Chapter 439: Weird poison

"It's the kid, go, kill him!"

Bone Seven is also an immediate command.

At the moment, his white bone war is quickly swept out, stepping on the poisonous poisonous grass and killing Ye Xuan.

Ye Xuan can now beat him, hurriedly walked away, and then walked around the bodies and took away all the shackles on them.

These elders, but blood washed the door of the drug, there must be many good things.

"Hey, the host has broken through the power of four hundred and ten dragons!"

"Hey, the host has broken through the power of four hundred and twenty dragons!"

"Hey, the host has broken through the power of four hundred and thirty dragons!"

Four bodies, let Ye Xuan upgrade the 30 dragons.

At this point, the poisonous bee was also killed almost, and Ye Xuan's Beastmaster's violent duration is about to pass, so he quickly sneaked away, the white bone war can not find his figure, and turned back.

"Damn!"

When Tang Huaizhi smashed the last wave of poisonous bees, he was too angry to bite his teeth, and the hair was so angry that he stood up.

He has recognized Ye Xuan.

Last time, he could have wiped out a hundred poisonous doors, but a halfway suddenly killed a Ye Xuan, which led to the failure of the siege. Ye Xuan and Feng Yaqing escaped.

This time, Ye Xuan again disturbed him, but also killed four elders of the five poisonous sects.

Now, with the exception of their three defensive sixth-order, there are only six elders with a fifth-grade temperament.

"The Sovereign, what do you do now?" asked an elder after he removed the toxin from his body.

"Continue to break the line!" Tang Huaizhi bite his teeth.

"The last time we came, there were only some white bones on the planting ground. Then we laid down the poison and sprinkled some seeds. But I didn't expect it to be so dangerous, I feel..."

"What do you feel?" Tang Huaiwen asked coldly.

"The changes here are beyond our expectations. There may be a powerful poison here!" said the elder.

In fact, Tang Huaizhi also felt it.

This is the first heavy poison, there are thousands of poison bees. If they get to the poisonous array under their five poisons, I am afraid it will be more dangerous.

In this way, let alone the plantation where the two poisonous groups are wrapped inside.

"You can rest assured that as long as you find those white bones, I will be able to find out the bones of my predecessors. When it is time, I will not treat you badly." Bone seven yin and yang said strangely.

The white bone grass is the symbol of the fall of the white bones. The people of the previous five poisons occasionally saw these white bones and reported the matter to Tang Huaizhi.

Be careful with places where there are white bones.

The sects of the corpse of the corpse, the practice of cultivation is almost the same, which will change their physique.

After they die, the body may change. If you dig up the white bones, there will be big trouble.

"but....."

The elder still wants to say it again.

Tang Huaizhi directly interrupted: "There is nothing wrong with it. As long as we help the bones to find the body, we will part ways, and the relics of the eight-order powerhouse will be enough for each of us to establish a force comparable to the five poisons. Now, four more people are dead, and we have more points."

In fact, he and Bone Seven have an agreement in private, as long as they find the bones, then he and the bones seven teamed up to eradicate these five poisonous elders.

After all, there are too many people!

However, he is not afraid of the bones and seven waters, because the bones are his brother, but these elders do not know it.

The remaining six elders looked at each other and nodded.

They are still convinced, and the relics of a stalwart eighth-order powerhouse, even if they are ten people, are enough.

This team continues to move forward, and the four people who died before are not in a high state. The remaining six people have reached 550 dragons, and the strongest is 580. If they join hands, they will count It is the sixth stage of the Royal Air and can also fight.

These words, Ye Xuan did not hear, the distance is too far.

"Go ahead, or wait until they find the bones."

Ye Xuan, not far from hiding, thought of it in my heart.

He got four bodies, but he made a big profit. Even the body of the sacred beast was added, because the elders of these five poisons had killed the elders of the venomous door before they rushed to the door of the venomous door. It's strange to have a pocket.

Ye Xuan estimates that if the remaining six people are also paralyzed, at least they can break through to four hundred and fifty dragons.

Next, he followed behind these people and made a little progress.

Tang Huaizhi of the front team whispered: "The kid is still following us. How did he avoid these dangers?"

"Don't worry, it's only my white bones to chase him, the foot bones stepped on the poison powder, if it is an accident, it will be troublesome." Bone seven whispered.

Fortunately, the door-to-door masters of Baidumen explained the method of breaking the array, so they were not blindly broken. After about five minutes, they came out from the poison of the poisonous door.

Next, it is the poisonous array of the five poisons.

"This is the venomous killing of my five poisonous sects. In addition to the hundreds of poisonous weeds, we also sprinkled a lot of larvae of bloodthirsty locusts and other poisons. After so long, they should be able to threaten us. Tight to me, be careful."

Tang Huaizhi still walked in the front, and then entered the battle of this poisonous killer. There is only one line in this big battle. He remembers very clearly that as long as there is no accident, he can easily break.

At this time, Ye Xuan also came out from the poison line of Baidumen. He couldn't help but feel that the person who used poison was really terrible. Fortunately, he had the blood of the holy tree of life, otherwise he died a hundred times earlier.

Before the old blame was to plant in the lower-level territory, so there is no need to engage in such troubles, and this planting place is in the ghost tomb collar, and Baidumen and Wudu Zong are also afraid that the poisonous grass planted hard will be cheaper, so it is only Two poisons were studied.

In the past few months, Ye Xuan has a lot of understanding of poisonous grass. Anyone who sees it on the road will quietly pick up a leaf and then improve its anti-toxicity.

This poisonous array is big and complicated, and some poisonous grasses are even taller than Ye Xuan. At the same time, there are often things flying in the air.

Ye Xuan followed very carefully, keeping a distance of kilometers from the front.

This time, the speed of the team of the five poisons was very fast, and they went out in less than three minutes.

"It's finally out."

Tang Huaizhi frowned slightly because the plantation in front of him was already a forest.

"There is nothing here, just the seeds I sprinkle, it is impossible to grow like this!"

"There must be a powerful poison here, I don't know what the realm is."

"At least there is a fifth-order temperament, and it may be six seasons!"

The six elders are somewhat worried.

"Don't say it, hurry to find the white bone grass, then leave, Chen Elder, you come to lead the way!"
Tang Huaizhi said.

"Yes!"
