

Super D. S 3691

Chapter 3691: Eight

In the end, Long Hao endured the anger of his heart, delivered 25,000 warships and fortresses and fortresses, and handed over a large number of resources of equal value.

Later, it was passed, and with the face of the blue and blue, the Senlan Blue fleet rushed through the main space of the first universe of the Devil's Star, and rushed to the source of all evil!

This time he was really mad, and he was also scared!

He has seen the horror power of the war, and he has seen it twice in succession, and both of them have just eliminated the goal.

For the first time, a total of three waves of golden tides representing the years of the eternal years were provoked. After a wave of 10,000 years, three waves and 30,000 years, the stars of the second cosmic singer were not able to hold on, the short three In the interest rate, only half of the bones were left.

For the second time, only a wave of golden fan-shaped tidal waves, the Hongdu Liefeng and the 100,000-meter-diameter fortress were completely solved.

It's no coincidence that it's all about solving the goal twice!

Reminiscent of another **** sorcerer, he was provoked twice before and after. For the first time, only the star-studded powers below the beginning of the field could be instantly destroyed, but the second time they could not escape. One came, the last time it was clearly hidden...

Therefore, Long Yin is now extremely suspicious of this golden age, and most of the same, hiding in the hustle and bustle, the three waves of golden tides must not be its limits.

If it can continuously stimulate five waves or even six waves, it is terrible. The second killing star is like a play, that is, the domain is bombarded, and it is not dead or half-mutilated!

This kind of speculation makes the dragon stunned, just like the big fortress in the hands of the lord of the fox, but the whole body is the muzzle of the antimatter dead light cannon, just can't believe it!

The former Master of the Fox has mastered the shocking starry black technology, but he has been exiled to the turbulent stream, which is regrettable, but now, in the hands of the devils, there is also a power that is not weak. Starry Black Technology, for Long Yao, this time he suffered a big loss, his face was damaged, but his heart was secretly happy.

He has already decided that after returning to solve the problem of the source of evil, returning to the federal headquarters, he must make every effort to promote one thing, that is, at any cost, send troops to the first universe of the demon people, and the total command must also Mastered in your own hands, so, the horror black technology of the Star Wars, such as the Devils, can not fall into the hands of outsiders!

With such expectations and full of resentment, Long Hao led the Senlan fleet and quickly left the Devil's Star Field, heading for the direction of the first universe, and quickly went away...

At the same time, the front of the Devil's Star Field is connected to the large universe of the third universe, and the immortal army of the immortal dynasty is gathering.

Two days later, an immortal regiment, also the size of five million warships, came to the Devil's Star Field, and the commander of this immortal regiment was the old dragon plaque of the Imperial Court.

Before this old guy was sitting in the old town of Death Star, he had been entangled with Ye Xuan. This time, Ye Xuan learned that the commander of this immortal army was actually him, and suddenly he sneered.

Although he has the identity of a prince, after all, it is not good for the immortal army to start, but it is still a good thing for this old guy, and the right to export is bad.

At this time, the three million warships dispatched by the demonic group have once again turned the magical star field to the main space of the starry sky in the first universe.

And the starry sky wars that lie in front of the three million battleship camps are no longer five, but eight!

In the morning, three other warlords came from the rear of the Emperor Star, and now they are mixed between the five real Star Wars.

Yes, these three new wars are fake, empty shells and power systems that can travel in the stars, but the thousands of nodes are simply empty shells, and the transmission pipeline is fake. However, the outer surface layers of the three warriors have all been coated with a camouflage coating. No matter whether it is mental power or knowledge, or various wave scanning of technology, there is no problem!

The three fake wars are the fake golden wars, the ***** souls, and the gray voids!

As for the other four fakes, I am still working on the construction of the Emperor Star!

At this moment, the imperial army of the imperial warrior, with a scale of five million immortal regiments, stayed in the void of more than 10 million miles in front of the magician's Samsung defense line.

Seeing the eight star-studded battles in the line of sight, the words are empty, and the faces of the emperor's old dragon's crepe are green, and they are chilling: "Scared the old man, this demon group actually has eight battles. Is it true that the words that Mr. Mo Zhenfeng said two days ago?"

Although this immortal army was assembled after two days in the evening, arrived here, but as early as three days ago, the Senlan blue fleet led by Long Hao was assembled, and when it came from near the wormhole, the flagship of the emperor's old dragon crepe The fortress, in fact, has already passed through the wormhole, waiting for the follow-up fleet to gather in the void near the wormhole.

The same is true of the flagship flagship of the five-million-star battleship that represents the Terran camp.

The chief commander in charge of the battle of the Stars and Stars of the camp, is also the former court of the Imperial Palace, which was previously observed in the Great Fort.

Two days ago, when the Senlan fleet opened, the dragons and the palaces all sent a scout to the big fort, and opened the hidden array to follow. So, they all knew about what happened two days ago.

After the news feedback, the dragon 梓 pattern has not been taken seriously, thinking that the devil's emperor Mo Zhenfeng is just blowing the air, but he has a deeper understanding of his madness, and the dying of the dynasty, let him The heart is full of vigilance, and I have already made a decision secretly. I must not provoke this guy to worry.

One percent of the tolls are only 50,000 warships or equal resources. The immortal dynasty is not incapable, and there is no need for more festivals.

Besides, the Senlan fleet does not want to pay for this toll. What is the result?

I've got a lot of it, but I'm not stunned at the end? Also lost a big fortress, a loss of a general, the most important thing is the face loss!

For this reason, when the dragon scorpion's immortal army was not fully assembled, it was already decided.

Only 50,000 warships, this passing fee, smashed quickly, the key can not provoke Mo Zhenfeng that crazy!

Originally, there was such a decision. At this moment, I saw that the devil actually had eight wars, and among the three more, there were actually two of the most horrible **** souls and golden years. Warla...

Under the trepidation of the dragon's heart, I haven't waited for Ye Xuan to scream in the opposite air, even if I have already waved a big hand: "Don't honed, 50,000 ships of all kinds, and sneak out, half of the warships, Half equal resources!"

"It's not easy for people to take care of the devil's star field. It's just a small toll.

Chapter 3692: Departure

Ye Xuan has already figured out how to make the old goods in the heart of the dragon. I didn't expect the other party to become like this. Before he even had time to scream, there were already 25,000 warships coming over. Under the battleship, there are a large number of dynasty immortal regiment strongmen, and they took a lot of small ships without a word, and went home!

Received a look, it is also loaded with a large variety of resources, the total value is exactly equivalent to 25,000 warships.

Very disciplined, don't use him to scream!

This result made the Emperor Mo and Tian Huang and the uncle Mo Qigong and others open their eyes and smile. In such a two-day effort, they have harvested 50,000 various warships, fortresses and fortresses, and an equal amount of resources!

The key has not cost a soldier, the last time the Senlan fleet, there are some twists and turns, this time it is not even half a sentence to shout, things will be handed, simply not good.

They seem to have vaguely seen the day when the whole demonic group is fat, and the road robbery is really extraordinary. This is definitely an avenue to make a fortune!

Here, the top of the demons are happy, and Ye Xuan is depressed!

He had already licked the bad water of his stomach, and he had already figured out how to make a difficult dragon tattoo. I didn't expect this old guy to become like this, and he was so disappointed!

However, this is also good, at least to the back of the Ten Heavenly Palace and other forces of the size of the fleet with a good start, played a very good role.

Even the immortal regiments of the immortal dynasty did not say anything, and they rushed through the tolls. What other entanglements are they unwilling?

If there is no accident, the subsequent tolls will be more and more acceptable, and the top of the demons seem to have seen this scene, what a happy one is like!

Soon, Ye Xuan waved to let the three million Devils fleet behind him give up the main channel of the starry sky leading to the first universe.

Although he was upset, he easily let the old goods of Long Yao pattern leave, but everyone has already paid the tolls according to the rules set by him.

In this case, if Ye Xuan finds the embarrassment again, it is that he has broken the rules and has no integrity. If this happens, the follow-up toll will not be collected, and there will be countless troubles.

In order to focus on the overall situation, he can only temporarily suppress the depression of his heart. Anyway, there is a chance to find the dragonfly of the old scorpion. Don't forget, after the end of this magical star field, Ye Xuan also Will rush to the source of the evil.

In that star field, he will appear as the indigenous starry sky savage beast of the evil heart of the core of the evil planet. If you are looking for the trouble of dragon crepe, there will be no pressure on how to toss!

Soon, the immortal regiment of the size of the five million warships, which was led by the dragon plaque, passed through the main space of the first cosmic starry sky of the Devil's Star Field, and gradually rushed to the source of evil near the central area of the plane. .

However, Ye Xuan did not leave here. Although the Second Universe and the Senlan Blues of the Federation of the Vatican and the immortal regiment of the Terran Science and Technology camp have passed, there is still a super-power, that is, the Terran camp. The starry sky battle of the Ten Heavenly Palace is coming, and it is now gathering in front of the Devil's Star Field.

The ten-day palace of the Terran camp is not so irritating. The supreme hegemon of the comprehension camp has a sphere of influence spanning half of the third cosmic plane, representing the ethnic power of half of the entire Terran, and the same eye is higher than the top.

The army of the starry sky that they assembled is also a scale of five million. It is extremely powerful, and its heart and vision are both high. It is definitely a thorn. In the case of such a road robbery, it may not be true. Will be soft, like the old

Therefore, Ye Xuan must stay here to wait for the arrival of the Star Wars and the Great Army.

After the five-million-scale warship army also drove through the Devil's Star Field, he could basically take up the four battles of his Majesty, and immediately set off for the evil source of the first universe.

Although there will be a fleet of other forces coming, for example, the three empire under the immortal dynasty of the Third Cosmic Terran Science and Technology camp, or other small sects of the comprehension camp, minor leagues, and so on.

But these small forces are not enough to pick up any big storms. The first few big heads have not dared to sneak up. They will also measure their own weights. Unless they have a tempered brain, they dare to call the Devils!

In fact, these small forces, Xiaozongmen and even the army of five million-scale warships may not come together. Most of them are millions of troops.

At this scale, the Devils' group does not have to rely on the horror of the Star Wars to deter it. Just the army of three million warships behind the war, they can let them honestly pay the toll...

Soon, it was two days passed by!

After the imperial army of the imperial dynasty, the five-star star battle of the Terran camp was finally assembled near the cosmic wormhole in front of the Devil's Star Field, and it was opened at the first time.

The star wars of the Terran camp are slightly different from ordinary science and technology warships, and all shapes and shapes are basically biased towards focusing on the repair of the real refiner, not the technological power, but in general, the star-shaped battle and technology of the same size The battleship, the comprehensive combat power is still quite, the disparity is not big!

At this time, this five-million-strong battleship composed of various strange-shaped star-ship battle boats, all the way from the wormhole star field, came to the front of the magic king Samsung outside the defense line more than 10 million miles away In the void.

Regarding everything that happened before, the commander of the starry sky and the squadron of the squadron, and the sacred palace of the sacred palace of the Ten Palace, have all been known.

He was really not willing to pay a star-to-ship battle, or a variety of resources of equal value, in proportion to one percent.

But the previous precedents were there, and he couldn't help him tangled.

In the end, after Ye Xuan shouted a word, 25,000 warships and a batch of cultivation resources of the same value were sent over, and they stopped at the virtual air near the magician Samsung's outer defense line.

Ye Xuan did not embarrassed these guys, immediately released, after the entire starry sky battle boat army passed the Devil's Star Field, Ye Xuan came to the front of the 25,000 thousand various types of warships, with great interest Look up.

The starry battle boat of the comprehension camp can basically be regarded as a magic weapon of the refiner. It can be big or small. This makes Ye Xuan quite interested. He even waved his hand and took up more than a thousand battle boats, big and small. All, I plan to stay in my hands, and I have time to look back.

At the end of this, Ye Xuan turned back to the battle of the years, waving, and the four battles of the sire were earned into the immortal world, and the second cosmic coalition had already arrived at the source of the evil, Ye Xuan. The departure is over...

Chapter 3693: explore

The source of all evil is a plane-level starry danger. In the first universe, it is the existence of the first dangerous land under the starry sky. For its danger degree, the high-level commanders of the Second Universe's allied coalitions, I have already prepared myself.

They have even inquired about the basic situation of this star field, knowing that after entering this star field, all the wave signals emitted by the starry sky super brain can not be transmitted.

At this moment, the millions of troops of the second universe and various ethnic groups have been stationed in the surrounding void outside the star of the evil. The army of more than 10 million warships stretches endlessly empty and can't see the head at a glance.

At the same time, the commanding layers of the various national fleets, Qiankun and Qiangeng, are currently conducting meetings through the communication systems of their flagship fortresses.

The presiding over the meeting was still the two lords of the fleet in the town, the old family of the **** clan, and the old Du Fu Teng of the Choi.

"The source of all evils is vast, divided into deep hinterland, peripheral areas, and buffer zones in these two regions..."

The Du Fu Teng, a tribe of the Caishao nationality, is introducing the situation of the source of evil and evil to a group of powerful and star-studded geeks:

"There are only a myriad of void cracks in the outer area. When it comes to the buffer zone, in addition to the void cracks, there are some powerful star-studded beasts that are extremely rare in the outer universe."

"As far as the inner depths of the hinterland are concerned, these starry beasts are even stronger. There are also some unknown dangers. It can be said that the three regions are more dangerous than one!"

"The warships are so large that it is impossible to enter the source of all evils at the same time. In the star field, even if it is on the periphery, it is also isolated from the stars. The problem is solved. Two fleets are dispatched by two ethnic groups. They are stationed inside and outside the boundary line, and they are dealing with small ships that cross each other at high frequencies."

"As far as entering the starry field of the evil, the communication between the warships is not affected, but if it encounters special circumstances, the command of the fleets will be able to solve problems by communicating with each other."

"One of the biggest problems that plague us especially is the problem of space cracks."

"In the peripheral area, there are no indigenous beasts, but there are a lot of space cracks that can move. The army is too large, and it is necessary to construct a safe and stable satellite channel. This is a two-step process."

"First of all, the greedy wolf dispatched the fleet into the outer area of the source of evil and explored to determine the best orientation for constructing a stable passage. Subsequently, all the large and small fortresses of other ethnic groups were all moving together, opening the space to close the device, and gradually pushing forward. A stable and safe entry channel."

"The diameter of this passage is set at around one million miles. After all other fleets enter, they must leave a million ships to be stationed, because there must be a fleet of other forces coming, so we can let them go through the stable passage. Feel free to enter?"

Subsequently, at the end of the meeting, the greedy wolf sent a fleet of explorations consisting of a hundred small fortresses, led by the genius of the great genius, and rushed into the outer area of the source of the evil.

"Oh!"

As the exploration fleet entered the periphery of the star of the evil, the line of sight was dark, the light source became dim, and the visibility faded by more than half.

At the same time, there was a very harsh sound of breaking the air. A huge void crack appeared in front of a small fortress, and it was still moving. The huge void gap was like a black lacquered file. The hull of the small fortress came across.

This scene is too dangerous, the void crack is simply invincible, if it is smashed by this void crack, it is definitely a rhythm that is directly divided into two. Even a small fortress, under such a heavy blow, don't want to use it again in a short time.

Seeing this scene, the cold hairs on the back of the wolf are erected, and the eyes are round and round, and the whole person is sluggish!

Although he was psychologically prepared after the previous meeting, he was still scared by the scene at the moment.

Where is this a normal universe void? It is simply a ruined and ruined bag. The imaginary sky is full of numerous void cracks of varying sizes. One or two will appear at intervals.

These void cracks are obviously not fixed. They are slowly moving in an unknown way. Fortunately, the speed is not fast at all. Otherwise, this place will become a star-studded Jedi that cannot be stepped into, and surpasses the star-level monsters in Qiankun. When we come, we all have to drink hate.

At this time, the hundred 50,000-meter-tall fortress that just rushed into the outer area hovered in the void, seemingly safe, but in fact it is not the case, whether it is forward or backward, or up and down, will soon meet To other void cracks of varying sizes.

Even if you have been parked here forever, you can't do it.

Because these void cracks in the surrounding sky are slowly moving, the corner of any small fortress is safe even though it is safe, but over time, there will be some void cracks moving here.

At that time, if there is no evasion, the only end is to be cut into two, it is terrible!

"It's no wonder that it can be said that the plane level is dangerous. This is clearly a place of emptiness. It is like a whole star field. It is covered with large and small cracks, and it is still moving slowly. This is a star field. The big killing of the level, any presence and material entering it, will be crushed if you accidentally!"

In the face of stagnation, the wolf whispered to himself, and after a long time, he returned to God. After a little sinking, he gave instructions to other explorers around the fortress. All the ships were dispersed and kept in touch with each other. Complete this exploration mission and find the best position to build a stable passage...

One day later, there are still a hundred of the hundreds of exploration fortresses left, but they also launched a line of defense, slowly pushing all the way to the deepest part of the outer area, crossing the front line, even if it is the source of all evil. The domain's central domain buffer zone.

The command of the two domain owners is to explore the fleet and push it into the buffer zone of the central area. Check the situation here and return it immediately!

The wolf was eager to complete the task without hesitation. When the instructions were issued, the surviving 87 exploration fortresses, all of them entered the buffer zone, whether they were dangerous or not, briefly stayed, collected some image data, and immediately evacuated. Exit the star of the evil!

In the next moment, the visibility in the line of sight was once again, and then the wolf saw a scene that made him feel awkward.

Looking into the distance, all the sights are bugs, dense insects!

It is completely boundless, and you can't see the end at all. Even if he stretches out with the knowledge of God, he still catches countless bugs.

Even if it's a wolverine, I've never seen a horrible Zerg in one place...

Chapter 3694: The army is pushing all the way

There are too many worms in sight, and all the savage wolves and the whole squad of the squad are shocked!

Although the number has not reached the point where the whole piece of void is congested to the point where there is no gap, so that the battleship can't be inserted, the density is really amazing. The distribution area of the whole central buffer zone is basically not much. Blank void.

These insects are large and small, hundreds of meters small, several kilometers large, and all are hard-shelled armor worms, not soft reptiles.

The whole body is black and white, and the shell of the limb is covered with oily luster. It must be extremely hard at first glance, and there are more sharp barbs on the limbs and body, as well as limbs and the like, which must be very powerful in combat. A type of beetle.

As for the breath, the vast majority of black beetles are the eighth major black hole below the repair, but a small amount is above the black hole, the wolverine consciousness even caught a few blacks in the twelfth The beetle is stronger than the ordinary starry sky.

This is a world of Zerg, and any strong human beings, even the mighty power of the fifteenth world, must be careful.

Because this is only the edge of the buffer zone, if it enters the inner circumference, or even the depths of the whole source of the evil source, there must be a more terrible black beetle, and it may not appear that the insect king of the dragon some type of!

Fortunately, these black beetles do not seem to be very violent, and the aggression does not seem to be strong. It should belong to a relatively inert cosmic zerg. Otherwise, any creature entering this source of evil will become the beginning of a nightmare.

In addition, all the worms are basically not moving in the same place, even if there is movement, it is also a small area around the wandering, which is a bit squeaky and squeaky.

This is not the sound of eating or grinding teeth. Their limbs crawl in the void, touching the movements of some cosmic dust, indicating that they are not very demanding on eating, which is exactly the characteristics of this type of inert beetle.

"The source of **** evils is just the buffer zone in the central area. There are so many black beetles. Although the strength is not too strong, the number is too horrible. It is hard to imagine going further. The core hinterland will be one. What kind of scene..."

In the mutter, the wolverine waved and ordered: "Immediately evacuate, our exploration mission has been completed, and then build a stable passage, nothing to do with us!"

When evacuating, the expedition fleet speeded up, just a little half a day, and then rushed out of the peripheral area of the source of evil. Then, the wolf smoke will report the results to the fleet commander, and determine the best position to build a stable passage.

The space bridging device is different from the space oscillator, and its technology content is higher.

The space oscillator only reflects a simple spatial oscillating effect. The greater the power, the wider the range of influences. Even the conventional star-rated ships of the 3,000-kilometer fleet can be equipped with low-power.

However, the space-tightening device requires at least a small fortress of 50,000 meters in diameter to be equipped with equipment, which shows that its level is high.

This device was originally created to repair some of the extremely unstable star voids in the cosmic plane, or some small black holes caused by humans.

Through a large number of space-fitting devices, even a small black hole can be slowly repaired and gradually closed.

Ye Xuan was originally in the funeral star area around the Tianhe Star, the small star hole caused by it, and later sent to the fleet, with a large number of large and small fortresses to start the space-mounted device of the ship, slowly repaired.

Otherwise, let it continue to expand, and eventually will engulf a large universe of voids and fall into an unmanageable situation.

The reason why the small fortress and the big fortress are equipped with this space-filling device is that during the interplanetary navigation, the fleet sometimes needs to pass through some dangerous areas with void cracks.

In this case, if the area of the crack area is not wide and the time is not very fast, there is no need to risk the sudden advancement. It is possible to open the space bridging device, repair some void cracks, build a stable safe passage, and then move on!

Right now, it is this thing that the Second Universe and the Allied Coalitions have to do!

The entire army has more than 10 million warships. Although the space-filling device is only a small fortress of 50,000 meters in diameter and a fortress of 100,000 meters in diameter, the number of these large and small fortresses is together, although there is no one. Millions, but close.

Nearly a million of the size of the fortress is divided into rows in a virtual space of a million miles in diameter, arranged in high density, slowly entering the star field of the evil, leading the rear of the army, all the way

It can be seen that in front of the size of the fortress of nearly a million, the void is shaking at a very high frequency with a very small ultra-high frequency.

With this constant tremor, the space cracks of the size of the galaxy in the millions of miles away, which were originally distributed, are beginning to heal at a speed visible to the naked eye.

Nearly a million large and small fortresses are slow, but they have not stopped. They continue to push forward. From time to time, they can see a piece of void cracks, but as long as they are passing through the void, the rear is a smooth road, all The space cracks have disappeared.

This small space crack is not too time consuming and kinetic to repair.

Near the back of a million-size fortress, thousands of warships are easily accessible, and they don't have to worry about space cracks.

After a short period of half a day, the total number of warships reached a huge fleet of more than 10 million, except for a million-strong army composed of bloody, Qingpeng and warriors. Staying outside the star of the evil source, outside the entrance to the channel, all other ships have already entered the outer area of the star field.

Another day passed, a million-mile diameter, from the entrance of the peripheral area to the depths of the deep buffer zone, was finally completed.

In this area of a million-mile diameter, there is no longer a hollow crack. The corner of the outer area of the plane of the horoscope is completely transformed into a thorough path.

This is a miracle, but if you don't have a tens of thousands of warships, or a fortress of a million-size fortress, you can't do it!

The front is the dividing line between the buffer zone and the peripheral zone of the central domain of the evil source.

Beyond this dividing line, in addition to the void cracks that can be seen everywhere in the periphery, the frontal void will see a large number of dense black beetles.

The order of the fleet commander's short-selling was issued at the first time: "Immediately advance into the buffer zone, while continuing to build a stable passage, killing the black beetles, completely removing them, and leaving half of them..."

Chapter 3695: Change in the hinterland

"Booming..."

"boom!"

"call out!"

.....

The sound of the explosion sounded in an instant, accompanied by the sharp sound of the ship's energy beam, which was densely raining and rang through the void.

The tens of thousands of warships of the Second Universe and Allied Forces have crossed the boundary between the outer area of the evil source and the buffer zone of the central area, and entered the buffer zone filled with countless black beetles.

The road that opened ahead is still the size of the fortress.

They still open space fuses, divided into rows, spread out on a million-mile-diameter star trail, and slowly propelled.

While repairing and bridging the void cracks in front of the road, the nearly one-million-size fortress has also attacked from time to time, shooting a cannon energy beam and sweeping the black beetles in front of the void.

The millions of troops that follow the rear of the nearly one-million-size fortress are indiscriminately covered, and countless muzzles point at different angles to the left and right sides of this million-mile-long thoroughfare...

"Hey!"

"Hey..."

The whistling sound screamed, and the countless black beetles that had been crouching in the void suddenly stunned. A large number of black beetles were bombarded with a large body of blasting, and the green light body splashed. The endless shot, this whole piece of empty void, is filled with a stench of smell, turned into a Sen Luo ghost prison!

Although the number of black beetles in the buffer zone of the central area is terrible, it is too large to count, but after all, the strength is too weak, and the strongest is only the twelfth big void.

In the face of such a large army of warships, there is no resistance at all. The army is pushing all the way, and there is almost no obstacle. All the black beetles that are in sight along the way are annihilated.

This whole piece of void is covered with countless black beetle corpses, and the zerg body fluid splattered from these broken corpses, which is very disgusting.

One day later, when the entire army of millions of people approached the boundary line between the central zone buffer zone and the core hinterland of the evil source, the change was prominent.

"Hey..."

When I got here, the black beetle was already very small, so the army of the rear has basically stopped the attack, and the void has already quieted down.

It was also at this time that the original was very quiet, only a few faint dense rustling sounds in front of the void, suddenly a strange humming sound, continued, just like the feeling after the start of the space oscillator.

The void is slightly embarrassing, making people inexplicably scalp tight, and the bottom of the heart gives birth to a bad feeling!

As this awkward humming sounds, there are not too many black beetles in the front of the sky, suddenly rushing toward it, crossing the dividing line and entering the core hinterland of the source of evil.

The virtual air on the left and right sides is also the same scene, as if what is happening in the core hinterland ahead, attracting all the black beetles in the buffer zone of the central area and swarming away.

Seeing this scene, the commander of the fleet of the tens of thousands of troops, the old squad of the **** ethnic group immediately ordered: "Build a channel at full speed, end the last emptiness distance as soon as possible, and then, the whole army, all the members advance into the core!"

The order was issued, and the nearly one million-size fortress in front of the road opened the power of the space-integrator to the maximum, and the speed of travel was much faster.

The front line has already seen the boundary between the core hinterland and this buffer zone. At this moment, the whole army is advancing at full speed. Just two hours later, the nearly one million-size fortress in front of it has entered the source of evil. Core hinterland.

Then, it is the 10 million army that follows!

After entering this core hinterland area, the number of void cracks was less than half, and the dense black beetles disappeared almost completely. Although the whole deep hinterland was darker, it was quiet and cold.

But occasionally one or two passing different scent, but it is extremely powerful, at least it is the cultivation of the thirteenth big territory, even the atmosphere of the fifteenth world is not uncommon.

At this moment, in front of a virtual air in the four or five thousand miles, there is a burst of humming sounds that are not endless but not very embarrassing.

With the sound of buzzing sounds, there are five extremely powerful breaths in it.

The humming sound is clearly the biological wave frequency unique to the black beetle family. At the moment, the invisible biological wave from the front emptiness air is divergent and open, and a large number of black beetles in the surrounding air suddenly change the lazy nature. They all crawled up in the void and gradually squeezed together.

In the blink of an eye, a large black sea of insects formed by countless black beetles gradually began to creep toward the ocean. Like the ocean, waves waved toward the front, and the blink of an eye was hundreds of miles away.

And that direction is the place where the black star emperor's lair star is in the original star territory!

At the same time, there are some other kinds of starry beasts appearing on the sides of the front.

The initial is only one or two, but soon, the number of various kinds of starry beasts in the void is increased. From the perspective of their breath, they are all repairs from the beginning of the thirteenth world.

But these are just some small scorpions, not dare to be too close, overlooking in the distance.

The starry beasts who dare to approach are all at least the existence of the fifteenth state of the world. In just a short half of the hour, when the sight is swept away, you can see at least more than a hundred heads.

Among them, when Ye Xuan came last time, he saw the giant blood-stained dragon with a body size of a thousand feet, and his breath of the whole body reached the late stage of the fifteenth world, powerful and incomparable. .

Even the Qiankunjing is not the most powerful existence of these indigenous beasts. There are so many starry and fierce beasts in various forms and very strong atmospheres.

At the far side of the virtual air in the right side, at this time it is clear that there is a similar look and unicorn, but the green starry beast is coming.

This fierce animal is not very big, only about a thousand feet, is smaller than the average Qiankun big-level beasts, lazy, like being crouching in the void, but in fact, it comes at a speed, its body The breath that is emitted is even more in the middle of the star.

On the other side of the void, there is a humanoid beast, the body of the body, and the body is full of mouths. It is the multi-mouthed beast that Ye Xuan has seen last time, and it is also the existence of a star. And more powerful, it is the late stage of the star...

There are too many such examples. In a short period of time, there are at least dozens of stars in the main beasts. The dozens of beasts in the former position are automatically retreating and letting out the position.

And these indigenous beasts, which are coming from the moment, are obviously all surrounded by the nest of the stars of the black armor, and finally stay in the void in the distance of a million miles from the nest of the stars, overlooking...

Chapter 3696: Hegemony

After crossing the boundary line between the buffer zone of the central domain and the core hinterland of the evil source, after entering the hinterland area, the millions of troops of the Second Universe and Allied Forces immediately stopped at the inner edge of the dividing line.

The scene that is happening in the void in front of thousands of miles is really too strange, and there are many kinds of indigenous beasts in this core hinterland, and the strengths are all extremely powerful, even the great powers and stars. The old blame, casually looking at it, has been dozens of hundreds of each.

Even in the huge coalition of the Second Universe, which has a huge fleet of tens of thousands of warships, there are only a few dozens of lords and monsters. Although there are more than one hundred, there are only a few hundred.

Although this kind of high-level combat power is currently surpassing the group of indigenous beasts that are far visible in the virtual sky in front, it is only the edge of the core hinterland of the evil source. The sight is only in this hinterland. The corner.

Just a corner of the void, there have been so many great powers and star owners, the overall strength of the indigenous beasts in the core hinterland is terrible, you can imagine.

It is the short-selling of the domain's main territory and Du Futeng, and they dare not make it easy.

Therefore, they immediately ordered that the entire fleet of troops should temporarily stop, understand the situation in front, and see what is happening there, and then make a calculation!

The army of thousands of warships was laid out on the inside of the core hinterland boundary line, stretching for thousands of miles, all crouching, and did not dare to have any change.

The second universe of the warships is even more nervous. This source of evil and evil is really a star-level danger. It has been pushed all the way. Everything they saw along the way is shocking. People's heart.

At this moment, only a few hundred people in the ship's power, and dozens of star owners, and two domain strongs hollowed out and Du Futeng, let go of consciousness, carefully toward the front The void beyond ten thousand miles spreads over and explores what is happening there...

Soon, all the faces of the singular and powerful singers and the singers of the stars showed their stunned colors, that is, the short-selling and Du Fu Teng two domain lords, all flashed a touch of sorrow.

The scene seen in the results of the investigation did indeed surprise everyone. There was a **** battle between the high-ranking Zerg!

In addition to the nest of the stars inhabited by the protozoa, there are five powerful high-order black beetles in five different void directions.

Its cultivation is the strength, but it is all the nine-order great perfection!

This is nothing, but at the moment, the five-headed body is nearly a thousand feet in the black dragon beetle king, clearly being bloody, killing each other!

The strange humming sound that was transmitted from this core hinterland was issued by the five black beetle kings. This is a special period of black beetle.

In addition to the black beetles belonging to this family, other ethnic groups and beasts who live in this core hinterland will be summoned, or invited, to witness the birth of the new mother of the family!

That's right, this is a battle for ethnic supremacy.

The previous black armored emperor has already fallen, and the new mother emperor will be born between the five black dragon beetles that have been perfected.

The hegemony of the four black beetle kings this time is not just a matter of winning a victory. Because the nine-order grand reunion is not enough to become a mother, it must be promoted to the 16th world and become a star. The Lord's geek has this qualification.

For this reason, this battle for hegemony is destined to be bloody, because the black beetle kings who have been perfected by the nine-step nine-order grand princes are fighting each other in a way that they engulf each other.

The only result is only one, that is, the other four black beetle kings have been swallowed up, flesh and blood, repaired to strength, etc., all will be turned into the final victory of the black beetle king's resources, help it break through, into the Star territory.

As for the birth of the new Supreme Master of the ethnic group!

In this ethnic group, the black armored emperors of all ages were born in this way. This process is a life-and-death for any black beetle king who participates in the competition.

This hegemony is full of sacredness for the entire black beetle. Even the ultimate blackmail beetle that was defeated is the hero of the ethnic group.

Therefore, whenever the black beetles compete in this **** way, when they compete for the new black armored emperor, the black beetle kings who participate in the competition will issue the unique biological wave frequency, summoning the family. The public, invite other ethnic groups who are also living in this core hinterland to come to observe the ceremony!

It is precisely because of this that the arrival of the Second Universe and the Allied Coalition will not have any beasts to pay attention to.

These include the five black beetle kings who have known that they are outside the central area buffer zone and have ravaged countless black beetles.

In fact, such a large-scale outsider is not allowed to enter the core hinterland, and all the indigenous beasts who live in this hinterland will resist until they are expelled!

But at this moment, except for the black beetles, all the other indigenous beasts have already discovered this huge fleet of alien invaders. For the time being, there are no beasts to pay attention to.

This is because in this star field, the birth of any emperor of the fierce beasts is sacred, especially the black beetles.

This group is too amazing for its reproductive ability, and the number of ethnic groups is extremely terrifying. Therefore, the central area buffer zone outside the core hinterland is handed over to countless low-order black beetles to guard.

Right now, the new mother of the black beetle is about to be born, and other indigenous beasts will come to observe the ceremony with respect. Naturally, they will not act at this moment and start killing.

This is a disregard for the upcoming mother of the family. In this star field, it is a taboo!

However, after the end of the **** battle of the Zerg mother, in addition to the newly born black armor, the other indigenous beasts will not sit idly by, and all the beasts will rush to the distance. A huge invader fleet in the void.

It's just all this, it's only known among all the indigenous beasts, and the second universe of all the powerful allies who are separated by more than 10 million vacancies and watch the Zerg's mother's hegemony battle I don't know at all, I don't realize that the crisis is coming.

Just at the end of this mother's hegemony!

"Hey!"

"Hey..."

The fierce whistling sound was shocking, the **** cruelty was killed, the first black beetle king finally fell, the huge body of the thousand feet was eaten by the other four black beetle kings, and the blink of an eye was swallowed up. In the void, even some of the zerg's gray-green body fluids are invisible.

This scene is too **** and cruel. In such a short period of time, a supreme and fierce beast of the nine-step grand sacred, completely disappeared, so the breath of iron and blood, it is chilling...

Chapter 3697: Two mothers

"Hey!"

"Hey!"

"Hey..."

The four crazy whistling sounds resounded through the whole void, full of joy and sorrow!

The joy is because the four black beetle kings have swallowed a worm that is as powerful as their own. The large amount of flesh and blood and the blood and blood contained in these flesh and blood have been used to make their strength soar. A big cut, and now it is incomparably close to the star territory.

Can definitely be called a half-step star master!

As for grief, it is because they are swallowed up by the food, but they are the same family. It is even possible to be a good partner before each other.

Therefore, for the fall of it, the four black beetle kings who still survived will have grief.

This kind of grief, in fact, does not have any feeling of some final outcome that may be ushered in in the future, because among them, three people will soon get the same ending, be swallowed up, and finally stay, become a mother. The emperor can only be one.

In the whistling sound, the black beetle king, whose four violent powers soared, once again fought, and they did not even use any of the blood talents unique to the ethnic group, because it was completely unnecessary.

This kind of patriarchal war is destined to leave only one worm king in the end, and the other ones can not only be defeated and defeated, but must be degraded and swallowed up.

Therefore, the battle between the kings of the insects, from the beginning to the end, are **** melee, and in this melee, from time to time can see a certain worm king directly open mouth to bite, swallowing the companion's flesh and blood.

This is like raising a donkey!

"Card!"

"Card!"

Two clear and crisp sounds came, and the four black beetle kings caught each other. Two of them were accidentally swallowed, and one leg was swallowed by the other side. The gray-green body fluid splashed in the void.

In the scalp and numb clear chewing sound, the two black beetle kings who successfully smashed a large piece of flesh and blood from their opponents, the figure was instantly moved, rushed out, opened wide, and stretched out the long red tongue. A gray-green body fluid that rushes from the opponent's body.

These body fluids are big supplements for them!

In fact, even for the two black beetle kings who were injured, the gray-green body fluid splashed from them was just as precious.

Then, a more awkward scene appeared, the two black beetle kings who went to the corner of the body, and after a mourning, they rushed over and competed for the gray-green body fluid that was splattered in the void. Body fluids that just emerged from their bodies...

Everything is just for the prosperity of the ethnic group. In this battle of the emperor's hegemony, any black beetle king will go all out, even if the pre-war relationship is good, it will not release water, and eventually the birth of a group does not match. Real mother.

In order to put an end to this, the black beetle king who was created can even devour his own flesh and blood, vying for the gray-green body fluid splattered in his body...

This scene makes the great powers of the second universe and the lords of the stars in the distance, and the two lords of the skeletons and the Du Fu Teng, are somewhat moved.

In the great universe of the second universe, the internal benign competition is extremely fierce. The existence of these old strange levels has been seen more and more numb. In their hands, which one has not contaminated the blood of the same family or even the same generation?

But that is nothing compared to the scene that is happening in front of you, but it is really nothing, and there are a few people who can devour the flesh and blood of their own bodies without hesitation in the

battle for hegemony within this ethnic group. , yes, just try to maintain vitality and strength, so that the battle for hegemony is as high as possible.

Faced with all this, not only the top-ranking powers of the second universe, but also the large number of indigenous beasts around the star of the mother's nest, the sorrows of the sorrows are gradually sorrowful. The more diffused breath is more dignified, and the more it appears to be cold and iron.

This kind of cold and iron, is aimed at the huge alien invader fleet that is still watching in the distance in the distance.

For all the indigenous fierce beasts who lived in this star field, they have been crouching in this past eternal years, not taking the step of the core of the evil roots, because of the depth of the star. In the huge furnace, from time to time will spread a little of the source of their blood.

They don't want to leave, they regard it as the source of the blood. In order to protect this place, every fierce beast does not hesitate to maintain the vitality of the ethnic group in the most cruel way, and the powerful survivability, only so. In order to hold this holy land, it will not be trampled by external forces!

It can be said that what is happening in front of you is the **** battle between the black beetle and the five heads of the worms. In fact, the real source of the roots is the huge fleet of foreigners who are not far away from the sky.

This fleet may be just a representative of a crisis!

But nowadays, at this moment, when the black beetles have to fight for the survival of the black beetles, in order to protect the source of this blood source, they have to start the battle of the tragic hegemony within the ethnic group...

Then, it is doomed to bear the anger of the entire black beetle, and all other indigenous beasts who come to watch the ceremony!

"Hey!"

"Hey!"

Two fierce voices of shouting came, and the battle near the stars of the mother's nest entered a new stage.

Two of the four black beetle kings killed and killed each other, and finally two of them lost their breath of life. The head was swallowed by the opponent and swallowed the belly.

Today, the five black beetle kings have only two left.

However, the two black beetle kings did not immediately start to kill. They were like a heart and soul. They tacitly stopped the hegemony and concentrated on the wreckage left behind by their opponents.

The corpses of two huge black beetle kings, even if they were swallowed by their black beetle kings, are obviously not completely swallowed up for a while.

This time lasted for a few minutes. Finally, the two black beetle kings who were defeated were completely swallowed up.

The surviving of the last two black beetle kings, because of such a rich flesh and blood, the body's repaired breath, is also rapidly visible to the naked eye.

"Booming..."

"boom!"

The incomparable energy of the majestic rushing, the two empty black beetle kings outside the body of the void, because of the horrible power of this horror, resulting in a faint rumbling thunder.

Then, the second universe of various powers and the large number of indigenous beasts who have not waited for all the battles have come back. From the body of these two black beetles, there is a stronger one at the same time. The horrible atmosphere of the sea.

The smell of the star owner!

The new black armor is born!

Only this time seems to have some kind of accident, the newly born star of the main black king of the emperor ... is actually two!

Chapter 3698: Fierce battle

"Hey!"

"Hey..."

The strange trembles sounded, and all the black beetles watching around the stars of the mother's nest were trembled with excitement, and they screamed with excitement and excitement.

There is only one standard for the war of the clan of the clan. That is, all the black beetle kings who participate in the hegemony of the emperor will start **** killing and continue to swallow it until there is a black beetle in the main territory of the star.

This black beetle emperor is the new mother of the ethnic group!

In the past battles of the emperor, there have been new births of the mother, but there are cases in which the black beetle kings who participated in the hegemony survived. More, all the black beetle kings were swallowed up, and finally only There is a situation in which a black armor is left.

Even the black beetle king who participated in the battle for hegemony had only one left, but the mother emperor was still not born, because the remaining black beetle king, repaired to the situation of the star is not at all.

However, like today, the situation of two black beetles at the same time has never happened!

For the entire ethnic group, it is no longer important for the two black beetles to be the new mother or the same.

What's important is that the **** inside of the group that they didn't like very much, so far, can finally stop, because the new insect king has been born, and it is two!

"Hey!"

"Hey!"

At the same time, the two black beetles screamed at the same time, and the pure atmosphere of the star's main body rushed out, but it did not point to the other side, but at the same time to the edge of the nuclear main hinterland, that is, the direction of the second universe of all ethnic groups. Surging...

At the same time, looking forward to the first, there are also indigenous beasts of all other ethnic groups around the mother's nest.

The new female emperor of the black beetle has been born, and the hegemony is over. Now, it is time to expel the invaders!

"Hey!"

The one has a human figure, a body full of body, and a beaked beast with a mouth full of mouths. The head is first screaming, and the wide mouth of the whole body is sprayed with a black mist, and the body shape rushes over, in the void. One of the steps is more than a hundred miles.

In addition, the look at the body and the unicorn are somewhat similar, but the indigenous beasts with green body are also closely followed, and the body is full of **** fog, and the thunder is blasted, and the breath is terrible, and it rushes over.

Both of these are star owners, and they are not just them, but the indigenous beasts with similar breaths have dozens of heads.

Immediately behind the dozens of star owners, it is a group of more than a hundred of the great powers of the Qiankun, among them, the giant **** dragon with a body size of a thousand feet is in the leading position, roaring and roaring!

More than one hundred Qiankun power and the star lord almost simultaneously shot, blinking to form a majestic pressure that shrouded the heavens and the earth, and there were a large number of indigenous beasts below the Qiankun border, forming a fierce beast army. The mighty ship of thousands of warships of the Second Universe and allied forces.

All this happened too suddenly. All the indigenous beasts were quiet and quiet in the emptiness of thousands of miles away. They watched the battle of the black beetles in the emptiness of the black beetles. Now they blink at the same time, and everyone is caught off guard. There are countless strong men of the various national fleets in the army of thousands of people.

"Hey! It's just looking for death! Fight back now!"

"Dozens of stars are in the main territory, and dare to be arrogant? I don't know how to live... If the indigenous beasts here are not friendly, then there is nothing to hesitate to kill!"

The two lords who dominated the entire army of millions of troops had the first time to express their attitudes. The tone was very cold and there was no panic. They were only dozens of star owners, and they could not even attract them. .

The strongest domain owner, any one, can crush dozens of star owners.

What's more, there are also a few strangers in the second universe, and there are dozens of them.

Qiankun's power is more, this time there are hundreds of Qiang Kunda with the army, they will be the backbone of high-level combat hand-to-hand combat!

At this time, these Qiang Kun and the star lords basically all rushed out of their flagship fortress, and the roaring voices activated the blood in the body, manifesting the bleeding veins, roaring and rushing to the opposite side of the air. Countless indigenous beasts.

At the same time, the tens of thousands of warships that launched the defense line also slammed at this time, launched a bombardment of the ship, locked the indigenous beasts that flew across the air, and the energy light pillars of the ship were overwhelming.

There is no doubt that this war has not yet begun, and the balance of victory has already tilted toward the Second Universe.

The two sides of the war, almost the same number of star owners, but in terms of Qiankun's power, the second space coalition has an advantage, the Qiankun power is below, there are thousands of warships on the side of the second universe of allied forces, although the opposite side of the void The number of indigenous beasts is also very large, but it is obviously a joke to say that it can compete with the army of thousands of warships.

Even the two lords who are sitting in this tens of thousands of coalition forces are not planning to shoot.

Because there is no need at all, just the power of this level, there is no need for them to shoot...

The fierce slaughter soon appeared. This piece of emptiness was stained with blood. The huge body of an indigenous beast was not the same as the **** veins. It was as huge as the second universe. The lords of the Stars are torn apart, and they are smashed by the energy of the naval guns of the rear battleships!

The roar, the roar, the fierce screams and screams, resounded through this void!

In the blood-stained world, there are numerous or thick or thin naval energy beams, which will make this scene and the strange scene of blood and fire dazzling!

The war is continuing. Every minute and every second, there are indigenous beasts who are bleeding and hate. Similarly, there are casualties on the side of the Second Universe, and even some star owners have rushed to the formation of thousands of warships. Near the line of defense, the display of blood and magic, often a huge energy paw print, when even a warship turned into a huge fireball.

However, this is not of much use. The entire coalition is too large. The warships of all kinds are more than 10 million. Even if there are some warships damaged in the war, they are completely destroyed

and blown into a huge fireball. Together with the second cosmic group in the warship, they fell together and vanished.

However, this does not affect the general trend. The steel defense line formed by the warships has not been shaken, and there has never been a wave of shaking...

And the indigenous beasts who roared to the front of the line of defense often only launched a single blow, and at most two or three shots, they would be gathered together with a large number of gunfire energy beams, in a short period of time, blasting Slag, almost spike!

The battle was too fierce, and the whole piece of the void was full of **** smell. The indigenous beasts, which had been overwhelming, had been injured more than half in a short period of time...

Chapter 3699: Horror scene

Tens of warships have come, and numerous ships have been intertwined!

The tragic battle of this war has never been seen!

Although the number of indigenous beasts in the core hinterland of the evil source is huge, and after the war on the side of the black armored star's nest, the indigenous beasts in other directions have also rushed over, and the power is amazing. The attack did organize a few waves.

In the meantime, the second universe of all the squadrons and the lords of the stars who had rushed out of the battleship were once forced to retreat. Even afterwards, the great powers of all ethnic groups have fallen into more than 20 stars. The main blame, all fallen four!

But in the end, a wave of attacks by the indigenous beasts was finally repelled in the event that there were Qiang Qiang and the star lord, and after numerous bombardments of thousands of warships.

Not only was it repelled, it even left countless corpses that were overwhelmingly covered with this corner!

Although there are many indigenous beasts, they will not be able to compete with this tens of thousands of warships!

The two black beetle emperors who have just been promoted to a royal family have already fallen, and the other one is already seriously injured at this moment. It seems that the support will not last long!

In the later stage of the star's main territory, the size of the star is as small as a small star-like human-shaped grotesque. It is in the midst of the war. It was torn off by one of the two second-world stars and the other side of the thigh. And even with a 30,000-meter-diameter antimatter dead light gun energy beam, directly smashed!

As for the seemingly unicorn, the alien animal that was cultivated in the middle of the star's main territory has already become a corpse without any life, and it is still a corpse, squatting in the void, and the latter half has been thoroughly It's rotten...

Terrible!

Very terrible!

This fierce battle lasted for half a day, and a whole day and night, the edge of this horrible source of stars was finally cleared.

The emptiness of the abundance of the indigenous beasts of this star field, overwhelming, full of sight, all lost their life, no one survived.

As for the last black beetle, and the humanoid grotesque in the late post of the star, with the last surviving abundance of indigenous beasts, retreat to the depths of the core hinterland.

The indigenous beasts on the edge of the area were originally tens of millions, but now only a million people have escaped. Among them, Qiankun's power is only twenty or thirty, and the star owners are less than ten.

At the same time, the battle damage of the Second Universe Coalition is not small. Thousands of warships are blown up, turned into fireballs, completely annihilated, and the great powers of the Qiankun and the stars are also deprived.

It can be said that this battle, the loss of the second universe, is not small, for any ethnic group, each of the Qiang Kun and the star lord, are precious and precious wealth.

But for the creation of the star of the evil, all sacrifices are worth it!

It was also at this time that when the edge of this core hinterland was thoroughly cleared, the two lords of this tens of thousands of troops were sitting in the air, and the words of the short-selling and Du Fu Teng were cold and ruthless. Sound at the right time...

"Reorganize and go ahead!"

"Our ultimate goal is in the deepest part of the core hinterland ahead. It is not far away..."

Hearing this discourse, the countless strong men in the entire second universe of warships are all mad, and their faces are full of fanaticism.

For this time, the second universe of the various high-level people in the high-level invasion of the invasion of the first universe, the entire army in addition to the existence of the great power of the Qiang Kun, are not clear.

Until the army went to the starry field of the evil, the middle and low-level powers of the various ethnic groups in the army of millions of people were vaguely aware of the true purpose of this conquest. I am afraid that it is not as simple as crusade against the Tianji, otherwise they will not go to Tianji City. But what did you do to the source of the evil that is called the first star of the first universe?

Until the army marched all the way into the core hinterland of the star of the evil, and after seeing countless powerful indigenous beasts in this star field, they basically understood it.

In the depths of this star field, there must be some kind of benefits, which can make the core of the second universe of all the cores are very excited, and they will not hesitate to launch a plane-level star wars, and they must also seize the benefits!

However, this is only a guess after all, no one dares to ask.

But now, the short-selling and Du Futeng, the domain lords of the army, said this, and all the talents were finally confirmed, and then they became ecstatic.

The second universe of the various races were all all kinds of ferocious beasts that flowed in the wild, and they were violent, violent, and they might not be interested in the expedition in the ordinary sense, but this kind of conquest was carried out in order to seek fortification. In the eyes of the powerful people of the second universe, they are the most popular.

The high-level meat, the underlying grassroots, at least can follow the soup.

The creation of this horrible source of stars is so amazing that it has even attracted all the ethnic groups in the entire second universe to gather together and the millions of coalition forces have come to fight for it.

At this moment, after confirming this point, the various ethnic groups in the army of the millions of people, like a group of shots, are all excited and screaming!

Tens of thousands of troops were quickly reorganized, and then they couldn't wait to move forward again. They even had the flesh and blood materials in the wreckage of these indigenous beasts in the void, and they didn't bother to collect them, compared to the depths of this star field. The creation, the wreckage of these powerful indigenous beasts, has lost its appeal!

Soon, the huge army of millions of people pushed all the way, crossed the edge, and finally entered the depths of the core hinterland.

In front of the void, there are also a large number of starry beasts, just like the scenes along the way. The only difference is that these starry beasts are all dead!

The body is huge, and it shows the blood and the body, so it straddles the dark void in front, and most of them are crippled.

In the far distance, you can even see a Taikoo konjac, strong breath, blood is really full of tens of thousands of feet, but at this moment it lies in the void.

Among the three different corpses, the black flesh and blood has no head, and the body is still full of defects. It is still flowing with golden blood and revealing a rich and ancient atmosphere.

As for the other two bodies, the bones of the skeleton are almost completely broken, and only the head is still hanging on the shoulders. As for the dark and foggy illusory body, it has dissipated!

Further away, a silver dragon is in sight, leaving only the second half of the body, the first half including the dragon head, all gone.

Looking back and forth, I can even see a huge phoenix. Although it has fallen, but above the body, it still sizzles with the flames of the Phoenix. It also shows a strong sense of ancientity.

There are too many such corpses, and any one of them is beyond the star-level horror existence. The whole body exudes a rich and ancient atmosphere, which is amazing!

This scene of horror shocked everyone in an instant, the entire army of millions, at this moment, dead...

Chapter 3700: Domain main monster

After a short silence, this tens of thousands of troops were suddenly screaming, and the sound of excitement and incomprehensibility was heard from the fleet of the Second Universe, and the whole piece of the void was boiled...

"God, what did I see? The konjac had three heads and six arms, and the blood was truly tens of thousands of feet. The breath was even more powerful. Like a small star, what is this?"

"The Taikoo konjac! It must be the Taikoo konjac. The legend has been extinct as early as the ancient times. For every generation of this ethnic group, only one konjac was born, and the bloodline was too difficult!"

"What is this? You didn't see the silver dragon's remnant? This is absolutely a waste of ancient life. Every drop of silver dragon treasure, every inch of silver dragon meat, is a supreme treasure, how many years have fallen, half of the broken The torso is still shining with the treasure, and the silver dragon blood is still flowing, just collecting a little, today is not a bad trip."

"There is also a flame bird that is suspected of being a true phoenix. It seems to be more powerful. It is farther away from the faraway void, and it has fallen into endless years. The body style is still steaming mysterious fireworks. It must be Phoenix. Fire, I'm afraid it's just a small glimpse, it's all about refining!"

"I have earned a lot. This time I really made a big profit. Is the core star field of this evil source actually an ancient battlefield that was banned so far in the old days? It is the treasure of the bloodless treasure that is hard to find." It's just the sights that can be seen in the line of sight. Once collected, it's enough to shock the present..."

"Don't you find out? This is just the starting point in the deep hinterland of the core hinterland. There are more deep and distant voids in front. The ruins of the wilderness in sight, the farther away, the stronger the breath, the more precious the blood is. ""

"Yes, this is no doubt. At the end of the real end, there must be me and other unimaginable big things. This time, I will wait for the millions of coalition forces to return home. It is definitely a battle. A bumper harvest than ever before..."

.....

With the exclamation of the middle and low-level powerhouses of the various ethnic fleets, the commanding elites of the various ethnic fleets, the existence of the above-mentioned Qiankun, but fell into silence, it seems that the mood is not high, it seems a little worried!

Less than this level, what we see is only the appearance. Only when the strength is above the existence of the Qiankun, can we capture the invisible in the depths of the hinterland in front of the distant void. Coercion!

Yes, the wreckage of these wild creatures, which are far away from sight, are all singular treasures, even if they only collect these silver dragons or true wrecks visible in sight, and bring them back to the second universe, for any ethnic group. In terms of it, it definitely means a rare harvest.

This kind of flesh and blood is too precious. Every drop of blood, every inch of treasure, is the supreme treasure of refining medicine. With them, you can refine the heaven and earth medicine that works against the sky!

This is just the beginning of the first deep into the core hinterland. There is no doubt that there will be more powerful wilderness and wreckage in the deep and deep voids.

The skeletons of Duo and Du Fu Teng, the domain lords of the **** and colorful sects, are even clear and unclear. At the end of the void at the front, there is also a large refinery.

The raw materials used in the Void Refining and Large Array are all powerful and ruined, and the final products of their refining, even the legendary effects almost chasing the evil spirits of the chaotic liquid, even the second universe. The source of blood, every year, can only get one or two drops of distribution share...

Compared with the virtual refining large array and its final product, the so-called silver dragons and true phoenix treasures captured in the line of sight are not dare to say in the eyes of the hollow and Du Fu. Garbage, but in fact it is really a big difference!

But it is precisely because of this that the core of the second universe, led by the hollowing out and Du Futeng, will be so worried and worried, and the faces are unwilling and worried.

Seeing Baoshan in the air, but not available, this feeling is simply suffering!

They have felt the suffocating sense of pressure from the remains of these silver dragons and true phoenixes!

In front of this piece of emptiness, there are a lot of wrecks of powerful and ancient creatures, each of which exudes a mysterious and ancient atmosphere. The power is amazing and gathers together. It is

definitely a terrorist force. It's just the void that is visible in front of the line of sight, and the army of thousands of warships behind him is hard to beat.

In the face of the invisible and terrible pressure of the emptiness in the void, all the warships below the 10,000-meter castle will be disintegrated.

Only warships above the 10,000-meter castle can barely support.

But this is just getting started. The more you go deeper, the stronger the wreckage of the wilderness in the void, and the invisible pressure that will spread will be even more horrible. One thing is basically certain.

That is the tens of thousands of warships behind them. They can finally reach the deepest part of the arrival. When they see the huge void and refinery, there are only a small part of the nearly one million-size fortress that was opened in front of the tens of millions of troops. .

That is to say, about 300,000 meters of large diameter fortress.

Even a small fortress of 50,000 meters in diameter will definitely not reach the depths and will disintegrate on the way.

This is only a battleship. If there is no cabin pressure and energy shield protection, the second universe and the strong people who come with the army will be more vulnerable, let alone the end of the void refining. The deepest.

It's just the void that is visible in front of the line of sight. The existence of the thirteenth big territory below the beginning of the territory is absolutely impossible to pass through the void in the flesh. It will be crushed by the invisible pressure of the imaginary sky. The body is dead!

In this case, even the short-selling and Du Futeng two tens of thousands of troops in the domain of the main grotesque, are completely unanticipated.

They got some information about the large-scale refinery and refinement from the clan, but they did not know that on the way to the big squad, there was such a terrible invisible pressure in the void.

This problem is not solved, and the purpose of thoroughly controlling the refining and chemical formation in the depths of the front of the sky can only be ignored!

"There must be some special way to avoid the horrible power of the vain..."

In the gloomy face, the grotesque whispered to himself and unwillingly answered: "Otherwise, how can the indigenous beasts who fled into the void in front of the sky, how can they cross this area? They have no cabin pressure and The protection of the energy shields is all about the physical body crossing the void, and some weak existences should have died and died!"

"Hey!"

"Hey!"

The hollowed out voice just fell, and in front of the void, there was a sudden scream of two horrible horror.

The indigenous beasts that were cultivated in the main domain of the domain finally appeared, and they were two of them. This time, the hollowing out and Du Futeng could not be changed by their faces, and their hearts suddenly sank...
