

Super D. S 3701

Chapter 3701: Konjac

"call out!"

A faint faint glimpse of the naked eye disappeared, and Ye Xuan's figure appeared in an instant, turning his head and looking around, and he frowned slightly.

Here is the second interstellar coordinate point that he branded in the first universe, that is, the edge of the buffer zone of the central domain of all evils!

The reason why Ye Xuan was not in a hurry was to let the Second Universe Alliance leave for a dozen days before he departed from the Devil's Star Field because of this interstellar coordinate point.

After starting the interstellar coordinate jump ability of the system's affiliated title, Ye Xuan arrived here almost instantly, across the endless universe of voids, and he was away from the Devil's Star Field a few days earlier than the Senlan Fleet, the Immortal Legion, and the Terran Camp. The starry sky of the Tiangong battled the army, but fell behind.

It will take at least seven or eight days to arrive here!

"It seems that the progress is not bad. The entire central buffer zone has been emptied..."

Turning to the top four, what Ye Xuan can see in the sight is just the wreckage of countless black beetles all over the void, without a live mouth, all annihilated.

There is no doubt that the Second Universe Allied Forces has already passed through this zone and entered the core hinterland of the evil source!

"However, those guys should now be blocked at the edge of the core hinterland. I don't know if the battle between the indigenous beasts is over!"

In the midst of Shen Yuzhong, Ye Xuan shrugged his shoulders: "Even if the indigenous beasts on the edge have been annihilated, this tens of thousands of troops will eventually stop at the entrance of the deep zone, and the ruins of the ruins of the dead sky in front of the sky are too horrible. It is simply inaccessible, and, in the deeper areas, there are indigenous beasts that transcend the star's main territory. The real crisis is only coming at this time..."

"However, I now have a konjac, even if there is no baby body protection, it should be able to go deep into the distance."

"More importantly, in the depths of the hinterland, in addition to the existence of the domain masters who surpassed the star's main territory, the last time they passed under the baby's corpse, they clearly captured some weaker breaths, which should be those domains. The Lord's ancestors..."

"This is extremely unreasonable. Under the horrible pressure, these indigenous beasts who are cultivated as strengths cannot survive, but the facts cannot be denied. They show that they have some sort of anti-aging creatures that can resist the void. The secret means of powerful pressure."

"The last time I entered the area, I saw two wrecks of the Taikoo konjac along the way. One is only the main territory of the star. In the marginal zone, there is a huge body with tens of thousands of feet. It should be the existence of the border... .."

"Now I have been able to show out the real body of the konjac. In the eyes of the powerful indigenous people in the depths of the hinterland, they should belong to the same kind. So, naturally, there is a chance to explore their secrets against the horror of the ancient creatures!"

"Just just at this point, if you can get what you want, this time you come to the source of all evil again, it is worthwhile. After all, the evil source in the huge furnace in the hinterland, every year. There is a batch, this zone, you must come over often in the future!"

"The headless baby corpse is too unreliable, and it is not reliable to pin all hopes on him, or to master the secrets of resisting the ruins of those ruins."

"So, you can enter this area at any time. The source of all evils that the furnace is condensed, all the shares every year belong to me, and one drop will not work..."

"In addition, the indigenous beasts who live in the core hinterland, the secrets in their hands that can withstand the horror of the powerful wilderness, may represent an unexpected surprise."

In the muttering, Ye Xuan clenched his fists tightly, and then hesitated, even when he was in the middle of his mind, he provoked the power of the three-inch konjac that was suspended in the sea.

"Hey!"

In the next moment, as this weak roar sounded from Ye Xuan's body, all the blood and blood in his body was instantly mobilized and run at full speed.

At this moment, the three-inch konjac that had been suspended in his mind and knew the sea was completely disappeared. He became a kind of mysterious force, integrated into Ye Xuan's body, and produced all the power of his body. Some kind of mysterious influence.

The speed is very fast, Ye Xuan's body immediately began to change, the shape of the body changed, and it swelled, and it turned into a black konjac about ten feet.

In the process, there are two other bodies in his body that grow out, one is the body of the cheekbones, and the whole body is gray gold, which exudes a metal texture, giving a feeling of being cold.

The other is the body of the illusory black fog, the breath is extremely embarrassing, as if there is no generality at all, it is completely a black mist, only two sly shots of two horrible blazing red awns.

These two bodies are also ten feet high, connected with the back of the flesh and blood formed by Ye Xuan's deity, forming a three-headed and six-armed konjac body.

A rich and ancient atmosphere, at this moment, the three heads and six arms of the konjac inside the body, spread out!

At this point, the konjac body is completely revealed.

At this moment, Ye Xuan can no longer see the original look. Even the mysterious geeks familiar with him, such as wretched mosquitoes, can't understand the truth. They simply can't see the three-headed and six-armed Taikoo konjac. Ye Xuan!

Immediately afterwards, he did not hesitate to urge the flesh and blood to appreciate the spiritual core of the sea and successfully transfer it to the illusory head of the dark fog.

With this spiritual source core, the body of the Black Mist will be able to display all the spiritual power skills, secrets and magical powers that Ye Xuan has in a convenient and unparalleled manner.

But this is not over yet!

He immediately transferred the ghosts of the mind that hang in the sea to the past, hanging in the depths of the skull of the **** golden bones.

And the konjac flesh and blood representing Ye Xuan's deity can display all other magical powers and techniques mastered by Ye Xuan!

At this point, the konjac body is completely revealed!

Although the breath of strength is only the universe of the fourteenth world, but the rich and ancient atmosphere is pure and incomparable, attracting attention!

The ancient konjac that was extinct in the distant Taikoo period, after the eternal years, today, once again in this star of the evil source!

It is destined to be here, and it will be a storm!

"Everything, this is the beginning! From this moment on, my name... is too old!"

"Roar!"

"Hey!"

"call out!"

In the muttering, Ye Xuan casually gave a name to his current identity. At the same time, the three skulls of the konjac are also looking up at the same time, giving three voices different, but fierce. The breath is full of roar and whistling.

The inexplicable pressure was accompanied by the spread of the whistling sound, as if this piece of emptiness was inductive and shivered slightly.

In the next moment, Ye Xuan did not hesitate, and his body shape rushed directly to the boundary between the buffer zone of the source of evil and the core hinterland of the front...

Chapter 3702: Porcupine and turtle

"Hey!"

"Hey!"

The hollowed out voice just fell, and in front of the void, there was a sudden scream of two horrible horror.

This is clearly an indigenous beast that has been cultivated in the territory of the two territories. It has been crouching in the depths of the core hinterland of the source of evil. The tragic war in the area of this area lasted for a whole day, and they ignored it.

But at this moment, with the arrival of this invading tens of thousands of warships, the indigenous beasts of the two domains have finally appeared, and they are two.

This is tantamount to releasing a signal that has two meanings. One is that this star field is not without the existence of a transcendental star territory, and even the transcendental domain is not necessarily not.

The second is to imply that the existence of these domains above the upper level will not participate in the low-level wars in the border areas. They have their own mission, that is, to guard this void passage to the depths of the core hinterland. Here, they will not sit back and ignore.

Realizing these two points, the short-selling and Du Futeng suddenly changed their face, and their minds suddenly sink.

In the entire Second Cosmic Coalition, only the two lords of these two domain lords are in the depths of the core hinterland of the wicked source in front. As soon as they appear, they are the indigenous beasts of the two domains. The high-end combat power is no longer weaker than their side, which makes the hollowing out and Du Futeng have a kind of advantage, and the sense of superiority is no longer depressed!

"You have crossed the border!"

"Retreat immediately and withdraw from the core hinterland. Otherwise, we will shoot..."

As the two whistling out, the piece from the front is full of a large number of wild and deadly wrecks floating in the void, a black and green light flashing and flashing, and then, two giants will appear instantly.

The figure of the two figures is about a thousand feet, which is obviously not the limit of their blood, because the two bodies are all scattered in the body, and they are all in the middle of the domain. It is slightly stronger than the short-selling and Du Futeng.

They are only the sixth stage of the domain, and belong to the mid-term peak of this situation. It still needs a breakthrough, only to enter the late stage of the domain!

These two-foot-sized figure are green tortoises, full of long green hair, no wind and automatic, and the other is a porcupine beast. The whole body is dark and the fur is bright. At first glance, it is known that the skin is thick. The meat is rough and it is very difficult to deal with.

And this porcupine beast has two narrow **** fangs, which must be hard and incomparable. It is a 100,000-meter-diameter starry fortress and must be pierced!

When the figure appeared, the Taikoo Porcupine and the Taikoo tortoise were all in the void in the thousands of miles away, but when they appeared, they did not stay in the same place. They crossed the void at the first time and slowly approached.

Behind them, there are a large number of indigenous beasts with the following strengths in the domain. The number is about 10 million, including the humanoid screaming before the escape into the void, and the surviving black armor, and the injury has now recovered.

However, the indigenous beasts who had previously fled into the void in the front obviously did not have so much. It is clear that there are other indigenous beasts in this area.

The Aboriginal army not only recovered, but also added the number. Now, under the leadership of these two ancient porcupines and Taikoo turtles, they are slowly approaching, and the final battle is on the verge.

This time, even the strongmen of the two main domains of the short-selling and Du Futeng felt strong pressure. In the previous battle, the balance of the battle was from the beginning to the second universe. The coalition forces are leaning on this side.

Nowadays, this situation seems to have reversed. The high-end combat power of the other side is actually the horror of the two domains in the late stage of the main territory. Even the short-selling and the Du Fu's pain have no grasp of victory. The balance of the battle has already turned toward The side of the indigenous beast has tilted past.

But even at the beginning, the eyes of the hollow and Du Fu Teng are still excited and excited.

Because they saw the tens of thousands of indigenous troops in front, there are some indigenous beasts that have only been the origin, and the caves have been cultivated.

This kind of cultivation is the strength. In the horror of the eternal horror of the endless wilderness, it is impossible to fortunately, but they have not exploded.

This illustrates the problem that these indigenous beasts do have some kind of secret law that can resist the horrific pressures that are scattered in the ruins of countless wild creatures in this void.

As long as you can master this secret law, then this tens of thousands of troops behind him will be able to enter the entire safe and sound.

Moreover, even if this war is defeated, the entire army of 10 million people will be forced to retreat. Even if they withdraw from the core hinterland, they will retreat to the outer central buffer zone, but as long as they can get this secret law, then After the arrival of the second cosmic reinforcements, the hollowing out and Du Fu Teng can still be considered a great achievement.

In the future, I will take this star of all evils and completely grasp the vain refining squad in the depths of the core hinterland. When it comes to merits, they still have the possibility to get a drop of the evil source... ..

Realizing this, the short-selling and Du Futeng immediately became red.

The line of sight is closely watching the army of the indigenous beasts that are slowly approaching, especially the two ancient porcupines and the Taikoo tortoises that are locked in front of the army. The voice of Mori's words is resounding in the first place.

"It's not impossible to let us temporarily evacuate. Just hand over your secret laws against the ruins of the ruins of the dead in the sky!"

"Yes, as long as the secret law is at hand, the army can withdraw. At that time, we will only send a small number of high-end powerhouses to enter. If you have the ability, you will stop it!"

"Hey!"

"When can I wait to bully?"

Without waiting for the words of the two to fall, the Taikoo Porcupine and the Taikoo tortoise in the front of the sky are angry, and at the same time screaming, especially the Taikoo Porcupine, is a roaring voice.

He felt the humiliation. The other person actually said such a word. Is this because he thinks he is a pig brain, so why is it good to lie?

Simply too much!

In the roaring roar, the two long, narrow, long-legged pigs in the mouth of the ancient porcupine have been dragged to the **** fangs of the foot, and they suddenly screamed at this moment, giving a strong blood color that could not be seen directly, and slammed forward!

"Oh!"

"Booming..."

"boom!"

A crisp and loud sound of cracking came out, the central position of the second universe, the void was suddenly torn apart, and the endless stream of emptiness flowed out of it, directly wrapped in hundreds of Small and small warships and fortresses and fortresses were not included.

There are thousands of warships in the surrounding area, and they have been hit by the invisible sharp force. The alloy hull is like a paper paste, and there is a crack in the moment. Without disappointment, the disintegration on the spot, rumbling and blasting into a huge fireball, is shocking...

Chapter 3703: Unfavorable start

"Black pig, are you looking for death? Actually dare to attack!"

"Blasting! Full bombardment, the stronger than the domain start, immediately played..."

Under the circumstance, the Taikoo Porcupine first shot, tearing a space crack in the army of thousands of people, directly destroying thousands of warships and fortresses and fortresses. This scene makes the hollow and Du Futeng angry and immediately roars. Out of voice!

And the first time, the instructions for all members of the war were issued.

"Hey!"

"Hey..."

Immediately behind the army of millions of warships, there was a loud humming sound. This is the battleship and fortress where the battleships are located. The fortresses are all full of energetic rhythms. The dense guns will soon open and blast.

At the same time, a ship of warships has a large number of strong figures of various ethnic groups rushing out, and the hollowing out has issued instructions. The entire army has all the tenths except for the important positions of the fleet command. The three major realms have been cultivated above the beginning, and all have to rush into the void to participate in the war!

In the whole army, there are dozens of stellar masters and tens of thousands of people, and there are hundreds of great powers, and the tens of thousands of strong people in the universe are tens of thousands.

At the moment, all of them rushed out, and in the first time, they all activated the blood in the body, manifesting the bleeding veins, instantly turning into a huge form of fierce beast, spreading a large piece in front of the army of thousands of warships, roaring and roaring. Killing forward.

At the same time, there are also two figures in the flagship fortress of the **** Yi and Cailu fleets. It is the two lords of the fleet who are short-selling and Du Futeng!

"call out!"

"Hey!"

The sound of two whistling sounds, the appearance of the hollow and the Du Fu Teng two people appeared, immediately activated the blood of the body, showing their blood and body.

A huge, blood-colored horned dragon appeared in the void and rushed to the Taikoo Porcupine.

As for Du Futeng, his **** body is also the size of a singularity. It is a colorful scorpion. The snake is a thousand squirts. The speed is so fast that it is like a **** lightning rushing out. From the emptiness in front of the body, two indigenous beasts of the celestial light were swallowed, swallowed into the mouth, and chewed in public.

Fierce!

Then, before everyone reacted, the huge scorpion of this colorful giant scorpion was already blazing, and two smashing sorrowful sorrows were smashed into scary rainbows.

After the shot, the speed reached its peak, and even a strange noise came from the sky. It was like pouring oil into the ice sheet and it was rapidly melting.

It is the blood of the Choi people that screams and blazes.

At the beginning, a descendant of a top-level doorman of the Terran Science and Technology camp, Tianjiao, was in a fierce battle, and inadvertently plundered the front of the two colorful blazing sacs shot by Medusa. Hit, so that his body shape suddenly stagnate, and immediately began a stagnant petrochemical at a speed visible to the naked eye, completely turned into a gray rushing stone carving, a trace of life is gone, falling to the battlefield The ground below, collapsed and smashed!

Nowadays, this kind of power and horror **** magical power is shot from a powerful color pottery that has been cultivated in a domain. The power is even more terrifying, its speed is completely unbelievable, two colorful smashed light columns, winking It was not among the indigenous beasts behind the Taikoo tortoise.

"Hey!"

"Roar!"

.....

The roar, the tragic sounds sounded for a moment, but it was extremely short, and only half a voice was already smashed.

It's just a **** magical power. At least one thousand indigenous beasts have been ruined. Among them, the most powerful one is actually a great power. The power of this attack is not weaker than that of the old porcupine. A sneak attack finally brought back a little face, so that the numerous second universe powerhouses in the army of thousands of warships were greatly excited.

At the same time, the avatar over there was a **** hollow, and it was also shot in the claws. Then there was a body and its equivalent energy blood roaring out, and it was already in the Taikoo Porcupine. Recently, I rushed to him...

"Hey!"

The latter screamed, and the two long, **** scorpions grew abruptly. A huge blood-colored shield was easy to appear in front of the Taikoo porcupine, but its body shape disappeared instantly. When it was not reappeared in half a moment, it was already Crossing the empty blood of the **** smashing out of the energy.

The huge body of a thousand feet has quietly completed the emptiness of the void, and it is close to the **** belly under the shackles of the blood, and the slap in the middle of it, the fangs directly to the **** abdomen!

"Oh..."

The familiar sound of cracking came, and then it was a blush of blood and rain, and the **** body was too big. Together with the hollowing out, I didn't expect this Taikoo pig to have a little control. The law of the void of the universe, such a short-range virtual teleportation, can be quietly silent, even he can not fully capture the slightest fluctuations, can not be close to the other side.

In the blink of an eye, he opened a huge mouth of blood in the abdomen, ate a big loss, **** rain...

At the same time as the Battle of Heaven and Earth began, another emptiness in the sky, a sudden sneak attack, abandoned the Taikoo turtle, but turned to a large number of indigenous beasts behind him, successfully annihilated thousands of powerful indigenous beasts The colorful scorpion, at the moment, also clearly angered the Taikoo turtle.

"Hey!"

A fierce and screaming sound of screaming, the green fluff of the Taikoo tortoise was skyrocketing in an instant, and between the short and the half, the vast void of a thousand miles was transformed into a sea of strange green hair. .

At this moment, the body of the Taikoo tortoise disappeared strangely, and the breath could no longer be sensed. Instead, it was a colorful giant python, and the entire huge figure was shrouded in this strange sea full of green hair. in.....

"Roar!"

"call out....."

The tragic sounds sounded instantly, and the whole piece of the majestic green hairs of the ocean undulating, swaying this piece of emptiness, and the strange green hair rolling in the waves, from time to time, the horror of the colorful giant python, apparently Losing the mysterious blood of the Taikoo tortoise, staying in this green sea of hair, was traumatized in the first time, and suffered a lot of losses.

The camps of the two sides existed in the four major domains. In the blink of an eye, they caught each other and fell into a white-hot killing. However, the situation is obviously unfavorable to the Second Universe, whether it is a **** hollow or a colorful giant Du Futeng. The first fight, all against the opponent, have been hit.

This scene was seen by countless second-class cosmic powerhouses in the rear of the tens of thousands of warships. They suddenly made them mad, and a feeling of fear and uneasiness spread rapidly throughout the army...

Chapter 3704: Crazy porcupine

"boom!"

"call out!"

"Booming..."

.....

At the beginning of the Great War, the two kingdoms in the second universe, the two kingdoms in the territory, were the only ones in the world. They were created by the Taikoo Porcupine and the Taikoo tortoise.

The **** body of the former was opened by the **** fangs of Taikoo Porcupine in the abdomen, and the blood rain fell to the void.

The latter is that the whole body is submerged by the sea of Wanli green hair, which is made by the body of the Taikoo tortoise. It is firmly bound in this scalp and numb sea, and cannot be freed. Only one unwilling The sound of screaming and screaming is accompanied by the waves of green hair!

All this stunned the countless strongmen in the rear second space coalition, with fear and uneasiness, the tribes left the high-level commanders responsible for commanding the fleet, after all the warships were recharged, they were in the first time. The instructions for full bombardment were issued.

Breaking the air, the sound of the explosion sounded overwhelmingly, and the energy light columns of different sizes were shot from the army of thousands of warships. They were intertwined into a sky-like giant net in the void, covering the battlefield ahead.

The energy and light column of the cannon that can't be counted is only about a half and about 40%. It is the army of the 10 million indigenous beasts that rushed to the distance.

The remaining half of the approximately 60% is divided into two dials, one to the left of the center of the battlefield, the target is directed at the Taikoo Porcupine.

The other one is to blast to the right side of the center of the battlefield. The piece covers the emptiness of thousands of miles, completely drowning the body of the scorpion, and firmly shackles the sea of green hair!

The commanders of the various clan fleets in the rear of the tens of thousands of troops have apparently already seen it. The two lords who are sitting in the army of thousands of troops are not the opponents of the Taikoo Porcupine and the Taikoo tortoise.

The hollowing out and Du Fu Teng are the souls of the entire fleet, and they are the spiritual pillars. If they are both degraded or seriously injured, then the entire coalition will be completely defeated, and it will not be in this source of evil. The star field is based on it and will quickly flee like a house dog.

For this reason, the numerous guns and light beams that have been blasted by the tens of thousands of warships will be divided into more than half, and they will be smashed into the green sea of Taikoo Porcupine and Taikoo Turtle. .

On the one hand, I want to help the **** smashing of the Taikoo Porcupine, and on the other hand, I want to tear open the sea of green hair that covers the emptiness of a thousand miles away, and save the Wanzhang color 蟒 Du Futeng!

It's really a good abacus, but it's really the top commander of the Second Universe's fleet of millions of troops. The only thing that can be done.

With their cultivation as their strength, they could not participate in the battle of the domain's main territory. The only one that can help one or two, that is, the use of the munitions of the tens of thousands of warships, launched a dense blast.

Unfortunately, they have overestimated the power of these naval guns, or underestimated the means of the domain's main powerhouse!

"Hey!"

The first thing that was difficult was the Taikoo Porcupine, which had just opened a hundred feet in the **** abdomen. It was obviously caused by the torch of the ship. This was overwhelming. If it came together, even his body would be thoroughly Although the energy beam of the numerous guns that had been shrouded failed to tear open its flesh, it left a little erythema on the body, causing the Taikoo Porcupine to scream.

Then, his body shape disappeared without a sign in the original place. Under the flash, it has already reached the second universe of the army behind the battlefield of the central domain.

"Booming..."

The huge roaring sounds, the Taikoo porcupine suddenly traversed to the center of the battleship army. The body that was originally only a thousand feet was swollen rapidly at this moment. In a short period of time, it was already awkward and separated from the mouth. The two **** scorpions all reached a huge height, much smaller than a small fortress of 50,000 meters in diameter.

The next moment, the real disaster is coming...

"Hey..."

A crazy shouting voice came from the mouth of the tens of thousands of porcupines. Then, the huge figure of its vastness smashed into the tens of thousands of troops of the second universe.

A madness of the sky ravages the whole piece of emptiness. The most terrible thing about the Taikoo porcupine is that it is mad. Once it is mad, even the existence of the border can not be avoided. This kind of existence is too rough. It's hard to kill, but the power of blood is terrifying.

The two fangs are simply nightmares. Legend has it that in the ancient times, there was a 100,000-foot-class lord of the Taiji porcupine, which violently ran away in the cosmic sky, and under the rushing, it was a star in the void. They were all cut open directly by their horrible fangs, which were sharp to the extreme, or crashed, and no one could stop it.

At the moment, all kinds of warships and fortresses and fortresses in this second universe are like the stars that were mad at the time when they were mad at the head of the ancient porcupines. In the past, even the 100,000-meter-diameter big fortress was torn open for the first time without any suspense.

The stalwart of the Taikoo porcupine is rushing to the right and rushing straight into the army. The **** fangs of the horror are like a pair of harvesters. All the battleships blocked by the road are all turned into paper. , bursting, bursting into a huge fireball, falling below the void...

This scene happened too suddenly. I didn't wait for the abdomen to be riddled by the Taikoo Porcupine before it went crazy. The **** scorpion that has been smashed out of the mouth has come back. Behind the battlefield behind it, there have been countless horrific bangs. The sound of the explosion.

In just two or three interest rates, at least nearly a million warships were destroyed, and the serious direct disintegration was completely turned into a fireball. It was buried, slightly damaged, and temporarily lost its ability to continue to fight. Loss, has no time to launch an attack, and is too busy to repair itself.

"Evacuation! Immediately withdraw completely! Exit the core hinterland and retreat to the outside of the central buffer zone, immediately..."

Seeing this scene, the incarnation of a **** hollow pair of huge blinks is coming out quickly. The repairing power of the Taikoo Porcupine was originally stronger than him, reaching the late realm of the domain owner, even if it was not mad. When he was not an opponent, he was caught off guard and the belly was immediately opened with a hundred feet.

At the moment, the Taikoo Porcupine is obviously mad, and the original body is only a thousand feet, and it is directly expanded to the giant, and it is matched with his huge **** fangs, and the rough black that can not be opened even with guns. Pi, this is a life-threatening thing. It is definitely a genuine star-studded road roller. Now it is hollow and I dare not approach it.

Although the army of 10 million is huge, but it can not withstand the hair mad Taikoo pigs so tossed, and then let him pour back and forth so seven or eight back and forth, the entire army of millions of troops is estimated to be completely ruined.

At that time, no credit will be needed. After returning to the second universe, it is not bad to be disciplinary and sanctioned by the family!

For this reason, even if it is not unwilling, it can only be ordered at this moment, so that the warship army immediately withdraws and withdraws from this dangerous core hinterland. The porcupine is crazy, except for the temporary evasion, there is really no other trick...

Chapter 3705: Full retreat

"boom!"

"Booming!"

"Hey..."

In the void, the inexhaustible bombing sounds undulating and resounding.

From time to time, it sounded a scream of screaming screams!

The Taikoo Porcupine was awkward, and the numerous guns and guns that had been smashing to him before, except for those black, anti-material energy beams that made it feel threatened, were avoided by him. Other conventional naval guns had a small half. All of them are on his body.

Although it is not a horrible thing to tear the Taikoo porcupine, it is said to be more resistant to the rough black skin than the thick tortoise of the tortoise, but it has left a red spot of varying size on his body. Even slightly edema.

It can make the thick black skin of Taikoo Porcupine erythema, and it is slightly swollen, which shows that it hurts a lot.

This made his madness instantly ignited, and it has completely gone away at this moment.

Taikoo Porcupine has always been known for its resistance to daring and madness. Once it is really mad, it is the existence of the realm of the border, and it is necessary to shun the front, and dare to smash its front, and now rush into the army of this tens of thousands of warships, it is simply It's no different from a black wild boar with a hair mad, rushing into the cabbage field.

Fortunately, when the situation was short, the situation was wrong. When the plane was upright, the instructions for the evacuation of the entire staff were issued to the entire coalition fleet.

In an instant, the originally scattered sporadic light beams disappeared completely. All the warships did not dare to continue to stay in this horrible void. They opened the energy shields, started full speed, turned around and ran wildly, aiming at the rear into the evil. The dividing line of the buffer zone of the source central domain.

The entire army of millions of people, after destroying a million battleships, finally began a full retreat!

At the same time, in the void in front of the battlefield, all the strongmen who are struggling with the army of the millions of indigenous beasts are also fighting and retreating, completely without the heart of war, only to quickly Leave this crazy star field.

At the same time, after the **** squad released the instructions for the evacuation of the entire fleet, he did not dare to rush to the rear to touch the moldy head of the violently violent porcupine, but directly rushed to the right side of the center of the battlefield. That sea of green hair!

Even if it is a complete defeat, it must be rescued from the old Du Fu of the Caisuo nationality. Otherwise, the entire coalition will be completely devastated, and the fall of a domain lord will be enough to completely plunge the various fleets into the hearts of the people. Awkward situation!

"Hey!"

"Hey..."

At this moment, in the green sea of thousands of miles away, the green waves are still rolling, and from time to time there is a horrible sound of horror.

It is obviously not good to activate the blood vessels and the body, and the Du Futeng state, which is transformed into a colorful flower, is very poor. From the rolling green hairs, the savage and screaming, the vagueness has already heard a kind of fear and sorrow. .

It is possible to let a supreme grotesque in the realm of a domain scream and panic, and thus see what he is now, what is being horrible.

Even the **** rushing from the green sea of the green waves, there is a feeling of hard epithelium, and the back is already cold.

Previously, when the Second Cosmic Coalition's tens of thousands of warships were the first wave of volleys, there were also about 30% of the cannon energy beams that blasted toward the green sea of thousands of miles away.

Apart from the energy beam of the conventional ordinary star-killing guns, there is no threat to the basic structure of the domain. It is only the black anti-matter that has been bombarded from the 50,000-meter-diameter small fortress and the 100,000-meter-diameter fortress. The energy light column of the Death Light Cannon will definitely cause substantial damage to this sea of green hair, which is made by the body of the Taikoo tortoise.

This has nothing to do with the strength of the Taikoo tortoise. It is entirely a matter of energy properties. The black antimatter energy light column of the dead light can ablate any positive property and energy. The sea of the green hair of the Taikoo turtle is Surprising, but after all, it is a positive attribute substance.

Previously, hundreds of thousands of black anti-matter energy light columns came together, and the sea of green hair was too vast, covering a large void of thousands of miles away. It was impossible to dodge like the Taikoo porcupine.

The direct result is the sea of green hair that is thousands of miles away. At that moment, hundreds of thousands of 30,000-meter-meter pairs of holes have been shot, appearing in the sea of green hair!

If it is replaced by other creatures, this blow is only on the spot, but for the Taikoo turtles, these hundreds of thousands of pairs of holes that appear on the sea of green hair, although also brought to it. There is a certain amount of trauma, and it is not a small flaw. Even if it is not serious, it will not be too much.

But in fact, those horrible pairs of holes have disappeared almost instantly. This is, after all, a vast ocean formed by countless strange green hairs. Those strange green hairs, such as sea water, are generally fluid, and will instantly fill a hole. As early as.

Even the damage caused by the Taikoo tortoise's body, at this time, is slowly recovered by some special power of the sea of green hair.

If there is a twilight at this moment that can penetrate the endless green hair, and see the inside of this green sea, you can find it.

In the central part of the sea of green hair, a body has been smashed into two pieces of colorful enamel, and now it is struggling to struggle.

This eternal color is the blood and blood of Du Futeng, the strongest of the Caisong nationality.

At this time, its true color, the body has been smashed into two pieces, the body of about one-third of the tail, has been separated from the body.

But this is not caused by the Taikoo turtles, but the result of a black antimatter energy beam that left thousands of huge holes in the sea of green hair.

At that time, the Wanzhang painting was in the green sea, and the position of the figure was not visible at all.

The commanders of the various clan fleets in the Second Universe were also fainted, forgetting that they might have caused accidental injuries to Wanzhang's enamel, and directly ordered that about 30% of the gun's energy beam would be rushed to this piece. The sea of green hair.

Among them, several 30,000-meter-diameter black anti-matter energy light columns, although they penetrated the sea of green hair, left a huge pair of holes that were close together, but it was just in this position, but the whole body was It was also shattered and broken into two pieces.

At the moment, the color of the body of the three-thousand-thousand-thousand-thousand-thousand-thousand-thousand-tailed body has been completely removed. Only the body of the seven thousand-thousand-third head of the head is still struggling constantly, and the horror is heard from time to time. It's fierce.

Because no matter whether it is this main body or the tail of the color plaque that has been separated from the main body, it has all been pierced by countless fine green hairs, and it has been densely plunged into the flesh and blood of the body of the enamel, making him No matter how you struggle, you can't escape this sea of green hair...

Chapter 3706: Miserable color

"Hey!"

"Hey..."

In the sea of green hairs thousands of miles away, the screams of Du Futeng, the master of the Caishao nationality, have become more and more fierce, not only revealing a deep fear, but even a kind of weak breath is rapidly The land is strong...

It is a pity that no matter how he struggles, the main body of this smashed torso can't break free.

The dense green hair, like a hair, was plunged into his flesh and blood, making him unable to move.

At the same time, these tiny green hairs that have been immersed in his real flesh and blood are not only limited to the role of their body shape, but the other layer of power is even more horrible, like a tiny straw, is eating his color. The flesh and blood in the body.

The eternal green sea of the Taikoo tortoise was once bombarded by numerous energy guns, especially the thousands of black anti-matter energy beams. The power is too horrible, even if the Taikoo turtle is a The domain lord, but also can not resist.

The green sea of thousands of miles has been blasted out of thousands of pairs of holes, making the Taikoo turtles quite heavy.

But then, these injuries were quickly restored, although at the moment they have not fully recovered, but at least a little better.

The energy used to restore the injury is the innumerable small green hair that has been plunged into the flesh and blood of the Wanzhang, from the real body of Du Futeng, and the flesh and blood is obtained!

This is entirely to treat the eternal color as a flesh and blood, and to breathe it into the rhythm of the snake.

For this reason, Du Futeng, such a singular domain lord, will be so frightened when he is unable to break away from it anyway.

Even the lord of the domain owner can't resist the horror of being alive and sucked into a snake. It is too ferocious, and it makes him creepy!

"Roar!"

"Du Lao Gui, it's such a time, you are still holding hard, can't you be stunned?"

"This sea of green hair is too strange and too flexible. Even the old man can't open it. If you want to get out of trouble, you can only break free from the inside!"

"Don't hesitate, since you are a **** person, you must first escape a small life!"

"Otherwise, the old porcupine who rushed to the hair will come back to the place, and the old man can also retreat. Then you can't escape the wings..."

"Roar!"

The hollowed out **** scorpion flew around the green sea of thousands of miles, and finally determined that he couldn't think of a countermeasure in a short time to open the sea of the undulating green hair. A roaring reminder reminds Du Fu Teng, who is trapped inside the green sea, to escape from the blood.

The sound of this arrogant voice suddenly shocked the Taikoo Porcupine who was raging in the distance behind the battlefield.

At this time, the tens of thousands of warships of the Second Universe and Allied Forces had already rumbling and withdrew seven or eighty percent. The void in the back of the battlefield, except for some damaged warships that had already exploded into huge fireballs, could not see. How many warships have arrived, and large gaps have appeared.

Under the scream of the **** roar of this side, the Taikoo porcupine still in the state of madness and madness, even if he turned his head, the huge **** eyes flashed with madness, no hesitation, screaming Later, when even the huge hoof legs of the four pillars were spread, they rushed toward the sea of green hair.

In the meantime, the Taikoo Porcupine's huge **** fangs are separated by a million miles, and the blood is hovering over the sea above the green sea.

"call out!"

The void ruptured, and a huge void of emptiness appeared in the void below the **** blood without any warning. A horrible spurt of force came, and almost let the blood circling over the sky smash and fall into this road. Among the void cracks.

If this is the case, the main domain of the hollowed out domain will be repaired. Even if it is not degraded, it will eventually break free from the crack of this void, but at least it will be delaminated.

This Taikoo porcupine is too difficult to wrap, and the skin is thick and thick. The **** fangs are even more a nightmare. Together with the power of the universe's void law, it can not only quietly unfold the void. Together with the domain domain masters and strangers can not capture the slightest breath, and even have this kind of remote law force attack method, it is simply impossible to prevent.

At least the old grotesque was completely afraid of him at the moment, and he did not dare to scorn his front.

Seeing that the Taikoo Porcupine rushed toward himself, a pair of **** eyes were red and stunned, and it was still in a state of madness and violentness. He did not lift this state of madness, and his face immediately became green.

"Roar!"

"Old guy, the scalp is thick and mad, and the old man doesn't want to be with him. If you hesitate, you have to make dumplings with them."

"Forget it, the old man takes a step first, you think about it..."

Once again, roaring, the **** sorrow really did not dare to stay again, and the body shape rushed to the boundary of the battlefield to the boundary line of the source of the evil.

At the same time, Du Futeng, who is not allowed to play in the sea of green hair, seems to have finally made up his mind at this moment.

"Hey!"

A sorrowful sorrow filled with unwillingness and resentment from the sea of green hair, followed by the tumultuous green hairs in the central area of the Green Hair Sea, suddenly a colorful man, a flash After that, he directly broke away from the entangled green hair waves and rushed over the waves. After a U-turn, he immediately caught up with the **** blood that had just turned around.

Until then, this colorful man reveals the real form, and it is actually a small color scorpion that is bruised and bruised.

Originally, Du Futeng as a superb color of the domain of the main territory, after activating the blood, showing the true body of the bleeding pulse, the body can reach a huge.

Now, in order to break free from the **** and rush out of the **** sea of the murderous green hair, Du Futeng has to succumb to the blood and the body. At this time, only the body escapes from the sea of green hair, although it is still a seven-color 蟒 The appearance, but the body size has shrunk dramatically, and it is as small as a hundred feet.

What is even worse is the bruises and bruises. The body of the enamel is only a large part of the front, and the tail of the back is completely broken and lost. It takes a long time to cultivate.

As for its cultivation as a realm, it has fallen from the previous six-order domain of the domain to the seventh-order star of the present, and it has fallen near a big realm. Even after escaping from this core hinterland, it recovers at full speed at a cost. In the time, it is also restored to the first level of the domain.

In order to once again have the powerful power of the middle of the domain, I am afraid that it will be realized after this expedition is completely over and returned to the ancestral lands of the Second Universe.

"Hey!"

Under the sorrow of the heart, the colorful giant cockroach of Baizhang's body screamed and screamed, no longer hesitating, and his body shape followed the **** shackles. Like a small one, he finally passed through the boundary line of the core hinterland of the evil source and escaped. Outside the central area buffer zone.

At this time, the konjac was manifested, and Ye Xuan, who had hidden his body shape, just happened to be on the edge of the dividing line...

Chapter 3707: Domain owner

"Hey!"

A fierce and shouting sound suddenly sounded!

Then, because of the self-defeating blood, the body is not only reduced to the star's main territory, but the body shape has shrunk to only a hundred feet, and at this moment, because of the broken tail of the body, it appears to be a weak and colorful color. The old Du Fu Teng Teng, who crossed the border between the core hinterland of the evil source and the buffer zone of the central domain, descended to the buffer zone of the central area!

Looking around, the entire buffer zone is a mess!

In the void, the remains of the smashed black beetle are scattered, and the black beetle body fluid is floating in the void.

There is a disgusting stench in the air!

Compared with the innumerable black beetle wreckage, more are chaotic, and the battleships and fortresses and fortresses of the Second Universe, which are invisible to the formations!

In this battle, the Second Universe and the Allied Coalition Army was initially amazed, and the edge of the core hinterland of the evil source was cleaned up. The area, nowadays, has a large number of huge corpses floating in the void.

There are many indigenous beasts in the core hinterland, as well as the blood vessels that are activated by the blood vessels in the second universe.

But then, as the entire fleet triumphed and rushed into the depths of the core hinterland of the evil source, everything was reversed, and the nightmare came!

It must be said that the fighting power of the indigenous beasts in the two main fields of the Taikoo Porcupine and the Taikoo tortoise is really amazing.

Originally, there was a seventh-order domain, that is, the later cultivation was the strength, but their ethnic groups were so partial, the blood talent was simply impossible to start, so that the two hollows and the Du Futeng were repaired as strength. In fact, they were slightly more angry than the second veteran of the second universe.

It's the rhythm of being pressed!

Taikoo Porcupine has unparalleled strength, and a pair of sharp and unmatched **** fangs is a nightmare. It is invincible, but the thick layer of black pigskin is rough and hard, even the super-star-killing energy beam of the 10,000-meter castle. Only red spots can be left on it.

Not only failed to break this layer of pigskin, but it also provoked fierceness, and let him completely violently violently turn into a huge mad porcupine.

In this state, even the general boundary of the main territory can only evade the three homes in the early days, which is doomed to the hollow of the **** clan domain, and completely dare not scorn their front.

Another Taikoo tortoise has not been so perverted in combat power, but his **** talents are very horrible.

Once the application is carried out, the entire body shape of the Taikoo tortoise is completely transformed into a sea of green hair covered with emptiness, all of which are hairy green hair. Once the enemy is trapped, countless hairs are plunged into the flesh and blood. Tightly restrained, and through these green hairs, constantly extract the power of flesh and blood!

It is such a majestic ocean formed by countless tiny green hairs, and it has a headache and flexibility. No matter how blasting is useless, people have a wave of ups and downs and directly resolve.

Even if it is bombarded with a black antimatter deadlight gun of a large and small fortress, although it can cause damage, the blown hole can be filled in the first time. The feeling is like punching a punch into the sea. There was indeed a passage through the place where Jin had passed, but without waiting for the fist to be dialed out, this passage was closed by the sea that surged around.

This state of the Taikoo tortoise is simply a small force that cannot be killed. Unless you use countless anti-matter energy light columns at once, you will completely wipe out the whole sea of green hair covered in thousands of miles. Otherwise, you will be countless on the other side. The tiny green hair is plunged into the enemy's body and the blood is repaired. There is no solution at all...

It can be said that this war, the defeat of the Second Universe and the Allied Coalition Forces is completely the loss of the Taikoo Porcupine and the Taikoo Turtle.

These two extremely rare Taikoo creatures are not only powerful and horrible, but their blood talents are extremely unpopular, making the hollowing out and the Du Fu smashing, and the high-end combat power has lost their contacts and is out of control. The downturn cannot be reversed at all.

This led to the overall defeat of the entire army in an instant!

Otherwise, if the hollowing out can resist the attack of the Taikoo porcupine, Du Futeng can resist the attack of the Taikoo tortoise, and only rely on the humanoid beasts and the black beetle, such as the indigenous beasts. The huge army of indigenous beasts and beasts may not be able to survive the tens of thousands of warships of the Second Universe and allied forces!

But now that all this is late, the big defeat is a big defeat. Although more than 10 million Second Universe coalitions have dropped more than one million warships, they have now fled to this central buffer zone. There are still more than nine million warships of all races.

And as the two top-level lords of the whole battleship of the entire warship, even if there are damages, at least they all survived and escaped.

After some recovery, it is basically able to maintain the combat power of the domain's main territory, especially the **** clan's domain lord is hollow, his injury is almost negligible, and the combat power has not been affected much.

But the big defeat is a big defeat after all, and this big defeat is still in the short-term half-day time after the original comprehensive victory.

For the entire huge second space coalition, the impact on morale is simply immeasurable!

Now, looking at it, the nearly tens of thousands of warships in the buffer zone of the central area are simply chaotic, and even the battle formation has been chaotic. The ones that emerge from a warship are all a kind of sorrowful atmosphere. Into the eye!

In this case, the combat effectiveness is basically maintained in the state of full-fledged **** squadrons, and the old squad is hollowed out. The first time, the state of blood and blood is removed, and the **** sorrow disappears in the void.

He manifested a human form, and a swept body rushed into the flagship fortress of the Bloody Fleet.

In any case, the entire coalition must be rectified in the first place, and morale should be restored as soon as possible!

As for the old Du Fu Teng, who followed the line from the dividing line, he couldn't take care of it for a while. When he rushed out of the dividing line, he had already seen the rear chasing troops. Happening.

The indigenous beast army did not catch up at all, and did not even chase the depths of the core hinterland, including the Taikoo Porcupine and the Taikoo tortoise.

Under this circumstance, Du Futeng's repairing strength has fallen into a whole world. At this time, it is extremely weak, but it will soon be washed back to the flagship fortress of Cailu. After full recovery, it will soon be able to regain the domain. The main battle force.

I don't have to worry about it!

However, just at this time, just as the hollow figure swayed into the same moment in the **** flagship fortress, a black mang, quietly appeared from the Du Fu Teng Baizhang size of the color of the body of the neck, suddenly At a glance, the big dagger slammed down!

The lord of the lord domain was decapitated under the sin of the great cause... dying!

Chapter 3708: See you at the head

At this time, the old Du Fu Teng of the Cailu ethnic group not only fell into a big realm, but the former domain territory fell to the current star territory, and the body of the deity is even scarred, plus the heart's anger and disappointment. Concentration, under the hood, it is too late to wait until his heart gives birth to a warning sign.

After all, the **** blade of the Devil is now the starry sky to the treasure level, not the starry sky to the treasure, and it will not only be able to be powerful, but even if Ye Xuan is willing, even the killing machine can be restrained within the blade body until the blade When you touch the skin, you can be shocked by the target.

At the moment, Ye Xuan, in the state of the three-headed and six-armed konjac, has repaired his strength far beyond his original level and reached the fourteenth world of the universe. As a result, the final result is as doomed.

With only one knife, the colorful giant python of the Baizhang body was degraded from the head, and it was decapitated and died!

In the next moment, Ye Xuan's figure appeared, and between the waves, Du Futeng's headless wreckage was involved in the immortal world.

If the old guy is a human form now, Ye Xuan is really not good at collecting his wreckage, because there will be psychological obstacles, it is not good to bake the mouth and swallow.

But now it is the color form of the body, then it doesn't matter. Even if the body of this piece of color is poisonous, he is not afraid. The two-color flame of Shennong Ding is baked, and any toxins are excluded.

Of course, after the old guy was decapitated by the blood of the demon, the head and the body could still be completely left, and it was not turned into a bone. It was because Ye Xuan deliberately controlled the blood of the dead, and did not let the magic blade The result of collecting the essence of blood.

On the one hand, it is so precious that the flesh and blood leaves are not willing to let the blood of the dead magic be taken away. On the other hand, he is also worried that under such a slap, the blade spirit in the blade body will fully recover, then it is true. It is also necessary to attract the so-called air and gas induction, and it is on the thunder.

For Ye Xuan, even if he has avoided the method of temperament induction, this is an opportunity for an invisible yin, how can it be wasted!

When he waved the remnant of Baizhang's enamel, his three-armed and six-armed konjac was exposed, and the hidden state was released, and his figure appeared in the void.

But this is no longer the case. The front is the dividing line between the buffer zone of the central domain of the evil and the core hinterland in front. Ye Xuan can pass through.

Although he did not know what was going on inside, it was also evident from the state of the second cosmic coalition that it was so embarrassing that it must have encountered a powerful indigenous beast and was born out of hardship.

But Ye Xuan is not afraid. He is now a three-headed and six-armed konjac.

You must know that there is two sacred wrecks in the deep air in the core hinterland ahead. One is weak, the star is repaired, the other is extremely powerful, and the atmosphere is diffused. Beyond the realm of the realm.

Only from the wreckage of these two ancient konjac, Ye Xuanyi appeared, and will never be recognized as an intruder by the indigenous beasts inside, but it is very likely to regard him as his own.

Of course, in order to ensure this effect, Ye Xuan has other preventive measures, such as the color skull in his right hand on the body of his konjac.

Even though the indigenous beasts in the core hinterland have doubts about his origins, although there are two in the void in the wreckage of the Taikoo konjac, but Ye Xuan's life is clearly suddenly spurred out.

Even if this is the case, he has a colorful skull in his hand, which is enough to prove that he is a friend and a non-enemy, to resolve the doubts of the indigenous beasts in the core hinterland.

Taking the head of the domain lord as a name, whether it is weight or sincerity, it is absolutely enough!

All of this, Ye Xuan has already been well-informed in his mind. Before that, he wondered if it would be possible to kill a second-class coalition in the second cosmic army or a seriously injured star owner. When you look at it, you can definitely accept the indigenous beasts in the core hinterland of the evil roots.

Unexpectedly, this idea was still hovering in my heart. When I looked up, I immediately hit a star-studded singer who was seriously injured. He immediately took the initiative and immediately killed him. The head was screwed up. In the hands, Ye Xuan still does not know, this time the killing is actually a domain owner who has fallen into the realm.

Otherwise, he did not necessarily dare to start.

The shadow of the famous tree of the person, the singularity of the domain lord, even if it is in the case of a serious injury, Ye Xuan can not measure it.

At the moment, as the head reaches his hand, not only is his hidden body shape exposed, but he appears in the void, and even this series of actions of the righteousness is also strongly influenced by the second universe of various chaotic ships in the back of the void. The person saw a real cut.

The strongmen of the Second Universe fleet that fled to the buffer zone of the central area, after arriving in this area, have been closely watching the direction of the rear road. After all, the hollow and Du Futeng are the whole ship. The pillars and souls of the army exist, they do not escape, and the entire fleet has no backbone at all.

For this reason, when the hollowing out and Du Futeng rushed out from the dividing line one after the other, and the figure was reflected in their eyes, all the strong players in the nearly ten million warships were relieved almost all the time.

Then, the **** scorpion's domain lord sneaked out of the **** state, and after recovering the human form, a swaying body entered the **** clan's flagship fortress.

The Duo Teng Teng, the domain lord of the Caishao nationality, was obviously seriously injured, and the realm has fallen. Nowadays, only the repair of the main character of the star is done, but it does not matter. The means of the lord of the domain is extraordinary, and he will return to color. After the

flagship fortress of the Yi people, some healing, even if they can not immediately restore their peak strength, but it is completely possible to return to the initial stage of the domain.

Under the uneasiness of the mind, the commander of the Fleet of the Caisong even made orders to let the flagship fortress of the Fleet fleet come forward to welcome the main owners of the domain.

However, at this moment, a black magic blade quietly stretched out from the void, and cut a good head of Du Futeng with one knife.

Then, a three-headed and six-armed, obviously the indigenous beasts of the ancient konjac, but the body is very small, only about ten feet, should be a little magic scorpion guy, showing the figure.

One waved, and then took away the body of the headless color, and then carrying a colorful skull head of ten feet, turned and rushed to the front line.

Seeing this scene, the countless second cosmic powerhouses in nearly ten million warships are utterly desperate. This is a big event in the sky. A domain lord of his own camp has fallen, and he is still being abused by indigenous beasts. A small magic scorpion of the Taikoo konjac group has a black hand and a slashing head.

The horrified angry roar, the flagship fortress of the self-painting Yi people rummaged out: "The little magic scorpion, dare to go down to the black hand

Chapter 3709: Forgiveness

Domain owner blame?

Choi is old?

Ye Xuan was so scared that he was almost a soft body. At this time, he remembered it. It seems that this color was smashed by his knife, but after the **** bloody, the core from the front. If there is no accident in the hinterland, it is really possible that it is the old family of the Choi.

It was only a serious injury, and it was a big realm!

This is really a big hit, and I didn't pay attention to it. I lost a domain of the Cailu people. I'm afraid that I'm afraid to say that I'm afraid to go out!

"boom!"

"call out!"

"call out....."

Just as he was shocked, a large number of warships in the back of the sky were full of bombardment, and the bombardment of the energy of the guns, like the money-free, rushed toward Ye Xuan.

One of the two lords of the fleet was slain by the black hand. This matter was too great, and no one needed to order it. The strongmen in the fleet of the Second Universe were almost subconsciously The volley.

"Roar!"

"Little monkey scorpion, you damn..."

There is also an earth-shattering roar coming from the flagship fortress of the **** Yi fleet, a figure rushing out, it is just the **** ethnic group who just returned, the domain owner blame the hollow.

At this moment, the intestines of the empty repentance are all green, but he is sure that there is no chasing after the war. This is the moment when the heartstring is loosened, and the bloodline is removed in advance, and it is rushed into the flagship fortress of the **** clan fleet.

This is also because the nearly tens of millions of coalition fleets who have escaped into the buffer zone are so confused, worried about the chaos of the military, eager to rectify and appease the military.

Who can think of the **** indigenous beasts who have not pursued the soldiers behind them, but actually set up the ambush here in advance, and the ambush is just a small konjac in the glory of the universe?

Although this little konjac is full of blood, the konjac of the three heads and six arms looks shocked and stunned, but after all, it has not yet grown up, only the cultivation of the celestial world, but the black hand killed a coalition's domain owner. strange.

If the matter is spread out, it is a shame!

More importantly, such a thing happened. The hollowing out has no way to explain to the Cailu people. The domain lord of the family group has been devastated. He should have shouldered the responsibility of protection.

In addition, the entire army originally had two domain owners who were sitting in the town. As long as they went back to rectify and found a way to deal with the two Taikoo pigs and the Taikoo turtles, there might not be a single battle.

But now that everything is over, only he is such a domain lord, that is how to fight but no one else, can only shrink in this buffer zone, defend the stable passage that has been hard to open up, waiting for the follow-up reinforcements arrival!

In other words, this battle, the hollowing out basically has nothing to do, after returning to the second universe, will also be held accountable by the Cailu people, it is simply not worth the candle!

Thinking of this, the hollow is just like the heart that wants to die. Under the roar, the first time will activate the blood and the real body again. In the blink of an eye, a huge horror of blood and blood will be chased toward Ye Xuan.

Seeing this scene, Ye Xuan is so scared that it is almost gone. This is the domain lord. With his current strength, although he has reached the 14th dynasty, if he and Qiankun are capable, he still dare to be hard.

However, if it is against the star lord, even if you can squat for a while, it must be fleeing, not an opponent.

As for the domain lord, it can only be dead and dead, without any fortune.

Fortunately, the dividing line into the core hinterland is just a few miles away. Ye Xuan is just a flash, even when he crossed the dividing line, he came to the core hinterland.

After entering the core hinterland, there is a lot of wreckage floating in the void, both the strong people of the second universe and the indigenous beasts in the core hinterland of the evil, and obviously the latter.

But for Ye Xuan, as long as it shows the blood and the body, it is not human, it can be collected in the body, collected in Shennong Ding, and will be slowly enjoyed in the future.

It is a pity that he has no such thoughts at the moment. There is also a **** field in the territory of the domain behind him.

As for the rescuer he is expecting, that is, the powerful indigenous beast that had previously fled the second cosmic army to the wolf, it is obviously impossible to be on the edge of this core hinterland, and it should be the ruins of the wild in that void. Deep in the zone.

If you are chased by the **** blood behind you before you arrive there, you really need a cup!

As soon as I read this, Ye Xuan did not hesitate. When the figure was shaken, even if the virtual space was teleported, and it continued, the three-headed and six-armed konjac flashed from time to time in the sky, and each flash was a million miles away.

After two or three times in this way, in the direction of the dividing line of millions of miles behind, a horrible pressure came, and the **** blood of the **** family was really coming in, and it was coming.

Ye Xuan was so scared that the scalp was tight, and did not dare to turn back. The right hand of the flesh and blood body twisted the colorful **** of the size of ten feet and continued to move toward the depth of the core hinterland.

In this way, after four or five teleports, Ye Xuan looked up and saw two indigenous beasts in front of the void, a porcupine with a dark body, about a hundred feet, and the other one was actually only a singer. The size of the turtle, the whole body of green hair, furry like a green hair ball.

When Ye Xuan saw them, the two porcupines and the tortoises also saw Ye Xuan. The look on his face was clearly flush, and the two pairs of scorpions stared at him straight, as if they had seen ghosts.

Ye Xuan once again launched a teleport, and the body shape flashed to the body of the black porcupine of the size of a hundred feet. The right foot of the flesh-and-blood body smashed, even if it was smashed: "What?" See your king, didn't you see that the domain owner is being cut off by the old man? Do you believe it or not?"

The words have not been finished yet, the green turtle of the size of the head has already fallen on the head of Ye Xuan's flesh and blood, and after taking two green furry claws and taking two shots, he followed him directly. The neck climbed onto the golden bone of another shiny body, and took a few shots of the gourd.

The mouth is still groaning: "Really? Is it really the real body of the konjac? Just... this repair is too weak? What comes out?"

At first, this little turtle was still too weak to be repaired. Ye Xuan was immediately upset, and what made him unhappy was the other party's move and the color of his dense hair.

Under the white eye, he caught the green turtle in his hand with a backhand, and screwed it to his eyes. He warned: "I don't want to be a little bit, you are forgiving, but you still like to climb the head. I really curious." Ah, what are you really swollen to live now? Actually not killed..."

Chapter 3710: Very dangerous outside

Ye Xuan is really anxious, and there is a **** field in the domain of the main body behind him. Although it has reached the depths of the core hinterland of the evil source, it is not the domain realm. A powerful indigenous beast, but a black porcupine with a hundred feet and a green turtle.

In a hurry, he not only smashed the porcupine, but even screwed the turtle to his eyes, threatening the warning with scorn, saying that he was going to kill two people.

This scene is too sultry, and the **** scorpion that is being chased after the rumble is watching, and the figure is stopped and stopped. It is not even dare to come forward.

He can sneak up on this Taikoo porcupine, and the guy who screwed the Taikoo tortoise and twisted the pet to the front of his eyebrows, he didn't look like he could provoke.

If there is no accident, most of the behind the little devils have a backing, and the repair of the old man is absolutely impossible to have only the domain of the domain, at least it must be the main territory!

When I think of it, I don't have a bottom right now.

By now, he has basically figured out the urine of the indigenous beasts in this star of the evil.

These guys obviously know that the void in the depths of the core hinterland is a big creation, so the closer they are, the stronger the squatting indigenous beasts, and as long as you don't harass them, they don't reach them. The ground is going to sprinkle, and how to get around in the outer area, they basically don't care.

For example, the tens of millions of troops in the Second Universe have already cleared the core hinterland, and they have not known how many indigenous beasts have been killed, but there has been no movement in the depths of the core hinterland. No one cares.

Until the last 10 million troops rushed into the depths of the core hinterland, the Taikoo Porcupine and the Taikoo tortoises came out, and the squadrons who fled in were killed.

And then, one of his own army ran away, the two lords of the domain, the old blame, have a self-deprecating blood, the real body fell to the star territory, this is the best chance to chase.

But the Taikoo Porcupine and the Taikoo tortoise did not mean this at all...

It can be seen from these that as long as they do not provoke them, leaving the buffer zone in the central area outside, there will be basically no trouble.

It is precisely because of this that the short-selling moment will only chase after a wrath, in his view, a small magic scorpion that has only been cultivated as a realm of the universe, caught it and turned around and left. It won't cause much trouble.

But now it seems that things are not like this.

This little magic scorpion is not a small one. The backing behind is at least the lord of the lord. Otherwise, even the Taikoo Porcupine and the Taikoo tortoise in the domain are so casual?

The existence of this kind of indigenous savage beast is generally unparalleled. It is no wonder that the central area buffer belt that dared to lie in the outside has cut the head of the domain lord.

Sure enough, it's a daring day, and I'm used to it in this source of evil!

Now he will make him a good one, and if he is provoked, he will directly sue the royal form. At that time, the head may crouch in the deepest part of the core hinterland. He was too lazy to pay attention to the outside world. Under the wrath of the konjac, I absolutely want a cup!

Even if you don't alarm the lord of the Lord, this little scorpion just slams the Taikoo Porcupine and the Taikoo tortoise, let them chase themselves, and today's things are afraid of being too good!

More importantly, through this dare to squat on the Taikoo porcupine, dare to twist the Taikoo tortoise and put it in front of him to say that the little scorpion is dead, and the hollowing out can basically determine the depth of the front core hinterland. Most of the time, there is a sacred konjac in the realm of the border.

In this way, even if Du Futeng did not fall, and gave him eight gallbladders, he would never dare to go to the core hinterland again.

The only thing that can be done today is to immediately retreat and retreat to the outer star of the evil source. At the same time, the scouting fleet will be dispatched, and the speed will be launched, and the information will be returned to the second universe of the second universe as soon as possible.

Let the old guys in the family rush to negotiate countermeasures.

In short, before the arrival of the follow-up reinforcements, he would never dare to go in again, at most, guarding the stable passage of the outer star field outside the source of evil.

As for the singularity of the Caisuo nationality, Du Futeng, anyway, it has already fallen, and that is also his own reason, is it necessary to throw his life to him to bury him?

Don't say that it is not a group at all, even if it is the same group, even if there is a blood relationship, it will never be done to this extent.

When I think of it, even if the state of the blood is removed, the bloodyness that lingers in the void disappears, showing the human form, and even the face has a smile.

It's just a little ridiculous to laugh, it's ugly than crying, and with a pair of fists, I'm yelling at Ye Xuan and the indigenous beasts in the two domains. "The porcupine friends, the turtles and friends, don't Misunderstanding, the old man is not malicious!"

"It's just a small friend who is outside. It's too dangerous. The old man escorted all the way. Since it's okay now, the old man takes a step, don't give it, don't send it..."

After waiting to finish, the old ghosts were swayed and their heads did not return. They blinked across the dividing line, disappeared from the core hinterland of this evil source, and fled to the outer buffer zone of the central area.

At the same time, in the depths of the front core hinterland, a large army of indigenous beasts and beasts finally took the lead. The leader is clearly the top beasts that swayed the strong atmosphere of the strong comet.

Including the human-shaped grotesque that Ye Xuan had seen last time, as well as the newly promoted black beetle mother, in addition to some star owners, he has never seen it.

Behind this group of star lords, there are a group of indigenous beasts of the genius level.

Later, it is the state of the universe, the domain of the beginning...

What makes Ye Xuan a bit embarrassed is that the entire army of indigenous beasts and beasts, when they reached the void of thousands of miles away, all stopped, one by one with awe, and all the sights came together. .

These sights are basically black porcupines falling under his feet and green turtles still in his hands, but there are also some, from time to time, sweeping around Ye Xuan, with deep curiosity and doubts. meaning.

"This....."

Ye Xuan suddenly felt that the scalp was a little numb, and even if he was slow to respond, he understood what had happened at the moment.

No matter whether it is the words and reactions of the **** tribe's lord, or the presence and reaction of countless indigenous beasts in the large indigenous beast army, there is no doubt about a problem.

That is the black porcupine and the green turtle that he stepped on at his feet and screwed in his hand. The roots of the special ones are not so weak in their own cognition.

If there is no accident, this must be at least the two main lords. The existence of the second cosmic coalition has been awkward, and they are both.

This kind of horrible existence, at this moment, there is no smell of the strongest in the body, Ye Xuan did not feel it, and made such a big oolong!

At this time, his heart trembled, and he almost wanted to cry...
