

Super D. S 457

Chapter 457: conspiracy

"How come you are here?"

Feng Yaqing looked at the Tianlong bone behind Ye Xuan, and the hundred ghost beads that Ye Xuan's hand absorbed into the wraith.

"Occasionally passing by, people who saw the land of ghosts are in the blood-washing sect, so come and see, you still have to hurry to find a mountain to hide." Ye Xuan casually said.

"This, is there any big shock?" Feng Shan swallowed.

"The sects in this area are all in the target of the Ghost Land. I don't know if this is the case in other areas. Anyway, I saw that the blood crows and gods were also destroyed." Ye Xuandao.

Blood Ravens!

After hearing this name, everyone at the door is a glimpse.

The blood crows teach, but the hegemon of this area is the five-level sect of the ghost tomb. And Baidumen, can only be regarded as a six-level sect.

"I feel that something big is going to happen. You can find a place to hide."

After Ye Xuan finished, he left.

In the ghost tomb collar, the sectarian forces are divided into six levels. The first-class sect in the nine secluded land is the poison king, and then there are several second-level sects. The second-level sect also manages the third-level sect, the third-level sect. Manage the four-level sects, and the fourth-level sects manage the five-level sects.

The blood crows are the five-level sects, and the blood crows are the six-level sects that manage Baiyinmen and Wuduong. They are progressive.

Ye Xuan suspected in his heart that this is not so simple, so he has to go to other areas to see.

In the door of Baidu, many people looked at Ye Xuan's direction and could not understand.

A person riding on a dragon's bone, still holding a hundred ghost beads, what is the situation?

If you let them know, Ye Xuan was once arrested to test the poison, what would it look like?

Feng Yaqing also looked at Ye Xuan's back and fell into meditation. He was full of infinite curiosity about Ye Xuan's identity.

.....

After leaving the door of Baidu, Ye Xuan is heading for the hinterland of the nine quiet land.

On the same day, Baidu, which he was brought to by Hong Lao, was actually on the border of the ghost tomb. In fact, it was also on the border of the nine secluded land, and the edge of the bone was buried on the edge.

However, the land of ghosts is far apart, and their people can actually kill here, but they have to run a lot.

Therefore, this must be premeditated.

Ye Xuan rushed directly to the center of the nine quiet land. On the way, he also saw a lot of ruins, and also saw many low-level grievances.

In addition, he also saw a lot of people in the land of ghosts, of course, these people were killed by him.

However, after Ye Xuan stepped into the jurisdiction of the fourth-level sect of the Jiuyou, the four-level sect of the Biyu School, he had to be cautious.

Because here, there may be a lot of masters of refining.

This Biyu School is considered to be a relatively correct sect in the nine secluded land, relying on normal cultivation.

When Ye Xuan came to this Biyu School, he found that the Biyu School was also slaughtered. There was no living mouth in the whole family, and all the bodies were all cut off by sharp blades.

This wound is caused by the nails of the grievances.

"Awful, even the Biyu faction with the third-order refining is gone. Isn't the land of ghosts fighting in the land of nine quiets?"

Ye Xuan couldn't help but shudder.

The two big forces are fighting, the scale is very large, and this is the first-class scorpion in the ghost tomb. If it is a war, then the death and injury must not be estimated.

Just then, one person suddenly swept over.

"When the bones are trembled, the people who have buried the bones are coming, die!"

A man's voice sounded, Ye Xuan Yu Guangyi, and found that the comer is a second-order refining.

This second-order refining, no nonsense, directly released a second-order resentment of refining, and launched an attack against Ye Xuan.

On the way, Ye Xuan killed a lot of people in the first step of refining, and raised some realms. Now it has reached the power of 850 dragons. If it is an explosion, it is enough to reach the first stage of refining, and with the increase of various blood vessels, it is nothing to do with the second order of the refining gas.

However, in order to insure, Ye Xuan is also helping the refining of the second-order Tianlong bone and the second-order resentment of the refining gas.

"what?"

The strong man was shocked. He was blinded this time and even provoked such a strong person.

The second-order Tianlong bones and grievances of the refining, together with Ye Xuan, who is known for his speed, were instantly defeated, and five rounds were lost.

"It's really not self-reliant!"

Ye Xuan sighed, although I don't know which force this person is, but killing it is also annoying Ye Xuan.

"Hey, the host has broken through the power of eight hundred and forty dragons!"

Once, to enhance the power of the Twenty Dragons, Ye Xuan is very satisfied.

"Although I don't know what happened, I finally found a way to improve quickly."

Ye Xuan thought about it.

It seems that he will soon be able to reach the refining stage, when the infuriating will have a qualitative leap, the more levels should not be a problem.

This person has a lot of ore in the ring, which can make Megatron a lot of realm.

"Small day, this day keel may not be used, refining is too time consuming, you directly swallow it."

Ye Xuan said to Megatron.

Although very reluctant, Megatron can only accept the fate. Although it can be changed, it can't change such a big creature.

Megatron is now growing very fast, and it is catching up with the phagocytic system. It eats ore and can grow in less than an hour.

An hour later, Megatron was actually the first to reach the refining stage than Ye Xuan.

Subsequently, Ye Xuan also collected the Tianlong bones, even the one hundred ghost beads did not want to use, he was afraid to encounter the third-order refining, and even the fourth-order master.

He wandered around the Biyu School, but found a few masters of the ghost land in the massacre, and the realm is also between the first to the second order of refining.

Therefore, he directly smashed these people, and his realm is constantly improving.

"Hey, the host has broken through to the first step of refining!"

After he had smashed more than a dozen people, he finally broke through to a day.

This breakthrough is so fast that he can't accept it.

Just after his breakthrough, when Wei Zhentian grew up, there was suddenly a man in the distance.

This person is actually the third order of refining.

"All are gathered, why are you still here?" The man asked strangely.

"set?"

Ye Xuan brow wrinkles.

Now he is also a master of the ghost of the ghost land, so I feel that this person is the master of the land of ghosts.

Therefore, this man should also consider him to be the land of ghosts.

"You don't know the collection?" The man's brows also wrinkled, using the commanding tone: "Let a grievance come!"

Ye Xuan quickly thought about it, and then he took out a hundred ghost beads and released a second-order resentment.

After the man saw it, the vigilance was also reduced. "That is, there is no notice to you, follow me!"

When he finished, he flew in one direction.
