

## Super D. S 4031

Chapter 4031: Humanoid demolition machine

Facing the starry situation in front of the chaos, Ye Xuan quickly recovered from calm after a brief shock.

Obviously, the immortal grotesque hidden behind the two camps of the enemy are trying to crush the regular combat power of the demon with more than 50 million warships, causing a large number of deaths and injuries, forcing the devil to take the ancestors.

Ye Xuan saw through the other side's strategy and made a decision. If this is the case, then he will calculate it and use the same method to force the old guys who are calculating...

This is the key. Once successful, the deities of all the immortal grotesques of the two major squads will jump out of the parallel space and enter the magical star field of the first cosmic plane.

At that time, as the demon of the devil's ethnic group, the seal will be immortal, and there will be no worries. Directly, the magical star field will be banned, and the hostile camp that has already appeared will be immortal, and one will not want to leave!

In order to achieve this goal, Ye Xuan even did not hesitate to reveal another identity, that is, the world-class enchanting Sha Baofeng!

At present, in today's three major star planes, the well-recognized younger generations have been recognized as enchanting, with a total of seven.

The devil's emperor Mo Zhenfeng is already the existence of the four enchanting ones, claiming to be the first person of the younger generation.

The other three enchanting identities are the Xuan prince of the Terran martial arts camp, and the singularly determined sect of the sacred emperor, and now the invincible warships that are still tossing in the Terran camp are engulfing the treasure!

The last one, the flower of the Tianji family, is the celestial enchanting Sha Baofeng of the Tianji nationality!

But now, in order to cope with the situation at hand, it will be counted, and all the more than ten immortal grotesque behind the two camps will be forced out. Ye Xuan bites his teeth and decides to sing the identity of the celestial celestial world. Shake it out!

Although a little regrettable, the situation is forced to take care of so much.

In his view, as long as the identity of the Emperor Xuanzi is not exposed, it will not affect the pressure on the Arc de Triomphe, face the crisis, everything else is acceptable!

"Roar!"

With a head screaming, Ye Xuan directly lifted the state of the fifth change of the konjac. The huge blood of the million-footed giant body was reduced, and it was reduced to a ten-foot high.

At this time, although he relieved the \*\*\*\* magical power of the konjac, he repaired five small steps, but because he still maintains the state of the konjac, it is still the first-order cultivation of the domain master.

At the same time, the huge black-headed stick of a million feet was also earned into the immortal world.

Then, Ye Xuan suddenly waved a hand, the same as the Star Wars, reaching a giant of 300,000 meters, that is, a 100,000-foot super fortress, and now in front of him, across the void.

It is the life fortress dragon field!

The reason why the Longye was sacrificed was because Ye Xuan decided to use the form of the alloy \*\*\*\* of war to rush into the army of 50 million warships against the two camps.

Although the real body of the konjac is powerful, even in the fifth state of the konjac, his cultivation is only the sixth stage of the field. In the face of the huge battleship army with more than 50 million people, it needs Fight against all enemies with your own body.

In Ye Xuan's opinion, this is too far from it.

It is better to exit the konjac and change the magical power directly, and only maintain the state of the konjac. So, there can be the first-order cultivation of the domain master, and the big realm has not fallen, but you can use the life fortress to fight. After the alloy \*\*\*\* of the giant human form, not only can all kinds of magical techniques be used when needed, but also the scientific and technological power of life fortress!

Cost-effective, absolutely higher!

This is just the case, but it will undoubtedly expose the identity of the celestial celestial sorcerer Sha Baofeng. Nowadays, only the four demon sorcerers, Mo Zhenfeng, have become one of the five enchanting ones.

However, the situation has forced me to face the crushing of the devil by more than 50 million warships. Ye Xuan has no better solution, so I can't take care of it!

Life Fortress, Ye Xuan has not been used for a long time, during this time, the world insect self-revolution group has been greatly developed, it is far from the past.

At this moment, as the life fortress of the Longye was sacrificed, Ye Xuan stepped into it and, at the first time, gave instructions to the life fortress to transform.

In the next moment, the sound of the mechanical running-in of the card suddenly became a big change, and the external form of the life fortress changed rapidly. It was first turned into a nine-nine crocodile, then a \*\*\*\* unicorn, a hollow giant tortoise, a golden dragon, and even behind it. A pair of huge shredded wings of the ancient Yasha... In short, the phagocytic data database has all the forms of life recorded, and it can be easily changed.

In the end, the card screamed with amazement, and the life fortress became a super alloy giant with a height of more than 100,000 feet. The skull and limbs were perfect, and even the light behind them came out. The left-hand shield was like a skylight. Such a huge, right-handed spear, up to 300,000 meters!

Ten thousand feet, that is, 300,000 feet, three hundred kilometers, this height is simply speechless, a big step or a jump, at least thousands of kilometers, absolutely horrible!

This is still the basic performance, and in addition, in terms of defense and attack capabilities, the alloy \*\*\*\* of war is equally amazing.

First of all, the energy shield of the Star Fortress defense system is normally turned into a pair of lights appearing behind the alloy God of War. Of course, this pair of light, also has a shocking sharp cutting ability, and can Protecting the body, you can open the solid hull of the Star Fortress.

In addition, the energy shield of this defense system can also appear in any area of the alloy God of War at any time, for example, the head is attacked, and in a flash, the head of the alloy God of War can appear a part. The defensive light shield, the same energy shield, can also appear in the chest, the front, and even the limbs and other positions.

As far as attack power is concerned, the huge alloy shield of the left hand can be slammed down on the heavy side of the shield, and the alloy spear of the right hand is invincible. It can be used as a melee weapon or as a weapon. Spears are usually thrown directly out.

At that time, under the impetus of the powerful strength of the alloy \*\*\*\* of war, coupled with the inertial acceleration of the spear blasting, this is definitely a big kill, directly through a 100,000-meter-diameter starry fortress, nothing. thing.

This is only the flame spear and the shield of the alloy form. In fact, if Ye Xuan needs it, the war shield and the spear in the hands of the alloy warrior may even be in the form of energy, such as the anti-material light energy form. Shield, all attacks can be offset.

Its penetrating and lethality climbs geometrically, which is a big killer!

In addition, the alloy God of War's knees and elbows also have a sharp attack structure, but also can open the gun, launch anti-matter energy dead light cannon, including shoulders and back, can!

This is simply a humanoid killer, with all kinds of flexible advantages of human form in melee, and possessing the long-range ability of warships, fortresses and fortresses, all of which are perfectly smashed. Together, the whole alloy war \*\*\*\* is perfect!

Like a humanoid exploding machine...

Chapter 4032: a spear that pierces the void

Soon after, the alloy warrior reappears.

The right hand spear, the left hand war shield, the right hand war shield is even more obvious, it is the black anti-material energy form.

This antimatter dead light shield is absolutely perfect. Absolute melee is invincible. Any offensive, including energy attack, can be blocked by the black shield. The characteristics of antimatter light are doomed.

This is like the starry sky black technology, can actually transfer the antimatter light energy generator to the hands of the mechanical changes, the volume of this device can also be compressed, it is not scientific!

How thick is the alloy God of War? The anti-material light energy generator of the Great Fortress is at least 10,000 meters in diameter. How can it be compressed into the arms?

And the handle of the spear held by his right hand is only a super-strong alloy state, it is a giant of ten thousand feet, and the power can be horrible. If it is converted into an anti-mattering spear, its power will definitely skyrocket again. That is absolutely the unstoppable rhythm of nothing, even a fixed super star fortress, will be worn by a spear!

At this moment, in the next moment of the appearance of the alloy \*\*\*\* of war, Ye Xuan has already had an action. After the order was issued, the alloy \*\*\*\* of war of 100,000 feet was removed, and the

right arm was lifted. The one that was originally held in the hand The 100,000-foot giant alloy spear instantly turns into a streamer, spurting away...

"boom!"

"Booming..."

The sound of a blast of explosions, this alloy war spear is too horrible, the speed is reaching the extreme, and the distance between thousands of miles in the void is raging in the blink of an eye.

All the way to the glare, but all the warships on the way, whether large or small fortresses or fortresses, without exception, all were pierced, blown into a huge fireball, bloom in the stars!

Although Ye Xuan thrown out on the surface, it is an alloy war spear. But this spear is made up of countless world insects and self-derivative micro-molecules. The moment of hitting the big fortress, all the micro-molecules The morphological change is directly carried out by super-alloying for a super concentrated energy, which is self-explosive.

This spear, at least tens of thousands of hostile camps of various star-ship battleships were destroyed, because the various battleships and large fortresses and fortresses in the vain air are too many, dense, as long as the spurt of the spear does not stop. Every minute and every second, the battleship was destroyed...

However, all this is just the beginning.

With this spear projected, Ye Xuan once again had an action.

His right hand suddenly shocked, and originally held a huge alloy palm of 100,000 feet of thick spears, quickly showing a same length of the spear, but the body is dark.

This war spear is obviously not an entity, but is made up of anti-material light energy, which cannot be touched at all, otherwise it will have to be eroded.

The reason why the alloy \*\*\*\* of war can hold it safely is because its palm and other parts are originally the venting port of the anti-material light energy generator, which is cast for a special material.

"call out....."

"Booming!"

The huge roar sounded, the alloy \*\*\*\* of war jerked a step, and the figure instantly picked up hundreds of miles. At the same time, the right hand was lifted up, holding the anti-matter energy spear and throwing it out without hesitation.

At this moment, the void was torn apart, giving a harsh, piercing sound, and a black thorn pierced the sky...

The Dragon Wild Life Fortress is a whole body evolved from the world insect self-derivative group. This magical existence between the living body and the non-living body can degenerate everything, including the antimatter dead light from the life fortress. Guns are all derived from their micromolecules.

The spear that was thrown out at the moment is completely different from the original alloy spear, but it is composed of pure anti-material light energy.

Its power can only be described by the word horror!

"Oh..."

"Booming!"

The spear of the anti-material light energy is not only faster, but even after hitting the battleship and the big fortress and fortress, the sound is different.

Although the battleships and the big and small fortresses and fortresses that were hit were the same roaring sounds when they were blown up later, the sound of the spears was as if the ice and snow

melted when the splendid spears of the whole body were worn through the hull. Generally, it is extremely harsh.

The materials used to make the Star Wars are the most sturdy high-tech cosmic alloys of today's common savage, but under the impact of this anti-material energy spear, there is no resistance at all.

The 100,000-foot anti-matter energy spear blasted all the way, and tens of thousands of warships were pierced in a short breathing time, and then exploded, turning into a huge fireball in the void, like fireworks in the stars. Blooming...

All this is long, but in fact, two hundred thousand-foot-long spears were thrown out, but now only a few breaths.

Although the time is short, although the entire virtual battlefield has long been chaotic, but these two spears are too large, the power after throwing out is even more eye-catching, coupled with the huge body of the alloy gods of ten thousand feet Too eye-catching.

Almost the second moment of the anti-matter energy light spear has just been thrown out, there are countless exclamations in the void around the world...

"What is that? A good spear, a few half breaths whistling millions of miles away, all the battleships along the way, whether it is the constant star of the standard three-kilometer captain, or the big fortress and fortress, actually No one can stop, all of them burst open..."

"The second war spear is more against the sky. It seems to be in the form of energy. It is dark in the whole body. Is it a spear formed by antimatter light? But how is it possible, when antimatter energy can be used this way? It is simply a starry black technology. !"

"Yes, this is indeed the starry black technology! The alloy \*\*\*\* of the 100,000-foot high is the proof. Have you not yet come to realize it? This alloy \*\*\*\* of war is clearly a super-large star fortress, the old man Apparently seeing it, a few breaths, a starry fortress changed its shape."

"It's too familiar, it seems to have heard of it..."

"Mechanical fusion! This is the ultimate supernatural mechanical fusion of the Tianzu people... The deity thinks of it, the energy spear that is condensed by antimatter light, is clearly another fascinating sign, including the anti-object of the alloy God of War left hand. The same is true for the energy light shield, which belongs to Sha Baofeng!"

"How can Sha Baofeng appear here? The super huge starry fortress, the one that stepped into it before, is clearly the devil's emperor Mo Zhenfeng!"

"It is true that the devil's emperor Mo Zhenfeng stepped into the super fortress one step at a time, and then the fortress changed shape and turned into an alloy \*\*\*\* of 100,000 feet. God, the truth is terrible, the old man has a Bold guess, but dare not say it!"

"This is too horrible, involving the Tianji family, and it is also related to the core of the devil's core. The absolute big event is too confusing."

"God! Is this the rhythm of the five enchanting ones?"

Chapter 4033: Five enchanting one

Five enchanting one!

When this sentence was thrown out by a strong star in a trembling voice, the whole starry battle of the stars was a quiet, including the Devil camp, and countless star powers stopped at this moment. The action in the hand, looked blankly at the alloy \*\*\*\* of war, the 100,000-foot giant in the void.

No one doubts his current identity!

That is the devil's emperor Mo Zhenfeng!

Because there are countless people who saw him in the state of releasing the fifth change of the konjac, he waved a super fortress with a volume of more than 100,000 meters in diameter.

Then step into it.

And then. The giant with a diameter of 100,000 feet, and a super fortress with a size comparable to that of a starry sky war, began to change shape, and finally settled into a humanoid alloy \*\*\*\* of war with a height of 100,000 feet.

And in just one breathing time, throw out two mighty horror alloy war spears...

At the same time, it is the celestial enchanting Sha Baofeng of the Tianji nationality!

Because this kind of starry sky fortress changes shape in a short time, it turns into a variety of mechanical warfare, and even the mechanical fusion ability of the humanoid alloy Ares.

It was also the dark anti-matter energy spear that was thrown out later, and the dark anti-matter energy light shield that was still held by the alloy \*\*\*\* of war in the left hand.

All of this is all the signs of the celestial celestial world.

Not to mention the other ethnic groups in the three major star planes. Even within the Tianji family, there is no second Tianzu ethnic group. You can have this anti-matter energy light spear and light shield that can be held in the hands of the alloy \*\*\*\* of war!

That is to say, this alloy war \*\*\*\* is not only the celestial enchantress Sha Baofeng of the Tianji nationality, but also the four enchanting ones. It is the first person of the younger generation, the devil's emperor Mo Zhenfeng!

This is a person at all!

Or to say... the celestial celestial sorcerer Shabaofeng of the Tianji nationality is actually the same as the previous sorcerer, the Netherland, and the Taikoo konjac, but it is only one of the identity of the devil's emperor Mo Zhenfeng!

This is a secret of the sky, the previous four enchanting ones are already amazing enough, and there is no history, so that the innumerable strongmen of the three major stars in the world sigh.

But until today, they suddenly discovered that it was still not the limit. What did the four enchanting ones count? The true identity of people is one of the five enchanting ones.

This is not the key. The most important thing is that among the five enchanting identities, one of them belongs to... Tianji! ! !

That is the celestial family!

The Tianji family is a mechanical life. All the Tianji ethnic groups are born with self-awareness by intelligent robots. They have the wisdom to evolve into the Tianzu ethnic group.

It can be said that every celestial tribe is unique. They are not like other races. They are not flesh-and-blood life. They have no gods. There is only one electronic consciousness. This electronic consciousness is their core foundation. The soul of mankind.

For this reason, it is absolutely impossible for a strong star of the outer race to mix into the heavenly family. The soul of the human race and the other gods of flesh and blood cannot simulate the electronic consciousness of the heavenly family. This is totally different. Existing form.

Even the legendary extraterrestrial demon can change freely, whether it is flesh-and-blood life, energy life or the life form between the two.

But in theory, even the extraterrestrial demon can't be disguised as a celestial family and mixed into its ethnic group.

The electronic consciousness of mechanical life has its uniqueness. It is not only the extraterrestrial demon, it is the rarest crystal life in the universe. Its core consciousness is some especially strange creatures or crystal waves, but it is still with mechanical life. Different electronic consciousness, there is no way to pretend.

For this reason, since Emperor Yi led the Tianzu people to fight for the first universe and became the hegemon of the entire first cosmic plane, the steady development of how many years have passed, step

by step more and more powerful, but never any strong outside the family. People, mixed into the celestial family to create chaos!

It can be said that, for many years, the entire Tianji family is a super iron bucket!

Even the huge scale that has developed to the present day has become the first hegemon of the three major star planes. Even the Terran must pass through the Union of the Vulcan and unite with the Second Universe to compete with it... They suddenly The migration of the family has disappeared, and no one knows where to go.

For such a long period of time, all the top forces and ethnic groups in the three major planes have tried every means and have never succeeded in inserting eyeliners within their ethnic groups and mixing them into scouts!

But this impermeable myth, today seems to have ended in the hands of the devil's emperor Mo Zhenfeng.

This enchanting world is not only mixed into the celestial family, but also climbed to the high position of the former patriarch of the celestial family. However, the truth is so astounding. No one thought that the former patriarch of the so-called celestial family was only just Another identity of the devil's emperor Mo Zhenfeng.

After a short period of silence, the void was suddenly stunned, and countless strong men in the three camps exclaimed their arguments, and the tone was full of incredible and unacceptable.

Even, even in the distance behind the two major squad camps, the eleven immortal grotesques passed to the face of the gods, after detecting this terrible change, they were all after a short silence. They have been chilling in the air, and they secretly secretly talked to each other. In their tone, they all have deep doubts...

"Who can explain what is going on here? What are the four enchanting ones? How suddenly there is an additional identity, and it is still the former patriarch of the celestial family... This is just a joke!"

"This is unlikely. Even ordinary people of the Tianzu ethnic group have almost no possibility of counterfeiting. The electronic consciousness of mechanical life has not been studied by you or me. What's more, the former patriarch of the Tianji nationality...the emperor has not yet Confused!"

"How can you explain this scene? You and I have seen it clearly. This alloy \*\*\*\* of war is indeed the devil's emperor Mo Zhenfeng waved his hand, and then stepped into the fortress, forming a momentary change. Is it..."

"Yes, I just waited to see that the devil's emperor Mo Zhenfeng stepped into the super huge fortress, but he didn't know whether it was him, but he was also in the fortress. ... It is highly probable that the celestial celestial celestial sorcerer Sha Baofeng is also in the fortress. This is because they are deliberately confused!"

"Do you mean a conspiracy? Isn't the devil... has collusion with the Tianji?"

The last immortal grotesque is almost like exclamation, and the voice is several times higher, because this kind of guess is so amazing. If everything is true, it is very likely that the migration of the celestial family is just an illusion. This time, the two major planes of more than 50 million coalition forces entered the first universe for conquest, and will undoubtedly wait for the initiative to jump into the trap...

Chapter 4034: Raging the void

"boom!"

"Booming..."

In the Devil's Star Field, the Devil's Samsung's inner defense circle is a vast expanse of empty space, two or three million miles away, and now it has all been turned into a world of blood and fire, like purgatory.

The huge bombing sounds raging in the void, every loud and loud sound, representing a warship being hit by one or more gunfire energy beams, either half destroyed or completely destroyed, directly blasted, turned into A huge fireball, let this piece of the universe that is already bright and incomparable... more gorgeous!

It is only two squadrons from the second cosmic plane and the third cosmic plane. The total number of warships, fortresses and fortresses has exceeded 50 million.

Coupled with the 20 million warships of the Devils, the total number of warships stranded in this void has exceeded 70 million.

Even the full-scale war between the Celestial and the Faroese Federation has never been such a large scale since the age of 10,000 years.

Now, in the battle of the first universe, the battle between the four-member alliance led by the devil and the space mouse, the \*\*\*\* ant, and the giant tyrant, and the alliance of the nations of the first cosmic slaves, even if fierce It's still in full swing, and it's far from reaching such a scale!

Not to mention that among the more than 70 million warships that have long been in the scuffle, there are more than five million indigenous beasts that are large and smaller than the warships.

In addition, in the void, there are a large number of strong people who have been trained to be strong, and they have not stayed in the warships. Instead, they have crossed the void with flesh and each has sacrificed warfare, magic weapon, or manifestation. The bleeding veins are real, and the talents are cast, or they can be killed by two or two, or collectively fighting...

In a word, this star-space war of the big plane has developed to the present day, and it has only evolved into a comprehensive melee, and the two sides of the battle have already launched a full-scale confrontation. It is an endless situation!

This level of starry sky war. The scale of the tens of millions of warships, the general trend of the entire battlefield, is no longer a force that can affect and influence... unless it is an immortal old man!

However, Ye Xuan does not believe in this evil. Although he only cultivates strength in the domain of the main territory, it is too far away from the immortality. He does not have the anti-immortal means of immortality.

For example, in the past, the immortal grotesque, in the short three breathing time, the ability to smooth six vacant voids with diameters of three to four million, Ye Xuan does not.

But if it is just destruction, Ye Xuan is completely ambitious and willing to compete with the immortal blame!

The reason why he did not hesitate to expose the identity of the celestial celestial sorcerer Sha Baofeng, his purpose is also true.

Nowadays, he still doesn't know that he has exposed the identity of the celestial celestial sorcerer Sha Baofeng. It has almost become self-defeating. It has already given the eleven immortal geeks who have not planned to take the initiative. The thick suspicion is even more unlikely to be easily shot.

In fact, even if you know this, Ye Xuan will not hesitate, and he is destined to shoot.

This battle must invade the first universe, destroying the two major forces of the entire demonic group, and gaining more time for the rapid development of themselves and the devil's group.

Therefore, even if the doubts of the eleven immortal grotesques are strong, Ye Xuan will use more powerful means to force them to endure, and eventually they can't help but shoot...

"Hey!"

In the void, the alloy \*\*\*\* of the size of 100,000 feet suddenly rises up and emits a tremor of the trembling starry sky. At the same time, the second anti-material energy spear of the black body is in a short half-moon. In the right hand of the alloy God of War... quietly condensed!

"call out!"

Counting on the self-destructive alloy spear that was previously developed by the world's worms, this is the third spear. It was thrown out by Ye Xuan, and this time he is aiming for the most enemy battleships. region.

As the sound of the breakout sounded, all the warships and large and small fortresses and fortresses that were touched by the spears along the way blew up. In the blink of an eye, more than 100,000 warships were destroyed.

In a short period of time, the three spears destroyed at least 200,000 ships of various types. Compared with the two major conquests, the number of warships exceeding 50 million is not a problem, but it is based on Ye Xuan. The power of the effort, completed in just over a dozen breaths, is absolutely shocking!

This is clearly a single-handed, raging one-sided rhythm!

After a brief shock, among the flagship fortresses of the two hostile camps in the vain air, the voices of the roar of the top leaders of the public commanded one after another...

"Block him, stop him immediately!"

"All the nearby fortresses and fortresses, concentrated firepower, bombarded with antimatter deadlight guns..."

"Immediately! Execute immediately! Destroy this \*\*\*\* humanoid \*\*\*\* of war at the fastest speed!"

"Hey, I want to think about the big situation of a Star Wars by myself. Who is he? Savior? Such a thing, even the five enchanting ones, can never be done!"

"I don't have to wait any more, the old man doesn't believe that the 50 million warships, even if only one-tenth of them fire at the same time, he only has his own strength and ability to protect it!"

"What a \*\*\*\* five enchanting one, after all, is still going to fall. Throughout the ages, the three starry sky planes never lack true enchanting, but as long as they fail to grow up, everything is a cloud."

"This person is too sharp, and he has ruined his own future. There is no way to go. He will be killed by countless warships in this battle!"

.....

I have to say that the alloy \*\*\*\* of war suddenly turned out, just three war spears ended more than 200,000 warships and fortresses and fortresses. In a short period of time, the enemy's two major squad camps, countless star powers It has not yet come back.

Still in shock, the impact on morale is very serious.

In the flagship fortress in the distance, the leaders of the major ethnic groups and the top forces deliberately talked like this, degrading the alloy \*\*\*\* of war and deliberately mocking the five enchanting Ye Xuan, which is deliberately intended to enhance morale.

At this moment, with this reprimand and the sound of cold, the large number of underlying commanders in the large and small enemy camps and fortresses, which are close to the alloy warriors, have finally recovered and revived. In the first time, we implemented the intentions of a group of high-level commanders and issued instructions...

In an instant, at least three million large and small fortresses and fortresses have been slowly moved, aiming at the alloy \*\*\*\* of war.

This is clearly to be the overwhelming number of anti-material energy light columns, the alloy \*\*\*\* of the shape of a hundred thousand feet, the rhythm of smashing into slag...

Chapter 4035: Left hand Ding right hand stick

"How? I dare not go up, but I ask the following to suppress people. Is this the rhythm of the decapitation of the king?"

Ye Xuan sneered, seeing the psychology of those big ethnic groups and top-level powers who had previously spoken, even when they laughed and ridiculed.

These guys have been clearly afraid of being beaten. Six semi-authentic grotesque shots, the first two of them died, and the four of them were suddenly immortal and suddenly intervened in the battlefield. One can't escape.

But now, they are clearly afraid of Ye Xuan, they simply do not dare to go into battle to fight, but sent the following 喽啰 to count the number of people, actually deliberately downplayed by words, want to pull up Low morale.

This is ridiculous!

Ye Xuan will not give them face, demolition on the spot, and will not care whether this will have a new impact on the morale of the other camp. Then, the fourth spear in his hand will be again in a short breath. Coagulation forming.

"Old guys, I am afraid of this king, I dare not go into battle, but I still have a swollen face and rushed to fat, strong hard air..."

Speaking of this, Ye Xuan's tone is already full of contempt, and more arrogant, the last sentence, like a mad, domineering side leakage: "This king will return to you a big ear, now someone dare to fight and fight?" "

"call out!"

"Booming..."

The words fell, the fourth war spear Ye Xuan has been thrown out suddenly, breaking the air and screaming, this time, Ye Xuan aimed at a flagship fortress that had previously had a high-level voice.

The spears flew away, and there was no bombardment of any other warships along the way. They followed the gap between the dense warships and rushed over the flagship fortress.

The huge sound of the explosion sounded instantly. The 100,000-meter-diameter flagship fortress was directly pierced and then exploded. The short half of the breath was disintegrated.

At the same time, a large number of strong people of this family rushed out of the flagship fortress that collapsed. Most of them were wounded. Among them, there was a figure, strong breath, clearly a half-step immortal, but it was awkward because of sudden arrival. The explosion and the image is greatly damaged.

What is even more unbearable is that this half-aged ancestor faced Ye Xuan's face-lifting provocation of such a red fruit, but there was no such thing as a slight morale. He had no temper at all, and turned coldly and looked at the void here. When I pinched my nose, I turned and went to the distant sky.

"Ha ha ha..."

"I didn't say that domineering, just like a comment, I decided that this king must fight this battle? At this moment, I was sucked up with a big ear, how to escape and fall away?"

The alloy \*\*\*\* of war looked up and laughed, and the merciless sarcasm of thousands of miles, the countless strongmen of the three camps in the virtual air battle all listened to the ears.

In the camp of the Devils, countless demons and strong men laughed up, morale suddenly soared, and even millions of indigenous beasts led by Taikoo Porcupine and Taikoo tortoise were excited and shouted. For a time, it can be said that morale is like a rainbow.

On the other hand, the two major congress camps of the enemy are dead.

Although in the situation on the battlefield, the two major squad camps are indeed occupying an advantage at this moment, but the five demon sorcerer, the devil's emperor Mo Zhenfeng, is too embarrassed, and he has been using his facts to interpret his unbelievable Yingzi, at this moment even a semi-authentic grotesque was hit in the face of his face, did not dare to scream, pinching his nose was directly recognized.

Invisibly, the morale of the two major congress camps is once again low. Many ethnic groups or top powerhouses even raised their hands and raised their faces. In just one day, this is the second time they have this kind of Action, when it is really speechless!

"Hey!"

"Hey..."

At the same time, the millions of warships in the two camps close to Ye Xuan have already completed the adjustment of the gunshot muzzle, all of which have locked the huge body of the alloy \*\*\*\* of war, and the low humming sounds at this moment. , dense and numb, paving a void.

This is the movement caused by millions of large and small fortresses and fortresses simultaneously charging the anti-matter energy dead light guns of the ship. It is scalp and numb. In a virtual battlefield in the distance, it is looking at the whole situation and issuing a road from time to time. The generation of the devil, Mo Yutian, and other devils of the devil's royal family, immediately hang their hearts in the eyes of the blind.

The alloy battleship is indeed an amazing force, a horrible figure of 100,000 feet, and a starry sky war, just a brute force can sweep the stars.

What's more, he also has anti-matter energy light spears and other big killers, even on the huge body, there are a lot of combat equipment.

In the far battle, the shoulders and the back even have muzzle of antimatter dead light guns, including elbows and knees.

In terms of melee, these joints have the same kind of barbs and thorns that can be stretched and displayed at any time...

Even so, in the face of the massive anti-matter energy death light cannons that have been bombarded by millions of warships at the same time, the alloy \*\*\*\* of war is against the sky, I am afraid it will not last.

His left hand does have a shield, including the back of the huge body, and a pair of huge lights, all of which are black anti-material light.

This pair of light attack can be turned into a pair of invincible giant blades, the ability to close together, the alloy God of War's body shape, like an energy shield, to protect themselves.

But at most, it can only protect the energy light column of a small amount of antimatter dead light cannon. Faced with millions of gun light beams, the body shape is overwhelmed, just the energy protection formed by this shield and the back light. Shield, it is impossible to block...

With this in mind, the tops of the demons and royal families suddenly became worried. Just as the generation of the emperor Mo Zhentian wants to give orders, on the occasion of the attack on the millions of large fortresses and fortresses of the enemy's two major congress camps, the front of the void battlefield At the domain, new changes have occurred again.

"call out!"

When the sound broke, the alloy warrior suddenly raised his left hand and threw the huge anti-matter death shield that was originally held in his left hand as a huge dart. At least 100,000 warships along the way. With the big and small fortresses and fortresses cut into two halves, the scene was blown into a huge fireball.

Too sharp, this is the formation of antimatter energy, absolutely invincible.

However, while the antimatter dead Shield was thrown out, the right hand of the alloy God of War did not condense a new spear. It seems that there is no intention to continue the attack.

Then, just as the countless star powers in the three camps of the opposing sides did not understand what his intentions were, Ye Xuan had already slammed his head and suddenly burst into a burst, with huge arms and a show, a big tripod and a The black stick was taken directly from the immortal world and held in his hand.

The black stick of the right hand is the \*\*\*\* stick that has just been harvested in the body. Nowadays, in order to match the shape of the alloy \*\*\*\* of war, it is controlled to a length of 100,000 feet.

As for the left hand, it is Shennong Ding. Ye Xuan holds one of the three tripods in one hand. The volume of Baoding is controlled to about 100,000 feet...

Chapter 4036: Inferred incorrectly

Left hand Shennong Baoding!

Right hand blackhead!

All of them are heavy violent weapons. At this moment, they are held in the hands of the alloy gods of 100,000 feet. Compared with the previous Ye Xuan's three-armed and six-armed konjac, the image of the black-headed stick is one-handed, and it is even more violent. People are eye-catching!

In the void, countless battleships and large and small fortresses in the three camps of the opposing sides, inside the fortress, after a brief silence, a large burst of exclamation sounded.

"Big black stick! It's a \*\*\*\* stick..."

"Damn, what is the devil's emperor Mo Zhenfeng doing? Why did you suddenly sacrifice this fierce big stick?"

"And there is also a giant tripod. It should be the famous medicine king in the hands of the younger fox, the left hand and the right hand. What do you want to do?"

"Does he think that this will stop the bombardment of countless anti-matter energy guns of millions of warships?"

"This is clearly the rhythm of the offensive, not the defense, more and more people can not understand, the devil's emperor Mo Zhenfeng does not go out of the ordinary road, do not play cards according to common sense, in this case, do not want The way to escape the dodge, actually still want to launch an attack!"

"If you want to escape, you will not be able to escape. At most, there will be another breath. Millions of dead light cannons will be launched. The guns will be heard. At that time, the energy beam of the gun will overwhelm its body shape and it is destined to fall. ...."

"call out!"

"Hey..."

The sounds of these exclamations have not yet fallen, and the three or four million ships in the vain air have adjusted the direction of the muzzle, and the various battleships and fortresses and fortresses that have locked the shape of the alloy battleship have been bombarded.

The sound of the empty air resounded through this piece of emptiness, and the energy light columns of the black antimatter dead light cannons of various sizes were instantly interwoven into the net in the void, and the central point of this black giant net was the giant figure of 100,000 feet. Alloy God of War.

In the blink of an eye, the energy light column of millions of dead light cannons has shrouded the entire shape of the alloy \*\*\*\* of war, and can no longer see a little, the vastness of the sky around it, the black The energy of the dead light can seem to completely destroy this corner of the universe.

At this moment, there were countless strong men in the three camps in the imaginary air, and all of them mentioned the eyes of the blind man. The starry situation that was fierce like a rainbow was in a state of stagnation at this moment, like a freeze.

Mo Zhenfeng, the devil's emperor, is too important. Like the flag of the devil, the influence of this war is so deep that no one can estimate it.

Nowadays, he is facing the test of life and death, but this is not just a matter of his own. It can be said that this time he can finally get through, it is related to the final result of this plane-level starry sky war, it is about the void. The glory and death of every strong man in the battlefield camp!

This is by no means an exaggeration. Almost every strong man in the three camps of the hostile side has such a clear understanding, even including the more than ten ancestors who have long been stunned by him, and simply dare not jump out of their rivalry camp. Semi-aging old ancestors.

At this moment, the ten-year-old semi-aging ancestors, including Saar, Longsi Gorge and Gong Shouxin, are absolutely more nervous than anyone else, and their hearts are more upset.

Because of their cultivation, they clearly saw a strange scene before the fascinating anti-material energy formed by millions of dead light guns.

At that moment, the alloy warrior held one of the three tripods, and the master of the drug, Wang Ding, who was extremely domineering in the left hand, had a large number of nine-color smog.

In the tenth of a short time, the giant body shape of the alloy \*\*\*\* of war is completely shrouded.

For the heroic name of Yaowangding, they are naturally clear and profound.

Mo Yufeng, the demon of the five demon sorcerers, has become the master of Baoding, who has already refining this trip, and his power is obviously more clear.

In fact, in the second change of the star of the evil source, the singer of the fox was to resist the horror of the smoldering furnace, and to bring out millions of stars from the source of evil. Aboriginal beasts and a large number of strong families.

The latter was used by him to deceive the various ethnic groups and gained a large amount of cultivation resources. The former, however, seems to eventually return to the present. Together with the 20 million warships of the Devils, they are jointly fighting the 50 million warships of the two planes. Expedition...

Reminiscent of all this, Sal and other more than a dozen major ethnic groups and the top-level forces of the semi-dead ancestors can not calmly, three or four million size fortress and fortress to launch a volley, the formation of this black anti-material light energy ocean although Power can be horrible, afraid that even immortal can shake, but compared with the horror of the furnace in the source of evil! It is difficult to judge the end of the strong and weak!

At this moment, the thing they are most worried about is that the devil's emperor Mo Yufeng relies on the endless nine-color fog of the drug king's gods to fight against this wave of volley attacks.

If this is the case, then this enchanting can really not kill, even if the army of 50 million warships can not help, then it still has it?

This result is desperate!

Unfortunately, even if you don't want to see such a scene, in the end, what has happened is still there.

This antimatter energy does not last forever. Once it is bombarded in the self-reverse material light energy generator, it will be quickly consumed in the positive material world, even if it is formed by three or four million dead light gun energy beams. Antimatter energy is the ocean, but its time of persistence is only a few breaths.

After a few breaths, this black ocean disappeared completely.

The body of the martial arts that was originally shrouded in it and could no longer be seen in the alloy of the \*\*\*\* of war, but once again appeared in the vision of everyone.

In the left hand and the holding of the Baoding's tripod, there are a lot of colorful smog and mist as the springs are sprayed out, and the whole body shape is held in it. The cloud is covered with mist and fog, revealing the dreamy color, but Really incomparable.

Obviously, the energy of this black anti-matter ocean that has been dissipated is blocked by these colorful smog mists, and perhaps consumes a part of the nine-color smog.

But it doesn't matter. The real form of this Shennong Baoding is much larger than a giant star. It shows how terrible the energy inside. What Ye Xuan can evoke now is only a small part.

Even if it consumes some of the smog of misty smog in the mouth of the mouth, it will not reach the extent that Dingwei is detrimental, and it is far from being able to reach it.

In this scene, all the people are sluggish, and the void is dead again.

Then, in the void in the far side of the enemy's two camps, the eleven immortal geeks who squatted in the parallel space finally uttered an exclamation, with amazement: "The situation is somewhat wrong. Is it our previous judgment... is it wrong?"

Chapter 4037: Disrupt a star war

This scene is like a miracle!

Three or four million large and small fortresses and fortresses, all-powered, and the energy light columns of millions of dead light cannons gather in one place, forming an anti-matter energy ocean that envelopes the emptiness of the miles...

This kind of horrible attack can be instigated or even seriously injured even if it is immortal.

Mo Zhenfeng, the devil's emperor, is even one of the five enchanting ones, but after all, his own cultivation is too weak, and he is still far from growing up. Even if he activates the blood of the three heads and six arms, it is only the domain of the realm.

Even if this figure exceeds the big fortress, it is comparable to the protection of the human-type alloy God of War, which is a super fortress of Star Wars. It is absolutely impossible to compare it with the real immortal.

In theory, it is absolutely impossible to resist the impact of such an antimatter energy ocean.

But the de facto result is just the opposite. People are not only stunned, but also unscathed. What kind of posture is this black anti-matter energy before the ocean cover, when the anti-matter energy ocean is after every dozen breaths? When dissipating... what position is still there!

What does this mean?

Representing this horrible anti-material light energy ocean, it has never been put in the eyes of others. People are covered by them, and they are shocked, but they are struggling to avoid them. They stand proudly and vacant!

This is the real invincible position!

The five enchanting ones, the first person of the younger generation, is so beautiful, so so... desperate!

On the side of the Devil's camp, countless Devil's strongmen immediately cheered for the thunder, and even the millions of indigenous beasts led by the Taikoo Porcupine and the Taikoo tortoise, also looked up to the sky, excitedly screaming and fierce.

In contrast, in the two camps of the enemy's opponents, there is a dead silence, only endless sighs, and the sound of sighing and sighing.

The semi-aging ancestors of Thrall and Longsixia, Gongshouxin and other major ethnic groups and top forces are even more stunned, and the scorpion shoots out the desperate light.

This time, they are completely desperate, and they are even more unwilling, because in their view, this is not the strength of the devil's emperor Mo Yufeng, it is simply relying on the power of the battle with the furnace. The horror drug Wang Ding's credit.

It's a pity that it's useless to use it again.

This giant tripod was originally in the illusory sky of the celestial war empire of the Third Cosmic Terran Science and Technology. It was impossible to find it without the immortal strongman, but no one ever could shake it and take it away.

Nowadays, he is thoroughly refining in the hands of the devil's emperor Mo Zhenfeng, and the size is free. This has already explained the problem!

After a short period of silence, in the void in the far side of the enemy's two camps, the eleven immortal geeks who squatted in the parallel space finally uttered an exclamation, with amazement...

"The situation is a bit wrong. Is it our previous judgment... is it wrong?"

"It's really not right. If I have inferred from the previous inferences, this is just a conspiracy of the demon and the celestial family. Although Mo Xiaoer has stepped into the super fortress that turned into an alloy \*\*\*\* of war, the fact that the mechanical fusion is actually not He, but the Tianji ancestors who have already settled in the super fortress, how to explain this scene in front of him?"

"Whether it is the \*\*\*\* stick, or the Shennong giant tripod, it is the treasure of the devil's emperor Mo Zhenfeng. It is impossible to be a fake hand, even the devil and the heavenly family. The relationship is closer, and Mo Xiaoe can never temporarily lend it to Sha Baofeng!"

"In fact, even if you want to borrow it, it is impossible. If these heavyweights are refining, the outsiders can no longer be motivated anyway, but for now, they are clearly held in the hands of the alloy \*\*\*\* of war, and There is no delay in urging, it is absolutely the deity to sacrifice..."

"Is it... the existence of mechanical fusion in the alloy \*\*\*\* of war, is it really the devil's emperor Mo Zhenfeng? The so-called five enchanting one is actually true?"

"This is the only reasonable explanation... enchanting, even the celestial family has been infiltrated by him. It has also been mixed up with the high-ranking patriarch of the tribe. Is the emperor blind?"

"This should be the case. The old man had previously felt that Sha Baofeng's rebellion against the Tianji family was not very real. Now it seems that the only explanation is that Mo Xiaoe's identity in the Tianji ethnic group was revealed and was stunned by the emperor. Only when such words were released, the emperor was disgusted. The latter took care of his face and could only recognize his face..."

"So, the conspiracy of the so-called demon and the celestial family is completely non-existent. If so, should I wait for the next plan, should I make some adjustments again? What is it?" The situation of the whole war, including the layout of the strategic level, has been repeatedly destroyed by Mo Xiaoe... This kid is too tossed, it is a disaster!"

"Be prepared to shoot, just by the conventional combat power in front, it is no longer possible to suppress it. Even if there are 50 million warships, it will be useless. Only when I wait for immortal shots and cast the magical power of the immortal strong can we suppress..."

"Seconded!"

"Seconded....."

.....

"Booming..."

"boom!"

On the occasion of the eleven immortal grotesque secrets and secret business, in the void battlefield of more than 70 million warships in the front three sides of the enemy camp, after a short silence, there will be a lot of roaring sounds in an instant, once again It's ringing.

Countless naval guns, after a brief stagnation, have now launched bombardment again.

Everything before is just a high-profile episode. For the numerous star-studded powerhouses in the tens of millions of warships on both sides, this battle is not far from the end, or even just started...

The fierce starry sky is once again unfolding, but compared to the previous, the morale of the rival camps is completely different.

With more than 50 million warships, large and small fortresses, and two fortresses in the fortress, the morale is simply low.

On the other hand, only half of the opponent's devils and indigenous beasts are at the same time. At this moment, they are already morale. Although they are still in a state of decline, no one has retired at all. All the indigenous beasts are screaming, by the flesh. The starry battle of the stars in the void is eye-catching.

It is also at this time, the shape of a hundred thousand feet of giant, and the body has a strong nine-color smog-covered alloy \*\*\*\* of war, also in the first room, a few million miles away from the right front, somewhere The area where a large number of enemy warships are congested has seen the past, Yusenmeng...

The waves of the anti-material light energy formed by the numerous energy sources of the dead light cannons are nearly one-third of the oceans that have been bombarded from this direction.

This area, with a large number of large and small fortresses and fortresses, is the best target. At this moment, they have been eye-catching by Ye Xuan...

Chapter 4038: Where does the monster run?

"Have you been cool?"

"Hey, millions of warships are volleying, and the anti-matter energy beams of countless dead light cannons converge in one place, intertwined into a net, and gathered into the sea... This is really a big deal!"

Turning to look to the right front of the piece of the fortress with a large number of large and small fortresses and fortresses, the face of the alloy God of War has a change of expression at this moment, showing a humanized contempt.

In the mouth, Ye Xuan's voice was heard, and there was also a lot of sarcasm and embarrassment. But when it was introduced into the ears of the starry sky in a large number of warships, it was no different from the evil spirits. All the people were I was so scared that I was in the face of a dead end!

Even if the brain is in the water, if you listen to such a discourse, you can immediately guess what the other party wants to do... Have you been cool before? Since I haven't killed Laozi, now, it's my turn to fight back!

Realizing this, the commanders in these large and small fortresses and fortresses are flying around, and the exclamations are almost simultaneously transmitted, and orders are issued...

"Dissipate! Disperse immediately..."

"God, this \*\*\*\* of killing is being smashed, this is the rhythm to be embarrassed!"

"You guys are idiots, all around are big fortresses and fortresses, waiting for them to move out and letting go, we have to die two or three times, and immediately start the jump program, no matter where you go, just open the void teleport, leave this A corner of the sky will do!"

"When it's over, let's be stared. The anti-material energy beam of the dead light cannon that was spurred by this time is the most densely-knit, the devil's emperor Mo Zhenfeng. This is the rhythm of immediate revenge!"

"Hey!"

"Hey..."

.....

Throughout the hustle and bustle, the exclamation of chaos still has not yet fallen. This area has already sounded a lot of low humming sounds. A large number of warships are crowded together, but the edge can immediately escape, but in the central area. But can only wait.

However, the current situation is too critical. The fierceness of the alloy \*\*\*\* of war has long been deep in the hearts of the people. No one dares to take it lightly. Therefore, with the issuance of instructions, a large number of warships will begin to charge directly, ready to leave the film in a virtual way. Let me talk about the area.

In fact, the surrounding areas of this Star Wars have long been densely packed with warships and fortresses and fortresses. It is extremely unwise to launch a battleship in this situation. It is highly probable that after the void jump is completed, it is directly Appeared above a battleship, forming a crushing impact.

Or after the completion of the void jump, only a certain gap appeared, the hull was just whistling, passing through the energy beam of this node, this is the so-called star-level lying gun, the most cup.

However, the performance of the alloy gods in this battle, the pressure formed is too heavy, and the innumerable strongmen in the two camps of the enemy, including the more than ten semi-aging ancestors such as Thrall, have almost all of their hearts. Psychological shadows.

At this moment, in the face of the alloy gods that are about to be killed, even if they risk this kind of danger, they will not be able to take care of them. Even if they suddenly encounter the accident after

the void jump, they will be better off staying in the original position. The ground was immediately smashed by the alloy \*\*\*\* of war...

"Want to go? I am afraid I want to think more?"

Ye Xuan sneered, and immediately began to intercept, the giant figure of the alloy \*\*\*\* of war, the giant figure of ten thousand feet is a hundred thousand miles. During this period, Shennong Baoding and the \*\*\*\* stick that he held in his left and right hands did not idle.

Shennong Baoding became a real heavy weapon and swept straight out. All the warships and fortresses and fortresses encountered along the way blew up.

The same is true for the big-handed black stick in the right hand. Although it is lighter than the Shending Ding of the Baoding form, it does not have the heavy weapon power that can be collapsed when a large battleship is collapsed, but it is more dexterous and is the alloy of the \*\*\*\* of war. The right hand picked up the windmill, and the wind and the wind, the various types of warships that were touched by the people, all without exception, all exploded.

This road has been killed, but millions of miles away, for the 100,000-foot-high alloy \*\*\*\* of war, it is just a few dozen virtual big steps.

In just a dozen breaths, Ye Xuan has already rushed to the void area with a large number of fortresses and fortresses, and at least two or three hundred thousand enemy warships destroyed by Shennong Baoding and the \*\*\*\* stick along the way. Ship!

At this time, millions of warships and large and small fortresses and fortresses that were congested in this corner of the void had a small part of the virtual jump and successfully fled, but Ye Xuan did not pay attention to it, and there were still more enemy warships in front. Let's pick it up first, as for those who have escaped, go back and cook!

The next scene perfectly interpreted the phrase of the tiger into the flock, and it was still starry.

The size of the 100,000-foot giant alloy warrior is huge, even the 100,000-meter-diameter big fortress is just a small point in front of him, not to mention the left and right hands, each with a Baoding and a black stick. All are the size of a hundred thousand feet.

After sweeping down, almost all kinds of warships and large and small fortresses, the fortress rumbling and blasting...

Such a scene is like a starry purgatory. With a large number of various warships blasting, the star-studded powerhouses of countless two camps have fallen out, all of them exclaimed and fled in the void.

However, many of them are extremely unfortunate. In the process of running away, even if they were only swept away by the winds of Shennong Baoding and the \*\*\*\* sticks, they all died in a moment and became a \*\*\*\* rain. The result of sprinkling the void.

The death and injury are too fierce, and every second has a lot of life disappearing. This is the real starry sky purgatory!

Coincidentally, among the millions of warships that are congested in this area, there is exactly one flagship fortress of the hostile camp that sits on a semi-aging ancestor.

At this time, although the main flagship fortress has not been smashed by Ye Xuan, it is obviously unable to escape such an ending, because the filling of its void jump has not been completed, and the alloy \*\*\*\* of war has approached only tens of thousands of miles away. In the vicinity, you only need to have a big step to get there.

Under the urgency of the heart, the semi-dead old man sitting in the main flagship fortress was still unable to sit still, and directly rushed out of the flagship fortress, manifesting the bleeding pulse, and turning around and going to the distance. go with.

This semi-authentic grotesque comes from the second universe, and it is one of the remaining semi-aging ancestors of the Second Universe's camp command. Seeing that the blood of the control is about a thousand feet, it is full of greenery. Some parts have the wrinkles of the old bark, which is clearly a semi-aging ancestor from the tree spirit.

To put it bluntly, it looks like an old tree has become fine.

Although this is a bit horrible, the facts are true, because the tree spirits were originally planted with the same spirit!

When I saw that I had hit a big fish, Ye Xuan was happy. The alloy warrior strode a big step and laid down other warships. He went straight to the past and screamed in the mouth: "Monster, where to run..."

Chapter 4039: Die another

"puff!"

Where a monster runs, almost the woodling spirit's semi-aging old ancestors hold the puppet to the blood on the spot, too bully, actually still personal attack!

"boom!"

In the next moment, a loud bang came out, the left hand holding Shennong Baoding, the right hand holding the \*\*\*\* rod of the alloy \*\*\*\* of war has come to the near, the big stick is a sweep, not yet waiting for Ling Baopu to return to God, it has already The stature flew out, at least two or three million miles.

Then, the scream of the horror of the devil's emperor Mo Zhenfeng rang and was heard in the ear: "Hey? Is it the fineness of the iron tree? It is not gorgeous! A dead wood only, is it necessary? Are you two sticks? It's too wasteful..."

"puff!"

This time, Ling Baopu is really vomiting blood, I don't know if it is qi, or is it smashed by the \*\*\*\* stick, and it sprays a green sap, and the blue-green stars are winding around!

"Little bastard, you are too deceiving, I am %##\*..."

The blue-green stars that did not wait for the top of the head were completely scattered. The half-aged ancestor of the tree spirits had already opened on the spot and burst into swearing.

The dull old monster, but was turned into a deadwood by a junior, saying that a stick is not smashed and wasted, this is simply the shame of the red fruit, too unbearable.

Under the turmoil of the heart, Ling Baopu did not escape. In any case, the speed of the other party is so fast, and there is basically no hope to escape. He immediately screamed, and only a thousand feet or so of the body suddenly soared, a large green color quickly spread in the void...

"call out!"

"call out....."

Numerous sharp sounds of broken air sounded. In the blink of an eye, the shape of Ling Bao's body was like a giant tree in the sky. It turned into a huge tree monster with incomparable brilliance. In the body, there were countless spurts at the moment. The thick roots of the road tentacles...

Like the network, with the position of the deity as the center point, it quickly diverges toward the surrounding area, and a large piece of void is covered in a thousand miles.

This is the technique of the blood of the family.

Although these vines can only cover a million miles away, in this void covered by the vine, as long as there is any change, the deity can be keenly captured for the first time and form a certain degree of difficulty. Seal effect!

At this point, Ye Xuan was almost aware of the first time, because in the star field of the evil, he had encountered the latter's \*\*\*\* magical powers when he was fighting against the sect of the tree spirit.

I have to say that the \*\*\*\* magical power of this tree spirit is still quite a headache. It is a million square miles of a void, and countless vine-like tentacles like a snake are extremely entangled.

But relatively speaking, this \*\*\*\* magical power has no small benefit to Ye Xuan, and he has benefited from it.

Therefore, at this moment, I suddenly saw it, and the alloy \*\*\*\* of war stunned a little, and soon grinned.

At the same time, a systemic prompt sound, also at this moment, in the mind of Ye Xuan, extremely loudly sounded: "Hey, congratulations to the host, found the essence of wood spirit! Effect: It is possible to enhance the Shennong fire The grade! Is it extracted immediately?"

Sure enough, I have the opportunity to absorb a lot of wood spirits!

This piece of green and green vines, which covered a million miles of empty space, originally made Ye Xuan feel a headache, but encountered such a turning point. As expected, it was like falling out of the pie!

The so-called extraction, in fact, is very simple, is to use the Shennong flame to burn the green vines in the front of the void, and in this burning process, the vine will be wilted into ashes, the essence of the wood , will be directly absorbed by the Shennong fire, become the energy and resources of the growth and evolution of Shennong!

In front of this piece of Ling Teng full of a million pieces of empty space, even if each of the vines contains only a trace of the so-called wood spirit essence, but the key wins in quantity, according to Ye Xuan It is estimated that, without mentioning the extravagant hope, the grade of Shennong's flames will be upgraded again. After all, the Shennong flames of today are six-color flames, far from the original two-color flames, but it is still somewhat beneficial!

One thought of this, he did not hesitate, and in the Shennong Ding, the left hand holding the Shennong Ding, immediately poured the same color of the sacred Shennong six-color flame, spreading toward the positive, still expanding the green vine volcano And go.

Just after the six-color flame of the canopy Shennong arrived at the edge of Lingkong Vine, and finally touched the green and green vines of varying thickness, let everyone be surprised, and the scene of exclamation appeared!

"call....."

"Oh la la!"

"Hey..."

The flames rang and the sound of the whistling sounded, followed by the squeaky and squeaky sound of the ice-splattering ice. The sacred six-color flame of only a hundred feet in diameter was touched by the edge of the vine. At the same moment, it suddenly became a big fire.

In less than one breath, it has spread for tens of thousands of miles, and this moment, a million miles of the saplings of the vines, burned a dazzling hole!

"what....."

"Save me, this ghost flame is actually absorbing my essence of wood, this is the source of my wood spirit's life..."

Millions of miles of the vines of the emptiness of the central domain, the woodlings of the semi-aging old ancestral ancestors, the face of the face changed greatly, and a terrified scream in the mouth, the whole figure is in this moment, began to tremble!

For the Muling strong, the green vine sea that is activated by the bloodline is actually his body. Once this vast green vine is incinerated, even if the power of life is strong, It will also be a disaster.

Even if there is no degeneration on the spot, its life level will be defeated, and the birth of the ingenuity will disappear and turn into an ordinary dead wood. This is definitely the result that any woodling strongman is unwilling to see and absolutely unacceptable.

Unfortunately, Ye Xuan will not care so much.

The Muling strongman who met this time is a semi-aging ancestor of the family. Its body, which is the essence of the wood essence contained in this huge green vine, is far from the last encounter. The family of Qiankun Daozi is simple and comparable.

I missed this village and I didn't have this store. Now I have the opportunity to let go of it, can I miss it?

"call....."

In the blink of an eye, Shennong's six-color flame is a great fire. Just two or three breaths, this piece has reached a radius of a million square meters, but it is still expanding outwards. Burned out.

As Ye Xuan had previously speculated, because it has evolved to the extent of the six-color flame, this time, even if it absorbs more of the wood essence than the previous one, the grade of Shennong's flame does not improve again.

However, although the grade has not improved, the power has increased slightly. This is also a kind of harvest, which makes Ye Xuan feel satisfied.

At this point, the short ten breaths were not enough. The more than ten semi-relenting ancestors of the two opposing camps of the enemy had no more suspense and once again fell down one, and the hairs were not able to leave half of them...

Chapter 4040: Broken green sheep

With the semi-destructive old ancestors of the Mulings, the green vines of the body have completely disappeared into the ocean, and the essence of the wood spirits in the body has been absorbed by the sacred six-color flame of Ye Xuan. Into a dead silence, followed by a lot of downs and downs, and the sound of screaming...

"This... it's too amazing. It's a wonderful fireworks. It's no wonder that it was able to trap four semi-aging ancestors at the same time!"

"A half-dead ancestor, and a strong wood spirit who is known for his vitality, has only completely supported a few breaths and completely annihilated. Now it seems that the former four-and-a-half

ancestors were so lucky. The immortal grotesques help each other and escape from the similar six-color flame sea."

"Otherwise, the final result must be the same as it is now. In a short period of time, it will be slain!"

"The sky is over! The five demon sorcerer's devil's emperor Mo Zhenfeng is really against the sky this time. It is absolutely necessary to control the situation and the rhythm of a plane-level starry battle with one's own strength."

"In addition to the immortal old monster shot, who else dare to suppress the word?"

.....

As for the Saul, Longsi Gorge and Gong Shouxin, the four dying ancestors who have just experienced this kind of Shennong six-color flame power can not be seen at the moment, but they are swallowed by the six-color flame sea. The wood spirits are semi-aging and the old ancestors hold the house and let them think of themselves.

It was indeed too lucky before, if not, I am afraid that it has already fallen.

In thought of this, the four semi-mortem grotesque, including several surviving two camps of semi-authentic grotesque, at this time, invariably in the mind to make up their minds, the trend of this war will be How to continue, they will never touch the mold again, jump out and fight with the devil's emperor Mo Yufeng, who is close to death, it is definitely the end of death!

All this happened too fast, and it was almost tens of millions of miles behind the enemy's two major squad camps. The deity crouched in parallel space, leaving only a glimpse of the gods in this star field, paying close attention to all developments. The immortal grotesques have not been able to make any reaction.

They had already decided to shoot Ye Xuan, because from the current situation, not only the conventional strength of more than 50 million warships in front, but also the suppression of the devil's emperor Mo Yufeng, even the dozens of The big ethnic group and the semi-aging ancestors of the top forces are not the opponents.

This five enchanting ones, in the younger generations of the world, is the deserved first person's enchanting existence, and has indeed demonstrated the ability to influence or even influence the situation of this plane-level starry sky with its own power.

It is a pity that they will not be allowed to take the shot. The half-aged ancestor of the Mulings has already fallen.

In just a dozen breaths, the practice of the years has been paid for.

After doing all this, the devil's emperor Mo Zhenfeng seems to have just done a trivial little thing. After turning around, he screamed again, and Shennong Baoding and the \*\*\*\* stick held in his hands swept again. It rushed into the void of a large number of battleships.

The blasting and roaring of the rumbled again, continuing, blinking, and tens of thousands of warships and fortresses and fortresses, turning into fireballs in the sky...

"Roar!"

"The deity can't stand it, you must kill this little \*\*\*\* immediately!"

"Oh..."

An earth-shattering roar came out, the void behind the two major congress camps, the cosmic starry sky was torn apart, and one of the eleven immortal monsters finally shot.

It's no wonder that the first one can't hold back. This immortal old monster is obviously from the second universe. Maybe it's still related to the Mulings. Because it's the bloodline of the manifestation, it's clearly not in the second universe. Any of the top ten ethnic groups.

Among the second cosmic planes, the top ten ethnic groups occupy the general trend, but some are ranked outside the top ten, and within the smaller ethnic groups that do not occupy the general trend, some also have immortal ancestors.

But only one immortality is not enough to guarantee the prosperity of the entire ethnic group. Therefore, these groups outside the top ten will basically choose to form an alliance with a certain ethnic group in the top ten.

The first immortal grotesque that jumped out today, the ethnic group behind them, and the Mulings are this relationship.

Therefore, when he saw that the semi-aging ancestor of the Mulings was killed, he should have expressed it anyway. After all, the Mulings did not have an immortal ancestor, and he almost waited for the ruined wood. The spiritual elite is the half elder of the spirit.

This immortal old monster is a broken young sheep!

At this moment, the blood is really full of 100,000 feet. It is equivalent to the alloy \*\*\*\* of war. The whole body is blue, and a pair of large angles of the bow is said to have some unique power. It is the key to the blood of this group. Some kind of powerful talent, it is said that even the cosmic sky can make a hole with a pair of horns...

It is a pity that this rare talent is supernatural. He is destined to have no chance to show it in public.

Because almost in this parallel, the deity of the Qingyang rushed out in the parallel space, and directly launched the teleport, and blinked to the same moment in front of the alloy \*\*\*\* of war, thousands of miles away from the battlefield, Ye Xuan had already waved the body. The years of war in the immortal world.

After tossing for so long, it's hard to irritate an immortal grotesque. He is going to hit the iron hot, killing this immortal smashing green sheep as fast as possible, so that he will not react to other immortal old monsters. At the time, it is very likely that they will all be irritated and all will rush out.

In this way, his mission is complete!

"boom!"

There was a loud noise in the void, and the golden years of war were swaying in front of him. Ye Xuan in the alloy warrior came out with violent temperament at the first time: "Immortal grotesque, what is mad? The bombing is..."

As the screams rang, the Qingjinmu emperor of the years of warfare also received an instruction to immediately launch a full blow. The next moment, the core node of the central domain of the battlefield, the history of the whole body The Lyme Emperor did not hesitate to act, and immediately began to act.

Within the thousands of hive nodes, the ten Zijin Slim kings and the tens of millions of gold slimes also fully mobilized the power of the body at this moment, and a shocking pressure is rapidly condensing.

"Hey!"

The faint humming sounds, and the invisible ripples spread out from the body of Qingjinmhuang. They immersed in the four walls of the core honeycomb nodes, and along the pipes connected to the outer wall, they instantly passed out. The tens of millions of Slim people in the hive node are all in shape, and the whole body is golden.

These golden mans are layered on top of each other, gathered together, and finally turned from pale gold to rich golden color, and also cast some faint purple gold meaning, it seems completely different from the previous, golden glow Mang, turned into Zijin, although the purple is still quite light, but it is clearly visible, representing the change of its power...
