

## Super D. S 3871

Chapter 3871: Re-enter the source of all evil

"Roar!"

"The konjac changes... the third change!"

The last change, Ye Xuan looked up and roared, the power of the three major bodies of blood and blood rushed endlessly, the initial as a roaring river, and then turned into a majestic anger!

The figure also expanded rapidly, reaching 10,000 feet!

In just a few bites, Ye Xuan activates the real body of the konjac, directly opening the first three changes of the konjac, causing his true body shape to reach a huge height, repairing for strength, but also soaring three small steps, finally reaching the star The first step!

At this moment, Ye Xuan, for the first time, experienced the majestic power of the star's main territory. This feeling is very wonderful. If the feeling of the Qiankun environment is more intimate with the outer space of the universe, it seems that the vagueness touches a little universe. The trajectory of the law.

Then, after entering the star territory, this feeling is not only clearer, but even more of a trajectory that seems to be able to pull the cosmic law, and mobilize some of the power to use it.

Of course, very weak!

But for Ye Xuan, it is of great significance. Even in the state of the star's main territory, even if the roots of the evil source are deep, some of the sensations of the heavenly eye are deliberately peeping into the dark. Xuan also has the confidence to activate the interstellar coordinate jumping ability and quickly escape before the Tiandao Qingyan captures its own shape without disturbing the headless baby.

In other words, after this retreat, Ye Xuan once again entered the preparations for the evil source, and finally fully ready, ready to leave!

However, in order to ensure that he owns the strength of the star's main territory, Ye Xuan enters the source of all evils. Obviously, he can only use the image of the three-headed six-armed konjac, and he has to remain in the third state of the konjac. .

Otherwise, the repair of the star's main territory will not be guaranteed, and once there is any change, it will be extremely passive!

"Immediately activate the interstellar coordinate jump ability, lock the jump point: the source of all evil!"

With a slight guilty conscience, Ye Xuan took a deep breath after completing the retreat and prepared everything, and then issued instructions to the body's engulfment system.

"call out!"

An extremely faint flash of light flashed, and at this moment it is still in the third state of the konjac, and the body of the fascinating body is suddenly disappearing.

Originally, he was also worried that under this state, the ability to expand the interstellar coordinates would be elusive and inconvenient. After all, Ye Xuan used to be an ordinary human figure when he developed this system capability.

At the moment, it is a huge beast of the beast, which is absolutely different. When the system activates the interstellar coordinate jump ability, the load will be different.

Ye Xuan even has a little worry about whether the interstellar coordinate jumping ability will be fundamentally affected in this huge and almost horrible state, leading to failure.

But the facts prove that all this is just a superfluous worry. In the end, this time the interstellar coordinate jump ability was successfully activated.

With the flash of the micro-men, Ye Xuan's body shape disappeared completely in the place...

.....

The source of all evil, deep in the core hinterland!

Nowadays, there is no such thing as a peripheral area, a central buffer zone and a core hinterland.

Previously, these three areas had a block of resistance between each other, but nowadays, the three areas are unified, and the array barrier disappears, becoming a vast expanse of the canal!

Even so, in this vast and innocent star field, it is still dead. Since the last great change, there has never been any living being in the whole source of evil.

The internal detention, all of them have been put into the furnace by Tiandao Qingyan. Beyond this star field, no matter which of the top three forces, or the scattered, no one, dare to enter here easily!

The original source of evil is called the first star of the first universe. Nowadays, it has become the first fierce land of the three major planes!

The indigenous beasts at the main level are killed by the spikes, and they are still two... Is there anything more horrible than this?

Even if the courage is bigger than the sky, I am afraid that I will not enter easily!

In fact, all people are too worried. Now, this source of evil and evil, there is no crisis at all!

As early as the day after the change occurred on the same day, Tiandao Qingyan had already left, and it was a complete evacuation. There was no lingering consciousness left at all, and secretly peeped into this star field...or the furnace!

Because that is completely unnecessary!

This time, the furnace is simply not like the outsiders including Ye Xuan, who are condensing certain things, it is just eating!

One has never been seen before, but now it is only the first time to eat!

The so-called eating is for evolution!

Yes, the furnace has evolved, and everything that has been swallowed into the furnace, including the corpses of the three great planes, the alloy wreck of tens of millions of warships, including millions of The remains of the indigenous beasts, including the wreckage of the wild creatures that were originally sprinkled from the furnace as waste.

Everything is all the nutrients needed for self-evolution!

It's not the raw material for refining something... it's just the nourishment of its own growth!

After all the materials were put into the furnace, they were first broken by the huge ancient grinding disc in the central area of the furnace, and turned into a substance that blends flesh and blood with the alloy!

But these substances are not condensed by the power of the furnace, which is always stored in the central pores of the huge grinding disc in the furnace.

From that moment on, the furnace that was accidentally activated was once again silent, and the rumbling of the rumbling wheel disappeared, as if the furnace had once again entered sleep.

This is also true. After all the evolutionary nourishment has been polished into a slurry, the furnace is like a monk retreat, entering a special dormant period... it has not continued until now!

During this time, the special substances in the central pores of the huge grinding disc in the furnace, which are blended with flesh and alloy, are continuously reduced...

Just as the sea level is gradually drying up due to evaporation, and the special material that was originally called massive, in the central pore of the sizzling plate, it is almost bottoming out, leaving only a shallow layer, at any time. Will completely dry up!

Undoubtedly, once the bottom is reached, this special substance blending flesh and blood with the alloy will be completely consumed, and the furnace will recover again. This evolution will also end!

From the point of view of the special substances left in the pores, this moment is obviously coming soon, perhaps... not for a long time!

It was also at this time that a secluded mangling flashed from the original buffer zone of the central domain of the evil source, followed by a three-headed six-armed, sturdy Taikoo konjac, quietly coming... Ye Xuan, in this The key moment is finally coming!

Chapter 3872: The furnace is fine

"call out!"

The faint sound of the broken air flashed, and Ye Xuan appeared in the form of the third change of the konjac. When the three heads and six arms, the giant scorpion of the sacred body, appeared in the starry field of the evil, the leaf Xuan's whole heart mentioned the eyes of the blind.

At this moment, he did a good job of seeing that the situation was wrong and immediately fled.

Even this time the interplanetary coordinate jumping ability has just ended, and the moment the figure appears, he has already issued the system command, and once again made the second jump of the power!

However, the fact is that nothing happened, so that he has the feeling of hitting a cotton punch!

"what's the situation?"

Ye Xuan turned to look around, there is a dumbfounded feeling!

The whole source of evil and evil is dead, and the vast and innocent void has no movement, so that he even gave birth to an illusion of coming to the dead.

Not only is it a little bit of a glimpse of the pressure associated with the heavenly eye, but even the furnace is like a sleep again, quietly.

"Is the refining system already completed, and the special product of this furnace has been taken away by Tiandao Qingyan?"

Among the three pairs of giant pythons of the Taikoo konjac, there is a faint sorrow, and when you mutter your own words, there is a faint feeling of uneasiness in your heart: "If this is the case, it means that the Lord is a late step."

"And if the product of this furnace has been taken away, it means that this thing has great use for heaven and earth. This time, the special refining outside the plan is not a coincidence, but premeditated!"

"Unfortunately, after all, it is still a step late. Otherwise, as long as the product of the condensate is not taken away, even if it is only a distant glance, at least you can know what it is. How much can also be derived from a little information..."

In the muttering, the face of the Taikoo konjac showed a sorrowful color. Then, Ye Xuan thought of something, and then did not say anything, after concealing his figure, he turned in the original hinterland area of the evil source. Circle, indeed, Tiandao Qingyan did not leave any sense of power, and immediately released the \*\*\*\* state of Taikoo Konjac.

Restoring the human form, and rebuilding it into strength, has since reverted to the fifth stage of the fourteenth world!

Since the heavenly eye is not in the eye, there is no need to keep the body of the third change of the Taikoo konjac. It is too large, and even if it runs hidden, it is quite difficult and inconvenient.

Now that the human form has been restored, Ye Xuan has been a lot easier. The first time he started the magical movement of the mysterious power, the body shape and the air machine are completely hidden!

Then he set off and rushed toward the furnace.

Although Tiandao Qingyan had already left the product of the planned refining of the furnace, Ye Xuan lost the opportunity to know what the condensed product of this furnace was, but he was still unwilling.

Deciding to go deep into the furnace to carry out some exploration, perhaps to find some traces of the beads, so as to derive certain information.

Ye Xuan had previously handed over a drop of konjac blood into the furnace, and got the shelter of the furnace. In the source of the evil, he can be as unaffected by all the other indigenous beasts.

But that can only be achieved if the three-headed, six-armed konjac is in the state of reality.

But now he is in a human form, does not activate the blood of the konjac in the body, but still does not feel the power of the slightest pressure.

This is very unusual, so that Ye Xuan is so excited that he may be able to enter the interior of the furnace.

His guess is correct, and now the furnace is in the final stage of evolution, all the functions are all stopped, and the slightest pressure is not diffused.

If it is in peacetime, even the indigenous beasts sheltered by the furnace can only get close to the edge of the furnace, and it is impossible to enter the interior of the furnace. Now, this is not a problem...

But this is also temporary. Once the mound furnace completes this ontological evolution and recovers from this dormant state, then the original furnace pressure will once again come out, and it will be more fierce and terrible!

Therefore, in a sense, the arrival of Ye Xuan's arrival is really a coincidence. After a short period of time, it will not be able to smoothly enter the furnace. Unless it is the first time, Get shelter from headless baby bodies!

Soon, Ye Xuan, who opened the spirit of mystery and perfect shock, threw himself up and crossed the mouth of the furnace. Then he fell into the furnace and easily entered the furnace.

The whole furnace is as dead as it is, without the slightest perception, there is no movement at all!

Ye Xuan's line of sight swept through the interior of the furnace, and soon it was all in sight.

All other areas are as usual, no difference, only the central pores of the central domain have a shallow layer of material that looks like a fusion of flesh and alloy, which should have been inhaled before The mixture of those starry sky powers, indigenous beasts, and warship wrecks that were smashed by grinding discs.

Surprisingly, this shallow layer of mixture, at this moment, is actually being absorbed, and it is slowly decreasing. I am afraid that there will be another hour or so, it will completely disappear.

"No, the situation is a bit abnormal..."

Ye Xuanchun's flash in the mansions immediately realized that it was wrong. He whispered softly: "These mixtures are slowly being consumed. So, this time, the furnace is not unconventional, but instead... Absorb evolution!"

"I rely on! Isn't it? The mixture that was formed by the innumerable star powers, the indigenous beasts, the ruins of the ancient ruins, and the tens of thousands of warships was used to collect the furnaces and help them evolve?"

"This possibility is very big. The furnace was originally built by a special rare gold, so it is understandable that it can capture the wreckage of thousands of warships. Compared with its own materials, it is the so-called construction of these warships. Cosmic alloys, I am afraid it is only a low-grade metal."

"If this is the case, wouldn't it mean that the power of the furnace will be stronger after this time?"

"What do you want to do in Tiandao Qingyan? Let this furnace evolve again and give birth to self-awareness, just like the birth of a spirit?"

"This is the rhythm of perfection..."

In the muttering, Ye Xuan's face has changed, although all this is only his guess, but from the current situation, this guess should basically be the truth.

He was squatting, his vision was free, and he swept the pores of the grinding disc in the central area of the furnace again. At this time, the already very shallow mixture of the layer had a corner showing the material of the grinding disc.

Bottom out!

Ye Xuan's heart suddenly jumped, and his heart's warnings rose, because according to his speculation, today's furnaces are undergoing evolution. Once these mixtures are collected, the furnaces that are in a deep sleep should be fully recovered immediately. ....

Chapter 3873: Alien void

The furnace is about to recover, and Ye Xuan's heart is full of vigilance. Because this time the furnace has evolved, the power is bound to be stronger. Ye Xuan does not think that he is resistant.

Although it is possible to sacrifice Shennong Ding to protect itself, but in the eyes of the inside of the furnace, this grade is equivalent to Shennong Ding, and now after another evolution, Shennong Ding should be able to protect Ye Xuan Zhou Quan, but may not be able to break through. How much will be trapped for a while.

If you are alarmed by the blue eyes in this period, then it is really troublesome.

One thought of this, Ye Xuan heart anxious, just want to get up and rush out of the furnace.

"Oh la la..."

It was also at this time that the dense chain of sounds suddenly made a big hit, and all the fringe chains inside and outside the furnace were trembled at this moment.

A horrible pressure that makes Ye Xuan feel suffocated, and instantly appears in the interior of the furnace.

That's too late!

The thought flashed through my mind, and Ye Xuan subconsciously activated the interstellar coordinate jumping ability to escape, so as not to get into trouble.

However, at this time, the familiar feeling of enthusiasm suddenly came from the left chest, and the headless baby corpse was once again self-recovering.

This makes Ye Xuan a little surprised, not in line with the urine of the baby's body, is it that he noticed something, do not want to leave?

Ye Xuan Dang even dispelled the idea of starting the interstellar coordinate jump ability to escape. With the baby body shot, he has no fear at all, he is safe and worry-free, and he does not have to worry about being aware of its existence by the furnace. The last time was in no Under the protection of the head baby body, in this heavyweight level of the ancient treasure to the treasure, toss a round trip.

"Oh la la!"

"Hey..."

The sound of the chain is still the same, the furnace has fully recovered, and Ye Xuan squats in the corner of the furnace. He is closely watching everything and soon hears a strange noise.

Looking around, he discovered that the chains inside and outside the furnace had fallen off on their own.

There are two types of chains in the furnace. One is to extend from the far side of the void to the outer wall above the furnace, and to transport the raw materials to the huge grinding disc in the furnace.

One is to pass through the furnace from the inner wall of the lower part of the furnace, and to the end of the void at a distance, to deliver the condensed allergen source...

Today, both chains are temporarily freed by the furnace.

The only difference is that the lower inner wall passes through the furnace and extends to the far end of the empty space. The chain used to transport the condensed allergen source is disconnected from the head of the mound, and the chain still exists, but with the furnace no longer connected, lie in the void.

But the chains that transport the raw materials are out of touch with the void halfway, and half of the length is connected to the outer wall above the machete. Each one has millions of miles and the number reaches tens of thousands.

The furnace is really getting fine?

Is this the rhythm to escape?

Or, because it has already been exposed, it is necessary to learn the celestial family and start a migration?

Ye Xuan was in doubt, and his heart secretly exclaimed.

But he quickly overturned this statement!

The Mold Furnace is a large-scale virtual refining system. It extends from the distance in the distance, and has tens of thousands of chains for conveying raw materials. It extends to the distant sky and is used to transport the chains of the product. Tens of thousands.

Each chain is positioned with a different vane orientation, and some are even unknown cosmic planes. Is it that migration can be migrated?

It is only the positioning of these voids and unknown cosmic planes that is a huge project. It is only the existence of the level of heaven and earth that can be completed independently.

But he has not recovered now, and it is impossible to have time to toss these.

Therefore, although there are possibilities in the theory of migration of the furnace, the existing conditions are not allowed at all.

In addition, the situation at hand does not seem to be moving.

If it is a full migration, the furnace must take all the chains away, but now almost all the chains have been left, leaving only 10,000 chains for conveying raw materials, and half are connected to the furnace. On the outer wall.

This makes the furnace look like a huge tentacles!

It is worthwhile to only ask for the chain of raw materials. If there is no accident, the furnace should not be a migration, but it should temporarily leave the source of evil and start... hunting!

The object of its hunting is obviously used to condense the raw materials of the evil source. The hunting area must be the other unknown voids beyond the tens of thousands of already positioned virtual planes!

This time, the unexpected evolution has given the furnace a certain self-awareness and the ability to hunt on its own, so all this can be carried out!

"Hey!"

"Oh..."

Just as Ye Xuan was indulging, this suspiciously already awkward furnace, and it really vacated, tens of thousands of lengths of fringe chains at the same time singularly strange, like a thousand stars, smart incomparably rushed to a point in the void.

The shackles were opened, and the void was torn out of a huge crack, and there was a loud and clear crack.

Then, before Ye Xuan returned, the huge furnace of the smoldering had suddenly slammed into the crack of the emptiness that had just been torn.

Since this moment, Ye Xuan's vision has become dark, and the furnace seems to have entered a kind of emptiness. Only the fierce and innumerable roads are raging, but nothing can be seen.

I don't know how long it took, Ye Xuan suddenly appeared slightly bright, only to find that there has been an unknown void, should have jumped out of the first cosmic plane, not even in the three major planes.

This mysterious void is clearly an exiled cosmic plane, and it is incomplete, and reveals a strong and ancient atmosphere.

It should be part of the ancient starry sky of the ancient times, and the same ancient cage that was connected to the valley of the Forbidden City, and the same was also separated, and was also exiled.

The only difference is that the damaged void in the first universe of the devil's star is not only a cage, but also a buried bone, revealing an endless death atmosphere, desperate!

Although the starry sky is as bleak, there is not even a star that glows and glows, but careful sensing can capture countless lifeful breaths, although it is extremely powerful!

The vast majority of life is in the exiled wild river, from the inside of a relatively large star, and the deepest part of the core of these stars, clearly crouching with a very powerful creature, Sleeping!

In addition, there are also a lot of vagueness in the large number of void cracks that are scattered throughout the whole piece of the void. Although the number is too small, it is more horrible and powerful, without exception!

What is even more awkward is that these existences crouching in the cracks of the void are clearly the same as the golden dragons and the ancient night cherries.

In one of the void cracks, Ye Xuan saw a horrible giant turtle with a size comparable to a small star field, which made his heart mad...

Chapter 3874: Heavenly Blade

This giant tortoise is clearly the body of the Void Giant Turtle, but it is too small!

At this moment, the old turtle floated so quietly in the void, and I don't know how many years have passed. I can't let the horrible body of the giant tortoise, but the horrible body of the giant tortoise. Lost, never been shaken.

And its vast, turtle-like giant turtle's back, also inserted a black horror magic blade, the blade length does not know how many miles, a small half has been plunged into the turtle's back, very sharp.

This enchanted blade blade blew through the bleeding green luster, the evil spirits are incomparable, revealing some kind of evil spirits that shocked the soul, and looking at it, it is called the mistake of life, it seems that there is an invisible magic flame that is cruel and savage. Gushing and rushing, come on!

And the big blade that the magic blade reveals is covered with a gap, and silently tells how terrible the battle it had experienced in the past!

Although the magic blade is now the same power can be bleak, no longer the fierce flames of the past, but the faint breath of the vagueness, but with the extension of the wind and the blood of the magical magical flames condensed the energy of the magic knife generally two No, if you must say that there are different places, it is the black magic blade that is inserted vertically on the huge turtle's carapace!

When the extension of the wind and the original battle with Ye Xuan, the faint milli-mantle that was shot from the eyebrows of the sharp wave, the wind will rise, and the mountain magic knife that is not half-interested is illusory.

The magic blade has been damaged, and the giant tortoise is sleeping!

This scene has not been known how many years have passed, never changed!

The magic knife that was used at the time of the extension of the wind was actually a kind of incomplete magical power. The magical flames of the gods were flashed. Once the application was carried out, the body could instantly condense, and the power could be horrible and evil. Can absorb the vitality of the opponent, the blood and the power of the gods, can be called the corpse secret!

In that battle, the blood green magic knife that circled the top of the top of the wind, let Ye Xuan have a feeling of heart-breaking!

Even he is extremely suspicious of the ancient times before the endless years, leaving the \*\*\*\* magical hands of the ancient creatures, whether they really have a physical magic knife.

It's just that the energy state magic knife that can be condensed by the magical powers has already breathed the horror. Even Ye Xuan's quasi-star to the treasure-level warrior's blood blade is slightly inferior. If the fierce blade is really real, its magic Wei Zhisheng is simply unimaginable.

This is Ye Xuan's heart sigh at the time. I didn't expect it to be confirmed now. In the era of the ancient times, there was indeed such a magical blade of the entity. I don't know which one of the hostile camps is in the hands of the strong, but it must be the existence of the Supreme Age. Otherwise, how can it hurt the giant turtle?

Until now, this sinister blade has been inserted in the back of the turtle of the Nether Giant Turtle. This must have been the scene of the ancient times before the billion years of age, and it has continued to the present day, and it is chilling.

Since the billions of years have passed, the body of the Void Giant Turtle has been inserted with such a magic blade... When I think of it, Ye Xuan's eyes are red and clenched!

After all, his sinister emptiness is derived from the cave giant turtle. In a sense, the cave giant turtle can be regarded as a kind of master in his starry environment!

It's not just Ye Xuan. In fact, just as he passed through the crack in the distance, the first time when he saw the hollow giant turtle in the crack, the headless baby had a reaction.

Ye Xuan clearly felt that the corpse lamp tattoo on the left chest suddenly became even hotter, revealing a strong anger.

But the baby corpse did not immediately shoot, and the anger was suppressed by him. It should be waiting for the opportunity. After all, the present furnace only came to this ancient void full of cracks, but did not enter the cave giant turtle. The crack in which it is.

Not the best time to shoot now!

Ye Xuan also pressed down his anger and impulsiveness, took a deep breath, and began to look up the information of the black magic blade in the database of the body's engulfment system.

Previously, the system did not touch the black magic blade, so the information related to the database was almost blank, and only the information of the energy shape magic blade in the hands of the extension.

But now it is different. The body of the black magic blade has already appeared. It is seen by Ye Xuan. Although it has not been touched by hand, it is estimated by Ye Xuan that the phagocytic system can still deduct and analyze some information. In the system database, the data related to this black magic blade should have been updated!

This time Ye Xuan is still not disappointed.

Although he only saw the body of the black magic blade through the void crack, he did not touch it personally. Therefore, there is not much information about the system, especially the specific grades. There is almost no data on current quality and status.

But for its origins, the system has had a rough result!

This black magic blade is suspected to be a superb blade named Tianhui Blade and from the outer world of the devil. Its rank should belong to the ancient treasures, although it is not comparable to the Shennong Ding and the Furnace, which belong to the era of heavy weapons. However, because this blade comes from the mysterious extraterrestrial world, it is related to the legendary extraterrestrial demon. It is also extremely strange and powerful.

Otherwise, it is impossible for this blade to be inserted in the back of the Nether Giant Turtle in the endless years of the past, which has played a certain role in suppressing the Nether Turtle to recover the injury!

As for its current quality and status, the system can't be deduced, but the power of the blade is not limited.

This kind of wilderness to the extraterritorial murderer, there must be a strong blade spirit inside, if not, this blade can not suppress the empty giant turtle.

Since this endless years, the Void Giant Turtle has never recovered because of the entanglement of this enchanted blade, and even its injuries may still go from bad to worse.

But this situation is also relative, because this stalemate is originally a kind of mutual consumption, the virtual giant tortoise is almost being dragged to death, but this is not so good!

After these years of entanglement and rectification, the two have formed a delicate balance of stability, no one is better than one star.

In this case, if there is an external force to break the balance of this stalemate, it is obviously not difficult to save the virtual giant turtle!

Realizing this, Ye Xuan's fine flash in the eye, he was excited in an instant, he had a strong hunch, this time, he will be able to save the virtual giant turtle. For him, this is not only finally Get the complete meaning of this layer of emptiness, and more importantly, behind your own, from then on, there will be a living ancient sage!

Even if it is seriously injured, but the identity and foundation of the ancient and supreme people are there, the meaning is difficult to estimate, it can be said that it is not the same...

Chapter 3875: hunting

In addition to the void crack in the empty giant tortoise, there are other space cracks in this ancient mysterious void, one after another, dense and dense.

In almost every crack, there are one or two pictures of the ancient creatures.

The breath of these figures is different, or it is the sacredness of the ancients, or the power of the ancients, but also the existence of the ancient powers.

Even their state of existence is different, and some have strong qi and blood. Obviously, after a long period of stagnation and dormancy, the injuries left in the battle of the ancient world have now recovered. Most of the time, the days when the distance was once again in full bloom were not far away.

And some, it has simply turned into a corpse, the injury left in that battle of the world was too serious, and did not get the supply of top resources such as the source of all evil, failed to support, and eventually fell.

What remains in the cracks of the void is only the wreckage that has passed away, but it still retains the prevailing pressure of life... It is also extremely powerful.

But more, it is still similar to the virtual giant turtle, extremely weak, or slightly better, but it can only be regarded as a serious injury to the unfamiliar wilderness...

Ye Xuan looked around and saw an ancient living creature species that was once extinct and could no longer be seen in the world.

Qinglan, Yinlong, Qinghuo, Jinwu, Heteromorphic Kirin...

It is only in those battles in which the wild creatures belonged to which camp, but it is difficult to distinguish.

Perhaps the wild animals in the cracks of the void, both camps have their own, and there is no known.

The battle of that year must be very fierce. The two camp leaders who were fortunate enough to survive could not care too much. They randomly found a void crack, and they plunged in and started the sleep recovery...

This is very possible!

However, for the virtual refining and massification center with the mound furnace as the center, this mysterious void is absolutely extraordinary and is an excellent source of raw materials.

However, when the Void Refining and Big Array was established by Tiandao Qingyan after the war in that year, it was apparent that this mysterious void was not made into a positioning void with the connection of raw materials.

Either the Tiandao Qingyan at that time had not found this void, or there was some other reason that gave him another consideration.

No matter which one, it doesn't matter to the present furnace.

After this self-evolution, the furnace has already produced a self-consciousness. As if it had the spirit of the instrument, it can leave the source of all evils, enter other void planes, and actively launch the hunting surface.

Right now, he came to this mysterious void, the purpose is this, and, just as Ye Xuan's heart is scrutinizing all this, the hunting of the furnace has finally begun...

"Hey!"

"Oh la la..."

The sound of the chain rang, interrupting Ye Xuan's thoughts and pulling his eyes away, so that Ye Xuan's light was condensed!

In the line of sight, the chains of the furnace have once again waved and swept to a nearest void crack. In the void crack, there is a silver dragon about a thousand feet, but the situation should have fallen, but even so, The silver dragon's whole body is still silvery, and it shines brilliantly.

The air pressure is still the same, and there is a scorpion wound on the back that occupies one-third of the length of its narrow body. The silver dragon blood can still be seen in the back.

It is definitely an extremely powerful silver dragon. Even if it is not the strength of the ancient powers, it is similar.

"Oh la la..."

Thousands of chains are simultaneously waved, each with millions of miles, all like stars and giants, and they look extraordinary.

The thousands of chains have also plunged into this void crack. They have identified the silver dragon's corpse and tied it directly. Pulled it out, and when it was thrown away, it fell to the mouth of the furnace, fell into it, and landed in the gap around the central grinding disc.

Obviously, this time the furnace is dispatched, it is just hunting. Therefore, the central grinding disc in the furnace will not be activated. All the prey will be completed after this hunting, returning to the source of the evil, and then unified. Involved in the central domain grinding disc crushed into mud!

Coincidentally, this silver dragon was thrown into the inner space of the furnace, just not far from Ye Xuan, as if it was given to him in general, Ye Xuan can use the power of Shennong Ding with a wave of hand Its income is within the space.

Looking at the silver-plated silver dragon corpse, Ye Xuan's fine flashes and his eyes are hot.

He also has several small-order breakthroughs, which will be able to enter the nine-stage grand perfection of the Zhouguang. At that time, the fifteen-level liquid will be used, and the subsequent sixteen-level liquid will become a top priority.

Even this time, because I found the body of the Void Giant Turtle, I also connected the previous road in the cultivation of the ancient sham practice. But for Ye Xuan, this kind of body resembling a forged body. He can't give up the method of qi and blood cultivation.

When the exercises and the physical body are fellow initiates, and the situation goes hand in hand, his combat power will be even stronger. He would have been stronger than the same-order powerhouse, and he will become a real demon!

Therefore, the sixteenth grade liquid is the seventeenth and eighteenth grade liquid after the system. Ye Xuan must start to practice, and the top quality Baobaobao meat like the silver dragon corpse will be the best material.

For Ye Xuan, it is commendable.

But now is not the time to collect, anyway, the silver dragon's body has not been put into the central domain grinding disc to crush into mud, Ye Xuan can wait until the number of such top treasures in the hunting of the furnace is considerable, once again Sex shot, give it a pot, and then quickly leave and leave.

"Oh la la..."

The chain is still ringing. This time, it is the first hunting after the evolution of the furnace itself. It is obviously impossible to stop it easily. The body of a silver dragon is far from satisfying it.

This mysterious void has a large number of void cracks. Each crack has one or two extremely strong and old-fashioned creatures that are seriously injured. For the furnace, this is a paradise for hunting.

When I came to this place, can I not enjoy myself?

In the squeaking sound, the furnace went to the wandering, and after a short time came to a crevice in the void, followed by thousands of long-running striate chains, rushing to the road. Void cracks, plunging into it.

In this void crack, there is a green corpse, still a thousand feet, still long gone, this green, is the second goal of the furnace.

Thousands of striated chains creaked, and in a flash, the corpse of the scorpion was rolled up, and under the shackles, the void was pulled out, and it fell into the furnace and fell heavily. At the ground.

Then, the furnace went to the front again, heading for the third goal...

Chapter 3876: Bottom salary

In a short period of time, the furnace was shot again and again. At this time, there were hundreds of dead bodies of powerful and ancient creatures thrown into the furnace, but all of them had already fallen, and there was no living.

In the process, Ye Xuan always crouched in the furnace, paying close attention to everything, without any movement, but the heart is gradually fluctuating, and some excited.

Because from the direction of the hunt in the hunt, it is clearly going straight to the crack where the giant turtle is located. It will not take long before it will reach the area where the crack is located.

Presumably, Ye Xuan will definitely find the right opportunity at that time, take the opportunity to start, and rescue the giant turtle!

"Oh la la..."

The chain is abnormally sounded. This time, the total number of tens of thousands of striated chains has enough 3,000 vibrations at the same time. It is like a giant scorpion in the sky, spurting toward a hollow crack in front of the right side.

Hundreds of shots before, every time the furnace is just using a chain, but this time the chain is three times as big, even Ye Xuan is surprised, subconsciously turn around.

Then it was the heart!

It's no wonder that this time there have been so many striated chains, which is obviously for a reason, and the reason is very simple, that is, the goal of locking the furnace is completely different from the previous hundreds of times.

Although the same is a powerful wild animal, but this time, the furnace is about to hunt, but it is a wild animal that is still alive, has not fallen, turned into a corpse!

This is a green fire, and its shape is a thousand feet. The strength should be under the power of the ancients, but it is also extremely powerful.

This kind of wilderness reveals the true ontology. Obviously it is impossible to be only a few thousand feet in size, but they are squatting in the cracks of the void to recover the injury. They are in a state of dormancy, so the body does not look very large.

This green fire is burning all over the blue fireworks, transpiration, and the recovery is not ideal. Although it is not dying, it is still very weak.

It was originally in a dormant state, but it was clear that it gave birth to a certain feeling. Just after the 3,000 chains covered with mysterious striated lines rushed into the void of the void, the green fire in the dormant state Suddenly opened his eyes.

This level of absurdity, the perception is extremely amazing, and what is even more remarkable is their ability to warn of danger.

Although the green fire elephant is in a deep sleep, but it feels the crisis of life and death, there will be a big robbery, so suddenly waking up in a hurry, followed by an angry symbol, the loud noise shattered the clouds, the whole road The cracks in the space shook slightly.

Fortunately, in this space crack, only the green fire is like this ancient creature, otherwise if there is other, it will be awakened in the first time.

"Oh la la..."

In the dense rain chain, at least hundreds of chains penetrated the body of the green fire. For a time, the blue blood flows across the river, and every drop bursts with brilliant brilliance. Among them, there are cyan fireworks that are transpiration. The green fire, like every wound on the body, reflects a brilliant blue sensation.

The green fire was terrible, and the figure was struggling fiercely, but then the other chains were wrapped up, and their body shape was tied to a strong one, and they simply broke free.

After a brief confrontation, the green fire image finally fell to the bottom, his injury was too serious, and there is still a hundred-foot-long sputum wound under the belly.

The furnace is very vicious, piercing the hundreds of striated chains of the green body like the body, which is plunged from the wounds of this scorpion. Otherwise, the skin of this wild animal is rough and rough, and the chain of the furnace is Non-sharp, it is impossible to penetrate easily.

In the end, after a stalemate and entanglement, the wounded green fire became weaker and weaker. It was pierced by a skull chain that penetrated into the body from the wound below its belly... From the inside outer!

At this point, the green fire was degraded, and there was no more struggling movement. It was pulled into the furnace by the three thousand streak chains.

The whole process was extremely fast, but it was shocking and stunned. Even Ye Xuan looked at it with a glance, and the one that was repaired as a powerful green fire icon second only to the ancient power of the ancients was so degraded.

Although it was originally seriously injured and has not been restored, it can still be achieved in a short period of time, and the power of the furnace can still be seen.

However, if the headless baby body is rescued, it is absolutely easy to save the green fire. He is at the same level as the heavenly eye.

But from beginning to end, the headless baby corpse has never had any change, calm... or it's cold and it feels a little ridiculous.

This can only be a reason, that is, there is a problem with the camp of this green fire elephant. In the wild war of the past, he was not the wild animal of the headless baby body, but the hostile camp Tiandao Qingyan. That side.

From this, we can also see the ruthlessness and sorrow of Tiandao Qingyan. The wilderness of our own camp, even though the injury is too serious, how can we not treat it like this?

I want to kill this green fire directly, drag it into the furnace and turn it into a raw material for refining the evil source. It is said that the heavens are not good, and everything is a dog. This is the most true portrayal...

When the green fire elephant was put into the furnace, although there was still a breath left, it has not been broken yet, but it is already dying. If it is the wilderness of its own camp, Ye Xuan may also consider whether it is risky. The rescue is done, and the headless baby body should do the same.

However, since it is the presence of the party in the hostile camp, the natural eye is not necessary.

Ye Xuan stood by and looked still, still crouching.

The furnace, after hunting the green fire, did not have too much delay, and once again, rushed to the void in front, approaching the next hollow crack.

The time passed quickly, and the blink of an eye was three days passed. At this time, the wreckage of various ancient creatures in the furnace has reached more than 2,000, and there is still one breath, and there are only a few that have not fallen. Ten heads only.

These dozens of wild animals are obviously not the existence of the camp of headless baby corpses, because the latter has no reaction in the headless baby corpse of Ye Xuan's left chest when the latter hunted them with cruelty.

However, the mysterious force that protects Ye Xuan's body and hides all his air, but it always exists, indicating that the baby body has always been in a state of recovery, paying close attention to everything inside and outside the furnace.

In front, the crack in the virtual giant turtle is not far away. According to the current speed of the furnace, it can be reached in half a day.

Ye Xuan realized that it was time to get out of the bottom of the pot. Otherwise, after half a day, once he rescued the giant turtle, Ye Xuan must only retreat immediately after the success, so as not to alarm the heavens and blue eyes, there will be no treasures in these furnaces. Time and opportunity...

Chapter 3877: Mature time

Nowadays, there are nearly 3,000 ancient creatures in the furnace. Except for the existence of the dozens of hostile camps, the presence of the green eye is still dying, and there is still a breath, and the rest are long gone, no breath!

The atmosphere of these ancient creatures is very strong, and the weakest is also the existence of immortality. The strongest is similar to the pressure of the golden dragon and the hollow giant turtle. It should be the ancient supreme.

Ye Xuan was once in the ancestral home of the space mouse and the \*\*\*\* ant, and had seen the existence of the immortal level for a short time. For the immortal atmosphere, it can still be distinguished.

Before this evolution of the furnace, the minimum standard for the raw materials for refining the evil source liquid is the cosmic level, which is lower than the wreckage of the ancient kingdom of the cosmic level.

But this time, the ruins of the ruins of the ancient hunters, the minimum standards have been upgraded to a level, from the previous cosmic level to the current immortal level.

This point Ye Xuan sharply perceives, because at this time nearly three thousand ancient ruins in the furnace, none of them are cosmic, the lowest starting point is the universe.

Perhaps it is because the furnace itself has evolved and it has been able to condense the better quality of the evil source, but whether it is true, Ye Xuan can not be determined.

However, it can be verified by looking back, because after this hunting, once the furnace returns to the source of evil, a new round of condensing will start immediately. This will be a year later, but now it is advanced. It is also impossible to determine because the furnace itself has gained an evolutionary opportunity.

Or for some reason, let Tiandao Qingyan change the original annual condensate!

But no matter which kind, when the mound returns to the source of all evil, ending this condensing, when the product is released, there should be a result.

Regardless of the quality of the smoldering source, this time is still more than before, and no matter how the product obtained from this condensate will be distributed, or how it will be used... Ye Xuan will not let go.

I must do my best to capture it in my own hands, even if I am alarmed again!

Therefore, Ye Xuan did not intend to rob all of the treasures of the nearly 3,000 ancient creatures that existed in the furnace now. If that happens, the movement will be too big, and the heavens will be alarmed in advance.

Instead of taking it all away, it is better to just take away what you need, and the rest are left to the furnace, so that it can re-condense after returning to the source of the evil.

Anyway, Ye Xuan, the product of this condensed product, will not miss it. This is better. It is equivalent to letting the smoldering of the desolation of the desolation of the ancient sacred treasures.

After the decision, Ye Xuan even started the action.

The power of the headless baby corpse continued to continue, not only letting Ye Xuan under the pressure of the furnace, but also leaking a little bit of gas.

In the furnace, but not perceived by the furnace.

This greatly facilitated his actions, almost no elbows, smooth and incomparably in the furnace, picking the right wreckage of the ancient waste of life...

There are only about 20 treasures in the nearly three thousand ancient and supreme levels in the furnace. Ye Xuan took half of it and took one hand to Shennong Ding.

The rest are the ruins of the ancient and the ruins of the treasures, but the ancient powers that are second only to the ancient sages are not many, hundreds of them, and Ye Xuan also took half!

The remaining two thousand years are all the ruins of the ruins of the ancients and the ruins of the ancients. The weakest is also immortal, but what is the strongest, Ye Xuan does not know.

He only knows that the main level of the domain above the main level of the star, the main level of the domain above the main level, and the main level above the main level are the cosmic level, and above the universe level, it is immortal.

As for what level of status after immortality, Ye Xuan has not yet obtained relevant information.

In fact, even if there are still many big realms between the two levels of immortality and the ancient powers, Ye Xuan is completely ignorant.

From the bottom up, he only knows all the big realms from the star to the immortal, and it is broken when it reaches the immortal level.

From top to bottom, he only knows the level of the heavenly eye and the headless baby. The strongest is the ancient supreme, and the second is the ancient power. When the ancient power is broken, the ancient power is broken. What... there is no clue at all, a fog!

But it doesn't matter. With the improvement of his own cultivation, the level of contact is getting higher and higher, and there is a day to understand the whole realm system.

At the moment, the treasures of the two thousand-year-old wildernesses are repaired as the wreckage of the treasures. Ye Xuan only symbolically took away two or three hundred heads, and all others remained in the furnace.

On the one hand, the number of take-away is really not too much, otherwise it is easy to reveal the stuffing. On the other hand, he does intend to leave more raw materials, so that the product of this methane can be more.

Anyway, I have to go into my pocket anyway!

Thirteen ancient sages, more than two hundred ancient powers, more than two hundred ancient powers... The total number of ruins of the ancient and ancient spirits of nearly five hundred immortal grades... This is Ye Xuan's current Harvested!

It doesn't seem to be much compared with the existing total in the furnace, but if you change the place, the nearly 500-year-old ruins of the ancient and spiritual treasures that were cultivated above the immortal level, Ye Xuan wants to get one, they must get It depends on the opportunity.

In a sense, this time, the harvest can definitely compare with the big harvest when he went back into the furnace and stole more than two thousand drops of evil source and other subordinate products!

The key is that this time the furnace still does not notice any abnormalities. Nearly five hundred treasures of the ancient and dead spirits of the immortal level are taken away by Ye Xuan, and the interior space of the furnace is still calm and calm... It is too exciting!

The whole process did not last long, and it was only a matter of time before and after, and Ye Xuan had already completed all of this.

At this time, when the smelting furnace is going forward, the emptiness crack from the emptiness giant tortoise is close to a lot... If there is no accident, if there is no delay in the middle, the speed of the journey from the furnace will be At most two or three hours, you can arrive.

According to Ye Xuan's judgment and deduction, once approaching the vicinity of the void crack, the furnace will never let go of the empty giant tortoise, and must launch a hunting to pull the hollow giant turtle into the interior of the furnace.

It can be said that the timing of the rescue is ripe!

However, Ye Xuan's heart suddenly became hesitant. What he was entangled was... whether it was actively rescued before the stove was shot, or passively, after the hollow turtle was pulled into the interior of the furnace by the chain of the furnace, then He quietly took him to Shennong Ding and took it away...

This is really a problem!

The latter can ensure quiet, but the hollow giant turtle must be hit again, but the former... Although it can guarantee that the empty giant turtle is no longer hit by new ones, Ye Xuan has no sure grasp!

Chapter 3878: a whistle

"Oh la la..."

Just as Ye Xuan hesitated, the sound of the chains of the furnace was ringing again, approaching a hollow crack in the right front, and quickly pulled out the treasure of an immortal ancient creature.

Then, I went on again, and the void crack in the empty giant turtle was much closer!

After an hour, as the treasures of dozens of ancient creatures were pulled into the furnace by chains, the present furnace, the hollow crack in front of the empty giant turtle, is very close.

There are only three void cracks on the way, which are distributed in the left and right emptiness. That is to say, there are three more shots at the top of the furnace, and then they will reach the void crack where the giant turtle is located.

If Ye Xuan decides to take the initiative and rushes out of the smoldering furnace to rescue the emptiness giant tortoise, then it can no longer be dragged. Otherwise, the time is afraid that it will not be in the future. At most, there is still an hour, and the furnace will shoot the empty giant turtle. !

Ye Xuan bites his teeth and his body is slightly moving, so he wants to take out the furnace.

It was also at this time that his left chest suddenly came with a sense of enthusiasm. The headless baby seemed to know his thoughts and issued a warning to let Ye Xuan not act rashly.

Although there are no more tips, but for the trust in the baby body, Ye Xuan slightly frowns, no longer impulsive, stopped his body shape, still crouching in the furnace, but ready to prepare for the situation at any time .

After all, the headless baby body does not let him shoot now, but it is impossible to sit and watch the empty giant tortoise when it is really hunted by the stalking chain. When it is critical, it must have action.

After half an hour, as the treasures of the three ancient powers were dragged into the furnace, the furnace at this time was finally close to the edge of the void where the giant turtle was located!

Originally, the Void Giant Turtle has been in a dormant state because of its own weakness, but now his eyes have already been opened. Through the void crack, he is wary of watching the furnace that is slowly approaching outside the crack...

The mysterious furnace has been tossing this mysterious ancient void for three or four days. The movement is not too big. The virtual giant turtle is the existence of the ancient supreme level. Even if the state is not good, it can even be said to be extremely worrying, but if so, Not disturbed, it is too unreasonable.

As the smoldering furnace approached this emptiness crack, Ye Xuan's whole heart also mentioned the scorpion eyes in an instant!

If the smoldering furnace is too heavy, it will reveal the meaning of dragging the corpse into the furnace. He will not hesitate to shoot, even if the headless baby is warning. Do not hesitate!

"Oh la la..."

The sound of the chain was suddenly made at this moment, and the stove was shot.

This time, it was actually a tens of thousands of striated chains that squirmed at the same time. Like a thousand emptiness giants, they violently rushed in one direction, and they blinked through the cracks in the space where the emptiness giant tortoise was. With a breathtaking scent, he rushed toward the giant turtle.

This is definitely the rhythm of the dead giant tortoise.

Previously, the Mian furnace used more than one chain of chains, only 4,000. It was a strong breath, and the injury was restored to 30% or 40%.

This time, it is the tens of thousands of striated chains that move at the same time. The chilling atmosphere revealed by the vagueness is also too strong. The purpose is to kill the virtual giant turtle directly in the front of the void crack, and then Hunting dragged into the furnace... What else?

"Hey..."

It seems that the purpose of the furnace is perceived. In the void crack in front, the sound of cheerful tremors suddenly sounded through the void of the void to the outside of the ancient void.

Inserted on the back of the emptiness giant tortoise, the blade of the blade has been immersed in the flesh and blood of the turtle, and suddenly it trembles slightly. It seems to be screaming and screaming... Once the hollow giant turtle is fallen, it is killed. Then it will be relieved, although the blade is damaged, but after all, it can be unscrupulous and it is fully self-healing!

Ye Xuan's scalp is numb, and he is stunned. He sees this 10,000-way striated chain and breaks into the void crack. Without exception, all of them are smashed toward the empty giant tortoise. Each chain reveals a strong killing and killing. Killing the breath, this is absolutely a fatal blow. In the state of the virtual giant tortoise, there is a scorpion blade inserted into the body on the back, which is absolutely dead.

The Ming furnace obviously knows that this is an ancient supreme, and it is also the side of the enemy camp without heads, and it is not the ordinary ancient supreme, even in the wildest of the camp of the headless baby, it is also called The top number, the top ranks exist.

Therefore, if you don't shoot, you will never be able to take it. The means will be ironed to the extreme, and you will not leave a little bit of life for the giant turtle.

But this is by no means what Ye Xuan is willing to see. A sigh of anger has risen from his heart. At this moment, Ye Xuan will see his eyes...

"call out!"

It was also at this time that a faint whitish purple-black luxuriant sensation emerged from the part of Ye Xuan's left chest while it was hot.

The speed is almost at the extreme, and the first one arrives first. The blink of an eye rushes out of the mound, and passes through the void crack in front of the road. It has crossed the endless distance for a short time, and falls on the top of the empty giant tortoise. , a flash disappears!

"Hey!"

An earth-shattering whistling sound suddenly exploded, and the hollow crack in front of it could not withstand it, and it collapsed directly, becoming an integral part of the ancient void outside.

I don't know what it's like to smash from the corpse lamp tattoo. What is the purple-black man's glare that is not in the void? It's only a faint glimmer. If it's not Ye Xuan's own feeling, otherwise I'm afraid Not captured, but its power is so terrible.

The original hollow giant tortoise, after the faint faint purple gaze into the body, instantly became like a drug, the breath suddenly blazing, while screaming at the same time, not only directly shocked this The path of the void crack, even the handle inserted on its back, half of the magic blade that did not enter the body, was forced out by the hard and spontaneous.

"嗖", turned into a black secluded man, pierced into the far end of the ancient void, completely disappeared... The momentum that disappeared instantly disappeared, giving people a feeling of fleeing in a panic !

At the same time, the celestial blade on the back of the ruin that has suppressed its inexhaustible years has disappeared, and the atmosphere of the emptiness giant tortoise has become more and more fierce. Although the body shape has not changed, the air pressure in the body is almost a kind. The state of the geometric progression is climbing rapidly...

Moreover, just as the sound of the whistling sound of the cracks in the void has not yet fallen, the hollow giant tortoise has turned to look at the furnace.

There is an endless stream of killing and anger, but Ye Xuan clearly sees the excitement and gratification that cannot be described and described by words.

Obviously, from the flamboyant purple and black glory of the genius, the virtual giant turtle has realized the arrival of the headless baby corpse...

Chapter 3879: Inheritance of the Void Giant Turtle

With the shot of the headless baby corpse, the situation almost instantly reversed. The original hollow giant turtle was almost in a certain position, but all was changed in an instant.

All of this makes Ye Xuan stunned. He already knows that the headless baby corpse is at the same level as the Tiandao Qingyan. Even the true origin and background of the headless baby corpse have been speculated.

Even so, Ye Xuan still did not expect that the headless baby corpse could be so strong.

Just a glimpse from the corpse lamp tattoo, like a flaming faint purple-black glory, can make a respect hurt to such a degree, almost dying, the ancient sacred, instantly renewed a powerful force .....

At this moment, Ye Xuan's face is awkward. His brain is full of question marks. He doesn't understand the faint purple black and faint glory. What kind of substance is it!

However, in this regard, it is obviously impossible for him to get an answer immediately. In fact, the situation in front of him does not even allow him to entangle too much in this matter.

Because the Nether Giant tortoise looked around, its sight was in the midst of it, as if ignoring the gap between the void and the power of the furnace, it was quite different from the light of Ye Xuan... !

Yes, although there is a distant void, although one side is outside the furnace, one side is inside the furnace, and even Ye Xuan is still under the power of the headless baby. The air machine has been perfected. Concealed, but Ye Xuan has a clear and unclear moment at this moment... His dawn, at this moment, the virtual giant tortoise absolutely saw himself!

This may be because of the faint glare from the corpse lamp tattoo, and the purple-black mystery that has not entered the void giant turtle!

But whether or not it is true, for Ye Xuan, this is no longer important.

What is important is that this time, through the distant void, the audience is short-lived, and there is only one breath of interest. Ye Xuan's harvest is so great that his mind can tremble uncontrollably.

Not because of fear, but because of excitement!

A look of the eyes, Ye Xuan's mind is like an infinite number of stormy waves, bursting open in an instant, out of thin air and endless information!

In the end, all the information was gathered together in an instant, blending into a quaint tortoise shell, breaking into the sea of Ye Xuan, floating in the sky above the sea.

This tortoiseshell represents the complete inheritance of the blood of the hollow giant turtle!

At this point, Ye Xuan knows the objects hanging in the sea, and there are already nine pieces!

At the center, it is Lei Diyin and Shennong Ding!

Surrounded by Lei Di Yin and Shen Nong Ding, there are seven small objects: the spiritual source nuclear, the hollow medullary crystal, the scorpion bow, the black gold dragon scale, the ghost claw, the Taikoo little konjac, and the quaint tortoise that just entered!

These nine items, each one is not the same, the general star power strong, one can fly to the sky, and Ye Xuan can be fully owned, and this is not all he has!

From this point of view, the seven worldly enchanting worlds rumored by the outside world are all one of them... In fact, it is no accident!

At the moment, with this quaint tortoise shell condensing in the sea of Ye Xuan's knowledge, the complete inheritance of the void giant turtle, Ye Xuan finally got it, and the cave emptiness has been completed since then, Ye Xuan only cultivated with this quaint tortoise shell. As long as there is no halfway through, you will one day be able to grow into the sacred situation of the empty giant tortoise.

This is too significant for Ye Xuan.

But at this moment, he was excited, but he did not think too much about this problem, because the inheritance has already arrived, but the safety of the virtual giant turtle, this time can escape from the poison of the furnace, but Still an unknown number...

For the faint purple and black gloom that fits into the void of the giant tortoise, the furnace is obviously not noticeable. This purple and black awning is shot from Ye Xuan's left chest. If it was not at that time, the left chest was suddenly hot. Even Ye Xuan may not be able to detect its existence, and naturally there is no need to say more.

The headless baby corpse is the same level as the heavenly eye, and this ability is still there.

Ye Xuan is so big, and still inside the furnace, he is covered by some kind of mysterious power, not to mention a tiny glory like a flaming glow?

For this reason, for the sudden reversal of the virtual giant tortoise, the injury seems to have recovered a little and a half, and suddenly the scene of the dragon is alive, and the furnace is obviously amazed.

It has given birth to a preliminary self-awareness. It is like giving birth to a spirit. It has a certain amount of thinking ability, but it is not very mature. Now the scene that happened before it is different from the expectation, the furnace is obviously a bit awkward, Ye Xuan Obviously, the tens of thousands of striated chains were originally very agile and swift, and suddenly there was a complete lag.

"Oh la la..."

But then, the sound of the chain's abnormal sound was once again a big hit. After all, the furnace still didn't close, and the tens of thousands of striated chains remained the same, like the numerous giants in the sky, screaming toward the giant turtle.

"Hey..."

The giant tortoise whistling, a horrible temperament from the inside of the body, without fear, directly greeted the tens of thousands of rhythm chains.

The virtual giant turtle is going to be hard.

Already angry!

Think about it too, he is the existence of the ancient level of supreme, after all, and in the many wilderness supreme in the camp of the headless baby corpse, it belongs to the top, ranking top.

Although he did not participate in the war, there must be secrets and tasks that are unfolding in the dark.

The result is still seriously injured, wrapped in the outer devil's blade of the heavenly devil, inserted into the back of the spine, a consumption is hundreds of millions of years, never recovered, and even the state is getting worse.

Nowadays, because of the secret help of the old headless baby corpse, the virtual giant tortoise breaks away from the tens of thousands of years of the magical blade, shakes it out of the body, and stuns away. This kind of exciting moment has a furnace. Rushing forward, want to hunt him as a prey...

How can I hold this bad breath with the cold arrogance of the \*\*\*\* giant tortoise?

A terrible battle is already in sight. If there is no accident, it will come soon!

"Booming..."

"Card!"

It was also at this moment, above the emptiness of the sky, a large black robber cloud suddenly appeared without warning. When the robber cloud appeared, the void would explode a black lightning, and the sky seemed to be Opened in general, issued a fine card squeaky squeaky squeak.

Ye Xuan's heart suddenly jumped, and an extremely bad feeling suddenly appeared at this moment.

Subconsciously, he turned to the direction of the thunder and lightning, and then looked changed.

With only one glance, he felt a very familiar atmosphere. This breath is clearly a precursor to the coming of the heavenly eye, and everything that happened in this void has finally alerted the existence of the horror...

#### Chapter 3880: Evacuation

Tiandao Qingyan was alarmed, and consciousness has locked this mysterious void, and it is about to come. The situation is at a critical moment!

Once the heavens and blue eyes are coming, not only the empty giant tortoises are very likely to fall, but he is only a deserted supreme, and now the injury is only restored to two or three percent. The difference is too far, and there is no way to stop the attack of the heavenly eye, even the latter. The current state is also seriously injured.

In addition, even Ye Xuan and the headless baby corpse will also be discovered. The mysterious protection ability of the headless baby corpse can be won by the furnace, but it must not be the same as the heavenly eye. The two are originally the same level of existence. The battle of the ancient world, each of the two hostile camp commanders.

Even in that battle, the camp of Tiandao Qingyan was very likely to be the winner, even if it was a disastrous victory, but it still won.

At least, Tiandao Qingyan was only seriously injured and crouched, with his camp, and the entire era of the wild, withdrew from the magnificent stage of the years.

However, the headless baby corpse is clearly degraded, and the baby is degraded. If it is not a coincidence of accident, there is no chance to live out of this second world.

From a certain point of view, the headless baby corpse is actually slightly weaker than the heavenly eye.

Under this circumstance, how can the mysterious protection of the headless baby corpse be able to survive the heavens and blue eyes?

"Hey!"

At this moment, after sensing that Tiandao Qingyan is about to come, the headless baby body will not hesitate any more, and will immediately scream out, and the purple and black mans in the furnace will be made, but Ye Xuan's figure is not revealed. Wrapped in the purple radiance of the awning to the extreme.

With a bang, he rushed out of the furnace, and the hollow giant tortoise in front of the void directly landed on its huge back.

In the next moment, the purple and black rays made a big splash, and they split into a purple-black knives. Under one squat, they opened a crack in the void, which is clearly the rhythm to escape immediately.

However, the accident is that after the void crack was opened, the purple-black sorrow suddenly differentiated again, and the black thundercloud was blasted straight into the distant sky. Ye Xuan was at this moment. I feel that the left chest is chilling, and the original feeling of enthusiasm is only warm. It seems that this blow has made the headless baby corpse weak.

"Hey!"

The hollow giant turtle raised his hair and made a fierce shout, and the head did not return. He directly plunged into the hollow crack beside him, but Ye Xuan's figure was not brought in, but in the left chest. Under the traction of the headless baby corpse, he set off and left the back of the hollow giant tortoise.

In the blink of an eye, the giant tortoise disappeared into the crack, and the strong purple and black rays of Ye Xuan were flashed again, smoothing the void, masking all the breath of the void crack, the whereabouts of the hollow giant turtle, and no more from then on. Beads can follow...

Ye Xuanfu went to the soul and realized what he should be at the moment.

The reason why the headless baby corpse stayed was to help the virtual giant to escape. Although the latter itself has the ability to tear the void and see it, how can it escape the pursuit of the heavenly eye?

However, the headless baby corpse is different. The hollow crack that he used to tear the sorcerer is extremely unique. After the hollow giant turtle is sent away, once the emptiness is emptied, all traces can be erased, which is the same level of heaven and earth, also chasing If you can't find any traces of the beads, the subsequent pursuit will naturally be impossible.

At the moment, the virtual giant turtle is already safe, but it is Ye Xuan and the headless baby corpse, but it is getting closer and closer.

Headless baby corpse or capable of fighting the same unrecoverable Heavenly Eyes, but if so, Ye Xuan must be exposed. At that time, Tiandao Qingyan may not be able to recover the whereabouts of the headless baby afterwards, but find Ye Xuan. But it is too simple.

In any case, Ye Xuan can't meet with it, otherwise it will endlessly endure.

After all, Ye Xuan's face in the ancient cages was just a glimpse of the will of Tiandao Qingyan. The ability to push is limited. Although I have seen Ye Xuan, I have derived more different information, but the real heaven and green eyes. The body is different.

It is too dangerous to face up, and will be passive.

Fortunately, Ye Xuan has already prepared for the evacuation at any time. At the first time, he has released the level-level interplanetary coordinate jumping ability to the body's engulfing system. This is also a right and a try, because this ancient void is obviously not in the third. In the big plane, it is a void outside the domain.

Ye Xuan has not activated the interstellar coordinate jump ability in the virtual air outside the three major planes. I wonder if it will succeed!

"call out!"

Fortunately, the familiar sound of the transmission of the empty air still appeared. In the first half of the emptiness of the distant sky, Ye Xuan's body shape disappeared completely, and together with the awning blue color that protected his whole body, disappeared together.

And the way of disappearing is extremely strange, and there are no traces left. From this point of view, the ability of the phagocytic system in this respect is simply a bad day...

"boom!"

"Card!"

The huge thunder sounded again, followed by a crisp, lightning-fast sound. The black robbery area finally broke a huge seam in the void. The black robber clouds were automatically separated, and the crack appeared in the robbery cloud. In the center, a cyan giant eye shows a corner and is opening.

"call out!"

It was at this time that the headless baby corpse was rushing to the emptiness of the purple and black glamour before leaving with Ye Xuan. It was also coming, the speed was so fast that it was directly plunged into the robbery cloud. Among the cracks in the void that had just cracked in the center, they rushed to the sky and pointed to the blue eyes that were opening.

"Hey..."

The next moment, the sound of a terrifying noise, from this crack in the void, the Scorpio will be shattered, revealing the sorrowful resentment of the soul!

Then there is the endless roar of the roaring sound, the infinite clouds on the outside of the crack, and the explosion!

A shot of the headless baby corpse Although the sneak attack was successful, Tiandao Qingyan was hit, but apparently there was no big bang, but it prevented him from coming this time, and the void crack was slowly closing.

As these thunder and thunder blasted, the entire vast expanse of the ancient void seemed to have been implicated, and a large number of void cracks were shattered, which were originally connected to the ancient void of this corner, but at the moment, A lot of cracks have been blurred and are going away...

Eventually disappeared, it is clear that this is actually one of the purposes of the headless baby corpse, completely cut off hundreds of thousands of cracks and the solid connection channel of the ancient void that this corner has been discovered by the heavenly eye!

"Oh la la..."

"Hey!"

The abnormal sound of the chain was once again slammed, and the furnace was also anxious. The original all around was all large and small void cracks, and there were one or two wild creatures, or the wreckage.

But nowadays, the vast majority of the void cracks have been cut off and the solid connection has disappeared. In its case, this is simply the prey of the hand, and the rhythm of the whole run in the eye...
