

Super D. S 3891

Chapter 3891: Reward the whole army

The reason why Ye Xuan hides in the mountainside of the central volcano to carry out all this, the defense is this group of indigenous people who have long been turned into the source of food and food.

Since this time, millions of indigenous beasts have gathered around the long edge of the volcano on the central volcano almost every day, lining up barbecue.

That is to say, in the past two days, because the flesh and blood resources stored in their hands have almost been exhausted, the magnificent scene of the millions of fierce beasts at the edge of the volcano at the same time has gradually disappeared.

Although there are various spirits and poultry beasts in the rolling hills of Shennong Ding's internal space, on the one hand, it is supported by Ye Xuan, and it has to be used for refining medicine in the future. It is not the trophies stored in the hands of the indigenous beasts, so it is not good. Start with the scourge.

On the other hand, it is because these spirits and poultry have not yet grown up, and the energy in flesh and blood is not rich. Even if it is baked with the fire of Shennong four-color flame, at most it is to satisfy the appetite. However, the effect on the flesh and the evolution of life forms is not great.

Therefore, these spiritual birds and spirits in the inner mountains of Shennong Ding escaped a disaster.

Although it is only a short period of two days, the two days are almost as old as the foodies who have been raised in the mouth. If they do not know, they will not know the closed caves deep in the bottom of the volcano in the central area. Inside, Ye Xuan also stores a large number of top flesh...

I am afraid that I have already put on the idea over there, and it is very likely that the two savage beasts of the Taikoo Porcupine and the Taikoo tortoise will take the lead in stealing... just like the Xuanyuan Zizhen that had been plagued by the space in the Dingnai space. Like a hoe!

Of course, Ye Xuan has already been reinforced in these closed caves at the bottom of the volcano in the central domain, and he has also set up a heavy ban with the help of Shennong Ding's domain.

Even the ancient porcupines of the Taikoo Porcupine and the Taikoo tortoises have taken the lead, and there is basically no possibility of success!

After eating a long and wise, Ye Xuan had already been smothered by Xuanyuan Ziyan once, and naturally it is impossible to make the same mistake again.

However, he still had a glimpse of the gang of food, and after two days of ruin, the guys had already been hungry and their eyes were green.

At this moment, Ye Xuan hides in the mountainous volcano of the central volcano and starts to smelt the refining hand, but the venom of the nine-headed bird is cooked and continues to smelt the scent produced by the volcanic crater. Out, the entire vast space inside the Ding has long been a scent, and millions of heads of food have been smelled and immediately excited.

One by one, just like a chicken, and screaming, without exception, all flocked...

"Roar!"

"Good fragrance! Unprecedented scent, the pig is willing to bet, this time it is absolutely a cosmic treasure in the universe..."

"Which guy is doing? Actually hiding a person eating a single food, this turtle is very angry, the consequences are very serious!"

"The scent seems to have floated out from under the crater. I smashed it out and took out the guy who was hiding under the barbecue and eating it. The murderous, smashed a cosmic-level flesh-and-blood treasure, dare not respect the pig and the turtle. Yeah, that's not something!"

"Hey..."

Millions of indigenous beasts, all rushing out of the surrounding mountains, gathered around the vast volcanic crater of the central volcano, squatting and looking around the bottom of the crater.

This scene is really strange and inexplicable, and he is shocked to see that Ye Xuan is stunned. He was concentrating on the remains of the nine-headed bird of the quasi-aged ancient energy level hanging in front of him. They have been refined to a volume of only about three thousand feet.

Although it still has not reached the level of Bao Xuebao's meat-stained pulp, at least six thousand feet of flesh and blood treasures have been doubled, and the initial refining and so on are half completed.

It's a pity that all this is still a waste of work!

As the original mind was disturbed, Ye Xuan was slightly distracted. The Shennong four-color flame, which was almost controlled by the micro-man, was suddenly unstable. Although he was alert in an instant, it was already late, short. The half-instantaneous, less than three thousand feet of the nine-headed bird flesh and blood treasures due to the refining, about one-tenth of the blink of an eye was baked into a blackened piece.

"It's a mess, hurry to turn off the fire..."

"Oh, this is already cooked, you are still there, what God is there? Hurry and withdraw the fire, screw the big guy up, the turtle has been hungry for a few days!"

"Oh... it's so sweet, if you don't come up, the pig will jump!"

I did not wait for Ye Xuan to return to the north, at the northern edge of the volcano on the far side of the head, the roar of the two kings of the ancient porcupine and the Taikoo tortoise had already passed.

Seeing that Ye Xuan will bake a large oyster meat of about 300 feet into coke, these two guys are more anxious than him. At this moment, they are jumping at the edge of the central volcano north, if there is a large amount of floating in the volcanic mountain Shennong four-color flame, but also extremely dense, afraid that it is long before the face squats and jumps straight down.

In addition to the Taikoo Porcupine and the Taikoo tortoise, there are dozens of star lords and more than 100 indigenous beasts of the great level.

These guys didn't dare to yell at Ye Xuan, but all of them were all green, their mouths squatting, staring at the inside of the volcanic hill below, and from time to time there was a faint snoring... ..

"Rely! This little master is remembered by the thief..."

Looking at the front of the squat, because it was scorched by a tenth, and thus has been refining the nine-headed flesh and blood treasure, Ye Xuan at this moment is simply crying.

Fortunately, this is just his first refining hand. He can successfully condense the hexagram of the hexagram of the nine-headed bird into a size of only three thousand feet and complete half of the initial process. The progress has exceeded the original expectations of Ye Xuan.

Therefore, although this first refining of the refining team eventually failed, Ye Xuan was not too disappointed.

At least, the flesh and blood of this nine-headed bird is precious, but there are more than two hundred and eighty of the flesh and blood treasures that Ye Xuan can bring to the similar immortal level.

Just losing one is nothing at all!

What's more, although the flesh-and-blood treasure of the nine-headed bird has been refining, nearly 90% of the parts are golden and oily. It can be said that the fragrance is attacking people, and it is used as a meat-flavored belly, not only to satisfy the desire of the tongue, but also to Promote the evolution of the body, even if it is not wasted!

I thought about it, and Ye Xuan's mood changed again. Between the movements, the three-headed nine-headed flesh-and-blood treasure spurred toward the crater above the head.

He decided, and then refining, as for the resurgence of the flesh and blood treasure, throw it out to the gangs to solve the problem, the right to reward the whole army...

"Hey!"

"Hurry up, hurry up..."

"Hey, this pig can't hold it anymore, it's so sweet, it's so delicious!"

A group of foodies, completely boiling...

Chapter 3892: Hot iron

"Hey!"

"Hurry up, hurry up..."

"Hey, this pig can't hold it anymore, it's so sweet, it's so delicious!"

Seeing Ye Xuan waved down the volcano's belly, he immediately threw the scent of flesh and blood, which was full of fragrance and golden oil, and smashed around the crater above, all looking down. A large group of foodies suddenly boiled up.

Crazy, screaming...

It was too noisy, and Ye Xuan wrinkled his head and wrinkled his head. As he went on, he couldn't concentrate on refining his hand.

Just as he was preparing to scream, he was just a noisy upper crater, and his eyes suddenly became dead and looked up. All the indigenous beasts were gone.

The crater of the central volcano is too horrible. Millions of indigenous beasts have just squatted on the edge and did not cover the perimeter of the crater, but now they can't see it.

As the huge nine-headed flesh-and-blood treasure was taken away by the Taikoo Porcupine and the Taikoo tortoise, the whole food-eater group had all gone, and it was faster than when it was.

In the blink of an eye, half of the shadows of the beast can't be seen.

The flesh-and-blood treasure of the nine-headed bird is still three thousand feet in size, and it is still a powerful and desolate creature of the quasi-aged ancient energy level. Its flesh and blood originally contained powerful energy, and it was baked by the Shennong four-color flame. After the follow-up of Ye Xuan, the energy contained in the flesh and blood is more intense.

Even the Taikoo Porcupine and the Taikoo tortoise in the domain of the main territory, it is impossible to open the belly and eat like the **** treasures of the previous ones.

So, don't look at a glimpse of only three thousand feet, but the number of indigenous beasts that can be eaten is quite large. Except for the Taikoo Porcupine and the Taikoo tortoise, the dozens of star owners and more than one hundred Indigenous beasts of the genius level should be shared.

As for the other number of indigenous beasts below the Qiankun border, even if there is no such blessing to eat the meat, it is okay to watch the smell on the side.

Maybe when the last bones are smashed, one or two pieces of treasured meat can be hooked from the bones...

In a word, as the nine-headed bird shines brightly, the scented flesh-and-blood treasures are taken away, and all the millions of indigenous beasts that originally swarmed, without exception, all took the light. Ye Xuan sighed with a sigh of relief, and finally he was cleaned again, and he can continue to curb the treasures for refining!

After adjusting the mood again, Ye Xuan's thoughts removed the second flesh-and-blood treasure from the closed cave at the bottom of the volcano in the central domain, which is still the quasi-ageless level.

This time, he was picked by a one-horned whistling tiger. The whole body was white and jade, and the brilliance of the brilliance. Although it has been degraded for a long time, the energy in the body is still

not scattered. The golden tiger blood has never dried up. Inside a wound in the right hind limb, it is clear!

"call....."

In the middle of a wave, the Shennong four-color flame that had just been removed was once again mastered, and the body of this one-horned whistle was directly wrapped up. The new round of roasting and smelting began...

The fur of the one-horned scorpion tiger was quickly refining, revealing the golden skin, gradually being grilled and matured, and the oil and dew were all with a sacred atmosphere, and the energy was full.

When the body of the body is completely cooked, there are only about seven thousand feet left, and everything else is abandoned as a dross.

But this is still only the beginning. Ye Xuan takes a deep breath and fixes the mind. He will continue to start. According to the steps of smelting blood and meat, he will carry out preliminary condensing. The goal is to thoroughly refine the huge body of about seven thousand feet. When it finally reaches the level of Bao Xue Bao's meat-stained pulp, the **** meat that can be reached is estimated to be only a small amount!

Six thousand feet!

Five thousand feet!

Until the end more than two thousand feet...

This time, Ye Xuan went farther than when he smelt the horrible body of the nine-headed bird. The giant horned scorpion tiger was only about 2,667 liters, but it appeared at this time. An accident.

The Shennong four-color flame, which has been carefully controlled, has only shook a little. The original control was broken, and the temperature suddenly soared. The right hind limb, which has been reduced many times, was scorched.

Defeat!

However, Ye Xuan's self-confidence is more powerful. He has a strong feeling. The third time he will be successful.

If the first and second time before is only a refining hand, then after these two refining hands, Ye Xuan has finally mastered some embarrassment. For the third time, he is sure that he will have a quasi-desert. The treasure of the will, thoroughly smelt to the extent of Bao Xue Bao meat pulp!

"call out!"

The sound of breaking the air, the flesh-and-blood treasure of the one-of-a-kind singer, which has been refining, was thrown directly to the crater above the head by Ye Xuan as if it was thrown garbage. It is not that he does not commit blasphemy. The powerful **** treasure meat contains too much flesh and blood extract, and eating a piece of meat has a strong nourishing effect on the flesh.

But Ye Xuan now simply can't take care of the big meal, and the two refining hands have made him quite experienced. At this time, it is the best time to complete the flesh and blood of this initial stage.

It's the meaning of hot iron!

"Hey!"

"Hey..."

As the flesh-and-blood treasure of this singularly screaming tiger was thrown up, a little further away from the volcanic mountain pass of the central area of the head, it immediately sounded a scream of fierce beasts, showing madness and incomparable joy.

Apparently the outside foodies found the one-horned scorpion that was thrown out.

If the previous nine-headed bird is estimated to be only enough for the hundreds of indigenous beasts above the level of the genius, then the flesh-and-blood treasure of the singularly singularly There will be many more in the indigenous beasts and groups to follow.

The one-horned scorpion tiger, which is close to three thousand feet, is not too big, but the **** and precious treasures of this quasi-ageless ancient energy level are too weak to be eaten at all, and a fierce beast is divided into big hands. A handful of them is enough for them to refine for a long time...

Ye Xuan did not pay attention to all this. After throwing out the flesh-and-blood treasure of the singularly singularly, the first time he took out the third flesh-and-blood treasure to be refined, which is still the repair of the ancient power level. For strength, this time, it is a blue-red bird that looks like a phoenix. It should belong to a different kind of species. The breath in the body is very strong, but unfortunately it is still fallen.

"call....."

Shennong four-color flame was once again pulled over. This time, Ye Xuan has a feeling of light and familiar roads. The movements are flowing, there is no delay or hesitation, and he is equally comfortable in the micro-manipulation of Shennong four-color flame.

This makes Ye Xuan heart happy, he has a very strong feeling, this time, you can certainly smelt the flesh and blood of this phoenix bird to the extent of Bao Xuebao meat pulp...

Chapter 3893: Baoxuebao meat pulp

The flesh-and-blood treasure of this phoenix bird is not huge. It has not reached the height of a thousand feet. It is only about three thousand feet. When all the feathers and feathers have faded, the whole body of flesh and blood is all cooked and matured. It is only two thousand feet in size.

Ye Xuan controls the Shennong four-color flame to enter the micro-level refining. In just ten minutes or so, the flesh-and-blood treasure of the phoenix bird is once again reduced by half, only about a thousand feet.

This represents the deep refining process of this time, which has been completed in half.

Ye Xuan's heart is not as excited as the previous two times, and his mood is still calm, just like Gujing has no waves.

The Shennong four-color flame is in his hands like the most sophisticated scalpel, and an inch-inch flame seedling is integrated into the flesh and blood cells of this phoenix bird.

Time passed slowly, and an hour passed. After he spent only ten minutes, the size of the phoenix bird was reduced by a thousand feet. But now, when an hour passes, the original body shape is reduced to about a hundred feet. Only.

It seems that although this latter time only makes it condense 900 feet, in fact, the more progress is made, the slower the progress of the tempering. As long as there is no mistake, this time of meditation should be successful.

Ye Xuan suppressed the joy of his heart, continued to practice, and his heart was still moving. The Shennong four-color flame, which is wrapped in the blood of the phoenix bird, has always maintained a stable and indifferent state, and has not wavered or changed.

After a small half day, the flesh-and-blood treasure of the phoenix bird has condensed to only three feet.

The three thousand feet of the behemoth, in the continuous stability and stability of Ye Xuan, actually turned into a three-footer size, shrinking a thousand times, this is absolutely horrible, the whole flesh and blood treasure is not known to be burned by Ye Xuan with the Shennong four-color flame. How much dross and energy, the remaining fusion is the essence of the essence!

However, this is still not finished. The phoenix bird with a diameter of only about three feet still maintains its original physical form. After all, it is a powerful existence of the quasi-ageless ancient power level, even if it is the magical fire of the four-color flame of Shennong. After burning, the body shape is also reduced overall, the order chain in the body is still stable, does not collapse, so that the treasure is deformed, the power is no longer!

The ultimate goal of Ye Xuan is to completely refine it. The shape of the phoenix bird can no longer exist. All the treasured blood meat can no longer exist. It must be integrated into a common form of serousness. It is the purest essence of energy, the basic medicine for flesh and blood!

The smelting is still going on. When it has condensed to the flesh-and-blood treasure of the phoenix bird, which is only three feet in size, it has only become a size, but it still maintains its original appearance, with flesh and blood, only three thousand times smaller. It looks like a mini version of the phoenix phoenix bird, Ye Xuan suddenly suddenly a little worried.

If at the end of the day, this phoenix bird always maintains its original appearance, and the flesh and blood cannot be turned into a medicine. Then this time, the tempering is obviously a failure.

And this failure is not a problem in Ye Xuan's refining process. If that is the case, the body shape of the phoenix bird will not always keep shrinking. This process appears, but its shape has not changed qualitatively, and flesh and blood cannot be changed. For the medicine, the only reason is that the level of fireworks used for cooking is not enough, and it is impossible to melt the order chain in the flesh and blood of the phoenix bird, break it and fuse it!

If that's the case, it's just a bad injury. Ye Xuan's efforts are useless, unless the Shennong flame grows to the five-color flame, and when the power can be upgraded again, it is possible to break the deadlock.

However, the growth of Shennong's flames is not fixed. Although it has grown three times, it has changed from the original one-color flame to the current four-color flame. In general, these three times can only be a coincidence, not fixed. The law can be found.

Ghost knows when it can raise the fireworks rank again and grow to the five-color flame?

Thinking of this, Ye Xuan's heart could not help but be anxious, but he was quickly alert. In any case, the flesh-and-blood treasure of this phoenix bird is now only the size of the sacred, and this time the smelting will be carried out until the end, even if not Success, at least it proves that the power of the four-color flame is not enough.

Otherwise, if it is wrong now, even if it is just to verify this, I am afraid that I will continue to carry out a new practice.

Ye Xuan will slightly calm down the impetuous state of mind, continue to condense and practice, and it is a small half-day past, only this body has been reduced to the diameter of the phoenix bird condensed again, only the diameter of the rice is changed, surprise Shrinking is coming.

"Oh la la..."

The dense and fragile sound of the faintly screaming in the four-color flame of the awning Shennong in front of Ye Xuan has kept the original shape of the phoenix bird from the beginning to the end. From this moment on, the body finally melts and sees again. Not the form of its birds.

These dense and rainy faint sounds are the movements caused by the complete tearing of the order chain in every inch of his body.

At this time, the phoenix bird has turned into a ball, revealing a red-red awn, a sphere that appears in the form of a slurry, and its diameter is also condensed by the diameter of the previous moment, and it becomes only a ruler. size!

It seems as if the order chain in its flesh and blood collapsed completely, and the moment of disappearance of the form, in this blue-red slurry ball, a tiny flesh-and-blood black hole appeared, which collapsed in general...

At this point, this time the refining was finally completed. A giant phoenix bird with a specific size of three thousand feet was finally smashed into a cyan red, only a diameter of the slurry ball.

Only then can you see how terrible the energy contained in this slurry ball is.

And this is only the first step in smelting big flesh and blood medicine. Ye Xuan now only gets semi-finished products, which is not really a big flesh and blood!

The real flesh and blood medicine will be based on these flesh and blood medicines, and then add various rare materials and resources such as Tiandi Dibao, and then mix them again and again.

This process, still need Ye Xuan to explore and deduct. After all, the 16-level liquid has never been prepared, and Ye Xuan has to work hard, there are still many.

"call out!"

"call out....."

In the mind, this group of diameters, exudes the blood and flesh of Qi Baohui, was easily divided into a hundred copies by Ye Xuan with the four-color flame of Shennong, suspended in the void in front of him, dazzling.

After removing the Shennong four-color flame, Ye Xuan took out a hundred storage boxes made of chalcedony crystal from the immortal world. Then, with a wave of hands, this hundred-yellow-sized crimson flesh pulp was respectively Loaded into a chalcedony crystal box.

In the end, Ye Xuan waved his hand and put the hundred chalcedony crystal boxes into the immortal world.

At this point, the refining of flesh and blood medicine is finally completed in half, and the follow-up Ye Xuan will use the preparation of these red and red flesh pulps to develop the second half, step by step.

He believes that there are a hundred chances to not mention the seventeen-level liquid, but at least sixteen-level liquid can still be fully prepared...

Chapter 3894: Eat the goods to retreat

The basic medicine used to prepare the big flesh and blood medicine has finally been refined. It can be said that the preparation of flesh and blood medicine has been completed.

Next, what Ye Xuan needs to do is to use these crimson flesh pulp as the basic liquid, and add all kinds of rare heavenly treasures needed to push the sixteen-level liquid inward, and then groping again and again. A stable and mature 16-stage liquid is prepared.

Obviously, this process is not likely to be successful at one time. There is no experience of the predecessors for reference and reference.

Moreover, in the preparation process of the first-grade to fifteen-grade liquid, although it has an extremely overbearing effect of ensuring success, even if the formula is incomplete, it can complement some of the defects, and the preparation of the gene solution is finally successful.

But that's just the situation before the 16th grade liquid.

The sixteen-level liquid can make the star-studded strongman who is the perfection of the nine-step of Qiankun, and enters the star's main territory in one fell swoop. This kind of efficacy is absolutely out of the sky.

Throughout the ages, how many Qiankun can be trapped in this step for the rest of his life, and must not break through?

Therefore, although the source of all evil sources is the top resource, but the beginning of the sixteen-level liquid, in the case of incomplete and imperfect formula, although the addition of the all-cause source liquid will still have the complement of the formula, thus ensuring the success rate. But the extent of this effect must be weakened too much.

From this point of view, even if Ye Xuan has successfully obtained the basic pulp needed to prepare a large flesh and blood medicine, it is still a long way to go if he wants to formulate a 16-stage liquid.

However, a whole hundred flesh and blood pulp represents a hundred times of deployment opportunities, Ye Xuan is confident to get the 16th grade liquid!

Originally, it can be directly launched now, but after some indulgence and trade-offs, Ye Xuan still gave up after all, and it is reasonable to hit the iron, but it is also appropriate.

Just now, I tried to smash the flesh and blood pulp three times in succession, especially the last time I finally succeeded. Ye Xuan's spirit is highly concentrated, and it is still continuous. In the short half of the day, he has already spent too much. The strength of the heart, and then continue the second half of the promotion and deployment, not the best time!

After adjusting his mood, Ye Xuan squatted and rushed out from the mountain volcano of the central volcano. He came out of the crater, and his feet fell to the edge of a plain not far from the crater.

Looking around, on the vast plains ahead, dense and dense are all indigenous beasts.

There is a small part of it, about a few hundred thousand or so, as if drunk, and fell asleep.

And the other millions of indigenous beasts are gathered around, watching a few of the companions who just fell asleep, their faces are full of envious look, and some guys' mouths are not yet dry.

In the other direction, the skeleton of the nine-headed bird and the one-horned scorpion tiger is being smashed by some indigenous beasts. It is clear that there is no meat, but these beasts are still happy, and there are still queues behind. It seems that every fierce beast can only squat for a while. After the dry addiction, you have to give up the position and let the back follow.

Ye Xuan's hairy bones in this scene are so stunned. If this continues, the vicious beasts in the back are the two skeletons, or the slobber of the guy in front?

This problem he did not dare to continue to think deeply, too horrified, the back has been aversion to the cold, the scalp is also numb.

Sure enough, it is a food group, this taste is not really heavy!

"Bad boy, this pig is going to be closed!"

"Yes, this turtle is the same. This time I eat a little bit. This turtle has a feeling that it seems to break through, and it is still a breakthrough in the realm of the world."

In the meantime, the voices of the Taikoo Porcupine and the Taikoo tortoise passed over, and it was obviously abnormal. Ye Xuan turned around and found that the two guys were flushed, walking was rickety, and the dozens The indigenous beasts who have fallen asleep and fell asleep have a virtue, as if they are drinking too much, and they feel drunk.

It's not just them, including the dozens of star lords and more than a hundred indigenous beasts of the genius level, all of them, some of them have been unable to hold on, and other low-level murderers. Like the beasts, they fell asleep on the ground.

Although it seems to be drinking too much, in fact, from their body, there is a very strong energy atmosphere that is stirring, especially the Taikoo Porcupine and the Taikoo tortoise, and the dozens of star owners, the body. The energy is stirring too much, and there is already some feeling of being untenable.

The pores of the body are all shining outward, and it looks like it is like a rising fairy!

This is clearly because I have eaten a lot of nine birds and the one-horned singer.

That is the supreme existence of the quasi-ageless ancient power level. Even for the Taikoo Porcupine and the Taikoo tortoise, which are cultivated in the domain of the realm, it is no different from the immortal medicine, that is, they cannot eat too much. Even so, there is something that can't be resisted now, and repairing for strength will soon break through.

If you eat meat and get drunk, it is estimated that there are no one besides these eatery beasts.

Ye Xuan turned his eyes straight, but his heart was very happy.

The Taikoo Porcupine and the Taikoo tortoise were originally the cultivation of the domain in the later period. In the recent period, Shennong Ding's four-color flame was used to roast the blood of the blood. The accumulation of the body was almost the same, and now it has eaten. A lot of **** and precious treasures of the quasi-ageless and powerful powers are equivalent to a powerful drug.

In this case, it led to the breakthrough they made, and finally came...

If there is no accident, this time after the retreat, the Taikoo Porcupine and the Taikoo tortoise will go further, from the current domain to the main territory, and become a two powerful lord!

If this is the case, then Ye Xuan will finally have two masters who are considered to be the power of the team. This is absolutely extraordinary and can make him multiply.

In addition, the indigenous beasts of the dozens of stars in the main territory, this time, the ancient wilderness of the blood of the blood is obviously a lot of meat, these guys have to retreat now, and among them, there must be some Existence will break through the barriers of the big realm in one fell swoop. After all, there are already some indigenous beasts, and now it is the late stage of the star.

Even if only one-third breaks through, then Ye Xuan will produce more than ten new domain owners.

In addition to them, there are hundreds of indigenous beasts of the Great Power level, and some can have some of them to enter the star territory.

Further down, there are hundreds of thousands of indigenous beasts below the Qiankun border. Among them, perhaps some great powers can be born...

In this way, the strength of the entire indigenous fierce beast group is simply a level of leaps and bounds. This is amazing. It is definitely an unexpected surprise. Ye Xuan is excited to straighten his hands.

If the other millions have not benefited from this time, the bottom of the vicious beasts who have tasted the treasures of Baobao are too weak to be able to resist the terror energy contained in the blood of the ancient blood. Ye Xuan can't wait to throw a few more to bake it out now, so that all the indigenous beasts are upgraded to...

Chapter 3895: Yangmou

With the Taikoo Porcupine and the Taikoo tortoise carrying a group of high-ranking indigenous beasts, a collective retreat was launched. Ye Xuan was also boring in Shennong Ding. After throwing some cultivation resources to the Eight King Kong, he went to the bottom of the central volcano. The cage of the mountain wall looked at the lion Wanjin who had become his slave.

This guy is still sleeping, but the state is already much better. There is a breath of energy fluctuations in the body. It seems that it is very possible to restore a little strength, but the Doji has already been taken, even if it is restored, don't want to go back. The previous state of prosperity.

Even if there is hope, everything has to start again!

Later, Ye Xuan leaped up and flew into the sky, rushing out from the Dingkou of Shennong Ding with a colorful mist, and his body appeared in the black hole of life outside!

Calculating the time, it was nearly three days since Ye Xuan left the furnace and returned to the black hole after the retreat.

The harvest of these three days is not too big, it is shocking.

He not only rebuilt the ancient shackles, but also made the practice of the martial arts synchronise with the **** realm of the flesh, and thus promoted the two levels of the flesh and blood.

Nowadays, the practice of the caves and the ancients has been repaired, and the **** realm of the flesh has been repaired. All of them have reached the seventh order of the universe, and then there are two small steps to break through, and they can use the fifteen-level liquid. Entering the fifteenth world, it has become a real power.

In addition, the basic syrup required for the subsequent sixteen-stage liquid preparation was successfully smelted this time.

The sixteenth grade liquid has been a big problem that has been lingering in Ye Xuan's heart for a while, so that he can't always put it down, but now the problem has been solved in half, and Ye Xuan has been a lot easier.

Finally, there are also high-ranking fierce beasts led by the two savage beasts of the Taikoo Porcupine and the Taikoo tortoise. This time, they have also achieved a lot of goodwill and have reopened.

I believe that when they are closed, the overall strength of the entire indigenous beasts will surely leap to a level. This is the true team strength of Ye Xuan in the hands of the Triumph, and his significance is absolutely extraordinary.

All of the above is enough for him to be inexplicable, but the most exciting thing is the hands and feet of the headless baby in the darkness of the furnace. When I think of the heavyweight class that is the same level as Shennong Ding, it will soon be Belong to myself, Ye Xuan feels that the whole person is floating up!

"In addition to the furnace, including the products in the furnace, that is, every drop of the evil source in the future, is a master of the Lord, and must not be taken away..."

"Well, the Mouth Furnace and Shennong Ding are the same level of ancient weapons. The evil source liquid stored in the furnace is basically no possibility of being taken away by tough means."

In the muttering, Ye Xuan's flashed a touch of fine mans, thoughtfully: "However, the high-end combat power of the enemy camps that need to be fed must be guarded. In any case, you must break the furnace to them. Channels for the transmission of all evil sources! Those streak chains must be destroyed..."

One thought of this, Ye Xuan did not stop, waved Shennong Ding into the immortal world, and then waved to break the virtual shuttle, step into it, opened the hidden array method, lasing away, blinking out of the life black hole !

After the last meltdown, today's broken virtual shuttle is the real starry sky to the treasure level, the speed is so shocking, even the 100,000-meter-diameter fortress is incomparable!

Even the domain lord, with the flesh crossing the void, the speed can not compete with the broken virtual shuttle, even the lord of the landlord, the speed of breaking the virtual shuttle, there are qualifications for contending with it.

The black hole of life is not far from the Devil's Star Field. Ye Xuan urged to break the virtual shuttle, and all the way to speed, and soon plunged into the Devil's Star Field, and rushed straight toward the Magic King.

This time, he started the stove in the source of evil. He adopted the suggestion of a headless baby corpse and decided not to participate in it. He only promoted it in the dark and took the magic king star. By means of means, he led a group of lords and even cosmic. The supremacy exists as a gunman!

Despite the dangers of the furnace, this morning is already known as the three major planes.

Otherwise, the source of the evil will not be after the previous change, and no star power has dared to enter.

After all, what happened on the day was too horrible, and the savage and fierceness of the heavenly and blue eyes did not know how many people's courage, the two lords of the indigenous fierce beasts, in front of it, even one round Did not support, directly killed by the second...

Even so, Ye Xuan still has the confidence to once again attract a large number of gunmen to gather in the source of evil.

The wages of avarice is death!

This is the unchanging truth!

Among the strong stars, there is no shortage of those who would rather have their heads tied to their waists, but also to risk the competition for the existence of the great creation... In fact, including Ye Xuan, this type of person, otherwise, if it is not a risk It is impossible for him to go all the way to today!

The source of evil and the furnace are indeed dangerous, but as long as the top powers of the three major planes and the lords behind the ethnic groups are eccentric, even the cosmic level is supreme, knowing that the smelting in the furnace is now It's amazing. At that time, there is no need for others to persuade. The old guys who are horrified will automatically come to the door and even kill them!

In this regard, Ye Xuan is also precautionary, in fact, has been prepared.

Of course, once the clues in his hands are thrown out, with the minds and visions of the super old geeks, they can certainly guess the truth. It is seen that some people want to take them as guns, but they hide in the dark, wanting Get the benefit of the fishing rod.

But it doesn't matter, Ye Xuan is not afraid of them seeing this.

Because his purpose is only to use the hands of the super old monsters to destroy the fringe chain that transports the evil source liquid to the furnace, instead of going to the furnace and the internal source of the evil.

That is to say, even if these super old monsters succeeded in destroying the fringe chain of the evil spirits flowing out of the furnace, the completion of Ye Xuan's expectations, Ye Xuan is not likely to appear!

This is a conspiracy!

He doesn't worry about the super-old geeks taking their own creations. The ranks of the furnaces and the cosmic-level wastes of the ancients are just the minimum standards for the raw materials of their condensed products. Blame, why do you forcibly break open its internal domain and enter the interior of the furnace to take it away?

"call out!"

The faint to a few unspeakable sounds broke, and under the control of Ye Xuan, there was no stop at all. It directly broke through the inner defense line of the Emperor Samsung and quietly plunged into the atmosphere of the magic star. Going to the Magic City!

After a short period of interest, the broken virtual shuttle came to the sky above the Emperor City. Ye Xuan stepped out of the cabin, and the wave of the shuttle would break into the immortal world, and then stepped down to the inner city of the emperor.

In the sight, in the depths of the inner city of the emperor, the tops of the demons and the royal family have apparently been alarmed. After the defensive formations have been removed, they are rushing to usher...

Chapter 3896: Three plane situations

There are more than ten people in the Devil's Royal Family who have ushered in the inner city of Devil's Inner City. They are headed by Mo Huang, and Ye Xuan has seen it, but he is not familiar with it.

Among the devil's royal family, he and his most familiar Mo Taiye and Mo Qigong are still leading the four ethnic groups, and they are conquering the first universe slaves one by one.

As for the generation of the demon emperor Mo Zhentian, the people are the lords of the landlord, they are not in the magic city, but somewhere there is a stable space channel connected with the magic emperor, which is equivalent to the mysterious realm of the real ancestral land of the devil, or the void of the sky. In the middle, it will not be easy to show up!

After a few words of chilling, Ye Xuan was introduced into the royal palace in the depths of the inner city of the emperor. All the people sat down.

Ye Xuan did not mention it immediately, but first asked about the situation of the three major planes in these days. After all, the first universe is now fully conquered, although the battlefield is in the first universe, but the facts on the top, it is the whole body, the second universe and the third universe, it is impossible to not pay close attention.

It is even more likely that there will be some kind of response action.

Seeing Ye Xuan asked, even if the high-ranking people of the devils spoke in succession, they made some introductions and explanations on the situation and new trends of the three major planes in recent days.

What surprised Ye Xuan was that there were no unusual movements in the second universe of the second universe.

Since the last time they took back from the hands of Ye Xuan who were detained in Shennong Ding, they have quieted down. It seems that the first universe was conquered, but it was destroyed in the source of all evils. The pain of the man and the sorcerer and the singer have been completely ruined.

The source of all evils is nothing more than the king of the Aboriginal beasts of the world. It is really possible to scare the people of the Second Universe Federation. For a while, it may not be able to slow down. .

But if they say that they can also let go of the extortion of the fox and the devil, it would be unrealistic.

According to Ye Xuan's estimate, the guys are estimated to be squatting in the dark, ready to glimpse the timing and make it worse, but it doesn't matter, Ye Xuan does not care, as long as the entire servant of the first universe is conquered, he has confidence. The first universe is made into a piece of iron.

At that time, the two universes connected to the second universe and the third universe will be guarded by the heavy forces. Even if the other party wants to make it worse, it will be powerless.

As for the Terran of the Third Universe, although there was no abnormal situation in the immortal dynasty, the Ten Heavenly Palace of the Terran Camp was shaken out of an explosive news two days ago!

The third house of the Ten Heavenly Palaces, that is, the descendants of several stars in the palace, was in the process of chasing the invincible **** of war, and was defeated by the invincible **** of war by means of sneak attack.

Then, when the invincible God of War appeared again two days later, it has already proved to be a great thing, and in a short period of time, it has become a great power!

[illegible]

As soon as the news came out, the third universe was suddenly stunned, and the invincible God of War's prestige once again resounded in three major planes.

We must know that when the invincible God of War was just born, the strength is not too strong. I did not expect that the speed has been proved in a short period of time. This speed is simply eye-catching!

What is even more shocking is that he is not only a powerful man, but he can control the emptiness of a star-level monster, but he is doing the ultimate improvement in strength. From the beginning to the end, I have been suffering from the comprehensive pursuit of the Ten Commandments of the Comprehension Camp.

Can grow up in the face of adversity beyond the speed of ordinary people, and sure enough, it does not despise its name.

It is a pity that until now, the devouring treasure of the invincible **** of war, who is the avatar, still has no certainty. The outside world guesses all kinds of things, but after all, there is no ironclad that can be completely convinced!

In addition, the situation on the first universe side!

After Ye Xuan left the four-member coalition army, the demon, space mouse, **** ant and giant tyrants led by Mo Taiye, after conquering the Cang wolf, reorganized the army and continued to the next slave. Ethnic group.

However, the Alliance of Ten Thousand People was not frustrated by this. After learning that the Demon Four-Federations had once again set aside the news of the expedition, all the ethnic groups in the Alliance of All Nations were mobilized and assembled again to resist.

Now, after the four-member coalition forces have captured the second slave servant group after the Cang wolf family, they are marching toward the next ethnic group. It is estimated that they will arrive in the family after two or three days and start a new war...

In general, the general situation of the four-family coalition has become a success. Even if all the other slave groups in the first universe are not willing to be enslaved to form the alliance of the nations, the final result of this plane-level comprehensive conquest is basically There is not much suspense.

The final victory, more than 80% will be picked up by the Devil's four-member coalition.

By then, the first universe will once again be unified, and the devil's group will become the second leader after the celestial family!

"I will come back this time, I will not leave for the time being, I will stay in the magic star, or in the surrounding star field, pay close attention to the development of the situation of the evil source..."

After understanding the development of the situation in the three major cosmic planes in the recent period, Ye Xuan suddenly turned around and threw a blockbuster: "If it is not an accident, it should be about two or three days. The forces of the Second Universe and the Third Universe will once again gather together in the source of all evil..."

"As for the first universe, the current Star Wars at the level of this plane is still in full swing. It is estimated that the families should not have the leisure to take care of this matter."

"Of course, if other slave servants are forced to put a foot in them, then they are self-destructive, we can't control it, no matter what, when you look back, you can find a way to send the message out, to inform the space rat, **** ants, giant The Martial, and all subsequent groups that have been surrendered by our four-family coalition, in short, none of us, ourselves, can participate in this source of evil."

"Let the entire source of all evils be left to the top forces of the Second Universe and the Third Universe and the ethnic groups to toss it. The same is true of the Devils. It is best to be far away. No side is necessary."

"Because this time, the major ethnic groups and top forces will no longer send a large number of warships to form a large army, as in the previous previous one. If there is no accident, within two or three days, the major forces will be stationed in the secret group. Power will be all high-end combat power composed of a small number of strong!"

"The main level is not the limit. This time, it is very likely that even the cosmic and immortal levels will exist, and they will all be born..."

"Hey..."

Ye Xuan's words just fell, the entire devil's royal palace, suddenly stunned...

Chapter 3897: Blazing hands

With the words of Ye Xuan finished, the entire royal family hall was in a state of utter disappointment, and the top leaders of the demon people were whispering and talking.

"The supreme existence of the cosmic and immortal levels will also be born? The source of all evils?"

The devil, Mo, asked the day to take a sigh of relief, and looked at Ye Xuan with amazement. He said with amazement: "What big thing happened this time?"

The other devils of the royal family, all of them turned around and looked at them. The look on their faces was all eccentric.

Because someone has already realized this incident, it may be related to the enchanting young man in front of him. When the last source of evil has not yet begun, he has already warned the democrats in advance, and it is best not to participate. Otherwise regret it.

The final facts also verified his words, entering the source of all evils and trying to seize all the top forces and ethnic groups in the three major planes of creation, almost all the army was annihilated, even the eight domain owners were all rescued. of!

And he not only took advantage of this opportunity to detain eight lords and millions of warships, but also hundreds of billions of star wars in warships, even millions of indigenous beasts led by Taikoo Porcupine and Taikoo tortoise. They were all abducted by him, and now they have become their own private army.

It can be said that the last and the worst source of the evil, the only winner is the present.

Considering that he had foreseen the final result before the incident, although people did not say it, almost all the elites of the devil's ethnic group, all of them are well-informed, and most of the incidents were secretly planned by him. At least, it also played a role in fueling the waves!

Now, since the last change, not to mention the source of evil, even the surrounding stars outside the star field are almost dead, the strongest of the first universe, No one dared to be too close.

This is the case. In front of the man, he suddenly threw out such a blockbuster. It is said that within two or three days, the major groups and top forces of the three major planes will once again gather together.

And this time, although there will not be a large number of Starfleet fleets, but among the major groups and top forces that flocked, there will be ancestors of the main, cosmic, and even immortal ranks... this is simply to scare people. The rhythm!

There is no doubt that if this is the case, the pusher behind the toss must be the one in front!

Is this a daring day?

I haven't even seen the fifteenth situation in the fifteenth world. I played with the star owner and the domain owner, like the last time, and accidentally dragged the two masters and monsters.

This time, I actually played the main level, the cosmic level and the immortal level... This is simply the rhythm of ascending the fairy!

Get it wrong, don't talk about the source of the evil and the first universe. This time, I am afraid that the whole three planes will have to be disabled by him...

One thought of this, the emperor Mo asked Tian's face suddenly green, after the first sentence asked, Ye Xuan has not responded, he has been flustered and then opened his mouth.

The bitter mother-in-law is to persuade, follow the temptation, and the tone is clear and reveals a little pleading: "I said little friends, no, no... my little ancestors, can you not make trouble? The last two people killed the two masters." Old blame, this time listening to your tone, the landlord is actually the bottom, there are cosmic and immortal ancestors to be alarmed, this..."

"This is the rhythm of the dead. Don't you toss it up? Don't stop it, honestly take the first cosmic servants and get the first universe to be unified. This is a good thing. Child, no more than what you just said, it's a life of nine deaths!"

After listening to this discourse, Ye Xuan was dumbfounded, and looked at the Emperor Mo's day, his face was speechless.

The high-ranking demons in the main hall of the Great Hall are even more often nodded by chickens and glutinous rice. If the last time the source of the evils is changed, let them all have taboos on Ye Xuan, and think this guy is simply a mixed-race. The words of the devil.

So now, when Ye Xuan said that he would have to toss it over there, and this time, in addition to the lord of the world, even the cosmic and immortal powers will be involved...

The high-ranking demons of the royal family in the hall have not found a vocabulary that can be used to describe the degree of this enchanting sorrow... This is a scorpion venom, and wherever it hurts, it simply cannot stop!

"Well, this little master admits that this time, I made it again. To be precise, this is the Lord's soon to be prepared..."

Since everyone understands the people, this is full of halls. Through the last time, I have already guessed that I am the promoter behind the scenes. Ye Xuan has no intention of hiding and acknowledging it.

Then, the white-eyed one went on and said: "But you can rest assured that this time, not only do our own camps forbid anyone to mix a foot, but even myself, I will never step into the star of the evil!"

"After all, the main level of this return is estimated to be cannon fodder. The cosmic level has to die a lot. Even if it is immortal, I am afraid it will have to be degraded." The young master is not afraid of death, but he does not want to take the initiative. court death!"

"On the other side, they will be tossed up, and they will not participate, but the ultimate goal should be achieved. It should be no problem. This is a foreshadowing. Its interests may not be reflected until many years later, but I know in my heart. Allies, please the devil believe in the planning and layout of this young master..."

If you say this, if there is any objection, I am afraid that even the allies have not done it.

Moreover, although this matter is dangerous, it is simply thrilling, but the present man's means are not known at the moment. So far, when did he suffer a loss?

Thinking this way, the tops of the demons suddenly shook their heads and smiled. Although they didn't speak, they obviously accepted it by default!

“There is a video image here, which is the reality that the Lord took in the oven...”

Seeing the democrats in the main hall of the royal family have been convinced, Ye Xuan threw a jade slip by hand, and then said: "Go through a certain channel, do not leave a trace of beads, let people see In addition to the democrats, there are some words, but also people to spread it. In one sentence, with the fastest speed, let all the ethnic groups and forces in the three major planes hear these words and see Go to this video image..."

The video image that Ye Xuan said is exactly what he saw in the furnace. He was recorded by the body's engulfing system. Now he just copied one copy and handed it over to the demon royal family.

Seeing that he suddenly threw a video image, the tops of the demons in the hall are all unknown. Listening to this, it seems that this video can lead to three planes full of chaos, and the immortal powers flocked. It's like... but is this possible?

With a full of doubts, Mo Huang asked Tian Tian to take over the jade slips that Ye Xuan handed over. The spiritual strength was immersed in it for viewing. Only one glance, his face was instantly mad, and his voice was exclaimed...

Chapter 3898: Move

This video image is when Ye Xuan is in the furnace, the autophagic system in the body is automatically recorded. At that time, everything that Ye Xuan saw was completely recorded.

Including the treasures of the ancient and the ancient powers that have been hunt in the furnace and thrown into the furnace, including the mysterious void outside the furnace...

In other words, the impact of this video includes not only the situation of the furnace, but also the situation of the mysterious void of the safari.

The situation in the void cracks is reflected in the video image.

If this is not the case, the Emperor Mo does not ask the sky so much!

You know, this time, what he saw was a mysterious unknown cosmic plane covered with countless voids. In the cracks of the void, all the fallen or deadly, deadly remains of the mighty and deadly creatures, or waiting Injury...

This kind of image, in the three universes, has never appeared before.

Through it, all the star powers and ordinary people in the three cosmic planes will realize the fact that there are bound to be a lot of similar mysterious planes besides the three cosmic planes known today. The void, the crouching inside, or the remaining... all are the remains and wounds of some powerful and ancient creatures that existed in the legend!

And the horror furnace in the depths of the first universe of evil, clearly found one of them, has completed a hunting there, got a lot of ancient powers and even the ancients of the remains of the remains!

"This... this thing is too big. What do you want to do with the furnace? All the raw materials are the remains of the remains of immortality. This is to be crushed with the huge grinding disc in the furnace. What to refine? Something?"

The spiritual power has withdrawn from the jade, and the devil has asked Tian Tian to look at Ye Xuan with a blank look. The voices are a little trembling: "Those things refined with this level of flesh and blood... Don't say immortal It is to be crazy beyond the existence of immortality. This is to draw the rhythm of the three planes!"

"That is not chaotic, it has nothing to do with us!"

Ye Xuan once again threw a video, it is the furnace that breaks the image of the fringe chain in the star of the evil.

Then he said: "Hurry up and spread the two videos. At the same time, explain that the striated chains that extend from the lower side of the outer wall of the smoldering furnace are connected to an

unknown void. The product refining in the furnace is called the sinister source. Will be transported through this part of the chain..."

"Right, the evil source liquid is the final product of the furnace, and it has a super strong effect on the main level, the cosmic level, the immortal level, and even the ancient power of the wild and the supreme level. It is the best to restore the injury and better. Enhancing the evolution of life level is the top of the top resources!"

.....

As the chief servant group under the celestial family, the devil is more than a secret scout, and the ability in intelligence is naturally unquestionable.

They have many secret paths, some even from the federal community of the Second Universe, and some powerful forces of the Third Cosmic Terran camp.

This is normal. The Devil's ability to penetrate is still very strong. It has the same appearance as the Terran. After infiltrating into some ethnic groups and forces, it crouches down and develops slowly. This is a line.

With this kind of accumulation means, just the two video images that Ye Xuan took out were quietly and uninterrupted, which is a piece of cake.

In just half a day, these two video images spread throughout the three universes, attracting major groups and top forces.

As Ye Xuan speculated, as soon as the two video images spread, some guys with conspiracy theories expressed their concern. They decided that the behind-the-scenes of the two video images were recorded and sent out. The tragedy that happened not long ago in the star of the evil world will happen again!

Even so, the major groups and top forces still have the action in the first place.

On the first side of the universe, the devil and the ethnic group of the Rat, the Hell ants, the Giants and other unnamed alliances have already received the notice from Ye Xuan and did not intend to participate in this matter.

The other first cosmic slaves are basically indifferent, and the crisis of the survival of the ethnic groups has become closer and closer. Who has the mind to toss those?

The third universe, the first house of the Terran Reconnaissance camp, the tenth house of the Heavenly Palace!

In the first time when these two videos affected the spread, the sound of a sorghum and a bright dragon screamed in the sacred palace. Several figures waved and tossed the void, and stepped in, and the figure disappeared instantly.

Among them, even a faint **** dragon can be seen.

Almost at the same time, it is still in the territory of the comprehension camp held by the Ten Heavenly Palace, a relatively remote star in the sky, a black body of eternal death from a certain abandoned star, rushing out From the huge black phoenix wings, a black hole-like vortex appeared in the void above the figure, and the undead phoenix plunged into it...

In the same or similar scene, there are still dozens of areas in the territory of the Terran camp. There are ten palaces and palaces under the Ten Palace, and some other sects that are not part of the Ten Heavenly Palace. The ancestral land.

These figures that are heard and heard are the lowest in the world, and they are more cosmic and immortal. They are definitely the mainstay of one party, but nowadays, they are swarming...

Still the third universe, the Terran technology camp is immortal dynasty imperial star!

The National Teacher's Hall in the outer city area of the imperial city, to be precise, is actually the underground of the National Teacher's Hall! ,

Shown in front of you is a huge underground hall!

The hall is vast, no matter which direction you look at, you can't see the end of the line. In addition, although it is underground, when looking up, the bluestone dome of this vast underground hall is at least 10,000 meters high.

The underground space of this scale is not a small project, and it is even less likely to appear in the underground of the immortal imperial city. Therefore, this underground hall should be built using space folding technology. In the secret base of the immortal Imperial City.

The hall was originally empty, nothing, but at this moment, because the place is too wide, there is no way to distinguish the position of the hall somewhere, with a green mangling flashing, the original empty hall floor, blink of an eye There was a high platform, square and square, with a side length of about 100 meters.

"call out!"

The faint sound of breaking the air rang, followed by a faint glimmer of light, and an old man's figure appeared on the high platform, which was the emperor of the immortal dynasty.

As soon as the figure appeared, Emperor II waved his hand toward the vast void in front of him. His face was full of no sorrow and sorrow, but he whispered in his mouth...

Chapter 3899: Old monsters gather together

"It's time to open another seal!"

With the muttering of the two masters of the National Emperor, there seemed to be a glimpse of the body, and then it was quickly swelled at a clear and visible speed.

At first, the Chinese emperor's body exuded only the atmosphere of the nine-step grand reign of the Qiankun, but it took almost half a moment, and the Qiankun environment was broken, and its cultivation was upgraded to the star's main territory.

But this is obviously only a beginning. After the star's main territory, it took only three breaths of time. The strength of the emperor's body has risen to the star's nine-step great consummation.

Then break through again, and the blink of an eye is already the domain of the domain.

But this is not over yet. In the territory of the domain, the cultivation of the National Emperor's Emperor II is still rising. This time, it took six breaths to reach the nine-step grand reunion of the domain.

Then it is a breakthrough, directly into the realm of the border!

In this large territory, Emperor II used nine breathing time to climb the strength. At the end, the repairing atmosphere in his body finally stabilized. When he no longer continued to grow, he had already reached the 9th stage of the great consummation!

At this time, a black hole appeared in the square in front of this vast and innocent underground folding space, which appeared in the air and was mysterious.

Through this black hole, you can see that the inner part is a mysterious void, with a large number of warships, and giant mechanical creatures like the starry sky fortress, in various forms.

"Roar!"

A huge roar like a tiger whistle came out of the black hole, and then there was a big behemoth stepping out of the black hole, followed by a second head...

In the end, the four heads are like the mountains, and the giant behemoths in the vast expanse appear in the vast square. The figure is suspended at low altitude, and the body emits a terrible atmosphere, which surpasses the emperor on the high platform.

Today's Emperor II is already the world's nine-order grand perfection. The four alloy behemoths are stronger than him. Obviously, at least it is also a cosmic level.

At this point, the black hole behind the four-headed alloy giant has quietly disappeared, but there is another slightly smaller black hole that appears again and out of the air. The shape of the four-headed alloy behemoth is reduced, and finally only a hundred feet to the emperor. After snoring, I stepped in and blinked away...

At the same time, in the old pavilion in the inner city of the imperial city, there were also a few touches of mans, and they shot directly into the sky. They did not see the cracks in the space, but these few ghosts were strangely It disappeared halfway through the middle of the road.

Such a scene, in the territory of the Terran empire of the Terran Science and Technology camp, there are many areas, including the three imperial capitals under the imperial rule, as well as Bodhi Technology, Xuanyuanjia, Changyujia, Shentujia, and life genes, etc. These top-level door valves and forces are the base camp and ancestral home.

As for the Heavenly War Empire, the treacherous ancestors of one of the two ancestors just returned, and the cultivation of strength not only broke through the star's main territory, but also entered the domain's main territory, and actually reached the domain's main ninth order, and did not know. What kind of adventures have been made in extraterrestrial travel in these years, and the soaring strength of repairing is too fast.

The news of the source of all evils came from the first time, and the trenches went away with a lord of the world, and went straight to the first universe...

The second universe!

In addition to the already full-fledged family of the Turtles, including the bloody, Qingpeng, Shishi, Yinxi, Barbarian, Golden Eagle, Caisong, Greedy and Shuling A large number of ethnic groups, including the large ethnic group, responded to the news of the changing situation of the evil source.

Almost every ethnic group has one or two ancestors, even the ancestors of the universe, awakened, tearing the void, and swarming toward the starry field of the first universe.

In the mysterious ancestral land of the **** people, the blood in the distance is a thousand miles away, and a huge blood cloud is still rolling.

Vaguely visible, the atmosphere is not as good as the ancient gods of the Golden Dragon and the Wild Night Fork, but compared with the ancient powers of the Void Scoop, the nine **** screams are not roaring.

The nine heads of blood were clearly and seriously injured. They were all nourished and restored by the evil source. In the past, every other year, at the end of this chain, there will be a drop of all the evil sources falling, but the nine **** but not Will all be consumed.

It will leave a quarter of it, and it will be injected into the **** giant egg that is tumbling in this cloud-like cloud field. It is the blood of its descendants. Once it is born, it will have the cultivation of Qiankun. There is no limit to the future.

However, when the last resource supply was not long ago, the nine heads of blood were black-marked, and the evil venoms produced by Ye Xuan were counted. They had already recovered the injuries of 60% and 70%, and they have deteriorated again. It fell to the quasi-wild power level.

Even so, when the news of the source of the evils came again, the nine **** scorpions were still alarmed. At this time, the anger roared and roared. Looking back at the **** giant in the tumbling blood cloud. The egg, in the body, immediately smashed a wrath of the sky.

"Roar!"

Even the roaring sounds revealed a few stern intentions.

Subsequently, the nine **** bodies were immersed in this tumbling blood cloud. After a few moments, an energy body rushed out of the blood cloud, and one end hangs to the top of the void in the secret world. Among the chains, it disappeared.

Such a scene is not only performed in the ancestral home of the **** people.

Including the other ethnic groups in the top ten communities of the Second Universe, there is also a remnant of strength that has fallen to the quasi-wild power, in the form of energy avatars, following the perician chain that supplies them with a source of evil. The anger rushed toward the starry field of the first universe.

For example, in the mysterious ancestral land of the Qingpeng nationality, there was a blue sky and a big man who was experiencing tens of thousands of feet.

In the ancestral home of the War Lions, which ranks third among the top ten ethnic groups in the Second Universe, there is a blood-colored double-headed lion roaring in the sky, and finally rushing into the fringe chain in the form of energy.

In addition to the **** ancestors of these major ethnic groups, they have been alarmed.

In some remote stars of the three cosmic planes, there are also occasional cracks in the void that sneak open silently, revealing a huge body shape, and the atmosphere is terrible!

These existences seem to be isolated in general, without ethnic groups, alone in the unknown void plane, and now they are alarmed, with a roaring roar, rushing into the end of the fringe chain, following the chain go with!

In a short period of time, among the three major planes, except for the first universe, which was busy with war, and for this time, there was no movement in the creation of the furnace. The other two major groups and the top forces all had Actions, the supreme presence of the elite above the main level has been dispatched. Soon after, this group of super old monsters will arrive at their destinations one after another, gathering the source of all evil...

Chapter 3900: Disagree

Root of all evil!

"Booming!"

"Karma card..."

The vast empty sky is empty, and no one can be seen, but the two voices are resounding, and the whole piece of emptiness is audible.

The thunderous noise of the rumble is the sound of the huge grinding wheel in the furnace!

Both of the sounds are very low, and they are not very rushy. They seem to be slow and sluggish. They shouldn't have that kind of regretful effect, but they are in the ear, but the figure can't stop shaking.

The abnormal sound of the Kazakh card is a large number of powerful wild animals, whose flesh and blood wreckage is crushed by the red furnace and turned into a broken bone and meat!

The scene that can be seen in the furnace is a real big horror!

It is a vast space inside the furnace. There are always two areas. There is a huge grinding disc in the central area. There are two layers in the middle, and there is a hole in the middle. At this time, there is a large number of wastes in the huge hole. The body is undulating as the two layers of the disc rotate in opposite directions.

Like a real fleshy furnace.

If someone is here at the moment, even in the **** sea of countless sacs, you can see some horrible creatures like the golden dragon, which should be a descendant of the family who has not yet grown to the ancient sage.

Even so, this golden dragon should be extremely powerful. Even after the ruinless years, only a half of the remains are left, and a powerful and powerful pressure can still be felt.

There are many other powerful wild creatures!

There were literally thousands of them, but nowadays, the ruins of the ancient ruins around the huge grinding discs are full of counts. The others have all been invested in the central pores of the huge grinding disc.

At this time, with the slow operation of this huge flesh furnace, the wreckage of all the ancient creatures in the central hole of the hung furnace is constantly being crushed. Gradually, they have not recognized their original appearance...

Whether it is the Golden Dragon or the Wild Night Fork, whether it is the **** lion or the blue sky, the flesh and blood wreckage of all the ancient creatures, afterwards, all were stirred into meat and mixed together.

In this process, the meat and bones of Xia Rui Baoguang exudes and mixes with each other, and the various blood and mixed blood of different colors are mixed, and finally the blood and the meat are no longer separated from each other.

There is no solid material in the huge holes, and it is turned into a semi-liquid, but there are endless Xia Rui Baoguang, and some of them are dissipated directly in the void.

It is something that is similar to cause and effect or past, and is regarded as an impurity, not preserved by this **** furnace.

In addition, some of them are turned into a milky white mist, which slowly rises and merges into the already extremely thin atmosphere above the red furnace...

These milky white mists are similar to those of the original source of the avenue or the source of the Yuanshen.

These avenues and the source of the godless source have been shattered into micro-molecules that trace the source and become pure energy. They merge into the atmosphere above the red furnace, and the concentration increases as it accumulates. A milky white furnace!

This kind of lotion has an extremely miraculous effect. After all, it is the wreckage of a large number of powerful creatures that are close to or even reach the level of the ancient powers. They are crushed into pieces of bones and bones, and some of the essence energy left by them are condensed. It is simply shocking and awkward.

However, they are obviously not the real purpose of this flesh and blood refining and refining a large number of wild and ruined flesh and blood. It can only be regarded as a by-product of the process that can be used and discarded.

The real stove product is a transparent liquid that flows out of the gap that is almost non-existent between the two layers of grinding discs!

All evil source!

These powerful wild animals have different kinds of flesh and blood, some flesh and blood are golden, and the blood is like a splendid sun, emitting a thorny golden awn, and some are full of blood and transpiration, and there are endless murders and suffocating.

The flesh and blood marrow of this level, etc., after being crushed into mud, is an unspeakable quirky color, and the breath is even more horrible and terrifying.

But at this moment, as some things like memories, causal and other impurities become the disappearance of blue smoke, and some unwanted innate energy is rejected, it will rise into a liquid, and finally, from the edge of the fleshy furnace The liquid flowing out is completely incomparable, colorless and tasteless, and even no pressure of any pressure.

The liquid is pure, like the purest liquid crystal in the world. In the huge hole in the center of the fleshy furnace, there are a lot of colorful blood mud rolling, and the causal impurities and milky haze that are turned into blue smoke from time to time are also quite a lot.

However, the transparent liquid flowing out of the crevices around the huge furnace is dripping down by drop, only a drop in a long time, falling into the groove under the slit...

All of this is the scene inside the furnace, not visible outside the furnace!

Any existence outside the furnace can only be judged by the white emulsion above the mouth of the furnace, as well as the thunder and the sound of the noise from the furnace.

It was also at this time that the last batch of thousands of widowed treasures of the ancient and dead spirits were also dragged into the huge pores in the center of the central domain.

Then the low cicadas and the squeaking noises...

After continuing for about half a day, it gradually weakened again.

Nowadays, the awning at the Dingkou is like a star-like milky white smog emulsion, which is already very thick and thick, and the thunderous sound in the furnace still exists, but the scalp and numbness is different. Loud, but almost inaudible...

All the treasures of the ancient and dead spirits have been crushed into meat, mixed together, and no longer see the original form.

This scene, the **** ancestors of the great ethnic groups and the top forces who crouched in the distant air around the furnace, although not seen by themselves, can easily be deduced.

Finally, someone couldn't help but suddenly shot!

"The friends of the Tao, the raw materials have been crushed into mud, and the condensate begins, it can no longer be interrupted, the time is up!"

A giant beast rushed out, and his figure stood on his back. It was the ancestor of the Third Heavenly Comprehension Camp.

This master servant is actually a horrible existence in the later period of the main territory. When the glory of the front is rushed to the front: "The evil source liquid is about to be produced, and the conveyor chain must be blown up immediately, otherwise everyone is white. Busy for a time..."

"Hey!"

"You dare! If you dare to break the chain of the furnace, my family and you will be the tenth house... not dead!"

A purple eagle eagle suspected to be from the Golden Eagles of the top ten ethnic groups in the second universe vacated, and the body swelled and swelled, and the body shape followed closely.

But the goal is not the furnace, but the servant who first rushed to the chain of the furnace.

Bifurcation, from the beginning, it has appeared...
