

## Super D. S 4391

### Chapter 4391: Cut off

With the immortal speed of the Emperor of the Yin Emperor, it was repaired to the full opening, and soon it went deep into the distance of this mysterious black hole void, and in front, the single black of the canopy was not extinguished, and the mysterious black hole was empty. At the edge of the area, about seven hundred and eight billion miles away.

Seven hundred and eight billion miles away, for the immortal of the emperor, especially the four half-step emperor who has the perfection of the ninth-order emperor of the emperor, is considered to be within the scope of effective attack.

The semi-imperialist strong man slammed into the air, and within a billion miles, he could defeat the enemy. but

The emptiness of the void is very difficult. The distance between the stars and the sky is 700 million miles. Even if it is half-step, the possibility of successfully capturing it is no more than 10%.

In order to ensure that this matter is foolproof, even if the four half-steps of the Emperor and the United States simultaneously take part in the joint hunting, it is necessary to immerse the awning in an area that is within 100 million miles from the edge of the mysterious black hole. Only then.

That is to say, after the Yin Emperor approached the awning, he not only had to try to attract the attention of the other party, but also had to lure it to a distance of about 700 million miles.

This is definitely not a simple matter. It can't be done by other people, such as the Yinqi and so on. less

After that, the Emperor Yin was close to the distance of the awning, which was only a million miles away. Even at this distance, he did not dare to move forward. he

Although there are the blood talents of the Yin Mozu, it is impossible to distinguish any form and become a beast, a human or an energy life. But the re-image of change is just a change, not a real void. inflammation.

I really want to hang up with these emptiness and inflammation.

The distance of a million miles is the result of the deduction of the Yin Emperor's heart. On the other hand, on the one hand, the invisible heat emitted by the awning will not bring him a heavy burden.

On the other hand, if the other party is too excited, suddenly he will come over and want to be close to himself. The Yin Emperor may not even have the chance to escape.

The void does not have the ability to walk freely through the void, saying that it is unpredictable, which is one of the reasons.

The general seven black and eight blacks are not extinguished, and the speed is already terrible. What is more, this is still a single black and white? no

Whether it is the unpredictable ability of the ghost to walk through the void, or the heat it emits is not comparable to the general void.

Even if the Yin Emperor has the cultivation of the royal kingdom, he must maintain a safe distance of a million miles away... even if the other party is only a small one with a hundred feet!

At this moment, after a distance of a million miles away, the physical form of the Yin Emperor came to an abrupt end in the void. He did not immediately take action, but carefully observed the situation and determined that the awning was precious. After the inflammation, and no other abnormalities, this is a sigh of relief.

Then, the Yin Emperor urged the secret magic of the Yin Mozu, in the direction of the awning, the singularity of the singularity, and the scent of the singularity of the singularity And the speed is very fast, after releasing it, immediately cut off the connection with this sigh.

The consciousness of the emptiness of the emptiness of the territory is strong and horrifying. In this mysterious black hole void, any scent that does not belong to the emptiness of the void will be attacked immediately.

If this sigh is a little stronger, the void in the vicinity of a large area will not be destroyed, and all of them will be spurred in an instant, overwhelming, shrouded and incinerated into fly ash, and it will disappear.

Before the Xuanhuang Xingyu's one-and-a-half-step emperor, it was self-cultivation and strength, and rushed into it. As a result, this kind of robbery was destroyed.

At this moment, the atmosphere of the Yin Emperor's intentional leakage is only a very weak point, and it is the direction in which the awning is not extinguished. Therefore, the void in other directions is not inflamed, and it is not felt at all. Impact unless the distance is too close. but

At this point, before the Yin Emperor had already shot, he had deliberately observed and evaded it.

"call out!"

As he expected, after capturing this extremely weak foreign body, this canopy was originally in the void, and it was like a teleport, and it was close to the dozens. Ten thousand kilometers. One

The incomparable atmosphere of the stock market came over the sky, and the Yin Emperor was shocked and shocked. He quickly withdrew millions of miles and opened the distance again.

For a moment, this emptiness is not extinguished, and he was lured by hundreds of thousands of miles... but

Relative to the long distance of more than 700 million miles, these hundreds of thousands of miles, obviously not a thing, but in order to ensure safety, Yin Emperor can only induce each other so little, toward the edge of the mysterious black hole of the established mysterious step by step... step by step So move slowly like this!

It can be said that this matter requires not only a high concentration of energy, but also a little bit of arrogance and sloppiness, and it is still a very hard work.

It can be seen that the tens of thousands of Yin Mozu people, such as Yin Emperor and Yin Qi, are not easy to mix in this Xuanhuangxing domain. Every year during this period of the most empty period of the void, all the evil spirits The tribes are tired like dogs, and they are always at risk. because

In the unlikely event that the different atmospheres that were specifically leaked out are a little more intense, it may cause more attention to the emptiness of the emptiness. At that time, the scene will be overwhelmed, and the scene will be burnt into ash and form a god. Next time...

Slowly passing between...

The Yin Emperor is like this, every time it is 100,000 miles away, it is induced step by step, bringing this awning to the edge of the mysterious black hole. only

To reach the edge of the black hole at a margin of 100 million miles, the four-and-a-half-step emperor, who has already been ready to go, will jointly shoot at the same time. As a result, the high-quality single-faced one of the canopy is successfully captured. The chance of eliminating inflammation will reach 80% or more.

Unknowingly, the distance of 700 million miles was reduced to only 300 million miles under the unremitting efforts of the Yin Emperor. The task of the Yin Emperor was half completed and smooth, and there was no accident during the period. occur. Look

In this scene, hundreds of millions of miles away from the mysterious black hole on the edge of the sixteen emperors are immortal, all the faces are full of joy, all the people are very excited, even the breathing is faint and a little rush.

In their view, this awning does not have to run out of inflammation. In a small half-day period, it will enter the range of 100 million miles. At that time, as soon as it is shot, it will be captured immediately. This

However, the single black does not extinguish the inflammation, but there is also a large canopy of a hundred square feet, and the sixteen seals are immortalized. The fireworks of the big medicines in the next year are enough.

With this top-level fireworks, the flesh and blood medicines they will produce in the coming year must be of excellent quality, used for cultivation, and the effect is extraordinary. How can they not be excited? also

It was at this time that the accident that caused the Yin Emperor and the sixteen emperors to be immortal, but unexpectedly, suddenly occurred. Have

People... halfway through the Hu!

Chapter 4392: Seven-color flame bridge

"call out!"

The sharp and unpredictable sound of the air broke out, and a purple mangled in the void, the speed reached the extreme, and the blink of an eye crossed the edge line of the Xuanhuangxing domain and entered the Xuanhuangxing domain.

In the void, all the stars of life can be seen everywhere, but this purple mang has not stopped, and went straight to the depths of the Xuanhuang star field.

This purple mans is the magic dragon, but at the moment it is not like the fox is controlling, but Ye Xuan. leaf

Xuan now does not activate the blood of the konjac in the body, but it is a human form, but it does not show itself in its original face, but has made some changes, but it seems that it is quite old, still arrogant.

Even if he has not activated the blood of the konjac in his body, he is also possessing the horror of the first stage of the Emperor. In this Xuanhuangxing domain, it is absolutely invincible.

After all, this is just a large-scale survivor's star field. The strongest one is only a half-step emperor... The real strong emperor can only be seen in the top star ban, or in the top-level singer. in

Under the control of the Emperor of the Emperor, the speed of the Demon Dragon is almost at the extreme, even surpassing the lightning. At this time, the universe of the universe in the Xuanhuang Star

Field is passed, and the ancient survivors on the life stars along the way look at it. What is the purple mangling that is not clear in the void outside the stars! just

Entering the Xuanhuangxing domain, Ye Xuan has extended his knowledge and enveloped the entire vast star field. Do not

None of this has been noticed. On the one hand, Ye Xuan deliberately controls the knowledge of God, on the other hand, because his gods are too powerful, and the existence of the Emperor is under the control of the heart, even if it is half a step. Feng Di, can not sense his knowledge of the exploration.

For this reason, Ye Xuan manipulated the Dragon Dragon Palace, although he just entered the Xuanhuangxing domain, but in fact, the general situation in the entire Xuanhuangxing domain has already been reflected in his mind. although

I dare not say that there is no such thing as a fine, but the mysterious black hole in the northwest corner of the Xuanhuang Star Field is so obvious that it can't escape his knowledge. this

Engraved, under the control of the magic dragon, the speed of the dragon is developing toward the mysterious black hole in the western region. God

The Shennong fire in the Ding Ding has evolved to the extent of the Shennong seven-color flame. Although the power is powerful, and Ye Xuan just ignited the Shennong one-color flame with the heart fire, it is already a day, it is a day. One place.

But in fact, the Shennong seven-color flame still has not reached its peak. God

The Shennong fire in the farmer's dynasty, the most peak state is the Shennong nine-color flame. and also

That is to say, the current seven-color flame needs to undergo two major evolutions in order to show the most powerful power. change

From a point of view, as long as there is a world-wide fire that can be swallowed up, then the current Shennong seven-color flame can still evolve twice.

Of course, this kind of thing depends on the opportunity. After all, the grade is high enough to promote the evolution of the gods and peasants, and it is rare to see the evolution of the world.

At the moment, this opportunity is obviously coming!

Under the exploration of the gods, Ye Xuan had a kind of intuition in his heart when he first entered the Xuanhuangxing domain. The strange fireworks in the mysterious black hole void mostly allowed the Shennong seven-color flame to evolve again. he

Now that it is the strong emperor, the gods are very powerful. Since this intuition has been born, there will be no major mistakes.

However, because the distance is too far away, the phagocytic system in his body did not give any prompts. This

It is also the reason why Ye Xuan even provoked the magic dragon to drive, and launched the speed, rushing to the mysterious black hole vacant. he

Can see the mysterious black hole in the void, there are many old acquaintances of the Yinmo family are trapping this mysterious unknown fireworks.

If this flame is really effective against Shennong's flames, Ye Xuan will obviously not condone this matter. Shennong's flames have evolved to the seventh floor. If you want to change and evolve once, the high-quality fireworks that need to be swallowed are extremely powerful. After the identification of the phagocytic system, it is determined that this flame is effective, Ye Xuan will immediately shoot, grab all the mysterious fireworks! very

Fast, with the speed open, the Dragon Dragon has finally entered the area where the mysterious black hole is empty, only a billion miles away.

At this time, in Ye Xuan's mind, a familiar system sound was heard: "Hey, congratulations to the host, and discovering that the void is not extinguished! Can it promote the evolution of the Shennong's flames, and capture it immediately?"

Does the void not kill the inflammation? leaf

Xuan's dawn is light up. This kind of fireworks has not been heard before, but it is obviously very extraordinary. You can determine this by listening to its name. No

Any hesitation, Ye Xuan, even from the data repository of the body's engulfment system, all the information about the void is not taken out, and quickly browsed. This

Some of the information was not available before, but as the phagocytic system discovered this new resource, the system's data repository was updated.

In a short period of time, Ye Xuan will thoroughly understand all the characteristics of this emptiness and inflammation, and then hesitate, and waved his hand directly from the Shennong Ding in the body, which led to a seven-color flame. Venting, and it seems like a shocking rainbow, the wind will rise, and the blink of an eye will be a wide-width seven-color flame bridge, crossing the void!

"call out!"

The magic dragon slammed forward and rushed directly into the flaming flame bridge that was rushing away. It was covered by it... This is Ye Xuan, and it was replaced by other people, even if it was the strong emperor. Contact with the seven-color flame of Shennong, but also immediately burned into fly ash. "

call out! "width

Dawanzhang, the seven-color flame bridge that stretches for thousands of miles, is wrapped in a magic dragon that is only a hundred feet in size. It is like a stunned sky, and it blinks directly across the edge of the mysterious black hole and enters the interior of the black hole. This

Everything happened too fast, not only waiting for the edge of the black hole, waiting for the void to come close, and then the high-ranking survivors of the Xuanhuangxing domain that quickly shot and hunted did not react.

Even the tens of thousands of Yin Mozu people inside the mysterious void are the same. Place

Some people only feel that there is a sudden flower in front of them. Then, inside the mysterious black hole void, there is a Hongqiao with a length of thousands of miles. The whole body is formed by fireworks, and the colorful colors are very gorgeous.

At this time, in the edge area of this mysterious black hole void, the best quality, the highest grade, it is the Yin Wu is tempted by the Yin Emperor. Yes

In the control of Ye Xuan's mind, this colorful flame bridge of thousands of miles rushed into the mysterious void at the moment, clearly pointing to the awning.

The speed of the flame bridge is too fast, only a dazzling time, the front end of the flame bridge has covered the awning, and it is directly swallowed and integrated into itself. and

For the Yin Emperor, there was a sudden flash of light in front of him. Then, after a long and hard work, he lured for a long time. Seeing that there were more than 200 million miles, he could lure him into the hunting area. Suddenly, It disappeared and disappeared...

Chapter 4393: Bandit bandit

The flame bridge traversed the sky and rushed into the mysterious black hole. Between the blink of an eye, the high-quality single-black squad that was captured by the Yin Emperor was completely swallowed up.

All this happened too fast, the Yin Emperor only felt a flower in front of him, and the awning that had been locked by him had disappeared. Instead, it was a colorful flame that appeared in the side of a million miles away. bridge. flame

In the middle section of the bridge, there is a purple drive, and the vestibule of the drive, there are seven or eight figure shapes, shadows...

Under the circumstance, the Yin Emperor was still a bit embarrassed at first, and did not understand what happened, but soon, with a flash of light in his mind, he realized that he had been intercepted. Xin

After a hard day and a long time, I couldn't put the awning on the singularity. From 7-8 billion miles away, I stepped into the edge of the black hole and only 200 million miles away. But now, everything Hit the water.

When the other party arrives, he will take his hard work for a long time and completely ruin it!

The thought flashed through my mind, and the Yin Emperor only felt that the cerebral blood suddenly rushed, and I didn't think about what the other side was. I could enter this mysterious black hole void so casually.

Now he, a mind only identified the other side shamelessly intercepting the Hu, took away his own trap for a long time, both will be the ones that will be inflamed...

Under the blood, the Emperor of the Yin dying, the look on his face immediately screamed, and his feet snarled in the void: "Robber! Bandit! Wang Ba..."

call out! "

"Hey..."

At the same moment of the angry roar in his mouth, the black hole in the area was surrounded by a void, and there was a sharp sound of a sudden burst of sound. turn

Looking at the first place, the quality of a awning is different, and the number of emptiness is not extinguished. It is like crazy, and it is rushing toward this side...

The consciousness of the emptiness of the emptiness of the territory is strong and horrifying. In this mysterious black hole void, any scent that does not belong to the emptiness of the void will be attacked immediately. If

It's a little bit stronger. The empty space in the vicinity of a large area will not be destroyed. It will all be irritated in an instant, overwhelming, shrouded and incinerated into fly ash, and it will disappear. God

Although the farmer's flame is also a fire in the world, it is an alien invader for the virtual air.

A colorful flame bridge that hangs wide and reaches a thousand miles, rushes into this mysterious black hole void, and directly hangs the void. For all the voids in this area, it is tantamount to a bright light in the night. Too eye-catching, too clear. this

Engraved, all the voids in the imaginary emptiness of the eternal emptiness, all of them sensed the breath of the colorful flame bridge, and immediately rioted, with a breath of destruction, from all directions, spurred, Pounce on the seven-color flame bridge.

This scene is too familiar to the survivors of Xuanhuang Xingyu, and is no stranger.

Before the Xuanhuang Xingyu's one-and-a-half-step emperor, it was self-cultivation and strength, and rushed into it. As a result, this kind of robbery was destroyed.

However, for the tens of thousands of Yin Mozu people such as Yin Emperor and Yin Qi, they have never entered.

Before they arrived, the survivors of Xuanhuang Xingyu sometimes tried to trap the void and not kill the inflammation. Occasionally, they would throw some shackled star-studded beasts into the interior of this mysterious black hole. The way to attract the distant space is not to destroy the inflammation, approaching the edge.

However, since the arrival of the Yin Emperor and others, with their shots, this method of sacrificing a large number of starry beasts has been completely eliminated.

At this moment, I couldn't help but see such a horrible scene. Within the radius of a hundred miles, all the voids are not extinguished, all of them are crazy, and they are rushing toward the colorful flame bridge, including all the evil demons of the Yin Emperor. After a glimpse of it, the face changed a lot. number

Wan Da figure, while exclaiming, violently retreat, all evacuated to the edge of the black hole. he

They are scared!

Until then, the imperial concubine of the sixteen Xuanhuangxing stars outside the black hole's virtual boundary line was still in a sluggish state, one by one stunned, and suddenly this scene happened suddenly, and was shocked for a long time. Did not return to God. under

For a moment, the mysterious black hole in front of the void is two to three hundred thousand miles deep. The location of the colorful flame bridge, the sound of the earth-shattering roar, instantly sounds like a tide..."

boom! ""

boom! ""

Booming..."

The emptiness of inflammation from all directions is too much. Within a billion miles, all the voids are not destroyed. Regardless of the quality, no matter how good the quality is, there is no stagnation after sensing the breath of the colorful flame bridge. All came from the bang.

With a breath of ruin, and no hesitation, all of them rushed into the colorful flame bridge, which immediately caused a shocking explosion, like a tidal wave. Of course

However, all the voids that come into contact with the colorful flame bridges are not extinguished, even if the original ones have the highest order, and the most striking ones are not swollen, all of them are swallowed up. Look

It seems to be raging, and at the moment of the impact on the colorful flame bridge, it also made a terrifying loud noise, which is shocking and shocking...

However, this does not explain anything!

Compared with the Shennong seven-color flame that forms this gorgeous flame bridge, let alone the variegated low-quality void is not extinguished. Even the best quality, colorless and transparent void is not far from the opponent. Said that the two are almost completely not at the same level.

All the voids are not extinguished, as soon as they touch the colorful flame bridge, they will be swallowed up in the first time, turning into the flame energy of the Shennong seven-color flame toward the eight-color flame.

"boom!"

"Booming..."

The roar of the roaring sound of this area continued, and the tens of thousands of Yin Mozu people headed by the Yin Emperor, basically all of them have retreated to the mysterious black hole void.

Within a radius of a hundred miles, all the voids are not extinguished, all of them are attracted by the breath of the colorful flame bridge like a bright lamp. No one is going to pay attention to the people of the Yinmo. he

They started the speed, and in a very short period of time, they all evacuated.

However, due to the hasty rush, the overall evacuation was too flustered. Therefore, there are still some people of the Yinmo ethnic group who are violently rushed by a canopy on the way of violent retreat. It turned into a translucent, flamboyant fireworks, and was burned to fly ash...

Under the soul, including the Yin Emperor, all the people who escaped turned to look at the mysterious black hole behind them, and then the pupils contracted, and they sighed and stunned, and they shouted. To

At this time, the 16 emperors who had been waiting for the mysterious black hole void were immortal, and now they have finally returned to the gods, their faces have changed dramatically, and they are also exclaimed...

Chapter 4394: War army assembly

"What? The emptiness is not an opponent. Is there such a level of bombardment that can't shake the seven-color flame bridge?"

"This is impossible! Within a billion miles, all the emptiness of the emptiness is coming, and the number is huge, it is just a dazzling, just a colorful flame bridge just a thousand miles away, how can it be so solid!"

"The situation is not very good. All the voids are not extinguished. After they rushed into the flame bridge, they didn't come out again. It seems that... was it swallowed up?"

"Top Flame! The seven-color fireworks that form this colorful flame bridge are definitely top-level flames. Their grades are more than the voids, but they can't be swallowed..."

"Hey! Who is the person who shot it? It is unheard of to have such a top-of-the-line flame. In the flame bridge, there seems to be a drive, and it is faintly visible to see the shadows. They are hidden inside. check!""

Damn it! Where is the sacred, even ran to my Xuanhuang star field, smashing wild, arbitrarily plundering, it is really awkward! "

"boom!""

Rumble..."...

...before

Fang, the mysterious black hole in the void, wide and tens of thousands of miles, the colorful flame bridge hangs in the sky, all the voids in the imaginary empty space are not extinguished, all like a moth to the fire, hitting the colorful flame bridge.

The earth-shattering sound of the explosion, the endless voids of billions of miles were alarmed, and the innumerable remnants of the Xuanhuangxing domain were stunned and turned around.

In the vicinity of this mysterious black hole void, a large number of survivors who were hunted in the immortality of the emptiness of the emptiness and invincibility, after a short period of sluggishness and shock, all sighed and screamed. This

The scene has lasted for an hour. in

During this period, the complexion has long been because of anxiety and shock, and the sixteen emperors of the Xuanhuangxing domain have become immortal, and even several times want to rush into the mysterious black hole in front of the void. Out

Hand to stop this scene that is happening in front of you...

But in the end, they still forced the impulse of their hearts. To

Nowadays, all the people have already seen the clues. The seven-color fireworks that form this flame bridge, the high level, must be above the void. This

Although the 16th emperor is immortal, although it is a strong man, if it is a mysterious black hole that enters the front, it will not be able to resist even the overwhelming void inside, let alone the power of the seven-color flame bridge.

However, although they did not dare to enter without permission, they did not wait for the urgency of the mysterious black hole.

Some of them have already issued instructions, so that all the survivors of the entire Xuanhuangxing domain will gather toward this side, no matter how they deal with this colorful flame bridge and hide inside the flame bridge. Behind the scenes that the breath can't be sensed.

Right now, let's put the whole black hole in the void and say it. only

If the colorful flame bridge rushes out of the black hole, they will immediately shoot.

There are countless survivors in the entire Xuanhuangxing area. Among them, there are dozens of surviving warriors, and the survivors of each warrior are elites.

At present, more than a dozen warriors are dispatched at the same time. The total strength exceeds 10 billion, and there are 16 emperors who are immortal. In their view, they only deal with a colorful flame that is unknown to the unknown, and hides in the flame bridge. The black hand behind the scenes is still more than enough. this

At this moment, the sixteen emperors who issued orders were immortal, and they never thought of hiding inside the colorful flame bridge. Even the repairs were not able to detect the perception behind the black hand. In fact, it was a strong emperor. in

In their cognition, this is simply something that cannot exist. One

The aspect is that the endless void in the surrounding area has never heard of the existence of the emperor.

On the other hand, if the other side's cultivation is up to the immortality of the emperor, and already has the terrorist power to sweep the entire imperial ban, why not hide in the end, hiding in the colorful flame bridge does not show up? in

They seem that this shameless behind-the-scenes black hand, dare to be so daring and daring, rushed into the Xuanhuangxing domain, arbitrarily plundering the void in the mysterious black hole in front of the void. he

It's just this colorful flame bridge!

The sixteen emperors of the Xuanhuang Xingyu have long been secretly discussed with each other. As long as he rushes out of the black hole, the 16 people will simultaneously shoot and lay down the void, which will inevitably leave the person behind.

In this way, as long as it is killed, the loss of the void will not be able to make up for it, and the Emperor Xingyu will also get this colorful flame bridge that is far beyond the emptiness of inflammation... This is simply the sky. The good deeds can be described as a disaster.

"Booming!"

Roar! ""

Oh..."

.....

With the immortal instructions of the sixteen emperors, the entire vast expanse of the Xuanhuang star field boiled up, just like a giant beast in a sleep, suddenly awakened. put

Looking into the eyes, there are a lot of battleboats in the stars of life, and they are rushing out of the atmosphere. They are assembled in the void, and they are plentiful toward the mysterious black hole. Come.

These warships are all kinds of different, all of them are simple and unusual, and it is obvious that the inheritance is the refining technology of the ruins. although

It is ancient, but it is no worse than the starry fortress and starry fortress in the world. this

In the battle boat that comes from the mysterious black hole void in all directions, there are even dozens of giants like stars.

Some warships, even adhering to the ancient traditions, just like the general, in front of the battle boat, there are actually large-scale stars and fierce beasts, and speed in the void. short

Short an hour, the mysterious black hole in the west of Xuanhuang Xingyu has gathered a large number of survivors and ancient warships.

The surviving warriors rushed out of some of the survivors' stars, which were closer to here, arrived at the earliest, and the first time they formed a void blockade over the mysterious black hole void.

And in the void around the distance, countless survivors and all kinds of warships are still gathering in rumbling...

This kind of battle, in the Xuanhuangxing domain, has never been seen in the endless years, all the survivors and strong people, even can not remember the last time to see a similarly large scene, when is it...

At this time, the vicinity of the colorful flame bridge in the mysterious black hole in front of the sky, you can not see any voids, and the air is not extinguished. In just one hour, all the voids in the imaginary area are not extinguished, and the sky is whistling. Come, with the horrible momentum of destroying the earth and destroying the earth, but in reality it is a moth to fight the fire, and all of them have been completely swallowed up by this colorful flame bridge...

The continual roar of the roaring screams, the colorful flame bridge in the black hole void, but still devours so many emptiness and inflammation, its form has not changed..."

call out! "positive

When all the people mentioned their hearts to the eyes of the blind, guessing what the next colorful flame bridge would do next, a sharp burst of sound suddenly sounded, the colorful flame bridge... moved!

Chapter 4395: Extinct rhythm

"call out!"

The sharp sound of the air broke out, and in the eyes of the public, before rushing into the mysterious black hole in front of the sky, it has been hanging in the void of the edge of the edge of two or three hundred million miles, condensed and moved, leaving countless voids The impact of the fire, there is no half-reaction of the colorful flame bridge ... suddenly moved. but

It is not a U-turn that rushes beyond the black hole, but rushes into the deeper black hole in front of it. This

The void in the black hole of the black hole does not extinguish the inflammation, and the limit distance of the inductive breath seems to be only 100 million miles. Before the seven colorful flame bridges are suspended in the black hole, the void in the radius of a hundred miles is not extinguished. The fire was generally, and the active shock came over, and it was swallowed up by the thunderous sound of the rumbling. and

At the moment, as the colorful flame bridge spurts into the deep hinterland of the black hole, it instantly evokes the voids in other surrounding areas, all with a ruin, and does not hesitate to Colorful flame bridge, roaring away..."

boom! "

"Booming..."

.....

From this moment on, the black hole in front of the void, the sound of the roaring sound that just stopped, once again screamed!

This scene stunned the innumerable survivors who were trapped outside the black hole of the void. Even the sixteen emperors were immortal, they all subconsciously widened their eyes, and then they suddenly realized what they suddenly realized. sound....."

Behold, this \*\*\*\* flame bridge actually went inside, and some of the emptiness of the flames was ignited, and it was rushing over it..."

"Damn damn... Who is the guy hidden in the Flame Bridge? The heart is too dark, the appetite is too big, and all the voids in the vast void of a hundred million miles are looted by him, actually still Not satisfied!"

This is clearly to mean that all the voids in the entire black hole of the one billionth round of the black hole will not be extinguished."

"Block him, he must stop him. Otherwise, once all the voids are destroyed, this black hole void is very likely to have some unpredictable change. If it is no longer born, the new void will not be born. Isn't it a broken road that I waited for?"

"This is the rhythm of something big..."

.....

In the void of the black hole, it was covered by the colorful flame bridge, and it was held in the vestibule of the demon dragon.

Ye Xuan is standing on the edge of the vestibule. Behind him, the seven Yan Xiu Xiu are lined up, and like the fox, they shrink their necks and lie on Ye Xuan's right shoulder. although

However, knowing that Shennong's flames will not harm Ye Xuan at all, because Shennong Ding has been thoroughly refining by Ye Xuan, and the Shennong flame in Ding was originally a one-color flame, and Ye Xuan was ignited by heart fire.

But at this moment, the whole body of the demon dragon is covered by the colorful flame bridge, but it still makes his heart extremely uneasy, and the fluff on the neck of the body shape is erected. "

Hey, you have this point..."

It seems that I feel the fear of the heart like a fox, Ye Xuan slightly turned his head and glanced at him, and then his eyes turned to the front again. this

At the time, the colorful flame bridge had left the previous area, changed position, and came to another void. flame

In the void outside the bridge, within a billion miles, countless voids are not extinguished, and they are mad, and they are coming to this side. in

The outside world, the sound of the bang was earth-shattering, but inside the colorful flame bridge, there was no abnormal sound at all. The sound of the bangs was already blocked by Ye Xuan's domain power of Shennong Ding. he

Although it has not been moving, it has always been concerned with the changes in the Shennong flame pool in the center of the Shennong Dingyang volcano in the middle of the volcanic bottom plain. Out

Now inside the black hole, such as Changhong, the colorful flame bridge that traverses the sky and the sky is actually just a temptation to seduce the bait that the virtual air does not destroy the fire. It

From the data repository of the in vivo phagocytic system, all the information about the emptiness of inflammation was taken out, and after a quick review, Ye Xuan has fully understood the characteristics of this kind of heaven and earth. Place

Therefore, he waved his hand to sacrifice this colorful flame bridge, Hengdan.

In fact, all the whistling, rushing into the colorful flame bridge, and then disappeared, the massive void is not extinguished. After entering the colorful flame bridge, the first time was the powerful domain power of Shennong Ding, which directly earned the seat. Located in the Shennong Flame Pool in the middle of the volcanic bottom plain. black

The Wanliyan Bridge, which is traversed in the void, seems to have no change from beginning to end, but the Shennong Flame Pool in the center of the volcanic bottom is completely different. when

After the first awning was not sent to the flame pool, the originally calm flame bridge was convenient for the first time to set off a stormy wave. The endless seven-color fireworks transpired and almost filled the vast volcanic bottom plain. This

These Shennong fires originally had only seven colors, but as they were swallowed by the colorful flame bridge, they were sent into the flame pool and there was more and more emptiness. Among the seven colors of Shennong's original flame, there were many distinct colors. There is a color that is as transparent as it is. Do not

However, this almost transparent color is still extremely unstable, sometimes appears, and sometimes disappears, like a flash of illusion among the seven colors... Ye

Xuan's knowledge is always closely watching the changes in the Shennong flame pool at the bottom of the volcano.

At this moment, when he saw that the void that was swallowed by the flame bridge was not extinguished, and then began to transport into the flame pool again, among the seven colors in the flame pool, the glittering color was like an illusory transparent color. It began to fade and it took a long breath. One

Straight in the eyes of the blind man, but also quietly put down half at this moment.

"It seems that the effect of this kind of emptiness is still quite good. In just over an hour, the Shennong seven-color flame has actually produced a new, almost transparent color..."

"However, the evolution from the seven-color flame to the eight-color flame is not comparable to any previous evolution. Because the eight-color flame is only one step away from the peak of the Shennong flame."

"If you want to successfully take this step, you need to devour the emptiness of the emptiness. I am afraid that the number is not small. If there is no accident... All the voids in the whole black hole will not be destroyed. I am afraid that all of them are in jeopardy. This is clearly The rhythm of extinction!"

Here, Ye Xuan I am afraid that there will be some unknowable influence on the subsequent evolution of the Shennong Flame."

"So, this can't really blame me..."

At the end of the day, Ye Xuan once again sighed and sighed, and only then moved the second area of the colorful flame bridge that was swallowed up by the emptiness of the imaginary area. Other areas...

Chapter 4396: Eight-color flame

"boom!"

"Booming..."

.....huge

The loud roar of the bell rang again. before

Fang's mysterious black hole in the void, wide and tens of thousands of miles, the colorful flame bridge hangs, whistling away, and changed a position.

In an instant, all the voids in the imaginary emptiness of the mile are not extinguished. After sensing the breath of the colorful flame bridge, all of them are like a moth, and they are rushing toward it. too

Too much, coming from all directions.

This scene reveals madness. Within a hundred miles, all the voids in the void are not destroyed. Regardless of quality, regardless of size, after sensing the intruder's breath, there is no stagnation, with the atmosphere of destroying the earth. Come and come.

In the blink of an eye, all of them rushed into the colorful flame bridge, causing a thrilling sound, just like the tides roaring endlessly.

In just a few dozens of places, all the voids that come into contact with the colorful flame bridges are not extinguished, even if the grade is the highest, the most striking degree of single-black is not extinguished, and no exception is all ruthlessly swallowed by the flame bridge. This

Some whistling, rushing into the colorful flame bridge, and then disappeared, the massive void is not extinguished. After entering the flame bridge, the first time was the powerful domain power of Shennong Ding, directly sent to the center of the plain at the bottom of the volcano. Shennong Flame Pool.

In the flame pool, the turbulent waves of the waves, the endless seven-color fireworks transpiration, filled the entire vast volcanic bottom plain.

Originally only seven colors of Shennong's flames, the almost transparent color that was wiped out was extremely unstable before, sometimes appeared, and sometimes disappeared, like a glimpse of the seven colors, but now, the more The more solid you come. gradually

Gradually, it no longer flickers and disappears. It seems to be blending with Shennong's seven-color flame, but it is still relatively weak. Compared with the other seven colors of Shennong's flame, it is extremely inconspicuous. will

After all the voids in this area were swallowed up, the colorful flame bridge did not stagnate and immediately rushed to another area.

Every time, when it switches to a position, all the voids within a radius of 100 million miles will be completely wiped out in a few dozens of interest. and

This mysterious black hole void that gave birth to the void is not only a hundred thousand miles away...

The scene of the scene is always going on. Every time, after the conversion of the position, the colorful flame bridges only last for a few dozen times. Such as

In this way, after dozens of empty spaces have been moved, all the voids in the entire mysterious black hole are not extinguished, and almost all of them are swallowed up. The rest is already less than the original one!

At this time, the Shennong flame in the flame pool at the bottom of the volcano in the Shennong Dingyang domain is very close to the eight-color flame that has evolved into a complete form.

That is more like a dreamy transparent color, compared with the other seven colors, the gap is extremely weak!

"The last one! As long as the rest of these voids are not swallowed up, Shennong eight-color flame... will be able to complete evolution!"

After the promotion, Ye Xuan has been hanging in the heart of the air and has completely fallen.

Do not hesitate, between the movements, wrapped in the colorful flame bridge of the magic dragon, just like Changhong, in the mysterious black hole, the last corner that has not been involved in the spurt...

It is also at this time, in the area centered on the black hole of the black hole, the void suddenly pops up like a wave scale, but in fact, there is nothing clear, the naked eye is recognized, and it is empty!

This scene fell into the eyes of a large number of survivors who were trapped outside the black hole. It immediately made all the people suddenly stunned. Then they did not know what to think. Some of the survivors suddenly snarled excitedly. Crazy..."

Transparency does not eliminate inflammation! In the central area of the black hole, there is a top-notch transparent non-destructive inflammation..."

This is the case, absolutely no mistake, the area clearly has nothing, but the void has a ripple-like embarrassment, not transparent and inflamed, what can it be? ""

hiss! The area where the waves are squashed is so vast, at least ten thousand miles! Doesn't that mean that this awning is transparent and pure, and the top of the void is not extinguished... is it a thousand miles away? "

"The emptiness of a huge emptiness is not extinguished, and it is still a transparent color that has never appeared before. It is against the sky. This awning is transparent and it is definitely the source of all the voids. It is the mother. flame!"

"Hands! Immediately, you can't let the colorful flame bridge swallow the awning mother flame, otherwise... I will not be able to get a half-empty flame, even the worst quality Jiuwu. Things!"

Oh..." with

The exclamation of the mysterious black hole around the void sounded like a long rainbow, and the colorful flame bridge that spurred away, at the same time, steadily landed on the transparent and indestructible .....under

For a moment, the bang of the bang that just stopped was once again rising. All the voids in this last area were not extinguished, including the colorless and transparent, the transparent frameworks that were suspected to be the mother flame, and they were completely caught in the blink of an eye. Crazy. Seven

The Caiyan Bridge is like a long whale that absorbs water. All the voids in the surrounding Yili are not destroyed. In just a short period of 20, they have been completely swallowed up.

This transparent fireworks, which is suspected of being a mother flame, is no exception!

In the blink of an eye, within the mysterious black hole of the sky, which is more than one billion miles away, there is no longer a little bit of empty space, and it is completely extinct! Look

In this scene, the sixteen emperors on the west side of the black hole emptiness are immortal, and they do not hesitate. They scream and roar, and their body shape slams into the black hole void, facing the location of the colorful flame bridge. Come and come...

At the same time, inside the Shennong Ding, the Shennong flame pool in the bottom of the volcano in the central volcano, the Shennong seven-color flame that is being steamed up, also just completed this transformation, which is like a dreamy transparent color, completely stable and strong. With the other seven colors, there is no longer a gap. God

The seven colors of the flame, finally evolved into... Shennong eight-color flame!

"call out!"

Outside, the black hole in the void, with the evolution of Shennong's eight-color flame completely completed, the colorful flame bridge that traversed the emptiness of the sky, also under the enthusiasm of Ye Xuan, instantly condensed, blinked and disappeared, and he was earned In Shennong Ding, it was put into the flame pool of the bottom plain.

At this moment, with the disappearance of the colorful flame bridge, the magic dragon that had always been shrouded by the flame bridge, and even the breath that could not be explored, was completely exposed at this moment.

In front of the front, left and right, and the back side, the horror of the nine powerful dragons in the wild and powerful powers, instantly spread, and the entire vast expanse of the Xuanhuangxing domain has been shrouded in the blink of an eye. "

what? This breath..."

"Dragon Dragon! This is a wild dragon..."

Almost in the next moment, in the distant universe of more than one billion billion miles away, the sixteen emperors who are murderous and violently spurred are immortal, their faces are drastically changed, and their figure is like an appointment... abruptly!

Chapter 4397: Skeleton

In the distance, there are more than one billion miles away from the universe, and the sixteen emperors who are murderous and violent are immortal, the face is drastically changed, and the figure is like an appointment. They were all exclaimed..."

what? This breath..."

"Dragon Dragon! It is clearly a wild dragon..."

"God, this is a terrible creature of the ancient age, and there are nine out of a sudden? And its status...clearly it is only the slavery of Lahu!"

This is so horrible that it can be smashed with nine horrible dragons of the age of the wild. The purple person is the origin of the person... What a horror? "With

The sixteen emperors' immortal exclamation sounded, and the vast and innocent Xuanhuangxing domain completely fell into ruin.

Among the 16 people, there are four emperors who are immortal and fascinated by the ninth order of the emperor. At this moment, they subconsciously exclaimed that they have already used the power of the gods. Therefore, the Xuanhuangxing domain is vast, and these exclamations are also It is enough to cover it. Place

Some of the starburst beasts of the survivors have heard these words. At this moment, they are stunned and their breathing is stagnant. Just like being thundered, they are completely petrified in an instant...

Wild power!

For them, this is simply an unimaginable horror. but

Now, not only has a nine-time appearance, but it is just a slave to the car! This

The kind of things have already exceeded their cognition. Even if they are in the shape of the 16-year-old emperor who is more than one billion miles away from the Demon Dragon, they are all screaming and completely smashed! also

It was at this time that the magic dragon in the eyes of the public was driving.

"Hey!"

"Hey..."

The three magic dragons that are entrenched on the left and right sides of the Imperial Motors have not changed, but the six dragons that are pulling in front of them have shook their necks at the same time, and then they have a squat, and the dragons are pulled closer together in the blink of an eye. Hundreds of millions of miles, steadily stopped at the distance of the sixteen emperors immortal, only less than 100 million miles in the universe. Look

In this scene, the mysterious black hole outside the empty group surrounded by the masses of warships, countless survivors of the strong people to cool down, stunned. that

The 16 emperors were immortalized by the magic dragon, and they were so scared that their faces were white. Do not

They didn't want to turn around and flee, but at this moment, the figure was not heard at all, and the legs were numb, and there was no awareness at all.

After all, it's just that the emperor is immortal. In the face of nine ancient powers, this kind of reaction is originally intended.

This is also the horror of the nine dragons in the body, not deliberately for their sake, otherwise, even if the emperor is immortal, you must kneel on the spot!

"The scorpion! I don't want to temper the breath. If it scares the Taoist friends in this star field, this sect destroys you!"

Just as the 16th Emperor Xuanhuang's emperor's immortal heart was stunned, when he was shocked, a man's voice suddenly came out in the magical dragon's driving in the air.

It sounds very young, but it is domineering, not only reprimanding these nine dragons, but also casually saying that they will be destroyed!

What is even more bizarre is that with the voice of the young man, all the dragons are not only the six heads that are pulled in front, but the three that are driven by the left and right sides and the rear. The body shape is trembled, and the body spreads out. The horrible power of the ancient powers of the ancient ages disappears instantly and disappears completely.

If they are not visible to the naked eye, almost all of them will doubt whether the nine horrible dragons have left.

Can converge the breath to such an extent, even the imperial exploration of the gods can not capture a little breath... This kind of means can only be done if the emperor is strong. leaf

The reason why Xuan Xuan is so, is actually no way. This

Although the power of the nine dragons in the body of the dragon is ancient and powerful, it is limited by Ye Xuan's own cultivation. The power that they can show at the moment is just the realm of the emperor.

If they do not order them to converge, they deliberately show a low-key attitude, and it will be difficult to keep the stuff in the future. and

Now that there is such a play, even if the strength of the nine dragons at a certain moment in the future is inconsistent with the age of the ancients, there will be no doubts.

As soon as the voice fell, the smog curtain of the vestibule of the Dragon Dragon Pavilion was automatically rolled up under the entanglement of Ye Xuan. The vestibule scene of dozens of squares was instantly displayed. Such as

In general, the sixteen emperors were immortal and the pupils shrank, and they took a sigh of relief. and

In the distant voids, the countless survivors who saw the scene in the vestibule, once again collectively lost their voices, but all of them showed an unbelievable color.

On the ground of the vestibule, which is only over 50 square feet, a young man with a face like a jade and seven beautiful women sit on the ground. The man is in the center, and seven beautiful women gather around him. each

There is a case in front of the person. There are a lot of top-notch spirits on the top, and there are different instruments in front of the seven beautiful women. They are all antique, all of them are old and precious...

Even the ground of this vestibule is covered with thick fierce beasts, purple-golden fur, exudes a faint savage and powerful atmosphere of the powerful and fierce beast!

If there is no accident, this purple-gold sable fur used as a carpet is mostly peeled off from the shards of a wild and powerful savage beast...

It is no longer a general luxury. It is simply extravagant and horrible. Even if you see it with your own eyes, it is unbelievable. near

Seeing all of this distance, the 16th respected the magical atmosphere of the dragon, because the body has already recovered the consciousness of the emperor, and immediately fell into the petrochemical, and circled on the spot.

"The friends of the Tao, the sorrow of this Tao Xuan, from the distant Hongmeng emptiness of the Milky Way, even after seeing a smog, it is not bad, the letter will be received..."

It was also at this time that the young man who was driven by the seven beautiful women in the vestibule had grown up and walked out of the air, slowly coming out of the purple drive: "Look at the singularity of the friends, think about it. This star field must be the place where the people are famous. The Tao has decided to stay there for a while, and there are many harassment points. Please ask the friends of the sea han..."

Here, Ye Xuan seems to suddenly think of something, and turned to the mysterious black hole outside the void, in the void of the sky, sprinkling a large piece of the film, the entire black hole hollow surrounded by countless warships.

After glanced at the eyes, the face showed a fascinating color. lift

The hand was far away, and finally said: "What are the friends? Why is this? You have already known that this Taozi micro-service tour will be here? Have you prepared a team to meet this lineup, and some Taixing teachers are moving?" "

I can't think of a parent star, but I still can't avoid this scene. It's really disturbing..."

Chapter 4398: Well-known routine

"I can't think of a parent star, but I still can't avoid this kind of scene. It's really disturbing..."

In the end, Ye Xuan's face showed a touch of dissatisfaction, and he waved his hand impatiently: "They were scattered, and they were all scattered immediately. This is a lot of tiredness for this kind of arranging! It's hard to come out. A glimpse, can't be quiet!"

With this discourse export, the pressure of the body that was completely converging in the body also seemed to leak out inadvertently. He

However, it is the first order of the emperor.

At this time, the seven major repairs in the front court were also behind, and the lotus steps were lightly moved. They walked out of the vestibule in the void, and all of them had a faint horror, and they bowed to Ye Xuan Yingying.

"Little Master is angry!"

"It's just a few foreigners. It's hard to know the general, and I don't want to be guilty of not knowing what they don't know. Don't be angry!"

.....This

At the same time as some words are spoken, the seven great sculpt bodies also all shed a half-step scent of the imperial ninth-order grand perfection. This

Everything, all of them were captured by the 16 emperors who were close to a hundred miles away. They instantly caught their pupils and shrank their mouths again!

Mother star?

Little young master? micro-

Service tour?

So young, actually the emperor is immortal, and even the seven prostitutes serving around, in such a stunning glamorous, actually all of them are half-step emperors?

All of this together, in a moment, gathered together into a thundering thunder, in the immortal brain of the sixteen emperors, bursting open, making them tremble slightly, snorting and heavy, the mind, has been completely chaotic! Come

Head shocked!

This is only the so-called young master. In general, the young master is a grandson. Otherwise, if it is a son, it will be called a young master.

It seems that the mysterious little master of the background, the backing behind it, is clearly the existence of his grandfather.

The grandsons are so powerful, the emperor is repaired, the seven and a half emperors are repaired, and there are seven ancient dragons of great ages.

So, what a terrible existence of this mysterious grandfather?

I am afraid that even the cosmic sages can't be beaten. After the emperor's emperor, it is the cosmic sage. How can grandfather only be a big realm than the grandson?

In this way, people must at least be the master of the universe, the existence of the supreme level of the universe, and even the most likely to be the ancient powers of the wild, the ancients supreme!

Even if it is only the Lord of the universe, it is absolutely unacceptable. For the immortality of the Emperor, it is absolutely only the existence of looking up... In this life, I have never seen such a person yet!

To be precise... It should have been heard that I have never heard of it!

More importantly, people come from the parent star! Have

The legend of the Guanmu Star, in this emptiness of the ruins of the vast world, is no longer a secret. The ancient survivors and the forbidden beasts above the immortality know almost some. when

After the battle of the ancient world that collapsed the entire wilderness, the mother star did fly with the piece of the Milky Way that it was in, and did not know where to go.

It now appears that the mysterious Milky Way star field is clearly transferred to the legendary Hongmeng void.

In front of the horror, the so-called young master who can scare the dead and the leader, is clearly from the mother star in the galaxy star field in Hong Meng's void. Correct

For all the ancient survivors in this emptiness of the ruins of the wilderness, the mother star is the source of the blood. Place

In a certain sense, the young master in front of him is the existence of their blood ancestor level. people

Although the family is young, but the honor of the generation and the blood is placed there, this is absolutely indelible.

These thoughts flashed in my mind, and the sixteen emperors' immortal minds all set off the waves, and the countless survivors and the starry beasts everywhere in the distance were chilling and chilling.

At this moment, the entire vast expanse of the Xuanhuangxing domain once again fell into a complete silence.

Because of the words of Ye Xuan and the ancestral karst, such as the sacred sorcerer, it seems to be casual and the voice is very light, but in fact it uses the power of the gods invisibly.

The entire Xuanhuangxing domain has been shrouded, even if it is a blind man, you can hear it clearly!

No one doubts all this, because neither the young master's martial art of the emperor's martial arts nor the semi-emperor strength of the seven brilliant maids served by him, and the supreme power of the nine demon dragons Pressure... All of this is the fact that is in front of you!

Only the tens of thousands of Yin Mozu people, such as Yin Emperor and Yin Qi, at this moment, although the look on their faces was as shocking as they were, and they did not dare to breathe, but they were deep in the bottom, but there was still a clear clear Incomparable suspicion! eye

All of this happened just now, giving them a sense of deja vu.

It's not just a few people's minds. In fact, all the tens of thousands of Yin Mozu people have this feeling at the moment.

After experiencing the sorrowful ancestor that led to the shameful incident of the entire Yinmo clan as the third generation of the stars from the starry sky, for all this, the Yinmo ethnic group will give birth to the first time in the subconscious. An intuition of questioning.

Just like conditioned reflexes, it is more like instinct!

And this scene that is happening in front of us clearly gives them a feeling of familiarity with the routine, just like the fox sorcerer who faked the ancestors and succumbed to the evil spirits... and suddenly appeared, and came to the eye!

The short stay is lagging behind, the nearest to the Dragon Dragon, only the 16-year-old emperor is only immortal, and finally returned to God, freed from this unprecedented shock. ten

The six people turned their heads to each other and exchanged their eyes. They quickly reached a consensus.

Then, several of them turned to the countless survivors of the black hole outside the squad, and looked at them. The face sank and they were reprimanded on the spot..."

What are you doing here? Didn't see the small... Xuanyuan Master has already revealed the unpleasant color? "

"One by one is too ignorant, who told you to come? I know that Xuanyuan's young master does not like this kind of arranging, is it not speeding up?"

If you have collided with Master Xuanyuan, are you waiting for it? It's just that..."

"Roll! All the way to the old man, where to go..."

"boom!"

Rumble..."

.....

With the immortal screams of these emperors, the countless remnants of the people who had been surrounded by three layers of black holes outside the void were immediately launched, and they turned around in the void and followed the way. Hurrying away...

Until then, the sixteen emperors were immortal and sighed. After switching to another look, they immediately piled up a deliberate smile on their faces, no longer hesitating, and they swayed. The magic dragon driving over 100 million miles ahead, lasing away...

Chapter 4399: One canopy

"Old man Zhao Dong, I have seen Xuanyuan Master..."

Old man Qiannan, Xuanyuan young master is angry! ""

The old husband Sun Xi, before the collision, but also hope Xuanyuan Shaoye Haihan! "

"Old man Li Bei, ranking fourth, Xuanyuan Shaoye called me Li Laosi on the line..."

The distance between the stars and the stars is about nothing for the immortality of the emperor.

In the blink of an eye, the sixteen emperors have come to the front of Ye Xuan and the seven Yan Yan, who are on the side of the magic dragon's driving, with a smile on their faces, and they clasped their fists and handed them one after another. ten

Among the six, only the four emperors are immortal and the nine-order grand perfection, that is, the giants who have been repaired by the half-step emperor, and introduced to Ye Xuan himself, but also took the opportunity to talk with him. to

In the other 12 people, there was no chance of even saying hello. Even in front of Ye Xuan, they seemed quite cautious. After all, in their view, the young people in front of them not only came to the head but also the strength of others. It's beautiful.

This is a strong leader. Although young people are young, they are their predecessors in terms of their ability to cultivate. In the starry environment, it is normal to cultivate for the best. "

Dissipate it, this Taozi is not interested in chatting with you, it's hard to come out, the world is so big, this Tao should be more walking, look more...

To the eyes of the twelve polite and respectful emperors, Ye Xuan looked extremely embarrassed, and ignored the four and a half emperors who politely greeted him. He waved his hand and turned to the demon dragon behind him. Go inside. to

In the other twelve, the imperial concubine who had not been able to reach the semi-empirical position was immortal, and he did not even look at it. and

Moreover, looking at his posture, it is clearly the rhythm of turning away.

At first sight, the 16th Fenghuang immortal immediately panicked, and the twelve Ye Xuan even had no eyes on the emperor's immortality. Although he felt grievous and his face was red, but at the moment it was anxious, and Did not dare to speak out, one by one, straight hand, looked at Ye Xuan and four and a half emperors, completely lost the idea. "

Little Master, this star field, it seems that there is no place bigger than here..."

Just as the emperors were immortal and eager to blink, the corpses of the seven sacred sacred sacred voices sounded in a timely manner, reminding them: "And we all came along, all the encounters were all fierce beasts, all It's some rags and armored people, not even a person who talks. It's only boring here, but at least these guys are still human..."

What I said is really too unheard of listening. The 16 emperors were immortal and almost fainted on the spot. Even

Is it at least a human? Hall

The imperial concubine is immortal, and it is so incomprehensible that people are said to be like this.

However, due to the scary head of the Xuanyuan Master and the Fengdi repairs in front of them, their hearts were resentful, but they did not dare to boo. turn

After the first exchange of a look, it was a ghost that made the gods follow the words of the ancestors, and once again persuaded to try to retain Ye Xuan. This

It is clear that the teeth are swallowed and the rhythm of this grievance is recognized. "

Also, at least this star field is not the ones who wear the armor and the armor. Although it is a bit annoying, it is always a personal..."

Xuan face is expressionless, whether it is a demeanor or a tone, it shows a full sense of guilt, and the words in the mouth are even more mean. but

These sixteen emperors are immortal but have no intention of mind. Instead, they nod their heads and sing.

In their view, although people do not have a good impression of them, as long as they can leave this Xuanyuan young master in the Xuanhuangxing domain, they can naturally find ways to improve their impressions.

In this way, the result is tantamount to holding a thick thigh, and maybe after asking people to be happy, they will eventually take them away from this piece of debris without future, into the mysterious Hongmeng domain, going to the mother. The Galaxy Star Field where the star is located. for

With this goal in mind, it is worthwhile to be wronged. Besides, people at least admit that they are not a group of people wearing hair, they are a good start. This

Thinking about it, the sixteen emperors' immortal faces immediately piled up a smile, and they gave Ye Xuan the benefits of this Xuanhuangxing domain, such as the various spirits and spirits of this place, and other cultivations. Resources and more. and

At this time, Ye Xuan also suddenly thought of something, and turned to the four and a half emperors to see the past.

Brow one picks the way: "What have you been doing here just now? It seems that you are catching this kind of void, right?"

call out! "Say

In the words, Ye Xuan waved his hand, and in front of him, a universe of tens of thousands of squares of space, in an instant, a ripple like a wave scale...

However, this piece of emptiness seems to have nothing, even the gods to explore, can only feel the emptiness of the void, but in fact, there is a very special heat, so come.

Of course, this kind of heat wave can't cause harm to the existence of Fenghuang.

This is a emptiness, and it is still the best quality top quality, more than the pure black of single black! This

The kind of void is not extinguished, and it has already been integrated into Ye Xuan's Shennong Flame. It has become one of Shennong's eight-color flames. Ye Xuan's thoughts can be used to wave out eight-color flames, or just to sacrifice them alone. A kind of fireworks. eye

The transparent flames of the awning that he sacrificed were extracted from the flame pool at the bottom of the volcano in the Shennong Dingyang domain. do not

It is said that this small Baizhang is round, even if Ye Xuan draws more, it will not have any influence on the eight-color flame, because this kind of void-inflammation has been thoroughly integrated into the eight-color flame, and it has already been born. Interested...

At the moment, the reason why he will make this awning transparent and indestructible, the ultimate goal, obviously still want to use this stone to ask for directions, and finally set out the complete refining secrets mastered by these 16 emperors in immortal hands! can

It is said that Ye Xuan does not care about the transparency of the awnings that can be sacrificed.

But this is only his own. For the immortality of the sixteen emperors in the distance, the situation is obviously not the case. this

Engraved, seeing Ye Xuan with a wave of his hand, the universe of the universe in front of him, immediately popped up like a wave-like shackle, these 16 emperors are immortal first, then with the mind In the middle of a flash of light, they changed their face in an instant, and they all shouted out..."

what? Is this the void? Actually such a big canopy? ""

And it's the best quality transparent thing, it's just..."

"Hey! Master Xuanyuan, this awning is transparent and it will not be extinguished. Wouldn't you want to give it to me? This is too expensive!"

"I can't make it, so I can't make it to the young master. This gift is really too expensive. I have to wait for it, it is... oh!"

Chapter 4400: Violent

"Fabulous? Hey..."

To this discourse, Ye Xuan stunned, and then squinted and sighed with pain in his face, screaming: "Isn't it a fireworks? This road is just looking fresh, just take it and play, nothing to bake. What kind of meat is also good, is it expensive? It's really a bunch of earthen buns that haven't seen the world..."

The words that are spoken are really speechless. The 16-time emperor's immortal face is instantly blushing, and I don't know if it's embarrassing, or because I see this awning transparent and not inflamed, and the Xuanyuan Master still doesn't care so much. Excited. less

After that, I saw that Ye Xuan had no intention of closing the awning transparent and inflamed. They looked at each other and exchanged their eyes again. With

After that, Zhao Dong was careful to get closer to some of them. He tried to ask: "The young master of Xuanyuan, you... this canopy is transparent and it is not necessary?"

"Isn't it just a fireworks? Are you entangled in this way? Are you taking it away?"

Putting his hand, Ye Xuan's face showed an intolerance, and then said: "Don't bother with this idea, tossing for so long, a little hungry, when the Lord is enjoying the food, but I don't like people to bother!"

After that, Ye Xuan turned and walked back to the vestibule of the Dragon Dragon's driving. After sitting down on the ground covered with soft and fierce fur, he picked up the jug on the side of the case and poured a mouth into his mouth. . this

At that time, the Seven Great Yan Xiu and Xiang Huyu have also followed, entered the vestibule of the Magic Dragon, and waited around Ye Xuan. "

call out! ""

It's rare to find a new kind of fireworks today. I don't know if the meat is baked. Is the taste different from the past?

In the mouth, Ye Xuan waved at the same time, and with the faint sound of breaking the air, there was a emptiness in the air, and it appeared in the midair outside the vestibule of his magic dragon, which was a thousand feet in size. It is also the best quality transparent inflammation.

Seeing this scene, the sixteen emperors are immortal and look at each other, and all the faces are full of smiles.

They can see it. The reason why this man received the emptiness of the previous emptiness is that the ultimate goal is to bake meat and satisfy his appetite. and

And listening to what he meant, he seemed to have collected a lot of different fireworks in his hand, in order to try out the meat cooked by different fireworks, which tastes better.

This is really a dog. Virtual

It is a rare treasure for them. It is only used to refine the flesh and blood medicines when they are used to refine them. I did not expect that people here would not be taken seriously. surface

In the bitterness, Zhao Dong and other four and a half emperors did not hesitate. When they waved their hands, they directly divided the transparent incontinence that was taken out by Ye Xuan from the awning into sixteen copies, one for each person. It's up. With

After that, all the people waited for the first time to drive to the Dragon Dragon again.

With only one glance, they changed their face, and while they were chilling, they exclaimed again...

"What? The breath of this bird's leg..."

"The quasi-abandoned ancient power, that is, the universe supreme..."

A big handwriting, the sacred poultry legs of the universe, are actually used to bake meat. "

"This is simply a violent thing. If it can be used to join the refining of flesh and blood medicine, what is the quality of the big medicine that is released?"

"The enchanting! This Xuanyuan young master is really enchanting, too edible, too dare to eat..."

No wonder they are so shocked, because at this moment, looking forward, Ye Xuan in the line of sight, after offering the transparency of the canopy of the canopy, with the wave of another wave, the blink of an eye has been sacrificed. A huge murderous poultry leg, with a radius of hundreds of feet, emits a purple-gold smog.

In the looming, there seems to be a kind of prevailing power of the ancient powers, slowly diffusing out. This

Once, because Ye Xuan's sacrifice is not the Shennong Eight-Color Flame, but a single transparent non-destructive inflammation, the speed of baking is slightly slower.

Moreover, in the process of roasting, although the color of this murderous poultry leg is gradually golden, it seems to be very appetizing, but the scent that comes out of it is similar to that of Shennong. There is a world of difference. Correct

For Ye Xuan, the meat that is only baked with this kind of simple transparency is obviously far less than the flames of Shennong.

But for the immortality of the 16 emperors who waited outside the magic dragon, it is obviously not the case. Have they ever had such a violent act of heaven?

Not to mention the effect of transparent and non-inflammable roasting, just the fatal poultry legs of this quasi-ageless ancient energy level, it is enough to make their mouths and mouths overflow, and want to drop! very

Fast, this rotten poultry leg is finished. Of course

Ye Xuan was obviously not satisfied. In the middle of the wave, the transparency of the canopy outside the magic dragon's imperial car was put away by him, and he was again put into the flame pool of the volcano at the bottom of Shennong Ding. and

Ye Xuan's face showed a touch of color, and when he waved his hand, he directly threw the fierce poultry leg into the face of the sixteen emperors who were not far away in the void. Following

However, his voice came from the inside of the Demon Dragon, revealing a deep sense of disappointment: "Hey, I thought this kind of fireworks is transparent and colorless, and it looks very pure. How delicious can the baked things be? ....."

I didn't expect it to be so bad. It's just this smell, this way has no appetite, and it's gone, seeing you look like you are interested... This fierce bird leg is rewarded to you! "

As soon as I heard this, the sixteen emperors were immortal and the face was red again.

Is this just a violent thing?

It's just awesome! One

It's so ridiculous that the roasting of the savage poultry's legs is so tempting. At the end of the day, it's really disgusted by others. This kind of supreme force is really a super-defective! sigh

In the sound of the sound, the 16-member Fenghuang is immortal and unwelcome, even when even the huge and fierce poultry legs of a thousand squares are divided.

But it was not enjoyed on the spot, so it was too rude. Therefore, after the fierce poultry legs were divided, the 16 emperors waved their hands in an immortal manner, and soon they were assigned to the part in their hands, carefully and properly. Closed up.

After doing all this, after all the people exchanged a look again, this was brought up by Zhao Dong and came to the front of the magic dragon. First, he handed a hand to Ye Xuan and took a fist. Then he took the lead: "Xuanyuan Little Master, This kind of void is not extinguished. We are not used to bake meat..."

In fact, including the bare-legged savage bird's legs that you just baked, if you just roast it directly into meat, you are also too violent. You... Why not use it to refine flesh and blood? That is the top refining resource! "

"Hey, actually still come to teach this Tao?"

When the head wrinkles, Ye Xuan, even if he grows up, once again walked out of the magic dragon, and waved his hand: "Blood and medicine, this Tao can also be refined, but listening to your tone, seems quite confident, so, then Let's take a look at the spot..."
