

Super D. S 441

Chapter 441: Final battle

Although Tang Huaizhi was the first time to see a different kind of dragon, he estimated that the strength of this poison dragon is not strong enough, so he did not want to start playing.

The bone seven and the white bone war are the same. If you kill this poisonous dragon, then they can dig up all the areas. Maybe, if you stop, you will drop it to other places?

However, when their attack fell on the poison dragon, it did not have any effect.

"How is it possible that the infuriating gas has been weakened by the poison gas, and my attack will not break even the scales?"

An elder exclaimed, but he was the realm of five hundred and sixty dragons. If he used martial arts, he would also be able to kill the sixth-order sacred beast.

Not only is he the same, but the other five elders are the same.

In addition, even Tang Huaizhi of the 260 Dragons did not break the scales of this poison dragon.

The poison dragon flew over six people, and then a big mouth, suddenly spewed out a green venom.

Wherein the工具 is absorbed continue, and I am almost fused with blood.

"Good toxicity, be careful!"

Tang Huaizhi reminded again.

This flying dragon flies in the sky and constantly vomits venom. Therefore, the bones of the bones are not useful at all. Moreover, this group of people can only use long-range attacks. However, none of them can break the poison dragon scales. Even the bone seven is the same.

"Damn!"

Bone seven roared, changed a bone sword from the Qiankun ring, and once again.

"Hey!"

A crisp ring fell into the ears of everyone, and finally broke, but this is just breaking the defense.

This poisonous dragon is also a bit strange, but it only uses the noble head to smash the bones and then continue to attack the elders.

It also understands that persimmons should be softly pinched!

Its venom is very big, and the elders are hiding a little hard. After all, they should pay attention to their feet and don't step on any corrosive poisonous grass or poisonous flowers.

This battle seems to be evenly matched, but the longer it takes, the more dominant Duron is.

Because the venom that it spits out is already melting the poisonous flowers and then infiltrating into the mud.

An elder accidentally stepped on it, the whole foot was melted, and then fell on it, and died very badly.

This time, Tang Huaizhi reacted. They are not the opponents of this poison dragon. They must be withdrawn!

"Go!" Tang Huaizhi immediately shouted.

At the moment, he is turning around with the bones, and the remaining five elders are also the same.

When the poisonous dragon saw it, he screamed in the sky and chased it up.

If this is just a flying dragon, the six people may be able to kill it. Unfortunately, this is a poison dragon, much stronger than the ordinary dragon.

And the realm of this poisonous dragon is higher than all of them, so the five elders could not escape the pursuit, and they were all poisoned.

Only Bone Seven and Tang Huaizhi successfully left.

This poisonous dragon is too lazy to chase them and return to the plantation.

At this time, in this planting area, there is only one human being left, that is, Ye Xuan, who has been hiding in the air early.

When the poison dragon chased Tang Huaizhi, he just took away the six elders.

The material of this Qiankun ring is similar to that of the medium-sized device, and the poison dragon can still be melted.

At the same time, Ye Xuan also personally tested the venom, and sure enough, his hand was melted once.

But for the second time, his skin was resistant, and this poison had no effect on him.

Six Qiankun Rings, let Ye Xuan's realm break from four hundred and thirty dragons to four hundred and sixty dragons.

Now if he uses the Beastmaster Rage, he can reach the power of six hundred dragons.

At this time, he already has the strength to fight the seven-level battle with the bones. Ye Xuan also left the plantation site when the poisonous dragon returned to the nest.

This time, he also had a lot of gains. At this time, he left the plantation, that is, he went to find the bones and Tang Huaizhi.

Bone Seven and Tang Huaizhi, who were only run by the poison dragon, also hid far away. Fortunately, the poison dragon did not chase again, otherwise they would run separately.

"Big brother, that dragon ring, really did not find it?"

Now there are only Tang Huaizhi and the bones of 72 people, so Tang Huaizhi directly called the latter a big brother.

"I really don't have it, but the bones of my Bailing ancestors are all full. Just give me some time, I will make it into a white bone war, and then I will be able to kill the poison dragon!"

The bones smashed the white bones around him and glanced at him. This white bone warfare has been with him for more than ten years. Only a few years ago, he refining to the sixth stage of the royal gas, and spent a lot of heaven and earth to enhance the bone strength.

Now, it's time to change.

"There are still six Qiankun Rings..." Tang Huaizhi reminded.

It doesn't matter if the six elders died, but the people they killed before have already been distributed. There are also a lot of things that add up to the six Qiang Kun Rings. He is a bit unwilling.

"Don't worry, wait for me to refine this new bone war, and then kill it." Bone seven grinned and said with a smile.

"But the kid may still be alive."

Tang Huaizhi remembered Ye Xuanlai, the unknown factor that was able to kill the venomous door in front of him.

"Oh, this kid must have spread the news that I have been here. Since the poison dragon has already returned, then we will go outside to guard."

The resentment of Ye Qi to Ye Xuan is also extremely deep. The moment is the return of the original road.

Although they don't know why Ye Xuan can be rampant in it, it doesn't make sense. Their goal is to stop.

Bone Seven and Tang Huaizhi once again came to the poisonous array. The latter looked at the corpse on the ground and couldn't help but say: "This kid is really awkward, even his own brothers and sisters are killed!"

The brothers and sisters in his mouth refer to these disciples and elders who have turned their backs to the five poisonous sects.

Of course, from the very beginning, the two brothers of Tang Huaizhi did not expect to give things to other people. They wanted to swallow them.

To this end, Tang Huaizhi also hesitated for a long time, because the five poisons are his hard to establish.

However, just as they walked to the door of the poison front, they suddenly heard a movement, which was transmitted from the poison.

"The footsteps, that kid!"

The two reacted instantly.

A total of thirteen people entered the poison line, plus a white bone war. If you remove the bone seven and Tang Huaizhi, there are only eleven people.

The eleven people, the venomous door was the first to die, then the four elders, and finally the six elders who were killed by the poisonous dragon.

Although the lord of the venomous door did not die in front of them, they estimated that this person was also dead.

Therefore, it must be Ye Xuan!
