

Super D. S 413

Chapter 413: Tune the tiger away from the mountain

As for the lord of Chimu, nature can't shoot because he understands that there is a behind-the-scenes hand behind the corpse.

But he couldn't think of it. This black hand behind the scenes turned out to be the red lord who disappeared a hundred years ago. He was the red lord who had lost both his father and his wife.

A hundred years ago, the Red Lord was already planning revenge. Although the seventh lord may have died, killing his descendants is also very venting.

"Booming!"

Now, there are loud noises in all directions.

It's just that the masters of Akagi City divided the six corpses of small corpses.

At this time, there was only one old redwood lord left on Dapeng.

Although surrounded by tens of thousands of corpses, the arborist of Akagi did not move, he stood quietly and felt the battle on six sides.

Suddenly, his head turned.

"Where is this..."

The old lord of Akagi condensed his eyes and smashed his feet. He flew straight in one direction.

The warriors who are in a dilemma can walk the air, and he is no exception.

As for what is taking him away, there is no need to say more, naturally one of the two **** bodies.

"Ha ha ha, finally here!"

In the east of Akagi City, the **** corpse of the big knife looked at the red lord who came out of the air and laughed.

He was mixed in this small army and killed the human master who came to block the corpse.

Moreover, his realm is not more than a month ago, but it has broken through the power of one hundred and seventy dragons. However, he is still a dilemma.

When the red lord saw the **** corpse of the big knife, he couldn't help but move. "The blood body of one hundred and seventy dragons?"

"Haha, are you afraid?" Although the **** corpse of the big knife is a powerful situation, his strength is more than the power of the thirty-three dragons than the arborist of the red wood, and may not have the power of a battle.

"Is you, commanding the corpse corps, disturbing my 赤木领, and wanting to razed my Akagi City to the ground?"

Asked the owner of Akagi, and asked.

"Not bad!" The big knife **** nodded.

"why?"

"Why don't you, turn you into my kind, is this reason not enough?" asked the big knife.

This explanation is enough.

The **** corpse of the big knife is not a human being. Although there is still consciousness, the mind will change greatly. It is already instinct to kill.

Therefore, the Redwood Lord is convinced.

"In this case, then I am now except you!"

The lord of Redwood is not nonsense. After all, he wastes a second, and there may be a human master who will give his life to Chimucheng.

He stood in the air and slammed a punch at the **** corpse.

If you are able to reach the strength of Bailong, you can try to break through. If you break through to the environment, the intensity of the infuriating body will increase greatly, and you can also walk through the air.

Although the lord of the Redwoods is 30 times lower than the **** corpse of the big knife, but he is a sullen situation, he really plays the game. He is definitely dominant. After all, martial arts mainly relies on infuriating, and brute force, for being able to volley. For the martyrdom of the crossing, it is not very useful.

The big knife blood corpse moved quickly and flashed through this fist, but the iron corpses behind him did not survive.

"A good man, but I am not a vegetarian." The big **** body screamed and rushed for a period before the full speed, then suddenly jumped up and the big knife held his head high.

"Huh!"

This knife has a mighty power, but the arrogant arbor in the air just moved away, hiding from the past.

However, the Redwood lord did not attack the **** corpse of the big knife, but suddenly took off, and then attacked the corpse of the corpse behind the **** corpse, all of which were large-scale tricks.

In less than ten seconds, the tens of thousands of copper corpses and iron corpses were all bombarded and the blood flowed into the river.

"Really, but I don't have these wastes." The **** corpse smiled coldly.

He knew that he might not be able to help the lord of Akagi, but the lord of Akagi should not be able to help him.

His plan is only to drag the arborist of Akagi.

That's right, just drag it!

Because the big sword blood corpse, on the other side to clear the human master.

Of course, the Redwood Lord still does not know.

"Old guy, eat me a knife!" The big knife blood corpse jumped into the sky in order not to reveal things.

"Humph."

The Redwood Lord easily escaped.

The next moment, he suddenly fell to the ground.

Next, he wants to move the real thing.

"In the air, you still have an advantage. On the land, do you really think you can beat me?" The **** body of the big knife is a bit strange.

"Although your strength is stronger than mine, you are still a dilemma. I will let you know how big the gap between the power and the environment is!" Akagi led the main hand and took out a Chinese product.

"Then I will take a look, how much you can bear." The **** corpse of the big knife flashed and rushed again.

The lord of the Redwoods also condensed his face and greeted him.

One hundred and forty dragons are in an awkward situation, and one is a one-hundred and seventy dragons. No one can tell which one is the challenge.

However, these are all words, and now, who is more powerful.

At the same time, in another direction, the big sword blood corpse was alive.

He also ascended to the power of one hundred and seventy dragons, killing these 120-hundred, one-hundred-thirty-thirty human beings, it is like tofu.

The big sword blood corpse slaughtered one side of the human race, and then ran to the other side. Within a few minutes, the master of the human side was completely destroyed.

"Haha, the old guy of Akagi lord, should be wrapped up by the big brother." The big sword blood body laughed a few times, the big sword pointed to the red wood city.

There are more than 50,000 copper corpses, enough to level this redwood city.

At this time, the redwood lord, who was fighting the **** corpse, suddenly felt that something was wrong, and immediately flew to the sky to see.

"Not good, counted!"

The arborist of Akagi is now reacting. He is in the middle of adjusting the tiger to the mountain. I am afraid, there is a second blood corpse that is slaughtering his subordinates.

"Damn!" he yelled, turning his head and leaving.

"Haha, I found out now that it is too late. However, I will not let you leave and die!" The big **** body laughed a few times and rushed again.

"roll!"

The arborist of Akagi slammed out.

"Hey!"

Although the **** body of the big knife was repelled, but it was not injured, he sneered: "You found it too late, my second brother, I am afraid I have already entered the city. It will not be long before you will become a ruin."

The arborist of Chimu ignored him and went straight to the sky and flew into the city.

He looked around in the sky, and sure enough, there were already iron bodies entering Chimucheng.

If Ye Xuan is here at this time, there will be a sense of sight of the giants who attacked and the zombies.
