

Super D. S 372

Chapter 372: Entering the ground

"Black Wind Cliff, a very dangerous place thousands of years ago, has a large number of flying sacred beasts inside, and there is also a Tianlei carving of the power of sixty dragons. The treasure tree lord accidentally discovered this black wind cliff. The soil is suitable for planting, so it opened up a cave and started planting." The mysterious man in white explained.

"Then how do you know this? Have you seen the colorful treasure tree?" Someone asked, raising his head and shouting.

"I don't have to tell you this, but you can do it now. Just dig down about 500 meters and you will know that the distance of one kilometer is easy for you." The mysterious man in white replied.

Down, one kilometer?

This is really not the case for everyone present.

At the moment, some people have dug up by hand.

With the power of 30 dragons, the skin is harder than steel, and it's a little bit boring. As for the soil of the output, you can receive the ring.

Many people have listened to the words of mysterious people in white, began to divide the area, and then dig down.

Ye Xuan, also ran to the distance, to ensure that there was no other person around before starting to drill down.

He dug about ten meters or so, which was called Megatron.

"Small day, come to an excavator, no, come to a drill!"

Ye Xuan had an order in his heart.

Megatron signed a slave contract with him, so the previous Megatron could change into a fort. It was a Transformer, and the area was drilled for one kilometer, which was extremely easy for it.

Ye Xuan can actually dig himself, but he has to pay attention to whether anyone has attacked him, so it was done by Megatron.

The distance of five hundred meters was quickly reached.

When Ye Xuan felt the news from Megatron in his heart, he drilled again. He dive all the way, and after passing through a strange formation, he came to a big cave.

The next kilometer, originally a very dark place, but after Ye Xuan went down, he saw the light of the white scorpion, and the blood of the treasure-hunting deer in his body also boiled up at this time.

In this cave, there is even a treasure of heaven and earth. The light of these heavenly treasures shines brightly.

"I rub it, it turned out to be true!"

Ye Xuan was shocked and immediately began to receive these heavenly treasures in the engulfing space. The things he has collected now are enough to buy a heavenly martial arts.

This cave is very large and staggered, letting Ye Xuan think of the deep sea palace.

At the moment, Ye Xuan is also beginning to collect quickly. Even if he does not have the treasure of the treasure, he can quickly collect these talented treasures, because it is too much.

Treasure!

Sure enough, it is a treasure!

However, when he began to collect the treasures of Tiancai, there was a roar in the cave. It seems that someone met and then shot.

"This planting site has a support of the law, but the shot is still a little careful to avoid collapse..."

Ye Xuan gave himself a wake up in his heart. The soil with a height of 1,000 meters smashed down. Although he could not kill him, it was very painful.

The pain is a bit, and it's troublesome if you don't overwhelm these treasures.

He began to quickly collect Tiancai Dibao. In less than a minute, what he collected was much more than the seven-man team that was killed.

He really didn't make a mistake, it was a rare adventure!

The caves are staggered, the terrain is very complicated, and there are roads that are down. Ye Xuan collects all the way and sees what to pick.

"Well? Someone?"

A figure appeared in Ye Xuan's sensing range.

The disarmed warrior like this single action is generally not very strong. If he encounters it before, he may still be jealous of three points.

But now, he is not afraid at all.

He rushed over to that person.

"Hey, is it a kid who is separated from the family, kill me!"

And Ye Xuan hit a force of thirty-five dragons, but, just one face, he was stunned by Ye Xuan.

"The thirty-five dragons in the district, dare to be in front of me?"

Ye Xuan took his body and Qiang Kun to stop.

There is not much in this person's ring, but it is better than nothing.

He continued to collect.

Along the way, he saw a lot of warriors who were single, and the strength was around thirty-five dragons, not very strong.

At most, he only met three people.

"Well? Ten people?"

Ye Xuan blinked. In his sensory range, there is a team of ten people. I don't know if it is a sectarian disciple or a family. Of course, it may be a team formed by a smuggler.

After a period of thinking, he felt that he still gave up. If he encountered the military of the forty dragons, in his current state, although he could kill, he must use the beastmaster violent.

The Beastmaster is violent, he can only use it again. If he is wasted here, he will encounter colorful fruits. What do he fight with those denominations?

In order not to lose because of small, so he thinks it is still!

The second plantation of this Baoshuzong was too perverted, and all the walls on the four sides were covered by Tianmu Dibao, which made Ye Xuan feel uncomfortable.

However, these plants do not have strong vitality, so they live for more than a hundred years. When time passes, they will wither.

However, Ye Xuan is not disappointed.

"This planting cave, the strength of the heavens and the earth is no worse than that on the land. It seems that there is a vital plant that absorbs the nutrients in the land in order to maintain the survival of so many natural treasures."

Ye Xuan thought in his heart, the speed could not help but quickly, because this planting cave house, there may be a colorful treasure tree that can create countless sixty dragon power masters.

As he collected, he swallowed it, and unconsciously, his cultivation was further refined and reached the power of thirty-four dragons.

He did not relax, constantly collecting the treasures of heaven and earth, and constantly looking for the troubles of those who had placed orders. Only in this way, he only had the qualifications to face the major denominations.

Time passed by little, at this time, it has been half an hour since Ye Xuan entered the land.

In this half hour, his realm has been raised once again, reaching the power of thirty-five dragons. If the beastmaster is violent, he can reach forty-five dragons. When he adds two percent of agility, the speed is equivalent to fifty-five. Dragon.

However, this is not enough. After all, the masters of martial arts are probably very advanced.

At this point, Ye Xuan found another passage to the bottom, which is the sixth time he has gone down.

He estimated that he was already about 1,500 meters deep.

Just at this time.

"Ok?"

His brow suddenly condensed, because he saw that there was a purple-black fog in front.

His first reaction told him that this is a poisonous fog!
