

Super D. S 3671

Chapter 3671: Five battles

Regarding the enemy assembly of the large-scale wormhole at the front of the Devil's Star Field, the top of the Devil's Royal Family has always been closely watching.

For this reason, the current news came that the main fleet of the Second Universe and Allied Coalition Forces has been assembled and is moving forward across the entire line. When coming to the Magic Emperor, Ye Xuan and the top of the devils are the top leaders. Set off and sail to the frontier battlefield on the edge of the Devil's Star!

Since it is easy to wait for work, naturally there is no need to wait early in the front line of the battlefield, until the last moment before the start of the war, it is not too slow to apply, this relaxed and casual attitude, for stability The military heart also has certain advantages.

And when the magic sign arrived at the frontier battlefield, Ye Xuan was the first time, and once again gave the entire devil's 5 million army all the warships in the battleship, and throwing a dose of reassurance.

During the wave, the four major battles that he received in the immortal world were simultaneously sacrificed. At this time, the hidden method was opened, and the frontier of the battlefield was advanced one step ahead. The spiritual warfare, which had already been in place for a long time, also removed the hidden array. The power of concealment appears in the void.

In an instant, the five major wars are empty, each one is a giant, facing the huge bell mouth of the enemy camp in front, with a diameter of 300,000 meters!

This scene is very shocking. The five great warlords stretched the militants in the five million warships on the front line. It was like eating a reassuring heart, the uneasiness and fear of the heart, and the blink of an eye dissipated more than half!

After all, the power of this kind of star-studded killer, in the previous two wars, all the forces of the three universes can be seen in all.

Even in the last battle, the devil's ethnic group only gave up three warlords, but now there are five, how can it not be shocked?

This is tantamount to confirming a speculation from one side, that is, in the hands of the demon group, there are not only three star wars, but even the five that are now sacrificed are not necessarily the limit!

This scene fell into the eyes of the commanders of the Second Universe and Flocks in the opposite camp, thousands of miles away, even when it caused a scream.

It is to open the concealed array method, which is in the three observation castles behind the main space fleet of the Second Universe, the emperor's emperor's dragon, the ruins of the emperor's palace, the court's palace, and the Federal Institute of Supervision. People, also amazed, his face showed a taboo color.

After all, the previous years of battle, the moment of killing the star lord of the star is too shocking, and now the top three forces of the three major universes, for the star wars of the devil's group, are all in the throat, Can't ignore it and taboo!

Previously, Medusa, who had suffered a big loss in Ye Xuan's hands, the new Shaozuo Changpeng of the Qingpeng nationality, the new and young masters of the **** family, and other people, nowadays they are all weird, and now, Ye Xuan's five battles, the star lords in the group behind them, had to be treated with caution, and they were no longer the ones they could face.

Of course, Medusa did not know that the emperor of the Devil's Royal Family, Mo Zhenfeng, was actually the sorcerer who had made her suffer a big loss in Shennong Ding.

Peng's horror and arrogant Tianji also did not know that Mo Zhenfeng was in the first battle of the Double Pioneer Fleet not long ago. He once defeated them and killed and killed more than 20 people under World War I. Sha Baofeng, the patriot of the descendants of the universe.

Otherwise, they feel at the moment, fearing that it will be more bitter and complicated and countless times!

The commander of the entire Second Universe and the tens of millions of coalition forces is the **** clan of the old family, and the deputy commander is the Du Fu Teng from the Caisong!

Two domain owners, we are terrible!

But at the moment, it's not the two of them. After all, the level is too high, and it's impossible to jump out at the beginning, so that there is a loss of identity.

Through the star-borne sound system, the flagship fortress of the **** clan fleet, the voice of a star elder of the family slowly spread out and rang through the void.

"The devil's group, are you going to kill yourself?"

"The old man, the second cosmic **** elder, Yu Hongtao, represents the second universe of all ethnic groups, limiting your family to surrender in a fragrant time, and surrendering the devil's emperor Mo Yufeng, otherwise, the army will launch immediately. With just one round of volley, you can make your family extinct!"

"Where to go, think for yourself, don't make mistakes!"

This is not the general arrogance of domineering, the Devil's ethnic group has five million troops after all, and there are five star wars in front of the defense line, even if the second space coalition forces do have an advantage in the force, there are one thousand two hundred More than 10,000 warships are more than twice the total strength of the demonics.

However, the gap between the overall strength of the two sides will not be disparity to the extent that only one round of their volley will completely destroy the entire demonic group.

This is clearly scaring people!

A group of demon royals, all of them were so angry that they almost stunned their noses. Ye Xuan was completely okay and grinned.

At this time, he stood on the battlefield of the five stars in the center of the Star Wars, carrying his hands, cold eyes and looking at the thousands of troops in the distance, the look of the audience was not shocked, a pair did not take the other party as a dish!

As long as this war is dominated by deterrence, it is necessary to rely on the horrible power of the five major wars, so that the other side will be jealous and force them to first propose the meaning of negotiations.

The five million warships behind the five star wars are the most ideal result.

Among the five battles, Ye Xuan alone controlled four. Therefore, the top of the demon royal family did not send someone to the front line to talk to each other, but gave it all to Ye Xuan. Handling and decision making.

After all, Ye Xuan's identity on the table is also a demon, and it's still the top of the devil's royal family.

From this point of view, Ye Xuan's current weight is actually equivalent to the commander of the 5 million army on the front line of the Devil's group, and it is still dictatorship, and you can decide everything in one sentence!

For this reason, the **** clan, the star of the star's main family, Hong Tao's words just fell, he did not have to negotiate privately with the high-ranking royals such as Mo Wentian in the big fortress behind the magic sign, even if the sound was made. Respond.

Are you not arrogant? Don't you want to scare people? That line, you are scared, you are not scared, who is afraid of who?

"Hey, it turned out to be the elders of the **** and muddy people. It's no wonder that the tone is so big. If a million warships are fired in one round, they will be able to wipe out the five million troops in an instant... You are the battleship of all of you, all star wars. Lama?"

"The time for a fragrant incense is not necessary. Do you want to fire a gun? Don't wait, let's start now. It's your business to volley. It's just a big army. It's not seen. But rest assured, Laozi. The five million

warships behind him are absolutely not a hit. There are five rounds of battles, and basically you should also clean up the mess and sneak back to the house."

"Is it hurting each other? Come, Lao Tzu is Mo Yufeng, you can try it..."

Chapter 3672: Million guns

Ye Xuan's words just fell, and the darkness of the distance is almost instantly!

Whether it is the demon camp behind Ye Xuan, or the second cosmic unity camp outside the tens of thousands of miles, all the people are stunned by his arrogance and domineering!

Five million warships against 12 million, in this weak situation, and not a little weaker, actually dare to release such a rhetoric, the devil's emperor Mo Zhenfeng really deserves to be the world's six worlds. One of the enchanting, not to mention, just this timid and domineering, is enough to deserve his name.

Mo Ke Feng Feng!

Even if it is in a downturn, it is still the style!

At the same time, this seems to reflect his strong self-confidence from one side, and this self-confidence is obviously built on the five starry battles under his feet.

Originally, even in the camp of the Devils, some of the Devils have doubts about the actual combat power of the Five Wars. After all, some of them have participated in the last spiritual battle. After the blow, the devil in the thousands of magic bee nodes will have a short period of weakness, but still have some understanding.

The spiritual war is so, then the other four battles are the same.

Therefore, in some people's guesses, the five warlords who have been sacrificed by the devil's group may just be bluffing. They dare not say that all five wars are not attacked at all, and at least the possibility of volley is not high. True and false, illusory and real.

But now, the demon man, Mo Yufeng, who suddenly emerged not long ago, has so far released his words in a public voice. The content and attitude have already surpassed the scope of strong momentum, and it is simply deliberately provocative.

If the five battles are really real, how come they are so emboldened and courageous?

I thought about it, in the rear of the 5 million army of the Devils, almost all of the Devil's strongmen, all of them have a spirit of strength, and the predictions and expectations of this battle result have suddenly increased a lot. !

As for the second universe of the various ethnic groups in the opposite, at this time, most of them are angry roars and resounding voices, especially the position of the **** clan fleet, which is full of enthusiasm, bloody, and the first tenth of the second universe. The leader of the great ethnic group was actually said to be bloody, which is simply the contempt and insult of the red fruit!

Even so, the **** elders who had uttered their voices had not immediately ordered an attack, and there was a domain owner who was sitting behind him. He did not have this authority.

In fact, he was equally jealous of the five warlords who were swaying in front of the void, including the fleet commanders of other ethnic groups in the coalition.

Before it was only a **** starry war, it allowed the coalition's pioneer fleet to damage hundreds of thousands of warships. All the powerful powerhouses within it, the existence of the thirteenth big territory, all disappeared instantly.

The golden starry sky war is even more perverted. After the urging, the short three interest rate is not enough, so that a star of the color scorpion is completely degraded, even a whole body is left, only half load the bones.

If there are five battles, they will not say that the tens of millions of coalition forces formed by the entire second universe have been wiped out, but at least they can make them hurt and suffer unbearable battle damage!

Of course, they are equally suspicious of the fictitiousness of the five warlords. The reason why the elders of the **** elders were so arrogant was to test the demonics and see their enthusiasm.

Now, the devil's emperor Mo Zhenfeng has been more determined than he is, and this temptation has obviously failed. Let alone the elders of the **** family have no right to order the entire army of thousands of troops. Hair, launching a volley, even if he has this right, fear that it may not be too easy to make such a decision!

Just as he was struggling, I don't know how to respond to Ye Xuan's arrogance. The cold-speaking words of the **** family's main domain are in the ear: "Does he want to hurt each other?" The wish is yes, just try the bottom of the five battles, order the bombardment, tentatively launch a volley with a million warships, the goal: to lock the five battles!"

Upon hearing the instructions, the **** clan's commander of the Star's main fleet was frightened, but did not dare to ask too much. When even ordered, a million warships, simultaneously volleyed, locked in a void of thousands of miles away. The five major battles!

Soon, in the long and long battle line, there was a warship that rushed out of the fleet of various ethnic groups. It was basically a small fortress of more than 5,000 meters and a large fortress of 10,000 meters, which was mixed with a diameter of 50,000 meters. The small fortress and the big fortress of 100,000 meters in diameter.

As for the 3,000-kilometer star-rated conventional warships, the range is less than 10 million miles away, and it can be used in the follow-up battle. Now, it is only spread in the back of the sky. Strong momentum only.

The million-strong fortress and fortress rushed out of the fleet of the major ethnic groups, and fully activated the charging program of the ship's main gun, and quickly assembled to the central domain, only to the **** family's star commander. The launch command will be issued and the volley will begin immediately.

At the same time, Ye Xuan also waved his hand and divided the five-fifth battleship of the first line of the Devil's group, which was divided into five large arrays, and issued a command to fully recharge and open the energy defense cover.

At the end of his life, he did not intend to let the five million warships behind him bombard even a single shot. If the five star wars could not deter the other side, the five million warships could basically escape.

But now, all the warships do not charge the naval guns, but they are fully energized to open the energy defensive hood. The purpose is obviously only to prevent the bullets, and it is clear that they are not ready to attack. This is also evidenced by Ye Xuan. The authenticity of the words represents his emboldened spirit!

In a sense, the five million warships will not be fired. The effect that can be brought is more practical than all the warships. After all, Ye Xuan wants to deter the other party, not true. The opening, there is no strength!

In addition to the five million Devil Warships in the void behind him, and fully open the energy defense cover, Ye Xuan also issued the command of the war.

Of course, two of the five war lords are now completely uncompetitive. These two battles are the emptiness of war and the war of the years.

Among them, the tens of millions of Void squads in the Void Wars have recovered almost, and in a few days they will be able to launch another blow.

In the years of war, it will take another ten days to recover.

The war la who can accommodate him, only the **** battles of the warriors, the souls of the war, and the spiritual warfare of the devil.

However, Ye Xuan did not intend to let the three battles volley at the same time, so that the bottom is leaked. Since the volley is not five, is Mao?

Even if a single warlord was bombarded, he was not prepared to let the devil's spiritual warfare fight, but chose the blood-mosquito war that had just formed combat power.

Ye Xuan's order was just released. The **** mosquitoes and princes sitting in the **** mosquitoes were immediately stunned, but the content made Ye Xuan feel surprised...

Chapter 3673: Blood mosquito first hit

The order was just released, and the **** mosquito warrior's **** mosquito king's **** scorpion had a reply, and the content made Ye Xuan feel surprised!

Bloody is actually asking Ye Xuan to explore which mode of attack!

The implication is that it seems like this **** mosquito, there is more than one type of attack.

This is obviously a fact, otherwise **** will not have this question, **** is really a problem with the mind, killing crazy, but the IQ of others is not weak, nor Ye Xuan can not rest assured that he can sit on the blood. The mosquito battle is over.

The **** blood did not live up to this kind of trust of Ye Xuan. After the completion of the war, Ye Xuan did not study it carefully, but he sat in the **** mosquito battle, but he has already done this, at least, for the blood mosquito battle. La has two or more attack modes, he knows, Ye Xuan does not know!

After a slight sigh, Ye Xuan did not dare to delay even if he squatted, and immediately queried in the data repository of the phagocytic system.

At this point, the phagocytic system is really convenient. All the magic weapons, items or minerals, resources, etc. that Ye Xuan has contacted, if there is no information related to it in the previous system database, then after the contact with Ye Xuan, the system The database will automatically update the data once.

The information that may be added to the new information is not comprehensive and will be gradually improved in the future, but there will always be some basic information.

As for the star-studded killer that the blood-mosquito warfare has just created as a system-attached forging system, the data related to it is obviously perfect.

Ye Xuan just looked up and thoroughly understood.

The blood-mosquito warfare has two attack modes, the normal mode and the burst mode!

In the normal mode, Warla brings together a powerful blow from the unique bio-wave frequency of 40 million murderous beasts, allowing all nearby attacks, including regular physical attacks, and unconventional energy attacks, to go back in an instant, and It is a retrospective in the state of acceleration, just like an invisible shock wave.

In the burst mode, the kinetic energy, there will also be an invisible shock wave formation, but this attack mode has nearly ten million special alloy thorns densely attached to the front side of the core honeycomb node. To put it bluntly, these are the Special alloy thorns, with the unique ability to accelerate the power of the mosquitoes and beasts, far beyond the horror speed of the general guns, one shot at a time!

"Hey!"

"call out!"

"Hey..."

Ye Xuan just figured out the situation. On the opposite side, there was a blast of energy from the guns. The million warships volleyed, and one round came down, that is, millions of energy beams.

Among them, the black antimatter energy light column with a diameter of 20,000 to 30,000 meters has hundreds of channels and is relatively concentrated, basically in the central area directly opposite.

Fortunately, although the energy beam of these ship-borne main guns is powerful and the rate of fire is super fast, the two camps are separated by thousands of miles of space, not so fast, at least a few breaths.

At the foot of Ye Xuan, the blood ant war, but has already prepared for attack at any time, as long as Ye Xuan ordered, within a second, Wei Neng will be blasted out, covering a large fan-shaped void in front.

Among them, the hundreds of black antimatter energy beams that are being spurred are concentrated in front of them, so they are all in the huge fan-shaped void covered by blood mosquitoes.

However, Ye Xuan's power for the conventional attack mode of blood-mosquito warfare also works for this black anti-matter energy beam, and his heart is really bottomless.

Unfortunately, the time is tight, and I have not allowed him to think too much. Under the teeth, Ye Xuan even gave instructions to the bloody: full blow, regular mode!

"Hey..."

The violent high-frequency tremors produced by the mosquitoes flapping their wings, and they sounded, and this time, 40 million murderous beasts roared at the same time. If they were all under the direction of the **** mosquitoes, The forces of high-frequency vibration are constrained and gathered together, gathering from one honeycomb node to the core node of the ninth circle.

Instead of divergent expansion, I am afraid that this large piece of void will be disturbed and trembled at this moment.

"Hey!"

In less than a second, the sound of the screaming scream of the **** prince has already sounded, and an invisible shock wave rushed out from the huge trumpet of the **** mosquito, and after the increase of the special form of the war, left the diameter of the war. In the largest outer ring, this invisible shock wave has already blown the voids out of the void, and the speed is reaching its peak.

When the blast came away, there was a layer of invisible ripples in the void that resembled the fine fish scales on the water. The blink of an eye was millions of miles, and the gunfire energy beam from the opposite camp was rushing. Contacted!

At this moment, Ye Xuan's heart mentioned the eyes of the blind man. To be honest, he did worry that this conventional attack mode of the blood-mosquito warfare would be ineffective for the black anti-matter energy beam that was bombarded in the 100,000-meter-diameter large fortress.

After all, it is not an ordinary energy beam, anti-material light energy still has its special attributes!

All this kind of worry is obviously superfluous. The blood-mosquito war and the 40 million murderous mosquitoes did not disappoint Ye Xuan, even if it only stimulates attacks in the normal mode, even if it faces millions of roads. Among the gunfire energy beams, there are hundreds of 20,000-30,000-meter-diameter black anti-matter energy beams!

"call out!"

"call out!"

"call out....."

A sharp and unpredictable sound of breaking the air suddenly made a big fuss. As the void was pushed forward by the huge fan-shaped pleats, the energy beam of the guns that were touched was all suddenly abrupt. The stagnation, then it seems to have been subjected to some kind of more powerful counter-thrust, and all of them turned around and rushed back.

And still lasing back in a state of sustained acceleration, at least double the time!

Between the two camps that are opposite each other, the original space is separated by thousands of miles, and the millions of guns and light beams that collide with the scales of the fish scales have crossed the virtual space of three or four million miles. Being pushed back, shooting back at a faster speed, only less than half a second, they blasted to the big fortresses and fortresses that just shot them out!

"boom!"

"boom!"

"Booming..."

Huge bombings came in an instant, one after the other, densely packed.

The galvanized millions of guns and light beams, although not all in the fan-shaped area of the blood-mosquito battle, can only be returned to the back of only six or seven hundred thousand, but this is enough for the other side. Have a good drink.

As the sound of the dense and rainy sounds screamed, the forefront of the enemy camps thousands of miles away, there was a huge fireball in an instant.

Millions of warships have just issued a round of volleys. In less than three seconds, the light beam of the gun that was shot out will be turned back and slammed back. All this is too eye-catching. Under the defense, there are few warships that can avoid this. a strange bombardment...

Chapter 3674: Soul

"boom!"

"Booming..."

The overwhelming sound of the explosion came, and a huge fireball exploded, and the corner of the sky was illuminated. Like a large number of stars, the stars blew themselves, and the power was shocking.

Millions of warships volleyed, but at this moment, sixty percent of the warships were shot by their own gunfire energy light column, and these warships did not support the energy defense shield at all, and the speed of the rifle's light beam was too Fast, twice as much as when it was shot, and it was so bad that it caused such a tragic result.

As for the nearly 400,000 ship's light beams that are not in the fan-shaped area of the blood-mosquito war, they are not affected by any influence, from the sides of the huge void sector to the first line of the devil's group behind the five major battles. The blast was over.

Although there will be some damage, after all, there are still 400,000 gun light beams, it is impossible to avoid all, but all the battleships of the Devil camp are in a state of giving up the attack and fully supporting the energy defense mask.

Even if it is hit, it will not kill the ship!

Therefore, Ye Xuan did not pay attention to the situation behind him, no need at all!

At this time, nearly 600,000 large and small fortresses and fortresses in front of a thousand miles of vacancies exploded in a short half-interest, some were completely destroyed, some were half-damaged, and the first few battleships were in the void. In the second universe of the universe, there was a loud roar of anger and anger.

Basically, all of them are the great powers of the Qiankun and the lords of the stars. In this level of starry sky warfare, the supreme existence of the domain's main territory is in the camp. Even if there is another accident, the strength is below the Qiankun. The strong, no qualifications to exclaim, will deliberately restrain themselves!

"How is it possible? What is this attack? Is it related to some kind of law power? It can make all the attacks be forced back and fully counterattack!"

"No, this time is different from the golden war of the last time. It can't be the breath of power. It is more like a unique wave-frequency amplitude energy, which forms a shock wave of terror. It hardens all the light beams of the ship. Come back!"

"The energy form of the naval gun beam is still the same. If the magic weapon is launched to carry out a physical attack, the impact of this shock wave will increase several times. How can this be broken?"

"This is amazing. The devil's group really has a fascinating world. The kind of warfare technology that he has mastered can be compared with the starry black technology of the fox, but if the five battles are volleyed, What kind of scene will be created, I can't imagine it!"

"Bluffs! Absolutely bluff! Otherwise, a good volley, how can there be only one war in the end? And it is still a new debut, the other four wars that have been provoked one time ago, why not see the movement?"

"Yes, although this kind of war is powerful, it can never be without any restrictions. Is it not against the sky? Without any surprise, the four wars that had been inspired not long ago could not be stimulated. During the uncooled period, all the sacrifices come out of the void, just to scare people."

"It should be like this. In addition, the battle of La has been motivated before, and now this new debut of the war has also been stimulated. In this way, the five battles in the sky opposite the sky, now fully armpits, purely furnishings It is."

"A test will tell you, let's take another round of volleys. If you can't damage a million warships, I will wait for a million troops.

.....

With the exclamation of the road, the chief commander of the domain of the Second Universe has clearly recognized this statement. In the various fleets, some large and small fortresses and warships have been rushed out, facing the void in front of the camp. In the assembly.

Before the wave of millions of warships, which were completely destroyed by fireballs, they were towed away, and they were not damaged, or they were not damaged. They evacuated themselves and gave up a large piece of void.

The first wave of temptations, the Second Cosmic Coalition paid the price of nearly 600,000 large and small fortresses and fortresses to varying degrees of damage, but this is obviously irrelevant to the entire coalition with a total strength of 12 million.

They did not give up at all, and decided to send another army of millions of warships to carry out the final temptation.

After all, the five war lords who are now squatting in front of the void have indeed all been provoked once. The earliest is the black spiritual war, which was unveiled in the first battle of the Pioneer Fleet of both sides.

Then there was the gray void war, the **** sorrowful war, and the golden years of war, and the three wars were more exciting.

Now, in the five battles, it is precisely these four warriors who have remained silent, and only inspired the dark red **** mosquitoes who made their debut.

It is no wonder that they will have such a guess.

In fact, this is also the result of Ye Xuan's deliberate intention. He is trying to make such a misunderstanding to the other party. He believes that the other four warriors have all been inspired not long ago. Now they are offering, squatting in the void, just bluffing.

The more certain such ideas and ideas are determined, then, when their second wave of temptations unfolds, they finally find that the facts are completely different from the speculations. The consciousness has determined that it has been spurred not long ago, but now it must be only the other four battles that are still in the display. When they were successfully motivated and brought huge losses to them, they were already too weak to be neglected. Under the huge gap of facts, they could be instantly rendered to the extreme!

This is the higher the climb, the heavier the fall!

Of course, in the face of the second round of temptations of the Second Universe, Ye Xuan could not let the other four battles volley at the same time. He could not do it. Among the five battles, there is still a blow. Only the devil's spiritual warfare, and the sorrowful warfare that was revived in an instant because of the all-encompassing evolution of all life forms of the sacred beasts.

In fact, Ye Xuan was not prepared to let the devil's spiritual warfare take action this time. He had to leave some last-minute prevention measures. Anyway, it was only the success of the sorcerer's war, which was enough to overthrow the command of the opposing camps. The seniors are determined to be self-confident.

After all, this time, the war is sorrowful, although the shot is the same battle that was only recently launched, but because of the overall jump in the life level of tens of millions of souls and beasts in the battle, the power of this attack Yes, it will definitely be far ahead.

This will obviously bring new doubts and suspicions to the opposing camp. Without any surprise, after this attack, they will not only accept the tragic facts that the Five Wars still have the ability to continue

to fight, but even because of the sorrow Suddenly, it shows far more than the previous horrible power, and the suspected demonics still hide.

Under such doubts, the result will make the other party vote for the smugglers, which will lead to the third round of temptations that Ye Xuan is worried about.

In the end, either accept the reality, hold the nose and propose negotiations, or, in spite of everything, go straight to the full battle, but the possibility of the latter is obviously no more than 30%...

Chapter 3675: Million battleship has no live mouth

"You are right, Laozi's Star Wars has a cooling period, but it will not be long enough to take a few days. The blood-mosquito war has just been stimulated. It is really impossible to inspire it now, but Laozi still has four battles. La preparations!"

Facing the exclamation and roar of the top leaders of the enemy in the second camp of the enemy camp, Ye Xuan sneered again and again, still carrying his hands, a completely indifferent look: "You don't want to try again? Come, use one more. Even if there are only three left in the end, the tens of thousands of troops will still be dead and dead..."

During the speech, he has waved his hand abruptly, and at the same time secretly spurred the blood of the soul in the core hive of the soul of the soul of the beast!

This time, he did not intend to wait until the other side of the volley and then shot, at this time in front of the virtual air thousands of miles away, the second wave of tempted million warships have basically assembled, is the best time for a speculative raid!

When I saw Ye Xuan's speech, I waved again, and the strong players in the battleships of both sides of the camp all mentioned the eyes of the blind.

The Devil's Powerhouses in the rear of the Devil's Camp naturally hope to see that there is a war that can be re-inspired, because in that case, the words of the other party's screams become jokes, and the speculations that the four warriors can no longer use after a short period of time. Then they will not break.

In the camp of the second universe of the second universe, the heartstrings of the strongmen of the Second Universe were even more tense, and Ye Xuan's words were too confident, which made them feel uneasy.

After all, the other four war lords have been motivated not long ago. If there is now a real battle and a successful squad, then, in the face of the remaining three war lords, who dares to say hard words?

Even if there are only three left, the people will shoot down once, and the same million troops can be short-legged!

It can be said that Ye Xuan's light wave has touched the hearts of countless strong people in both camps. At this moment, the whole piece of void is one of the quiet!

"Hey!"

"Hey..."

As a result, some people were happy and stunned. With Ye Xuan's right hand falling, the sorcerer's war on his side suddenly trembled, and the dense and faint high-frequency tremble sounded extremely loudly.

This is the spirit of the thousands of hives in the soul of the battle, and the spirit of the scorpion is full of power, and the wave of power of the sorrow of the soul is restrained and brought together, and at the same time, the core node of the ninth lap of the battle. The signs of gathering together.

The humming sounded, and the vast void of the universe was quieter. Then, after a short silence, the cheering cheers in the demon camp behind Ye Xuan immediately sounded.

I was shocked by the countless strong talents of the Second Universe and the various ethnic groups. The moment, I wonder how many people were pale and my heart suddenly sank.

Just now, I was very determined, and the squadrons of the various ethnic groups commanded the top officials. At this time, they were horrified and exclaimed.

"What? Actually activated? How is this possible?"

"And it was not the black war La who was the first to be inspired, but the **** battle that was only recently provoked once. This is clearly intentional. The boy is worried, and he has specially inspired the wars that have been used recently. Prove yourself, and pick the **** battle, this is the rhythm of all the strong men in my million warships!

"Withdraw! Withdraw immediately!"

"That's too late....."

.....

"Hey!"

Not waiting for their exclamations, the sorcerer's sorrow at the foot of Ye Xuan has suddenly stunned, sending out an earth-shattering screaming and screaming, the whole piece of emptiness, all under this whistle, tremble!

With this horrible scream that is sharp enough to tear the sky, the innumerable strong people in the sky and the sky are stunned, and even the mind and consciousness are at this moment, seemingly to be drawn by howling. Go and go.

In front of the battle, the invisible tides of the sea like a starry sky smashed from the core nodes, and continued to enlarge along the outer nine-layer ring of the war, and finally turned into an invisible force that smashed the sea, in an instant, It will be shrouded in the vast void of the huge bell mouth!

There is no thundering blast!

There is no shock scene of the void!

There is no emptiness whirlpool like a black hole!

It's just a sigh of sorrow to the indescribable voice of screaming, swaying this corner.

Even the kind of fine-grained ripples of the fish scales formed by the **** mosquitoes before!

This blow of the sorrowful warfare seems to have no substantial lethality at all, and it can't shake everything in the field of vision. It is just hearing, and it has been greatly challenged.

Everything is exactly the same as the last time, but at this moment, countless strong men in both camps are all subconsciously holding their breath, nervous, because everyone knows what will happen next, that kind of horror The scene, just a while ago, has been seen once.

Sure enough, the unexpected scene soon appeared.

"what!"

"what....."

.....

The tragic sounds have come, one by one, and the half-interest time has been densely packed. In the front of the emptiness, the millions of warships shrouded in the fan-shaped power-energy area of the sorcerer's war are screaming and repeating.

But at this time, it is still only smelling, not seeing any abnormalities. All the warships, fortresses and fortresses covered by this sorrowful spirit are always in the void.

Diligent!

Two interest!

The three interest rates passed by, the tragic sounds have completely disappeared at this time, and the whole piece of the void is silent. The millions of large fortresses and fortresses that have just been assembled are like ghost ships, and they are firmly parked in place. No movement.

No one figure rushed out of any warship, as if there were millions of warships at this time... no one live!

After a brief silence, the voices of the top leaders of all ethnic groups in the second universe were trembled, revealing deep annoyance and anger, and more uneasy!

"How can this be?"

"The million warships have no living, God, under the attack, hundreds of millions of strong people of all nationalities have fallen!"

"Too horrible, so powerful, this is the real star-studded killer!"

"The big things are not good. Our speculations have been overthrown. The Star Wars of the Devils have a cooling period, but they are not as long as we think. Even the **** battles that have just been ignited not long ago can be stimulated again. Then the other three, especially the one that was first inspired, must still have a blow!"

"Domain start! This time, even the strongest of the 13th big territory has not survived. In the fleet of my family, dozens of domain starters are strong, and the soul is gone, damn, not to say Can this **** battle only make the strong people below the start of the field instantaneous?"

"The last time it was true, although the domain began to be created by the soul, but after all, it escaped, no one fell, this time... damn, they actually hid, the last time was not fully excited, then... this time? Other wars? Is it the same?"

Chapter 3676: Devil style

When the soul screams, the million warships have no live!

This scene, even the numerous democrats in the five million battleships that Ye Xuan had in his own camp, were shocked.

The same is true of the Devils and the Royal Powers such as Mo Wang and Mo.

Although they know that the blood-mosquito war of Ye Xuan's hand that has just formed a fighting power can indeed be stimulated, it does not expect that the same is true.

After all, the Star Wars La was originally the first of the Devils. Before the first battle of the Pioneer Fleet of the two sides, the Devils group used tens of millions of Devils to inspire spiritual warfare.

Now, the tens of millions of demons have just recovered.

In their view, Ye Xuan's other three battles, which had only recently been provoked by the hands of Ye Xuan, were nothing but a bluff.

Therefore, when the second test fleet of the Second Universe of the Second Universe across the emptiness rushed out to form another million-strong army, the tens of millions of democrats in the spiritual warfare were almost done. Prepare for a full blow.

Master Mo has stretched the heartstrings, and only waited for Ye Xuan to make a full-scale start of the spiritual war.

However, Ye Xuan did not mean this at all. The people chose the sorcerer's war on the side of the body, and the sorcerer's war that had just been spurred not long ago, and... actually started successfully!

This alone is enough to shock, but this sorcerer's war that should not be successfully stimulated is not only activated, but even the power it displays is stronger than the last one.

Previously, only the strongmen below the beginning of the domain could be destroyed. This time, even the beginnings of the domain were killed together. This is clearly the last time the power of the rhythm is hidden!

I think that all of them, including the masters of the devils, such as Mo Taiye, are completely obedient.

In the case of the last time, it was changed to them. Even if there are three major battles in hand, it must be the only fear of power shortage. Where can I still move the idea of Tibetan mastiff?

The enchanting is enchanting, the thinking is different from others, the key people not only succeeded last time, but also the bold Tibetan mastiffs, this time, it is by adding a stronger deterrent.

Not to mention the fact that the leaders of the various ethnic groups in the Second Universe Coalition are now in a state of suspicion. Even the top of the devil's royal family, such as Mo Taiye, has produced a feeling of uncertainty and incomprehensibility. !

However, this is not over yet.

The second wave of the millions of troops sent by the opposing enemy camp in the emptiness of the air was destroyed, but only a few powerful members of the second universe in the millions of warships died.

The millions of large and small fortresses and fortresses are intact. For Ye Xuan, this is all spoils!

Previously, the victory of the two big wins, Ye Xuan, a warship did not want, all gave the devil's group, this time, how should he make a profit.

Millions of warships, and all of them are big and small fortresses and fortresses. If they can get their hands and hand them to the Arc de Triomphe, the strength of Ye Xuan's work at the end of the class will suddenly rise to a big step. This temptation is too strong, and he can't resist.

In addition, the corpse of the second universe of the powerful fighters in this million warships, he also has great use. If it is collected together, in the event of an accident, he can wave his hand and then sacrifice it. Has been promoted to the starry sky to the treasure, and the blade of the spirit is about to fully recover the devil blood blade.

And this leads to the robbery!

By then, it is absolutely enough to let the other party's tens of millions of troops, drink a pot.

For this reason, Ye Xuan did not hesitate to wave again, and immediately sacrificed all the ten big fortresses that had already been prepared in the body, and directly launched the space jump. After two flashes, they crossed the seven or six hundred miles. The void appeared in the center of the army of millions of ghost ships.

Then, countless intelligent robots rushed out of these big fortresses, rushing toward the surrounding million ghost ships like the tide.

This time, in order to get more battleships, Ye Xuan used the forging system on the way from the magical star to the front battlefield, and copied and rebuilt the big fortress filled with intelligent robots in the body. Including the intelligent robot inside the fortress, copy it together!

Therefore, at this time, you can wave out ten big fortresses full of intelligent robots.

Fortunately, this kind of ordinary big fortress and intelligent robot, copying forging, but also need to consume the various resources and materials in Ye Xuan's immortal world, but after all, it is a general ordinary armament, so it is not expensive, and the nine big fortresses together All the intelligent robots are not as good as forging a war.

For Ye Xuan, it is completely affordable!

However, this hand is too unreasonable and unexpected to everyone.

The ten big fortresses full of intelligent robots were waved by Ye Xuan, and then the space jumped. Two flashes entered the million ghost ships, and instantly the second universe of the opposite camp was scared. A big jump, I thought he was about to launch new attacks, and the heart mentioned the blind eyes.

However, when the next few intelligent robots suddenly appeared in the void, the blink of an eye spread and opened, and when they entered a ghost ship, all the people finally realized it completely and understood Ye Xuan's intention.

At this time, everything is already too late. Millions of ghost ships have basically begun to expand space. A ship has disappeared one after another and jumped directly to the own camp behind Ye Xuan.

Before and after just a few breaths, the million ghost ships were empty, and at least 300,000 had successfully completed the jump, appearing behind Ye Xuan.

At this time, an angry roar of anger was heard in the enemy camp. A large number of fortresses in the army had begun to recharge, which is clearly the rhythm of rushing out to intercept.

And Ye Xuan's warning words also sounded at the right moment: "Advise one sentence, you better not to act rashly. Laozi recycles his own spoils. Whoever dares to stop the destruction, don't blame me!"

During the speech, he was swayed from the **** mosquitoes that had just been provoked, and came over the golden age of the other side. Then he said that the threat of red fruit was undoubtedly: It's tantamount to murdering aunt, you can do it!"

A large number of fortresses that are rushing out of the tens of millions of troops are suddenly misfiring. The golden war lord is the most powerful killer that even the star lord can kill. Who dares to die?

Just such a time, it is a bit of interest in the past, in this process, the million ghost ships almost did not stop, every moment there are a large number of warships to start space jump, rushed back to Ye Xuan's own camp.

The blink of an eye has disappeared more than half, and even the meaning of blocking has disappeared.

This scene is so embarrassing, the numerous democrats in Ye Xuan's own camp have been thundered, and Mo's grandmother is stunned and whispered: "The murder is arson, and the murder is done in person, this kid... Sure enough, it is a mixed king!"

Chapter 3677: Devil's position

In just one minute and more than a million battleships, Ye Xuan has been decisively shot, all of which have returned to the void in the back of his own camp, densely packed with a large piece.

All of this is like dreaming. Not only are the high-ranking commanders of the various ethnic groups facing the enemy camp fail to come back, but even the countless devils in their own camps are all awkward.

Too bad to play according to common sense, it is simply rampant, can't be lawless!

In the past tens of thousands of years, the celestial family as the first cosmic hegemon, no less than the Wanluo Federation launched a small-scale battle, basically every hundred years or so there is a small war, there is a medium-sized war every thousand years, each For a long time, there is a similar level of battle.

But in the tens of thousands of battles that have lasted for tens of thousands of years, this situation has never happened. In the face of the millions of troops that have been destroyed, they have not waited to catch their breath and immediately rushed to robbery.

Where is this still a plane-level star war? It is simply a star invasion, burning and looting!

For this reason, for a time when it happened to the scene that had just happened, it was really difficult to digest the camps of both sides, and suddenly fell into a dead silence. Everyone, all the brains were guilty.

Ye Xuan did not pay attention to this. At the first time, he ordered the intelligent machine people in the million ghost ships to completely shut down the communication system of all the warships, so as to avoid the other hands and feet by remote control.

In this way, even if the other party left a hidden door in the central control system of these warships, now the starry sky signal can't get in, everything is useless.

Millions of warships have basically fallen into the hands of Ye Xuan.

After doing all this, the intelligent machine people in the battleship began to fully modify the central control system of the million warships. After completing all this, they can be completely mastered in

their hands, and even they can immediately be sent to the battlefield and become their own. The strength of the battle.

In the battleships and fortresses and fortresses behind the Devils, and in the secret of Ye Xuan's spiritual power, a large number of Devil Powermen rushed out. Their mission was to put all the second universe in the million warships. The corpses of the various ethnic groups are collected and stored in a storage magic weapon or a small space box. Finally, they are put together and handed over to Ye Xuan!

This is hundreds of millions of corpses, and at most 100 million throws, it will make the sorcerer's inner slumber inside the sorcerer's **** blade fully recover, leading to the thunder of the sky, while the remaining strong corpse will not be able to return soon. Can make the demon blood blade, or the blade spirit and demon, once again enhance the power!

In short, this time, Ye Xuan made a big profit!

"The devil, you are bent on your own way. Is this going to be ruined?"

"Don't force the old man to shoot, otherwise, the result can only be endless!"

"Destroy your entire ethnic group, at most, let me tens of thousands of troops hurt the bones, and then drag on for a while, let the rear continue to supplement the battleship, and ultimately will not affect me and other big things!"

At this time, in the flagship fortress of the **** clan of the opposite camp, a few words of haze were heard. The voice was very small and appeared casual, but it was clearly and incomparably transmitted to the ears of all the strong players in both camps. Zhen Zhen.

Successive defeats, the original **** shackles of the **** ethnic domain, who had no intention of paying attention to this battle, were finally alarmed.

The whole piece of the empty void once again fell into a dead silence, and the domain lord screamed out, even the enemy in the enemy camp and the star lord did not dare to scream.

The devil camp behind Ye Xuan is even more so. It is the top-ranking monsters of the 9th-order grand perfection, such as Mo Taiye, who are also full of frowns. They are all frowning and alert, and their faces are all taboo.

The identity of the other party is there, and the sound is to ask the entire demonic group, and there is no name to talk to someone specific. This is clearly suggesting that the demon group can stand up!

Although this battle, the devil's royal high-level officials have basically handed over the general command to Ye Xuan, but now they are talking with the other party's fleet commander, but also a domain owner, and Ye Xuan's temper, fear is to bad thing.

For this reason, after Mrs. Mo's frown, even if he wants to get out of the spiritual war, the other's words are obviously not as strong as the previous ones. This is a rhythm that suggests that he can talk. He can't show up.

After singing the black face, the white face should also appear!

However, he is still a slow step after all!

Not waiting for Mrs. Mo's to get up, Ye Xuan's words have already come out...

At this time, he still bears his hands on the golden age of the war, and the big hand waved coldly: "What is it that we are willing to go alone? Isn't it that you will be volleyed when you come up? Who are you scaring? It hurts, who is afraid of who?"

"How? Now if you lose money, you will hit a target? Are you second shameless in the second universe? Can you point to Bilian?"

Quiet!

Dead silence!

This time, even the star lords of the demon group, such as Mo Taiye, took a sigh of relief and stared at Ye Xuan, who was standing on the battlefield, and screamed. Not stopping.

This kid is a mixed king! It's just hob meat!

His own cultivation is only the third order of the twelfth big virtual void. Before the first war, he dared to directly shoot the star lord, and even more speechless, he finally succeeded in killing him. The star lord of the Zun Cai Yi nationality, but also a spike.

All the people originally thought that this was basically his limit. I didn't expect that the words would not be astounding, but in the presence of countless strong men from both sides, they shouted loudly that a domain lord would not be a face!

I have seen daring, can be bold, and I have never heard of it!

After a few moments of sluggishness, Mo Taiye and other democrats of the demon royal family quickly became mad, and they all realized that it was not good. After all, the other party was a domain lord, far from being a star lord, so he was beaten face to face. What?

Xuan Huangzi's years of war are powerful, but it is said that it is possible to kill a domain owner like a previous star owner, and it is not realistic.

However, the tides that represent the power of Lawei can only last for three waves. If you can't kill the lord of the domain, you will only have a cup.

Once the other party is really irritated, the consequences will be unstoppable, which is definitely the rhythm of bad food!

Thinking of this, Mo Taiye and others are anxious, immediately want to get up and fight round, say good negotiations? This kid is simply a slap in the face, and he can't take it if he is mad.

It was also at this time that Ye Xuan, who was among the golden years of war, was a singer and turned again. "But the words are coming back, our devils have always loved peace, and the most dislike is this. It's a matter of killing and killing. If it's a misunderstanding, everyone can say it..."

"After all, although our devils are straightforward and kind, they are not casually used as guns. The first universe is not the first universe of our devils, and the army is forced to do so. Blocked in front of the hard, they are sitting behind to enjoy it?"

"This is not fair. The king is really angry. He decided not to do it..."

Chapter 3678: I will endure

Although Ye Xuan's words are not clear, they have basically hinted at the other person's position!

Moreover, he said that it is also very reasonable. The first universe is not the first universe of the devil's group. At the moment, the celestial beings are temporarily evaded. The vast territory of the first universe belongs to the servants of this plane!

Before the tens of millions of troops of the second universe and the front of the demon's horoscope, the demon royals tried to contact the surrounding slave groups and put forward proposals to fight against the first universe.

But the response I received was a perfunctory perfunctory!

It is precisely because of this that the devils of the royal family are in desperation, when they urgently discuss countermeasures, only someone will propose the idea of abandoning the magic king and lifting the family.

On the one hand, it is indeed the army that can't beat others. On the other hand, it is also because of the anger of the heart, and does not want to be free cannon fodder for other slaves!

If Fei Ye Xuan later put forward other suggestions, maybe the devil's ethnic group has really moved the family.

At this moment, Ye Xuan mentioned this point in the face of countless strong men in both camps. He has countless millions of magical powerhouses in various battleships behind him, and they have all talked about it all the time. All of them are filled with indignation and resentment. Very incomparable.

It is the first cosmic united army outside the tens of thousands of miles away, but has fallen into silence since then!

Since the devil does not want to be hard, then there is no need to continue this battle.

After all, the Second Universe and the Allied Coalitions entered the First Universe this time. The most important purpose is to occupy the source of the evil. It is really unnecessary to have a strong devil in the edge of the First Universe. Wearyness reaches the source of all evil.

The star field is also extremely dangerous, and the main energy of the tens of thousands of troops should be placed in the source of all evil!

If the demonics are weak, it will be easy to kill, and it will be easy, but the current situation is obviously not the case. People are only the first frontier defense line, there are five million troops, plus five The war is raging, even if the second universe has gathered thousands of warships, and the army is pressing the border, it is really hard to go on, and in the end it can only hurt one thousand, and damage eight hundred!

Really unwise!

Of course, the devil's group is indeed hateful, especially the Mou Feng, the devil's emperor who was recently born, is simply mad and arrogant.

But now that this person is strong, in the whole group of the devils, this point, from the **** people of the domain lords, but there are no other strong people of the same level in the devil's group, even a star There is no such thing as the Lord's blame. Let him alone support the overall situation, you can see it.

This clearly means that the person's words, and now can represent the entire group of demons, and the younger generations of the enchanting level of the world can get this kind of weight, but it can be understood.

The key opponent is too hard, it seems to be a mad, really want to be against him, afraid that it is a few words, he has to work **** the table!

And this is exactly what the first cosmic united nations of the universe do not want to see!

At this time, with the temporary truce between the two camps, the commanders of the various clan fleets in the Second Universe of the Second Universe also launched a video conference in the first time, and the secret business strategy!

The meeting was hosted by the old-fashioned family of the **** ethnic group and the old Du Futeng of the Caisong nationality. The scale was very high. The Qiankun genius in each family's fleet did not participate in the qualification. The figures appearing in the holographic stereo screen were all It is a star lord who sits in the fleet of various ethnic groups, nearly twenty.

Two domain owners, nearly twenty star owners, such a video conference, it is scary to death!

"The devil has already indicated his position, suggesting that he can talk to him and let the main channel of the first cosmic sky that was cut off by them. If so, talk about your opinions!"

The hollowed out face is quiet, not sad or disappointing, even with a hint of laziness and casualness. His goal is the source of all evils. The devil's group is really not taken care of by him. Even if the previous two temptations have already given the people The coalition lost more than one million warships of all kinds, but for the existence of the domain's main territory, these really don't make much sense!

After a brief silence, a group of star lords screamed in succession, but before saying their opinions, they all looked carefully and sneaked at the face of the singer Duo Teng Teng.

"The devil's group is obviously strong and strong! They do have the means to make me wait for the army to hurt. But in the same way, we also have the strength to let them rise up. Mo Zhenfeng deliberately shows weakness, indicating that he also understands this truth. Since the position is indicated, it means that the devil does not want to fight, and the boy is also afraid of it..."

"Yes, although the kid is a hob, but after all, there is an entire group behind him. When he shrinks, he has to shrink his head!"

"It seems that the possibility that the devil continues to block on the main channel in front of the starry sky is not great. They show their position and at the same time show the purpose of muscles, that is, to seek a peace."

"Playing is playing, saying, go, actually just want to raise a little worth, so that when I cross the border, I will not shoot them, grin, little man's ambition, not worth mentioning! "

.....

I didn't wait for these singers to finish the words, and the hollows and Du Fu Teng were all black!

These guys are just playing Tai Chi. It's pure nonsense and there are no constructive suggestions.

Of course, the reason is so understandable. After all, the devil's emperor Mo Zhenfeng is indeed too mad, and the two lords who are sitting in the whole army have been offended by him.

The Du Fu Teng of the Cai Yi nationality does not have to say much. The reason why he came here is to kill Mo Yufeng. It is said that the color singer star who was previously killed by him is the old monster and the origin of Du Futeng. Very deep.

As for the hollowing out, as the domain lord, he was directly confronted by the numerous powerful faces of the two major planes.

For this reason, although the geeks of the various ethnic groups present, all of them are arrogant and Du Futeng immediately ordered, and peace talks with the devil, privately reached an agreement, peacefully through this **** magician star field... but this kind of To be honest, no one dares to say it.

If you really want that, it's just like saying that let the two domain owners scream the teeth and swallow their blood. Who has this courage?

For the psychology of the star owners, the short-selling and Du Futeng are all well-informed. Therefore, although they are not satisfied with the sleekness of these guys, they exchanged a look after dark for a while, and finally Pressed the dissatisfaction of my heart.

Everything is based on the overall situation.

First, get the right things in the source of the evil, and back there is time to clean up the demon.

In fact, as long as the source of the evil is in the hands, the second universe must have a second main fleet. At that time, it is not to pack a small demon, and the entire first universe will become their conquest. The land... For this reason, for the time being, I can't help it!

Chapter 3679: Everything for the source

The second universe and the various invaders invaded the first universe, and the purpose is the source of all evils. At this point, the great powers of the fifteenth world of all ethnic groups are not qualified to know, but the top level of the star-studded level is basically Known.

However, even the existence of the level of the Lord of the Stars is only a matter of knowing that there is a certain kind of creation in the star field of the evil, but it is an important resource that the blood ancestors in the ancestral ancestors care about, but what is it? The same is not qualified to fully understand.

Only the supreme grotesque above the main territory of each ethnic group can learn the truth of the truth from the ancestral ancestors of the **** ancestors who have been crouching in the ancestral land.

Of course, the second universe, not all ethnic groups, have their blood source ancestors to survive to this day, such as the Yin Mozu, that is the case, the blood source of its ethnic group, has long been in the era of the ancient times, it has fallen.

However, among the top ten ethnic groups in the second universe, there are basically one source of blood origins from the ancient times, such as the **** and the colorful.

Therefore, these two ethnic groups have been stationed here, serving as the chief and deputy commander of the tens of thousands of troops, and the two lords of the tens of thousands of squadrons and Du Fu Teng, basically know one thing about the general situation of the source of evil. two!

There is a land of eternal heaven and earth. After the war in the past, a starry sky was set up by a handful of stars. The core furnaces of the big arrays can condense a certain amount of evil sources every year with the remains of a large number of ancient creatures. And the level of raw materials, the universe is the starting point.

It is the main level, it is not suitable, it will be treated as waste, spit out from the oven, and discard it!

That's right, after the main level, it is the universe!

This point is basically only known for the existence of the above-mentioned powers. The repairs below the fifteenth state have no channels to access such information.

Star master, domain master, king level, universe level!

After the main level of the domain, it is the main level, after the main level, it is the universe level!

It is only a qualified raw material when it comes to the cosmic-level ruins of the ancient world. As for the main level, it is only a waste. Only then, you can imagine that the general domain exists at the main level. After learning this kind of situation, the earthquake of the heart. Regrettably, how strong it is.

They cultivated the world and worked hard to reach the main level of the domain. Even the level of the waste of the furnace was not reached!

Therefore, it is enough to analyze that the furnace in the starry sky refining and catastrophe, the sinister source liquid condensed by the cosmic-level wilderness, is a supreme cultivation resource.

Even if the ancestral lands of their ethnic groups crouched in endless years, and recovered the source of the wounded blood, the distribution of the year is only one or two drops!

It can be said that don't mention the main level of the domain, that is, the cosmic level among the old monsters of the various races. If there is no chance, there will be no chance for life, and you will be fortunate enough to get even half a drop of evil source. !

But this time it is different. The source of all evils is suddenly changed. It is said that several of the blood ancestors of the ancestral lands of the second universe are even more ruined. This has alarmed all the blood sources behind all ethnic groups. The ancestors, jointly ordered, conquered the first universe, and completely controlled the source of evil and evil in their own hands.

Thus, this time the second universe of various ethnic groups invaded.

Otherwise, if the ancestors of the shackles of the ancestral lands of the various ethnic groups secretly reached a consensus, they jointly issued this expedition, only by the call of a certain ethnic group, even if the patriarch of the first top ten **** sects personally appeared, It may not be possible to have this weather.

Under such a background, the short-selling and Du Futeng as the top-ranking powerhouses in the entire army of the conquest of the army, if this can successfully win the source of the evil, then they will be rewarded. It may break the grid to get a drop of half a drop of the evil source of liquid.

This kind of opportunity can not be missed, perhaps this life is the only one, so, in the eyes of both of them, this first trip to the universe, the source of the evil, can not be lost, is the top priority.

Once the tens of thousands of troops lost, the second universe will send a second main fleet, and it is very likely that the seated town will be a cosmic-level powerhouse. So, it is tantamount to stealing the heads of both of them. Even if there is a reward for the evil source in the future, I am afraid that it will not be with them.

This kind of thing, the blood source of each ethnic group has only one or two drops per year, how can it be a large number of rewards? What it means, it's not bad for the head of the conquering army.

All this, the star owners and geeks do not know, otherwise, there will be no concerns at the moment, and you can directly speak out the thoughts in your heart.

Because, in the eyes of the hollowing out and Du Futeng, the devil's emperor Mo Yufeng and even the entire devil's group, although hateful, will be embarrassed, but compared with the source of all evil, it is simply not in case!

For the sake of the creation of the source of all evil, even if they are the domain lords of the seventeenth world, even if they offend them, they are only the emptiness of the twelfth world, and the short-selling and Du Futeng... Can bear it!

The final result made the nearly twenty-family star owners who participated in the video conference stunned.

After the stars and the old geeks played the Taiji general Dongla Xihuan, the short-selling and Du Futeng two domain lords, the tone was surprisingly calm and made a decision: contact Mo Zhenfeng, start peace talks, the purpose is only One, let the other party evacuate as soon as possible, let out the main channel of the starry sky leading to the first universe, for this, you can make certain concessions, such as ... war compensation and other requirements!

Hearing but the words, more than a dozen star lords were almost not on the spot by the Thunder.

Although this time was indeed the invasion of the Second Universe and the Allied Forces, and the two waves of the versatile army took the initiative to commit crimes, the final result was that their own losses were heavy, and the other party not only lost no damage, but also won a million battleships.

Under this circumstance, the two lords of the domain have actually put the bottom line so low, and they are willing to pay compensation. This is simply incredible, but from one side, it also shows that this second space coalition forces conquered the first universe, toward the evil. The importance of the source advancing, even the domain owners, are not willing to make extra branches.

With such a shock, after the video conference, the **** singer's star singer, Hong Tao, passed the sound system of the battleship at the foot of the battle, and eloquently shouted at the empty space opposite the thousands of miles away. : "The devil, since you do not want to be used by others, as cannon fodder and I am a hard-fought army, then immediately evacuate, let out the main channel of the starry sky leading to the first universe, the old man of the second universe In the name of the guarantee, the entire army of 10 million will pass immediately, and will never start with the devil!"

As soon as I heard this, all the strong people of the devil were all loose, and the top of the royal family, such as Mo Taiye, was even more relaxed.

At this time, Ye Xuan was blindfolded, and his mouth was violently rushed out. He almost scared the top of the devil, such as Mo Taiye, with a heart attack, and fainted on the spot...

Chapter 3680: Leave a road to buy

"Let your sister let! Old guy, are you afraid that you haven't figured out the situation yet?"

With a white eye, Ye Xuan was unceremoniously on the spot: "We are not willing to be used by others, but it does not mean that the devil is who wants to come, whoever has passed, even if you have How about the 10 million army? When we arrive at our site, we have to keep our rules. Otherwise, we will not be able to make a hard copy of the table. If we kill us, you will also be disabled!"

"puff!"

The **** lord's star lord Hong Tao spurted blood on the spot. The devil's emperor Mo Zhenfeng was not something. He just deliberately showed weakness. Now, when he listens to his own side, he pushes the boat and looses his mouth. This kid Immediately turned his face again, the typical inch is in, it is a shame!

However, if you are angry, the words that people say are not heard, but they are facts, and the two lords who are responsible for the entire army of millions of people have already made a decision, even the bottom line is listed. I dare not entangle too much in this matter.

With the roaring flesh of the devil's emperor Mo Zhenfeng, it really took a long time with him, and he might have to worry about other moths.

I still hold my nose and think that I am unlucky. I will solve this problem first and then say that other accounts, and then go back and calculate with him!

[illegible]

"That is, you are the second universe of all ethnic groups, the warships are over ten million, how can we care about our little democrats..."

Following the other's words, Ye Xuan grinned and laughed. He didn't wait for the faint feeling that some of the restless Yu Hongtao had come back. His words turned and he directly extended his right hand: "The rules are very simple, although the first universe is It's not our demon family. Where are you going, how to toss, we can't control it."

"But the Devil's Star Field is the territory of our Devils. One or two warships are counted. Now you have to cross the warships, the exhaust gases from all the battleship kinetic energy tanks along the way, and the noise generated. All of them are a serious influence on the living environment of our devils!"

"In this case, how much does it mean to mean something, do you say it right? The right to pass the toll, you can do it!"

When the words were exported, the surrounding emptiness was dead again, whether it was the own camp behind Ye Xuan, or the second cosmic unity camp in the void outside the tens of thousands of miles. All the strong men looked at him at this time. The look is weird!

This fat bile is estimated to be no one!

With a five-million warship facing the horror army of a tens of thousands of warships, they dare to bluntly extort and demand so-called tolls. This is not enough to describe the three words of the knives. It is really speechless!

What is even more speechless is that Ye Xuan is so arrogant and hard. The two lords who sit on the army of this tens of thousands of warships are actually more and more determined that the other three battles under his feet must have a blow. .

In the end, in order to avoid the extra-budgets, it affects the business of the source of the evil, and the two lords of the emptiness and Du Futeng re-voiced.

"To meet his requirements, let the commanders of the various national fleets send a batch of cultivation resources, and then hand it over after summarizing!"

"It doesn't matter if you give more points. Anyway, there are more, but it is only temporarily kept in the hands of the devil. After you have taken the source of all evil, some of them are time to liquidate with them!"

The domain lord said this, and Hong Hongtao naturally did not dare to continue to swear, and immediately conveyed the meaning of the two domain owners.

Soon, the commanders of the various national fleets sent a space box, and after they were put together, Yu Hongtao sent a 10,000-meter-old fortune to expand the space and came to the front of the five battles to pay the toll. !

After the space box arrived, Ye Xuan did not even look at what was inside, how many, a big hand waved, and the five million Devil Warship behind him began to evacuate quickly and returned to the Devil's Samsung internal defense line!

This is clearly the rhythm of the main channel of the starry sky leading to the first universe.

Everyone thought that Ye Xuan had no fat, but he didn't know that he was completely deliberate.

The reason for asking for tolls at the last minute is not to take advantage of the opportunity to make a profit, but to deliberately show a strong sufficiency, so as to dispel the last suspicion of the other party's mind, completely dying to avoid the tens of thousands of troops passing the magic When the human star field, suddenly repented!

In fact, the two lords who took the tens of thousands of troops in the town did have such an idea. They planned to suddenly shoot when the fleet passed the Devil's Star Field, suppressing Ye Xuan and winning five Star Wars.

But now, it is determined that Ye Xuan is not bluffing. After the enthusiasm is really enough, they have finally dispelled this idea. Of course, the most important thing is to worry about the business that affects the source of the evil.

Ten million troops passed, the duration is not short, but Ye Xuan has not always carried five star-studded battles to stay in the outer defense line of the Emperor Samsung, waiting for the **** and Qingpeng, the warrior The flagship fortress of the great ethnic group went away. After disappearing from sight, he waited for a little while, then he took up four battles and returned to the magic star.

These three tribes are the top three in the top ten communities of the Second Universe. The domain lords responsible for the command of the entire army of the tens of millions of people are sitting in the flagship fortress of the **** people. It can be said that the fleet of these three tribes, Basically, it is equal to the backbone of the entire second universe.

They have all passed through the main channel of the magic star Samsung, and they have gone far. The final crisis that Ye Xuan is worried about can basically be ruled out.

At this point, whether it is Ye Xuan, or all the royal elites of the Devils group, the heart that has been hung up has finally been completely put back.

This time, there is no danger, everything is quite smooth, not only to resolve the imminent crisis, Ye Xuan also got millions of fortresses and fortresses, as well as a large number of cultivation resources and materials.

The so-called toll of the second cosmic coalition finally paid, Ye Xuan did not hand over to the demon royal family, but this he himself won, the devil group has already harvested nearly a million warships in the previous two wars, and can not always All the benefits are shared by one of them.

What surprised Ye Xuan is that the amount of tolls in this batch is still very sufficient. Basically, when Ye Xuan used the forging system to build four star wars and the nine big fortresses filled with intelligent robots, the resources consumed. The total amount is equal.

That is to say, after getting the toll fee, his body has consumed nearly half of the resources and materials in the immortal world.

In addition to this toll, the millions of fortresses and fortresses that were collected this time, Ye Xuan did not intend to hand over to the devil, but prepared to return to the Triumph City...
