Jin Mang's eyes are staring at the drops of evil.

It is not afraid, but excited, eager, and incomparable, Ye Xuan can feel this mood swing clearly.

Even, he has the illusion that this golden slime is pleading with him, even pleading for... the purpose is to devour this evil source of infinite temptation.

This scene made Ye Xuan's spirits stronger. He was more sure. Even if he didn't hesitate, he waved this sinister source into the eyebrows of the gold slime. It disappeared and disappeared. It disappeared. .

With the drop of this evil source, the gold slime was shocked, and the changes in its life level immediately began. The degree of fierceness, even Ye Xuan was shocked. Subconsciously, he took a few steps back, because he was afraid that the powerful effect of this evil source could not hold back. If you directly smashed the body, it would be depressing.

Gold Slim was originally a whole body of gold, but the abdomen has a golden gold line, but now, the gold line is visible and expansively spread, and the whole body has become a golden color. Then, on the belly of the gold line, there was a purple gold line.

Although this purple gold line has not spread so rapidly in the former gold line, it covers the whole body, but it has extended a myriad of purple gold thread, gradually spreading, and finally shrouded its body, forming a layer of dense as many mysterious patterns. The purple gold streak, and in the process, the body of this purple gold slime is constantly expanding.

In just a few minutes, when his body shape is fixed at about three feet, from his body, it also blew a strong breath, which is the realm of great power.

Ye Xuan was so wide that his mouth was wide open, and his brain was like a thunderous bang.

Did you accidentally make a Qiankun slime?

This is bad food...
