

## Super D. S 43

### Chapter 43: Adventure

The eighth-order monster is not the eighth-order monster, and the vitality is really tenacious. In order to kill this saber-toothed tiger, the spiritual power in Ye Xuan is quickly consumed.

At the moment, Ye Xuan took out two medicinal herbs and swallowed them.

This is a returning Lingdan that he spent a little bit of devouring points. A bottle of twenty, two will probably restore his spiritual power.

Simply put, one is fifty thousand two silver.

"Let me see how much your eight-order monster is worth." Ye Xuan sneaked in from the sword-toothed tiger's eyes and killed the dying saber-toothed tiger.

Subsequently, Ye Xuan reached out and swallowed the body of the saber-toothed tiger.

"Swallowing success!"

Ye Xuan felt it and found that the body of this eight-order monster was about 200,000 silver.

However, when Ye Xuan heard another tone in his mind, the eyes also showed the color of surprise.

"The host successfully swallowed the black peony concentrate powder!"

Black enamel concentrate?

"This black sap concentrate is not the one I swallowed in the white scorpion nest?" Ye Xuan thought.

But what is the situation with powder?

Ye Xuan's afterglow swept away and found another corpse, the one that the saber-toothed tiger had just eaten.

At the moment, he quickly rushed over and found that it was the body of a dragon steel turtle.

The dragon steel tortoise is a seven-order monster, and it is a strange monster. It is dedicated to eating stones. In addition, it can also eat some ore, which can enhance its defense. Its attack power is not strong, but its defense is extremely strong. Generally, warriors rarely go hunting dragon steel turtles.

Ye Xuan smashed down and swallowed the body of the dragon tortoise. Then his eyes flashed a surprise color.

"Congratulations that the host has swallowed an obsidian and scored five points!"

"Haha!"

After hearing this prompt, Ye Xuan couldn't help but laugh a few times.

Sure enough, this dragon steel tortoise swallowed a black obsidian, if it is not dead, I am afraid to use this obsidian to grow into an eighth-order monster.

Unfortunately, it was pierced by the sharp teeth of the saber-toothed tiger, but it was also cheaper.

"The strength of spiritual power has improved a lot. If there are a few black sorghum concentrates, I am afraid I can break through the seventh peak of martial arts."

Ye Xuan thought in his heart.

After the last time, he also inquired about the black glutinous concentrate, which is an associated mine, and a black sorghum concentrate may not appear in a vein.

However, there are dragon steel turtles here, which is good news for Ye Xuan.

"Dragon steel turtles generally live near the veins. There is a dragon steel turtle here. There may be veins around it. Even if there is no black enamel concentrate, it is good to find a vein."

Ye Xuan's eyes were bright again. He found himself too clever. Just look for the footprints of the dragon steel tortoise, maybe he could find it.

The dragon tortoise is bigger than the saber-toothed tiger. It is similar to the SUV on the earth. It weighs at least two tons, so its footprint is very obvious.

At the moment, Ye Xuan is looking for the past along the footprints of the dragon steel turtle.

Today is really the time for the goddess of fortune to go out, Ye Xuan follows the heavy footprints of the dragon steel turtle, and really found a vein for him.

"Just a blue gold mine..."

Ye Xuan is somewhat disappointed, because this blue gold mine is relatively common, so it is relatively cheap, and the whole vein may not be worth one million dollars.

Ye Xuan did not immediately take out the long sword and began mining. He first explored the mine hole.

The mine hole is quite large, and there is only one road to go. There are also the footprints of the dragon steel turtle on the ground. It seems that this is the nest of the dragon steel turtle.

However, when Ye Xuan walked to the end of the mine, he couldn't help but open his mouth. The end of the mine was very spacious and it was almost a basketball court.

There are countless blue gold mines embedded in the stone wall at the end, and Ye Xuan's eyes are a little bit painful.

At this time, Ye Xuan's afterglow swept away and suddenly found a color that was not quite right.

"The trough is lying, the black enamel concentrate, that is the black enamel concentrate..." Ye Xuan couldn't help but scream, and the sound echoed in the mine.

Fortunately, the goddess of fortune really looked at Ye Xuan, and even found a black glutinous concentrate in Ye Xuan, and the size of this black glutinous concentrate is much larger than the one swallowed in the white scorpion nest. .

"The dragon steel turtle is really pitiful, there is a black enamel concentrate on the top of the head, but it can't be harvested. However, I can do it!"

At the moment, Ye Xuan took out the black iron bow and then shot at the stone wall next to the black enamel concentrate.

"Hey!"

The gas shot into the stone wall, and the stone wall hit a hole.

Ye Xuan is not stupid. He will not attack the black enamel concentrate. Instead, he will crack the stone wall around the black enamel concentrate and let the black enamel concentrate fall.

The black enamel concentrate is on the stone wall at the height of eight meters, and Ye Xuan's black iron arch is full of strength. In a short while, the black enamel concentrate is lost.

"Devouring!"

Ye Xuan immediately went up and swallowed the black enamel concentrate along with the stones.

"The host successfully swallowed the black scorpion concentrate and gained 12 points of phagocytosis!"

After hearing the system prompt, Ye Xuan smiled and screamed: "Haha, 12 points to swallow points, I have 20 points to swallow points!"

Twenty points to swallow the points, probably can be exchanged for one or two seven martial arts, but for now, what Ye Xuan needs most is not martial arts, but equipment.

The mysterious iron bow is just a Chinese product, and now what Ye Xuan wants most is a top-grade piece.

If he has a good-handed genre, I am afraid that it is easy to kill the saber-toothed tiger without consuming a lot of spiritual power.

"Come out, break the cloud bow!"

Ye Xuan's hand suddenly appeared a white longbow. This is the top-grade mortal he spent on fifteen points to devour the points. Whether it is range or spiritual power increase, it is much higher than the black iron bow.

With it, Ye Xuan's confidence has increased.

"Come and come, let me find, there is no black enamel concentrate!" Ye Xuan began to look around again.

In a short while, he found a black enamel concentrate on the ceiling, and luck was really good.

"Give me down!"

The black enamel concentrate fell again, and Ye Xuan stepped up to swallow it and scored seven points.

Now, he is only a little bit, he can break through to the seventh peak of the martial arts, and perhaps another black sap concentrate!

"Haha, found, there is one!"

Ye Xuan smiled and smacked, and immediately raised his hand, but at this moment, suddenly a strange sound fell into his ear.

"Hey!"

"Hey!"

"No, this mine is going to collapse!"

After seeing the cracks around the mine, Ye Xuan changed his face and rushed to attack. Within three seconds, the last black scorpion concentrate fell.

"Nether step!"

He quickly swept to the black sorghum concentrate and absorbed it.

"Hey, congratulations to the host to break through to the seventh peak of the martial arts!"
