

Super D. S 3801

Chapter 3801: 1st Demon Emperor

"call out!"

A faint to a few undetectable sounds of emptiness flashed, blinking, and the broken worm has gone away, disappearing into the end of the void in sight...

After this last smelt, with the addition of an extremely rare Dapeng smashing, today's smashing snails are already in the sky to the treasure level, and if necessary, can be perfectly integrated into the void, not just simple The hidden shape of the ground, its effect, according to Ye Xuan's estimate, even if the domain owner is deliberately exploring, it is difficult to find.

Unless the broken virtual shuttle actively lifts this state of integration into the void, it rushes out of the void and launches the killing.

However, the current Ye Xuan, did not integrate the broken virtual shuttle into the void, even the simple hidden no, Ye Xuan deliberately, just want to see the promotion to the real starry sky to the treasure level, its speed, in its own full control How much can be achieved.

The result made him very satisfied!

In the case of energy consumption and Ye Xuan's full control, the speed of today's broken shuttle can reach nearly ten times that of the conventional 100,000-meter-diameter fortress. This is terrible.

At least, this speed has definitely exceeded the limit that the star lord can reach with the flesh.

Even if it is a domain lord, unless it is a space rat, Qingpeng, etc., who have special powers in terms of speed and space ability, otherwise the domain lords of the general ethnic group will cross the void with the flesh, basically This speed is only!

That is to say, if you can get a certain amount of advancement, Ye Xuan now even provokes a domain lord, not using the interstellar coordinate jumping ability, only by the speed of breaking the virtual shuttle, most of them can also protect themselves without worry!

From the black hole of life to the magic star, it takes more than one day to arrive at the speed of the previous hole, but now, Ye Xuan only took more than one hour, and the magic star in front is already far away!

At this time, the magic king Samsung inside the defense circle, already full of Dangdang are all kinds of star-ship battleships, the lowest is the star of the three-kilometer captain, the fortress of 5,000 to 10,000 meters in diameter, and 50,000 to 100,000 The size of the rice diameter is also a lot of fortresses, and the total number should be about 10 million!

The demon people's group of one true nine fake ten virtual wars La also lie in the void outside the magic star, but these ten star wars can not be taken away.

On the one hand, the Emperor Samsung also needs to leave the troops to fight against other ethnic groups from the Devil's Star Field. On the other hand, this kind of star-studded killer is too large and fast, and they should be taken out of the Magic King Samsung. Star trek, it is impossible to always drive in the void, it is too slow.

It can only be refining and refining the body.

This kind of big guy, the devil's group will also have the ability to refine it.

In other words, if you want to take away a Star Wars, you have to drag a star lord to go out with the army.

Although there are many stars and monsters of the devil's group, there are more than a dozen of the emperors who have been rescued by Ye Xuan from Tianji City, but they have to leave a part of the guardian demon star!

Therefore, according to Ye Xuan's estimation, the ten star-studded wars, at most, took four seats, and they were still four fakes.

The remaining six guards of the Stars and Wars of the Emperor Samsung, if there is no one that can really activate, the real guy who launched the attack, in case of an accident, isn't everything exposed?

That kind of influence is too great, neither Ye Xuan nor the Devils can afford it, no one dares to take the risk!

In short, the army of the crusade against the space rat has been assembled, waiting for Ye Xuan to return!

Realizing this, Ye Xuan directly manipulated the broken shuttle, and plunged into the atmosphere of the Emperor's Star, and fell straight to the inner city of the Emperor. With his identity as the Devil's group, the Emperor Samsung has already been able to move freely. Nothing!

"Your boy, I am finally back!"

The broken virtual shuttle fell on the square of the inner city of the emperor. Ye Xuan just waved the battleship into the immortal world. Mo Taiye and Mo Qigong both joined together. The former obviously went to Ye Xuan for four or five days. Not bad.

The white-eyed eyes turned straight and said: "The repair of Qiankun is not enough, but it can make a lord of the world wait for three days. It is estimated that there is no one but you..."

"The lord of the landlord? Waiting for the Lord? Still three days?"

Ye Xuan was shocked, and his face was a glimpse. Then he suddenly thought of something. He was pleasantly asked: "Where is the source of the indigenous and fierce beasts? The good, this time breaks, just right. Together with us to conquer the space rat, the Lord has always been worried that if there is a monster in the mouse, it will be a big problem..."

"You are really worried about this. The space mouse family does have a lord of the world. Although it has not been born for tens of thousands of years, if it is not unexpected, it should still be alive!"

When I heard Ye Xuan's words, Mo's grandmother stunned, and then the look on his face was serious: "However, after waiting for three days, it's not the third enemy of the indigenous beasts. The bit should have not yet been born..."

"And, waiting for your lord of this lord, although it is now in the magic king, but... he can't, as you said, go with the army and fight against the space rat!"

"What do you mean?"

Ye Xuan was dumbfounded, staring at Mo's for a while, and then he wondered: "In addition to the third beast of the indigenous beasts, who else will find the door to the door? The Lord does not know!"

"You don't know, but the old man knows that all the devils know each other..."

Mo Taiye once again turned his eyes and looked around. He lowered his voice and warned Ye Xuan: "It's better for your kid to converge for a while, but don't mention it. It's just about the generations. It's the old man and my grandfather. Let's go, people are waiting for the royal palace in the inner city... a generation of demons!"

"Hey? A generation of demons?"

Mo Taiye deliberately lowered the voice, that is, to avoid hearing from some ordinary royal members in the Emperor City. After all, the secret of a generation of demons is still only known to the core of the royal family.

Suddenly such a shocking secret, for those ordinary devil royalty members, the shock is too great, can be avoided to avoid.

However, he deliberately took the dice to reveal the news, but after Ye Xuan listened, he suddenly screamed and screamed. Most of the magic city had heard it. For a time, countless devil strongmen followed the sound and almost did not take Mo's. Gas to the scene to spurt!

It was also at this time that a majestic sound of easy-going voices came from the direction of the royal palace in the inner city of the emperor.

Did not deliberately low-key, its sound is not big, but spread all over the magic star, was heard by countless demons: "Yes, the old man is a generation of magic emperor Mo Xiaotian! Xiaoyou, waiting for you for several days Come and see you soon, the old man will meet up!"

"boom!"

The sound is still not falling, the entire magic king star, completely fried the pot...

Chapter 3802: Liars are liar

"What? A generation of demons? Isn't that the ancestors of his old man?"

"The ancestors are still alive! The ancestors are still alive, this is incredible, it is a miracle!"

"There is no ignorance of this matter. The voice of the ancestors came from the inner city of the emperor. Who dares to play such a joke there? My devil's group is destined to be big, even the ancestors are still alive, now What is it for repairing..."

"At least the main territory! My family really wants to make a big leap, but who is the little friend referring to? Is the fox less master? What is the origin of this person? It can make my generation's generation of emperors call it small. Friends, this is simply..."

"Hey, whisper, can you doubt the words of a generation of ancestors? In the future, the sorcerer is the true friend of my demon community!"

"Yes, even a generation of ancestors are so attached to it. The origin of the fox-free master is absolutely impossible!"

.....

When these exclamations sounded, Ye Xuan had entered the royal palace of the inner city of the emperor with Mo Taiye and Mo Qigong.

In the hall, all the tops of the demons, including the Emperor Mo Qiaotian, are all there, but they all sit next to each other, accompanying them to the left and right, sitting on the top, it is an age look and the devil The middle-aged devil man who asked about the same day was a majestic face, but he was not lost.

Look at the nervous attitude of all the devils and royals who are on both sides. This person should be the devil of the devil's group. The founder of the whole devil dynasty, the main level exists, Mo Haotian!

Seeing Ye Xuan enters the Great Hall of the Devils, Mo Zhentian is even more relaxed when he smiles and stands up.

It can be seen that the little friend of the genius is not a superficial ritual. As a lord of the world, the ancestors of the devil's group can get up and meet when Ye Xuan arrives. This is indeed the existence of him as a peer. .

The more people do, the more the leaves of Ye Xuan's original temper, the more they will converge. He has always been a man, and I respect one!

If this is the arrogance of the arrogant, the spectrum of the elders, Ye Xuan may not take care of it, but at this moment see the other side, he turned a look, hands clasped, and wanted to swear.

This is the ancestor of the Devil's Royal Family, the old predecessor of the Devil's dynasty, and the martial arts of the fists, it is also appropriate!

"The devil's predecessor, the little son Ye Xuan..."

Without waiting for Ye Xuan to bend over, the words in his mouth were just halfway up. His sight was already a sudden flower. The newly-emerged Mo Huangtian had already arrived, and Ye Xuan did not notice the slightest fluctuation in space. The lord of the landlord is really extraordinary.

"Little friends, you can hold a fist, this is a gift, I can't afford the old man!"

After a moment of closeness, the face of the demon emperor was still laughing, the voice was mild, but his eyes seemed to inadvertently glance at Ye Xuan's left chest.

At this moment, Ye Xuan clearly saw that his double pupils shrank, and there was a touch of extreme jealousy and shocking colors flashing through, even giving people a sense of panic.

Also because of the corpse lamp tattoo?

Ye Xuan's thoughts flashed through this thought, and he no longer insisted on it. With the level of headless baby corpse, in the world, no one can stand up to Ye Xuan's owe.

Even if it was just a long time ago, it was just a big tribute in the source of the evil, even the two masters and the strangers joined hands, and they all supported the natural eye of the trick. The same is true... It is not injured in the headless baby. I haven't recovered yet!

In this regard, Ye Xuan really understands, but the other top of the royal family in the royal palace is not the case, including the magic emperor Mo Wentian and even Mo Taiye and others.

At this moment, I heard a generation of demons, Mo Zhentian, actually said such words, saying that they can hold their fists, and they can't afford it. All the people were shocked on the spot.

When the line of sight swept to Ye Xuan again, the middle of the line was full of gloom, and it was incredible!

Including Mo's grandfather, Ye Xuan's confession has been added. In addition to Ye Xuan's own enchanting ability, there is another factor, which is his relationship with the crazy mosquito king and the wretched mosquito.

These two old monsters are not ordinary existence, but Ye Xuan and them both go very close, but even so, it will not let a generation of Mo Huang Mo Haotian say such words!

In an instant, Ye Xuan suddenly became more mysterious in the eyes of the top of the demon royal family...

"The situation in the first universe has suddenly changed, the Tianji people have suddenly disappeared, and the family has moved. This is a worrying thing..."

Ye Xuan just sat down, and a generation of demon emperors had already turned around and talked about the business: "The old man had never asked the world, retreating in a secluded void, hitting the environment, but now the situation is special, this time It was also alarmed."

"The space rat's crusade is imperative, not just the space mouse, but also the **** ants, and other first cosmic slaves."

"It's not that my devil's ambition is too big, but the first universe. They must be unified before the return of the heavenly family. Otherwise, once the celestial family returns, each breaks down, and eventually all the ethnic groups will still be enslaved... never be small. Look at the heavenly family!"

"This time, for the whereabouts of the Tianji people, my family also has the existence of the great powers above the Qiankun area to promote the great powers, but in the end there is no clue. The special nature of the electronic life of the Tianji people makes them fall into the five elements and jump out of the world. In addition, many magical techniques, especially in terms of derivation, are ineffective for them!"

"The devil's group also has the supreme power above the Qiankun environment?"

Ye Xuanyi, as far as he knows, the generation of the devil, Mo Zhentian, is nothing more than the cultivation of the realm of the border.

"Nature!"

A generation of emperors smiled lightly and seemed reluctant to talk too much about this matter: "I am a generation of demons, but not the ancestor of the devil's group. For the devil dynasty, I am a pioneer, but for the whole For the **** people of the devil, I am only a younger generation!"

"Right, the two predecessors, the crazy king and the wretched mosquitoes, the seniors should know each other? What are they repaired?"

The words of a generation of magical emperor Mo Zhentian, let Ye Xuan realize that a strong ethnic group with a long history is not simple. As far as the devils are concerned, a generation of demon emperors can't be the source, and it's going to be traced back. A big bunch.

He did not entangle too much in this matter, and at the same time suddenly thought of the crazy mosquitoes and mosquitoes, even when asked.

This opportunity is rare, missed, and I will not be able to meet a generation of demons in the future.

Mo Zhentian stunned, and then slightly indulged, and some of them were perfunctory: "This... their cultivation is slightly stronger than the old man!"

Ye Xuan is not reconciled, once again asked: "So dare to ask, the repair of the Emperor is... what is the realm!"

"This is..."

The laughter on the face of a generation of demons disappeared, and frown again, and some of them whispered: "The emperor has not broken through the hustle and bustle, and it is considered to be the perfection of the ninth order of the landlord. Well, it can be said that it is a half step!"

"Cheat paper! Deceived paper! All are cheating paper..."

Ye Xuan was so excited that she took the case...

Chapter 3803: Mouse market

"Cheats! Liars! All are liar..."

A group of demon emperors who claimed to be repaired as if they were not as good as those two old things were actually half-steps of the cultivation of the realm of the Qiankun. Ye Xuan suddenly became excited, and took the case and roared and roared: "The two old **** Sure enough, it's not human. Now it seems that at least it's the cultivation of Qiankun's realm. The loss of the Lord's lord was still entangled in the mosquitoes and the old ghosts in the end. It's too bad to be deceived!"

All the devils and royals in the royal palace were all frightened by Ye Xuan. At this time, the reason why he was suddenly furious was because of this reason, all of them suddenly cast a sympathetic look.

"Intermediate..."

Even a generation of demons have some guilty conscience, stealing eye on Ye Xuan, and quickly clearing the relationship: "Little friends, the old man did not say that they are the repairs of Qiankun, I just said that they are a little stronger than the old man!"

"The nature of Qiankun is naturally stronger than that of the old man, but it is better than the old man. It is better than the old man. How specific, the old man does not know, this still has to be clear first, the old man has never deceived people, you can not say later. Was deliberately misled by the old man..."

Ye Xuan was dumbfounded on the spot, staring at the generation of the emperor Mo Zhentian, half-speaking silent!

Mo Zhentian is obviously a guilty conscience. From the point of view of this point of view, the cultivation of the two old **** of the crazy mosquito king and the wretched mosquito killer may be more than a sacred environment, even including the generation of the devil. This may be the case.

At this moment, Ye Xuan only felt that his brain was stunned. It seemed that there were 10,000 grass mud horses whizzing through the chest. His breathing was soaring, his eyes were red, and he tried to restrain himself.

Originally thought that this time I saw a generation of demons, I should be able to explore the details and origins of the crazy mosquitoes and mosquitoes.

At least you can ask a little bit of beads!

I didn't expect to mention the two old things. After a question, the doubts of Ye Xuan's heart were even more intense. It was simply crazy!

A generation of emperor Mo Zhentian clearly saw that Ye Xuan's state was not quite right. Because of his guilty conscience, he hurriedly confessed a few words and quickly left.

A wave of cracks appeared in the void in the center of the Emperor's Hall. After the old guy stepped in, the cracks closed again and there was no breath left.

When Ye Xuan returned to the world, people had no shadow!

After a lot of depression, Ye Xuan quickly adjusted his mind and threw the matter behind his head. He discussed with Gao Moye and other tops of the demon royal family to discuss the major events of the cruel space.

"This time the crusade of the space rat, my devils will be dispatched to the army of thousands of warships, and the Star Wars will be dispatched four. Of course, all are fakes that support the scene..."

Speaking of this, Mo Taiye smiled and turned to Ye Xuan to read: "At that time, if you need to use Star Wars, you have to rely on the four big killers in the hands of the fox."

"In addition, the commanding level of the army will be led by me and the three high-ranking royal elites. As for the great power of the Qiankun, the royal family will also dispatch four. If there are no other problems, tomorrow, it will be the period of the army's opening..."

.....

The star field where the space mouse nests are located, called the Rat Market!

The mouse market is also extremely vast. After all, the space mouse is also one of the top three in the first universe.

This star field is located in the southwest direction of the first cosmic plane. The territory is similar to the demon star field inhabited by the demonic group, but it is not like the bustling of the devil's star field. There are battleships in the void.

In the ratish market, it is almost impossible to see foreign warships from outside the star field. Even if there are, it is only a small fleet of sporadic ships.

On the one hand, because the location of the mouse market is remote, and there are no very precious mineral deposits!

On the other hand, it is because this star field is a special place for the space rat's nesting ancestral land!

The mouse market is a paradise for the space mouse, but for foreign fleets outside the family, it can only be a nightmare.

As we all know, the mice love to make holes, even the space mouse, just like they do, they are not like ordinary mice, just hole in the ground, because of the blood talent, almost all the space rats have holes in the void. Ability.

As the nesting ancestral home of the space mouse group, the mouse market is actually a super huge mouse nest. The whole vast star field is like a giant honeycomb, and there are holes in the space rat.

All the stars, the vast territory, all this!

What is even more bizarre is that the numerous mouse holes that are densely populated in this star field are created by the space mouse family in the virtual space with some kind of ability in their own blood, so even the whole star field becomes A large hollow screen filled with holes, but the void of the entire star field is still very stable.

There is no sign that it is about to collapse. This is speechless and amazing!

The mouse is not like other species, the living habits are more chaotic and casual, and the nest is everywhere. Although the space mouse is a rat with a very good blood level, it is still a mouse, so it is in the mouse market. Basically, you can't see the order of other ethnic groups.

The entire space mouse community has basically been in a state of chaos.

In the ratish market, only one of the largest ratish stars, for ordinary space rats, is a forbidden place, and can not be arbitrarily involved.

All the other stars, the void, there are no restrictions at all... I want to make a hole, just toss it!

This stag beneficiary, which is classified as a forbidden place, is the ancestral ancestral home of the space rat, and the rat king of the ethnic group sits in the star of the rat.

And, according to rumors, there is still a void entrance somewhere in the depths of this ratish star, which is connected to an independent universe void, and the mysterious and independent universe void is the space mouse. The true holy place of the tribe is also the place of return to the blood of the ancestors of the space mouse!

At this moment, when the demon people's group has attacked the tens of thousands of warships that have been attacked by the space-racial rats, the depth of the giant mouse stalks, which are covered with numerous large mouse holes, are also on the surface of this land. Among the vast blacks of deep bottomlessness, an old and violent sound of violent temperament came out in a timely manner, almost resounding through the entire innocent wall of the rat.

The space rat who was hidden in the stars or in the void by countless heads heard: "The little mice, prepare your fangs, polish your claws, the devil... come!"

"squeak!"

"squeak!"

"Hey..."

In the next moment, countless rumblings were heard from the numerous ratholes scattered in this vast star field. All the rat holes, whether on the stars or directly, were revealed in the universe. At this moment, all of them have rushed out of a large number of space rats.

There are even a large number of rat and beast that have not been opened by the intellect, soaring, and instantly gathered into a billion-dollar army, sweeping toward the edge of the star field...

Chapter 3804: Where is the mouse hole?

Although the distance between the Devil's Star Field and the Mouse Market is not close, it is not too far. After all, it is within the same cosmic plane.

If Ye Xuan is alone on the road, it will take about five days from the Devil's Star Field to the speed of the virtual shuttle!

This time, it was opened from the Devil's Star Field, and it was a battleship army with tens of thousands of warships. Most of them were the star-rated ships of the 3,000-meter captain. Even if the wormhole jumps all the way, it will take at least fifteen days to reach the mouse market.

It is Ye Xuan who is on the road alone, and it takes three times to break the virtual shuttle to the mouse market.

This really makes him speechless, but he can't help.

This time, the crusade of the space rat is only the prelude to the first universe with his allies. After the space rat, there are other ethnic groups such as the **** ants.

Even if Ye Xuan is alone, he will suppress the strength of the entire space rat, but he can shoot once, and it is impossible to shoot alone every time. What about the ally of the devil?

What's more, he doesn't have this ability at all, at least not now!

Although he has four Nether Wars, there are Shennong Ding, there are millions of fierce beasts including the two main lords, but they want to conquer a strong ethnic group. Obviously impossible!

Half a month's time is not short, Ye Xuan decided to make good use of it!

His battleship is the main flagship of the entire army of millions of troops, a 100,000-meter-diameter starry fortress.

The four devils and the four star owners of the Devils' group have been seated in one of the three main four-seat flagship fortresses.

In the main flagship west levy on the town, it is the commander of the fleet, Mo Qigong, and the star lord is the ninth-order grand perfection of the world!

There were two of them sitting on the West Sign, and all the matters did not require Ye Xuan to worry about. After the fleet sailed out of the Devil's Star Field, Ye Xuan entered his own independent cabin and began to retreat.

This time, the retreat, what he has to do is not cultivation. After all, before returning to the Magic Emperor, he just got the magical scorpion and changed his mind, and he broke through to the sixth stage of the domain, and he was the realm of flesh and blood. Promoted three small steps.

In this case, in the recent period of time, what Ye Xuan needs to do is to honed his body through repeated battles, and to digest this hidden dangers such as the unstable realm of the realm. Wait!

Therefore, after some indulgence, Ye Xuan decided to use this half-month to study the power of Shennong Ding and the specific steps and details of this medicine!

Be a rainy day!

After all, although the fourteen-level liquid and the fifteen-level liquid have all been successfully deployed, it is only enough to use the fifteenth world. The subsequent sixteen-level liquid has been

deduced according to the phagocytic system. It is impossible to complete it through a similar configuration.

In fact, this is also the consensus of all forces and gate valves in the human culture camp's gene culture solution!

Once the realm of the master of the starry sky reaches the realm of the universe, it has the qualification to touch the power of the law of the universe, and the genetic culture fluid is aimed at the potential of the strong star of the starry sky. Therefore, it is the road to the gene culture liquid. It has come to an end.

Subsequent sixteen-level liquids can no longer be configured by similar methods, and need to be modified and improved, for example, introducing some means and concepts of refining medicinal herbs in the human family!

This is also a recognized research direction for all forces and gates in the human body science and technology camp, but for these top forces and gates, this seems to be too far away, so the star-studded powerhouse who is dedicated to this topic, Such as the phoenix scales, the average is too rare.

After all, they haven't even configured the 12-stage liquid. Now it's a bit too anxious to study the follow-up development path after the fifteen-level liquid.

It's even a joke to spread out. At least, there's absolutely no good news on the Terran camp. They've always been ridiculous and criticized for the technology camp's gene culture...

However, for Ye Xuan, this matter is now imminent.

There are three breakthroughs in the small stage, he must use a 14-stage liquid to break through the universe.

Then, there will be nine breakthroughs in the small stage. When his physical strength is up to the ninth stage of the universe, he will use fifteen levels of liquid!

That is to say, the distance will use the existing genetic fluid in the hand, Ye Xuan has only 12 small steps to break through, at that time, there will be no more genetic fluid available, once it enters the Ninth Order of the Qiankun, His path of practice will be cut off again and stagnate!

This is definitely a big problem, Ye Xuan has a strong sense of urgency.

Therefore, taking advantage of a little time now, what he remembers in his heart is how to use Shennong Ding to smelt flesh and blood medicine... I can let him continue to move forward after entering the territory of Xun Kun, and even enter the star territory and even The flesh and blood of the domain!

This is a brand new field.

It is not the alchemy of the comprehension camp, it is not just the genetic fluid configuration of the science and technology camp, but the comprehensive research of the two fields of alchemy and genetic fluid allocation, a new research topic!

Even if Ye Xuan has the ability to devour the horror of the phagocytic system, it is impossible for the matter to be completed in a short period of time. He needs to calm down and explore and study carefully...

Time flies, twelve days blink of an eye!

Ye Xuan's whole mind is immersed in the research on the power and steps of Shennong Dingbing and the research on the pharmacodynamic properties of various rare herbs after the fifteenth grade liquid. I am not aware of the passage of time!

Until the communication system of his closed cabin, when Mr. Mo is clearly revealing the words of depression and helplessness, Ye Xuan suddenly awakened: "Smelly boy, know how many days have you been in it? It has been twelve days. The ratish market is in front, and the army is close to the edge of the star..."

"But now I have some troubles. The old man has a headache. Come and check it out!"

Twelve days?

The mouse market is coming soon?

Ye Xuan stunned, then he shook his head and smiled.

For twelve days, he studied intoxicated, but still did not figure out a clue, a mess, and did not know how to proceed.

It seems that this matter is really urgent, and I have to calm down!

In the sigh, Ye Xuan waved to remove the ban, opened the hatch, and stepped out.

After the interest rate, when he came to the lobby of the general control room on the top floor of the Western Expedition, everything on the huge holographic three-dimensional curtain wall, when he let Ye Xuan's foot stagnate, the sound of exclamation sounded: "What? Where are so many mouse holes?"

In the line of sight, the universe void in front of the entire army of millions of people is like a super huge rag bag. It is densely covered with countless voids. It is all black and lacquered, and it's just like a mouse hole. It's shocking.

Chapter 3805: Mine sweeping

The entire army of 10 million has completely stopped, and the front of the vast expanse of a vast area of the void, densely filled with holes, can not move forward.

Ye Xuan and Mo Taiye, Mo Qigong and other fleet commanders, stepped out of their flagship fortress, gathered together at this time, frowning to look at the void in front, full of unhappy colors.

"There is still a two-day flight from the Star Market."

Mo Taiye indulged in a few moments and suddenly said: "The interior of the ratish market is basically the same. The space mouse has an extraordinary talent, and it has a part of the power of the emptiness

of the ancient era. It is like a savage beast that can eat into the universe. The void is like a black hole, and the space mouse can make holes in the void."

"And, even if a void is smashed by the holes, the piece of emptiness will not collapse, and it will remain as a solid honeycomb structure, which may be related to some kind of blood talent in the space mouse community."

"Because of this, in the star field of the rat ancestral home where the nest is located, the scene in front of us is the normal state. Whether it is the size of the stars or the universe, it is all such large and small mouse holes."

"There are separate rat paths, and some are just like the mouse nets, which are intertwined with each other. It is very troublesome..."

Speaking of this, Mo Taiye sighed and said: "This star field is only close to the edge of the mouse market, it is not like this, but now it seems that this group of dead mice should want to use this way, blocking the progress of our fleet."

"They want to block the war from the outside of the ratish market. It seems that these dead mice have confidence in this battle and they are trying to protect the nest!"

"Space oscillator, can you fix this hole?"

Ye Xuan took over the words and continued: "This problem is not solved, we can not move forward, the entire fleet of millions of troops, the number of warships is too large!"

Everything in front of him reminds him of the space cracks in the outer periphery of the star of the evil and the buffer zone in the central domain! At that time, the Second Cosmic Coalition, which invaded the source of the evil, used space to solve the problem.

The space bridging device is different from the space oscillator, and its technology content is higher. The space oscillator only reflects a simple spatial oscillation effect. The greater the power, the wider the range of influences.

Even the regular star-rated warships of the 3,000-kilometer fleet can be equipped with low power.

However, the space-tightening device requires at least a small fortress of 50,000 meters in diameter to be equipped with equipment, which shows that its level is high. This device was originally created to repair some of the extremely unstable star voids in the cosmic plane, or some small black holes caused by humans.

Through a large number of space-fitting devices, even a small black hole can be slowly repaired and gradually closed. The reason why the small fortress and the big fortress are equipped with this space-filling device is that during the interplanetary navigation, the fleet sometimes needs to pass through some dangerous areas with void cracks.

In this case, if the area of the crack area is not wide and the time is not very fast, there is no need to risk the sudden advancement. It is possible to open the space bridging device, repair some void cracks, build a stable safe passage, and then move on!

The second cosmic coalition that entered the star of the evil roots was tens of millions of giants, and the whole demon man behind the leaf yoke was cruelly attacking the same army.

The entire fleet has more than 10 million warships. Although the space-filling device is only a small fortress of 50,000 meters in diameter and a fortress of 100,000 meters in diameter, the number of these large and small fortresses is together, but it also exceeds One million.

Nearly a million of the size of the fortress, can be divided into several rows in a virtual space of a million miles in diameter, arranged in high density, slowly into the front of the mouse hole void, leading the rear of the army, all the way Push it away.

It's like minesweeping, opening the road ahead, following the rear!

Mo Taiye quickly issued the order. In just half an hour, millions of 5,000-meter-meter and 100,000-meter-diameter-sized fortresses came over and lined up in two rows, stretching around a million kilometers.

Then, with the order of Mo Qigong, the million-size fortress immediately opened the space bridge and slowly pushed toward the front.

In the line of sight, in front of the fortress of more than one million ships, the void is shaking at a very high frequency with a very small ultra-high frequency. With this constant tremor, the space cracks of the size of the galaxy in the millions of miles away, which were originally distributed, are beginning to heal at a speed visible to the naked eye.

Although the million-size fortress is slow, it has not stopped, and it continues to advance!

From time to time, you can see a hole of different sizes, but as long as they are passing through the void, the rear is a smooth road, all the holes of the mouse disappeared. This small void void is not too expensive to repair. Time and kinetic energy.

Behind the millions of large and small fortresses, nearly 10 million warships are easily accessible, and there is no need to worry about the rat hole hindering the problem.

Ye Xuan always has a feeling of not quite right, the space mouse is so good to send? Sending a large number of ethnic groups to make such a huge void all the way into a mouse hole, the role played by it is only to block the progress of the tens of millions of fleets.

I am afraid that things are not that simple!

"Booming..."

Sure enough, just as Ye Xuan's heart was suspicious and began to worry, the huge air in the right front of the millions of mine-sweeping troops suddenly heard a huge explosion, and a large piece of empty space with a hundred miles was collapsed.

The void was originally the same as the void in other positions, and it was densely covered with holes of different sizes.

But in other areas, there are more mouse holes, but the void is like a stable honeycomb structure. It is abnormally stable, and the vibration repair effect of the space bridge is unfolded. In a short period of time, the void is repaired and the mouse hole disappears...

Only the emptiness of the hundred miles, which is clearly a trap, the micro-frequency oscillation effect of the space bridge not only failed to repair it, but instead of pushing down the dominoes, directly exposing several adjacent mouse holes.

Then a huge void was completely collapsed.

This is not just a void crack, but a collapsed void of a hundred miles, and a stream of emptiness has swept out of the collapsed area like a black hole.

The nearest dozen or so large and small fortresses in that area were torn into fragments by the turbulent emptiness of the first time, and then invaded by the invisible suction force in the black hole, which was completely inhaled and blinked. Disappeared without a trace!

Ye Xuanyuan's big eyes immediately burst into a thick mouth: "I rely on it! Is this really a minesweeper? If you are not careful, it's a void trap..."

Chapter 3806: War pull

The first void trap was detonated, and more than a dozen large and small fortresses were lost. There are thousands of devils in the degeneration!

This is still the reason for the use of a large number of intelligent robots in all the tens of thousands of warships. Otherwise, if all the positions of the fortress are under the responsibility of the devil, the fear is that this time the loss has reached tens of thousands.

There are not many democrats in the population, and this level of war damage can not bear!

In the helplessness of Mrs. Mo, he could only immediately issue an order to stop moving forward. All the warships, including the millions of troops behind the scenes, and the millions of large fortresses in front of the minesweeping road, were completely stagnant in the void.

Then, the top of the demon royal family, once again gathered with Ye Xuan to discuss countermeasures...

"Thousands of thousands of people are gone!"

"The dozen or so large and small fortresses will be counted. It is the robbery. But the fall of the thousands of people is really sad. If it is in the face of the confrontation with the space mouse, it will fall. It's so unclear now... it's awkward!"

The star of a demon royal family is full of anger and anger. This is a temper. At this time, the blue veins on the neck are bulging out, holding the double fists, and the posture of wanting to choose people.

The population of the devil's ethnic group was originally small, occupying a vast area of the devil's star, but the total number of tribes is not even 100 million. Therefore, the degeneration of thousands of people is uncomfortable.

Even Mo Taiye and Mo Qigong, the faces are all black clouds, and Shen is silent.

After a short period of time, Mo Qigong took over the words with anxiety, and some said helplessly: "Now it is basically certain, this is the trick of the space rat, the whole hollow of the void is all beaten into a mouse hole, except for the block. In addition to the pace of our fleet, there are still many void traps in it."

"Even if we use the space bridge to repair it, we will encounter the situation from time to time. If the whole area is deep enough, I will encounter this situation again and again, and the million warships will arrive at the end, fearing that it will be damaged. Up..."

"What's more, after crossing this area, the whole mouse-and-groove star field in front is all the same. So, as long as those dead mice are all hidden deep, we will continue to create similar traps along the way. ...this is a big problem."

"It is very possible that we have not officially fought with them. The tens of millions of fleets are already hurtful and morale."

Although it is a bit of a long-term ambition, it is a fact. For a time, the atmosphere of the meeting has become suppressed, and the look on all faces is not good.

"Things for mine clearance, just give it to me..."

Ye Xuan turned a blind eye, how big a thing, all like a dead aunt, it is speechless.

After a pause, he went on to say: "The million-size fortress is still behind, the young master is responsible for mine-sweeping, and all space bridges are still open. They are responsible for repairing the mouse hole."

All the tops of the demon royal family all looked over to Ye Xuan, full of confused colors.

"Don't forget that there is still a Void in the hands of the Lord!"

Ye Xuan grinned and laughed: "If it is full bombardment, the large piece of void in front of it is estimated to have collapsed, but if it is only a small force to restrain sexual assault, it should be able to trigger the traps in advance, and the Void Wars The power coverage area is very broad, basically shifting the orientation to more than two times, all the traps have to be exposed, then it will be around..."

This is indeed the best solution and practical.

Previously, Ye Xuan was unable to achieve precise control of the power of the four major wars. However, this time, he was responsible for the commanders of the four major warfare core hive nodes, such as the Eight Star King Scoop and Zijin Slim, the Mosquito Emperor. Bloody, etc., have long been in control of the war.

Nowadays, the war can be activated by full power or restrained by small power.

Under the power of all power, after a blow, it is impossible to continue to participate in the war. There is a cooling period. All mosquitoes, soldiers, etc., as the kinetic energy of the war, need some time to recover.

But the restrained small power activates the start, but it can be fired multiple times!

Ye Xuan is now using the Void War, and he is prepared to choose the power of restraint to start his power. In this way, he can solve the problem and retain the ability of the Void War.

After the decision, Ye Xuan even rushed to the forefront of the tens of millions of troops, even the one-size-fits-all fortress that is responsible for repairing the rat hole is behind him.

During the wave, the Void War was released, and Ye Xuan issued the attack command at the first time.

Of course, it is a restrained activation of the small power!

Without any hesitation, the tens of millions of soldiers in the thousands of hive nodes in the Void War, under the enthusiasm of Ye Xuan, all launched action.

There are thousands of honeycomb nodes with a diameter of three kilometers, and each one has tens of thousands of empty squadrons at the moment, which fully stimulates the unique biological frequency of the soldiers.

These unique biological wave frequencies are guided by the scoop in each hive node and are uniformly conducted out. Thousands of honeycomb nodes, thousands of biological waves like the river, all along the pipeline, all flocked to the core node of the core circle, and then merged under the gathering of two heads and eight kings .

In the end, with the sudden tremor of the hollow medullary crystal suspended in the sea, the horror of this mysterious creature wave is like a tsunami.

"Hey!"

"Hey..."

Before the horrible biological wave of this horror was completely gathered, the faint emptiness of the emptiness in the front of the sky was already ringing. The effect is far more than the movement of a large number of virtual oscillators that can be tossed at the same time.

Ye Xuan even had an illusion that the entire vast expanse of the starry field trembled under the sudden high-frequency cicada.

Then, the mysterious wave energy that completely converges into one, under the tremor of the void crystal, instantly dumps away!

"call out!"

The horrible sound of a sharp enough to tear the sky is far more shocking than the deafening of a huge explosion.

In front of the emptiness, there is an invisible tidal wave like a starry sky. It vents out from the core node, and continues to enlarge along the outer nine-layer ring of the Void War, finally turning into an invisible force that plunges into the sea. In an instant, the vast void that is facing the huge bell mouth is completely shrouded!

"Oh la la..."

"boom!"

"Booming!"

The dense and cracking sound of the cracks was overwhelming, and the void of a million miles away was instantly oscillated. The mouse holes of varying sizes all fluctuated violently, but the vast majority persisted and did not collapse.

Only a small part, instantly collapsed into a hollow black hole of varying sizes, a vain flow from the black hole-like vortex vortex, raging a large piece of void, looking at it, such a place, at least thousands of places... ..

Chapter 3807: One ear

The Void Battle was a blow, and thousands of void traps appeared in an instant. This scene was too scary, and even the top of the devils, such as Mo Taiye, were frightened.

These thousands of void traps, if all are filled with the life of warships and magicians, how much is the loss?

However, this is not all.

The power coverage area of the Void War La is a fan, about 45 degrees, which has long been limited by the war-shaped structure of this star-studded killer and cannot be changed.

And Ye Xuan's blow at the moment, the battle is facing the front, just the forty-five degree fan area, obviously does not trigger all the traps.

In the front of the fan area of the forty-five degree angle, there is also an area of nearly equal area.

But it doesn't matter, this kind of restrained power is initiating, and the Void War can be played ten times in succession. There are two fan areas on the left and right, and it's a big deal.

When Ye Xuan issued the instructions of the bombardment, he quickly adjusted the position of the Void War at his feet and blew the same shot to the left.

The final situation is quite the same as before. After a large scene like a catastrophe, thousands of black hole traps of different sizes are displayed. In the black hole vortex, some space families can be seen from time to time. In the flesh.

This is a space-strong powerhouse that has not yet had time to withdraw from these traps. At the same moment that the trap was triggered, its flesh was torn into pieces in a large number of voids turbulent in the collapsed black hole.

Then, the Void War La again adjusted its direction, and the void in front of the right side came again.

In the end, after the three artillery bombardment, in front of this vast and innocent void, nearly 3,000 collapsed black holes of varying sizes appeared, and the small hundred miles were round, and the big ones had a radius of thousands of miles, which seemed shocking.

These void traps were originally mines, and all the way to the past, I do not know how many warships and the power of the magic man to fill.

But nowadays, they are all exposed passively, triggered by the power of the Void War.

All of this is the credit of Ye Xuan. Don't look at him just to sacrifice the Void War, and bombarded three guns in front, but for the countless demons in the rear million army, it is a death. Escape.

If there is no such thing as Ye Xuan, it is just the black hole trap in the front of the void, I do not know how many demons are ruined.

In this moment, in the various warships of the rear ten million, countless hot eyes gathered in Ye Xuan proudly on the back of the void battle.

This moment, all the devil strong, all grateful, completely agree with the fox lord!

At the same time, at the farthest point in front of the rat hole trap area, which is 10 million miles deep, a fleet that has opened the hidden array is quietly standing.

The size of this fleet is not large, but there are also millions of warships, which is the army of the space rat.

They had a good look at the opposite side of the trap area, but now everything has been soaked in the soup, and the flagship of the fortress in the center of the million warships has instantly evoked a roar of roaring anger...

"Lake Fox! Linghu Chong! You damn..."

"The old man dispatched tens of billions of people and rodents, and the trap of the mouse hole that took ten days to prepare was completely ruined by you, and the old man hated it!"

"Come on! Come on with the ability, as long as you dare to enter the star market, the old man will ask you to come back!"

"squeak!"

"Hey..."

It is an old man who is roaring and roaring. At the moment, he is in the top-level command cabin of the flagship fortress. Although he is a human type, he has long rat whiskers and pointed ears. He knows that it is a mouse.

However, his sharp-pointed mouse has only one, and the other side of his head is empty. Somehow, one ear is missing!

This person is called the Rats Mountain. It is the old family of the Space Rats. The family of the Qiankun Daozi is unparalleled, but it is its grandson!

At the same time as the ear and the rat were snarling in the flagship fortress of the Space Rats, there were two fleets at the end of the distance. At this time, several fleets opened the concealed approach, facing the film in the distance. The area is looking forward to it.

The Devil's group and the Linghu lesser teamed up to crusade the space mouse. This matter has already spread to the three major universes. The second and third universes and the top forces are incapable of being restricted by the region. Watch the battle in the battlefield.

But the first universe has no such restrictions.

This war is related to the great situation in the first universe, and the first cosmic slaves cannot be ignored.

In fact, as early as the tens of thousands of warships of the Devils are still on the way, the first cosmic servants have sent a fleet to the Rats.

However, they naturally can't really enter the mouse market, where they will become a place of star wars.

All the fleets of various families that come are not large in size. They are basically around 100 warships. This is coming, not for war, but for watching the war.

Moreover, all the various fleets have opened up the hidden array method, and did not dare to reveal their tracks. Otherwise, it is not a good thing to be seen by the devils or by the space mouse to find them.

These secretly submerged fleets come from almost all slave servants in the First Universe, including the Hell ants, also among the top three servants.

The fleets of all the spectator groups were not close, and they secretly peeked through the void at least ten thousand miles away.

At this moment, when they saw the young masters of the foxes, they waved a starry battle, and within a short period of time, they prepared the space mouse traps for a dozen days. collapse.

And by the way, a lot of space rats who had not had time to withdraw from a rat trap, and the rat and beasts raised by their ethnic groups, the sounds of a large number of people's fleets were immediately heard. Exclaimed constantly...

"Behold, the battle La, actually made the fox lord waved his hand, and it has definitely been refining him, or how to get into the body?"

"Star Wars La Nai is the trump card of the Devil's group. It was created by the demon sorcerer Mo Zhenfeng of the Devil's group. Has the cooperation between the Fox Master and the Devil's group has penetrated to such a degree? This kind of star-studded killer has been handed over to his hands, and may even be a gift..."

"These are not the key! The most critical question is... Didn't you find out? This time, the same starry sky war, has been stimulated three times in succession, God, in such a short period of time, Mo Zhenfeng has already solved it. Is this a big killer cooling period problem?"

"The power of such horror, if every war can continue to bombard, and there are a total of fourteen in the hands of the devil... that is a nightmare!"

"It's over! The space rat is really going to end this time. The first universe is beginning to take shape. After the Heavenly family, the demonic group is finally coming up!"

Chapter 3808: Conspiracy

"squeak!"

"Hey..."

The Void War was bombarded three times, and the entire front of the film was thousands of miles away. The exhibition was even more unaware of how far and wide the sky was, and nearly three thousand rat traps of different sizes were revealed. This minefield, Was easily abandoned.

As a mouse hole trap becomes a collapsed black hole, a large number of voids spurt out, because the entire hollow space is covered in the mouse hole, and some are connected to the edge of these collapsed black holes.

Therefore, these emptiness and turmoil will be drilled, and some will rush into the hollow mouse hole, and there will be a large number of strange noises.

The space-rare strong people who had been hiding in this countless rat hole were like dogs of mourning, and they squatted out from a rat hole.

In addition, there are a large number of rat beasts that have not yet produced a sense of wisdom.

Although these rabbits have no wisdom, they are burrowing experts. This time they were taken out of the rat market, and they made a hole in this vast void.

But at this moment, no matter whether it is a large number of space rat strong people, or a large number of rat and beast, basically all of them have been driven out of a mouse hole, where they can no longer hide.

Nearly three thousand collapsed black holes of various sizes are like big knots, and this piece of imaginary sky is densely covered with countless rat holes. It is a small knot, and there are several rat holes connected to each other.

The turbulent turbulence from the collapsed black hole, along the few mouse holes connected to it...

At this time, hiding in the rat hole is simply looking for death!

In the blink of an eye, the entire vast void of the original mouse hole but no other things was suddenly congested by dense animal and space rat power.

Some of them just rushed out of a rat hole, and the figure immediately exploded, because there was some emptiness behind the buttocks along the rat hole, all the way to chase it out!

This is really a stealing of the chicken is not a counter-etching of a meter, between a short amount of interest, at least tens of millions of space rat strong and rat beasts were killed.

Even in the void in front of it, there was a faint **** smell.

Tens of miles away from the end of the front of the rat hole area, the roaring roar of the old mouse in the main area of the space mouse is more and more violent, and its voice even passes over thousands of miles, and it is clearly passed. This head of the rat hole trap area.

"Let the fox be careful, the old man is waiting for you, can you dare to fight?"

The singularity of the lord of the singer, so arrogantly screamed to a younger generation who did not even have the glory of the universe, demanded a war, this is the extent of no face and skin, it is estimated that no one.

However, Ye Xuan is not at all unconstrained. Today, in the state of the three-headed and six-armed konjac, he has already possessed the third-order cultivation of the Qiankun, and if it is added to the trenches and warfare of the stars, it is old with the stars. There is also a long and short blame.

This is still the premise of not using the sacred bow and other supernatural powers!

He immediately responded: "Old mouse, you wait, this little master will come over soon, and let you live a little more, and then you will lick your mouse head!"

"puff!"

"Puff puff....."

When the words just fell, the opposite side of the sky rang a large burst of blood, Ye Xuan did not pay attention to, even if the wave of the empty air battle, and then turned back to the flagship fortress west sign.

The entire army continued to open.

All the void traps have been triggered, and the millions of large and large fortresses in front of them have opened up the space-integrators, avoiding the collapsed black holes of various sizes and leading the army of the thousands of warships behind them.

It is only a emptiness in the depth of a million miles. For a maximum of half a day, the entire fleet can safely pass through this area, and the star-voyage of the previous day is the edge of the ratish market.

However, before approaching the ratish market, it is clear that there will be a big battle, because the space rat sent a family of the old family, leading the army to the front, seems to be preparing for the whole army of the devil from this rat. The moment the hole trap area rushed out, it launched a volley.

Taking advantage of this huge tens of thousands of warships, the army has not had time to come to the opportunity to send a head-on blow!

In this case, the devils of the royal family have apparently already guessed.

At the moment, at the same time that Ye Xuan stepped into the main flagship fortress west sign, Mo Taiye and Mo Qigong and other demon royals commanded the tops, all gathered together in the first time.

"Do you really want to fight with the old guy? He is a star lord, and he is cheeky to you, why bother?"

When he met, Mo's wife said his opinion. After Ye Xuan's response, he went on to say: "The old guy must have a trick, don't look at what he's yelling now, it seems to be a maddening mood. Look, but the star lord is so unsettled?"

"If there is no accident, he deliberately screams, it should be to paralyze us, and in fact, he did not think that you would really face him in the face, the old guy did not intend to give you this opportunity..."

"Our fleet is currently pulling too long, the size of the original army of millions, but in order to get out of this narrow hole in the narrow repair area, the entire army has only about 500,000 battleships on the front!"

"The other side has been waiting for the work. It has already been set up and is at the forefront of this rat hole area, and all the warships must have been recharged. At that time, as long as there are millions of warships vacant, a round of volleys will hit us. If you don't dare to take the lead, you will be forced to shrink into this mouse hole..."

Speaking of this situation, Mo Taiye frowned, and the top of the group of Mo Qigong and other royals were basically all such expressions.

It is indeed enough to be angry.

The scale of the entire crusade against the army is tens of thousands of warships. It can be called horror in the first cosmic slaves, but now it has been dialed out, even the side of the space rat family's nest base camp has not seen When I arrive, I will encounter such a depressed situation. Who can not change?

"The old guy has a conspiracy, and I think of it!"

Seeing that Mo's grandfather stopped after he finished speaking, he did not continue to say more. Ye Xuan nodded and did not worry at all.

After a short pause, I went on to say: "Reassure, his tricks can't be won, and there is still a half day or so to reach the edge of the entrance of this rathole."

"At that time, I will be rushing to the front of the millions of large fortresses. They are not waiting for their work. Waiting for our fleet to take their heads, they will immediately blast the millions of warships and guns. Do we dare to take the volley?"

"That line, hurt each other, this little master has long been a countermeasure, then who is crying and screaming at that time, really can't say it!"

"Oh no, right, they should be... there is no chance to cry!"

Speaking of this, Ye Xuan mysterious smile, no words, turned and stepped into his cabin, leaving Mo Taiye and others face each other, faceless helpless color...

Chapter 3809: No chance to cry

This scene in the void is a bit strange!

There are endless stretches of left and right, and a vast starry sky thousands of miles away, filled with countless mouse holes, including black holes formed by nearly 3,000 collapses of varying sizes, randomly distributed among them.

In this weird void area, a large number of space-rare strongmen and a larger number of rat and beasts are madly fleeing opposite, where there is already an array outside the edge of the rat hole area. The millions of warships and all the warships have all been recharged.

Just wait for a command, you can start a full force!

And this direction of the millions of warships is facing in this direction, across the tens of thousands of miles away from the hollow area of the rathole, a million army is slowly moving forward.

Although the entire army has tens of thousands of warships, it is now lined up in a narrow column. The cross section at the forefront is a million-size fortress in two rows...

Everything about this is all together, and everyone can see what will happen in the near future.

Opposite to the empty space, the warships all opened up the first cosmic slaves of the hidden system. At this time, they have sighed.

The space mouse is really good.

In the void in the depth of 10 million miles in front, only one channel with a diameter of more than 100 miles is left. The left and right sides of the channel are all traps of different sizes.

Although all of them have been triggered by harmlessness, the black holes formed by the collapse of the void are still in existence. The entire army of the demon people can only pass through this narrow area.

At that time, one rushing out from the other edge of the rat hole area will immediately face a round of volleys of a million warships... This is absolutely to be tempted to rush to the rhythm.

Perhaps, the millions of troops brought by the Devils and the Linghu Masters must stop here.

Such a big momentum, the mighty coming, but in the end, even the people's home space, the nesting ancestral home, the side of the rat scorpion, did not see, they had to go home. If the matter is spread out, let Fox lord and the entire demonic group will become a joke!

For this scene, the commanding high-level servants of the first universe, who are hiding in the sky and the sky, are looking forward to it...

.....

Nearly half a day later, when the entire army of tens of thousands of warships approached the edge of the empty side of the rathole, the space mouse and the number of rats and beasts in the whole mousehole area had already been evacuated. Entered into a million-strong battleship army that was smashed by the outside world.

At this time, Ye Xuan walked out of the cabin and raised his hand and said hello to Mo Taiye: "Let the fortress in front of the road open, stop at a distance of about a hundred miles from the edge of the rat hole area, and the other handed it to me. "

After that, the figure has already left the main flagship fortress of the Western Expedition, and then concealed his figure and rushed to the front.

After a short while, Ye Xuan came to the forefront, and the million-size fortress that had opened the road had been left behind.

Ye Xuan's hidden figure was in front of the emptiness of the mouse hole that was only a hundred miles away. After a while, finally found a space in this area that was enough to present a space of the Star Wars.

In the middle of the wave, the **** sorrowful warfare was sacrificed, and it was squatting in the void, and the huge ramen was facing the front.

Without hesitation, Ye Xuan stepped into the core hive node of the sorcerer's battle at the first time, and then issued instructions for bombardment.

Of course, it is still a restrained small power attack, because this time, it is still necessary to adjust the orientation of the bell mouth, and launch a bombardment in the front and left and right directions.

Although it is a small power bombardment, but the power is enough, among the millions of warships that have been opened in the sky in front of the sky, there are some weak space rat powerhouses...

The soul of the war is full of blows, and all of the following repairs are made to death. Ye Xuan is only a restrained small force bombardment. It is estimated that the twelfth big void will be degraded.

But this is enough. In the millions of warships opposite, how many virtual spacespace rat strongs can there be?

Most of them are under this realm. After a moment of full smashing, it is impossible for a million warships to volley. Basically, all the posts will be stationed, and only the command layer will survive!

Soon, the tens of millions of sacred beasts in the thousands of hive nodes in the sorcerer's battle, all of them started their actions after Ye Xuan's thoughts spurred the blood of the soul.

Among thousands of three-kilometer-diameter honeycomb nodes, tens of millions of soul-beasts are motivating to evoke the unique spiritual fluctuations of their ethnic groups. These unique spiritual wave energy gathers from each honeycomb node. Following the special pipeline between the honeycomb nodes, all of them flock to the core nodes of the core circle!

Get together!

Then, the blood of the scorpion that floated in front of Ye Xuan suddenly trembled. This unique horror of the horror turned into a sharp and screaming sound, like a roar of the sea, instantly venting go with.

"Hey..."

A screaming screaming screaming emptiness, the entire vast expanse of the starry field, trembled in the whistling sound of this sudden coming.

Sharp enough to tear the sky!

The terror screams and screams, and instantly the innumerable strong people in the sky and the sky are stunned. Even the mind and consciousness are at this moment. It seems that the spirit body is being dragged by howling, and wants to be separated. went.

In front of the void, an invisible tidal wave like a starry sky, venting out from the core node, along the outer nine-layer ring of the war, continues to enlarge, and finally turned into an invisible force that plunges into the sea. In an instant, it will completely cover the huge void of the huge bell mouth!

The vast expanse of the front is sweeping!

At this moment, all the powerful people in the sky and the sky feel that their brains are straightforward, and they have not yet reacted to the imaginary airs of hundreds of miles away. The space of the Rats and millions of troops in the central domain of hundreds of thousands of warships Suddenly, there was a short and horrible sound of screaming to the extreme.

"squeak!"

"Hey..."

The screams followed one after another, and the half-times were already dense, and they rang out loudly, but they still only heard the sound, but they could not see any abnormalities. All of them were covered by this screaming soul. The battleships and fortresses and fortresses are still in the void.

Only the sharp sounds of the squirrels, one after another, revealing the sorrow, revealing the Sen Han, in addition, there is no other movement, the whole atmosphere of the void, at this moment, strangely scalp numb !

Seeing this scene, in the far side of the rear, the master control cabin of the main flagship of the fleet's flagship west levy has already realized suddenly, and understands that Ye Xuan's intentions, such as Mo Taiye and other democrats, are all exceptions. The ground was awkward.

If you don't agree with one word

With such a blow, the opposite million warships were at least one-third empty, and all of them were destroyed and smashed. Ye Xuan said that it was true. In the face of this unsettled blow, the space mouse's star lord I really cried without crying...

Chapter 3810: Millions of troops fight

The soul of the war is too sudden!

Previously, Ye Xuan quickly approached and rushed to the front of the millions of open-size fortresses, hiding the body shape along the way.

It was not until the selection of the place where the sacred souls of the sorcerer's war were sacred, and then they waved their hands and sacrificed the battle, and then they were able to enter the sorcerer's battle in the first time and ordered the bombardment!

It was all too fast, and I didn't wait for all the people to come back. The first hit of the sorcerer's war was already blasted.

There are already a million battleships in the front of the virtual air. There are only one-third of the battleships in the moment. Although the strongest of the more than 300,000 warships have not yet been embarrassed, the instructions can no longer be effective. The warship controllers are almost completely destroyed.

Then, without waiting for the millions of warships in front of the space mouse to get the frying pan, the soul warfare has adjusted the position of the mouth of the mouth, and once again blasted the second strike.

Then it was the third hit to the right by Lakou...

Three bombardments, different orientations, and the time before and after the three-pointer, the army of the millions of battleships of the space rat, completely smashed, completely smashed!

That's right, in order to save the fighting power and ensure the ability to continue the war in the later period, these three bombardments, like the sorcerer's war, are the restrained small power bombardment.

Within the millions of warships ahead, the fallen are only the hundreds of millions of low-level space rat powerhouses, and a larger number of rat and beast.

All the space rats that have been cultivated above the beginning of the thirteenth state are all just stunned, dizzy and uplifted, and have not fallen.

Even after a slight adjustment, the faintness in the brain disappeared and completely restored to normal.

But this is meaningless.

Among the millions of warships, there are hundreds of thousands of space rat powers above the beginning of the thirteenth world. On average, each one is responsible for a warship.

What's more, the space-rare strongmen who have been cultivated above these fields are basically concentrated in some of the main flagship fortresses.

In other words, the vast majority of the millions of warships are already ghost ships. There is no living thing inside, how can they be volleyed? How do you get a million-dollar army of the demon people who are about to rush out of the hollow of the mouse hole, and hit them with a headache?

In fact, even if they still have this ability, the millions of the army of the devil will not give them this opportunity again.

Just in the next moment of the first bombardment of the sorcerer's war, the Mo Qigong, who was in the rear of the main flagship fortress west sign, had already issued the instructions for the entire fleet to advance at full speed.

At the moment, the aftermath of the third bombardment of the sorcerer's warship has just disappeared. In front of the flagship fortress of the million-strong military lord, the space mouse and the main monster, the sound of the roar of roaring and screaming in the ear and the mouse has just sounded. The million-size fortress in front of the road has already rushed out of the edge of the rathole void area.

In the first time, they concentrated their firepower and launched a round of volleying on the flagship of the enemy camp, which sent out the roar of roaring anger...

"boom!"

"Booming..."

A series of guns and light beams were blasted away. Nearly half of them were all black annihilation beams of anti-matter deadlights. Immediately, the enemy flagship main plugs and some of the surrounding large and small fortresses were blasted out of each other.

At this time, behind the millions of large and small fortresses, the tens of thousands of continents of the entire demon group are also rapidly rushing out of the rat hole area, but they have not launched a blast. After all, the opposite million warships are basically Dead ships, this is all savvy, and they have to be collected in a while, sending the devil strong and intelligent robots to settle in.

It will be good to push the million warships to the front and go to the thunderstorms.

"Roar!"

"Let the fox, you can dare to fight with the old man! Today vowed to kill you! Hehe..."

The earth-shattering roaring sound came, and from the large and small fortresses that were being bombarded, the figure of the space-raising strongman rushed out, all of them were embarrassed.

These guys are the middle and high-level commanders of the space mouse fleet that were built in the thirteenth big territory. Now they all escaped their respective warships, because they can only be targeted in the inside, and the millions of the demonics are millions of people. More than half of the bombardment by the fortress is an anti-matter death gun, and it will kill people!

Before the blink of an eye, hundreds of thousands of space rats and the strong people will pervade the void, and some directly hide the body shape, while others show the blood and the body, body size, even thousands of tens of thousands, squatting in the void, blocking in front.

Among them, the leader is a sturdy cyan mouse, and the body exudes a breath of breath, which has reached the starry territory of terror.

This person is leading the space mouse fleet, outside the mouse market, the commander of the million-strong army that intercepted the army of the demon people, one ear and one mouse!

At the moment, the interception mission performed by the Rats has obviously failed, and it has been completely defeated.

Not only did the million warships fall, but even the hundreds of millions of space-rare strongmen and rodents in the battleships were almost completely degraded. Only the middle and high-level commanders who were trained in the thirteenth world were able to survive. .

This kind of victory is simply a painful, shameful home!

An ear rat has already hated the anger, and after rushing out of the main flagship fortress, he activated the blood and showed the bleeding pulse, and then roared and screamed.

At this time, his anger was ruined, his old face was hot, and the only thing he thought was that he would immediately kill the fox lord, so he might be able to save a little face.

Otherwise, the singularity of the star, not to mention going out to see people in the future, it is estimated that this time even the face of the returning ancestral lands is gone, it is too sad!

At the same time as the rat screaming in the mountains, the distance between the distant and the distant sky, those hidden in the size of the fortress, but all open the hidden array, did not show the shape of the first cosmic slaves of all ethnic groups Those.

When I saw that the young fox was riding the 300,000-meter-diameter terrorist war, I rushed out of the rat hole area and came to the universe outside the area.

Suddenly, they rushed back and forth, and all of them were exclaimed...

"I saw a ghost, and it is a one? And it is distinct from the previous Star Wars. This **** big killer should be the savage savage that was previously in the devil's field." Under the golden years of war!"

"What is the situation? What is the relationship between the Fox Master and the Devil's Emperor Mo Yufeng? Is it so good? Even the Devil's big killer Star Wars has sent two whole..."

"It seems that the previous speculation has been confirmed. The devil's emperor Mo Zhenfeng is really a great man. In such a short period of time, he has already attacked the cooling problem of the Devil's Star Wars."

"Yes, in addition to the previous Void War, this sorcerer has also been bombarded three times in succession. This has never happened before, and it will take at least a certain amount of time to start activation again..."

"Sadly, sigh, the devil's group just attacked this problem, and immediately sent troops. It seems that it was premeditated... The space rat is really going to die this time!"
