

Super D. S 428

Chapter 428: Savior

"Kid, what's your name?"

At this time, the elders suddenly asked.

"Ye Xuan!"

Ye Xuan answered.

"Very good, this time you made great achievements, although you are the pilot of the elders, but I can be the master, let you join me, and directly become a disciple." Baibaomen elder said.

Upon hearing this, Ye Xuan immediately thanked him: "Xie Da Elder!"

Now, he is finally out of danger and will not continue to be arrested for poison.

Then, the elders asked: "There are few masters, what is this time?"

The poisonous princess snorted and said: "I was invited by the Yangming, and went to poison the fifth-order sacred beast, but found that this was a trap, so I tried to escape back..."

"The relationship between Wu Duongzong and our Baidu Gate is not bad. Why does Yang Ming want to start with the younger master?" The elders asked strangely.

"Humph."

When I mentioned this Yangming, the face of Princess Baidu was suddenly changed. Coldly said: "A few days ago, when I was walking outside, I found a great poisonous grass planting place, so we The two decided to use the way the disciples battled to determine the ownership of the plantation."

"Since it was discovered at the same time, it would be better to divide it. Why..." The elders are puzzled.

"I think this is the case, but the size of the plantation exceeds our estimate, and the ambition of the five poisons is very large, and I want to monopolize the land." Princess Baixue explained.

"The content of the test is..." the elder asked.

"Poisoning, detoxification and poisoning, three wins in three games!" answered the Princess of the poison.

The three words of poisoning, detoxification, and poisoning are very familiar to the elders, because this is the fairness test in the jurisdiction of their ghost tombs.

The poisoning test is to test the poisoning ability of the two people to see who can poison the opponent silently.

Simply put, this is a life-and-death battle to see who kills the other.

Detoxification test, the two sides took out a poison to let the other party take it, and took out the Tiandi Dibao that can be configured with antidote. Of course, you can take it out and confuse the other party, but no more than five.

At the same time, the poison must let the opponent survive for three minutes, so the two sides have three minutes to configure the antidote. If someone is poisoned in three minutes, then the opponent will lose.

If both of them detoxify in three minutes, then they will level off and win or lose with life and death.

This one is very difficult.

In case the other party sends a low-level death squad, and the amount of the poison is not correct, then the death squad will die in an instant, and thus the party is convicted.

The poisoning test is that the two sides take out five kinds of poisonous grasses, use these ten kinds of configuration to become poison, let the other party take it, and see which party will die first.

This test is also very cruel, because it is not allowed to detoxify, only one of them will die before winning, and then detoxification.

In three trials, at least three people will die. This is the atmosphere of the ghost tomb, and does not kill human life.

"The Yangming of the five poisons is only four hundred and thirty dragons, and the means of poisoning is inferior to the lesser ones. This first game will definitely give us, but in the second and third games, there is luck. ..." The elders frowned.

Ye Xuan on the side quickly thought about it. This second detoxification game is actually the most difficult.

If you want to win, you must ensure that your opponent dies in three minutes. This depends on your eyesight and detoxification ability.

This second game of poisoning, often occurs to win the game, but the situation of the dead, because the poison is the other party supply, so this second person is extremely difficult to find.

As for the third game, it depends on what kind of poisonous grass the two sides have come up with.

"The elders, I originally thought that I had a 70% chance of winning, but now I have a 10% grasp!" said the Princess of the Poison.

"There is nothing to do with the little master." The elders were a little surprised, but he followed the eyes of the poisonous princess and finally fell on Ye Xuan's body.

The elders suddenly reacted.

Ye Xuan, with such a peculiar physique, this is the nemesis of their poisonous sect.

If you let Ye Xuan participate, you will be able to win the second and third games.

"I rub, how can I keep on trouble?" Ye Xuan is already drunk, and he is beginning to wonder if he is a broomstick. Wherever he goes, he will go there.

"What is your name?" asked the Princess of the Poison.

"Ye Xuan!"

"If you can help me, I will let my father accept you as a disciple!" Princess Poison continued.

The great elder on the side was shocked, the father of the poisonous princess, but the chief gatekeeper of Baidumen.

At the same time, it also shows how big and precious the planting land is.

"Nima, and took out the apprentice to lure me, the old guy of the elder Wu also said, and the result immediately became a fart."

Ye Xuan thought in his heart, and then said: "Thank you for the lesser, but I feel that I still give me some real talents."

"You don't want to be my father's apprentice?" The poisonous princess was shocked, his father, but the master of the sixth-class temperament.

However, this is also good, Ye Xuan even three hundred dragons are not, when her younger brother is too cold.

At this time, Princess Baidu asked again: "If you say it, will you make poison?"

"meeting!"

Ye Xuan did not want to answer.

What kind of jokes, what is the phagocytic system to eat, as long as the raw materials are given to him.

The Princess of the Poison is a bit skeptical, because the Baidu Gate is a specialized poison, and Ye Xuan said that at most, it can only be an introduction.

Therefore, she took out five kinds of poisonous grass and said: "Then you use these poisonous grasses and configure a poison for me."

Ye Xuan took over the poisonous grass, and then pretended to take out a stove.

He also knows these poisonous grasses. He quickly searches in his mind to see what poisons can be made with these poisonous grasses.

Now his engulfing crystallization is almost inexhaustible, and it is not useful for the time being.

Then, he found a suitable poison Danfang, took a few of the five herbs into the stove, and then put a lid, hands and poured out the gas into the furnace, began to refine.

In fact, he was not refining at all, but he was just doing it. He used the angle and the cover of the furnace lid to put a poison inside.

After more than ten seconds, the furnace rushed out of a steam and the refining was completed.

The elders opened the lid and found a scarlet medicinal herb lying inside. He picked it up and smelled it. He said, "This is blood-staining Dan!"

The Princess of the Poison also smelled the **** smell. She understood that this is the most potent poison that can be refined with the five poisonous grasses.
