

Super D. S 3651

Chapter 3651: The sorrowful beast

Ye Xuan is now the emperor of the Devil's group, Mo Yufeng. Therefore, all mental strength skills, mystery and magical powers can be exerted without pressure.

Even the spiritual thunderbolt that was exposed before the person is fine, no need to worry about revealing identity.

At the beginning, he used the power of thunder and lightning as the young master of the fox, and in the inner space of Shennong Ding, he was miserable by the innocent and silent, the revenge of the enemy, and the jade and the others. At that time, the palace was unwilling to wait for people to doubt his place. This ability to perform is related to the spiritual power of the devil, and for the human race, there is no trace.

But after all, doubts are only doubts. There is no conclusive evidence. With the fear of the few guys who are the masters of the foxes, they simply don't dare to speak indiscriminately and leak them out. Otherwise, if the foxes are not degraded, they must have cups.

Now, here is the Devil's Star Field. In the Devil's group, there are not many Devils who will be able to thunder and lightning. Even rare, but it is not without it. Ye Xuan is the devil's brother. Spreading the spirit of lightning, this is justified!

As for the mental reversal, it is a magical technique in the category of spiritual power. When it is displayed, there is only one glimpse of the spirit and the glory of the exhibition. The embodiment of its power and ignorance is not concrete, so it is extremely strange and unpredictable.

Even if he is in the magic king's star, he has been paying close attention to the evil spirits of the frontiers of the battlefield, such as Mo Taiye and other devils. They are seeing this kind of power and horror, and it is hard to prevent. After the spiritual power of the magical powers, they were all wrong, and then they shook their heads and sighed.

I only know that this is a kind of spiritual power, but I don't know the specific information at all. I don't even know the name.

Not to mention the other slave servants outside the demonic group.

For them, this is simply incredible!

The rat hair Jin Mingming is about to be successful in assassination. Not only is it a close silence, but the claws that have emerged from the vain air have already touched the target's neck, just a gentle stroke, a good one. The head of the skull is about to fall into the void.

Who can expect that the final result is so strange?

The skull is indeed rolling down, but it is not the devil's emperor Mo Yufeng, but the space mouse group Qiankun big mouse hair Jin Jin.

The old guy seems to suddenly have a convulsion, and he is about to succeed, but at the last critical moment, he took the initiative to show his figure, and he also whispered a whisper, and at the same time he took back the claws that he had explored, and took his neck. The next round, I will cut my own head directly...

This is simply a ghost!

A powerful and powerful, and still the best space mouse to steal the assassination, to assassinate a emptiness of the emptiness of the ant, eventually failed not only failed, but lost a small life!

The key is not the other party's shot, he cut his own head!

"boom!"

A chill came from the back and rushed into the brain, letting the **** ant family's powerful ants force the whole brain to explode on the spot.

His figure appeared in an instant, his face was blank, and he exclaimed: "What is this means? Rat Mao Jin actually cut his head? This kid is weird..."

At the same time as the exclamation sounds, the power in the body is also frantically surging, activating the blood talent. In the blink of an eye, a huge black **** ant with a body shape exceeding 100 feet appears in the void.

Ant Force decided to take the shot, but he did not intend to approach it. The rat Mao Jin just died too much. The other side clearly controls a strange method of power and horror. It is almost sorcerer, no wonder so arrogant, dare to be alone. In the face of a million troops, this is simply the rhythm of fearless assassination.

He decided to take the last test, projecting a large amount of **** ant liquid secreted from the body through hundreds of miles of void, forming a prison rain magic rain. At that time, as long as one drop touches the other's body, it can be severely wounded and will be unable to avoid the follow-up. The other ant liquid raindrops, the end result is that the entire body is eroded and collapsed.

If this means can't be done by the other party, it means that today's business is no longer possible, and Ant Force will evacuate the first time.

The Hell ant fleet brought by this time can go and go. If you can't go, it's a big deal. It's going to be a momentary move away. The strange and fallen of the mouse's hair is too great for him. There was a sense of crisis that shrouded mind and body, and he did not want to follow suit.

"call out!"

"call out!"

"call out....."

Numerous faint sounds of broken air rang, from the huge black **** ants in this giant, spurting out countless black liquids, each drop is like the size of a longan, full of rolling, the surface is full of cold light, overwhelming In the blink of an eye, a black, heavy rain was formed, and the half-interest had not

covered hundreds of miles of empty space, and it was covered in the position where Ye Xuan was located.

The square of the square is full of emptiness, all covered.

At this moment, a strong sense of crisis has risen from the heart of Ye Xuan. He has not been exposed to **** ants before. He is completely ignorant of this group, even if it is suitable for searching in the data database of the phagocytic system. The basic situation of the various servants of the universe is only to know that there is such a group.

As for the huge infernal ant at this moment, what is the rain-like liquid that was suddenly spurred by Ye Bang, Ye Xuan did not know.

But intuition tells him that you must dodge, if you don't avoid it, you will have big troubles.

It's just that the other party is a great power. At this moment, the whole shot is powerful. The tempering of the black liquid rain is too fast. Hundreds of thousands of drops of black liquid only cover the void of the Baizhang square. The density is too large, even if the leaves Xuan launched a virtual teleport, and it was too late.

Just as he was preparing to wave a few defensive magic weapons, slightly delaying, and immediately launched the virtual air teleportation ability, the three star-studded battles behind him were suddenly violently shaken at this moment.

At the same time, there are countless screams of screaming soul beasts, which are full of excitement, chaos and complexity, and extremely urgent and uneasy.

Not waiting for Ye Xuan to react to what happened, his mind suddenly sounded a familiar system prompt: "Hey, congratulations to the host, found **** ant liquid! Efficacy: quenching sacred product, in view of the current repair of the host It must be used after refining and blending! At the same time, this object has a miraculous effect on the spirit of the spirit of the soul, which can promote its evolution, and the level of life rises rapidly! Grade: Qiankun, **** ant body secretion, intermediate **** ant liquid! : 355,748 drops! Is it charged immediately?"

Nani?

Is there such a good thing?

It is no wonder that the sorcerer beast is like this. This thing is equivalent to the effect of the life mother crystal against the evil spirit Slime. It can quickly raise the level of its life and solidify its spiritual spirit.

Even Ye Xuan can use it, but only after condensing and blending.

What does the other party mean? Is the rhythm of gifting for mercy?

Chapter 3652: Another wave

Since it is a good thing, Ye Xuan will not let it go, although he still has a little understanding of this **** ant liquid, but with a brief explanation of the phagocytic system, he generally understands it.

Generally speaking, the Tiandi Dibao, which is good for the forging, is basically a arrogant and arrogant drug. It is also true that this kind of **** ant liquid is also true.

Since Ye Xuan's current cultivation needs to be condensed and blended before it can be used, it shows that it has a strong erosion effect. Once it touches the body, it will definitely bring unexpected harm. The other party should also be the purpose.

At the moment, in the case of avoiding it, the only thing Ye Xuan can take is defense, but unless it is the ancient treasure of Shennong Ding, the general defense armor is simply unable to hold back, including Ye Xuan's immortal glass. A, is also extremely dangerous.

After all, it is only a starry sky to the treasure, and this wave of black rain formed by hundreds of thousands of drops of **** ant liquid, not only by the powerful spurt of Qiankun, its every raindrop itself has a strong erosion effect.

The powerful penetrating power and the superimposed effect of this erosion are superimposed. According to Ye Xuan's estimation, at least it is a waste of ancient treasures, and it will be able to squat,

and the eternal glare of the starry sky will be destroyed. Even if it can hold it, the possibility of damage on the spot will be More than 80%.

However, for Ye Xuan, he obviously has another choice.

That is neither hiding nor preventing, just swallow it!

Of course, it's not that he swallows himself, but that he wants to swallow the beast.

The system prompt tone has been said very clearly. Although Ye Xuan's repair is not able to directly swallow this intermediate **** ant liquid secreted by the hunter hunter in the body, the soul beast is completely ok. The mutual phase of all things is originally a mystery.

"call out!"

Just as the rain of the awning black ant liquid shrouded over the top of the head, it was falling sharply. It was only a hundred meters away from Ye Xuan's figure. When he saw his body shape completely wrapped in the next moment, Ye Xuan suddenly waved his hand. Directly through the miniature transmission array behind the soul of the war, all the souls and beasts in the entire ten honeycomb nodes are transferred to the body shape!

"Hey!"

"Hey!"

"Hey..."

The overwhelming excitement of the whistling sounds instantly, this moment, Ye Xuan's body shape is surrounded by fascination, a head spirit spirit, the shape is similar to the monkey beast, but the head has a one-horned scorpion beast, in the shape At the first time of the first appearance, he did not hesitate to rush to the rain of ant liquid that was spurting from above the head.

Within the hive node, each has nearly 40,000 soul beasts, and thousands of hives are nearly 40 million. This is all the souls and souls that Ye Xuan has in his hands, and more than one can never get out. .

At this moment, all the souls and beasts in the entire ten hive nodes were all transferred by his bones, nearly 400,000 heads, and all the blinks rushed over the head of Ye Xuan.

The tone of the previous phagocytic system is clear, and the rain of the ant fluid that is spilling from the top of the head is formed by a total of more than 350,000 infernal ants.

In this way, nearly 400,000 soul-stricken beasts can not be divided into one drop at a time, at least three or four thousand have to be emptied, that is to say, Ye Xuan's crisis is solved in an instant!

In fact, all the **** ants Ye Xuan can not all swallow these sorrowful beasts, does the phagocytic system not say it, this kind of thing is also good for him, but it needs to be condensed and blended before it can be used.

Ghosts know that there is no inventory in the body of the corpse in the body of the hunter.

Just now, Ye Xuan immediately killed a scene of Qiang Kun's power. He saw it with his own eyes. In this case, since he was not willing to decide to try again, this wave of ant liquid rain, how could the other party not do their best? .

In all likelihood, the stocks secreted in the body have been thrown away.

And even if this kind of thing is a **** ant in the level of a powerful genius, it doesn't matter how many years it has been saved, it is only more than 300,000 drops. It is obvious that it is not easy to form. Of course, for **** ants, this Kind of **** ant liquid is just a means of attack, or to take out special materials exchanged with other ethnic groups.

Since it is not easy to secrete and form, Ye Xuan is useless even if he catches the **** ant in this Qiankun situation. If there is no stock in the human body, can he not directly find the ancestral nest of the **** ant to get it?

It is with this in mind that Ye Xuan has waved and transferred the nearly 400,000 souls in the entire ten hives and then collected them.

The original 380,000 drops of Hell ant liquid formed a large piece of the rain of ant liquid covering a hundred meters of square void. He is indeed extremely jealous. This kind of thing can't be touched. It must be carefully collected, the quantity is more, and the lasing The speed is still fast, Ye Xuan simply can not easily try.

But it is different now!

The nearly 400,000 scorpion beasts that rushed out in the first time, half of the blinks, all clawed and hugged a **** ant liquid that could still fall in the future, and opened the mouth and swallowed it.

The densely infernal ant liquid in the sky was immediately faint, even if it was repaired by Ye Xuan's empty space, it would not be too busy to collect it.

In the blink of an eye, his body poured out the power of the canopy, directly wrapped around the top of the tens of thousands of **** ants, and then they were able to read them, and they all received the Shennong Ding in the immortal world.

The total number is more than 50,000.

All this has just been completed, and Ye Xuan's ear has once again heard the sound of the screaming beasts.

Looking up, the sky above the sky, all the roads are all flying and wearing the shadows, but the kind of long-eyed black **** ant liquid, but actually can not see a drop.

More than 350,000 ant liquid droplets were taken away by Ye Xuan, and the remaining 300,000 drops, but there are nearly 400,000 head scorpions, how is it enough?

The sound of the screaming noise that came into his ear at the moment was exactly the sound of nearly 100,000 heads slowed down by hand, and the sound of the soul beasts swallowed by a **** ant liquid was obvious. Strong resentment, extremely unwilling!

Soon, the 300,000 heads fortunately swallowed a drop of **** ant liquid, all of them fell into a sturdy shape, floating around Ye Xuan's figure, knees, slightly closed, seemingly want Refining on the spot.

Ye Xuan waved them back to the soul of the war, but there are still seven or eighty thousand in the top of the head screaming in the air, a pair of today does not give a rhythm of life and death.

Seeing this scene, Ye Xuan also had a headache. Now these sorrowful beasts are treasures. They have one head and one head dead. There are seven or eighty thousand in front of them. It's really sprinkling, and he can't bear to directly kill the killer.

In desperation, he can only turn to the opposite side of the hundreds of miles of the void, the already dumbfounded ant force God looked over, smiled and said: "Dao friends, seemingly not enough points, another wave... Is there wood?"

Chapter 3653: Go half and stay half

"puff!"

Hearing Ye Xuan's words, and then looking at his apparently because of jealousy, and appearing a somewhat stiff face, the **** of the Hell ants can be spurted on the spot!

Not enough points?

Is there another wave of wood?

This is simply the face of the red fruit!

Dignified and powerful, at the cost of a full blow, fell in the eyes of others, actually became a true dish, and it seems that people have not eaten enough, it is not enough!

The ant force **** has a kind of sadness that is completely destroyed by the whole body and mind from the inside out!

This kid is too enchanting, and it is one of the six great enchanting geniuses who can be named together with Xuan Huangzi, Invincible God of War, Linghu Shaozhu, and Netherful Respect, Feng Baofeng and so on.

Previously, the ability to kill a space mouse family has been very different. It is estimated that no one knows how he did it.

Now more perverted, the **** ant liquid secreted by the Hell ant strong body is regarded as the dog food to feed his pet!

You should know that this kind of **** ant liquid can be regarded as a rare medicine resource. Every year, the **** ant colony has to supply a large amount of **** ant liquid to the heavenly family. In addition, the family also collects some and goes to other ethnic groups every year. In particular, the strongest of the third cosmic people traded privately and exchanged for other cultivation resources they needed from the black market.

But even the strong body of the Tianji and the Terran, after getting this kind of **** ant liquid, all have been condensed and blended before they can be used.

The ghost knows where the guy got a group of long-horned monkeys on his head. It was so horrible that he could use the **** ant liquid as a jelly bean and throw it into his mouth and swallow it.

Looks like still unfinished, the tens of thousands of unicorn monkeys that are not assigned, they are almost ready to be poured!

More irritating is the devil's emperor Mo Zhenfeng, it is simply a rogue, too shameless, really local prison ants liquid is the cabbage on the street, can you just get it out?

Even if he is a man, the infernal ants are so powerful, the savings in the body for only a few years are only more than 300,000 drops. Just now, in order to ensure that all the trees can be built, the **** ants

that have accumulated in the body have been dumped. Once empty, even if you want to condense a drop, you need at least one sputum time.

He actually licked his face and opened his mouth to come back with a whole wave of ant liquid rain?

It is absolutely impossible to squeeze him into **** ants!

"Too too much! Too shameless! You are a enchanting, just a perverted bastard!"

At this moment, the ant force **** has already lifted the state of the blood and the real body, and restored it to a black ant who was standing by the head. After the heart angered and yelled at Ye Xuan, he did not hesitate. Any thoughts stayed, and the body shape has gone away.

This guy is too enchanting, not only the space rat who is known to assassinate the king, but after being successful in closeness, he will be killed by his short-lived and short-lived, and he will do his best, at the cost of the long-range full blow, to the end. Actually, they all want to send food.

It's impossible to kill near, and there is no hope for long-range attack. Is it necessary to stay here?

He didn't even dare to return to the flagship fortress of the huge fleet of Hell ants, and his body shape crossed directly, heading for the depths of the first universe behind the millions of warships.

In any case, let's leave this piece of the right and wrong, otherwise, if the other party is angry and really anger, then activate the three Star Wars, and then they will not be able to walk away.

As for the fleet of Hell ants, the ant force **** has already issued instructions through the unique biological wave frequency of the family, leaving the adjutant to take over the command. Nothing else is said. As long as there is an opportunity, all the members will be immediately Evacuation...

It all happened too fast. After the old guy yelled at Ye Xuan, he turned around and left, whether it was Ye Xuan or the high-level commanders of other ethnic fleets in the Second Universe of the Second Universe, all of whom did not expect him. After all, it's so fruitful. After all, it's a great power, and I'm so excited that I'm going to get rid of it as soon as possible.

When Ye Xuan reacted, the back of this guy could not be seen. He had already launched a virtual teleport, and I didn't know how far it was to escape to the universe.

Dignified and powerful, and also the first cosmic servant of all the top three infernal ants of the Qiankun family, facing a twelfth emptiness of the devil's royal family, fleeing ?

This is too ridiculous. In the millions of coalition camps of the various servants and servants, there was a loud sigh of relief in a moment, resounding through the void...

"What happened? Say good assassination? How could this be the result?"

"The two great powers of the space mouse and the **** ant family, together with the assassination of a twelfth emptiness first-class murder ant, and finally escaped one by one, is this a joke?"

"It seems that something is wrong. The devil's emperor Mo Zhenfeng is not as simple as we think. Apart from the three Star Wars, his own means and strength are obviously not bad. Not only does he support a group of long-horned heads. The blood is fierce, even the **** ant liquid can be eaten as a jelly bean, and close combat is even more extraordinary..."

"Yes, the space mouse community's great power can not be assassinated, have been successfully approached, and ultimately still strangely spiked, how can this be broken?"

"It's no wonder that it's so rampant, it's too much, what should we do?"

.....

The two great energies, in a short period of time, escaped one by one, they did not even understand how it all happened, everything, all the strange and incredible.

Despite the huge servants of all ethnic groups, there are millions of warships, and there are many great powers, but in the void in the hundreds of miles away, the devil's emperor Mo Yufeng is only one person

behind him. There are three star-studded masters who can kill the stars, and even more so that the tens of millions of star-studded powers will destroy the starry sky war.

However, the other side has different means, even the two rats of the space mouse and the **** ant family can not assassinate the assassination, and finally flee...

Such a disappointing situation has given countless first-class servants and powerful powers in the entire million-strong army a strong sense of powerlessness from the bottom of their hearts.

Even the commanders of various ethnic fleets, a stalwart of great power, at the moment, in addition to their grievances, there is only endless unwillingness and helplessness.

In front of this guy, this guy is too enchanting, and he can't use common sense. In the case of three starry wars in the hands of others, as a means of deterrence, even if they are powerful, they can't do anything about it. In this situation, this is the case. When they are sitting on a blanket, staying here is just a humiliation.

At this moment, some of Qiankun's great powers finally understood why the ant force gods did not hesitate to take a long-term view. After staying, what is the use?

It was also at this time that Ye Xuan waved his hands and left the nearly 100,000 souls and beasts that were still screaming all over, and sent them back to the soul of the war, then turned around and sneered: "As a gift, all ethnic groups The warships are either halfway and halfway! Or... all left well..."

Chapter 3654: One bloodletting

Go half and stay half!

A million warships, can you only take around 500,000?

This is simply the robbery of the red fruit, and the demon community will once again add 500,000 warships, fortresses and fortresses, and the fighting power will soar.

However, after all, the entire million-strong coalition was jointly assembled by the fleets of the first cosmic slaves. The number of warships of 500,000, if they were distributed to the heads of a group of people, was not completely unacceptable.

At least it's better than the whole army?

Although the three star wars, even if they volleyed, the army of millions of warships could not all be destroyed. At most, seven or eighty percent of the warships were destroyed, and the ship's strongmen were fallen.

Even the other side is very likely to be just a bluff, and the three are now squatting in the void, quietly watching the starry sky war, may not be able to activate again in a short time, this is also possible!

But no one can dare to bet on luck in this life and death.

In case the gambling is wrong, the fruit can't bear it. Instead, it accepts the shameless request of the other party. At most, it is just throwing down half of the warships. At least the personnel are not damaged, and all the slaves are all like this. After returning to their respective ethnic groups, they are stubborn. Can also be confessed to the past.

After thinking about it, most of the ethnic groups are basically tempted. Even the space mouse and the **** ant, the top three behemoths among the servants, are the two commanders of the crusade fleet. As soon as they fled, they acted as slaves to the space mouse and **** ants. Even if they spread out today, it would not be a shame.

Soon, some small ethnic groups have an action.

In a variety of warships and fortresses and fortresses, a large number of slave servants began to rush out and rushed to other warships of their own ethnic group.

Since they have already accepted their fate, they don't have to do anything in this matter. They decided that the soft-skinned people are very honest. If they bring in 10,000 warships, then the target that will be vacated at this moment is about 5,000. There are all kinds of warships and fortresses and fortresses. No one is engaged in tricks and tricks to avoid being demolished.

In case the unscrupulous devil's emperor Mo Zhenfeng suddenly changed his mouth, or asked for more trouble, he asked for more, then he really regretted it!

At first, only a few ethnic groups of the fleet had some movements, but soon, the fleets of other ethnic groups could not sit still, and they were afraid that people would be able to safely leave this piece of land if they gave up some warships. I have to stay here to die hard, and at the end of the day, most of the ending is a degenerate ending?

This kind of idea spread invisibly. Soon after, the whole army of millions of people all rushed to the air battleships. This scene is very happy, and the magical emperor Samsung in the back of the sky is innumerable. Strong people, thunder a seven-seven.

Even the Emperor Star has been closely watching the situation here, Mo Taiye and Mo Huang Mo Wentian and others, one by one is also Jiao Jiao Nen.

Who can think of it, Ye Xuan alone faced a million army, and finally it was such a scene?

This is simply not true, just like a play!

However, even if it is a child's play, it is basically based on absolute strength.

If there are three horror blows behind Ye Xuan's body, the starry sky battle that shocked the audience, if he was not able to face the secret assassination of the two great ethnic groups, the empty mouse and the **** ant, he was surprised to gain a weak position. Let the other party escape the battle... So, all of this is obviously impossible.

When I think of this, even the uncles of the devil and the royal family, such as Mo Taiye and Mo Huang, have to be convinced. After returning to God, apart from shaking their heads and laughing, there is no speech.

The army of the various hurried warships of all ethnic groups also includes the fleet of Hell ants.

This time, the Hell Ants dispatched nearly 100,000 various warships. After all, they are the top three most powerful ethnic groups in the second universe. As long as they can suppress the Mozu, the first universe will be weak in the Tianji. In the case of no longer hegemonic expansion and expansion, only the Hell ants and the Space Rats are the only ones.

Therefore, the Hell ants cannot be like some small ethnic groups, only tens of thousands or even thousands of warships.

But this also means that their losses will be enormous. Nearly 100,000 warships will be halfway away, that is, the loss of 50,000 warships.

Even so, the **** ant, the deputy commander who had just taken over the command of the fleet from the power of the ant force, finally recognized it with a bite, and endured the indignation to give orders, so that the entire **** ant warships all acted. Get up, vacate half of the redemption fee, the right to feed the dog!

Unfortunately, he is obviously a bit too optimistic.

Because the prison ants have just emptied the 50,000 ransom of all kinds of warships, and Ye Xuan, who is standing in the air of hundreds of miles away, will once again speak out. The lightly floating words almost did not let the **** ants The commander of the fleet who just took over was mad at the scene: "The **** ants don't toss up. You are in a special situation. Half of the warships are not enough. Who told you to have **** ants? All the ants are left and queued. One by one, who dares to hide a drop... suppress it on the spot!"

Listening to this discourse, nearly ten million of the 100,000 warships of the Hell ants are completely dumbfounded, standing in the void, and the wind is messy.

The other strong members of the servant fleet were more tossed, and the scene was even out of control, because they all saw the signs, the emperor Mo Yufeng of the devil's group, not only talents and talents It is comparable to the younger singer, the sorrowful, and the like. The degree of shamelessness seems to be even worse.

The **** ants of the family couldn't easily vent the 50,000 warships. He opened his mouth and let nearly 10 million **** ants strong all cold, completely dumbfounded.

This is clearly intentional. If you say it early, it will be time to pick it up. This is clearly intentional.

This shameless existence, before he has not changed, is better to leave the difference immediately and leave. Otherwise, the longer it is dragged, the worse it will be.

With such an idea, in addition to the Hell ants, nearly 900,000 warships of other ethnic groups finally dropped 450,000 warships and fortresses and fortresses. The others finally got the permission of Ye Xuan and saw him nod. Escape, but also like to leave, it is like avoiding ghosts.

After a short period of time, among the vast 550,000 warships, only 50,000 ships have strong ones, which are the millions of **** ants, although they all want to leave. However, the demon king of the devil's royal family did not nod, even the **** ant who was the 14th dynasty of the fleet's deputy commander did not dare to move.

In the end, all the millions of **** ants came out of the battleship, and queued up in the void, waiting for Ye Xuan... a bloodletting!

Chapter 3655: Soul

Hell ant liquid is a kind of biological liquid naturally secreted by the Hell ants, and its effect does not need to be described. It can be used as medicine and is also one of the killing methods of the Hell ants.

Every **** ant can secrete this **** ant fluid in the body.

Of course, there is a gap between the quality of the quality, or the strength and weakness of the power.

The Hell ant liquid secreted by the body of the

As for the top-level **** ant liquid, it is regarded as a treasure among the family.

The general **** ants, even if they have the 14th-level environment, the **** ant fluid secreted in the body is all primary quality.

The infernal ant fluid secreted by the following infernal ants is all of a primary quality, but the condensing time of each drop of ant ant fluid is long and short. The higher the repair, the faster it can be formed. The strongest of the environment is basically the same as Qiankun, and there is a drop in production a year.

Hell ants in black holes often take years!

But basically, every **** ant body will have **** ant liquid, even if you need to cultivate resources, so take it out, to the black market in exchange for what you need, there will be some retention, after all, this is unique to the group The means of killing will naturally have reservations.

At the moment, this **** ant army, with a huge number of **** ant strong people, the **** ants in the body of all **** ants are together, is definitely an astronomical number!

Nearly 10 million **** ants, Ye Xuan can not really check whether they have retained in the body, just randomly at the beginning of the shot, once found that someone is hiding, the **** ant liquid secreted in the body is not completely turned over, immediately shot dead On the spot, anyway, they are all aliens, and he has no pressure at all.

After so many times, all the **** ants were honest, and Ye Xuan even checked and found no problems.

In the end, the nearly tens of thousands of **** ants left hundreds of millions of **** ants, drove 50,000 ships of various types of warships...

This time, Ye Xuan's harvest is extremely great, and the amount of Hell ant liquid obtained is amazing, but all of them are primary **** ant liquids. He does not intend to use it himself, and all of them are reserved for the sorcerer.

The soul of the sorcerer's soul is only about 40 million, and the **** ant liquid obtained this time is enough for each scorpion to get nearly ten drops, even if it is only primary quality, in the case of enough quantity, according to Ye Xuan's estimate should also enable the entire life level of the whole soul-beast group to achieve a full jump!

"This king is serving you, it really is the devil's true color, wherever you go, it's so amazing!"

As the fleet of the first cosmic servants and allied forces left, the devil's uncle Mo Qigong soon appeared, and there was a huge fleet behind him, all carrying the devil strong. Come over to receive the battleship.

Since there were no outsiders, Mo Qigong also talked a lot, and while he was talking, he turned his eyes straight. This time he was dressed. Who could think of Ye Xuan's robbing of a huge fleet of troops with a million warships? ?

However, he did not think about this kind of thing for the first time. In the second universe, the tortoise star field seemed to be a person who robbed nearly half of the top three forces in the universe, and also pitted the sinister family. Let the name of the family survive.

In addition to him, it is estimated that no one can make it. The enchanting is enchanting, and the life of 彪悍 does not need to be explained!

After a few words of chilling, the powerful master of the receiving warships came, Ye Xuan and Mo Qigong did not stay for a long time, waved the three battles into the body after the immortal world, even if they returned to the magic star.

Soon after, Ye Xuan came to the remote valley where the Void War was reformed. At this time, some warships had come from the emptiness outside the atmosphere of the Emperor, and all of them were loaded with sorrows and screams. Tens of thousands of corpses of the powerful people of the second universe.

According to Ye Xuan's request, these corpses will all be piled up in the open space in the valley, but it obviously takes time. Ye Xuan has no time to work hard, and after entering the valley, he enters the depths of the valley. When you wave your hand, you will come out with a soul fight.

In the whole battle, there are thousands of hive nodes, and the total number of sacred beasts has reached nearly 40 million. However, it was fortunate to have a mid-level **** ant that was swallowed by scorpion ants, but only about 300,000 heads. One of the points is not there, the vast majority of the soul-stricken beasts are all screaming in the eyes, and the situation is quite strange.

Obviously, there must be something unusual in the war, otherwise it will never be the case. If there is no accident, most of the 300,000 heads that have swallowed a middle-level **** ant liquid are refining. After that, the level of life has been improved.

Ye Xuan suddenly became excited, and his spiritual strength extended. He entered the sorrowful battle, and soon discovered an abnormal scene. As he had guessed, it was the change of the 300,000 heads of the great luck. .

Originally, all the sacred beasts were the spiritual energy form of Mi Xu, the whole body was reddish, and there was a corner at the top of the head. In addition, the shape of the whole spirit was similar to that of the monkey.

But nowadays, the vast majority of the soul-beasts are still the same, only the 300,000 heads have changed, although the shape of the body is still the same, Mi Xu is high, looks like a monkey, with a corner at the top.

But their originally pale red spirit body, but now all have become a pale blue color, and clearly no longer is the spiritual energy form, but like a real monkey beast, with real flesh and blood!

In terms of realm, these 300,000 heads already have the flesh-and-blood beasts of flesh-and-blood entities. No, now perhaps they should be called sorrowful.

These sorrows and sorrows have been repaired by black holes and have improved a lot.

You must know that when Ye Xuan captured these sacred beasts from the underground sacred caves of the black mosquitoes of the black mosquitoes, Ye Xuan's own cultivation was very weak, but even so, he still caught tens of millions of heads. Only then can you see how the strength of these soul beasts is.

Now these 300,000 heads of sorrows and sorrows, after the promotion of life level, can have the power of black hole cultivation, even if he is, he is very surprised!

It can be seen that the effect of this kind of **** ant liquid on the level of life of the sacred beasts is indeed quite obvious.

Since this has been verified, there is nothing to hesitate. The **** ant liquid is precious, but in Ye Xuan's eyes it is still far worse than the sacred beast, not to mention the hundreds of millions of scorpion soul beasts. It's also easy.

Therefore, he decided to consume all of them at once, and each of them will be divided into eighty-nine drops to see the life level of these tens of millions of soul beasts. In the end, it will not be too much. People are disappointed...

Chapter 3656: Ant liquid quenching

Tens of millions of soul beasts, hundreds of millions of **** ants!

This time, Ye Xuan decided to consume all of it. Anyway, if it is needed in the future and there is no one at hand, it will be a big deal to go to the old nest of the ancestors of the Hell ants.

The Yinmo people have been given a leaf by Ye Xuan, just to go to the **** ants to extort a little **** ant liquid, for him, obviously no difficulty!

All the **** ant liquids were all collected by Ye Xuan in Shennong Ding. At this moment, all the bones and brains were taken out, and the dumplings were scattered in the thousands of honeycomb nodes of the scorpion war.

"Hey!"

"Hey!"

"Hey..."

In the hive's hive, there was a deafening, sharp, whistling sound, endless excitement and excitement, joy and excitement, tens of millions of giant souls, all crazy. It is.

Hundreds of millions of drops of **** ant liquid, according to the head of the sacred beast, each scorpion beast can be divided into eighty-nine drops, but Ye Xuan is all thrown into the bones, the result must be distributed. Some soul beasts may grab more, while others are less.

But at least one thing can be guaranteed, that is, even if you are unlucky and then weak, you can't say that you can grab too much, two or three drops will definitely be there.

That's enough.

The reason why Ye Xuan is so, in fact, is to let the inside of the scorpion and the beasts have a competitive form, and the powerful scorpion beast can grab more **** ants, which may be like the years of war. One or two sorrowful beasts.

Even if there is only the universe or the domain, it is ok!

There are one or two strengths that are far superior to other similar soul beasts. Ye Xuan can control the soul wars in the future. It can also be more convenient. You don't have to do everything every time, you have to rely on yourself to achieve through the blood of the soul. .

You should know that there are two eight-star kings in the Void War, and there is a Zijin Slim in the years of battle, and the two wars have basically been managed by half-handed. There is no king of strength in the ethnic group.

In Ye Xuan, it is really not convenient.

After hundreds of millions of drops of primary **** ant liquid were thrown into the soul of the war, Ye Xuan even took the battle to the immortal world.

This time, all the tens of millions of sacred beasts in the battle have received hundreds of millions of drops of ant liquid. Many of them may have tens of hundreds of drops, and at least a few drops. After devouring, refining is used to enhance its life level, this must take time.

Ye Xuan was not in a hurry. Taking advantage of this time, he decided to try the effects of these **** ants. After all, I saw that the guy who first got a drop of intermediate **** liquid, soared so much, his heart was itchy. of.

Even if this kind of thing has a particularly significant effect on the life form of the spiritual energy form of the sacred beast, it will be so, but it must be in the body of the flesh and blood of the Terran, and the effect will not be worse.

Otherwise, the secretions of the first cosmic **** ant group will not be so popular in the three cosmic planes, only in some well-known black markets.

Since it is for his own use, Ye Xuan naturally cannot use the primary **** ant liquid. In fact, there is no more now. Just a few hundred million drops have been thrown out, and he has not left a drop.

However, in the Shennong Ding of the immortal world, there are still more than 50,000 drops of intermediate **** ant liquid, which is secreted by the body of the **** ant that was repaired by Qiankun.

It's just that this kind of thing can't be swallowed directly, otherwise it is estimated that the stomach will be eroded, even if the starry sky is strong.

The star planes of the three planes, when using Hell ant liquid, are basically added as a special medicinal material, and then refined into a medicinal herb or a genetic culture solution, so that they can be swallowed and can be used for medicinal herbs. The efficacy of the gene culture solution has been greatly improved.

In addition, there are some monks who have refining bodies. There are special ways to adjust, neutralize or neutralize the bad effects of Hell ant liquid, and finally swallow them directly. This effect is better, but the risk is also great.

These two methods, Ye Xuan will take care of both.

He has now refined the thirteenth grade liquid that has entered the beginning of the thirteenth world.

Although the configuration of the thirteenth grade liquid was successful, but Ye Xuanzhi could not be sure that the last time he succeeded in refining the thirteen grade liquid, was it because of the addition of that small glutinous meat mud.

The chance of coincidence is very small. The bigger possibility is that the success of the last recipe is the reason for adding a small piece of meat. If this is the case, for Ye Xuan, this is a big day. Good news.

In this way, he will develop a higher level of genetic fluid such as fourteen grade liquid and fifteen grade liquid in the future. When encountering different bottlenecks, he may try to add a small amount of nine color meat mud again. .

Now, there is another kind of special substance that must have a substantial increase in the efficacy of the genetic fluid, and after the addition, the success rate must also be improved, that is, the **** ant fluid.

Later, when refining the 14th and 15th grades of the 14th dynasty, and even the

If so, he has great confidence that he can refine these two culture fluids in a short period of time.

By then, it will be tantamount to ensuring that you have entered the fifteenth world and become a powerful entity.

As for the 16th main star territory after Qiankun, whether it can be achieved by swallowing the genetic culture solution, Ye Xuan is not sure.

Because the role of the gene culture fluid is mainly to tap the body's potential, tearing the body's shackles, so as to achieve the purpose of the star of the strong body of flesh and blood.

However, in addition to the strength of the flesh, the strong star of the main body also has requirements for the understanding of the laws of the universe.

According to Ye Xuan's estimation, if you want to enter the star territory in this way, you may be ineffective in the general configuration of the gene culture solution. At that time, it is very likely that you need to let Shennong Ding come in handy, with a color of orange or even more. The high-level Shennong fire flames, to refine the real world medicine, not the gene culture fluid.

However, this is a matter of the future. Ye Xuan can now prepare for the rainy day. First prepare various materials and even use it to refine the higher-level Shennong fire. However, at present, it is imperative

to try the first-color orange red flame of Shennong Ding. The refining effect of the intermediate **** ant liquid is refining.

Then try to quench the flesh with this special resource.

The first use, the effect must be very significant, Ye Xuan's expectation is to come to a two consecutive Jin, directly from the current virtual first-order breakthrough to the third level of the physical body of the void.

In the vain space of the twelfth world, a small-scale breakthrough has been very difficult. This time, if there is enough intermediate ant liquid in the hands, and Shennong Ding, even if it is Ye Xuan, I am afraid that it is not easy. Move this extravagant idea...

Chapter 3657: Two-color flame

After the sacred war, La Xuan will soon be sacrificed by Shennong Ding. If the tripod is closed in the immortal world, Ye Xuan can't enter the body, or enter with avatar, or only enter consciousness.

Although the one-color orange red flame of the volcano in the Ding Nei volcano is used to condense the **** ant liquid, his body does not need to enter at all, but considering that Xuanyuan Zijing and Duanmu Xiaocha and Zhao Qianru are still inside, Ye Xuan decided to go in. A trip.

Once Shennong Ding is sacrificed, the form that will be displayed will be a huge star-like horror giant, and even the Qiang Kun might or even the star lord can not be removed or collected.

But Ye Xuan has completely refining it, so the size is free.

At this time, Shennong Ding sacrificed and landed on the ground in the depths of the valley. It was only about the same as a 10,000-meter-long fort. The tripod was full of mist and fog, and it looked like a master of refining medicine. It is here. Open alchemy in general.

Ye Xuan's body shape is a touch of mans, and immediately the whole mouth from the misty steaming, one end stuck in!

This time, his other purpose is to ask Xuanyuan Zijing and Duanmu Xiaocha, Zhao Qianru whether the three gimmicks return to the third universe, here is the magic emperor, the natural wormhole to the third universe is not too Far away, Ye Xuan can take a moment to take a trip and send them there.

Then let them go through the wormhole and return to the third universe.

The whole body always carries a **** with him. He doesn't think it's a thing, not to mention that none of the three gimmicks are fuel-efficient lights.

In fact, his premonition is correct. This girl has not been squandered in Shennong Ding recently. Ye Xuan is not eager to enter Shennong Ding, and the one he saw was almost stunned on the spot!

The rest of the Dingnai space is not the same. As always, the various fruits and elixir in the jungle seem to have been ransacked. The original fruit that is about to mature is obviously much less. On some branches, There are only a few green fruits hanging in the lonely, but fortunately, they have not been squandered.

The volcanic area of the central area is completely different, and it has been plagued by disasters. On the hillsides around the huge crater, there are all kinds of bones thrown away, and each one is dry with the dog. Half of the meat can not be seen.

These bones are large and small. The common ones are some white bones, but occasionally they also contain a few golden bones. This is clearly the ancient dead body of Ye Xuan from the core of the evil roots. Abandoned bones.

Ye Xuan even saw a huge leg bone of about 100 meters, the color of the whole body, obliquely inserted on the hillside on the north side of the central volcano.

This 100-meter-gold giant bone, how he thinks how to feel familiar, the suspicion is that the head of the world is the sole foot of Jinwu, Ye Xuan last time only baked its poultry head, other parts of the body, together with all The treasures of the ruins of the ancient and the dead from the core hinterland of the source of evil.

As well as the previous smashing of the second universe, the genius of the genius and the huge blood and the real body, all hidden together in a closed cave at the bottom of the volcano!

But now, look at the residual bones on the slopes of the volcanoes in the central area. Those who are properly preserved by Ye Xuan, plan to occasionally make a tooth festival in the future, or take some of the blood treasures that have been added to the genetic fluid or refine the heavenly medicine. Meat, at least 20% of the disaster.

Could it be a thief?

But this is not true, Shennong Ding is in the body of Ye Xuan, and has been refining him. Apart from him, no one can open the closed cave at the bottom of the volcano.

After all, this tripod is an ancient treasure, which can not only refine medicine, but also be a magic weapon for storage. All the ingredients such as treasure medicine and meat collected in Ding, without exception, can be perfectly preserved. Corruption, taken out at any time, is fresh.

Therefore, some special materials and resources, Ye Xuan is collected in Shennong Ding, directly in the mind, from the bottom of the central volcano, opened a closed cave.

For example, the last undead pearl, such as the tens of thousands of mid-level **** ants that have just been collected not long ago, Ye Xuan is kept here, but they are stored separately, each occupying an independent closed cave.

These closed caves, which are used to preserve important resources, are not open to anyone except Ye Xuan!

Even Xuanyuan Zijing and Duanmu Xiaocha, Zhao Qianru three gimmicks, Ye Xuan in order to facilitate their habitat in Shennong Ding, given some of the authority, but also can only enter and exit the central volcano at will, while regulating one-color orange red flame, In case of an unexpected situation, it can be used for defense. In addition, you can also eat some of the spirits and beasts captured in the rolling hills around the volcano.

Even for them, it is absolutely impossible to open the mountain wall cages and storage caves at the bottom of the volcano, especially the latter!

However, the scene in front of me is really real. Some people have opened the storage caves, and they have also created some of the wreckage treasures of Ye Xuan's collection. Even the huge one-legged Jinwu wreckage has been cut off half a leg!

Ye Xuan's face immediately changed. The first thing he thought of was the accident. The younger generation of the second generation of the second universe, the sacred cages of the central volcano, also imprisoned some of the younger generations of the second generation. When thrown in, the living mouth is closed, and the blood of the fallen person is wrecked and thrown into the storage cave.

Is it that there are hidden means for people such as Jinghong, Jiaotiantian, etc., who have escaped from the cages of the mountain wall?

If this is the case, Xuanyuan Ziyang's three gimmicks are afraid of danger!

As soon as I read this, Ye Xuan immediately rushed, and the body shape rushed directly from the mountain pass above the volcano of the central domain, crashing and falling...

Did not wait for his body shape to fall to the bottom of the volcano, Ye Xuan's line of sight appeared a touch of bright red fireworks in the bright yellow, the atmosphere is too familiar, it is the Shennong fire that he ignited with heart fire.

It was previously clear that there was only one color of orange and red, but now it seems to be promoted, and there is a bright yellow color that has become a two-color flame!

At this moment, the slap-sized two-color fire is located on the east side of the bottom of the volcano in the central domain. It seems to be still drilling underground. It has already penetrated a certain distance. On the ground at the bottom of the volcano, there is a diameter of about ten feet. The big hole is the erosion of this two-color flame.

The four surrounding areas of the Great Caves, the ghosts and ghosts squatting three figures, just Xuanyuan Ziyang and Duanmu Xiaocha, Zhao Qianru three women, at this moment, they apparently did

not realize that there is a figure on the top of the head quickly falling, Judah Still screaming in excitement, I don't know what I saw, and all the little faces were excited and flushed.

"Small yellow hair, plus the strength, but also a little more can be dug up, **** broken rock, after each excavation, can not heal automatically after a small half a day, wait for this lady to finish a meal, after digestion I have to dig it again..."

"Fortunately, the little yellow hair is very powerful, so hard and broken stones can be melted, otherwise our sisters have to starve to death."

"Oh, it's awkward. If it's a small yellow hair, you can drag the golden thigh's fat thigh out today, enough for two or three days..."

Chapter 3658: Terrible

"Hey!"

The resounding came, the vast land of the bottom of the volcano in the central domain swayed slightly. Looking at the scene in the line of sight, Ye Xuan felt that he was black in front of him and fell from the air on the spot and kneeled on the ground.

At this moment, he has all understood!

Little yellow hair?

Pulling out the golden thigh's fat thigh?

Eat enough for two or three days?

These words are enough to illustrate the problem.

For a long time, all of this was originally a two-color flame that had just been promoted. It was the same as Xuanyuan Ziyang, Duanmu Xiaocha, and Zhao Qianru.

The rock at the bottom of the volcano in the central domain is actually the body of Shennong Ding. The lord of the star is inseparable and cannot be destroyed. Apart from Ye Xuan, the owner of Baoding, only the Shennong flame inside Shennong Ding can be opened. A road.

However, this tripod is an ancient treasure to the end. Even if it is melted a path, it can drag some treasures from the inside, but the channel that is opened will soon heal automatically.

It seems that it is really difficult for Shantou and Xiao Huangmao to be a thief. If you have a meal, you have to dig it up. It's hard work, and you're not tired...

Thinking of this, Ye Xuan's entire face, which had just climbed from the ground, was immediately black, and he gnashed his teeth: "Oh, you three gimmicks, I am worried that you have something wrong, I'm down, I didn't expect to hit it. At the scene of the crime, I am getting a job!"

When I heard the movement, the three gimmicks trembled and subconsciously shrank their necks. When looking back, the face clearly showed a sense of guilt and panic.

You must know that they have never been afraid of Ye Xuan. They have always been the only ones in front of Ye Xuan. Now it is this kind of performance. It is this kind of scene that the guilty conscience is.

However, without waiting for the three gimmicks to explain a few words, in the distance between the cages of the mountain walls, there has been a scream of horror, revealing a creepy miserable meaning...
...

"Let the fox, the lord, the screaming lord, beg you to do well, let us all be a fart, and this day is really lingering."

"Playing is playing, Sha Daren, no, no, Grandpa Sha, even if you don't let go, do you always give a happy break? A slap in the face of death, always so guilty, every day is not fired or cut meat or amputation. When you are, you are a head."

"These are nothing, Grandma Fox, you have to fight to kill." Can you force us to eat our own meat? If you don't eat it, you can't do it. If you don't make up, you don't have a long-term meal ticket. Directly on the fire, forcing us to lower our mouths and exchange the meat of each other, this is really terrible!"

"We are wrong! We should not offend you, can we not torture us any more? If we are surrendered, we will make a vow to be a slave. Just take the three devils away." "

"Yes, it's too horrible. These days, it's just struggling in the prison, you can't die if you want to die!"

"Hey, I don't want to see the female monks of the Terran again in my life. There is nothing more horrible than this..."

.....

As these words of pleading sounded, Ye Xuan subconsciously turned his head and looked at the twenty-six-story cages that slowly swept around. He first opened his mouth with a dull face, and then his face slowly began to look. It turned green.

awful!

It is really terrible!

How long has it been?

Including the phoenixes, the celestial celestial beings, the celestial celestial beings, and the young patriarchs of the top ten ethnic groups in the second universe, including the young patriarchs of the second universe, one by one. The change of the big, Ye Xuan almost could not recognize it.

Everyone has scars on their bodies, and some lack arms and legs. At first glance, they are new injuries.

If it is not a new injury, with their cultivation as strength, it will be cured soon, the broken limb can grow again, and the scar on the body will disappear with the recovery of the injury.

Undoubtedly, all of this is all Xuanyuan Zixiaotou and the unreliable little yellow hair dry!

It is estimated that sometimes when the treasures of the treasures are not found in Ye Xuan's storage caves, Shantou's desire for the appetite is directly on the corner of the day, waiting for people to pull the meat or something. Anyway, they are not humans, but only change. The human form is only the **** body is the starry beast, and naturally it has no psychological pressure to eat.

Ye Xuan did not kill this matter. Before the day and other people were locked in this place, Ye Xuan had already baked the meat of the people.

But after all, it's only once, how can it be like this gimmick, going all the way to people's knives?

If you don't give meat, or don't heal, you can still make the little yellow hair to burn people. Can you be more murderous?

As soon as I read this, Ye Xuan shuddered and shuddered, and the face also showed sympathy. It is no wonder that these guys would rather set a vow to be slaves, even prefer to slap by Ye Xuan. At least dead, no need to be guilty of living!

It's really bad enough to be bullied by this gimmick, and there's no love...

.....

In the end, the guilty gimmick promised to start the day without waiting for the divergence, and the guys also made a pledge all the time. From then on, Ye Xuan was the main servant, but there were two hearts. Thunder!

However, Ye Xuan did not even release them from the cages of the mountain wall. After all, they were all scarred. This is bad enough. As long as the three gimmicks no longer toss them, they will say after recovery.

If it is released now, in case of anger and anger, it will cause three grandmothers, and it is estimated that they will get chaos.

Later, Ye Xuan moved the underground caverns of the storage to a depth below, and all of them were banned. This time, except for him, even the Shennong Flame in Ding could not sneak into it. Heart.

It is said that he was speechless. In the end, Ye Xuan asked to know that the reason why Shennong's flame was promoted from the previous one-color flame to the current two-color flame in a short period of time was because the **** was almost no How to stop it, do not use it to roast this day is the reason for burning that, the frequency of use is too frequent, each time lasting for a long time.

In addition to this unexpected harvest, the cultivation of Shantou is a realm. It is because of the large amount of blood and blood that has been eaten during this time. All of them have improved a lot of realms. Nowadays, they are all the eleventh. The strongest in the middle of Xuanguang.

The speed of its ascension is not much slower than that of Ye Xuan, but the consumption is also amazing. In addition to the nearly 20% of the treasures in the underground caves, it also includes the nourishing treasure that is pulled down from the corner every day and so on. The total amount is estimated to be able to pile up a mountain...

After a small half day, Ye Xuan waved and threw 30 drops of intermediate **** ant liquid that had been condensed with Shennong two-color flame, and divided it into three, each ten drops, and flew to Xuanyuan Ziyan three women: "Hey, I will What troubles are screaming? This is a middle-level **** ant liquid that can be swallowed directly. This time, can you enter the twelfth virtual void in one fell swoop, and look at your own creation..."

Chapter 3659: Reborn

"Wow, mid-level **** ant liquid? Actually there are ten drops per person? This thing has always been priceless in the third universe. It is difficult to get it. Even the primary ant liquid is extremely rare. Where did you get it? Got?"

"Great, this kind of thing works best for the first time, at least it can be promoted from the middle of the light!"

"Big bad guys, it seems that your giant tripod is really a feng shui treasure. How long have our sisters stayed in it? It may not be possible to have such a harvest after a hundred years of cultivation. This lady decided to stay in the future for a long time. Settle here, who is going to be anxious..."

I don't see ten drops of the legendary **** ant liquid appearing in front of my eyes. Not only are the rare intermediate ant fluids, but they have even been condensed, and they can be swallowed directly. The three hoes are cheering, and the eyes are just I forgot to do it all.

Even on the spot, he said that he wanted to settle in Shennong Ding. This clearly tasted the rhythm of the sweetness that he did not intend to leave. He immediately took the 20th place in the cages of the mountains around the distance. The geniuses of the descendants of the two races of the universe are so scared that the whole person is not good.

Ye Xuan shook his head and smiled. No work and entanglement with this crazy scorpion, the remaining ant liquid that had just been condensed was put away, and then the body shape shook, then he left Shennong Ding, and once again, he has reached the valley of the Magic Emperor. Deep hinterland.

After Shennong Ding was taken into the body, Ye Xuan set up a ban in a cave on the side of the valley. He walked in and entered the depths of the cave, sitting cross-legged.

Soon, a total of twenty drops of **** ant liquid that has been condensed by two-color flames appear in Ye Xuan's body shape. The size of the longan is suspended in the void, and the size of the longan before it has been condensed is reduced to the peanut grain, some of which are dross. And impurities, as well as some substances that have a bad effect on the forging body, have been completely melted.

Its quality is definitely far more than the effect of some star-studded powers with the secret method. After all, the one-color orange-red flame of Shennong Ding has been quite extraordinary. Now Shennong is promoted to become a two-color flame, no matter it is a refining drug. Or the food is baked, and its effect on the sputum has been greatly improved.

The unrefined intermediate-level **** ant liquid is extremely rare. This intermediate-level **** ant liquid, which has been condensed by Shennong's two-color flame, is even rarer. Even if Ye Xuan has now entered the void, The entire twenty-six treasures of intermediate-level **** ant liquid, it is absolutely impossible to just make the physical blood of the body to be a realm, and to upgrade a small step is as simple as that.

During the meditation, the 20-level peanut-sized treasure of the intermediate-level **** ant liquid was swallowed into the belly by Ye Xuan, and instantly turned into a hot energy, facing the limbs of his entire body. The five internal organs spread and spread.

The strong tingling sensation is coming soon. It is far beyond the degree of forging and quenching that Ye Xuan suffered when he took the gene culture solution again and again. He even heard the faint sound of flesh and blood cells tearing in the clear and faint, seemingly still. There are some mysterious chains that come out from the body.

This is the manifestation of his physical potential, being shaken!

Soon, with the strong effectiveness of these twenty drops of intermediate-level **** ant liquid gradually, Ye Xuan became a fiery red, and the 1.8 billion pores were all sprayed out on Xia Rui Bao Guang, and the top of the head was steamed. A layer of faint mist of mist, the whole person is sitting in the clouds and clouds like a knee-high, extraordinary.

The treasure is born, Xia Rui is rushing, this scene has a miracle, and now Ye Xuan, the whole body and mind are experiencing an unprecedented baptism!

There was a strong pain at the beginning, but in the end, his consciousness entered a state of extreme mystery, and he could not feel the pain at all. Even the flesh seemed to no longer exist, and the whole body and mind seemed to fall into a state of mind. Nothing is nothing, like sublimation!

I don't know how long it took, Ye Xuan suddenly opened his eyes, and the golden glory of the scorpion, flashed away, and then, a familiar system sound was heard in his mind.

"Hey, congratulations to the host, the breakthrough of the body and blood! The current realm: the second level of the void!"

"Hey, congratulations to the host, the breakthrough of the flesh and blood! The current realm: the third level of the void!"

Sure enough, twenty drops of intermediate-level **** ant liquid, just one from the body to the heart, from the inside out of the forging and baptism, so that he has been up to the twelfth realm, he climbed two small steps.

Today's Ye Xuan is already the initial peak of the twelfth world. In the future, there will be a small breakthrough, and it will enter the virtual air period!

When he got up with satisfaction, Ye Xuan discovered that the surface of the body had a thin layer of hard sputum, which is the smear of the enamel in the body. It is very common in the early stage of the refining, and must go through such a process. However, the current Ye Xuan is the strongest in the void, but this phenomenon can still occur, but it is rare.

This also explains the magical effect of these twenty drops of intermediate-level **** ant liquid from one side.

Unfortunately, this type of material is generally best when used for the first time, and will be greatly discounted for the second time, unless its quality is improved.

With Ye Xuan's current ability, even if he is condensed, he can't condense this intermediate-level **** ant liquid into the best grades above the treasures, so he can only give up this time.

Perhaps, in the future, when his Shennong different flames can be upgraded, and become a three-color flame or even a multi-color flame, once again condense these **** ant liquids, it will show a more extraordinary effect.

But that is already a matter of the future. At least for now, Ye Xuan can no longer continue to swallow the **** ant liquid, and let the blood and flesh get a similar magical effect.

However, he is not in a hurry. After the twelfth big void, once a cultivation, he still can get two small steps of strength improvement. This is an unexpected surprise. Ye Xuan is extremely satisfied, and does not expect too much. .

After a slight adjustment of his mentality, he quickly threw the matter behind his head. Then, it was easy to wave out the soul of the immortal world.

Even his own flesh and blood forging has ended, presumably just got some of the basic **** ant liquids, and should have ended this life level jump.

Ye Xuan can't wait to see the results. In his expectation, this time, the whole number of millions of souls and beasts, all got the **** ant liquid that is helpful to the improvement of the life level of their ethnic group, then, If there is no accident, the overall strength of this entire ethnic group should have a comprehensive rise.

The strength of countless individuals has increased, and the magnified to the entire huge sorcerer's war, its significance, should be tantamount to a comprehensive reborn.

Although this is only an expectation, the factual result does not disappoint Ye Xuan. As his spiritual strength expands, he enters the thousands of hive nodes in the battle, and a touch of surprise is easy for Ye Xuan to float. From...

Chapter 3660: Dead sea blood

Hundreds of millions of drops of **** ant fluid investment, this is absolutely amazing, even if all the **** ant liquid, just the primary ant liquid.

In fact, even the entire **** ant family, the horror can not make hundreds of millions of drops of intermediate ant liquid, this kind of thing can only be secreted out of the **** ant level of the Qiankun power level, and only one drop per year, hundreds of millions of drops, That is simply unimaginable.

Such a large amount of primary **** ant liquid is consumed at one time, although it is distressing, but its effect is absolutely amazing, at least, Ye Xuan feels value for money, the harvest is a surprise.

All the sorrowful beasts in the sorcerer's battle, all of them have now achieved a sharp jump in the level of life.

Previously, it evolved from an energy-spirit state to a flesh-and-blood entity, and it has reached only 300,000 heads.

But now, all of the nearly 40 million sacred beasts are no longer energy-spirited. They all have flesh-and-blood entities, all of them are blue, and they have evolved from sacred beasts to sorcerers.

Although the cultivation is uneven, some have reached the black hole, while others have not, but in general, the life level of this group has indeed achieved an overall leap.

Nearly 40 million soul beasts, repaired to the strength of the individual who reached the black hole, about one-tenth of the touch, that is, about four million, the other more than 30 million, are all the fifth realm star, and The sixth largest realm is about the nebula, and a small amount is in the seventh realm of the Xinghe.

As for the 300,000 heads that first realized the rise of the level of life, and can no longer be called the souls of the souls, they are evolving toward the soul of the purple, and the purple stripes appear in the whole body of the blue fur. Network, and repaired to strength, but also from the previous eighth **** hole environment, soared to the ninth big original point of the present!

This is the soul of the 300,000 heads of the original point of cultivation. This kind of cultivation is just a single individual. It really does not look down on the waves, but if the number reaches 300,000, it will come out of the nest. It's just that this is the soul of the soul, and the power is amazing.

Obviously, these 300,000 heads of sorrowful sorrows will be the existence of the small heads of the whole sacred beasts in the future. Ye Xuan will spread them among the thousands of hive nodes of the sorcerer's war, each About 300 heads are touched inside the hive node.

In addition, among the 300,000 heads of the soul, there are three levels of evolution that are exceptionally excellent. The whole body's blue fur is now purple, and occasionally one or two hairs are found. .

They have completed the evolution of the sacred sable, and are evolving toward the sacred soul.

As for the cultivation of strength, it is the twelfth big virtual void, only from the surface strength, it has been comparable to Ye Xuan.

Of course, when it comes to comprehensive combat power, they obviously can't compete with Ye Xuan. It is far worse than the ones that have been crushed and suppressed, and Ye Xuan can do this without any effort.

These three heads are evolving toward the soul of the soul, and can be said to be the generals of the entire soul and beast group, but they are not the king.

Perhaps one day, when they have completed the evolutionary process of the sacred soul, their level of life can be leaped to the extent of the king in the entire ethnic group.

This point can basically be confirmed. In the future, the king of the whole soul and beast group will be born in the three souls!

But he does not care about this issue now, but what he is most interested in today is the power of the soul-stricken war!

The tens of millions of sacred beasts in the thousands of hive nodes in the battle have all achieved a large-scale life-level transition. From the previous energy-spirited form, they have evolved into the sacred souls of flesh-and-blood entities. There are more than 300,000 big-headed scorpions, and three-level generals.

All of this is a combination of all things, and it must have made the overall power of this sorcerer's war, and the degree of horror has risen sharply.

Previously, under the full blow of the sorcerer's war, all the enemies that were repaired below the beginning of the thirteenth big territory in the vast fan-shaped area covered by the huge bell mouth will be instantly killed and smashed.

So now, I dare not say that there is a large number of the fifteenth big world in the same place. Ye Xuan does not even expect the strongest of the fourteenth world, but if there is no accident, The domain starter of the thirteenth world should have been robbed!

This is the beginning of the domain. Even Ye Xuan, his own cultivation has not yet reached the strength, but the soul of the war can kill a large piece, think about it is terrible!

In addition, if you can take time out in the near future and find an effective means to accurately control the three battles, then you will lock a small area, or a few individuals will launch a precise strike, even if it is a mighty or even a star. Nowadays, the soul of the war, may not be able to kill!

In this regard, Ye Xuan has been extremely looking forward to it. I really want to see the extent of the horror that the devastating power possessed after the overall power of the sorcerer's war is raised.

Unfortunately, this incident can't be tried. On the one hand, the lethality is too alarming. I am afraid that I will accidentally injure the devil's strongman on the demon star. On the other hand, Ye Xuan has not yet figured out the precise control of these three battles. The means of effective combat, each time a full blow, the loss is too great.

The tens of millions of soul beasts in the whole soul-stricken battle, finally recovered because of this life-level transition, and once again have the ability to participate in the war at any time, Ye Xuan really dare not try its power, in case Let all the souls and sorrows fall into a period of weakness, then it is really speechless.

Finally, the heart's impulse was pressed down. After Ye Xuan adjusted his mood, he waved his soul to the immortal world, and then he walked to the periphery of the valley.

It was already two days later. On the vast open space outside the valley, there was a huge corpse of hundreds of feet, all of which were the corpses of the strongmen of the Second Universe. In the middle, the soul is destroyed.

Nowadays, at least tens of millions, or even nearly tens of millions of the corpses of the second universe, all of them are piled together. Fortunately, all of them are smashed by the soul, there is no wound, otherwise the whole valley must have become a corpse. Mountain blood sea!

In fact, Ye Xuan also has a number of hearts, don't look at this huge corpse mountain up to hundreds of feet, but if there is no accident, after a small half day, all the corpses will be turned into dead bones, dead blood blade This time, whether it can improve the quality of the order, from the current prospects to the treasure, into the real starry sky, and soon there will be results.

"call out!"

In the heart of the stirring, Ye Xuan will recite the blood of the dead magic in the immortal world in the mind, and will rise in the wind, turning into a **** magic knife of 100 meters in size, facing this huge corpse, Go...
