

## Super D. S 3631

Chapter 3631: Exit

"Hey..."

A sound like a baby, from the mouth of the purple gold slime floating in the front of the sky, at the same time, there is a powerful atmosphere of the powerful, enveloped Ye Xuan's entire body.

There is a hint of fierceness.

And the purple gold stalks that are drawn from the eyes are also clearly greedy and threatening.

Obviously, this guy is not eating enough, tasted the sweetness, and wants another drop!

From a black Slim, which is not even a black hole, it has grown into a purple gold slime in a short period of time. The body shape has grown from one meter to three feet, and the body is covered with a pattern. Purple gold texture, looks mysterious... I have to say that the effect of this evil source is indeed against the sky.

However, this is obviously not enough. The Qiankun environment is only the fifteenth world of the starry sky. What Ye Xuan knows, there will be a star territory, a domain main territory and a realm.

Obviously, this Zijin slime still wants to continue to grow.

But that is obviously not very likely, at least not at the moment, because for Ye Xuan, a Qiankun slime is enough, and the other party has not been surrendered by him. How could Ye Xuan continue to help it grow and help it Fierce flame?

Besides, this guy is not a good at first glance, he just gave it a big fortune, which immediately threatened, and turned his face almost faster than Hongdu Liefeng.

This kind of goods, do not clean up, absolutely not good!

One thought of this, Ye Xuan's face immediately sank, sneer again and again, swearing: "Well, you are a beast, just want to fight back, right? Isn't it great? I believe that I have killed you in minutes. ?"

In the words, Ye Xuan has guided the atmosphere of the realm of the shackles of Shennong Ding, and at the same time, more than a dozen drops of evil source liquid was waved by him, floating in the void in front of him.

As soon as the horror power of the realm of the world emerged, the sinus of the frontal emptiness of the sky immediately retired, and the original glory of the body shape of Ye Xuan was swept away.

Then, when the dozens of evil sources were reflected in their sights, the shackles of this scorpion slime were instantly purple and swaying, and the retreating figure came to an abrupt end.

However, even though the ruthlessness of the lord that was pulled out by Ye Xuan disappeared, even the ten drops of evil source liquid were quickly taken up again by him, but in front of the tens of thousands of miles away from the sky , but always suspended there, did not dare to have any changes, but did not want to leave.

In the end, one of the mood swings that had been pleading with the initial appeal was carefully extended to Ye Xuan.

The other party, under the coercion of Ye Xuan, finally confessed to the soft!

"From now on, you can help me lead the tens of millions of gold Slim people, you must do so, and you will have your own benefits in the future. Just the kind of evil source, I will see the occasional supply of a drop to you."

Satisfied with the big feeling, Ye Xuan nodded, did not bend around, directly opened the door, and finally threatened: "If you are not obedient, you can give it a try, since I have the ability to train you, I also have the ability to erase your existence! "

It was also at this time that a familiar system sound was heard in his mind, and the battle was finally completed!

In the middle of the wave, the Void War and the War of the Years were simultaneously sacrificed by Ye Xuan, and they were smashed into the void together with the sorcerer La who had previously sacrificed.

The three battle squads are lined up in one line, and the appearance is the same, but the colors are different.

Gray Void War!

Scarlet sorrow!

Golden years of war!

Looking at these three star-studded killers, Ye Xuan is full of pride!

At this time, there were tens of millions of emptiness soldiers in the Void War, but the other two battles were still empty.

Ye Xuan did not hesitate any more, even if all the souls and beasts were sent into the soul of the war, then tens of millions of gold slime migrated from the survival of the Hoshino, and settled in the thousands of years of war. A hive node.

After doing all this, Ye Xuan turned to the purple gold slime that floated in the void in the side.

The other party is obviously hesitating. Its wisdom is not low. At this moment, it is weighing, and Ye Xuan has not urged him. He decided that if the Zijin Slim of this Qiankun environment refuses, he will turn and leave, Ye Xuan will not hesitate. All means, kill it!

In the end, Zijin Slime still did not let Ye Xuan disappoint. Perhaps it could not resist the temptation of the evil source. Just now, Ye Xuan offered a dozen drops at random. Obviously there is still a lot of

inventory in his hand, as long as it performs well. Occasionally giving it a drop from time to time, it is completely credible.

With this expectation, Zijin Slim's body shape has turned into a purple gold glory, breaking into the core honeycomb nodes of the years of war.

At this point, the three major wars are all completed, and Ye Xuan can sacrifice them individually or all at any time... If the latter, the three major wars will move, and the horror power will be revealed under a volley, even if Ye Xuan, now, can't imagine it.

Even if you face the star lord, you may not have the chance to kill it!

"Calculating the time, this time in the black hole of life and forging the war for several days, the situation outside is not known to what extent, it is time to go out and wander around!"

In the muttering, Ye Xuan waved the three battles into the immortal world, and then swayed and rushed toward the exit of the black hole of life.

Originally, this time before leaving Tianji mainland, Ye Xuan also handed over the three body-specific body shells, and his hands including Emperor Shaofeng and Sha Baofeng, a total of nine have been refining, erasing the Tianji Branded electronic awareness.

If there is no accident, let the three of the nine electronic consciousnesses settle in the body of the three emperors, and Ye Xuan will have three more avatars, even if there is no mastery of the star, at least The situation is still promising.

He originally planned to implement the matter before he left, but now it seems that because of the forging of the soul and the war, it took away the planned time, and this thing is only temporarily suspended.

After all, the nine electronic consciousness in his hands has been completely refining, erasing the brand of the celestial beings, but the three emperors who have just arrived are not yet handed over to the system for comprehensive inspection and refining. In the event that the three bodies are hand and foot,

leaving some hidden secret doors or backhands, when the electronic consciousness chosen by Ye Xuan enters the body, it is very likely that it will happen. Unexpected accident.

Therefore, for the sake of security, he can only temporarily put the matter on hold.

Now let's go out and wander around to see how the big situation in the first cosmic plane is now, and then make a decision on the next step. If there is nothing, then you can take some time to immediately take the three avatars. Implementation, otherwise it can only be postponed and left for later...

Chapter 3632: Chanas layout

In a few days, the Pilots of the Celestial Pioneers led by Jero were able to reach the central domain of the Devil's Star Field. The virtual sky not far from the front is the Magic Emperor!

After all, it is a three-kilometer star-rated warship, fortress and fortress. The huge fleet of more than 10,000 ships comes from the front of the Devil's Star Field. It will take a few more days.

But at this moment, the entire fleet slowly slowed down, and there was a rhythm of stopping.

In the top command cabin of the flagship fortress, the commander Jero was full of dignity and twisted his brows into sinking...

The only thing he thinks now is to immediately return to the Tianji Star Field. After all, the Tiancheng City is in chaos. The situation in the first universe is different. Nowadays, all the servants of the servants are likely to repel the celestial family. He only leads a Pioneer fleet. Strolling in the universe, it is possible to be dumplings at any time!

However, to return to the Stars, you must first leave the Devil's Star Field, the front of the Magic King is the only way.

But now, more than a dozen of the devil's ethnic groups have been detained by the emperor, and they have all returned to the demon emperor. Among the first cosmic servants, the devil's ethnic group is the strongest of the top three in the comprehensive combat power. Nowadays, all the people have a tendency to fight against the celestial family. Can they release it?

This is what Yero is worried about.

Behind the direction of the battlefield in front of the Devil's Star Field, after the Second Universe Coalition returned to God, it has now been fully opened and is being chased. The situation is quite bad for Jero, there is a roadblock before, and there is Ask the wolf!

When I thought that my broken commander had not been beaten after taking office, but he went to clean up the mess, Jero had the urge to hit him.

People are more popular than the people who are dead, and they are too sad to destroy!

"Yero, what is the problem with this?"

Just at this time, Chanas walked over with a smile, a look of concern.

"You are a big life. The singer of the star singer has not killed you. Like the traitor of Sha Baofeng, he has been alive and kicking for half a month..."

Jero frowned, the sullen color of his face: "It is a curse for a thousand years!"

"You are right, I am indeed a scourge, but for a thousand years... not enough!"

Chanas's mouth outlines a strange smile that is quite interesting. The words have already been shot: "Since you are upset, I don't know how to decide, let me decide to help you."

"boom!"

The voice did not fall, and a horrible and savage sigh of relief had already slammed out of his body. The first time he bound Jero's body and made him unable to move.

The latter is only the cultivation of the twelfth emptiness, and now the seed of the crystal life in the body of Chanas is awakened, and the body of Chanas is taken away, which is equivalent to the regeneration of the old ghosts of Wenxing. In the early days of the dynasty, the cultivation of the environment was like crushing Jero, just like playing.

"You are not checking..."

The sudden change made Jero stunned. He seemed to realize what it was, his face was abrupt, but unfortunately, he didn't wait for him to finish his words, his figure was already soft!

"You will also become a traitor to the celestial family, because the old man... needs it!"

Chanas's mouth outlines a cruel smile, and the body has an invisible crystal consciousness that stretches out and penetrates into Jero's eyebrows.

He is in refining, just like Ye Xuan's power of engulfing the system, refining the electronic consciousness of Sha Baofeng and Emperor Shaofeng, but Wen Xing's old ghost as the source of the mechanical source, he's for the Tianji The electronic consciousness is too familiar. Although it can be done with the help of the phagocytic system, it can easily do this, erasing the brand of the celestial consciousness in the consciousness of Jero, and making it an electronic avatar outside the crystal consciousness!

A few minutes later, Jero opened his eyes and climbed up from the ground with a blank expression. He stood on the side of Chanas, and listened to the posture of the dispatcher.

"In the future, you will still be your Jero, and I am just a generation of aunts who are begging around you, but Tianji City can't go, and find a reason to stay in the Devil's Field."

At this point, Chanas's face was already cold. He spoke up and looked at Yello's eyes. He turned and went: "I can't do it. Learn Shabaofeng, go back to the Tianji, and cooperate with the devil. In one sentence, I have to stay here until the old man waits until the kid automatically finds the door..."

.....

The Magic Emperor, the royal palace in the inner city of the Devil!

Mo Taiye and so on more than a dozen devils of the dynasty of the emperor, as early as a few days ago, they have returned safely. At this moment, they are talking with the emperor Mo, the contemporary emperor Mo Qigong and several democrats are not born for a long time. The old monsters gathered together to discuss big things.

For everything that happened in the city of Tianji, until this time, the Emperor Mo asked Tian and the uncle Mo Qigong and others, still full of shock.

Although they have confidence in Ye Xuan, they feel that he has returned to Tianji City this time, and most of them can rescue more than a dozen emperors who have been detained by the demon community.

However, the movement that Ye Xuan finally made was so great that not only the imprisoned members of the first universe slaves and all the royal family members of the entire imprisonment were expelled, even the imperial prisons were blown up. It's even more chaotic... but it's really impossible for them to imagine.

If all this has become a fact, it is undeniable that Mo Wentian and Mo Qigong and others can hardly believe that Ye Xuan is just relying on him alone, actually in a short period of time, will be the whole The great situation of a universe has been completely disrupted.

Undoubtedly, with the royal hostages detained by the servants of all ethnic groups all returning to their respective ethnic groups, the situation faced by the Tianji nationality is unprecedentedly severe.

Coupled with the approach of the Second Universe coalition, even if they want to change all of this, they will send troops to conquer the servants of all ethnic groups. I am afraid that they will be heartless and powerless, and at least they will not be able to implement them in a short period of time.

For the Devils, they thought that the more than a dozen emperors who were pledged by the Tianzu people, after being successfully rescued, the whole democrats need to face the pressure from the Tianji City.

Even if the rescued emperors did not show up in the Devil's City, once the Tianji clan questioned it, the Devils always had to give a statement.

But now the situation is completely different. The Tianji nationality has been thrown into the back of them, at least in the near future, there is no need to worry anymore. Nowadays, the problems considered by the top of the Mozu people have become how to unite the first universe slaves. Together, they will cope with the second cosmic coalition that is approaching from the frontier battlefield of the Devil's Star Field.

In addition, there is also the Tianji clan fleet that just arrived at the edge of the Devil's Star Field and seems to want to transit and return to the Tianji City!

After some discussions, the top officials of the demons disagreed, some called release, some called annihilation, and it was difficult to decide.

It was also at this time that the scouts outside came to report: The Pioneer Fleet of the Tianji nationality suddenly opened all the way, driving at full speed, and rushing toward the Emperor Star...

Chapter 3633: Keep up with the times

The Pioneer Fleet of the Celestial Family has a tens of thousands of stars, bastions and fortresses of more than 3,000 meters. The scale is still quite large.

At this time, full-scale full-speed dialing, the soldiers came to the magic king, the first time to make the entire magic king star defense circle nervous.

In the star docks of the magic guards and the magic guards and the magic stars, a large number of warships sailed out, paved the way, and the whole family greeted the family.

However, the follow-up development turned around and fell to the eye of the land.

The commander of the Pioneer Fleet, the core of the Celestial family, the younger generation of the second generation of Jero, almost completely out of the flagship expulsion, came to the magic star, behind him, only followed by Ye Xuan The demon emperor leads the chass one!

"What? Alliance? Cooperation? Even the Devils?"

After a short period of time, when the high-ranking people of the Devils listened to Jero and finished their words, the contemporary emperor Mo Qigong even screamed unexpectedly and stared at Jero, almost squinting his eyes. Come on: "Don't you want to return to Tianji City? Don't forget, you are the second generation of the talented younger generation!"

"How about that? Is the talent throwing Shabaofeng on my eight streets, not to renegade the Tianji people? It has also caused such a big movement. Now the big situation of the first universe has changed, and the air movement of the Tianzu people will be exhausted. The fools went to black with them, and you said, the younger generation, the concept naturally has to keep up with the times!"

At this time, Elo is equivalent to the electronic consciousness of Wen Xing's old ghosts. The consciousness has already been fully influenced. In the face of this situation, his old traits are slippery, completely ignorant, coping with ease, talking and talking. A wave of words: "You think that I have milk or a mother, and I am born with a bone." In my opinion, the air of the first universe is basically irrelevant to the Tianji people and will fall in the rankings. In the hands of the servants of the top three..."

"And the reason why I chose the Devils is that the fleet that I am now in is in this star field, and I will not be able to form an alliance with you. On the other hand, it is the hard work of Chanascha's brother. I made a decision to bite my teeth!"

"In short, my fleet does not enter the inner defense circle of the magic king Samsung, and it is deployed on the periphery of the Samsung defensive circle. As long as we join hands, we will smash the first wave of attacks of the second universe of allied forces behind us. Repel it!"

"Then, then you can get the time, join the horizontal and horizontal, and cooperate with other slave groups in the nearby star domain to form a solid alliance. At that time, you will have the foundation and strength to compete for the power of the first cosmic hegemon... .."

I have to say that this speech of Jero is still very pertinent. No matter whether it is Mo Qigong or Mo Huang Mo Tiantian, or Mo Taiye and others, none of them can pick out any problems.

The fleet of the people does not enter the inner defense circle of the Emperor Samsung, but only in the periphery, and immediately with you to meet the upcoming second cosmic coalition, only to fight back, can get a certain buffer time, go Let the devils cross the line and reach a consensus with some of the slave groups in the nearby star field to form an alliance...

I really want to say that even if the alliance wins the general trend in the future, it will become the new hegemon of the first universe. At that time, the top is also the demon family. People just drink and drink soup, but now they are actually on the ground. The battleships were all thrown out and placed on the first line to sell their lives.

This kind of sale can't be found with a lantern!

In the end, after thinking about it, after confirming that no suspicious points could be found, the tops of the devils and the royal family exchanged a look, and finally they could only shake their heads and sigh...

"The young people's thoughts really are advancing with the times. We are old and can't understand."

"But it is not completely incomprehensible. The Tianji family is basically the general trend. Boy, you are a smart person!"

"Yes, we will fight the world with our devils. Although it is impossible for you to pick the peaches in the last place, at least, it will be annihilated by the huge wheel of history together with the Tianji people. It is too much too strong... "

At this point, the Devils basically accepted Yello's sincerity, and the latter did not say anything, and even changed. They ordered the first time, so that the battleships that stayed outside the Devil's Samsung's inner circle were all turned around. The mouth is always pointing to the star road when coming, that is, the direction of the front of the devil's star field that is about to appear in the rear!

At the same time, the Emperor Samsung also has a large number of ships out of the inner defense circle, and the newly-launched Tianji Pioneer fleet mixed together to build a virtual defense line that stretches for millions of miles.

Only when the second cosmic coalition came after the pursuit, immediately began to fire the guns, and opened the first battle of the first battle of the starry sky after the first great situation of the universe...

.....

Under the control of Weng's old ghosts, Yero's success in investing in the Devil's family was the result of the activation of the second battle form by the main city of Tianji, which turned into a million-meter-diameter terrorist super fortress and entered the first universe. The wormhole on the edge has since completely migrated away from the first cosmic plane.

With the departure of the fortress, the disappearance of the first cosmic plane, the star network signal of the first-level main network of the star network, which originally enveloped the entire universe of the universe, finally disappeared completely.

As the hegemon of the first universe, the Tianji family covers the first-level main network of the star-space network of this entire plane. The core of the Tianji family is the immortal star-shaped super-brain inside the Tianji City.

The three cosmic planes, only two immortal stars, a monumental dynasty in the Terran technology camp, the immortal super brain, built the third universe of the first-class network, even the federal headquarters of the Faro The network is all linked to it.

The other is the immortal star brain in the main city of the first universe.

As the main city of Tianji leaves this plane, the central signal of the first universe's first-level star network is blocked by the cosmic plane barrier. Then, the first-level main network of this plane is naturally full of instants. Now!

Since then, all the stars of the entire first universe, except for the adjacent star fields, the second-level stars can be connected to each other within a certain distance, and all other distant and distant stars and ethnic groups, all Broken direct contact.

That is to say, the entire first cosmic plane has been degraded from the state in which the information as a whole is instantaneously accessible to the current state of instant information.

The information is not accessible, or the inability to achieve immediate and unobstructed exchanges, the consequences will be difficult to predict, at least, the thousands of ethnic groups living in this plane can no longer be contacted as before. , communication and exchanges, the entire era of the Warring States of the first universe, since then, all come!

Before the first-level main network covering the entire plane was completely smashed, the last message received by almost all ethnic groups was surprisingly consistent: the demon family, the alliance with the celestial family, the celestial fleet, the squadron The fleet of Terran, after the mix, launched a long line of defense!

No one knows whether this is the conspiracy of Wenxing's old ghost...

Chapter 3634: All are routines

In today's prosperous world, the starry sky environment, the information of a star field is not smooth, the consequences will be a small range of uneasiness, and the information flow of a whole universe plane is not smooth, the consequences will be a wide range of panic. And chaos.

Under normal circumstances, this is still the case, not to mention that before the sudden interruption of information, the major groups of the First Universe almost all received a shocking news for them, just like a blockbuster?

The demon family, in fact, colluded with the Tianji people, and they were guilty!

This is not a hearsay. Before the signal of the primary sky of the first universe was interrupted, the information received by the slaves included some image information, clearly showing that the Heavenly family was led by Yero. The Pioneer Fleet, outside the Magic Emperor, mixes the scene with the fleet of the Devils!

There is no doubt about the facts, and it is even more irrefutable!

After the news was confirmed, the major stars of the first universe, the voices of anger and roar of some great powers and star owners.

Basically, the elites of the various ethnic groups who had just been smashed out of the inner city imperial prison not long ago are roaring!

In particular, some slavish bones, such as the giant tyrannical, do not want to reverse the ethnic group of the Tianji nationality. At this time, they are even more resentful.

They have a kind of stepping stone that is used by the demon family, and they feel a sense of anger!

"The devil, you are too shameless, too shameless!"

"Conspiracy! There is a conspiracy! There is absolutely a conspiracy..."

"Mo Taigong, a very good calculation, there just took us out of the imperial prison, and now all the prisoners are sold in U-turn, Nima is not a human!"

"Hey panic! The old man is cheated, the routine, all are routines, the old man understands now..."

"Hey!"

"Hey..."

.....

Almost all of the first cosmic slaves were angered. Then, with the exception of a few weaker ethnic groups, more than half of the other ethnic groups all dispatched fleets more or less and headed for the devil's domain.

In their view, the Devils are indeed too much this time.

It doesn't matter if you want to go to the top of the world, but everyone is a brother and a brother. You can't do this.

This is clearly the meaning of climbing on the heads of other ethnic groups. While crawling, he also stepped on the heads of other ethnic groups. This is to step all the other ethnic groups to the bottom of the water. The rhythm!

In a word, this kind of behavior has already caused public anger, the general trend, such shameless ethnic groups, the slaves of the entire first universe, all together!

For all this, the Devils were completely kept in the dark, completely ignorant.

In today's first universe, the signal of the primary star network covering the entire plane is interrupted, and the magic star can only connect with several slave groups around the devil's star domain, and these ethnic groups are obviously associated with the democrats. Don't be good, the policy of far-reaching near-attack is the same in the starry environment.

Don't say that the Emperor Star did not take the initiative to contact these ethnic groups. Even if there are, people may not tell the truth. They are all waiting for the other slave corps fleets from all major stars to come, and then the various fleets are assembled. Become a coalition army, a total of demon magic star!

At the same time, the various ethnic allied forces from the Second Universe also came to the Devil's Star Field in a mighty manner. The soldiers came under the city and opened in the void. A fleet of ships was so vast that the line of defense stretched for a million miles. A large universe of voids was covered.

The whole army is led by nine ethnic groups including the bloody, the Qingpeng, the warrior, the silver, the bull, the golden eagle, the Cailu, the greedy wolf and the tree spirit. The fleet is located in the center of the line of defense, and the two lines of defense are the fleets of other ethnic groups.

This star-level battle of the cosmic plane level has evolved to the present, and only a war broke out.

In the opening battle, the joint fleet from the second universe of the Commonwealth suffered a big loss. Even the great powers of Qiankun had fallen down a few. Although a star lord tried to shoot, but in the end it was also a secret. The young tribe of the family, Sha Baofeng, was scared off.

All of this has already been preached out, and countless forces in the three universes are well known. For the various families in the Second Universe, this is their shame. The races are not just the commanders of the Pioneer fleet and the old monsters. Even the middle and high-ranking people in the rear base camp feel that they are dull and shameful.

Nowadays, the first cosmic situation has turned sharply, and the Tianji family broke out. The Shaosha Baofeng, who had just been sealed by the fire line, actually turned his face on the spot when he returned to Tianji City to accept the seal of the ceremony.

Even the imperial prison inside the main city of the celestial plane was smashed by him and then directly destroyed.

After this incident was confirmed, the high-ranking members of the Second Universe coalition were very happy, and they felt that they had a bad breath. Some people who had previously gnashed their teeth at Shabao Feng changed their impressions in an instant, and felt that this guy was really It's so cute, how to see how pleasing to the eye, it's amazing, what did you find before swollen?

Some people are secretly vigilant, and feel that this is another super-devil king. The behavior of this guy is enough to prove that he is not only a genius, but also a temperamental means, not to be weaker than the fox and the lord. It is the lawless Lord.

The day before was still in the frontier battlefield of the Devil's Star Field and the Second Universe Federation. The entire huge Second Universe coalition was suppressed by him. It is an infinitely beautiful place and definitely a hero of the Heavenly Family.

After turning around and returning to the Tianji clan, he immediately stirred his old nest to the bottom of the sky. This kind of thing can't really be done by people. Don't say that if you really did it, you couldn't even think about it.

If you exist, you can't provoke it. If you see it later, you have to hide. This is definitely a demon king!

But now, the kid is out of the celestial family. It is estimated that he will not show up again in a short time. Now the situation in the first universe has been chaotic. Although the servants and ethnic groups have not clearly stated their intention to repel the celestial family, this matter Basically it has been nailed on the board, not running.

The entire first cosmic plane is now a chaos, and the real chaos will soon come.

For the Second Universe Allied Forces, this is definitely a great opportunity to meet the demand. Before that, their purpose was only to attack the West by the head of the war with the Celestials, and push the front line until the source of evil. The domain will then stop, and according to the instructions of the ancestors of the family, explore and even occupy the whole source of evil.

But now it seems that the final plot of this plane-level starry sky war can be modified. The first universe is vast and rich, and resources are abundant. Now that the opportunity has come, it cannot be easily let go.

The top leaders of the Second Universe and other ethnic groups in the Second Universe have made a secret decision. This time, at least half of the first universe must be won. Everything starts with the Devils in front of us...

Chapter 3635: Soldiers under the city

Even if it was only a Pioneer ship, the Second Universe and the Allied Coalitions still assembled a million warships. However, in the first battle of the front of the Devil's Star Field, the first battle of the Devil's Stars was destroyed. The total number of warships and fortresses and even fortresses that were destroyed by the destruction was nearly 200,000.

Today, this coalition is only the size of an 800,000 warship.

However, the number of the first universe slaves has reached nearly a thousand, and the total strength of the thousands of ethnic groups has been added together. It is definitely an astronomical number.

Even so, the second universe of the various ethnic groups, this time is still ironic, to take advantage of the weak period of the heavenly family, in one fell swoop to take half of the first universe to the hands, divided by the federal tribes, establish a star colony !

After this decision was made, the other side of the cosmic wormhole at the front of the rear devil's star field, the follow-up fleet of the second universe of the various ethnic groups, has begun to assemble, and will soon pass through the cosmic wormhole and drive over.

At present, the second space of the Second Cosmic Coalition Pioneer Fleet, which has a total strength of about 800,000, is the most decisive command that was received in the past. It is the first roadblock on the road before the war of conquest, that is, the demon family. Take it thoroughly.

Either annihilate this race, or drive the demonics out of this star!

In a word, after the second war, the entire magician star field must be swept away and thoroughly grasped in the hands of the Second Universe.

Although the Devils are powerful, among the first cosmic servants, the overall strength is ranked in the top three, but even so, their total strength is hundreds of thousands of warships. After all, the total number of tribes in the entire demon community is there. Only a few million, and they are not like the Celestials, a tribe can control a large number of intelligent robots.

The number of tribes limits the size of the Devil's fleet!

Although the Celestial Pioneer Fleet is also on the outer line of the Devil's Star in front, but the scale of only 10,000 ships of various types, in the overall situation of the war, it does not play much role.

In a word, this battle, the second universe of the various nationalities are full of confidence, and is ironic, must win the magic king!

The war soon opened the curtain!

The Second Universe Allied Forces 800,000 warships of all kinds of warships were fired together, and a whole piece of voids burst into splendid fireworks. Numerous energy beams of different sizes spurted toward the front, intertwined and turned into a huge one. Destroy the giant net and cover the outer defense line of the Emperor Samsung.

On the outer defense line, in addition to the more than 10,000 Pioneer fleets led by Jero, there are more than 400,000 warships of the Devils.

All the warships opened the energy shields at the first time. At the same time, some 100,000-meter-diameter large fortresses opened the Void Oscillator, and constructed a chaotic void block in front of the outer defense line to prevent the warship launch space in the other camp. Jump and launch a suicide attack.

More than 400,000 to 800,000, the number of warships on both sides is very different. The 400,000 warships of the Devil's Samsung defense line have been crushed from the beginning, and the warships are being destroyed every moment. Not an opponent, the fiasco is just a matter of time.

In the face of all this, behind the defense line behind the magic king Samsung internal defense line, a group of demons are worried.

It was also at this time that a high-ranking demon of the Devil's Royal Family suddenly came to the message. From the rear of the Emperor Samsung, the void in the first universe, a huge fleet of slaves and all races is coming. In all directions, the total number is at least one million.

At least half of the first universe of nearly one slave servant group has dispatched a fleet, and now they have gathered together a powerful coalition force to open up to the demon star to jointly attack the demon family.

The Emperor Mo asked Tian Tianxi, and thought that he had come to the reinforcements. With the size of the warships of more than 400,000, the servants of the geniuses who were coming from the rear, and the millions of coalitions from the second universe. Swallowing is not a problem.

As a result, the high-ranking demons have not yet recovered from this kind of surprise. The million-strong coalition forces that came from within the first universe of the rear have stopped steadily in the void of thousands of miles away. .

Then, under the leadership of the fleet commanders of several more powerful slave servants, a slave fleet was all in a state of mind, with the directional starry voice system of the flagship of the fortress, yelling at the Emperor Samsung and slashing.

"The Devils, it's time for you to die!"

"Yes, this time the first universe is in great trouble, and your demon family is the culprit!"

"Firstly, I took all the royal protons of my ethnic group out of the imperial prison, and trapped me in a disadvantageous situation. Then you immediately turned your head and went to the Bajie Tianji. This is the rhythm of letting me wait for the ethnic group to die. We will never agree."

"Currently, the various ethnic groups send troops to form a coalition army to crusade, the demon family, and many unrighteousness will be self-sufficient, and your retribution will come..."

.....

As the sound of these crusades came from distant through the directional star-borne sound-transmitting equipment, all the democrats around the Emperor Samsung were all stupid.

Even the second cosmic coalition forces across the battlefield in front of the outer defense line, the high-level commanders of all ethnic groups, have heard the voices of these crusades, and after a few moments, they are overjoyed!

This is really an unexpected joy. I can't think of the situation in the first universe. It has been chaotic to this extent. The demon family has become a target of the public. The million-strong coalition in the back of the sky is actually crusade.

Nowadays, the Devils are simply the enemy of the abdomen, and they have won it with a bang. There is no suspense.

As long as they can win the Devils and completely occupy the entire Devil's Star Field, the mission of the Pioneer Fleet will be completed. Immediately, the Emperor Samsung will be used as the front position, and the attack will be changed to defend, waiting for the reinforcement of the second universe to come.

At that time, as long as the follow-up support of the various ethnic groups arrives, the millions of male lions from the first universe slaves and tens of thousands of miles away from the Devil's Star Field are just a group of chickens and dogs.

In the face of the invasion of the outer space of the universe, they are able to fight in their own nests. What are the fears of such enemies?

Soon, the commanders of the Pioneer Fleet of the Second Universe, headed by the \*\*\*\* Yi people, issued orders for the total attack. In any case, they won the Magic Samsung at all costs.

The situation has deteriorated in an instant, and the back of the enemy is under the enemy. The Emperor Samsung is in jeopardy, including the Mo Huang Mo Tiantian, the contemporary emperor Mo Qigong, and the emperors of the royal family, such as Mo Taiye, who just returned to the family. They all have no idea. Thoroughly messed up.

Under the city of Bingcheng, the key moment for the survival and death of the devils is here!

Just as the top of the demon royal family was in a panic, all of them were worried, so that no one expected to appear. The demon emperor led Chanas suddenly jumped out and roared through the internal shipborne communication system. The ground shouted to Jero in front of the battlefield...

Chapter 3636: Yokohama Nether War III

"Yero, what are you still grinding? It is because of you that it has led to the crusade of the servants of the rear. Now that the Emperor Samsung is suffering from the enemy, don't you have any indication?"

"Once the Devils are destroyed, you have no way to live. It's such a time. Is it interesting to keep your fleet of more than 10,000 planets?"

"It's just some smart robots. Are they more important than the lives of our democrats?"

"Is it more important than the survival of our devils?"

"It is now, start right away..."

In the last sentence, Chanas was almost snarling and stunned the top of the royal family, such as the demon emperor Mo Wentian.

In the vagueness, they seem to have guessed the meaning of Chanas, all of them face each other and have a feeling of being thundered.

No one understands how Chanas did it, and he was able to take Yerro, the commander of the Pioneer fleet of the Tianzu, to this extent.

Although Mo Taiye is the horror of the ninth-order grand perfection of the star's main territory, the crouching in the body of Chanas is the result of a crystal seed of life differentiated from the source of the machine. This crystal consciousness is mysterious, even if it is The perfection of the star's main territory is not perfect.

The reason why Chanas did this is obviously just to be able to stand firm at the Magic Emperor Samsung. Although he expects that mysterious guy will appear, but when is it, he is not sure.

Before he arrived, the Emperor Samsung could not have an accident, and the identity of Chanas could not be erased, and he had to try his best to win the battle, regain the trust of the devil's group, and enter the core decision circle. So, the mysterious boy arrived. After that, he had the opportunity to approach him again, and to carry out various arrangements and plans for the follow-up...

"Hey!"

"Hey!"

"Hey..."

The dense and weak emptiness of the tremble sounded from the army of the 400,000 warships in the outer line of the Devil, but it was not the movement of the space oscillator.

In fact, at this moment, the hundreds of large and small fortresses that were originally responsible for opening the space oscillator and constructing a chaotic virtual defense line in front of the outer defense line camp, have simultaneously closed the space oscillator.

These emptiness and tremors come from the tens of thousands of warships and fortresses and fortresses of the Tianzu people.

At the same time that Chanas's roaring roar was degraded, Jero had already issued instructions to let all the warships of the Celestial Pioneer fleet activate the space jumping ability, without exception, and launched a suicide jump attack.

In the 10,000-plus-size warships and fortresses and fortresses, there is no one who is a Tianzu nationality. The entire Pioneer fleet is only Shabaofeng and Yale. It is the real Tianzu ethnic group, and all others are intelligent robots.

Even if they are suicidal jump attacks, they will execute without hesitation.

All this happened too fast, and the high-level commanders of a fleet in the second space coalition camp opposite did not expect Jero to be so effective. Before that, the space oscillator was opened, in front of the outer line. Construct a chaotic void defense line.

In this way, the second cosmic coalition forces on the opposite side were launched to launch a suicide jump attack.

But now it's good, and the blink of an eye, they have directly shut down the space oscillator, more than 10,000 different warships and fortresses, even fortresses, without hesitation, simultaneously launched a space jump...

"boom!"

"Booming..."

"boom!"

A huge roar sounded, and in the blink of an eye, thousands of large and small fortresses and warships completed the space jump, appearing in the camp of the second universe of all ethnic groups, and began to blow themselves in the first time.

The huge coalition forces with a number of 800,000 warships were in chaos. The suicide-type jumping warships and the areas where the fortresses came, all the warships around them were all like ghosts and gods.

As the huge fireballs continue to appear one after another, the entire second universe of allied coalition camps are in chaos.

"Turn on the space oscillator and turn on the space oscillator immediately..."

"Block these madmen, be sure to stop!"

"Do not mess, can not let the subsequent suicide warships complete the jump, otherwise more than 10,000 warships and fortresses will be fully exploded, and the entire coalition will be overhauled..."

.....

This move is too embarrassing, too sudden, and the high-level commanders of the various branches of the Second Cosmic Coalition have completely chaotic, and no one expected that Jero would be so embarrassed. The devils are selling their lives? It's just that the devil's group is being treated as a grandfather.

When did the position of the Tianji and the Devils actually turn over?

Who is the master and who is the slave?

The demon family is only the servant group of the celestial family. Yello is recognized as the second generation of the heavenly generation. In the case that the newly succeeded Shaozuo Changsha Baofeng has already turned out the ethnic group, it is most likely to become the next patriarch of the celestial family. Existence, is it necessary to maintain the Devil's family so desperately?

With the rise of a huge fireball in the huge camp of the Second Universe, these thoughts first floated from the minds of the high-ranking commanders of the various ethnic groups.

Even the thousands of miles behind the Devil's Samsung, the top leaders of the first universe in the huge fleet were all stupid at this time, and they didn't even understand how it all happened...

In the end, in the chaotic second space coalition camp, hundreds of large and small fortresses and fortresses successively opened the Void Vibrator, and in front of its long camp line, successfully constructed a chaotic void defense line.

More than 10,000 warships and fortresses and fortresses of the Tianji clan fleet have only successfully completed space jumps, entered the enemy camp, and then blew themselves.

The other more than 7,000 warships, because of the emergence of the chaotic void barrier, the space jump that has been initiated has been interrupted, but can only stop this shocking large-scale suicide jump.

Even so, the first round of offensive launched by the Second Universe Allied Forces of 800,000 ships was still successfully curbed, and the final result was both losses.

The Second Universe Allied Forces lost tens of thousands of various types of warships, and the 400,000-strong army of the Devil's Star Field in front of the Devil's Samsung also suffered heavy losses.

The situation is still not optimistic, because the other side is obviously irritated, this time the second space coalition forces ate a small loss, just because they were successfully attacked, waiting for them to rectify, angry and angry, the upcoming second round of offensive, It will be even more crazy and fierce...

It was also at this time that the top leaders of the demonic tribes in the Emperor Samsung were worried about the second wave of the upcoming offensive, the battlefields in the middle of the two camps, the three huge battles. Extremely abruptly appeared,

Yokohama in the void, although silent, but invisibly exudes a devastating killing atmosphere, and instantly shocked the audience...

Chapter 3637: The brain is completely chaotic

Three battles, vain!

The huge bell mouth of 300,000 meters in diameter is facing the direction of the second universe of the various nationalities, and the rear is the outer line of the magic king Samsung!

From left to right, they are lined up in gray, the empty battle of the sky, the golden years of war, and the \*\*\*\* souls of the war!

This is the handwriting of Ye Xuan!

After he left the black hole of life, he rushed over to the Emperor Star. On the way, he captured the star network signal in the void with his personal starry communication system, and explored the current situation of the first cosmic plane.

The source of the first cosmic level of the main network in Tianji City disappeared, which made Ye Xuan feel shocked. In his opinion, the super-dead bomb exploded in the imperial prison, although its power is strong. However, it will not be able to achieve the degree of disruption of the signal to the sky-network-level primary network that covers the entire first universe.

In the vagueness, Ye Xuan felt that there must be a lot of tricks in this. He originally wanted to sneak up on the past and see what the Tianji family was doing, but then he learned the crisis of the Emperor Samsung.

The Pioneer fleet of the Celestial family led by Jerona was actually stirred up with the Devils. Ye Xuan did not want to understand this, but the consequences of this, but he captured the stars from the Devil. There is a comprehensive understanding of the weak signals of the secondary networks of other ethnic groups.

Coupled with the huge fleet of the Second Universe of the Second Universe from the front of the Devil's Star Field, this time the Emperor Samsung is definitely going to make a big deal.

In desperation, Ye Xuan can only temporarily throw the doubts of the Tianji City to the back of his mind, and rushed to the Emperor Star, and arrived at the same time as the suicide jump of thousands of warships of the Tianjian Pioneer Fleet. This piece of void battlefield.

Seeing the warships and fortresses and fortresses of the celestial family, under the command of Jero, he did not hesitate to expand the suicide space. The doubts of Ye Xuan's heart became more and more intense. With his understanding of Yero, this kid Unless it is out of heart, it is impossible to do something that harms others.

But now is not the time to ponder over the doubts. The huge coalition forces of the second universe, which still have 800,000 warships, have been disrupted. Ye Xuan feels inseparable. For a moment, he did not hesitate to rush into the void battlefield.

In the middle of the wave, the three forgings were completed, and all the fighting forces that had formed the fighting power were sacrificed together.

This is clearly to take advantage of the timing of the chaos of the Second Universe and allied forces, to destroy a blow, and to defeat the enemy's huge Pioneer fleet completely!

At this moment, with the sudden emergence of these three huge warlords, the battlefield emptiness is close to all the people who saw this scene, whether it is the second cosmic coalition in front of the front line, or the first cosmic slaves in the void behind the magician Samsung. The fleet, without exception, all fell into a state of sluggishness in the first place, and then the exclamation sounded like a flood, and they rang...

"Psychic warfare? Spiritual warfare of the devil? God, actually came three times at once!"

"This is not right! What happened in the end? According to our intelligence, isn't the Devil's family only a spiritual warlord? And it has been taken to the Tianji City by Sha Baofeng. Has it swollen and made three?"

"The old man understands! Conspiracy, this is completely a conspiracy..."

"It's too bad! The devils are too bad. They are prepared at all. They have already dug up the pits with the Tianji people, just waiting for us to jump into the pit!"

"Too shameless, too despicable! The devil's family really colluded with the Tianji nationality. These three spiritual wars are not created by the devils. It is clearly made by the Tianji people day and night, and they are made by secret means from Tianji City. Sent to here..."

"We are still fooled. This is a trap. It is a trap from the beginning, the retreat of the first cosmic servants, and the chaos of the celestial family. All this is a conspiracy."

"Even even Sha Baofeng rebelled out of the Tianji clan, which led to the imposing of the inner city imperial prison, it is very likely that they calculated it well, for the moment, the three battles are empty, and I am waiting for the entire army. The camp has already fully penetrated the Devil's Star Field. Even if it is a U-turn, it is too late. This is the rhythm of a pot!"

"Yes, it must be like this. Didn't you see a million-strong coalition consisting of slaves and servants in the back of the Emperor Samsung? The shit's crusade, they and the devil are just a group, just waiting for three. After the battle was destroyed, with the fleet of the Devils, rushed forward to beat the dog!"

"Retreat! Retreat immediately, retreat at full speed! Let's be fooled..."

.....

As these exclamations sounded together, the long line of the Second Universe coalition was completely chaotic, with nearly 800,000 warships and fortresses and fortresses, not yet from the previous wave of suicide attacks. In the case of being freed from the chaos, it has been chaotic again and has been withdrawn at full speed.

And in the void in the thousands of miles behind the Emperor Samsung, the flagship of the Allied slaves, composed of the first cosmic slaves, the flagship of a slave fleet, the top leaders of all ethnic groups are facing each other, the whole brain It's all messed up.

The exclamations from the Second Universe coalition were too plausible, and even they were smashed at the moment.

Is it... is this really the case?

The chaos of Tianji City is fake?

Sha Baofeng's rebellious celestial family is fake?

The servants of the servants of the servants were fleeing from the pledges, so that the imperial prisons of the celestial kingdom were all over the world... all of this is also fake?

Is it to lay down the game in front of me, will this million-capital fleet from the second universe be completely smashed?

These thoughts flashed through my mind, and the high-ranking commanders of the servants of the servants had one count, and all their minds were chaotic.

Even Mo Qigong, Mo Taiye and Mo Huang Mo Wentian in the Emperor Samsung suddenly heard these words in a cold, and the whole people were all embarrassed.

Of course, what makes them even more guilty is... The three battles in the emptiness of the central field in front of the front, and what is the swelling?

The virtual battle on the left side, the demon emperor Mo Wentian and Mo Qigong and others naturally know each other. They were just transformed by them and they were handed over to Xuan Huangzi to Tianji City. It seems that they later fell into Xuan. In the hands of the emperor.

But this is not right. If this is the case... Where are the other two war lords? Xuan Huangzi is only one person, and he has no ability to build it. It is a Tianji family. If the peripheral industrial circle is working overtime, day and night, there is still some possibility.

Can it be said that all this is really a conspiracy of the Tianji people? All the servant groups, including the Devils, are all kept in the dark?

Or, it's all about the Xuan prince and the celestial family. The kid... sold the democrats?

Chapter 3638: War Lama screams

As the three battles appeared, they suddenly swayed in the void, and the whole void battlefield was instantly chaotic!

The Second Universe and the Allied Coalition Forces have determined that all this is a conspiracy. The purpose is to annihilate the entire coalition forces. What is irritating is that they are really deceived. Even the Shabaofeng rebels who have just accepted the patriarch's seal I have never doubted it.

It's a pig, not even a pig!

In the coalition forces, the high-level commanders of the major groups of the Second Universe were almost vomiting blood, and the intestines of the repentance were green.

The first cosmic slaves and allied coalition forces were also skeptical. They also believed that it was a plan of the demon and the celestial family, and they kept all other ethnic groups in the dark.

Many of the high-level people who really intend to take this opportunity to turn out the Tianji nationality have begun to secretly play drums. They worry that the Tianji people still have a layer of meaning, that is, take this opportunity to try the loyalty of other servants and ethnic groups.

When they think about it, they hate the devils more. It's not something. It's the same as the slaves. They are actually the goddess who sit on their heads and make a fortune. Together, they will harm other suffering brothers!

This is really a misunderstanding, even Ye Xuan did not expect that he was already speechless.

It's no wonder that these guys think so. The three battles suddenly appeared. Even the top of the devil's royal family was thundered. They began to wonder if Ye Xuan sold them, let alone other?

Except for the Tianji family, in such a short period of time, it is basically impossible for other ethnic groups to create two other wars.

This is a fact!

If the non-Wen Xing old ghost knows all the causes and consequences of the whole incident, I am afraid that even he will be suspicious, but at this moment, although he is not like other people, he suspects that Ye Xuan and the Tianji clan collusion, but the mysterious means of Ye Xuan, I took another earthquake.

He couldn't figure out how Ye Xuan had made two other battles in such a short period of time. This is a huge monster of 300,000 meters in diameter. It can be done without saying it overnight.

A touch of Limang flashed through the bottom of Chanas, but it was quickly hidden, but in his look, there was a hint of excitement and excitement.

The more mysterious the other party is, the more valuable he is for him, and his interest is getting stronger and stronger...

All this, Ye Xuan did not pay attention!

Whoever misunderstood, let him misunderstand, just to keep himself mysterious. Now, the Tianji people still have not revealed his true identity. This pair of leaves is very surprised, a little confused, I don't know. What medicine do they sell in the gourd?

But no matter what, this is good news. As long as the secret of identity is not made public, then Ye Xuan can be less but a lot of troubles. As for the Tianji people secretly doing other problems with their hands and feet, look back and pay more attention to it.

Since they did not disclose the secret of their identity, then Ye Xuan naturally could not expose himself. He had already restored his original appearance, which is what the outside world knows, but now he is sitting in the soul of the war. Inside, he did not know which identity to appear with, so he simply did not come out.

However, this matter can be considered later, but the arrow in front of the arrow has been hit, but it has to be immediately activated.

The second cosmic united army, which was opposite the millions of vacancies, was still in a hurry and chaotically evacuated. Not far away, Ye Xuan immediately issued an attack command to the sorcerer.

Although the power of the three major battles is bound to be more powerful, but here is the magic king's domain, Ye Xuan is really worried about directly creating a super black hole, in that case, you can't turn to the devil's group. .

For this reason, he did not even dare to use the Void War, and the unique biological wave frequency of the Void squad has the power of the Void Rule. The turbulence of the emptiness in the outer industrial circle of the Tianji City is a lesson of the past, Ye Xuan really does not Dare to catch which place to catch a random bombardment.

And the other battles driven by tens of millions of gold slimes, the power of the law of time and space, in Ye Xuan's view, its power should be the most powerful of the three wars, naturally Stay at the end of the use, and hit it.

So thinking about it, and now it is suitable for the activation of the start, and only the soul of the soul that he personally sits on!

In the soul of the battle, there are tens of millions of soul beasts in thousands of hive nodes. After Ye Xuan's thoughts spurred the blood of the soul, all of them started the action, thousands of honeycomb knots of three kilometers in diameter. In the point, tens of millions of soul beasts are fully motivated to evoke the spirit of the souls unique to their ethnic groups.

These unique spiritual wave energy gathers from each honeycomb node, along the special pipeline between the honeycomb nodes, all of which flock to the core nodes of the core circle and gather together.

In the end, with the sudden tremor of the blood of the sorcerer floating in front of Ye Xuan, this unique horror of the horror of the horror turned into a sharp and screaming sound, like a roaring sea, instantly lingering vent.....

"Hey..."

The screaming screaming screams of the emptiness, the entire vast expanse of the starry field, trembled in the whistling sound of this sudden coming.

This horrible scream that is sharp enough to tear the sky, instantly stunned the innumerable strong people in the sky and the sky, and even the mind and consciousness, all at this moment, it seems that the spirit body has been drawn by howling I want to leave the body.

In the void in front of the soul war, there is an invisible tidal wave like a starry sky. It vents out from the core node, and continues to enlarge along the outer nine-layer ring of the war, finally turning into a piece. The invisible force that plunges into the sea, in a moment, will face the huge void of the huge trumpet... completely enveloped in the invisible!

There is no shock scene of the void!

There is no thundering blast!

There is no emptiness whirlpool like a black hole...

Some, just a savage to the indescribable voice of screaming, swaying this corner of the void.

Even the invisible shockwaves are not there!

As if this full blow of the sorrowful war, there is no substantial lethality at all, and it can't shake everything in the field of vision. It is just hearing, and it has been greatly challenged.

At this moment, all the strong players in the three camps in the sky are feeling a bit worried. This is really the wind, the perfect interpretation of the rain, and it has fallen into the eye, full of empty clouds!

But at this time, Ye Xuan grinned.

At the same time as the smile on his mouth slowly sketched out, in the front of the virtual air, the nearest two universes of a certain family of warships also suddenly spread a stern to the extreme, but extremely short and tragic sound.

"what....."

"what!"

.....

One by one, the half-interest time has already been densely swayed, but it still sounds like a sound, but it still smells only, but it does not see any abnormalities. All the warships covered by this screaming soul Fortresses and fortresses are still in the void.

Only the tragic sounds, one after another...

It's like breaking the soul!

Chapter 3639: The soul of the soul

"what....."

"what!"

.....

In the void, a scream of screams, each of which is extremely short, but overwhelming, continually endless, and a horrible sense of coldness and scalp tightening, instantly shrouded A starry sky.

This scene is too strange, the extreme contrast between vision and hearing, giving a completely unreal feeling.

In the battlefield, the three giant war tales of the battlefield are opposite the battlefield. The second universe of the various ethnic groups, nearly 800,000 warships, except for a small half, have already withdrawn from the battlefield. Activate the start, before launching this sorrowful screaming attack, it has already started outside the battleship where the space jump ability is far away.

There are still more than half of the total, nearly 500,000 large and small warships and fortresses and fortresses, which are still stranded in the fan-shaped depth area directly in front of the huge bell mouth of the 300,000-meter scorpion.

The horrible sound of this road is from the nearly 500,000 warships and fortresses and fortresses.

However, the tragic sound resounded through the void, but the 500,000 warships were still suspended there unscathed, and there was no such thing as a singularity, as if they were screaming and screaming, they were fundamentally There is no such thing as a slight sway.

This is incredible, but it happens to be the truth!

The sorrow of the sorrowful warlord does not have any physical aggression, and it is precisely because of this that its attack effect on the soul, spirit, consciousness and other levels will be even more shocking and stunned.

The spirit of the soul of the beast is not only effective for the magical talents who have spiritual strength, but also for the humanistic monks who cultivate the gods, as well as the consciousness levels of other ethnic groups or living bodies, such as electronic consciousness, crystal consciousness, etc. !

The screaming whistling sound lasted only a few seconds, and it disappeared completely, and it was no longer smellable.

Then, after two or three seconds, the countless misery that followed the whistling sound like a response, completely disappeared.

In the void, the silence is restored, and the silence is dead.

Everything before is like a dream. The whistling sound seems to have never appeared before, because everything in the front of the sky has nothing to change, and people are suspected of producing auditory hallucinations!

It was at this time that an earth-shattering roar suddenly rang through the void: "Hey! The soul is screaming and screaming! It's just a scream, the souls of nearly half a million warships, most of the soul... you really Who is this? What is this means?"

"what....."

This discourse is the same as that of a fifteenth strongman. The power of Qiankun's power is clear, but his words clearly reveal a very strong fear and shock, even the sound. They all trembled. In the end, it was like a tremor that could not be controlled by fear. It made a scream like a vent!

Subsequently, nearly 500,000 warships and fortresses and fortresses in the fan-shaped vertical area covered by the huge bell mouth of the soul-stricken war were screaming one after another.

"Dead! Death is dead! Ah..."

"How can this be? How can there be such a big killer? This is absolutely impossible!"

"God, the Tianji family has mastered what kind of starry black technology, and can actually make such a horrible killer. Is this still the power of science and technology? It is only effective on the level of spiritual consciousness, and it is targeted to crush this field. Who can defend against it?"

"Too bad! Too cruel! All the people fall down straight, this scene is simply evil!"

"what....."

"Who is it? Who are you..."

.....

These roars are basically all from the power of Qiankun, and also use some of the mouths that belong to the fourteenth state, or the thirteenth world, but the twelfth environment and below. The existence of one, but none.

It seems that nearly half a million warships and fortresses and countless second-world cosmic strongmen among the fortresses, except for a small number of thirteenth-level realms, have survived and fallen.

Even those who are above the beginning of the field of roaring voices, the voices of each one are also very strong feelings of fear and weakness. Obviously, even if they are, they hold their souls. The war and the lama continued for a period of no more than ten seconds, and they never fell apart, but in the end, they suffered more or less.

This is a soul injury, the impact of the level of spiritual consciousness, the most difficult to recover, need to be rested, and then with some targeted Tiandi treasure to nourish, in order to slowly recover!

Nearly half a million warships and fortresses and fortresses, although there are only 10,000 large and small fortresses, and only about 100,000 large and small fortresses, the other are all star-rated ships of the 3,000-meter captain.

However, the total number of strong people in the second universe, which is stationed in it, is definitely a terrible astronomical figure.

According to the survivors of these surviving domains, the innumerable second cosmic powerhouses of nearly half a million warships have all died in less than ten seconds. Seven seven eight eight eight, and all are innocent, the soul is gone!

As this thought flashed in my mind, all areas of the entire starry battlefield, no matter which camp it was in, all understood what happened, all violently shuddered and subconsciously picked it up.

Including Ye Xuan himself, he never imagined that the sorrowful attack effect of this sorrowful war can be horrible!

It's really a screaming sound!

Too scary!

"This is really not my business. I didn't expect this attack to be so terrible!"

In the stunned, Ye Xuan muttered to himself. As soon as he thought of the short-term interest rate, at least nearly 100 million of the second universe creatures were buried in his hands. He had a strong sense of guilt.

Fortunately, the nearly 500,000 warships are all from the second universe, and no Terran fleet is involved. Otherwise, this killing will not kill countless Terran compatriots?

Thinking of this, Ye Xuan suddenly smiled, it seems that this sorrowful battle, in the future, can no longer be used casually, or that I have to look back and find out if I can fight against the war. , to control the strength of the power, coverage, and so on,

In that case, if you use the sorcerer's war, you can avoid this kind of activation and start, and you will die in a big moment. The killing is too heavy.

Thinking of this, Ye Xuan subconsciously looked at the status quo of the tens of millions of sacred beasts in the thousands of hive nodes in the sorcerer's battle. As a result, he gave a slight glimpse, and then he shook his head and smiled.

It's no wonder that Wei can be so horrible. The cost of paying this time is not small. At least in a short period of time, this soul war is not going to come in handy...

Chapter 3640: Manjo Ayame

More than 40 million sorrowful beasts, after the attack, nearly 100,000 were on the spot and the spirit body dissipated directly.

The proportion of war damage has reached two thousandths!

It doesn't sound like much, but for Ye Xuan, it is absolutely unbearable. You know, these sorcerers are not like the gold slime. There is also an energy source that constantly spawns the new members' nests. They are basically empty. Like a military scoop, there is one less death.

Moreover, compared with the Void Scoop, these sacred beasts are obviously more fragile and easier to annihilate. The former is a crystal life, the body is powerful, and the sacred beast is like a ghost, and there is no substantial body. Just a pure spiritual consciousness, they are spiritual life.

"Just a single blow, there are nearly 100,000 soul beasts because of spiritual overdraft, and the spiritual body is directly dissipated. All other sorcerers are also languid, and before they recover, they are unable to launch a second strike. !"

"The whole sacred animal group can only recover after a few days of rest!"

In the muttering, Ye Xuan's brows are getting tighter and tighter. This time, he finally realized that the biggest flaw in the star-studded killer is.

In the first battle of the two camps of the Pioneer Fleet in the forefront of the Devil's Star Field, tens of millions of Devil's strongmen under the leadership of the demon's star, the singularity of the singularity, issued a strong blow, and fell on the spot. At the time of the devil in the hive node, Ye Xuan did not realize the terrible damage.

Subsequently, in the Tianji City Star Field, after the completion of the transformation of the Nether War La, a small number of Void squadrons died and died. At that time, Ye Xuan did not realize this.

But the same problem once and twice, and when it reappears for the third time, if it can't cause some kind of shock and wake up, then the slowness of this post-sense and consciousness level is too speechless.

At this time, Ye Xuan has been deeply aware of the importance of the controllability of the War Lawei. Otherwise, every time it is activated and activated, it is all the bombardment that does not hesitate to pay for it at all costs. The soldier's scoop or the sorcerer's beast is his own, and he has to die!

However, this matter is not an in-depth study. The situation on the battlefield does not allow Ye Xuan to do this.

At the same time as his frowning and deep thoughts, in the fan-shaped depth area where the giant bell mouth is facing, nearly half a million warships and fortresses are about half of them, and space jumps. The fastest speed, fleeing the fan-shaped depth zone of the huge bell mouth.

Although the vast majority of the second universe of the more than 200,000 warships have fallen, but at least some of the thirteenth big territory above the beginning of the existence still survive, it is they opened the space jump. The ability to move the battleship to the depths of the enemy camp.

As for the other half of the more than 200,000 warships, they are still floating in the same place, and they are still moving. Obviously, all the second universe powerhouses in these warships have completely fallen, even if there is a small amount of live, it is not enough. Start the battleship's space jumping ability, and control them to quickly escape.

At this time, in this half of the various warships, there were a small number of strong figure rushing out of the ship, fleeing the void with the flesh and fleeing to the rear, and more than 200,000 warships with a serious shortage of control personnel. Can only be reluctantly abandoned in the battlefield, like a dead city, a strong despair, suspended in the starry sky...

It was also at this time that a voice was not loud, but the words of horror and horror were heard.

Like a whisper, but every corner of the innocent vast battlefield void is clearly audible: "This big killer is too damaging, never allowed to exist, no matter who you are, or destroy it on the spot. Or, it's up to the old man to take the shot..."

Star Lord!

It's actually the star lord to shoot!

In the first battle of the two fronts of the Pioneer Fleet in the front of the Devil's Star Field, tens of millions of Devil's strongmen urged the spirit war, and in the battlefield, three empties of turbulence,

twenty second universes The family's great powers have fallen into six sects, all of which have been caught in the whirlpool of emptiness and turmoil, and they have been exiled, and they are no different.

But even at that time, the star-studded geeks of the nine ethnic groups, such as the \*\*\*\* people who lived in the powerful coalition of the Second Universe, never actually shot!

Although there is a giant palm of energy, it is finally shaken off, and there is no real dead bar!

At this moment, the soul of the war is full of blows. Although there is no such thing as the fifteenth dynasty, the number of the bottom of the second universe, but the number of the bottom of the universe is too large. Almost hundreds of millions.

Under this circumstance, the nine major ethnic groups, such as the \*\*\*\* clan, were unable to sit still in the second star of the Second Universe. They couldn't sit still and ignore it. At this moment, the tone was firm. Incomparably, this is clearly the iron heart that wants to fight the soul, and even the three battles that lie in the void in front of the battlefield, all the rhythm of destruction!

"Hey!"

"Booming..."

An earth-shattering whistling sound resounded. From a large fortress in the enemy camp, a colorful glare was spurred, and the blink of an eye went to the front of the void battlefield, transforming into a huge hustle and bustle.

The atmosphere of the star that is scattered in the body seems to crush a void.

As soon as the first appearance appeared, two bright sorrows were revealed in the enamel, which turned into a shocking rainbow and whizzed.

But these two dreamy colorful dawns were shot from the giant cymbals of the giant enamel, but the speed was almost at the extreme, and even a strange noise came from the sky, just like the oil poured into the ice sheet. It is rapidly melting.

"call out!"

"call out!"

The blast was violently incomparably, and the sorcerer's war and the battle of the years were locked!

These two beautiful colorful pillars are the \*\*\*\* magical powers of the Caisong people. They are called anger and blazing blazing blaze. They don't look like they are not amazing. They even have a gorgeous and beautiful beauty.

But its power and lethality are extremely terrifying.

In the first battle of the third universe, the young ancestors of the second universe, the young patriots rushed into Shennong Ding, one of them was the little princess Medusa of the Choi.

At that time, the Tianjiao, a descendant of a top-level doorman in the Terran Science and Technology camp, inadvertently rushed to the front of the two colorful blazing singers of Medusa's screaming anger and blood.

At the end of the day, the target originally pointed to Ye Xuan's colorful blazing man, and hit the unlucky guy without any suspense.

So that his body shape suddenly stagnate, and then began a stagnant petrochemical at a speed visible to the naked eye, shortly less than half interest, it was completely turned into a gray stone, a trace of life Nothing, falling to the ground below the battlefield, crashing and smashing...
