

Super D. S 420

Chapter 420: Gas dilemma

Ye Xuan sighed, really sad, was taken to test the poison, but also forbidden.

However, this hundred poisonous door is not like what hate the Tianjian faction, just a planting management, is a super master of the third-class temperament.

Therefore, he felt that he was still careful, lest he was too handsome to be hated by a certain disciple, and he would die without a whole body.

He quietly stayed at the residence that Hong Lao blame had arranged for him, and then waited for the old man to send him poisonous grass every day.

The phagocytic system is not bad. Ye Xuan only got the secluded grass and can increase the chance of 10%.

This Nether Herb is a breakthrough for the martial arts, but it needs another kind of herb, otherwise it will be poisoned by the Nether Grass.

Now he is the power of one hundred and sixty dragons, and he has a 70% chance of breaking through, plus the secluded grass, that is 80%.

As long as he raises the power of the Twenty Dragons, he can break through the awkward situation.

He was bored for a day at his residence. On the second day, Hong Laowei took some poisonous grass and let him test the poison.

Ye Xuan tried it one by one and then got some poisonous grass rewards.

He swallowed the poisonous grass in the space, and it was a little bit more and more. It is estimated that he can break through the power of the two dragons.

However, he is holding back, because now the power of the two dragons has no use, and what he wants is the power of the twenty dragons!

Of course, the power of Twenty Dragons is only enough for him to break through, and it is not so easy to escape.

In this way, Ye Xuan lived in Hong's strange place, and lived for one month.

In the first half of the month, Hong Lao blame took poisonous grass every day to give Ye Xuan a test poison. After half a month, Hong Lao Gu was missing for seven days, and when he came back, the whole person was different, and he broke through. The power of the Twenty Dragons has reached three hundred and twenty dragons.

This can scare Ye Xuan. If you break through once, you will break through the 20 dragons. Is it easy to break through the situation?

This month, Ye Xuan's poisonous grass is also a lot of together, it is estimated that the power of the Ten Dragons can be broken.

Now, he is only a ten-dragon, and he can be a local breakthrough.

Today, Hong Lao blame brought some poisonous grass, Ye Xuan gave him a try, reported toxicity.

"Well, after a while, the poisonous grass will be gone. It will be poisonous Dan and poison at that time. As long as you can hold it down, I will talk about it and let you go." Hong Laowei said with satisfaction.

In the past month, he brought in nearly half of the unknown poisonous grasses, and Ye Xuan gave him a poison test, which gave him a huge reward.

In a month, he estimated that the poisonous grass in the poisonous door was gone, and then the unknown poisonous Dan and poisons that were refined.

He estimated that as long as the task of these toxicity tests is completed, then he has enough resources to break through to the fourth or even fifth order.

Ye Xuan nodded slightly, at this time his heart is very embarrassing, poisonous Dan for him, will certainly be more precious than poisonous grass, at the same time, the toxicity may be stronger, a carelessness will be violently killed.

However, he has no choice now.

After another month, the old man was taking over the poisonous grass task in the poisonous door.

What he brought with him today is poisonous Dan.

"This is my poisonous Dan, a new refining system. This is poisonous powder. The toxicity is worse than other ones. Try it." Hong Lao blame directly throws a pack of things, he also knows that the cycle is gradual, first Give Ye Xuan some *, if Ye Xuan is poisoned, he will lose money.

Ye Xuan nodded, then bite a small mouth poison Dan, let the system test and say.

"Hey, the host is immune to the toxin!"

The system prompts.

Poison Dan is made from a mixture of various poisonous grasses. However, as long as these poisonous grasses are all immune, then the poisonous Dan has no effect on him.

This poisonous Dan was ineffective against him, so he took the rest and received the phagocytic space and then tested the poison powder.

He sprinkled the toxic powder on his left hand. The next moment, he found that the toxic powder had penetrated into his arm. Then, the flesh and blood on the whole arm melted, and even the bones melted.

"I rub!"

Ye Xuan was so scared that if he put the poison powder on his face, his head would be gone.

Fortunately, he has the blood of the sacred tree of life and can be born with a broken arm. However, this pain and spiritual stimulation, he can bear it.

"okay."

Hong Lao nodded, leaving some poisonous grass to Ye Xuan, and took away the poison powder. After he was afraid that Ye Xuan had swallowed it, the whole person turned into blood.

After the old blame left, Ye Xuan's mouth was slightly tilted, because after two months of hard work, his things were almost ready, and there might be a little bit of difference, but it should be similar.

"Give me a swallow!"

Ye Xuan directly swallowed the heavens and earth treasures in the space, and immediately, he got a system sound.

"Hey, the host has broken through 182 dragons!"

One hundred and sixty dragons directly raised the twenty-two dragons and reached one hundred and eighty-two dragons.

One hundred and eighty dragons, Ye Xuan has a breakthrough probability of 90%, plus the words of the Nether Grass, then he is 100% breakthrough.

"Okay, I am in a dilemma, I am coming!"

Ye Xuan will swallow the secluded grass, and immediately chose a breakthrough!

"Hey, the host has broken through to the dilemma!"

The system sound is very simple, but Ye Xuan's mood is very exciting.

In an awkward situation, he finally broke through to the awkward situation. Now he should be called the first step of the qi.

The power of one hundred and eighty-two dragons, as long as the eighteen dragons are raised, then he can break through to the second order of the royal gas.

"The amount and intensity of the infuriating gas really increased. If I were promoted to the second level of the Royal Air, I might be able to fight the strong third-order power."

Ye Xuan is amazed.

The next moment, he discovered a little.

The number of times the Beastmaster violently used was only once.

The body of the sacred beast that the beastmaster violently needs will increase with the increase of the realm and the number of uses. Ye Xuan is now the power of one hundred and eighty-two dragons. He swallows the body of the sacred beast and allows him to use the beastmaster once. Rage, it is already good.

"Is there only one time left?"

Ye Xuan has some regrets in his heart, but this is nothing to do.

However, he has something to do next.

Huang Qanjian method, silver feather body method, before the level limit, he can only train 60% of the fire, now, it should be able to upgrade to 10% of the fire. However, the Huangquan sword method is simple to upgrade, and the silver feather body method is not easy, so he needs some hard work.

Of course, before that, he had to experience the thrill of flying first.

In addition to the gap between the true gas and the gas, the gas can also fly in the air, which is a qualitative leap.

Even if the savage master can't beat the people, he can fly to the sky and then evacuate. The power of the situation, can only be discouraged, quietly to each other.
