

Super D. S 411

Chapter 411: Redwood collar change

Now Ye Xuan's blood is now full, the blood of the battle is the blood of the Sword Emperor, the blood of the body is the blood of the Beastmaster, and the blood is the blood of the life tree.

If you want to reintegrate a top-level blood, you have to buy a blood extension bar, and he has no ability to buy it.

However, his most unexpected thing is that he was trapped in this puzzle, and it was more than a month.

After more than a month, Ye Xuan came out of this puzzle, and at the same time, he left the abyss.

In the past month, Ye Xuan is going crazy, he doesn't know how many laps he has circled.

The blood of the treasure hunt in his body has been boiled countless times, indicating that he has the best treasures around him, but he can't find it.

Not only that.

For more than a month, Fei Tianyu flew at least fifty times from the top of his head. In front of him, he reminded him of the daring, but behind him, he was very calmly watching Feitian.

Because he feels that this flying scorpion feels like a display, except that flying in the sky, screaming nothing, nothing to notice him.

Of course, this is when he doesn't jump up or take a ride over Megatron.

This flying scorpion is the guardian of the abyssal air.

At this time, outside the abyss of the Nether.

"Malle Gobi, I have been trapped for more than a month. What kind of ecstasy is it?"

Ye Xuan couldn't help but roar.

He estimated that there must be good things in the place that was protected by the fascination, and there may be secluded grass.

However, with his current strength, I am afraid I can't break that puzzle.

Fortunately, he succeeded in coming out of the abyss of the Nether. At the same time, the realm broke through the power of one hundred and twenty dragons, and a 30% chance to break through the gas, but he still dared not try to break through.

After leaving the abyss, Ye Xuan is leaving quickly, he does not want to stay in this ghost place again. At this time his position was in the vicinity of the day when he was chased into the abyss.

"Forget it, don't want to, find a place to eat something."

Ye Xuan no longer asks for trouble and leaves directly.

There is a city near here, and he is going to eat something in the advanced city.

This city is called the Nether City. It is the closest city to the abyss. The reason why this city is inhabited is because the sacred beasts in the abyss have not left the abyss. Otherwise, the city has long been It is ruined.

Ye Xuan entered the Nether City, then found a restaurant and ordered a la carte.

Just then, he heard another shocking thing.

It turned out that in the more than a month that he was trapped in the abyss of the Nether, a big event happened in the Chimu collar.

The sects of the Redwoods were washed by a mysterious army. And this legion is the body of the sacred lord.

Those tens of thousands of copper corpses are enough to sweep all sects, not to mention the thousands of iron corpses that are more than 100 dragons.

In this short month, the Red Lord took over all the sects and then pointed the spear to a city.

Akagi City!

Chimu City is the main city of Akagi, and it is also the place where the Redwood Lord lives.

To put it simply, the Red Lord wants to regain this arbor.

Although the current arsenal of Akagi is a master of temperament, he is only one hundred and forty dragons. He is quite stressed in the face of the **** corpses of two hundred and sixty dragons.

However, what makes Ye Xuan the most surprised is that the red lord and the two blood corpses do not seem to have appeared, because the two people at the neighboring table have never mentioned it.

"The red lord should be resurrected, but there may have been some accidents, perhaps because it was weak after the resurrection, or was it afraid of attracting the attention of other territorial masters?"

Ye Xuan guessed in his heart.

From the discussion of the two neighbors, he also knows that now the corpse army has been pressed around the city of Akagi, and after a while, it will wash the city of Akagi.

Therefore, the residents of Chimucheng have already migrated to other places, and even those families are also family members.

When Ye Xuan listened to the news, his heart was also in the dark channel. The ambition of the red lord was too big. He wanted to occupy all the sects of the 赤木领, and then refining those masters into copper corpses or iron corpses. ?

Ye Xuan suddenly came to interest.

Because now, he is not a month ago, the power of one hundred and twenty dragons, and then use the beastly king of the violent words, will reach 156 dragons, when you can definitely kill two blood corpses.

It's just that the golden corpse king that has never appeared before, makes him a little jealous.

"Go and ask for it first."

When Ye Xuan thought about it, he left.

Fortunately, the corpse army did not crush the city, otherwise he did not even eat rice.

After leaving, he went to investigate and investigate what was the realm of the disappearance of the red lord a hundred years ago.

Then he is ready to go to Akagi City to see.

The corpse corps, if it is a sacred beast, is a huge fortune for him.

Moreover, if the 10,000 corps attacked Akagi City, there will inevitably be a large number of people dying. At that time, Ye Xuan can fish in troubled waters, and may be able to break through the power of one hundred and thirty dragons.

After inquiring, Ye Xuan also understood that when the red lord was missing, it was already more than one hundred and forty dragons, but he has not broken through.

Ye Xuan estimates that even if the red lord is resurrected, it should be about one hundred and seventy dragons or one hundred and eighty dragons.

This kind of realm, even he can now deal with it.

Therefore, Ye Xuan did not hesitate to rush to Akagi City.

.....

The tens of thousands of corpses have been under pressure, and the city around Chimucheng has become an empty city. At the same time, the arborist of Chimu has invited many masters to defend against this corpse army.

At this time, Ye Xuan has already taken the Megatron to break through the power of the ninety-nine dragons and came to the sky above Chimucheng.

Megatron is also stuck in the ninety-nine dragons. If you want to break through to Bailong and break through to the ambiguous situation, you will need something called black jade concentrate.

The breakthrough of Megatron is much easier than Ye Xuan. It only needs black jade concentrate, and it can be broken after it has been eaten.

But for now, Ye Xuan has no time to help find it.

"It is said that the corpse corps is divided into ten branches. Each small corps has a thousand iron corpses and 10,000 copper corpses..."

Ye Xuan took a look around with Megatron and accidentally found a corps of a legion.

He looked down a few kilometers and found that there were humans and sacred beasts in the legion, headed by several human silver corpses.

At this time, Ye Xuan also understands why this red lord lord wants to attack this Chimu City.

Because the master who fought with him a hundred years ago is the father of the current Redwood lord, the seventh arborist.
