

Super D.S 4831

Chapter 4831: See also the robbery

Previously, there were still five twenty-nine-level ridiculous Baodan in the hands of Ye Xuan. Now, this furnace has produced fifty-five pieces. Together, the total number of ridiculous treasures in his hands has reached Sixty giants.

I consume one, and there are fifty-nine left. Although there are a lot of accounts, I can reach the level of the ancient Supreme in the future... Or, Ye Xuan has the heart to help them reach this level, but it must be A few of them. Fives

Nineteen ridiculous treasures, enough!

After calming down the excited mood, Ye Xuan swayed, and immediately went out of Shennong Ding, raising his hand, Bao Ding turned into a mans into his body, and then his right hand turned over, Above the palm, there were fifty-nine wild treasures in an instant. each

One, all revealing the endless energy of the atmosphere, it is eye-catching.

"boom!"

Rumble..."

...

Almost at the next moment, in the void of the universe outside the life of the stars, there was a lot of black robbery clouds in an instant. "

Actually... Is there a thunder? "listen

To the thunderous sound of thunder, Ye Xuan snorted, whispering, the look on his face was a little weird.

It stands to reason that the refining of the 29th-level ridiculous Baodan will not lead to the looting of the heavens. Of course, the 30th-level Tiandao Baodan is completely different.

But this time, perhaps because of the excessive number of unrequited treasures, it was unexpectedly attracted to the robbery.

Moreover, judging from the thunderous sounds that are now transmitted to the ears, and the thunderous sensation that is felt in the vagueness, this time, the ruin of the ruin, I am afraid that the power is not small. Do not

After Ye Xuan was completely fearless, he has just broken through not long ago. What he wants is a baptism of a thunderbolt. In the face of the thunder that makes the monks smell the color, Ye Xuan is completely unrelated. more

Moreover, for the Emperor Yin Lei in Lei Di Yin, this time the thunder, it must be another chance...

With this in mind, Ye Xuan did not hesitate any more, and his body shape suddenly disappeared in the Dongfu Star.

When it reappeared, it was already outside the Xusheng forbidden land, and stepped out from a very remote universe. and

As he left, the numerous clouds that had shrouded the Dongfu stars disappeared instantly, followed by Ye Xuan's head, covering a vast expanse of thousands of miles away...

Roar! "This

At the moment, Ye Xuan screamed and screamed, and the hair in the body was all spurred.

The whole person is like a most powerful humanoid star. The body of the body is blooming with endless treasure, and it shines through the billions of pores of the body.

"Card!"

The harsh and fragile sound came, and the clouds of the sky suddenly surged between the moments. After only a short break, a stout purple gold lightning was already down!

"Emperor!" Eye

Under the flash of the cold man, Ye Xuan suddenly waved his hand, and after a scream, the Lei Di Yin, who was hanging in the brain and knowing the sea, spurred out.

"Hey..."

Almost at the next moment, Lei Diyin flew up, and the first time in the emperor's seal resounded a high-pitched whistling sound. This is the thunder of the emperor, and for it, the so-called robbery is precisely The best chance for forging and quenching itself. "

Oh..."

Almost in the next moment of the emergence of the emperor's seal, a more cheerful and whistling sound came from inside the emperor's seal, revealing a more powerful pressure, which is a great power...

Last time, Emperor Yin Lei Ling had already broken into the third stage of the ancient powers of the ancients in the black robe of the surviving Alliance. The rumor that was heard at this time was that the Emperor Yin Ling was happy. For it, this kind of thunder is the best chance for forging itself.

It can be said that the strength of Lei Ling's cultivation was the last surge, and after the absorption of this period of time, the realm has been stabilized, and this time, after sensing the strong atmosphere of the resurgence of thunder, The spirit rejoices again, because this is its chance!

Moreover, after this baptism of thunder, Lei Di Yin will be more powerful, and Emperor Yin Lei Ling is also very likely to change again. This is the creation of Tianda, so that it is very exciting, and there is a kind of already long-lasting. I want to rush out! "

Still the old rules, as long as the last wave of the temple, the first two waves, left to you and the emperor..."

In the light smile, Ye Xuan's voice of Luding's voice spread to the three waves of thunderous robbery that was about to come to the top. Almost just finished, the first wave of hijacking on the top of the head was already down, although it was toward the top of Ye Xuan. Falling down, but not leaking a little, all were inhaled by Lei Di. "

Oh..." it

Apparently enough to eat, the emperor's voice once again came the sound of Lei Ling's joy, and soon, the sky above the head, the second card bang loudly came, a thicker than before, instantly rushed .

In the face of this wave of robbery, but Ye Xuan still has no movements, carrying his hands, let Lei Diyin hanging over the top of the head to absorb the second thunder, almost in the next moment, a more cheerful and screaming The sound came out of the emperor's seal, revealing a mid-term power.

The ancient power of the fourth step!

This time, although the Emperor Yin Lei Ling only broke through the first-order repair, but this is the meaning of it, even if it can absorb the power of the robbery, but after all, has entered the middle of the big energy, the speed of the entrance into the country Slow, it is normal! "

Card! "most

After a wave of hijacking, the power was even more horrible. Although it was the same as the color of purple gold, the diameter has skyrocketed by more than ten times, and people feel like they are going to destroy the earth.

In this regard, Ye Xuan is still unmoved. After licking his mouth, he waved his hand to the Lei Di to the body, and then his body swayed, and he rushed to the top of the horrible robbery cloud that shrouded the endless sky..."

Oh..."

Oh..."Heart

Under the turbulent turmoil, the voice of the trembling came from the mouth of the violent voice, and did not avoid the flash. The body shape rushed out in the screaming screaming, and went on the face. The blink of an eye did not enter the robbery. The whole place was thoroughly Drowning. versus

At the same time, the fifty-five twenty-five-year-old Baodan, which had just been released, was also thrown by him and hung over his head.

This is a ridiculous treasure, and then the first two waves of thunder have been absorbed by the Emperor Yin and Lei Ling, and the last wave of thunderbolt has him share half, if it is destroyed, it will be of little value.

"Booming..."

The scene was too amazing. The whole piece of the vast purple gold robbery cloud, the horrible roar of the horror continued to endlessly, tens of millions of miles wide and empty, all were smashed by the purple gold Leihai.

For a moment, the Milky Way is trembled, as if it could collapse at any time. Thunderstorms have ravaged dozens of breaths, and the vast Leihai, which was covered by the top of the head, finally disappeared completely.

In the next moment, tens of millions of miles of emptiness are empty, and this is one of the clear! "

Oh..."

The faint sound of the road broke, and the next moment, Ye Xuan stepped out of the sky from the sky...

Chapter 4832: Federal Nether Battlefield

"Hey..."

A faint sound of broken air rang, and the next moment, Ye Xuan stepped out of the treasure from the sky in the sky, but there was no trace of scars, shining, exuding an endless hegemony. With

As soon as he reached out, there were fifty-five miles in the void at the top of his head. It was a ridiculous blessing that experienced the thunder and baptism, and the atmosphere was more solid and rich. One

In the wave, Ye Xuan took out fifty-five small bottles and installed all the ridiculous treasures, which will be used to make them into the immortal world...

In the next moment, as his figure swayed, it was easy to disappear in the same place. When it reappeared, it was already within the Dongfu Star of Xusheng.

As soon as the gods saw it, Ye Xuan quickly captured the scene outside the Dongfu Star.

Appropriate thunder and robbery apparently already alarmed the top of the demon halls in the forbidden area. They did not know that Ye Xuan had returned. During this period of time, when he heard the rumors about the changes of the Star Alliance, he was excited and excited. . cold

Unexpectedly, the caves over the stars were found over the clouds, and it was realized that Ye Xuan had returned. However, no one dared to enter Ye Xuan's Dongfu Star, so he always waited outside the stars...

Under the sway, Ye Xuan's figure disappeared again in the Dongfu Star, appearing in the forbidden land outside the atmosphere. press

According to Ye Xuan's previous instructions, the current magic hall is still in the early stage of development. Therefore, the existence of the emperor's immortality can be regarded as the upper level of the magic hall.

Today, the top five members of the Magic Palace say that there are fewer, but there are not many.
fierce

The beast army's green cattle and jade exquisites, dragons, palaces, black wind tigers, roaring moons,
and Xu Fu's other banned emperors are immortal, a total of more than forty.

Among the remnants of the Legion, the Sangzhi relics tribe, and the more than 20 emperors of the
Xusheng forbidden land are old and immortal.

There are also a number of members of the Nomadic Legion with the original captives of the Three-
jawed Dragonfly, Longshan Tang, and more than sixty. Take

And more than two hundred of the captives of the captive army consisting of **** and Qingpeng and
the three lions of the war lions are immortal. Of course, the nine beasts of the Star Alliance have now
entered the captive army. There are still some emperors immortal, so today's captive army, the overall
strength can be said to be the strongest of the five major legions of the magic hall. this

In addition, there are many strong people above the emperor's army, and the Taikoo Porcupine and the
Taikoo tortoise are two powerful wild powers. This

A lot of high-level people, now many are retreating.

All along, the strength structure of the magic hall is somewhat strange. The battleships such as the
battleship and the warship are powerful. The top-level combat power of the desert level is also
extremely powerful. Although only the master of the magic hall is one person, it is almost sweeping.

But in the universe, the Lord of the Universe, the Lord of the Universe, the power of the universe and
the power of the ancients, the number of the strong, the number is really too small.

Even after the Taikoo Porcupine, the Taikoo tortoise and the nine beasts of the Star Alliance were able
to join, only 11 powers. This

The situation has made Qingniu and Zhao Dong, Qian Nan, Sun Xi, Li Bei and other high-level people stunned. They have been screaming for a long time. As long as there is no war, or Ye Xuan has no distribution, they are basically Retreat.

Today, Ye Xuan walked out of the Dongfu Star, and looked up. The top of the Hall of the Emperor was immortal, and surely there were more than half of them, apparently being retreat.

For example, Qinglong, Three-jawed Dragonfly and Longshan Tang are the same.

The same is true for Taikoo Porcupine and Taikoo Turtle.

However, Zhao Dong, Qian Nan, Sun Xi and Li Bei, as well as the nine outspoken talents from the Star Alliance, are all here.

When I saw Ye Xuan appear, everyone immediately visited the shrine and congratulated them in unison. he

Although we don't know what Ye Xuan had just crossed, it is a good thing as long as there is a day of robbery. Respect is appropriate. leaf

Xuan's line of sight swept through the crowd. When asked about the development of the outside world, there was naturally nothing to ask about the Star Alliance and the Alliance of Nations. The old guys did not dare to come to the nuisance in the near future.

The Alliance of the Survivors has nothing to say. It has already become a subordinate of the account. What Ye Xuan really cares about is the situation of the Terran Federation and the Celestials who are fighting...

Under the question, I learned that the battles between the Terran Federation and the Tianzu Nationality are now almost in full swing. Moreover, since the war, the powerful Terran Federation has shown a sinister declining trend. It can be seen that the strength of the Tianzu people is simply Shock.....

After understanding the general situation, Ye Xuan, even if instructed, pay close attention to the situation of the Terran Federation and the Tianzu nationality. If there is a major change, he will return at any time.

Then, after the shackles were all right, they seized the time to retreat. After chilling, they immediately returned to the Dongfu Star. He was going to take advantage of this time to refine the 30-level Tiandao Baodan's perfect Dan. Deduct once and make sure it is correct. because

For the next collection, it is to refine the destiny of the 30th-level Tiandao Baodan...

.....

The periphery of this star area occupied by the Terran Federation...

Today, this vast and innocent void has long been turned into a huge starry battlefield.

The Terran Federation and the Celestial Family are fighting here and have been going on for some time.

Standing in the center of the universe beyond the 100 billion miles ahead, it is a huge giant star.

This giant star is the Tianji City. Today, the Tianji City is no longer just made of pure and up-to-date cosmic alloy. The Emperor has exhausted the power of the entire Tianzu, collecting all kinds of top flesh and blood materials, such as Zhenlong. Dragon ribs, phoenix phoenix, and black dragon's keel spine, etc... this

These wild animals are extremely powerful during their lifetime. Even if they have fallen into endless years, their treasures are still very strong. However, the Tianji people have a way to divide them and use all kinds of suitable materials to make them cold and pure. The Tianji City, transformed step by step, turned into a biochemical giant plug that combines the cosmic alloy and the ancient creatures and flesh and blood materials! Such as

Today's Tianji City, in addition to the original conventional continental form, and the shape of the wartime ball fortress, the current Tianji City, there are two other forms of birth.

If necessary, in a short period of time, the entire huge and incomparable horror-strength Tianji City can be changed to a huge dragon or a wing in the order of Emperor Yi. Show the black phoenix! this

In addition, whether it is the patriarch of the patriarch, or all the ordinary people of the celestial family, in the past hundred years, the strength of cultivation has been changing and advancing at an ever-changing speed...he

We used the treasures of the countless powerful and ancient wild spirits in the emptiness to improve the cultivation, and more like the transformation of the heavenly city, collecting the top materials such as the dragon ribs and thorns, and transforming the mechanical body step by step. its

In the middle, some powerful Tianzu ethnic groups even gave up the human form of the body, turned into a huge bones or treasures of the ancient and ancient spirits, from the inside to the end, step by step carefully carved, and finally, electronic consciousness into the Lord!

After a change, it became a powerful and ancient creature with the elements of scientific and technological strength...

Chapter 4833: Terran Federation

However, where is the deity of Emperor Yi, what form is it, and what kind of situation has been achieved by repairing strength, even within the Tianji family, no one is known. can

It is said that today's celestial family is completely different from what it was nearly a hundred years ago. This

Once upon a time, the total number of warships in the entire ethnic group has exceeded 100 billion. Among them, the official Tianzu ethnic group has more than 10 million giants, and can change into a metal sphere in the form of stars at any time, or various shapes. Mechanical beast!

It's just a million people, and the number does not sound like much, but without exception, all of them are repairs beyond the immortality. Among them, there are tens of thousands of cosmic lords, nearly 10,000 of the universe, and nearly ten thousand universes. There are nearly a hundred in power! And

In addition to the transformation and evolution of all the official tribes of the ethnic group, the Tianji people also use a large number of powerful and ruined treasures to create a large number of intelligent robots that are not human forms. Their combat power is also extremely amazing. They are called mechanical beasts!

The number of mechanical beasts that have been transformed by the Tianji family is almost innumerable, although they are actually made up of scientific and technological elements on the basis of the wreckage of various ancient creatures, such as the scales and cortex of the body surface. It is the latest biochemical product.

Right now, this piece of space is on the battlefield around the starry world occupied by the Terran Federation. There are a variety of mechanical warships and different forms that are different from the wild animals. The number of various mechanical beasts with different attack methods is very dense. Charge

Plugged the entire battlefield..."

Oh..."

"boom!"

"Booming..."

At this moment, the top of the Tianji clan seems to have issued another order. The entire vast expanse of the void, the sound of a sizzling sound like a tidal wave, this is the movement brought by the guns of countless warships.

Huge roaring sounds, numerous mechanical warships in the form of wild animals, massive naval guns volley at the same time...

In an instant, countless energy beams of different diameters lasing at different angles, and finally gathered together!

This scene is too astounding, and the void is turned into a fierce light net, covering the endless region, whistling toward the front..."

boom! ""

Rumble..."

However, it is also a naval gun. However, these naval gun energy beams that have been transformed by the heavenly family and appear to be completely large and fierce in the form of a beast are more powerful.

Opposite the void, countless Terran Alliance warships smashed into the void, and even a small number of millions of meters of superstar plugs.

However, in the face of the overwhelming expanse of the mechanical light beast, the energy light column is like a ruin, and the smaller one is directly blown into a fireball. which is

These are some big and small fortresses, or a super-star plug of a million meters in diameter, and they just barely hold up the energy shield for defense.

In the face of such an overwhelming offensive, it is very difficult to counterattack...this

Since the beginning of the period, although the Tianzu and the Terran Federations have been fighting, and the battle has become more and more fierce, and now it has reached the peak of fire, but both sides have been restrained, and only the warships and warships are used. The regular power of the hierarchy.

The real high-level war has never started...

Since this time, the mechanical warfare of the Tianzu nationality has been destroyed, and it is the main battleship of the wild animal form, and it has also suffered many damages. but

Since the Tianji people came to the emptiness of this ruined land, they have established a large number of mechanical beasts on the countless abandoned stars in the vast expanse of the tens of billions of miles away from the Terran Federation. cast

All of them are intelligent machines. When the assembly line is completed, there will be a huge number of mechanical beasts continuously delivered.

It is the main battleship in the form of a wild animal that was damaged in the war. It can also be withdrawn in the first time, enter the base, and quickly repair it...

It is the terrible thing about the Tianji people. Although they have only a few million people who have electronic life, they are only commanding the top, and the real underlying forces are all made. As long as resources are available, they can be born in mass.

Obviously, resources are not lacking. There is a large amount of mineral deposits in each abandoned star. The wreckage of warships destroyed in the starry sky can be returned to the furnace. Place

Therefore, their mechanical beasts are almost continuous, and the Terran Federation has intelligent robots, but the efficiency of production is completely incomparable. In the warships of the Terran Federation, the people must be seated, and each damage represents a large number. The loss of the lives of the people...

For this reason, since the war, the Terran Federation and the Tianji have both suffered damage, but for the Tianji, there is almost no pain, and the damaged warships are dragged to the rear. After returning to the furnace, they have been completely renewed for a long time. but

The loss of the Terran Federation is extremely heavy. The loss of the warships is still a trivial matter. The casualties of the key tribes are heavy, and the population of the Terran is no longer enough to withstand such consumption.

What's more, this is completely meaningless consumption, and even did not bring much damage to the enemy. This unequal war damage directly led to the retreat of the secondary front of the Terran Federation. Two

The void between the big camps was originally a hundred billion miles away, but now it has shrunk to about 80 billion miles. Since this time, the Tianji people have moved forward with this violent attitude that is almost unstoppable. Advanced 20 billion miles.

And the Terran Federation is clearly a trend of retreat...from

Since the beginning of the war, like a giant star-like heavenly city, it has been traversing the void in the opposite 100 billion miles, behind it, there are a lot of smaller stars, each one is like a heavenly city. General mechanical fortress.

All of them are in the middle of the town, but they have never had any changes, but they have invisibly exuded an amazing deterrent. with

Like this, the edge of the astral federation, the immortal nine stars, although not appearing, but like a giant wormhole-like heavenly palace, and the magnificent temple of the size of a giant star, also lingering in the void, waiting for it, Look at it..."

Oh..."

Card 嚟嚟..."

However, the metal ball that the Tianji City has turned out to be alive, and the sound of the incomparable humming sound suddenly came out inside, accompanied by the sound of a squeaky sound, as if there were countless mechanical gears. In the rotation of the running in general.

And, with the noise of the card, the huge metal ball is changing rapidly.

In all parts of the ball, there are some raised objects that stretch out. If you don't get enough interest, you will turn into a blue-black dragon. The body is extremely large, nearly a billion meters in size, more than the volume of the previous ball shape.

Ye Xuan is a few laps smaller than the ninth change of the konjac, and it is even more bizarre that this black-and-black dragon has a dazzling metallic luster. Extremely glaring. This

It is clearly a metal magic dragon made of metal synthetic materials...

Chapter 4834: War escalation

"call out!"

Oh..."

At this time, there were countless sounds of emptying in front of the void, and from the metal dragon's huge and huge blood basin wide mouth, suddenly there was a mile, and the rushing out, its momentum Oh, the number is overwhelming, there are tens of millions...this

Some of the originals are just a tiny metal sphere with a metallic luster of different colors. but

Soon after these tiny metal spheres came to an abrupt end in the void, there was also a deep humming and a mechanical sound of the card.

Accompanied by these abnormal sounds, the shape of the ball also changed rapidly. The final change was a star-like beast with different head shapes. The size of the ball was huge, and the small stars were huge. Make

The type is different and different, with different characteristics of beasts, and the surface is full of faint metallic luster, just like a mechanical beast with different heads.

In this piece of imaginary air, there were a large number of mechanical murderers, and the number was too large to be counted, but the number of these mechanical beasts that are now appearing is at least tens of millions of horsible, and the scent of horror is incomparable. There are even a lot of imperial emperors and immortals!

Some of the larger forms exist, the atmosphere that comes out, even reaches the universe supreme, the Lord of the universe and the universe supreme...

The Tianji family finally got a new move.

Previously, the two camps had only been fighting at the level of conventional warships and warships. Although there were many massive mechanical beasts and a large number of wild beast warships, they were all below the level of power of immortal power. . Correct

The same is true of the Terran Federation. but

Now, perhaps because of the war so far, such a huge army of machinery has only pushed forward the imaginary distance of 20 billion miles, so that the patriarch of the Tianzu nationality has become impatient. day

The machine family finally began to dispatch the unconventional level of combat power. This

Absolutely a big hand, 甫一手, is the tens of millions of ordinary mechanical beasts above the immortal, and there are even a lot of cosmic sages, the Lord of the universe, and the universe supreme.

Even the Tianji City, even from the original form of the stars, turned into the giant alloy dragon form of Panda.

The battle... has risen another step in an instant.

All of this changed too quickly, and the high-level counterparts of the Confederate Federation were caught off guard. With

The high-level mechanical beasts of these tens of millions of immortal atmospheres are coming, and in the battleships and battleships of countless Terran Federations in the void, countless powerful people are suddenly exclaimed, and a fear of intensification is in this film. The void is rendered quickly.

"All regular warships and warships are back, returning to the interior of the starfield..."

Just at this time, just like a giant nebula, in the Tianzhuo Palace, which is slowly rotating, suddenly there is a majestic voice: "The Heavenly Palace, the Splendid Temple, each dispatching a high-end combat army... ""

boom! ”

"Booming..."

The massive warships and warships of the Terran Alliance, which had just been released, were overwhelming, and immediately opened the kinetic energy capsule to the limit. Like the dogs of the family, they retreated to the interior of the star. This

Since then, the bottom of the Terran Alliance has been frightened. If

It is fighting with the bereaved or the beasts. At least the other is still the flesh and blood. It has life. Everyone is not jealous, but it is different from the Tianji war.

When I think of the other party, it is not a living person, not even an electronic life, but just some cold intelligent robots, machines and beasts, even if you are not afraid of death, your heart must be imaginary. This

Since the end of World War I, hundreds of millions of warships have been destroyed by the Terran Federation. There are many human races in each warship and warship. The total number of deaths is probably at least tens of billions...

In the face of this level of large-scale star wars, the individual's life is insignificant, and no one knows that when they suddenly, they are gone. Such as

Now I can return to the interior of the star field, naturally no one will want to stay for another minute. very

Fast, the massive Terran federal warships and warships will recede like tides, and this vast battlefield is empty.

But soon, from the heavenly city and the splendid temple that lingered on the edge of the starry field, there was a rush of anger and rushed to the front of the void battlefield. Both

There are strong people, there are also beasts, but without exception, the cultivation of the atmosphere is all in the immortality, among which there are many cosmic sages, the Lord of the universe and even the universe supreme. number

The amount is also more than ten million... and the number of advanced mechanical beasts that are sprayed out from the opposite side of the city is quite equal!

But this is obviously only the middle-level combat power of the two camps. shortage

The power of the ancient powers and the ancient supreme level is the real high-end combat power, but today, the two camps have never been used. people

On the side of the federal federation, among the last reinforcements, even the ancient and supreme, there were six whole people, plus the emperor who had just broken through to the deserted place not long ago. Today, there are seven people in the Terran Federation. Able-class combat power. but

Whether it is really this number, no one knows. After all, the immortal nine stars and the Heavenly Palace and the Temple of Glory have come. This

However, the core ancestral lands of the three major forces of the Terran Federation are filled with a lot of ancient existences. Do the ghosts know when they suddenly wake up?

As for the number of powers and ruins of the Tianji people, it is a mystery. How many of them are now just a guess...

It stands to reason that the Tianji people were created by the pioneer of the Terran Science and Technology camp, and only tens of thousands of years have passed. Before this, this group did not exist at all, and there should be no strong people with a level of absurdity.

But the growth rate of this group is too alarming, and the ability to create and integrate various machines is simply horrifying.

Before the family moved out of the first universe, there might not be a sacred supreme in the celestial family, but then they disappeared for a hundred years, and in the emptiness of the sky, they got a lot of treasures of the ancient and dead, and many of them were powerful and wild. The honor level exists. Take

The powerful creation and integration ability of the Tianji people, this century is enough for Emperor Yi to create some powerful mechanical beasts with great power and even abundance, or electronic life...

It's just that all of this has not yet been revealed, but as the war has become more and more fierce, the level of combat power to the battlefield is getting higher and higher. I believe that the power and destiny of the Tianzu and the Terran Federations The top-level high-end combat forces, such as the environment, will continue to emerge...

And this is exactly what Ye Xuan wants to see. He has never intervened and intervened in the war between the Celestial and the Terran Federation. The purpose is to see the true meaning of these two camps. Strong...

In order to see this, it is obviously necessary to pay a certain price. Ye Xuan is now out of the way, letting them fight hard together, which is the most pleasant thing.

Chapter 4835: Mechanical family

"boom!"

Rumble..."

In the void, the earth-shattering blast came, dense, continuous, and the escalating battle began! put

Looking into the eye, the void in the sky is already empty. first

In the pre-conventional level of war, the number of competitions is the number. Whether it is the Terran Federation or the Tianji clan, there are a large number of warships, warships, mechanical beasts, etc., which will be a hundred billion miles away. The virtual battlefield is almost full. day

The reason why the machine family first launched this conventional level of war is obviously considered. he

Their mechanical beasts are almost continuous, and the Terran Federation has intelligent robots, but the efficiency of production is completely incomparable. In the warships of the Terran Federation, the people must be seated, and each damage represents a large number of people. Loss...

Since the Tianji people came to the emptiness of this ruined land, they have established a large number of mechanical beasts on the countless abandoned stars in the vast expanse of the tens of billions of miles away from the Terran Federation. Will

It is the main battleship in the form of a wild animal that was damaged in the war. It can also be withdrawn in the first time, enter the base, and carry out rapid repair...

Therefore, at the beginning of the general level of the Star Wars, Emperor Yi's intention is to fight the loss of the Terran Federation.

This is the terrible thing of the heavenly family and its advantage. can

Unfortunately, although the Tianji nationality first established a mechanical assembly line in the emptiness of this piece of ruined land, the mechanical beasts of all levels are simply flowing.

But they obviously also underestimated the heritage of the Terran Federation. first

Before the advent, the core ancestral homes of the three camps of the Terran Federation have migrated.

The city of glory seems to be only as big as a giant star, but it uses the folding space technology obviously. The inner space is a natural world. I don't know how many people have joined the strong of the former Wan nationality.

Among the two camps of the Terran, the ancestral home of the science and technology camp is immortal, and it is not simple, let alone the nine giant stars, which can accommodate countless warships and population.

In addition, the ancestral palace of the Terran cultivation camp is simply a whirlpool of a nebula like a light group. No one knows what is inside, but one thing is certain, that is, the space inside must be very Big, it is also a self-contained world. This

In the first battle, the original conventional warfare stage, the Tianji people did not have any loss. All the mechanical beasts destroyed by the war were directly dragged back to the rear base camp and rebuilt.

It is only a waste of resources at the energy level, but these are obviously the most lacking in this vast universe.

However, in the Terran Federation, although the loss of a large number of warships and warships, the population loss is tens of billions, but since the war, the Terran Federation is still full of foundations, and it is impossible to see the extent of consumption. If

It is to continue this way, and this battle will not last long. most

In the end, the patriarch of the Tianji nationality lost patience and opened a battle at the middle level. Such as

Today, it is not just the Federation of the Terran Federation that has withdrawn all the battleships and warships of the conventional combat level from the battlefield. The same is true of the Tianji nationality. All the mechanical beasts below the immortal level are retracted to the opposite side like the tide. Within a billion miles of the star base camp. Such as

As a result, the whole battle of the void is instantly different from the previous one.

The number of troops involved in the war is too small to be horrendous.

The camps of both sides rushed into the battlefield, and they were all repaired in immortality. The number of battles in the superstition of the universe is more than ten million, but the number of thousands of them is placed in the universe of a billion miles. It is not very good. Eye-catching...only

Yes, although the number is small, but after all, all are the existence of immortality, among which the most powerful, even some of the universe supreme. Place

Therefore, the situation of the war is more intense than before.

"boom!"

"Booming"

In the air, the earth-shattering roar continued, and it never stopped. Every minute and every second, both sides had strong men in the fall. This

Once, the damage of the Celestial family is also great. he

The tens of millions of high-level mechanical beasts that we dispatched this time are still not official tribes. After all, the formal tribes with electronic life in the celestial family are only about a million. Each one is precious, basically it is the commanding high-level. Used as a force-intensive operation.

However, although the advanced mechanical beast is also an intelligent robot, it is a high-quality goods. If it is destroyed in battle, although it can be repaired or even rebuilt, it can be timeless, but it is not like the mechanical beast of ordinary immortality. It will be refreshed in an instant, and it will be on the battlefield...

Therefore, after the war of this immortality to the universe's supremacy, the degree of war damage on both sides was somewhat flattened. people

The original defeat of the tribes was temporarily stopped. The previous wars lasted for a long time, and the distance between the two camps was pushed forward by the Tianji people for 20 billion miles. but

Nowadays, since the mid-level battles have been launched, ten days have passed in the blink of an eye. The middle-class combat forces of the Tianji nationality have also advanced forward, but only about five billion miles. Compared with the previous conventional level of war, it has dropped a lot...

Such a scene obviously exceeded the expectations of Emperor Yi. he

The first is to lose the power of the conventional level, torment the Terran Federation, and ultimately fail. Such as

Today, he has a rich background in the middle-level combat power, and he has removed the conventional level of combat power and put on the mid-level combat power of immortality to the universe. Who

It is expected that the Federation of the Terran Federation will not be weak at this level. Big

Since the beginning of the war, it has been going on for more than a month from the beginning to the present. The space between the two camps is only 100 billion miles, and the Tianji people have only advanced by 25 billion miles. One quarter, this really makes the Emperor a little unacceptable. complete

In fact, even if the distance of this 100 billion mile is left behind, the army of the celestial family will only reach the edge of the horoscope of the Terran Federation. If we want to grab the territory of the Terran Federation, we must continue to move forward.

It can even be said that after the distance of 100 billion miles has been pushed forward, it is the real opening of the war...

Such a slow process of the war made the emperor gradually intolerant.

Just when he wants to order, when he starts the war on the high-end level in advance, the sudden change...

"call out!"

As the faint sound of the air broke out, a man suddenly rushed out of the giant star-studded wormhole beyond the tens of billions of miles ahead of the Terran federal star. He

However, it is precisely the emperor who has already entered the ancient and supreme position. he

It has disappeared for a while, and now the meaning of the sudden reappearance is no doubt... the mechanical family is coming!

Chapter 4836: 100 million electronic life

Emperor Yi and Emperor II are the intelligent life created by the pioneer of the Terran Technology. most

It was Emperor Yi who was first created, but it is said that Emperor Yi later betrayed Xingbo, murdered him, and rebelled the Terran, established the Tianzu clan, created a large number of intelligent robots, and rapidly grew and eventually inhabited the first. The human race of the universe rushed to the third universe...that

It is already tens of thousands of years before the date.

Since the emperor rebelled, after the fall of Xingbo, Emperor II has never met with the emperor again. He became the national teacher of the immortal dynasty of the Terran science and technology camp, and also created a ethnic group, the so-called mechanical family. From

In essence, the Tianji and the mechanical family are actually the same, all of which are electronic intelligent life, but because of the different camps, no one has ever confused the Tianji and the mechanical family.

After occupying the first universe, it became the hegemon, and the celestial slaves of the first universe of slaves were different. The mechanical family created by Emperor II has rarely been revealed before the world. where

Afraid of the dramatic changes in the starry sky, the core ancestral home of the Terran Science and Technology camp, the immortal dynasty, did not appear until the emptiness of this piece of land in the wild.

But since then, Emperor II, who has been sitting in the federal camp of the Terran, has disappeared. It has been a few months since it was calculated. Now, he finally appears again and rushes out of this giant star wormhole. only

Based on this, it can be concluded that Emperor II has returned to the third universe during this time. and

The purpose of his return is obviously to bring the entire mechanical family that has not been revealed before the world to the emptiness of this piece of wild land...

Nowadays, with the return of Emperor II, the mechanical family that has never been revealed before the world will obviously unveil the mysterious veil soon.

This scene has attracted the attention of all people. Not only the high-level people outside the border of the Terran Federation have turned their heads, but even the opposite of the 100 billion-mile, it has become a giant metal dragon in the shape of a billion-mile metal dragon, and In the other large number of metal spheres around it, there is also a glimpse of God.

At this moment, even the central part of the vast battlefield of the vast one billion miles, the tens of millions of strong players in the middle of the fierce battle, all stopped, temporarily suspended, each retreating, turning In the meantime, I will look at this giant star-studded wormhole..."

call out! ""

Oh..."

After Emperor II rushed out, he immediately returned to the edge of the Terran Federation, standing in the sky above the heavenly city and the splendid temple. but

His sight is also turned to look at the giant starry skyworm.

Almost at the next moment, from this star-studded wormhole, the endless sharp breaks sounded, and then there was a slap in the face. Place

Some of them rushed out of the star wormhole and immediately rushed into the storm, and soon stopped in the universe outside the wormhole.

Sure enough, it is a mechanical family!

These small mans are clearly a head-on mechanical beast. The size is big and small, the small is like a meteor, and the big one is like a star.

All the forms of mechanical beasts are different, some are like the various starry beasts, and some are like warships and battleboats, quite a bit nondescript...but

Without exception, these mechanical beasts have a strong atmosphere, at least in the context of the border...

This is obviously a change that has only been made in the past 100 years. When Ye Xuan was still in the three stars of the world, the strength of the tribes of the mechanical family was absolutely not so terrible. Otherwise, it was already the rhythm of sweeping the world.

In the past 100 years, the Celestial family has grown so fast because of the mysterious emptiness in the mysterious void. and

The mechanical family of Emperor II has never appeared in the past. It is clearly hidden in an unknown universe. In the past 100 years, the growth rate of the mechanical family has been so amazing. With the existence of a tribe, it is already the main level. I think that most of the time there have been similar opportunities with the Celestial family. complete

In fact, with the coming of the end of the flood, the mysterious Hongmeng void is undergoing tremendous changes. Other large and small fragments are empty, including the present void and the three star-owners in the world. The planes, etc., naturally change a lot...

In the eyes of the public, this huge starry wormhole has always had a lot of masons. This scene lasted for a long time, and the sky was always quiet. All the people were watching and waiting quietly. The shock of the heart is getting thicker... small

After half a day, everything is finally over. huge

In the star-shaped wormhole, there is no longer a shot, and it is completely stopped. and

At this time, in the void in front of the wormhole, various forms of mechanical beasts have been overwhelming, filled with a large universe of 10 billion miles.

Looking at it, the total number has exceeded 100 million...

The mechanical beasts of different sizes and sizes are obviously the entire mechanical family. One

The number of billions does not seem to be much, or even a little pitiful. After all, in the previous war, the celestial family was only a warship of various forms of wild animals, and they dispatched billions of giants and mechanical warfare. The beast is even more numerous, it can be called massive...

In fact, when we saw this kind of mechanical beasts of various sizes and sizes, even the gods that were extended in the giant metal magic dragons that were opposite the 100-million-mile sky were violently fluctuating. It's up. This

Clearly, it is an extremely shocking performance. This

The metal magic dragon with a head shape of more than 100 million miles is one of the two major battle forms of the Tianji City. The existence of being able to sit in the city of Tianji is obviously the real core of the Tianji people. Say

Uncertainty of these gods, one or even more belong to the emperor and its avatars, but it is equally violent, showing the meaning of shock...

The patriarch of the Tang dynasty family was shocked by the mechanical beasts of the mechanical family of 100 million. This sounds counterintuitive, but it is really what it should be...

Although the machine family's wild warships and mechanical beasts are countless, they are all intelligent machines without life. The total number of people who truly have electronic life is more than 10 million. but

Today, the hundreds of millions of mechanical beasts that lie in front of the giant star wormhole, though not flesh and blood, all share the unique agility of life. very

Obviously, this billion-dollar mechanical beasts are all owned by electronic life and mechanical people.

That is to say, the number of formal people who have electronic life in the Tianji family is only over 10 million, while the Tianji family has more than 100 million, which is ten times as great.

Only by this point, the shock of Emperor Yi is not difficult to understand...

"Roar!"

Roar! "

Oh..."

At this moment, the mechanical tribes with more than 100 million giants suddenly burst into anger and scream, and then, the more shocking scene happened...

Chapter 4837: Fusion fusion

"Roar!"

Oh..."

"boom!""

Rumble..."

In front of the giant star-studded wormhole, there are more than 100 million giants of mechanical tribes. Suddenly they all screamed and screamed. Then, the earth-shattering roar, like a tidal wave, immediately rang, covering the whole piece of emptiness... This

In the meantime, it is accompanied by the sound of mechanical intensiveness that is dense and horrible. Ten thousand

Among the crowds, the billions of heads of different sizes and shapes, but the seemingly all-in-one mechanical tribes with similar stars and beasts began to change shape instantly...

As the shape changes rapidly, the mechanical tribes of different sizes are close together, gathered, and merged quickly...

In one scene, it is like a combination of Transformers, and a large number of mechanical tribes, in a few short periods of interest, merge into one.

Some are three or five heads, and some are more, seven or eight, and ten.

There are dozens of mechanical tribes in one place.

In the blink of an eye, the original 100 million mechanical tribes have become more than 10 million heads today, and the number has dropped by 90%. But today, the more than 10,000 mechanical tribes are not only bigger, The vast majority has exceeded the size of the ordinary stars.

Even its shape has changed. Although it is still a starry beast, it is even more embarrassing, and although they are made up of a number of mechanical tribes, they are seamless, and they do not see a half-point mosaic. Traces are as natural as they are.

Looking at it, the tens of millions of mechanical ethnic groups that have just merged have basically the characteristics of the blood of various starry beasts, which means that their defense and attack capabilities are diversified and stronger. .

It is even possible to have the special ability of some special starry beasts such as Zerg...

In addition, after the integration, the tens of millions of mechanical beasts, the strength of cultivation has also suddenly increased dramatically. When the previous one was a billion, the weakest of these mechanical tribes was the landlord. territory. but

Nowadays, after the integration of each other, the more than tens of thousands of mechanical beasts, the weakest of them, are ordinary immortal...

It seems that the tens of millions of ordinary people who have been cultivated above the ordinary immortality are not. After all, in the mid-level war that has just been temporarily suspended, the Terran Federation and the Tianzu have each dispatched more than 10 million elements of immortality.but

This is obviously only the first fusion, and it has not ended. "

boom! ""

Rumble..."

Soon, with the earth-shattering roar again, it sounded like a tidal wave, covering the whole piece of void, and the second fusion began. Virtual

In the air, there was a dense and screaming mechanical sound of the card, and the more than tens of thousands of mechanical people who had just completed the integration began to change shape again...

The three-time integration took a little longer, but it only lasted for more than a dozen.

After more than a hundred interest rates, the number of mechanical beasts that had passed through the second fusion of more than one million had lost 90%, and now only a few hundred thousand.

Each head is huge, nearly a billion miles away, and the giant metal magic dragon that is opposite to the Tianji City, which is 100 million miles away, is only a small circle.

As for its form, it is also a variety of starry beasts, but it has reached its peak. At first glance, it is just like a prehistoric monster, which is shocking. through

After this third fusion, among the more than tens of thousands of mechanical behemoths, the weakest ones have reached the immortality of the emperor, and the strongest body in the body has even reached the ancient wilderness. .

And the number is quite large, more than one hundred...

This is the eternal power of more than 100,000 heads of immortality and more than one hundred. Just now, it has definitely exceeded the equivalent level of the Tianji nationality. and

And, this is just the third fusion.

Since there have been three mergers before, then the subsequent fourth and fifth fusions, in theory, obviously exist...

The five integrations are not mentioned for the time being. After all, the fourth fusion has not yet appeared. It is too early to say that it is too early.

But even if only the fourth fusion is completed, according to the law of the previous three integrations, if there are no accidents, the number of these hundreds of thousands of mechanical beasts will be reduced by 90%, only a million. although

However, there are only a few thousand, but the mechanical beast that completed the fourth fusion is just the body type. The smallest one, I am afraid, can also be compared with the giant metal magic dragon that changed from the opposite of the 100 million-mile sky-city city. .

In terms of strength, even the weakest existence, I am afraid that it will reach the universe.

As for the strongest, in theory, it will even reach the sacred supreme, and the number should be in the form of a dozen or so...

Ten thousand heads of mechanical beasts, repaired to the strength of the universe above the sage, and there are at least a dozen or so old Supreme level of existence ... Although not many, but it is definitely a terrible mechanical beast army, can be described Invincible!

However, whether this fourth fusion can really be achieved is still an unsolved mystery. this

At this time, the whole piece of the endless void of hundreds of billions of miles was completely ruined, and the eyes of countless powerful people gathered all over the hundreds of thousands of mechanical beasts that had undergone three integrations. Unstoppable tension and expectation...

Chapter 4838: Emperor's withdrawal

Time is slowly passing...

Previously, in the short half-column time, the more than 100 million mechanical people who rushed out of the giant star wormhole quickly completed three phases. original

The number of more than 100 million yuan has been reduced to more than 100,000 heads after three fusions and fusions. but

Although the number has dropped sharply, the combat power has risen sharply. They have become the mechanical beasts of more than 100,000 heads of immortality, and even more than one hundred of them are wild. only

For the time being, it has definitely exceeded the same level of combat power of the Celestial family.

This lineup has been extremely strong, but it has not yet reached the level that can make the Tianji people feel moved. After all, there are many mechanical beasts in the ancient age, but there is no real wildest supreme...

Some people are waiting, waiting for the tens of thousands of heads to complete the third fusion of mechanical beasts for the fourth fusion.

See if after the completion of the fourth fusion, they will become more than 10,000 heads of strength to exist above the universe, and at least a dozen of them are powerful and ancient...

However, the time of the semi-column has passed, and the tens of thousands of heads have passed through the third fusion of mechanical beasts, but there has been no movement.

It just swayed the shocking and powerful atmosphere of the body, and looked at the Tianji national army opposite to 100 billion miles. package

The same is true of their patriarch, Emperor II! half

The scent of the scent has passed, and there is no movement. This basically explains the problem... At least for now, the fourth fusion will not begin. No

Some people can judge that the fourth fusion in this expectation is temporarily unable to unfold, or that the emperor is deliberately not going to start. This is a mystery. All the people, including the top leaders of the Terran Federation's own camp and countless powerful people, are Guessing. very

Obviously, the high-level members of the Tianji national army opposite the 100-million-dollar must be the same! Virtual

In the air, I fell into a dead silence, terrifying, nervous, and my heart was slightly trembled...

After a while, from the camp of the Tianji ethnic group opposite the 100 billion-mile-out, there was a deep voice of God, breaking this uncomfortable silence..."

Emperor II, you are a little surprised me. I haven't thought that since the tens of thousands of years, there have been more than 100 million people in the mechanical tribe..."

"And, you don't actually develop the power, and the heavenly people of the deity are taking a different path, the road of the fusion of the tribes..."

"This is really shocking and works well, but... your fourth fusion?"

It's just that there are more than a hundred mechanical warfare beasts of the ancient ages, and I am afraid that they will not be able to compete with the celestial beings of the deity today..."

This is obviously the voice of the Emperor of the Heavenly Kingdom. Of course, he is an electronic life. After entering different electronic intelligent carriers, he can appear in different forms, and the form is still the same. The sound is even more unnecessary, and it is ever-changing! but

At least, for the high-level and countless powerful people of this imaginary federation, they are indeed the first to hear the voice of the celestial tribe of the celestial family...

At this moment, I don't know how many people's minds gave birth to a strange feeling.

The patriarch of the Tianji nationality is not an ordinary person. He created the celestial family, and he dominated the three major stars in the world for tens of thousands of years. Now, he can hear his voice, which is originally a The heart is shocking things. but

This is just the feeling of other people. For Emperor II, Emperor I is no different, but it is the same as him. this

Engraved, in the face of the emperor's slightly ridiculous provocative discourse, the appearance looks like the emperor of a human race, just a light smile.

Then, he raised his hand and pointed out the tens of thousands of mechanical beasts that had just completed the second fusion in front of the void. He said without hesitation: "I am one, I know you, you know me, even though it has been tens of thousands of years. The years have disappeared, but can the people of the hundreds of thousands of machine families start the fourth integration, is it... you have no point in your heart?"

Needless to say, although the words of Emperor II are gentle, they reveal a domineering invisibly. Correct

In the emptiness of the sky, the emperor, who crouched in the giant metal magic dragon with a size of more than 100 million miles, fell into silence.

No one knows more about Emperor II than he does, but the same, the change of tens of thousands of years has made him completely uncertain about Emperor II.

Just as the strength that he has already demonstrated today is far from the real heritage of the Tianji people. The three generations of the mechanical family that the Emperor Ershi has already demonstrated are three times, but what is the true essence of the Emperor II? its

In fact, whether the tens of thousands of mechanical beasts can immediately launch the fourth fusion, for him, for this war, it is no longer important. weight

What is necessary is because, because of the arrival of Emperor II, because of the advent of the entire machine family, today's war, the Tianji people want to make a bang, and expel the Terran Federation from the front of the 100 billion miles away from this star field, occupying them now. The plan that is inhabited and vast, and has countless life stars, although it has been impossible to achieve...

In this case, then there is no need to continue to stay here and the Emperor II intrigue.

As the patriarch of the celestial family, he has more powerful and more comprehensive means. Although this war ended in vain, it did not achieve the intended purpose, but this is only temporary.

Soon after, with the advent of the second war, everything will change.

As these thoughts flashed in the brain, the emperor made a decision in an instant.

He did not even hear the voice of God again, and did not pay attention to the Emperor II again, as if he did not exist at all, was completely ignored. no

In the form, the emperor's army of the Tianji national army has issued an order to withdraw troops...

"boom!"

"Booming..."

With the release of his instructions, this vast universe of thousands of miles of space, there is an earth-shattering roar, and tens of millions of elite machines of the heavenly elite, whose strengths are generally above immortality. The beasts have stepped back, and the huge figure in this process has shrunk rapidly. short

Between the short-term interest rates, tens of millions of elite mechanical beasts are all turned into small balls, like lightning, which cut through the emptiness of the sky, and all of them have fallen into the blood basin of the giant metal dragon. Among the huge mouths..."

Card! "

"Card..."

In the next moment, the dense and extremely harsh mechanical grinding sound came, the body of the giant metal dragon more than 100 million miles, the whole form began to change. short

After a short period of time, it has been re-converted into a metal ball like a giant star. Finally, it is turned back and forth, and returned to the star field occupied by the Tianji people. In the depths, it disappeared. versus

At the same time, Tianji City was evacuated, and there were a large number of smaller metal stars laid out in the void. The half-column was not enough, and the empty space on the opposite side was one of the clear, this battle, because the emperor took the whole mechanical family, And... hurriedly closed!

Chapter 4839: Federal high-level gathering

In a short period of time, the other side of the void battlefield, which is hundreds of billions away, was completely empty. day

All the warships and mechanical beasts of the aircraft family have reached the depths of the stars beyond 100 billion miles.

The people's federal army here, after the instructions of the high-level, also quickly received troops. In a short period of time, only a small fleet responsible for patrolling was seen in the void. most

Later, even the heavenly palace, like a giant nebula, and the glorious temple like a giant continent, slowly retreated into the depths of the star, and disappeared.

Including Emperor II, he also returned to the star field with his entire mechanical family, which had been merged into a body of more than 100,000 powerful mechanical beasts...

In the distance of hundreds of billions of miles away, the scouting fleets from all major ethnic groups and forces have also left, but everything that happens here is obviously like a blockbuster, in this piece of wild land. In, quickly blasted open...

...

One day later, within the federal federal star territory, the Federal Headquarters Hall! this

At the time, there were not many figures in the hall, only about forty people.

Previously, the two camps of the Terran and the Common People in this piece of the ruins of the ruins of the heavens and the earth were built into the former Senate of the Federal Republic of China, and the three parties had only a few ancient powers to sit here.

But this time, the three major forces in the Terran Federation arrived, only the ancient powers of the past, and each of the three forces came with twelve, and together they were thirty-six.

In this way, count the few great powers that have been sitting here before. Today's Terran Federation, the ancient power is in its forties.

At the moment, the top leaders of the Federation, who are present in the hall, are the forty-one great powers. Together with the recent breakthrough to the ancient times, today is the first-class imperial emperor.

As for the six ancient ruins that the three forces have come to this time, they have not come out...

The meeting was co-chaired by the three high-level officials. Although Emperor II was the national teacher of the immortal dynasty, it is now a strong man of the ruthless world. Together with the identity of the patriarch of the celestial being, he is now present in this meeting and his status is somewhat detached. Sitting on the first side, just like the governor.

Sitting in the main position of the conference, there are three figures, which are from the glorious temples of the two camps of the Terran, and are the principals of the three major forces today. three

People are all ancient and powerful, two people, an old man with obvious vicious animal atmosphere.

Among the two ethnic groups, one is the immortal emperor of the Terran Science and Technology camp, and the other is the palace of the Heavenly Palace. There is no such thing as the old man who has a vicious animal atmosphere in his body. The lord of the temple, named 霄霄 rainbow...

"You, this battle is over, although our Terran Federation does not have much substantive damage, but the situation is not optimistic..."

The first round of the federal high-level officials in the hall looked around, the immortal emperor looked dignified, and then he took it again: "The heavenly family is more powerful, and in this battle, the emperor did not Their true heritage is so, it's worrying..."

According to the derivation, even with the newly arrived mechanical family, our Terran Federation is now only able to fight against the Tianzu people, but in fact, in addition to the Tianzu people in front, there is a magic hall behind us. Look at it..."

Yes, the magic hall is indeed a huge hidden danger..."

Next, the palace of the Heavenly Palace has never heard the words. It also looks around the crowd and then picks up: "Although I don't know what the adventure of the star of the Tianhe Star, Ye Xuan, but his real combat power and The equivalent of the Lord of the Temple can basically be affirmed..."

The Lord of the Temple, together with Ye Xuan, once they are united, the threat will not be less than the Celestial family, and it is a great threat to our Terran Federation. "

"This point, from the time the Lord of the Devils took advantage of our Terran Federation and the Celestials to fight, the opportunity to withdraw, in a short period of time, successively attacked the Alliance of the Beasts, the Star Alliance and the Alliance of Nations, and killed dozens of ancient people alone. Power, you can see one or two..."

Although I don't know what his purpose of killing so many ancient powers is, nowadays, the most powerful forces in the ancient world are only the Federation of our Terran. The high-end combat power of the Tianji people is unknown. He will not choose. For the opponent, at least it will not be clear before the bottom..."

Therefore, there is no way to prevent the magic hall. "

"In the current situation of our Terran Federation, if it is suddenly attacked by the Lord of the Devils, the Tianji people will be chaotic after the war. At that time, the situation will be dangerous."

"This matter must be taken seriously, not densely rained..."

Having said that, the lord of the glory of the temple of the glory of the glory of the glory of the glory of the glory of the glory of the glory, the jaw of the first line: "The temple has a suggestion, immediately

sent out the envoy, go to the Star Alliance and the Alliance of Nations, after all, they and our Terran Like the federation, it is also from the three major star planes of the world."

And the situation they face today is even worse than our Terran Federation..."

If we invite their seniors to come over and start the three major alliance summits and discuss the merger of the three major alliances, they should be able to start smoothly. ""

Although the powerful powers of these two major leagues have been killed, there are still nine ancient and supreme, and they must not be underestimated. If the Alliance Summit can successfully achieve the willingness to merge, a powerful behemoth will be born. Whether it is the magic hall or the heavenly family, they will not dare to act rashly..."

Speaking of this, the blazing rainbow no longer speaks, and the immortal emperor exchanges a look with the heavens and the emperor.

More than forty of the top leaders of the Alliance in the Great Hall immediately discussed each other.

This proposal makes them all stunned...

The three major alliances refer to the alliance forces from the three main stars of the world. by

The alliance of the nations of the first universe, the servants of the servants, the alliance of the stars of the second universe, and the constellation of the two camps of the Terran and the Temple of Glory.

Although the three major leagues are each battalion, they all come from the three major star planes. Now they have more common enemies, that is, the celestial and the magical halls. Therefore, it is obviously feasible to realign the alliances. and

And it is imperative. and

Moreover, once the three major leagues have successfully held hands after this summit, the overall strength of this brand new behemoth will be extremely powerful. complete

Actually, any single one of the three major leagues, the original strength has been extremely amazing...

In the aspect of the Air Alliance, with the **** war lions recently moved with bloody, Qingpeng and war lion tribes, the regular level of the alliance increased by 20 billion warships. can

Unfortunately, the original twenty-five ancient powers in the past battle with the Lord of the Devil, or squatting or descending, are now all broken, and there is no one left.

However, at the top level of combat power, there are still nine bloody, blue sky and big penguins, **** unicorns and nine sacred crocodiles, plus the **** war lions with the strongest combat power in the secret state to reach the seventh-order absurdity. Five powerful ancient sages...

Chapter 4840: Three major league summits

In the area of the Wan Clan, not long ago, the space mouse, the **** ant, the giant savage and the evil spirits of the Slim group also migrated from the family. As a result, the alliance forces increased the number of warships by 40 billion. Do not

However, the previous Lord of the Magic Temple raided, and the 24th late-stage power of the Star Alliance was also completely degraded. Today's top-level combat power is left with only four middle-aged realms. most

After that is the Terran Federation. Do not

A long time ago, with the immortal nine stars, the Heavenly Palace and the Glorious Temple at the same time, the power of the Terran Federation has skyrocketed, whether it is compared with the Star Alliance, the Alliance of Nations, or the Temple of the Ascension. Such as rolling, it is simply a big trend.

In addition to the tens of billions of warships, it is the high-end combat power, there are thirty-six in the universe, thirty-six in the ancient times, even the ancient and supreme, there are six.

Coupled with the Emperor II who had just broken through to the ruined place, the Confucian Federation now has a total of seven ruins. although

It is said that Gang and the Tianzu people have launched a big battle, losing billions of warships and warships. The alliance's strongmen have fallen into tens of billions of giants, but the real backbone has never lost a little. very

As for the emperor, with the advent of the entire mechanical family, it has also brought the overall strength of the national federation to a step...

Generally speaking, today's Terran Federation, the overall strength is definitely more than the Magic Hall, but compared with the Tianji, it is still difficult to draw conclusions, because even in the previous World War, Emperor Yi did not make the Tianji nationality more than the ancient powers The high-end combat power is revealed.

How much power is there in the entire celestial family, and how much ridiculousness there is, and it is still a huge mystery...

However, compared with the Star Alliance and the Alliance of Tens of Nations, this time the three major league summits are obviously headed by the Terran Federation...

If the peaks are discussed and the three major alliances are combined into a new behemoth, then at the level of conventional combat power, the total number of warships will exceed 200 billion!

At the high-end combat level, there are more than forty ancient powers and sixteen powerful ancient sages, which are difficult to determine.

The strength of the kind, whether it is with the magic hall or the Tianji family, is more than enough, and can still take the advantage! Place

I, Emperor II, the immortal emperor, the innocent, the blazing rainbow, and all the other high-powered high-level people in the Federation, all confidently full, determined that the Star Alliance and the Alliance of Nations will not refuse this time. Summit, but also with both hands in favor! This

In this case, the resolutions of the three major league summits were passed in full, and then, after the orders of the three emperors of the immortal emperor, the innocent, and the blazing blaze, the two corps fleets were opened from the Terran Federation and split. Going to the Star Alliance and the Federation of Nations...

.....Seven

After the day, the star domain where the Terran Federation is located! This

The three major league summits were held in the Federation of Terran.

After all, among the three major alliances, only the federal power of the ethnic group is the strongest, and the summit was originally initiated by the Terran Federation. The Star Alliance and the Alliance of Nations are only invited to attend the conference. Say

It's a summit. It's actually a simple high-level meeting. There isn't much room for it. After all, the days of the three major leagues are not so good. Star Alliance and the Alliance of Nations do not have to say more. Respect the ancient powers.

Even the Terran Federation, although there was no real substantial damage in the previous battle with the Celestials, it destroyed billions of warships and tens of billions of federal powerhouses in warships.

In this case, even if it is the summit of the three major leagues, the rankings are too big, and it is also awkward.

Today is the appointed meeting period.

At this moment, the Central Region of the Terran Federation is located in the hall of the Federal Headquarters, the peak of a giant life star, and the dozens of figures are visible. people

The number is the same as that of the federal high-level gathering seven days ago. It is all the wild power of the Terran Federation. In total, it is in its early forties, in addition to the Emperor II who has just broken through to the abandonment.

As for the other six ancient ruins of the Terran Federation, this time there is still no appearance. It is said that there are more important things towing.

Therefore, this time the three major league summits, the main representative of the Federation of the Terran Federation, is still the emperor, the immortal emperor, the heavenly palace, the master of the palace and the glory of the temple, the blazing singer, four people...

"call out!"

"Hey..."

A faint sound broke through the air, and suddenly there were four figures spurred out of the atmosphere of the star of the National Assembly. four

The figure of the Tao is from the body shape, but the body has a scent of a beast that is thick and can't be opened. Obviously, the form of the human race today is only changed.

These four figures are the four ancient supremes from the Alliance of Ten Nations.

The four major ethnic groups, such as the Hell ants, the space mouse, the giant fierce and the evil spirit Slime, from the first universe of slaves, are all in the midst of the Middle Ages. most

The weak, the fourth-order for this situation, the strongest, is the sixth-order for this. this

At this moment, these four ridiculous old monsters from the alliance of the Wan nationality, the look on their faces are not very good-looking, even the atmosphere of the body, the faint, can feel a forcibly suppressed angercomplete

Actually, not long ago, they had just been abused by the Lord of the Devils. At that time, the **** big bag that was covered with sputum was only rectified two or three days ago, and it was restored. more

What's more, in addition to these, the twenty-four ancient powers of the Wan National League are killed by the Lord of the Devils, and today the three major league summits, the entire starry alliance, Only the four people who were so lonely were coming over, and it was really shabby.

Everything came to my heart, and they provoked the resentment of the Lord of the Devil, and the look on the face could look good. Look

In this scene, Emperor II, the immortal emperor, the innocent and the blazing rainbow, the four exchanged their eyes and exchanged their eyes, and when they got up, they put up a smile on their faces and stepped outside the hall of the Alliance headquarters. Go. temple

The ancient powers of the more than forty people's federations have also come together. "

Four friends have come to visit, the old man has never been far away, rude, rude..."

Although Emperor II's identity is only the national teacher of the immortal dynasty of the Terran Federation's science and technology camp, he is the most powerful presence among the top federal leaders, not to mention the identity of a mechanical patriarch, so the group walked out. After the hall, he picked up his fists.

With a smile, the four ridiculous old geeks who came from the heights of the sky greeted each other, showing their politeness and enthusiasm. Such as

Therefore, the look of the faces of the four ridiculous geeks from the Wan Clan League was slightly relieved, and they took a face and squeezed an ugly smile, which was a response.

The atmosphere between the guest and the host has been harmoniously many times...
