

Super D. S 4151

Chapter 4151: Prepare for war

In general, Star Fortress is divided into three types! Ship

The body diameter of 50,000 meters is called a small fortress. The hull is 100,000 meters in diameter and is called the Grand Fortress.

In addition to these two, there is also a star-studded giant plug, the diameter of the hull, more than 100,000 feet, which is 300,000 meters.

Ye Xuan's starry sky war, barely can be regarded as a star-studded star-studded star-killer, but it can't be called a star-studded giant plug because it only has a diameter of 100,000 feet, which is three. 100,000 meters. star

The empty warfare is big and small, and the lama behind the huge ramen is not up to the level of the starry sky. more

However, this kind of star-studded killer actually belongs to a special war weapon, not a starry fortress in the ordinary sense...

To put it bluntly, the Tianji City's base camp, Tiancheng City, is the real starry sky.

When it is normal, it can be stretched out and turned into a starry continent with mountains and waters and more cities. and

In wartime, if necessary, it can be condensed in an instant, changing to a sphere with a diameter of up to a million meters, that is, thirty-three thousand feet, one thousand kilometers, quickly hiring in the cosmic galaxy...

Outside of Tianji City, it is said that in the Terran empire of the Terran, there is a similar starry sky, but compared with Tianji City, there is a certain gap. Its diameter is only 100,000 feet, which is 300,000 meters. A few big circles.

In addition, the Ten Heavenly Palace of the Terran Cultivation Camp is said to have a super starry sky boat, but it is just the same as the starry sky giant plug of the immortal dynasty. The diameter is only 100,000 feet! Head

Before, the life fortress in Ye Xuan's hands only grew up to the scale of the big fortress, which is 100,000 meters. The minimum standard of the starry sky is 100,000 meters and 300,000 meters. There is still a big gap.

It is not that the world's worms that form the fortress of life grow slowly. At this level, it is difficult to improve. The size of the existing 100,000-meter starry fortress is the result of Ye Xuan's deliberate restriction. It

So, it is because the scale of the 100,000-meter star fortress was only enough for Ye Xuan. but

This time, the situation is obviously different. The entrance is located in the mysterious and ridiculous world of the Second Universe, and the world is extremely deep. After entering, it may not be able to come back often in a short time, and the ancient creatures inside are all at the same level. Huge, and Ye Xuan's current strength is enough to harness the bigger starry fortress...

In order to upgrade the life fortress, the size of the fortress from the current 100,000-meter-diameter fortress will be raised to at least 100,000-meter 300,000-meter star-studded giant plug... At present, it is imperative!

The crystal of the elf is the crystallization of the power of the slime, the natural life energy that can be absorbed by the self-proliferation group of the world insects. Moreover, after the previous time verification, the growth effect of the crystal of the elf on the self-propagating group of the world insects, It has been proven to be very effective.

The number of crystals of these hundreds of thousands of elves is not too small. According to Ye Xuan's calculation of the body's engulfing system, it is enough to make the life fortress grow to more than 100,000 meters, which is 300,000 meters.

It is even more likely to reach 200,000 feet!

The Tianji City's base camp, the Tianji City, is only thirty-three thousand feet. If the life fortress can reach 200,000 feet, the internal structure and performance will be upgraded simultaneously. At that time, even if the full form is not used, it will be as large as a Shennong Ding of a superstar, just by the life of the giant plug in the hands, Ye Xuan can have the ambition of the Tianji people.

In fact, Shennong Ding is powerful, but compared with a purely fighting star-studded giant plug, some aspects are still flawed. It is more convenient to fly in the cosmic galaxy, or the star-studded giant plug...

However, even if there is a life energy required for the growth and evolution of the world's self-propagating population, and it is still provided in large quantities, their growth will take time.

Ye Xuan handed over all the tens of thousands of crystals of the elves to the phagocytic system, and issued instructions to let the system extract the energy. After injecting into the life fortress, the wave of life will be filled into the immortal world.

According to his estimation, this time the evolutionary growth, about three days or so.

Of course, this time refers to the overall improvement of the size and internal performance of the life fortress, not just the volume increase, otherwise it will be completed in a small half day.

After doing all this, Ye Xuan even returned to the star city of Tianhe, through the Tianhe Star Network intelligent master control center, to the mosquitoes and the old ghosts and the Neapolitan squadrons to send a summoning order, let them rush to the star government There is something to discuss... very

Fast, a group of people who had already followed Ye Xuan's team in the early days, they gathered in the star house of Tianhe Star. leaf

Xuan explained the general situation to everyone, and then turned around and directly indicated what he meant: "This time, although the second universe, the ancient world of the evil spirits, is not like the first The universe of the cages of a cosmic demon star is generally a corner of the ancient world. It just opens a passage to enter..."

"But compared with the cage field of the Devil's Star Field, the mysterious wilderness of the first universe, the mysterious wilderness, is deeper and farther, and its depth is still undetectable, and even if it is in the surrounding outer zone, there have been a large number of ruins of ancient and precious spirits."

The level of hierarchy is not even weaker than the core hinterland of the source of all evil..."

"Therefore, it is possible to infer roughly this mysterious wilderness, which is most likely the center of the battle of the ancient world, and if not, it is definitely a corner of the core of the battle."

Nowadays, the situation facing the three major star planes is extremely worrying, and the distant floods and the chaos may come at all times at any time. At this time, it is of great significance to enter such a fragmented star field close to the core of the war of the year. There must be many discoveries..."

At this point, Ye Xuan's words were slightly overturned, and he turned his head and glanced at the audience and the congregation, and then he said: "So, I decided to enter it immediately, and this time I will not bring too many people, I mean, It's just a matter of returning to the sea and the Cang Qingyu, with a 10,000 demon scouts to follow me on the road."

In addition, Shennong Ding, several Star Wars, and the Fortress of Life, I will take it all away. After three days of life, the fortress will complete an evolution, which will grow to nearly 200,000 feet, which is the diameter of 600,000 meters. The interior has more space folding technology and the space is bigger..."

"So, loading a million-scale starship in the life giant plug is still no problem, but it is mainly controlled by intelligent robots. After all, we are seriously understaffed, whether it is the Arc de Triomphe or the Tianhe Star. They are just entering the stage of rapid development..."

Chapter 4152: Departing the Yin Magic Star

"No, the old man does not agree!"

Ye Xuan's words were just finished, and the mosquitoes and old ghosts turned their eyes, and immediately raised objections: "Why don't you take the old man?"

Neapolitan on the side quickly took over the words. If he was alone, he obviously did not dare to sing against Ye Xuan. But now that the mosquitoes and old ghosts are heading, he naturally will not let go of the opportunity and immediately blend in with the back. Up, the head is like a chicken glutinous rice: "I'm right, that's what I mean..."

After a long while, these two guys did not disagree with Ye Xuan, but they also thought about the past.

"If you follow the past, what about the Triumph and the Stars? Just give up?"

Ye Xuan was speechless, smiled and shook his head. He did not give the two guys the opportunity to continue to talk more. He immediately took the matter and said: "This matter is settled. If you want to pass, then you will see the situation. And if the situation requires it, it can be used as a second aid force..."

"Yes, this time the incident is so great. Even if the second universe and the various ethnic groups conceal it, the news will soon be revealed. At that time, the forces of countless large and small ethnic groups in the three major star planes will all flock to it. There must be a mess in the mysterious and ridiculous heaven and earth..."

For Ye Xuan's words, this time the mosquitoes and old ghosts did not refute, nodded and approved: "So, we are first prepared in the darkness of the Arc de Triomphe and the Tianhe Star. After all the things are done, if there is a need for the situation, it will be directly dialed. !"

"That's good, this is the case. I will return to the sea with a knife and a green feather. You two will make a choice within three days, each with a 10,000 demon scouts, and board the ship three days later!"

After that, Ye Xuan waved and flew directly.

.....

Three days later, Ye Xuan waved his life fortress in a remote area of Tianhe Star!

"Booming..."

A real behemoth suddenly appeared without warning, and swayed in front of Ye Xuan, even the void was suppressed by a faint sigh of low thunder.

For the whole three days, the life giant plug has changed completely.

Previously it was only 100,000 meters in diameter, but now it has a diameter of more than 160,000 feet, or 500,000 meters.

Even compared with the Tianji City's base camp, it has half the diameter. It is five hundred kilometers in terms of kilometers. It is like a miniature star!

Moreover, even the shape, and thus the spherical shape, has become the current oblate, which is more suitable for hiring in the universe and the speed will be faster.

Looking at the huge behemoth in front of him, Ye Xuan slammed for a few moments, and this time he came back to God, and his body shape shook, and he entered the life giant plug.

Compared with the previous one, the life giant plug is just an external body type, which has been expanded many times. As for the internal space, since the whole uses the space folding technology, it is obviously wider.

After Ye Xuan entered, he immediately appeared.

The vision is right, this is clearly a place like an independent cave. There are mountains and waters, and it is impossible to see that it is inside a star fortress.

Of course, this is just one of the layers of the starry sky. In fact, a huge star-studded giant plug is just a shape, and the diameter is 500 kilometers. The space inside is even vast, how is it possible? Just one layer?

In that case, the three-dimensional space is wasted too much.

The whole life is huge, and there are 18 layers in total. The scenery of each floor is different and the effect is different. Ye Xuan passes by one by one, and it is a visit to the place. Then he walks out and waved it. Income has been in the body of immortality.

Later, he returned directly to the Star Government of Tianhe City. As soon as he arrived, he saw the 20,000 demons scouted in the square in front of the Star House.

Although the two thousand devils scouts are headed by the two Wanfu longmen who are returning to the sea and Cang Qingyu, but within them, Ye Xuan clearly saw a lot of familiar faces.

For example, Nebo Mountain, Ba Gu, Li Mo, Zuo Fengtai, etc. These guys are the old people around Ye Xuan. The strength is far stronger than the return of the sea and the green feathers. For the sake of strength, but this time, in order to go to the mysterious and ridiculous world with Ye Xuan, it was a thick cheek that was mixed into the ordinary scouts of the two-hundred scouts!

Such a scene is also let Ye Xuan drunk, but fortunately, the master of the slaves, Buck, and the bald Wei, the dialer, the devil's think tank Hong Zhi, Pi Luo and others did not mix in, the other demons left in the Tianhe Star have Their guidance and management is enough.

Therefore, Ye Xuan did not reprimand the Naiboshan and other people who mixed in the two demons and scouted the army as a small soldier. He took it with one eye and closed it.

At this time, in the sky above the main square of the city, there is already a 10,000-meter-diameter starry sky fortress hovering here, which is the most familiar black mosquito number of Ye Xuan.

Although he has a life fortress, but it is not suitable for exposure at the moment, and the volume is too large, and it is impossible to pass the star passage of the Tianhe Star atmosphere. Therefore, the pedestrians on the bright surface leave, and only the black mosquitoes can be entered temporarily.

Just as the sea knife and Cang Qingyu gave a command, all the 20,000 devils scouted immediately when they boarded the ship. A figure flew out of the city seat and went straight to Ye Xuan's body and asked to walk together.

It's not someone else. It's the Tianji ethnic group who had a headache for Ye Xuan.

Of course, the current Yingtai has long been a celestial family. The immortal dynasty of the emperor of the emperor has secretly reformed her source code. The current Yingtai is a purely mechanical ethnic group.

Only the mechanical and the celestial beings are essentially the same in nature. They are all mechanical life, but the camp is different.

For this, Ye Xuan did not know, but since Yingtai was transformed by Emperor Guoshidi Emperor II and became the eyeliner of Emperor Er'an, who was inserted in Ye Xuan's eye, the character of Yingtai has completely changed. There are few words, even if you stay around, it will not be unsightly.

Considering that this time I entered the mysterious and ridiculous world, what kind of situation can be encountered, with a mechanical intelligence life around, it is very likely that it will come in handy.

Therefore, for the command of Yingtai, he slightly nodded and then nodded and agreed.

At this time, the 20,000 devils, scouted by Haihai Yidao and Cang Qingyu, have all boarded the ship and entered the black mosquito.

Seeing Ye Xuan nodded, Yingtai looked very happy, turned and swept up, and rushed into the black mosquito.

"This time, I am secretly leaving, don't announce this news to the outside world... In addition, if there is a visitor, I will directly say that I am retreating."

Waved the black mosquitoes into the immortal world, Ye Xuan greeted the mosquitoes and the old ghosts, and then turned away, and the figure quickly disappeared in the vast sea of the Tianhe Sea.

Nowadays, the exit of the third universe to the second-world cosmic wormhole has long been guarded by the top ten ethnic groups in the second universe, and it is obviously inappropriate to rush through the wormhole. Will reveal the whereabouts...

Chapter 4153: Pit man's furnace

In fact, Ye Xuan does not need to travel through the wormhole to the second universe. He has the ability to jump in the plane-level interstellar coordinates, and directly activate and start, which can realize the leap of the cosmic plane and instantly rush from the third universe. Second universe.

Nowadays, his plane-level star indicates the coordinate jumping ability. After the last system title upgrade, he has the authority to brand two inter-satellite coordinates in each universe plane.

On the first universe, the two interstellar coordinates imprinted by Ye Xuan, one is the black hole of life, and the other is the star field of evil.

In the third universe and the second universe, he all branded only one interstellar coordinate. The third universe is the dead star field, while the second universe is just the original yin ancestral yin nest. It is near the whirlpool of the emptiness.

This time, Ye Xuan decided to brand the second interstellar coordinates of the third cosmic plane before leaving.

After all, Tianhe Star is now his private star. It is very necessary to leave an interstellar coordinate here. It will be the same as the Arc de Triomphe, if there is a need, even if he is in other cosmic planes, Directly initiates the interplanetary coordinate jumping ability of the plane level and returns instantly.

Soon after, Ye Xuan came to the depths of the Tianhe Sea and searched for an extremely remote area. After making sure everything was right, it was easy to give instructions to the system at the first time and began to brand the second personal interstellar coordinates of the third universe. .

The prompt sound of the system soon sounded in his mind, guiding Ye Xuan step by step to unfold the coordinates of the steps, and after a series of treatments, the Yuanshen was retouched by Ye Xuan as a special Branding.

Then, this meta-brand imprinted in a very mysterious and complicated way, shot out of the body, and connected with the void in the depths of the sea in front of Ye Xuan, until the final thorough integration.

Counting this, this is his fifth time imprinting the interstellar coordinates, but the kind of pain that separates his own **** from a small glimpse, but still makes Ye Xuan unable to adapt, which is difficult to use words. Described, but he still forcibly endured, after the separation of the gods, Ye Xuan did not immediately adjust to restore, repair the mind.

Instead, they endured all kinds of discomforts that the Yuanshen suffered, and began to condense the gods of the Yuan Dynasty with different means and methods. This process took a lot of work.

In the end, Ye Xuan devoted himself to paying attention to the whole process, from the gully to the void, to the integration of the gods and their deeds, and finally merged perfectly. From the beginning to the end, they did not dare to relax.

After a total of half a day of tossing, his second interstellar coordinates in the third universe finally blended perfectly into the void of the deep sea corner of the Tianhe, completely stable and disappeared, and Ye Xuan captured Not the slightest breath...

At this point, everything is complete, Ye Xuan no longer hesitate, a wave of hands, when the instructions to the body's phagocytic system immediately activate the plane-level interstellar coordinate jump ability.

This time, the jumping coordinate point that he locked in is the sinuous vortex formed by the sinister star field in the second universe, which is the mysterious wilderness of the world. The entrance passage is not far away.

I am afraid that no one can imagine, even if the first universe and the third universe lead to the two plane-level cosmic wormholes of the second universe, and this morning has been strictly guarded by the army of the first ten major groups of the second universe, but the leaves Xuan, but still quietly entered the second universe plane.

And it is still directly in the vicinity of the entrance passage of the mysterious and ridiculous land that has just arrived not long ago. It can be easily mixed into the mysterious wild world without any effort.

.....

Time has slowly passed, and in the blink of an eye, Ye Xuan left the Tianhe Star with the ability to jump from the plane-level interplanetary coordinates. It has been three days passed!

In the past three days, in addition to the internal news being completely blocked, even the plane-level cosmic wormhole passage leading to the other two universes has been heavily guarded, and no one is allowed to leave and enter the second cosmic plane. The current situation is unknown, the first universe and the third universe are all very quiet, and no special events have occurred.

In view of the fact that there is already a corner of the ancient world in the first universe, the world has replaced the previous magical star field.

Therefore, the news that the original rumors of the ancient and troubled times will come to the world in an all-round way has now become the consensus of all ethnic groups and forces in the three major star planes of the world.

After the identity of the owner of the air transport was determined as the main star of the Tianhe Star, all the ethnic groups and forces of the three major planes were quiet. In the near future, the three major star planes of the world were all shrouded in a kind. Extremely quiet and depressed atmosphere.

Everyone feels that there is a big event, but even the super grotesque who are best at pushing the way, they simply can't deduce any information, even if it's just a word.

This situation is disturbing, so in this boring and depressed atmosphere, the major groups and forces of the First Universe and the Third Universe plane have almost all crouched recently, and there are few big moves.

Even the star-studded gangs who wandered around in the void all returned to their feet and sneaked in, secretly preparing for the response.

In this case, the so-called plane-level star-flight caravan is naturally much less than usual.

For this reason, the change from the second universe has been going on for several days, but the news has not leaked.

It is not that there is no interstellar dispersal, or the commercial fleet, entering the second universe through the plane-level cosmic wormholes in the first universe and the third universe.

But they often just entered, and they were immediately annihilated. It's just a small-capry starship fleet. For the first ten major groups of the second universe, who guarded the two wormhole exits, it's just a matter of fact. Can be destroyed.

However, paper, after all, can not help but fire!

On this day, there was a sudden big change in the first universe.

After leaving the cage field that had just arrived, it disappeared for a while. No one knew where to go to the furnace. He suddenly appeared on this day, and after he appeared, he immediately rushed in. The plane-level cosmic wormhole leading to the second universe in the first universe.

This is clearly going from the first universe to the rhythm of the second universe.

At the first time, the incident was circulated by the two camps of the Terran and the Federation of the Venezue in the first universe of the Devils. The situation was urgent. In the first time, several mobile fleets broke into the cosmic wormhole, returning. The third universe reports on the military!

There is no doubt that the reason why the furnace went to the second universe is definitely because of knowing the mysterious and ancient land, and its goal is too big, no matter where it is, it will lead to innumerable light, this time, the second universe Obviously I have to be smashed in the pit...

Chapter 4154: Holocaust will come

The furnace is reproduced, and there is a change!

This news was first returned to the third universe of the Terran, and was quickly learned by the top leaders of the two camps of the Terran and the core veterans of the Federal Senate.

Subsequently, the immortal dynasty of the science and technology camp and the ten heavenly palaces of the comprehension camp, as well as the three parties of the Federal Republic of Venezuela, each sent two immortal grotesque to the second universe to see the situation.

Immortal blame, has the ability to directly tear the space barrier of the universe, but in that case, if only a projection is passed, the risk is almost negligible.

Even if this projection is lost in the endless void, the loss is very limited.

However, if the deity personally passed, there is still a certain risk in this way. Therefore, if the situation is urgent, even if it is immortal, if you want to go to another cosmic plane, you will basically not choose this kind of risky. the way.

In addition, the situation faced by the three major star planes today is not optimistic. The rumors of the ancient and troubled times are likely to come at all times. At that time, even if they are immortal, they may not be able to guarantee their survival.

Therefore, even from the perspective of preserving strength, in this case, if it is absolutely unnecessary, such a plane-level star travel, immortal, will not directly tear the void across the plane. .

These six are the immortal monsters from the top three powers of the Third Universe, and this is the case.

After receiving the instructions from the highest level of the ethnic group, they rushed to the funeral star field and went directly to the depths of the star field, and swept into the plane-level cosmic wormhole leading to the second universe. The figure disappeared and disappeared.

The same scene is also being staged in the first universe.

The furnace reappears and travels strangely to the news of the Second Universe. The first universe of the three races is almost simultaneously known to the top three forces of the Terran.

Subsequently, the Hell Ants, the Space Rats, the Giants, and other ethnic groups in the First Universe Alliance, each sent an immortal grotesque in the first place, after rushing to the edge of the Devil's Star Field. The continuation of the plane-level cosmic wormhole leading to the second universe.

For a time, the three major star-space planes of the world rolled up and gathered toward the second cosmic plane...

.....

The second universe!

At the exit of two plane-level cosmic wormholes leading to the First Universe and the Third Universe, there is now a starship army, each of which has a scale of tens of millions.

The two plane-level cosmic wormholes are not far from each other, only tens of millions of miles away. In the cosmic sky, tens of millions of miles are really not too far away.

The two tens of thousands of warships stationed outside the two plane-level cosmic worms are mainly composed of bloody, Qingpeng, lion, silver, savage, golden eagle, and sui The nine groups of the top ten in the second universe, such as the greedy wolf and the tree spirit, are headed.

In addition, there are some ethnic fleets among the top ten families in the second universe.

As for the Turtles, which are also among the top ten ethnic groups, because they have already announced the full-scale closure of the clan, the Second Cosmos has recently had any joint action, and the Turtles are not involved.

In fact, the whole body of the tortoise is now invisible to a tortoise. The last time I went to the third cosmic Tianhe, the one who participated in the director of Ye Xuanxing was immortal, but it was more than half a year. Since then, the family has only been exposed in the face of the three major stars.

Even so, the other nine ethnic groups in the top ten ethnic groups of the Second Universe, such as the Bloody and Qingpeng, still sent a group to drive a fleet to the Turtle Star, closely monitoring the

periphery. Preventing this group of immortal powers from tearing away the void, revealing everything that happened in the second universe plane...

On the second day of the change of the Yinmo Star, the top leaders of the Second Universe learned about everything that happened in the whirlpool of the Yinchao.

This sudden mysterious and ridiculous world has caused the second universe to be sensational. The top leaders of all ethnic groups feel that the greatness of nature is coming. In the first time, they sent one or two immortal monsters with one. A small exploratory fleet rushed into the mysterious and ridiculous world along the space passage that was tens of millions of miles away.

This is only the vanguard army. The purpose is mainly for exploration. Later, the second universe will also form a large army, enter it, and carry out various resources to plunder...

Now, the preparations for the various ethnic groups have basically been completed. If there is no accident, the second main force will start in one or two days at the earliest.

Starting from the ancestral land of the great universe of the Second Universe, it has entered this mysterious wilderness...

They naturally know the news about this mysterious and ridiculous land, but they will still leak out, but that's okay, as long as they can drag on for a month or two, first enter the second universe of all the people, I am afraid that they have already earned a spill. Full.

At that time, even if the first universe and the third universe came, it was just a little bit of bones behind them to drink soup!

This wishful abacus was originally played well, but unfortunately it is a matter of doing things.

Just as the second main force of the second universe, the main force, will see the full opening, the accident finally happened...

"Oh la la..."

The earth-shattering bang suddenly came, and at the same time, a huge giant figure like a star rushed out from this plane-level cosmic wormhole leading to the first universe.

It is the fierce name of the first universe in the star of the universe - the furnace!

At this moment, the smoldering furnace rushed out from this plane-level cosmic wormhole, and the upper and lower sides of the outer wall of the ding ding had a tens of thousands of striated chains, which were as long as a million miles, and the sky appeared as it rushed out of the wormhole. The chain is sizzling, which is why it is.

When you look cold, this scene is like a giant tentacles that are swollen and swollen, and suddenly rush out from the wormhole.

In fact, for the second universe powerhouses who are guarding the plane-level cosmic wormholes, they actually would rather rush out of the wormhole, a giant tentacles...even if A group, it doesn't matter.

After all, the fierce name of the furnace is so deeply rooted in people's hearts. Its sudden arrival basically waits for a **** catastrophe to be announced, and will soon come to this star field.

The tens of thousands of starships that guarded this place came from the second universe, but mainly led by the four top ten powerful ethnic groups of the War Lions, the Silver Dais, the Barbarians, and the Golden Eagles.

In order to keep the wormhole passage and ensure that the news is not leaked, the four powerful ethnic groups each sent an immortal old man to sit here. At the same time, among the other weaker ethnic groups, two ethnic groups each sent one. Immortal old monster.

Even so, when the sizzling cockroaches appeared, the faces of these six immortal grotesques changed instantly... white as paper!

Chapter 4155: Message leak

"God! The furnace? The old man actually saw the furnace in the second universe? Isn't it always in the first universe?? When did you actually know how to travel?"

"Evolution! There is no doubt that after the last **** plunder in the Devil's Star Field, the Furnace has evolved again, and its internal intelligence is more intelligent, otherwise it will never enter the cosmic wormhole. Star-level travel at the plane level..."

"Damn! This broken stove is crazy? Why do you run to the second universe? Even if you don't mention its horrible destructive power, it is just a move from the plane, fearing that it is already in the first place." I was alarmed by the top leaders of the other two planes..."

"There is no doubt about this matter. Maybe the two camps of the Terran and the Federation of the Vulcan, as well as the first universe of the various races, have already sent immortal monsters at this moment, and are rushing here."

"When it is over, the news will still be revealed, and the community will be returned immediately, so that the second main force will start the journey immediately. We must plunder more resources as much as possible before the other forces gather."

"Those are not important. The key question is what to do now, this cosmic wormhole... Are we still defensive?"

Shou? How to keep? This is the fierce name of the evil spirits in the star of the evil spirits. Even if it is the supreme existence of the ancient power level, it may not be able to slap its front, just rely on our six immortal monsters to give people a home. I am afraid that the teeth are not enough..."

In the void, there was a slap in the air, and the chain of sounds that had been continually endlessly slammed. At this moment, it suddenly skyrocketed. After rushing out of the wormhole, there was no stagnation in the furnace. It seemed as if there was a clear sense in the middle of the night. In the direction of the sinister star field, waving the 20,000-symbol chain outside the wall, and speeding up, it went straight away.

Unfortunately, among the tens of thousands of starships in which the second universe is stationed, nearly two million warships of two ethnic groups are located in front of this direction, just blocking the way of the furnace...

At this moment, the innumerable second universe and various ethnic groups in the nearly two million starships almost collapsed. If

There are still opportunities to choose, they are afraid that they will not choose to stay in this position.

In fact, as long as time permits, they are more willing to immediately come out with a canal avenue, so that the Master of the Furnace can rush to the unimpeded, unimpeded!

Unfortunately, that is obviously only if it is.

Because the two million warships are very close to the wormhole exit, and the speed of the smelting furnace from the wormhole is fast, and there is no trace of delay and stay, the wormhole will look for this. Direction, rampage...

So, these two million warships are in a hurry! "

Oh la la..."

"Boom..."

boom! "...

...

In the sound of the chain squeaking, a huge blast of blasts came out. The huge furnace of the stars, turned into a black glory, directly smashed into the two million warships.

In an instant, the fire is skyrocketing, and when the dragon is hit by a machete, or is a million-mile outside of its wall, it is like a battleship hit by a snake-like chain, whether it is a big fortress or a big fortress. Without exception, all of them were like paper paste, and they exploded in the first place.

This scene is like a ruin. The furnace has been plundered in the blood of the first cosmic demonics not long ago, and after squatting to complete this evolution, its power is obviously changed by the transformation of the spirit. More powerful.

The 100,000-meter-diameter big fortress was smoked by the fringe chain outside the wall, and there was no suspense. It collapsed directly into a large piece of star-shaped alloy fragments, and its potential was simply awesome...

Two million warships, displayed in the void, can be said to be a large piece of the ocean, almost spreading to the end of the line of sight.

But at the moment, even the time of half a column incense has not been able to survive!

With the blast of the smoldering furnace, in the center of this huge starship army, the hard-growing land was plowed out of a starry passage full of blood and fire.

It is also the best sand that spreads all the way to the line of sight...

In a short period of time, two million types of starships destroyed at least 700,000 ships, and they survived 12.3 million warships. They also all because the furnaces were innocent, and they were too lazy to pay attention to them. When you bury your head and go straight, you will be able to escape!

By the time the starry fortresses in the sky and the second universe of the strong fortresses in the big and small fortresses have come back to the world, the sudden appearance of the furnace has turned into a black man, disappearing at the end of the sky.

And this direction is the place where the Yinmo Star is located...this

It is absolutely impossible to be a coincidence. The reason why the furnace suddenly came to the second universe is to go to the mysterious and wild land where the evil spirits appear! This

The news made everyone sink. thing

In fact, with the sudden arrival of the furnace, they have already realized that the secret of the mysterious and ridiculous land in the Yinmo Star Field has been hidden, the two camps of the First Universe and the Third Universe, and Wan The strong and the army of the Federal Senate will soon come.

But even then, the situation is not the worst.

After all, the assembly of the other two major cosmic planes takes time, and they are still across the universe, and they are so vast that when the various national army enters the second cosmic plane through the wormhole, the second universe The second major force army, at least has also entered the mysterious wilderness for two or three days. Two

Three days, enough for them to plunder a lot of resources, finally grabbed a little opportunity. but

At the moment, after learning that even the furnaces are coming to the mysterious and ridiculous world, the only remaining luck of all people's minds is now completely dissipated in an instant...

Although the second main force of the various races of the universe has basically been assembled, it can be opened almost at any time, and it has entered the mysterious and ridiculous world. But... after all, it has not been dialed yet?

The furnace, but it has already come, and in the time of less than half a column of incense, it has destroyed and destroyed nearly a million ships of various kinds, and turned into a speedy black man, disappearing in At the end of the line of sight.

At this speed, at the end of the meal, the furnace will reach the sinister star field where the mysterious wilderness entrance channel is located, and immediately rush into it without any stagnation!

With the ferocity and weight of the furnace, I am afraid to follow it and enter it. At most, it is just a bit of bones to drink soup.

The mysterious and ridiculous land in the void of the sky and the ruins of the ancient treasures of the ancients, which will be collected in the future, will be completely taken away by the furnace!

I thought of this, responsible for guarding this wormhole passage. At this moment, the six immortal grotesque who had been shocked by this accident, their faces changed dramatically at the same time, almost snarled while jumping and screaming...

Chapter 4156: Eating bastard

"Damn! What happened in the end? Why did the news leak out? It was actually known by the first universe's furnace, which broke the sky..."

"It should not be the reason for the news leak. Otherwise, even the furnaces of the Ming dynasty have received the sound of the wind. The First Universe and the Third Universe and the Fanlu Federation will not have any movements until now?"

"Yes, the existence behind the furnace is suspected to be the wilderness of the past, and it is closely related to the world of the wild. It should be something that I have sensed in some unknown way, and will come straight from the first universe..."

It's useless to say that, now the furnace has rushed to the sinister star field. After the meal, I will enter the mysterious and ridiculous land. I will immediately inform me of the ethnic groups, and the second major force will start immediately. Even if all the meat is swallowed, we must at least pick up the bones behind, otherwise it will be too unwilling..."

"Evacuation! Immediate evacuation... There is no point in defending this place again. The furnaces have come, and the major groups of the other two universes cannot be alarmed. Their army will soon come."...

...

With the demise of the smoldering furnace, the six immortal grotesques roared in the void, and eventually, to the outer space of the second-world universe, all the nearly ten million warships All of them have opened the kinetic energy cabin, and the sound of the bang rang through the whole piece of void.

Due to the urgency of time, they even took care of the nearly one million star-wrapped starships that thundered and thundered from time to time. All the starships followed the flagship fortress of their respective ethnic groups and started the speed. Rushing toward the ancestral home of the family.

They are about to open to the second major army of the various ethnic groups in the mysterious and ridiculous world. They are also one of the members. No one will be willing to easily miss this opportunity and creation.

After an hour, nearly 10 million troops stationed outside the plane-level cosmic wormhole leading to the first universe have already gone. very

Even after tens of millions of miles, another tens of thousands of troops stationed outside the plane-level cosmic wormhole leading to the third universe, after receiving the news, have also fully withdrawn, the two cosmic wormholes. In addition to leaving nearly a million ships of various types in the void in the previous place, there is still no blazing flame, and no starships are stranded. also

It was at this time that the other two great planes who came after the furnace had finally arrived.

"call out!"

Oh..."micro

The sound of the weak air broke out. From the two planes of the wormholes separated by tens of millions of miles away, more than a dozen figures were rushed out, all of which were immortal grotesque, from the human race. The big camp, the Federation of the Bandar, and the first universe of all races including the Hell ants and the Space Rats!

For everything that happened here, the immortal arrivals are immortal, and they are completely ignorant at the moment. but

Because of the sudden change of the furnace, they will have some guesses in their hearts.

At this point, the body shape rushed out of the cosmic wormhole, and looked cold, and looked at the immortal monsters from different ethnic groups and forces after seeing the sky in front of the vain starry battleship in the sky. We, after a slight glimpse, all changed. through

The whisper of a strong suspicion soon sounded..."

Hey... Here, what happened? "

"Look at the traces of those warships, they should be destroyed by hardships, and some of them are forcibly cut open by blunt objects, in line with the traces of the fringe on the outer wall of the furnace. This is clearly the handwriting of the furnace!"

"However, how can there be a million-scale starship army here? Is the second universe family fighting in the civil war? At this time, it is not right to assemble a large army of this size, and it is also the first to lead. This bite-level cosmic wormhole in the universe..."

No, here is the void near the plane-level cosmic wormhole in the third universe. There are also traces of energy residue. At least one tens of millions of large-scale army has gathered here, and the time of departure is no more than three hours! "

"Before the two plane-level cosmic wormholes leading to other universes, there are heavy guards. What are the second universe families doing?"

...

Soon, as these whispers sounded, the suspicions of the immortal geeks who had roughly proved the situation were even stronger.

Originally, they quietly crossed the plane and had a large number of people. This matter is too sensitive for the second universe. If it is unscrupulously spreading the knowledge and exploring it, it is not appropriate.

This is very likely to alarm the immortal grotesque in the top ten communities of the Second Universe and create unnecessary misunderstandings.

But the clues that have been discovered in front of us are too suspicious. If you don't figure out the truth of the matter, no one can be safe. Place

After the whistling, a group of nearly 20 immortal geeks from the two major universes and the top forces exchanged their eyes, and soon reached a consensus...no matter how Be sure to explore the truth clearly and figure out what happened in this second universe.

Even if it caused the misunderstanding of the immortal grotesque in the top ten communities of the Second Universe, it would not hesitate! Decision

After the decision, nearly 20 immortal old people will not hesitate. When even the gods are scattered and extended toward the front, a circle of invisible gods ripples and spreads instantly. A short breath has already enveloped a vast expanse. A large universe of voids. Do not

The ignorance of the blame, even if it can not cover a whole universe, but covering one or two stars, it is completely no problem.

Unfortunately, the sinister star field that leads to the vast passageway to the mysterious and ancient land is not too far from the two cosmic wormholes. Only one star is separated...

In fact, even the two universes of the two **** outside the wormhole that had just left before an hour, now, are still within the far-reaching range of the star, and have not left too far. This

Everything is all in the eyes of the dozens of immortal grotesque rushing in, and they are captured by the gods they spread out.

In the next moment, the exclamation of the shocking screams sounded one after another...

"God, the direction of the sinister star... there is a vast starry sky passage?"

"In the passage, it is clearly a mysterious and ridiculous land that is endless, and the furnace has just rushed in!"

"The old man understands, no wonder the furnace will come. There is a great creation here, and the second universe, the two families, have previously stationed two tens of thousands of warships, guarding the wormhole exit!"

"The **** of killing a thousand knives, this is clearly the rhythm of wanting to eat alone..."

"It's just not a thing. If it's not a sense of the furnace, I'll be coming straight from the first universe. I'm afraid I'm still in the dark, and when I'm surprised, I'll drink some bones at the end. Up..."

Chapter 4157: Three planes move together

After a roar of roaring, the immortal geeks who learned the truth of the matter, left the first time, turned around, rushed into the plane-level cosmic wormhole behind them, and returned to their respective ethnic groups and forces to report. Do not

After that, the two camps of the Terran and the Federal Senate of the Vatican have two immortal groups and forces, only one person returns, and the other immortal, he did not hesitate to rush to the second universe. In the vast space channel, the first time, I entered the mysterious wilderness...

Therefore, the second universe has a mysterious and ridiculous news of the ancient world, completely leaked, the three major planes are known, the three major planes move together, countless large and small ethnic groups and forces are boiling up, the first time after receiving the news Then they issued a family order and mobilized urgently!

The first universe! except

After the magical emperor was shocked, the second generation of the ancestors of the demon group was picked up by a ray of light, and all the other ethnic groups, all of which had never appeared again, all madly unfolded. The mobilization of the family, a large number of starship battleships and large and small fortresses, fortresses, comprehensive assembly!

In the original four-family alliance, the other three tribes, namely the Hell ants, the Space Rats, and the Giants, assembled a tens of thousands of warships in a short period of time, and were moving toward the Devil's Field. The recent giants gathered. This

After the assembly of the 10 million army, under the leadership of the six immortal lords dispatched by the three tribes, the first time to go to the front of the devil's star field, through the plane-level cosmic wormhole leading to the first universe, rushed to Second universe... except

In addition, the Union of First Nations, the servants of the first cosin, and the Alliance of All Nations, are rapidly assembling the army, and all the major groups, with a total of more than 20 million stars, are also close to the first place in the devil's field. This edge of the universe is concentrated in this edge. and

The leadership of the Wan Clan League is the immortal grotesque of the various ethnic groups in the league, a total of ten! versus

At the same time, when the star-stellar army of the first universe of all the nations was in full swing, the two camps of the Third Universe and the Wanda Federal Senate were also the same, and they were doing their work in a tense and orderly manner. Transfer troops will...

The Federal Republic of Venezuela has the fastest movements. Eliminate

On the second day after the second universe, a tens of millions of starships and ships were assembled from several federal military stations in the immortal star field. The first time they opened to the funeral star field. Dial out.

The federal fleet with a total of tens of millions of starships is occupied by five immortal grotesques, and even one of them is immortal. It is a federal veteran's seal that was recently deposited on the Tianhe Star celebration with a projection. Waiting for the old Luo Jinhou!

In addition to the four ordinary immortal, the elephant fox that has been secretly voted for Ye Xuan is also among them.

Half a day later, the immortal regiment of the immortal dynasty of the Terran Science and Technology camp was also assembled, and immediately after the Federal Fleet, rushed to the funeral domain. This

Once, the battleships assembled by the Terran Science and Technology camp are also tens of thousands of levels. The commanding high level of the town is also the five immortal grotesques, among which one is waiting for the dynasty to wait for the old dragon to wait! versus

Ye Xuan's more mature and immortal old Longshan Tang is also in the list.

As for the Terran Cultivation Camp, there are six immortal monsters, including Gonghua and the most powerful ones, and the Palace of the Elders is waiting for the palace! set

In terms of the battleships, the Ten Heavenly Palaces are dispatched by a multi-million-strong army of warships and warships. The starry territory controlled by the comprehension camp is farther away from the funeral starfield. Place

Therefore, the millions of troops of the immortal dynasty have been set aside for a whole day, and this Tiangong army is able to enter the starry territory of the science and technology camp, without any pause, rushing to the funeral star field...

Two days later, the first federal fleet that first set sailed first arrived at the funeral star field. After entering the depths of the star field, without any stop, it rushed directly into the plane level leading to the second universe. Cosmic wormhole.

After a small half day, the immortal regiment that followed the chasing after the arrival arrived, and then rushed into the cosmic wormhole, and soon disappeared.

The Tiangong army, which came from afar, was only two days late to enter the wormhole. to

Therefore, the three major camps of the Third Cosmos and the 30 million warships assembled by the Federation of the Bandar, and the sixteen immortal monsters including the three seals, all left this plane and embarked on a journey. Caught toward the second universe... except

These three top forces, the third cosmic plane, there are many weaker sects, families or forces, and even scattered repairs. In these few days, they flocked from all the stars in the plane and arrived at the funeral. After the star field, enter the wormhole directly and head to the second universe. real

It's because this creation is too tempting. Anyone wants to try their luck in the past. Maybe it's not possible to hit the big chance!

The second universe! distance

From the first universe, there was no sign of the furnace, and it was a full three days. just

As soon as it came, it was like a ruined smoldering furnace. Three days ago, it crossed the vast starry sky passage of the Yinmo Star Field and entered the mysterious and ancient land in the passage. tight

In the meantime after the furnace, there are several immortal monsters from the first universe and the third universe, and the Senate of the Federal Republic of Venezuela. With

After that, I was shocked to learn that all of the second universe of the universe swarmed, except for the already-completed family of the Turtles, the other nine ethnic groups in the top ten, and some other groups ranked higher. There are a number of immortal grotesque ancestors rushing out of the ancestral lands, one step ahead, and all of them rushed into the mysterious wilderness.

As for the second batch of main battleships that had already been assembled in these ethnic groups, they basically all set off on the next day and followed suit. Do not

However, due to the uneven overall strength of the ethnic groups in the second universe, the number of the various ethnic groups entering the mysterious and ridiculous world is more or less, and many of them are among the top ten ethnic groups, such as the **** people. It has assembled more than five million battleships. less

Basically, they are all kept at the scale of a million. whole

The total number of warships in the clusters of all the second universe planes is 70-80 million. I dare not say that it is a nesting, but in fact it is not too much!

In this way, in just a few days, the total number of star-studded ships assembled by the major groups and forces of the three major stars in the world has reached a scale of nearly 200 million ships. This is absolutely a daunting The number, the tens of thousands of years since the long years, a similar situation ... is unique! and

With the news of the birth of this mysterious and ridiculous world, all the top ethnic groups and forces in the three major star planes have been swaying, and just a sensational Tianhe star, Ye Yexuan, has just been forgotten. , no longer being mentioned.

No one knows, Ye Xuan, in fact, before the fall of the second universe, the early into the mysterious wilderness...

Chapter 4158: Ye Xuan's goal

Although Ye Xuan came to the second universe of the sinister star field with the plane-level interplanetary coordinate jumping ability, there are many second-space warships outside the channel, which are outside the channel of the mysterious wilderness. The sky and the sky traveled and patrolled.

But this starry sky channel is too wide, more than 20 million miles away, Ye Xuan activated the spirit of the mystery after the perfect shock, it was easy to mix in, quiet, not found by anyone. Enter

After entering this mysterious and ridiculous world, a very familiar and ancient atmosphere, the first time will come. Ye Xuan did not rush to go deeper, but remained in a state of concealment, examining and exploring in the peripheral area.

From the outside, the starry sky passage into this mysterious and ancient world is like a huge cosmic black hole. The ancient heaven and earth in the black hole is obviously deep and deep, and you can't see the end.

After entering, this deep and deep feeling is obviously stronger.

Almost as soon as I entered this place, Ye Xuan has roughly determined one thing, that is, this mysterious and ancient land, it is very likely that it was the core star field of the war in the era of the ancient world, even less close. because

Even in the outer star of the shards of this ancient land, there are a lot of savage beasts that he has never seen before!

Gold Griffin, Blue Gold Eagle, Nine-tailed Cocks-necked Snake, Three-headed Bone Snake, Red Phosphorus Two-tailed Snake, Blood Moon Devil Wolf, Purple Peach Wolf, Yellow Electric Thunder Wolf, and Amethyst Bimon, Five-Color God Cow, Gold 玳瑁, blood jade spider, six-winged demon worm, blue-golden beast, **** konjac, purgatory blood phoenix, purple golden dragon 蟒, and so on!

It can be said that all kinds of strange and weird species, savage birds and animals, which have long been invisible in the world, are all here, and they are all dizzying. he

I even saw a slender silvery dragon with a narrow body and a hundred thousand feet. The slender tail looks like a long whip. After the squat and the back of the eyes, each has a pair of big horns and wings. It is more reflective than the mirror, and the texture of the metal is revealed. also

There is a black dragon, a huge figure, and even more than the huge silver dragon of the talented one hundred thousand feet. There are more than 200,000 feet in body length.

Its huge to horrible dragon body, full of black to opaque metal solid scales, but also a pair of black and vertical almond-like pupils, and deep black iris, also embedded in the hair is thinner Countless gorgeous gold wire! This

The first two silver dragons and black dragons, watching the breath, clearly is the supreme existence of the ancient power level, the combat power is second only to the golden dragon and the empty giant turtle, the wild ancient night fork and other ancient supreme! even

In the battle of the fallen world, in the battle of the world, how could it be the edge of the war?

According to this inference, if everything is true, there is a great possibility of greater surprises and creations in the depths of this ruined ancient world. but

Ye Xuan did not go far and explore.

He decided to collect as much as possible of the ruined treasures of the ruins of the outer region, and then go deeper...

This matter must also be done ingeniously. After all, even in the star passages that enter this place, you can see the general situation of this fragmented and ridiculous world inside the black hole through the vast passage of giant black holes.

If Ye Xuan takes away all the ruins of the ancient and dead souls in the void, it will surely attract attention, fearing that it will directly expose the traces. thing

In fact, as early as before, the second universe has sent a fleet to each of them to explore. The commanders are basically all immortal grotesque, and they are now scattered in this peripheral area, trying to collect the virtual air. The ruins of the ancient treasures of the ancients. If

Ye Xuan's shot was too obvious, and he would be discovered in the first time. Although he was not afraid, he was originally crouching in the dark, and he was afraid to make a fortune.

The corner of the ancient world is unknown, but the diameter of the outer area, or the width, is about 400 million.

In this vast and innocent peripheral area, not every imaginary sky is full of ruins of ancient treasures.

In general, the wreckage of the ruins of the ancients in the sights are concentrated in the emptiness of the central area of this peripheral area, and there are also some imaginary edges on both sides, but they are sparse and not intensive, and those ruins of the ruins of the ancient ancestors on the edge of the void, the atmosphere is distinct and weaker. leaf

Xuan's goal is to squat in the center of the peripheral area. This piece of hunger is about 10,000 miles away. The ruins of the ancient and dead spirits in the sky... Of course, you can't take it all away. You can only pick a big head and have a strong breath. ! This

The total number of ruins of the ancient and ancient spirits distributed in the emptiness of the central area of the tens of millions of miles is about one or two million. From the breath of the body, the

wreckage of the tens of thousands of wild animals is the weakest. The star's main territory, and the strongest existence, is the ancient power. to

At the level of the golden dragon, the ancient sage is not seen at all. Even if there is, it should be in the emptiness of the farther and farther away...

In fact, even the wreckage of the ancient power level is not too much. It is roughly a glance, and its number is about three hundred!

Just over three hundred heads, compared with the total number of treasures of up to one or two million, the ratio is really small, but this is the treasure of the ancient powers, the value is too high, can have more than three hundred The number is already amazing. complete

In fact, the treasures of this kind of treasure held by Ye Xuan's hands are counted in the source of the evil and the sky, and the emptiness of the giant tortoise's previous mysterious emptiness, together with 13 ancient desperate, two hundred There are many ancient powers, and more than two hundred ancient powers. This

The ruins of the ruins of the ancients and the treasures that have been cultivated above the immortal level...there are less than 500 in total! This

Once, Ye Xuan's chosen target, its strength standard, was set in an immortality. Below the immortality, he was too lazy to collect it. Even if he got it, he turned back to the Taikoo tortoise and Taikoo Porcupine, the gang of food, fills their stomachs...

Although his cultivation has recently soared in strength, the deity has reached the first level of the universe in his usual state. However, if he wants to collect the wreckage of the immortality by his own strength, it is obviously impossible. to

For those who have sealed the king, the emperor is immortal, and even the wreckage of the ancient power level, it is even more unnecessary to say it. It is close, I am afraid it will be directly exploding by the horrible pressure. If

If this is not the case, the treasures of these treasures in the void have long been taken away by the second universe of all the immortal geeks who have entered the place one step at a time, and it is impossible to turn around Ye Xuan! Do not

However, this matter may be a headache for others, but it is not a problem for Ye Xuan. Now, even if he does not sacrifice Shennong Ding from the immortal world, he can activate his domain to protect himself. It's easy to collect treasures from Ding's inside, and it's easy to be...

Chapter 4159: Muffled

Ye Xuan's spiritual strength is perfectly shocked, and the level has already been promoted to an advanced stage. His own cultivation is also a strength, and it has also entered the universe. Under this circumstance, he now uses this secret to repair his strength. It is only a higher level than the ordinary immortality of him, and he has not fully explored any clues. except

It is not until the immortality of the seal, and the deliberate and meticulous exploration can only be noticed.

At this moment, the piece of the ancient heaven and earth that he is in is in the void, although there are more than a dozen immortal monsters, but they are not immortal, but none of them. can

Even so, Ye Xuan did not intend to start with a conspicuous target from the beginning, but quietly circumvented a less conspicuous area, starting with the indestructible treasure wreckage, between the minds, God unconsciously took away one, and sent it into the body of the Shennong Ding interior space! With

After that, he carefully shot several times and tested the internal domain power of the Shennong Ding in the body. He took away the treasures of the treasures in a way that was taken up in the air, and the distance limit that can be reached as far as possible! ten

After the rest of the shots, Ye Xuan's heart has been roughly counted. In this way of ingesting the space, the farthest distance between him and the target can be maintained, and it is obviously not affected by the repair of the target.

The more powerful the wreckage of the treasure, the closer it will be if it is successfully taken away from the air.

Otherwise, if it is too far away, it will not move!

Collecting the wreckage of the immortal treasure, the distance can be maintained as far as ten thousand miles.

If it is immortal, it will be about nine thousand miles.

The king is immortal, eight thousand miles. seal

The emperor is seven thousand miles, and the emperor is six thousand miles...

Ye Xuan is not aware of the realm of the emperor, but for those who are more immortal than the emperor, but not too exaggerated, the treasures of the treasure are collected by the way of ingestion, the farthest Can maintain a distance of about five thousand miles. to

In order to collect the treasures of the ancient power level, even if Ye Xuan fully urges the domain power of Shennong Ding in the body, it can only succeed within a distance of a thousand miles away from the target! Indeed

After determining the farthest distance of the various types of treasures, Ye Xuan took a deep breath and no longer hesitated. He began to smash and scrape, often with a turn of thought, a ruin of the ancient treasures of the ancient dynasty. He was quietly taken away by him and sent to the inner space of Shennong Ding in the immortal world...

At the beginning, he only started to smash the treasures of the immortal five worlds, and made a fortune, a short half-day, and various treasures of immortality, and he has successfully collected thousands of them!

Thousands of immortal treasures of the five worlds, this is definitely an amazing top flesh and blood resource, it sounds like a lot, but for the nearly two million kinds of treasures in the virtual area of the peripheral area However, it is really insignificant. As long as it is staggered, it will not be obvious. It is hard to be noticed! Enter

The exhibition was so smooth, Ye Xuan gradually relaxed his heart and began to sweep his eyes to the treasures of the ancient power level in the void! This

A total of more than three hundred ruins of the ancient treasures of the ancient ages, and basically all of them are extremely large bodies, which is obviously more eye-catching than other levels of treasure wrecks. If

If you have a big behemoth, if you don't have it, if you are a little careless, you will most likely be left to explore the fleet of the second universe of all the people in the surrounding air, especially if you are sitting in the air or swimming in the sky. Those immortal geeks who walked out found out! This

These guys are now catching up, obviously have entered this place for a few days, and the emptiness of the wild and the dead spirits everywhere in front of and around the sky, but from beginning to end, they can only charge those stars. The treasures of the domain, the main level and the main level. Will

It is an immortal grotesque shot, collecting the treasures of ordinary immortality, the success rate is also very low and very low. to

In the past few days, no one has successfully collected even one of them! more

Don't mention the ancient power level, this level of treasure wreckage, even the immortal grotesque can not be too close, the pressure is too strong, there will be danger of explosion!

There is Baoshan in the air, but I can only watch and rush, and this kind of thing is enough to be wronged and shackled. In this case, if they let Ye Xuan take it easy, they will take away one. The wreckage of the treasures of the ancient and powerful level, it is estimated that the immortal geeks present in the scene must be mad at the direct spurting! three

Among the treasures of the ancient and noble powers, the two silver dragons and black dragons are the largest, and the treasures are brilliant and too eye-catching.

Although Ye Xuan is heart-throbbing and even blind, but did not dare to start, at least not now!

After thinking about it, he chose a **** jade spider of the ancient power level, as the first target, mainly because its size is slightly smaller, only a hundred feet, not too eye-catching, the risk is almost zero!

With the support of the Shennong Ding domain field power in the body, Ye Xuan carefully approached the thousands of miles of the wreckage of this blood jade spider. turn

After the first four observations, it was determined that there was no immortal old monster paying special attention to this place at this time. This was the full force to promote the field power of Shennong Ding. After locking this blood jade spider, he quickly took it and directly ingested it!

The whole process was completed in just one tenth of a breath. because

In order to cover the power of Shennong Ding domain, this blood jade spider is equivalent to disappearing from the air. There is no trace at all, and it is directly sent by Ye Xuan into the treasure of the immortal world...

Try it, Ye Xuan spirit is great!

I have to say that this feeling is really not a general beauty, just under the eyes of an immortal old monster, quietly take away the treasures they want and can not, and can also appreciate their heart, but they are not The embarrassing situation, this thing is not only exciting, but also refreshing and happy, it is so beautiful that it is bubbling!

Subsequently, Ye Xuan successively shot several times. In just a few hours, he successfully collected hundreds of ancient treasures such as Jin Zhenzhen, Blood Jade Spider, and Six-winged Devil. when

However, these are all small bodies, basically less than a thousand feet, so there is no accident, and unconsciously, there are only more than 300 ancient catastrophic treasures in the void. I took away a third of it...

However, by this time, this smaller target has disappeared, which means that the next charge, the risk factor will be greatly improved. slightly

After the rest, Ye Xuan quickly swept his gaze at the ruins of the ancient catastrophic treasures of medium size. The target of this type is also more than a hundred, about one-third, basically in the thousand feet. Between the ends!

This time, his lock is a five-color sacred cow, with a body size of more than 3,000 feet, which is about 10,000 meters. It is similar to a 10,000-meter-diameter starry sky...

Chapter 4160: Who did it?

In the next day, Ye Xuan has been collecting the treasures of various ancient creatures.

Counting on the previous gains, one and a half times, the treasures of the treasures that he has earned in the interior of the immortal world of the gods have exceeded 10,000, all of which are immortal!

Among them, there are more than two hundred treasures in the ancient ages. There are more than 300 treasures of this level, a small size below a thousand feet, and a medium-sized target between a thousand feet and a thousand feet. He has all been charged by him. and

There are only a few large-scale targets that are still more than a hundred feet in size.

In the emptiness of the central area of this peripheral area, there are more than two million wrecks of various treasures. Ye Xuan has taken away more than 10,000. It sounds like a lot, but in fact the ratio is only one percent. Not only that, and Ye Xuan is still staggered and charged, not staring at a region to bury himself. again

In addition, a Pioneer Exploration Fleet of the second universe in the void has entered the fleet, and has been busy collecting some targets of the star master, the domain master, and even the master. The treasure of the void in the air is originally Has been slowly decreasing, so his movements have not been sneaked. when

However, this is also because he always adheres to the principle of being cautious, otherwise even if the treasures collected are few, the fear is already exposed!

At present, the treasures of immortality and above have been successfully collected, and Ye Xuan is still the most valuable target. Don't look at the number of treasures in the void, but most of them are He has not had much interest in the existence of immortality. One

After thinking about it, he decided to take away the last hundred large-scale ruins of the vast ancient powers that were over 10,000 feet. Then he took away and left the peripheral area to enter the squat of the ruins of this ancient world. Further, looking for other creations and opportunities...

Although there are only a few hundred targets left, they are all large-scale treasures that are more than a hundred feet. Once collected, the risk factor is even higher than the sum of the tens of thousands of treasures he has previously collected.meaning

Knowing this, Ye Xuan was more careful. Soon after, the target of the start was selected. Even if he quietly approached the past, he kept a virtual distance of less than a thousand miles from the target! This

The goal of one time is a blood phoenix in Purgatory. Although it is not comparable to the two dragons with a size of 100,000 and 200,000, respectively, the size is not too small, more than 30,000. Zhang, that is, 100,000 meters, is equivalent to a starry fortress. This

What a big guy suddenly disappeared, and the possibility of being noticed is still great!

In order to ensure foolproof, this time Ye Xuan waited for a meal, only at a perfect time, an instant shot, urging Shennong Ding's internal domain power, blink of an eye will be the purgatory blood phoenix, income Ding inside space. This

Everything has just been completed. It is only a few hundred thousand miles away from him. There is an immortal old monster who does not know which ethnic group from the second universe. It seems to be a subconscious, subconsciously turning to the area where Ye Xuan is located. Swept over. Place

Fortunately, there is no danger in this end. This immortal grotesque may have some sense, but it is obviously weak and embarrassing. After turning to look at this side, his eyes quickly moved away and he did not seriously explore it. I did not notice that there was a ruin of the Purgatory Blood and Phoenix treasures of the ancient power level! long

With a sigh of relief, Ye Xuan was lucky, and quickly changed a region, and more carefully approached the second goal to the past...

In this way, it is another day when the blink of an eye passes. with

At the time he waited, he had previously collected the treasures of various treasures of various ancient creatures, but in the following day, he successfully collected the treasures of the treasures that were sent into the inner space of Shennong Ding, but only The existence of thirty ancient power levels. Two

In comparison, the efficiency is simply horrible, but fortunately everything is going well. Until now, Ye Xuan's movements have not been noticed by any immortal grotesque!

However, even Ye Xuan himself knows that it must be discovered sooner or later, and it is basically coming...

After all, the region's central domain is full of imaginary miles. In total, there are only more than 300 wild-level energy levels. Now the number has dropped sharply to more than 70. If this strange situation is not discovered, That was a real hell.

In fact, if there were more than a dozen immortal old monsters in the void, and they had not rushed around in the past two and a half days.

Instead, they are stuck in the vicinity of a treasure with a wild power or a quasi-ageless power level. They are concentrating on the methods of collecting and trying to collect them. I am afraid that the inexplicable disappearance of more than two hundred ancient power levels will be lost. It has been discovered early! less

After that, Ye Xuan came to the vicinity of the treasure wreckage of a ruined golden lion, and was close to a thousand miles. After squatting for more than one hour, he saw the opportunity to come, even if he did not hesitate to shoot again. In the blink of an eye, this golden lion cub has been successfully included in the body of Shennong Ding!

However, this time, the unexpected exposure has finally arrived...

At the same moment that Ye Xuan received the charge, there was a virtual space in the area where his body shape was a few million miles away. An immortal old monster just turned to the side and it just disappeared. Amazing scene... income bottom!

In the face of such a weird scene, the immortal old monster with a lion nose obviously feels a little chaotic, the whole person feels a little worried, even raised his hand and rubbed his eyes, and finally fixed his eyes and determined that When the head of the golden lion cub was gone, it was realized that something went wrong, his face changed, and he turned to the other direction of the surrounding void...

At first glance, the lion's nose was immortal and the body shape was trembled several times. The look on the face was changed one after another, and it was already black as if it was too small! its

In the mouth, there was a roar of indignation and dissatisfaction. Suddenly, he said: "Damn, it's been a day or two, and there are more than 300 treasures of the ancient powers in the void. How can there be only seven? More than ten? Who is it? In the end, eating a single food, the appetite is so big, the mouth is so embarrassing, this is also a special thing is not something..."

The sound of this roar like a thunder suddenly screamed, and the surrounding emptiness was guarding a treasure wreck, and the other ten immortal geeks who carefully studied and derived the policy were immediately alarmed. With a suspicious color, I turned to look at the past, and then I turned my head slightly and stunned...

In the next moment, the more than ten immortal geeks from the second universe, as if they had made an appointment, the look on their faces changed at the same time, and the roar of the wrath of the sky was all four moments...
