

Super D. S 4241

Chapter 4241: Starry nomadic army

With the four-part cultivation resources turned into a smattering of glory, and the ignorance of the smoky smog, the four savage savage singers laughed a few times and soon quieted down, no longer fascinating The laughter came out. leaf

Xuan waved his hand to the immortal world, and then turned and rushed out of the big balloon of the life planet at the foot, and ran into the seventh-order green cow sitting in the empty sky outside.

This old guy is obviously not a good thing. When I saw Ye Xuan, I suddenly rushed over with my hoof, and my face was full of wretched smiles. I asked Ye Xuan: Head, cool?

This sentence was in the ear, Ye Xuan was almost thundered on the spot in the void, shouting into anger, kicked the wretched green cow to a hundred miles away.

Now he really regrets that this guy's income has been squandered. It's too shameful and too cumbersome. It's his virtue, and I don't know how many years ago, when this is a strong starry ban One of the...

Depressed a lot, Ye Xuan soon regained his heart, not far away, the seventh-order green cow looked like he was out of breath, and a hoof stalked and ran again.

When looking around, Ye Xuan discovered that the battlefield outside the void was not completely cleaned up. After all, the size of the previous war was not small. The vast void of more than 20 million miles was covered and killed. There are more than 100 million beasts in the forbidden land, and there are certain casualties on their own. Even if they use the army to clean up the battlefield, it will take some time.

Ye Xuan was not in a hurry and waited another day. One

After the day, not only did everything in the universe's voids be properly packed, but even the vast amount of cultivation resources in more than a hundred life stars, as well as other kinds of wars, were counted and counted.

After receiving the news, Ye Xuan even issued an order to let a group of high-ranking officials gather their respective legions and open an enlarged meeting.

The meeting place of the meeting was in the previous void battlefield.

The vast expanse of the sky, the outermost is the top ten phalanx of the captive army and the millions of warships of the ancients and the ancestors of the ancients, swaying a large piece, paving the vast void.

A few laps are divided into two layers. outer

The first layer is all the strongmen of the captive army and the ancient people in the ancient times, including the star master, the domain master, the landlord, etc., all of them, and look at a large piece. Inside

The layer is more than a hundred immortal grotesque, including the original ninety-eight of Ye Xuan's original, and more than twenty of the prisoners.

In the encirclement of this immortal grotesque, it is the illusion of Ye Xing, who is sitting in the sky and sitting cross-legged in the void.

As for the seventh-order green cow, at the moment a pair of heels stood, the person stood up, and the two front hooves hugged on the chest, standing behind Ye Xuan with a big thorn, staring at a pair of bulls eyes, looking around. Full of vigilance, how to look is a virtue of a gold medalist and bodyguard, and the temper of the more than one hundred immortal old quirks around him. only

It's a look on the faces that are very weird..."

Can you sit down first? "leaf

Xuan was speechless. Looking back at him, this guy snorted and grinned and sat down, but still did not enter the ranks of more than one hundred immortal geeks, but he sat behind Ye Xuan. When you get down, you have to protect your rhythm anyway, and let the latter want to go crazy.

"Lord, this is the conviction of this time. It has been divided into different categories, and it has been included in a space box. The list is here..."

Fast, three-jawed dragons stepped forward, talking, waved a jade slip, and more than ten space boxes, this time the person in charge of the levy checkpoint is him, after all, people are the captain of the captive parliament, or some Real power. leaf

Xuan took over the jade, and the gods swept through it, then threw it back, and then the gods entered into a dozen space boxes hanging in front of them, and several of them contained all the boxes. The treasures of the beasts of the forbidden land. its

Its several small boxes are divided into different categories, such as cultivation resources, treasures of treasures, various treasures, and refining forgings. its

All the top supplies in the stars of the three people who were waiting for the immortality were all included, and Ye Xuan was a bit hot.

According to the previous agreement, among these resources, 70% belong to Ye Xuan and his majesty, and 30% belong to the captive army.

For this, Ye Xuan did not intend to rely on the skin, this is only the first battle, and then there are more conquests, he can not be so short-sighted. more

What's more, the most precious warfare of this battle has already been taken away by him. That is the blood of more than one hundred beasts and the treasures of the nine-tailed fox.

In front of the resources in these dozens of space boxes, Ye Xuan naturally cannot be greedy.

"call out!"

"Hey..."

Between the hands, Ye Xuan will be part of the precious treasures, refining forgings and other resources that he has seen from the space box, which are all in the immortal world. They are all basically the seven-order green cattle and other three in the immortal nest. Resources.

The rest is sent by him. three

Cheng made a three-jawed dragonfly, and 70% shot to the high-level group of the immortal group of Sang Zhixing.

Then he said: "This is the conviction of this war. According to what was said before, Sanqi shared..."

"In addition, the king also collected some of the top treasures of treasures, as well as some treasures of the forbidden beasts above the main level. These will be refining the top-level flesh and blood medicines that will be upgraded. All of them have a share."

"As for the resources that you have in your hands, you can accumulate it, or you can turn it back into a big medicine for the following grassroots to improve the overall strength of the entire legion!"

"Thirty percent of the captives in the hands of the captive army, if it is necessary to smelt into a big flesh and blood medicine, directly to the Sangzhi remnant tribes to help, everyone is their own people, to be friends and love each other..."

Here, Ye Xuan suddenly remembered what it was, and turned to the immortal geeks of the remnant tribes and looked over and said: "Yes, before the expedition, I asked you to wait for Sang Zhi. The refining drugs Dading on the star are all carried, is this done?"

There is an immortal old monster who got up and said: "Returning to the Lord, all the refining drugs have been taken away. On Sangzhixing, there is no important resource, no need to return..."

To this result, Ye Xuan nodded with satisfaction. This

Before the second expedition, he did not intend to go back. Even if he wanted to go back, he activated his interstellar coordinate jumping ability and returned directly instead of taking a large ticket behind him. In that case, the delay on the way was too long. It is absolutely unnecessary. press

According to his thoughts, in the future, he and a group of squadrons are basically where they go and where they live. For example, this time they laid down this powerful starry ban, before all subsequent follow-ups, all The power of the scorpion will be rooted here. on

Just like nomadic in this vast universe of voids, there is no fixed nest, but there are old nests everywhere...

Chapter 4242: Refining large drugs

"This war, the deforestation of the Legion can be described as huge gains, and, with new blood to join..."

Turning to the surrounding people, Ye Xuan smiled and said: "The next step, I will continue to go to the new battlefield, but the next target of conquest is not yet determined, this matter, The king will then explore and finally determine."

Prior to this, all the corps of the corps were stationed in this forbidden land. More than one hundred lives were the temporary destinations for us. The same is true in the future. Where did you go and where to live..."

"Before the next conquest, all the legions of the corps, after smashing this time into a flesh-and-blood drug, after the resources were issued, all went into retreat, and strived to cultivate their own strength before the next expedition. , push to another level!"

"This is our ultimate goal. Everything is for our own cultivation. It is all about going faster and further on the road of spiritual practice..."

In the end, Ye Xuan waved his hand: "Okay, the major legions, each picking the life star of the foot, and then the condensing of the flesh and blood medicine. On this side of the king, today will also start the furnace again, and smelt a furnace. After the completion of the amethyst color of the top flesh and blood medicine, the resources will naturally be issued, and quickly leave!"

boom! ”

"Booming..."

Xuan's words just fell, surrounded by a large number of stars and warships of the remnants of the battleship, immediately roaring, under the guidance of an immortal old monster, rushed to a life star.

Undoubtedly, the 12 tribes of the survivors will basically choose a life star. After they are stationed, they will immediately sacrifice the stove, attracting the heart and fire, and launching another round of flesh and blood. The tide.

Although the captive army did not have this ability and technology, but Ye Xuan has already spoken, everyone is their own, and friends must love each other, presumably they will not miss this opportunity, they will certainly seek help from the relics, and use the resources in their hands. Big medicine, while learning to practice technology. This

Everything is not what Ye Xuan needs to pay attention to anymore. What he has to do now is to use a part of the resources that he has just intercepted, and once again smelt a top-grade flesh-and-blood medicine.

After all, the top officials in the captive army have not tasted the benefits of this top-level big drug, and it is time for them to taste the sweetness. So, the subsequent conquest will be even more powerful..."

call out! ”

Under the sway, Ye Xuan even entered a life star, and the seventh-order green cow behind him closely followed.

This time, Ye Xuan did not drive him away, because there is this guy, the three-jawed dragonfly and other talents dare not come, so that Shennong Ding is exposed. Enter

After entering the atmosphere of this life star, Ye Xuan turned to the seventh-order green cow, don't let anyone enter the interior of the star, and then walked to a huge canyon in the star land table, a wave, directly Offering Shennong Ding, the figure is smashed into the mouth of the colorful fog, sitting cross-legged... very

Fast, with his enthusiasm, hundreds of smashed beasts and shards that had been repaired before the main level were sacrificed, and Ye Xuan also took out more than a dozen repairs from his collection. For the strength is at least the mortal treasure of the ancient immortal. also

There are a large number of top-class treasures, as well as thousands of cubes of the furnace emulsion and the congenital yin-cold liquid mixed liquid... It was taken out by him and suspended in the central area of the central volcano. The flame pool is half empty. "

boom! "

"Booming..."

"call out!"

.....

The roar of the roar, the flame pool under the top refining material of the canopy suddenly burst into a loud noise, and an energy form that was condensed by the Shennong seven-color flame quickly rose from the flame pool.

Then there was the sound of a broken air. All the materials originally suspended on the flame pool of the central area all flew into the huge furnace that was condensed by the seven-color flame of Shennong. The blink of an eye, It has melted in an instant and merged together.

The furnace is not solid, but is condensed by the Shennong seven-color flame. The body is translucent, everything in the tripod is clear, and all the materials are rapidly at the furnace temperature. Converged.

With just a few breaths, all the treasures of the treasures, the top treasures, and so on, which are automatically flying into the Ding, are all melted and merged together.

"Hey..."

It was also at this time that from the top of the volcano in the central area, there was a dense sound of breaking the air. The colors were different, and the shapes were different from the crater. From the top of the crater, it was like The rain generally fell over and over, and fell directly into the colorful furnace of this energy form.

These This furnace is the top flesh and blood medicine, and it has been thoroughly refined.

"Hey!"

"expensive....."

Hey! "

.....

With a large number of falling into the colorful energy Bao Ding, this flesh and blood medicine is completely formed. One

Time, the virtual shadow of Zhenlong Zhenfeng is rushed out from Ding, and the neck is roaring and clear! "

boom! "

In the next moment, a huge roaring sound rang, and the colorful furnace above the flame pool of the central area burst into infinite treasure, and instantly became a colorful star of the stars, and sprinkled toward the flame pool below.

At this point, the top flesh and blood medicine of this furnace was completed, and the furnace that was condensed by the Shennong seven-color flame retired and re-formed into a colorful flame and returned to the flame pool.

Suspended above the flame pool, it is a top-quality flesh-and-blood medicine with a large color of purple gold. It is not the pale purple gold that the twelve main tribes of the twelve major tribes of Sangzhixing have produced, but they are not comparable. Ye Xuan's last time he used the purely immortal treasures to condense the color of the top purple medicine. and

It is between the two... However, this quality is enough for the immortal grotesques such as the Three-Claw Dragon. This

A large amount of flesh-and-blood medicine that is condensed at the same time is like a mountain, huge and incomparable, emitting a strong energy atmosphere, enough to capture the star-studded power of the corps above the squadron level for a long time. boil

After the refining was completed, Ye Xuan sighed with a sigh of relief, and waved the smoldering flesh and blood medicine into the ten space vials.

These flesh-and-blood drugs are not used by themselves, because there are still a large number of high-quality drugs that have been refined last time, far from being exhausted. but

Ye Xuan did not intend to hand over to the captive army all at once, enough for their short-term cultivation costs, so as not to grow longer, to appetite.

After doing all this and collecting all the ten space vials, Ye Xuan took another wave and took out one hundred cubic meters of top-class flesh and blood medicine, and twenty pieces of immortal beast blood, he decided to take advantage of this. Opportunity, break through again...
