Chapter 4881: Two kings shot

"Can't you hide it?"

After a sigh of relief, seeing Emperor Yi did not show up, Ye Xuan suddenly sneered, and roared again: "If this is the case, then I will send you a face-to-face ceremony..."

The words have just fallen, and the three kings of blood and sea, the emptiness of the king and the blood-mosquito king, have an action.

The former took a step, and looked up and shouted: "Emperor... roll out!"

With the roar of the roar, the logo of the soldier's scoop at the chest of the Nether King suddenly stunned and radiant...

At this moment, the tens of millions of soldiers in the thousands of hive nodes in the Void battle, all under the emptiness of the Nether King, all of them launched an action, a total of thousands of honeycomb nodes of three kilometers in diameter, each inside At this moment, there are tens of thousands of emptiness soldiers stationed, fully motivating the biological wave frequency unique to the soldiers. This

These unique biological wave frequencies, guided by the scoop in each hive node, are uniformly conducted out, thousands of honeycomb nodes, and there are thousands of biological wave currents like the river.

All along the pipeline, flocked to the core nodes of the core circle, and then gathered together for one. In the end, with the sudden roar of the Nether King, this horrible mysterious creature wave frequency, like a tsunami, from his mouth, instant comprehensive Let it go..."

Hey! "

"Hey..."

An invisible shock wave roared away. This horrible biological wave frequency directly caused a dense and faint tremor in the void, and its effect far exceeded that of a large number of emptiness oscillators. movement. this

There is even an illusion, and the entire vast expanse of the starry field is trembled under the sudden high-frequency humming.

Then, the mysterious wave energy that is completely concentrated into one is instantly poured out...

"Hey!"

The horror of the horror that was enough to tear the sky, and all of them temporarily deaf, this feeling is far more shocking than the deafening of the huge explosion.

In the distance, countless intelligent robots have widened their eyes, and in front of the void in the line of sight, there is clearly an invisible tidal wave like a sea of stars, which has become a raging sea with the anger of the Nether King. The invisible power, in an instant, will completely cover the vast void of hundreds of millions of miles in front of the Nether King!

"哧啦啦....."

boom! "

"Booming..."

The sound of clear cracks like rain is overwhelming, the vast void of hundreds of millions of miles away, the moment of tearing, a lot of emptiness and turbulence, several large voids, a lot of voids The turbulent flow directly formed a hollow vortex like a black hole. original

The numerous warships and mechanical beasts that have been placed in this area are under the impact of the endless storms raging in the vortex of the void. It is like a paper-like general, ruining and ruining.

A blow, to be precise, the Void King just shouted a roar, and the Tianji family lost billions of warships and mechanical beasts. This scene is like Tianwei's raging, whoever looks, must The spirits are shaking...

However, it is only the loss of billions of warships and mechanical beasts. For the Tianji people whose entire mechanical army exceeds 100 billion, it is really nothing.

The vast void of the empty sky, which was emptied by the sky, was quickly filled again by a large number of mechanical beasts and warships swarming. And

The counterattack of the Tianji national machinery army has also started..."

boom! "

"Booming..."

Oh..."

Almost at the same moment, countless roads roared in all directions, and all the mechanical beasts and battleships were fired.

The buzzing sounds and the thunder and thunder, some open the naval guns, the numerous energy guns of the naval guns are intertwined, and some are the stalwart army of the beast form, spurting the sharp edges of the body and so on. Physical attack.

Some of the beasts and beasts have changed rapidly and become a metal ball like a meteor. With a devastating trend, they have come and launched suicide attacks.

The kind of offensive, in all directions, hundreds of millions of miles away, magnificent, terrible. but

Ye Xuan's three **** seas are still unmoving. His opponent is Emperor Yi, and he has not put this countless mechanical army in his eyes.

Even the emptiness of the sky, who had just sent out a snarling sky, retreated.

At this time, the step is to go out, it is the blood mosquito king. blood

In the chest of the mosquito king, it is a **** mosquito...

The color of the mosquito war is a dark red color that is black, like dry blood, giving people a heavy sense of oppression.

The whole **** mosquito battle is not cold, but there is really nothing unusual. It is exactly the same as the other three battles, but the core node of the smallest ninth circle on the inner side of the bell is different from the other thousands of honeycomb nodes. The first half of the core node is densely covered with a sharp and sharp alloy thorn. At first glance, this core node is like a huge alloy hedgehog...

Although the core node with a diameter of three kilometers is only covered with alloy thorns on the side of the bell mouth, the number is extremely amazing, and the arrangement is too dense. After the last transformation, the total number exceeded 100 billion... ..and

The hardness of these alloy thorns is also extremely amazing, more than several times the 100,000-meter diameter Star Fortress main keel material!

It is made by the incorporation of a special mineral or crystal. Each root has a length of a hundred feet. If it is projected as a spear, at a certain speed, it will be worn by a warship or even a fortress or a starry fortress. Like this...this

Some of the nearly tens of thousands of special alloy thorns are tailor-made for the forging system according to certain characteristics of the mosquito family.

Among the four major wars in the four kings, the Void War has the power of the void, and the sorrowful warfare is screaming and screaming, and the years of war are even more horrible, and can send out the tides related to the law of the universe. This

The power of the three battles is invisible, and there is only one void in the void battle, and there is only a horrible noise that can make the soul scream!

The tides of the years inspired by the years of war, in fact, are also an invisible law force, only in the outbreak, the slightly golden Jin Mang flashed away...

There is a **** mosquito, and its attack should be related to the nearly ten million special alloy thorns. It is the only one among the four major wars, the existence of a physical attack mode...

"Roar!"

"Hey..."

At this moment, with the **** mosquito king step by step, he did not hesitate, even when he looked up and roared.

At the same time as the screaming roar, the blood-mosquito king's chest is also like a hive. There are countless densely packed pores. An invisible blood-colored mosquito squirts out through the three blood seas and the void. The huge body of the king, toward the surrounding, dissipated at a rapid speed...

Chapter 4882: Raging the sky

Blood Mosquito has two attack modes, normal mode and burst mode!

In the normal mode, the powerful blow generated by the unique bio-wave frequency of the tens of thousands of murderous beasts can make all the close attacks, including regular physical attacks, and unconventional energy attacks, instantly retreat.

Moreover, the retrospective in the state of acceleration is like being repelled by an invisible shock wave. and

In the burst mode, the same kinetic energy, there will also be an invisible shock wave formation, but this attack mode has nearly ten million special alloy thorns densely attached to the front side of the core honeycomb node.

To put it bluntly, it is to use these special alloy thorns to accelerate the power of the mosquitoes and beasts. It is far beyond the horror speed of the general guns.

Oh..." this

Engraved, as the blood-mosquito king took out, and looked up and screamed in the sky, in his chest, there was a violent high-frequency tremor sound generated by the mosquitoes flapping their wings. war

The tens of thousands of murderous beasts at the same time roared and shouted, and if they all constrained the power of this high-frequency vibration, and gathered together, gathered from the honeycomb nodes to the core nodes of the ninth lap, and If it is a divergent expansion...

I am afraid that this large piece of void will be disturbed at this moment!

At this time, if you can see the situation inside the chest of the blood mosquito, you can find an invisible shock wave from the huge bell mouth of the **** mosquito. in

After the increase of the special form of the war, after the outer ring of the largest diameter of the war, the invisible shock wave has already blown the void. its

The speed has reached the extreme. When the blast is gone, there is a layer of invisible ripples in the void that is similar to the fine fish scales on the water. The blink of an eye is tens of millions of miles, and the ship is rushing to the front. Gun energy beam, and countless mechanical beasts... frontal contact!

"call out!"

"call out!""

call out....."

At this moment, a sharp and unpredictable sound of breaking the sky suddenly became a masterpiece. Under the invisible faint **** ripples, the guns were touched by the energy beam of the gun, or the mechanical beast...

Without exception, all of them suddenly stagnate, and then they seem to have been subjected to some kind of more powerful anti-thrust. They all turned around and rushed back, and they spurred back in a state of sustained acceleration. It's almost twice as fast as it came! only

Less than half a second, they blasted to the battleships and fortresses that had just shot them out. Those changes in shape, turned into a metal bead like a meteor, and they were rewinding. On the way back, I don't know how many battleships and mechanical beasts have been shattered..."

boom! ""

boom! ”

"Booming..." Giant

The loud sound of the explosion came in an instant, one after another, densely and loudly, and there was a huge fireball in the void in the vicinity of nearly 10 billion miles.

All this is too eye-catching, and there are hardly any warships and mechanical beasts that can avoid this strange bombardment...

Within a billion miles, all the warships, fortresses and mechanical beasts were all bombarded and blasted into a huge fireball. The vast void of the corner was illuminated, as a large number of stars blew. , the power is shaking earth... this

One hit, five half-steps around the area where the heavens are lame, the universe void within a billion miles, once again being emptied instantaneously, and the mechanical army of the Tianji nationality, thus

the number of damaged warships and mechanical beasts, compared to the previous When the Nether King shot, it was even more amazing, at least 10 billion huge...

All of this is long-lived, in fact, it happens in just a few dozens of interest.

Dozens of interest, half a column of incense time is not up, Ye Xuan's three **** seas have not even moved a step, from beginning to end, are just a void king and blood mosquito king, each taking a step Under the anger of each other, they each issued a large-scale attack...

It is these two attacks that flocked from all directions, just like the Tianji national army that directly drowned the five half-step Tiandao strongmen who came here, but they were instantly emptied of tens of billions of emptiness in the sky... ..

Twice, in such a vast void, all the heavenly warships, fortresses, and various mechanical beasts, without exception, were all destroyed. short

When the short half of the column is fragrant, the loss is close to 20 billion... No

Wrong, the warships of the Tianji nationality, the mechanical beasts, etc. are indeed not true tribes, and it is like how much money is needed.

After all, this vast expanse of hundreds of billions of miles of stars, countless abandoned stars, have now been built into the battleships, fortresses and mechanical beasts of the Tianzu people... but

Now, in just a few dozens of places, nearly 20 billion warships, fortresses and mechanical beasts have been destroyed. To this extent, they still can't afford it.

Although today's Tianji people are far from being comparable, they came to the emptiness of this piece of land, after all, it was only two years. root

The base is still a little shallow, the foundation is not too rich, and absolutely cannot withstand the loss of this horror...

What's more, they paid such a heavy price, and the horror of the five half-steps of this coming, but only two of them took a step and raised their anger.

The three **** seas have not even been shot, and the body shape has not been shaken...

This is even more embarrassing. Even the patriarch of the Tianji nationality, the Emperor Yi, is completely unconcerned about the loss of conventional combat power that is not a real tribe. In the face of this embarrassing battle, I am afraid I can't hold it anymore. Continue to sit on the Diaoyutai...

This point, Ye Xuan knows well, the reason why he did not immediately look for the whereabouts of Emperor Yi after the advent, but let the Nether King and the blood mosquito King shot, but also out of helpless.

Emperor Yi is a mechanical and electronic life. He is not a flesh-and-blood creature. He has no knowledge of God. He is afraid that he will search by God and spiritual power, and there will be no result.

What's more, he can even enter any mechanical and electronic equipment. It is too pretentious. Instead of trying to find it, it is better to let the Nether King and the Blood Mosquito King launch this range of attacks, raging the entire base of the Tianji Nationality. In a way, force him out and take the initiative to show up!

Even if Emperor Yi saw the purpose of Ye Xuan, it does not matter. Here is the base camp of the Tianji nationality. Emperor Yi is the passive side. As long as he does not show up, the Nether King and the Blood Mosquito King will continue to raging. can

It is said that this is a conspiracy, and the emperor is helpless, and he will be forced to show up sooner or later. very

Apparently, Ye Xuan's plan is correct, because after the two horrific offensives, the farthest distance of the vast galaxies two or three billion miles away, suddenly there was a terrifying roar, Ye Xuan. The purpose of reaching it...

Chapter 4883: Metal magic dragon

Yes, with the Nether King and the Blood Mosquito King successively shot, within a few dozens of interest, twice emptying the vast voids of tens of billions of miles around, bombing nearly 20 billion days of warships, fortresses and A kind of mechanical beast, the emperor of the celestial family who had never been moving, could not sit still.

Forced to take the initiative to show up..."

Roar! "before

At the farthest point of the vast expanse of the two or three hundred billion miles away, suddenly there was a terrifying roar. As the roar rang, a glimpse of the distant sight came from the far end.

The speed is almost at its peak. The battleships, fortresses and mechanical beasts of various sizes and sizes along the way have all been taken away, giving way to a frank star road, which has already reached the opposite side of the 100 billion miles. . to

Steep in the void, abruptly stopped. This

It is a giant mechanical star, Pangda is 100 million miles tall, and it is a few laps larger than Ye Xuan's three blood seas. It is now a long-time reborn, far from the core of the comparable Tianji family. Tianji City!

As the core of the Tianji clan, Tianji City had two forms in the three major star-space planes of the world. One

This kind of giant mechanical star-like battle state, like the giant star-studded giant plug, can move freely and flexibly.

One is the mechanical continent that turns into a void, which is the conventional form.

Nowadays, after the transformation of Emperor for more than a year, in addition to the two forms of the original, the current Tianji City, there are two other forms of warheads, which can be transformed into a demon dragon and a demon dragon! "

Oh..."

"Card..."

At this time, with the raging of the Tianji City, the metal ball that was abruptly stopped in the sky thousands of miles away seemed to be alive, and there was a sudden low humming sound inside...

There is also a dense sound of the sound of the card, as if there are countless mechanical gears in the rotation and running, and with the abnormal sound of the card, this huge metal ball is also rapidly changing shape... ..

In all parts of the ball, there are some protrusions that stretch out.

If you don't get enough interest, you will turn into a black-and-black dragon. The body is extremely large. It is nearly 200 million miles away. It is more than the volume of the previous sphere. It is the ninth change of Ye Xuan in the konjac. Next, it is a few laps smaller than it.

What's even more amazing is that this blue-black dragon has a dazzling metallic luster and is extremely glaring. This is clearly a metal magic dragon made of metal composite material...

"call out!""

Oh..."

Almost in the next moment of the appearance of this metal dragon, the virtual air outside the 100 billion miles, and again, countless sounds of breaking.

Looking forward, from this metal magic dragon and huge and huge blood basin wide mouth, suddenly there is a mile, and the land continues to rush out, its momentum is huge, the number is overwhelming, there are thousands of giants. This

The scene is like a demon dragon spit beads, beautiful and spectacular, and these tiny mans from the mouth of the dragon, the initial is just a tiny metal ball.

The surface is covered with metallic luster of different colors, but soon, after these tiny metal **** are abruptly stopped in the void, the inside also has a low humming sound and a mechanical sound of the card. make

A scene of shocked people appeared, accompanied by these abnormal sounds, the shape of the ball also changed rapidly...

In just a few dozens of interest, it has become a star-shaped beast with different shapes. It has a huge size of thousands of miles, and small stars are generally huge. As for its form, there are no exceptions, all of which are strange and embarrassing.

More than 10 million large mechanical beasts, each with different characteristics of beasts, have a faint metallic luster on the surface, just like a mechanical beast with different heads. in

The sky in the hundreds of billions of Liaoda, where the Tianji National Base Camp is located, originally had a large number of mechanical beasts. The number was too large to be counted. It was just the two shots of the Nether King and the Blood Mosquito King. In the battlefield of nearly two million days, there are at least billions of mechanical beasts in various forms...but

These mechanical beasts that appear today are completely different from those of mechanical beasts. This

More than 10 million mechanical beasts, the atmosphere emitted by the body is terrible, at least in the immortality of the emperor, basically the emperor is immortal!

And some of the more large-scale existence, the breath that comes out, has reached the universe supreme, the Lord of the universe and the universe supreme... No

Wrong, more than one million mechanical beasts are the real people of the Tianji nationality who truly have electronic consciousness. Like the emperor and the emperor, and the more than 100 million mechanical tribes under the emperor's two, they are all real mechanical and electronic life...

At this moment, with the changes of more than tens of thousands of mechanical beasts, the numerous warships, fortresses and mechanical beasts in the surrounding air were all quiet, and they gathered together into a mechanical army, but they I dare not approach, but all retreat to the outer periphery of the emptiness beyond 100 billion miles. and

Within one hundred billion miles of inner air, Ye Xuan's five avatars stand in the central domain. Correct

Faces, more than 10 million heads of different sizes, but all of them are more than 10 million miles, and the mechanical beasts that are at least in the atmosphere of the emperor, are incomparably gathered together, occupying a vast void. It's swayed and spread. in

In front of the center of this horror mechanical warrior army, a black metal magic dragon with a length of 200 million miles is vacant, and its shape is slowly moving, revealing an invisible pressure.

Although extremely embarrassing, it is not weaker than any of the five avatars in the emptiness of the sky. It is clear that the repairing strength of the metal magic dragon has reached the great success of the eternal nine-order.

Moreover, considering that the metal magic dragon was originally the Tianji City, its internal space is vast and innocent, just like a small world, so there is definitely more than one emperor in the body.

Therefore, the repairing atmosphere of the metal dragon inside the body is also a half-step heavenly road of the ruthless and supreme ninth order, but what it represents is not a half-step heaven, at least several...

For this reason, the main lord of the magic hall, Ye Xuan, descended on the Tianji family's star field. As soon as he came, the five-and-a-half-step avenues of the heavenly dynasty were lined up, squatting in the void, crouching in the metal dragon's body, the emperor, clearly There is no fear. no

In the shape, within the pressure of the diffusion of the dragon's body, there is even a violent scent of the cold and brutal to the extreme, as if you want to choose people and numb, it is shocking...

"Roar!"

At this moment, opposite the 100 billion-mile-long, the huge black metal magic dragon with a huge size of 200 million miles suddenly burst into a roar of hair, the atmosphere is too violent, the invisible force is raging, and within a few hundred million miles, a large number The stars blasted and exploded. This power, the heavens and the earth were shocked and shook a little...

Chapter 4884: Three enemy six

"Roar.....""

These two scorpion-winged beasts should be the products of the mechanical family's scorpion-winged beast, which was broken down by you once? "this

At that time, as the Tianji City descended, it changed into a giant black dragon form of battle. Then, more than 10 million real Tianzu ethnic groups were ejected from the mouth, and they were transformed into mechanical beasts of various shapes. emperor

The voice of God's thoughts, after a scream of anger, snorted: "After completing a decomposition, it is still able to maintain the peak of the ruins of the ancient ruins. You can see that you have incorporated new elements."

"From the two bombardments of Shicai, it seems that it is familiar, similar to the attack of the four star wars in your hands..."

If there are no accidents, the body of these two scorpion-winged beasts should be integrated into a war, and have a new attacking ability... Not bad! ""

It can be seen that your electronic avatar is indeed extraordinary. In a short period of time, it can be improved. It is no wonder that one of the sacred beasts that can be swallowed by the second..."

It is a pity that even so, you only have five battles of the ruthless nine-step great consummation. On this point, the strength dares to go to the celestial base camp of the deity to scatter wild... It is really too confident! "

"Hey..."

Bang..."

"Card..."

After the last sentence, the Emperor II suddenly screamed, and a rush of suffocating air, the whole piece of vast and innocent emptiness, thus trembled!

Immediately afterwards, the overwhelming thunder and the crisp and incomparable sound of mechanical jamming sounded...

Looking at it, the front of this body is full of 200 million miles of black mechanical dragon, and began to understand the body at this moment. Enter

The exhibition is very fast, short of three interest, the mechanical dragon is divided into six sections, but this is not the end, the mechanical dragons after the split into six, each section has more than 30 million miles.

But this is clearly not the limit. The noise in the void is still continuing. From the six black dragons, there are a lot of tentacles, limbs that are rapidly expanding, and even their body types are all in Rapidly expanding... again

It is the past three years, the mechanical dragon is divided into six segments of the body, the blink of an eye is different from the previous, and is completely different.

The six segments of the body have all become huge and incomparable mechanical beasts, each with a total of 50 million miles, and all of them are standing up, like six black mechanical giant bears, but all of them are sharp and sharp behind. The alloy wings, in addition to the entire body of the huge body, there are some parts, there are weak differences! more

What is amazing is that before the disintegration, the huge black dragon with a huge size of 200 million miles, the fragrance that was dispersed in the body is the nine-step great consummation.

But nowadays, after the black dragon disintegrated and turned into a giant mechanical beast with a body size of 50 million, the body's repairing atmosphere was not weakened by this.

Behind the six heads, there are mechanical beasts with huge mechanical wings. The repairs that are scattered in the body are all full of absurd ninth-order grand perfection. No one is weaker than Ye Xuan's five big avatars...only

With this in mind, it is enough to prove that there are at least six top-ranking and powerful leaders in the Tianyi tribe of Emperor Yi, and all of them are his avatars.

Even this is probably not the limit. The Emperor is extremely slippery. According to Ye Xuan's speculation, he can't show all the details now. This

The results of Ye Xuan have long been expected, but now become a fact, after seeing it in front of the eyes, the feeling is different. Do not

Needless to say, in the face of these six mechanical warfare bears with a ridiculous nine-step great perfection, even Ye Xuan has a strong sense of pressure...

With five to six, he still has no fear, but as a result, today's trip to the heavenly family has lost its meaning. This

Once he was angry, although the previous Nether King and Blood Mosquito King shot twice, destroying nearly 20 billion days of warships, stars and various mechanical beasts. but

Those who exist for Emperor Yi, how much is there, even far from being a real Tianzu ethnic group. Such as

If you are angry, just just tossing and moving away, it's too much to go back. It's too much to be a slap in the face. It's not a joke, it's not in line with Ye Xuan's temper, I'm afraid I'm going to be depressed...

However, the six emperors in front of the eyes, all have the peaks of the ruins of the ancient ruins of the ancient ruins. If Ye Xuan wants to kill, he must use the sacred bow and other supernatural powers.

Otherwise, even if the Shennong nine-color flame is sacrificed and turned into a flame sea, I am afraid that one of them cannot be killed. After all, the situation today is six to five, and people still have an advantage in terms of quantity...

These thoughts flashed through my mind, and Ye Xuan made a decision in an instant. If

It is five enemy six, which is not cheap anyway. In this case, it is better to use three enemies. three

The big blood sea is divided into two mechanical parts of the war emperor. Although it is not dominant, but in the hands of Ye Xuan's nine-color flame sea, Shennong Baoding and Baodi's power, under the hard teeth, to ensure that he is harmless, he But still can do it. Such as

As a result, the remaining two mechanical avatars, namely the Nether King and the Blood Mosquito King, can be drawn out to deal with other goals besides the Emperor's six big avatars. and

The target that Ye Xuan is aiming at is naturally not the battleships, fortresses and ordinary mechanical beasts gathered around the 100 billion miles of the void. Virtual

The goal of the Heavenly King and the Blood Mosquito King will be the official tribe of the more than 10 million Tianji people who are surrounded by the Emperor's Sixth National Congress.

We must know that the mechanical family has more than 100 million formal ethnic groups. Before the loss of more than 30 million in the war outside Xusheng, the emperor II almost collapsed. and

The official tribe of the Tianji nationality, a total of more than 10 million, with the strength of the Nether King and the blood mosquito king, suddenly shot, killing two or three million heads in a short time, still no problem.

Even if it is only two or three million heads, it is absolutely unbearable for Emperor Yi.

What's more, the Nether King and the Blood Mosquito King are Ye Xuan's electronic avatars. It is not just a simple killing of these celestial tribes with electronic life.

It can be swallowed up while fighting. Such as

This time, the trip to the Tianji Star Field is perfect, not only venting the heart, but also engulfing a large number of mechanical family electronic life, this is definitely a beautiful thing.

In addition, if the Void King and the Blood Mosquito King can really swallow the official tribe of two or three million days of the race, not only is the Emperor estimated to be mad, but it is a heavy blow to the Tianzu.

At least they can be relieved for a period of time. So, when Ye Xuan rushes to the Star Alliance and the Alliance of Heavenly Alliance, he no longer has to worry about the ghosts in the back, and take the opportunity to attack the Temple of Devil...

Chapter 4885: Counted

"Roar!"

"Roar!""

Oh..."

After the decision, Ye Xuan's three **** seas immediately screamed out of the sky and screamed, and screamed, and the void trembled a few times!

In the next moment, the three **** seas and the Nether King and the Blood Mosquito King rushed out at the same time. The five huge bodies were turned into five awns, and the speed was extremely fast. The blink of an eye has spanned several billions of emptiness... ..

"boom!"

"Booming..."

In the distance ahead, the sixteen mechanical detachments of the emperor, which were lined up in the void, also rushed out at the same time. The body violently rushed to the extreme, and Ye Xuan, the violent singer, split up and attacked.

"This war... no one can escape!"

"This temple is going to hit you up..."

"Roar!"

call out! "

"call....."

Seeing this scene, the depth of the violent glitz flashed a glimpse of the gloom, and the head screamed, and when the sound was still not falling, it suddenly waved, and a fascinating glare came out, welcoming the storm, short The semi-interest has turned into an endless flame.

Just like the screaming sound of the screaming wind, the nine-color flame sea that has just arrived is instantly diverging in all directions, the speed is too fast, the blink of an eye is endless, and the vast void of tens of billions of miles away Shrouded.

Under the flash, it turns into a spherical shape, like a giant star in flame form...

The interior of the star is hollow. Ye Xuan's five avatars are all included, including the six mechanical avatars of the Emperor, and they are all overwhelmed, and they are all shrouded in an invisible situation. a few

At the same instant, the sound of Emperor Yi sounded, and the inside of this giant flame ball like a star was inexhaustible..."

It's useless, although your nine-color flame sea is horrible, but the deity has six ridiculous nine-order great perfect mechanical avatars here, and your avatar is only five..."

Even with the power of the nine-color flame sea, you can't help the deity, let alone kill, even if it is a serious injury..."

Ye Xuan, this battle, you can't find a little cheaper, and you are destined to only lose your tail with a tail..."

Oh..." said

In the end, the six mechanical avatars of Emperor Yi all laughed, and their sound was harsh, just like the mechanical grinding, it was extremely uncomfortable! "

indeed so....."

The strange laughter has not yet fallen, and the mouth of the violent voice has already revealed the cold words of Ye Xuansen: "However, since it is not cheaper with five to six..."

"Then let's play a little bigger, let's... three to six!"

"The three bloods of the temple are separated, and you single out your two avatars..."

call out! ""

call out! "No

When I finished, the sharp sound of the air broke out, and the Nether King and the Blood Mosquito King behind the three **** seas slammed down and rushed straight to the rear. speed

Too fast, the blink of an eye has reached the side of the flame curtain in the direction behind him.

At this time, the original closed, the tens of millions of miles of emptiness completely closed on the nine-color flame curtain, there are also two channels, which are about 50 million miles, just enough to allow the void king and blood mosquito king to pass .

This is Ye Xuan deliberately, prepared, so the speed of the Nether King and the blood mosquito king is so fast, the nine-color flame curtain behind him is also perfect. blink

The work of the eye, the shape of the Nether King and the Blood Mosquito King has disappeared, and the two giant holes appearing on the nine-color flame curtain are also instantly closed.

Originally, the strength of the emperor and the six major avatars was repaired. If it was prepared for prevention, it would be able to follow the emptiness of Heaven and the King of Blood and Mosquito, and then rushed out between Jinghong.

But all this was originally unprepared. When the Emperor found out that it was wrong, everything was too late. His six avatars only shook a little. The two passages on the nine-color flame curtain disappeared...

The reason why Ye Xuan's three big blood seas did not rush out in this way. It is to ensure the smoothness of the Nether King and the Blood Mosquito King. no

Then, if there are no three big blood seas to cover and contain, the Emperor Ma, the Void King and the **** mosquitoes will rush out of the moment, the six blood seas of the Emperor Yi will be able to respond in time. eye

Next, the Nether King and the Blood Mosquito King rushed out smoothly, and Ye Xuan's purpose was reached. to

In the three **** seas, he never thought about rushing out in this way, because it was completely impossible. Once there was any change, Emperor Yi would immediately be alert, in case he let his six avatars This opportunity rushed out one or two, so all previous efforts were wasted. thing

In fact, Ye Xuan did not intend to let the three **** seas rush out. difficult

I have to fight against the strongest avatar of Emperor I, just to take advantage of this opportunity to touch his old bottom, so even if it is an enemy two, Ye Xuan will never miss it, so give up! "

Roar! "

"Roar!""

Roar.....""

Damn, the deity counts! Ye Xuan, what do you want? "

At this time, with the sky king and the blood mosquito king retreating, the blink of an eye disappeared, leaving the banned space formed by this nine-color flame sea. Correct

The emperor of the face finally realized that it was not good. The mechanical parts of the six Panda's 50 million miles were screaming at the same time, the breath was too violent, and the roaring roar was enclosed in a fixed space. If the nine-color flame sea does not have If you buffer and absorb the properties of energy, I am afraid that this huge flame ball will be blown up at this time!

"There is nothing, the Nether King and the Blood Mosquito King are idle at any time, just going out for a moment to be your official family of more than 10 million days."

His arrogant voice has not yet fallen, and the violent voice has already made a sound, but the tone of voice has revealed a feeling of incomprehensibility, fluttering, as if to say a trivial little thing: "Of course, if there is a chance, By the way, a crazy devour, that's okay..."

"After all, the Nether King and the Blood Mosquito King are also electronic life. When they encounter the same kind of existence, they will be swallowed up, and it must be smoother."

"The only pity is that the official tribe of your family seems to be a little too little, only more than 10 million. It sounds like it is not too swallowing..."

"Roar!"

Oh..." said

As soon as the words fell, the three **** seas screamed at the same time. shock

At the same time as the screams of the sky screamed, the flesh and blood were violently turned over, and the right hand suddenly had a **** stick.

The side of the cheekbones is also a strange smile, between the hands, actually took Shennong Baoding out, one hand down one of the three tripods, raised his head and directly picked it up.

As for the last black fog, the whole figure disappeared instantly in the middle of the gloom. again

When it appeared, it was already behind the emperor's six mechanical avatars.

Without hesitation, he punched his fists in the first place and slammed it out.

"boom!"

Rumble..." This

A punch, directly blasted in the back of the mechanical vest, the shock of the shock came, and this punch, also kicked off the prelude of the war, the six major mechanical avatars of Emperor Yi, and Ye Xuan's three major Blood and sea are separated, and in a moment they are caught in a crazy melee...

Chapter 4886: Crazy devour

"Roar!"

"Hey..."

In the roar of the sky, Ye Xuan's three **** seas have movements at the same time, one with a **** stick and one with a Shennong Baoding. One is like a ghost, and the figure disappears, directly to an emperor. behind. "

boom! "

"Booming..."

A fist hit, directly squatting in the back of the mechanical vest, the shocking sound of the shock also came...

It was this fist that opened the prelude to the war. The six mechanical divisions of Emperor Yi and the three **** seas of Ye Xuan were caught in a crazy scuffle in an instant. At the beginning, they were in full swing... ...versus

At the same time, outside the enclosed space formed by the nine-color flame ball, the core of the star domain where the Tianji family is located...

Without the command of Emperor Yi, whether it is a hundred billion miles away, it is like a vast ocean of warships, fortresses and ordinary mechanical beasts. also

It is a high-level mechanical beast that has been formed by the official group of more than 10 million Tianji people in this imaginary sky that has gathered within a hundred billion miles...

Without exception, there is no change! original

Ben, if there is no accident, the next battle has nothing to do with them. The six mechanical divisions of Emperor Yi and Ye Xuan's five avatars fought, and the official tribes and countless warships of these celestial families did not participate at all. qualifications.

The only thing they can do is to wait around the battlefield and make a wall view!

But now, with Ye Xuan's two electronic avatars, that is, the Nether King and the Blood Mosquito King rushed out of the nine-color flame ball with lightning speed, all of which was obviously changed in an instant...

"call out!"

"咻..."

The sharp sound of the empty sound, the corner of the giant nine-color flame ball with a diameter of tens of billions, suddenly two faint volleys emerged.

These two sacred princes are the emptiness of the king and the blood-mosquito king. They were originally very weak, but when they appeared, they greeted the storm. When the short-term stagnation was less than the emptiness, the two sides were all 50 million. The giant winged beast in the sky. "

Roar! ""

Oh..."

As the figure appeared, the Nether King and the Blood Mosquito King suddenly gave up a terrifying roar, followed by a glimpse of the coldness, and the shoulders shook, and instantly they gathered more than 10 million miles away from the front. The official tribe of the Tianji nationality rushed over, and the blink of an eye has already arrived...

Seeing this scene, the official group of more than tens of thousands of Tianji who gathered in the sky beyond the tens of billions of miles away was instantly paralyzed. he

Although the number of them is more than 10 million, and the strength is also quite extraordinary, the weakest existence is also immortal...

But even if it is the most powerful of them, the cultivation of strength is only the universe to the supremacy...this

One point is normal. As the patriarch of the Tianzu nationality, Emperor Yi has used almost all his energy to forge his own avatar and constantly improve his cultivation.

Even if it is a little leisurely, it is only a command of more than a million people of the Tianji nationality. As far as possible, they will develop warships, fortresses, and ordinary mechanical beasts in the family, and constantly improve the overall combat power of the Tianji people.

Of course, for more than a million formal people with electronic life, he is not without the effort to help them forge the body, and constantly improve and enhance the strength of the body. but

The energy invested in this level is obviously not too much. because

In his view, there is absolutely no need to make the more than a million formal ethnic groups all the same as the abandonment of their own. One

The aspect is that it is simply impossible. The number of more than 10 million is too large, and there is no such thing as a top-grade forging material.

On the other hand, it is completely unnecessary, because if in certain circumstances, it is necessary to upgrade the strength of the more than 10 million formal ethnic groups, he can fully transform into a million, and directly integrate into this thousand In the case of the tens of thousands of formal people, this is naturally cultivated as a strength.

Even if it is Emperor Yi, I never thought that this would happen at the moment. he

As a patriarch, he was trapped by a huge flame ball formed by a nine-color flame sea, and his more than 10 million Tianzu official tribes were left outside the nine-color flame ball...

Today, with more than a million formal ethnic groups, the strongest is only the universe, and even the overall strength of the ancient powers, coupled with the loss of the unified dispatch command of the Emperor. This

More than 10 million formal tribes have faced the horror of the 9th-order grand perfection of the emptiness of the Heavenly King and the Bloody Mosquito. It is no different from the tiger that the newborn lamb has encountered down the mountain...

At this point, it is clear that the more than tens of thousands of Tianzu ethnic groups gathered in the front of the sky.

They are not ordinary mechanical beasts who crouched around the imaginary one hundred billion miles away. They are the official tribes of the celestial family. They belong to the same mechanical and electronic life as the emperor and the emperor. They are intelligent and self-conscious. And the existence of thought. positive

Because of this, I now see the Nether King and the Blood Mosquito King suddenly appear, and the first time I rushed to the place where the army gathered here... This

After the short-lived stagnation of the formal ethnic group of more than 10 million Tianji, all of them were shocked and screamed, and they screamed and screamed, showing endless panic and fear.

"boom!"

Rumble..."

More than a hundred million miles of empty space, for the emptiness of the nine-order grand perfection of the Nether King and blood mosquito king, it is not a matter of time. With

They are fully urging the strength of the body, and they are moving at a rapid speed. They just rushed to the front of this celestial army.

There is no suspense in the following. The high-level mechanical beasts that were originally formed by more than 10 million Tianzu nationality tribes, which were originally gathered together, were scattered at first sight, like a dog at home, and wished to fly away immediately. This piece of emptiness will escape. Virtual

The Emperor and the Blood Mosquito King also shot at the same time. This time they did not push into the body, the Void War and the Blood Mosquito La in the chest, but directly with a pair of hard alloy fists, and the pair behind them. The sharp-edged wing-like wings attacked.

The thunderous rumbling of the rumble came out, and the corner of the sky was trembled fiercely. This was a one-sided slaughter. A large number of mechanical beasts exploded, but in the future they became a fireball explosion, followed by the first In the time, the empty pot of the alloy material was opened by the Nether King and the Blood Mosquito King, and swallowed in the abdomen.

This scene looks exactly the same as the real beast wars. The emptiness of the Heavenly King and the Blood Mosquito King is only the body of these mechanical beasts made of cosmic alloys and some ancient creatures. but

In fact, their electronic consciousness is also within these shells. Even if they are dispersed again, they will eventually be swept away by the Nether King and the Blood Mosquito King, directly refining...

And this kind of refining, for the formal people of these celestial families, is the demise of consciousness, that is... the real fall!

Chapter 4887: Hate

"boom!"

"Hey!"

"Booming"

At the same time, the Emperor and the Blood Mosquito King shot with a pair of hard and incomparable alloy giant fists, as well as the pair of winged wings that are like a sharp blade.

The thunder of the rumble was ringing, and the corner of the sky was shaking violently!

This is definitely a one-sided slaughter, a large number of mechanical warfare body blasts, but it will turn into a fireball explosion in the future...

In the first time, the empty blood king and the blood mosquito king opened the **** mouth of the alloy material, swallowed the abdomen, refining it, and thus the consciousness died, and it was completely degraded!

The formal tribes of the more than tens of thousands of Tianji people, who have been cultivated as the strongest, are only the only places in the universe, and there is no such thing as a wild power. Say

It's hard to hear that for the Nether King and the Blood Mosquito King, they are not even as good as the ants!

It's just a raging, one shot, just less than ten, and the Nether King and the Blood Mosquito King have swallowed five or six hundred thousand each. Together, it's more than one million, and if this is a great army one tenth.....

This is because after the bombing, all of them have to be swallowed in one bite. Otherwise, if it is just a simple bombing, I am afraid that within ten minutes, even one-third of the official tribe of the tens of thousands of Tianji people will stay. Not down.

Ye Xuan's previous goal of engulfing was about two or three million, which is why. One

The formal tribes of more than tens of thousands of Tianji people don't sound much, they don't kill at all, but if they are not swallowed immediately after a full-scale bombing, then the scattered electronic consciousness in their bodies will soon dissipate, so Come, it is just a waste, obviously not to be taken. rather

May be slower to kill, less to kill, must be guaranteed to kill a little swallow a bit, kill how much to swallow. where

It is worthwhile to escape most of the time. At least the next time there is still a chance to swallow again, and this piece of land is in the void, this mechatronic life is only the mechanical family of Emperor II and the heavenly family of Emperor Yi. There is no third home. leaf

Xuan's electronic avatars, which are the four great kings, have long regarded them as mechanized electronic materials that will be swallowed up in the future. They will always be swallowed sooner or later, so now they would rather let go and never waste...

"Hey!"

"boom....."

Rumble..."

In the air, the earth-shattering bang is continuing, and it's all around...

The 100-mile-long void of the color flame ball is completely transformed into a mechanical hell. The more than 10 million people of the Tianji nationality fled, and the Nether King and the Blood Mosquito King are calmly chasing after them. . where

Fear of being a real hunting, they are absolutely not so easy and freehand. Their speed is not fast. They walk in the void, kill a small scorpion, and immediately open their mouths and swallow their stomachs. Time is thoroughly refining...that

These mechanical shells, made of cosmic alloys and various flesh-and-blood materials, are reincorporated and integrated into the body to enhance the strength of the shell.

The electronic consciousness dispersed in the body of these damaged machines is directly refining and refining by the electronic consciousness of the Nether King and the Blood Mosquito King. It is like a swallowing and integration, and strengthens their electronic consciousness...

All in all, there is no waste at all, and it is fully absorbed!

A blink of an eye, and dozens of interest has passed.

Since the formal tribes of the tens of thousands of celestial beings have fled, the density scattered in the void under the overall proliferation has fallen sharply. Therefore, in the past, the Nether King and the Blood Mosquito King have not stopped for a moment. However, the two only swallowed about six or seven hundred thousand respectively. plus

Together, it is more than one hundred and fifty thousand.

If we count the more than one million that we swallowed before, from the beginning to the present, the total number of the official ethnic groups of the Heavenly Kingdom, which was swallowed up by the Nether King and the Blood Mosquito King, has exceeded three million.

The official tribe of the Tianji nationality, totaling more than 13 million, is now swallowed by more than three million in a short half-column time, and the remaining tribes are also tens of millions.

Losing more than 20%, it's so heavy...not

At this time, at this time, the remaining 10 million formal ethnic groups have basically spread around and opened, and the vast void of the 100-mile-long distance of the nine-color flame ball can be seen everywhere. very

Some of them have already rushed out of this 100 billion-mile range, and they have been integrated into the ocean of large-scale warships, star plugs, and ordinary mechanical beasts. Such as

As a result, it is obviously not realistic to want to swallow it in high efficiency.

But the mosquito legs are small and meat, even if it is eaten a little bit, the Nether King and the Blood Mosquito King will not be disgusted, and it is even more likely that they will easily let go of such an opportunity.

"Roar!"

"Hey..."

After each screaming and screaming, the Nether King and the Blood Mosquito King swayed, and instantly rushed to the left and right directions, once again launched a crazy devouring.....

...

At the same time, the nine-color flame ball with a diameter of tens of billions of meters is enclosed in the space...

Everything outside the closed space of the ball is long-lived, but it happens in a short period of half-column. If it is calculated, it will not even be a hundred before and after. but

It was this time that was not enough. The original group of more than 13 million Tianji people, but it was reduced to 10 million hanging zeros, lost more than three million heads, more than 20%, close to 30%...
...Correct

For all of this, the Emperor, who is the patriarch of the Tianji nationality, was naturally the first to be sensed.

Although the nine-color flame sea completely banned the vast void of tens of billions of miles, this ban is aimed at the flesh and blood, or the alloy shell of the heavenly family.

Even the gods and souls of flesh and blood can be banned for more than half, and suppressed on a large scale. but

The celestial family is different. The unique wave frequency emitted by their electronic consciousness is, in a certain sense, different from the starry zerg, and the endless stream of zerg is similar.

Even if it is a nine-color flame sea, although it can be suppressed, it cannot be completely blocked.
positive

Because of this, for everything that happened outside the world, as the emperor of the patriarch of the Tianji nationality, it is natural that there is no detail, and the insight is clear. One

I thought that in this short period of less than one hundred interest, the official ethnic group of the Tianji nationality who has left behind has lost more than three million, and only 10 million of the remaining ones have been hanged. He has a hateful anger in an instant. Mad, almost mad feeling.

"Roar!"

Oh..."

Ye Xuan, you **** guy, everything today, you will pay the price..."

At this moment, the six mechanical avatars of Emperor Yi almost looked up at the same time, and they made a terrible roar, and the arrogance of endless resentment and anger was resounding.

The roaring sound has not yet fallen, and one of the mechanical avatars suddenly turned and rushed to the flame curtain on the right side...

Chapter 4888: Incarnation

In the time when only one hundred yuan was not available, the original tribe of the Tianji nationality, which was originally more than 13 million yuan, was reduced to ten thousand. damage

Lost more than three million heads, more than 20%, close to 30%...

For all of this, the Emperor, who is the patriarch of the Tianji nationality, was naturally the first to be sensed. "

Roar! ""

Oh..."

Ye Xuan, you **** guy, everything today, you will pay the price..."

Under the wrath of the heart, the six mechanical avatars of Emperor Yi also raised their heads at the same time, and they made a horrible roar, and the arrogance of endless resentment and anger was resounding. cage

The nine-color flame ball with a tens of billions of miles in the emptiness of the hood has shook slightly...

After all, it is the scream of six half-steps, and the momentum is too amazing.

"call out....."

In the next moment, the roaring roar of the nine-color flame ball has not yet fallen. One of the mechanical avatars suddenly turned and rushed to the flame curtain on the right. Look

In this scene, the violent chilling flashes, and then rushes out and wants to intercept. although

However, Ye Xuan did not know what the mechanical division of Emperor Yi had to do, but suddenly there was such an unexpected move, and even at this critical moment, anyone can think of nothing good.

The Emperor was blackmailed, and this mechanical detachment suddenly rushed out, and it was the half-step heavenly path of the ruthless supreme ninth order. In any respect, Ye Xuan had to defend..."

Where to go..."

call....."

"Booming!"

With a drink, Ye Xuan turned his right hand, and the **** stick behind him dragged himself to the top and slammed it toward the front.

The power is too violent, and the void has a thunderous thunder, and the atmosphere is full of shocks.

At this time, the mechanical division of Emperor Yi, just rushed to the inside of the right side of the nine-color flame ball, from the nine-color flame curtain, but only about 100 million miles away.

Surprisingly, with the violent stick falling, the original positive speed, as if you want to risk the mechanical detachment through the flame curtain, but suddenly turned around and looked over.

At the same time as the figure came to an abrupt end, he even smiled and screamed at Ye Xuan.

"Boom!"

At one moment, the violent brows wrinkled, and the heart felt a little bad, but the movements in the hands did not stop. The sorghum over the top of the **** sticks, like the scorpion slamming, squatting in the emperor Mechanically split shoulders. shock

According to Ye Xuan's estimation, this stick went down, even if it was a porcelain, at most, it was only the mechanical part of Emperor Yi's mechanical avatar in the void, slightly hurt. . Of course

The fact is obviously not the case. At the same time, the horror of the Emperor Yi was completely blown up. The huge horror figure of Pangda's 50 million miles was completely cracked and turned into a huge one. The fireball slammed into the nine-color flame screen on the right side of the billion miles.

Everything happened too fast, and this kind of action is inconsistent with common sense. I am afraid that no one will react to it for a while...

"Self-explosive?"

Seeing this scene, Ye Xuan's heart suddenly gave birth to a clear understanding, and the violent face changed, and the voice was exclaimed.

His stick is really not enough to directly explode the mechanical body of Emperor Yi. The only explanation for this is the state of self-explosion. emperor

This was originally the purpose, and the violently smashed stick was only a spurt of his mechanical avatar, adding a power of

"call....."

"call out!"

"Hey..."

The whistling wind whistling into the sky, and with the impetuous explosion of the mechanical body, it turned into a huge fireball, and the nine-color flame curtain on the right side suddenly rushed up, a giant of hundreds of miles. The crack appeared.

Although only a short half-rate, this crack is closed because of the stability of the nine-color flame curtain. but

It's just such a half-time, but there's already six speeds, and it's rushing out of the glimmering cracks...

The five of them are the other five mechanical avatars of Emperor Yi, and the last one is rushing out of this blasting mechanical avatar... Obviously, the emperor crouched in the electronic consciousness of this body and Did not die because of self-destruction, escaped. "

Roar! "

"Hey..."

In this scene, the violent and sacral bones, the black mist and the body at the same time, looked up and made a terrible storm.

Too much to be concerned, for a moment of carelessness, was actually escaped by the Emperor in this trick. original

This kind of situation will not occur, but the nine-color flame sea is endless, but now it has turned into a circular flame ball, covering the tens of millions of miles of the void. Committee

It is too wide, and it directly leads to the flame curtain of the flame ball. It is not very thick. In this way, God adds a meticulously to build a piece of hard work, and the strength has reached the stage of the 9th-order grand perfection. The mechanical body of the body, under the blast of the power of horror, finally made the nine-color flame curtain that was not too thick, was briefly opened... although

However, the crack appeared for a short time, only a half interest.

But all the emperors were deliberately prepared, and they had already prepared for the perfection. Even if it was just a moment of sorrow, it was enough for his mechanical avatars to take the opportunity to rush out...

With the departure of Emperor Yi, Ye Xuan's previous plan will obviously be interrupted.

Prior to this, the Nether King and the Blood Mosquito King swallowed more than three million heads of the original ethnic group of more than 13 million people in just less than one hundred of them. Sharply reduced to only tens of thousands of hangs, the loss is more than 20%, close to 30%...

The kind of record, even Ye Xuan, was quite surprised. Under the slap of his heart, he originally planned to expand the results as much as possible, and the goal of swallowing up to two million yuan was greatly extended to about five million. So, the Tianji The loss will be so large that it can be almost unbearable compared to the mechanical family of the last Emperor.

But for now, it's obviously impossible to achieve this again.

In fact, the reason why Emperor Yi did not hesitate to blow a mechanical body, the purpose is to prevent this from becoming a reality. Such as

Today his tricks have been successful, and even if Ye Xuan is unwilling, he can only accept his life!

"Call..."

Engraved, with the five mechanical avatars of Emperor Yi and the electronic consciousness that lost the body, they rushed out from the nine-color flame ball. Ye Xuan also sang in the first time. In an instant, the nine colors of this vast void were enveloped. In the flames of the sea, they quickly condensed, and the short-lived and semi-interested faintly like a worm, lasing, and fell into the violent eyebrows, disappeared...

"boom!"

"Booming..."

In a short period of time, I lost the three million people, Ye Xuan, you have to pay the price..."

Just at this time, there was a sudden and loud roar in the distance from the void.

With the roar of the thunder, the roar of the emperor's arrogant thunder, also rang loudly:
"Incarnation...explosive!"

Chapter 4889: Heavenly change

In the distance ahead, in the void of the universe beyond tens of billions of miles, the five mechanical avatars of Emperor Yi are looking up at the same time, and the roar of arrogant thunder screams loudly...

"Incarnations...explosive!"

boom! ""

Rumble..."

The last blast was still not falling, and the emptiness came from a blast...

At this moment, the five specific strengths have reached the stage of the imperial nine-order grand perfection, which was actually a moment of work, and exploded at the same time.

As for the emperor's electronic consciousness that has lost its avatar in the first place in the nine-color flame ball, it is not visible in the void. It is obviously before Ye Xuan's collection of the nine-color flame sea. Has rushed into one of the five mechanical avatars...

At this moment, with the explosion of the five mechanical avatars, a huge black hole appeared in the corner of the sky. The void was cracked in the inch, and the violent emptiness turbulently flowed out, but the self-destruction of the emperor was No effect. from

In the moment of the roaring, the five Pangda 50 million giant body shells instantly turned into countless pieces, but they were not emptied by the void, but scattered under the self-destructive power. Open, to the tens of thousands of days of the official family of the emptiness in the surrounding sky, lasing away...

At this moment, if there is time to count, you can find that the body fragments formed by the five emperors are self-destructive, and the number is obviously more than 10 million. This

The numbers are exactly the same as the mechanical beasts of the ordinary ethnic groups left by the heavenly people.

Obviously, the fragments of the body formed by these mechanical volleys will be shared by each of the mechanical beasts of the Tianzu nationality.

In fact, as the blasting blast is opening, the speed of the mechanical beasts around them is not only the fragments formed by the emperor's body shell.

Before the previous blast, the Emperor had a slap in the face.

If it is only the body fragments, it is obviously not a true incarnation. Because the body does not represent the existence of the Emperor, the core of its existence is its electronic consciousness.

The so-called avatar is strictly speaking, it is the statement of its electronic consciousness level...

This is indeed true. At the moment, more than a thousand of these tens of thousands of sizes are smashing away from the body fragments, and there is a clear glimpse of a glimpse of the faint stalks. Emperor Yi's electronic consciousness...

This scene happened too fast, and the weather was amazing. Even Ye Xuan did not expect the five mechanical avatars of Emperor Yi, and suddenly he began to blow himself up and uttered a slogan of avatars. first

In the nine-color flame ball, the reason why his mechanical avatar blew himself was to get rid of the difficulties and to do it.

But this is obviously not the case today. and

Moreover, in this case, which has not been trapped, the Emperor has blew all five mechanical singers at once, but this is a perfect body with five strengths that have reached the ultimate level of the ancient sacred, but no Half hesitate, instant self-destruction... pay

Out of such a terrible price, the Emperor's plan for this move is obviously imaginable!

Although Ye Xuan did not know what his ultimate purpose was, he realized that it was not good, and even a very strong sense of crisis suddenly emerged from his heart..."

Roar! ""

Hey! ""

Oh..."

At this moment, the three blood sea avatars and the Void Heaven King and the Blood Mosquito King also screamed at the same time, without hesitation, and the first time they dispersed, and rushed to the surrounding virtual airborne avatars. Dense area...

"boom!"

The violent rushed to the left side, reaching the target area between the blinks, and the **** stick in the hand was swept away, and the shocking blast came, and more than 200,000 mechanical beasts fell in the blink of an eye. right

In the lateral direction, the cheekbones are more violent, and the teleports are directly unfolded. One tenth of a sudden, they appear in the central area of a group of mechanical beasts. hand

The Shennong Baoding, which was reversed, was swept by him, and the mechanical beasts that exploded in the explosions even exceeded 300,000.

At the same time, the black mist slammed under the flash, but also appeared in the right side of the front area in the less than half-time, a punch, hundreds of thousands of mechanical beasts exploded.

As for the Void King and the Blood Mosquito King, the soldiers are divided into two ways, one head rushing to the front, one head rushing to the back, and the head is roaring, in a short break, they open the blood basin, each Swallowed more than 200,000 mechanical beasts...this

Everything is long, but in fact it happens. One

At the time of the interest, Ye Xuan's five avatars took full shots, and the number of mechanical beasts killed by the squadron exceeded one million, including the corpse fragments of the emperor's body that was rushing to the tens of thousands of mechanical beasts. The scattered electronic consciousness of Emperor Yi, who is attached to these fragments of the body shells, has also been shattered..."

call! ""

call out! ”

"Hey..."

After this shot, the five avatars did not continue to kill.

The Nether King and the Blood Mosquito King are the most direct, and they chew on the spot, refining the mechanical beast fragments that are swallowed into the body, nourishing their bodies.

And Ye Xuan's three **** seas are all under the glimpse of the cold, and each waved, and the large number of mechanical beast fragments that had just exploded, all swept, and turned into a giant ball of one million feet. Between the thoughts, they all swept away and rushed toward the Nether King and the Blood Mosquito King...

In the past, Ye Xuan's five avatars gathered together in the void. At this time, the tens of thousands of mechanical beasts that were chewed by the Nether King and the Blood Mosquito King's mouth have been swallowed up and swallowed quickly. three

The big **** seas did not hesitate, and they merged the three giant **** that were collected by the talents, and then split them into two. The first time they rushed to the Nether King and the Blood Mosquito King. straight

They were swallowed by the belly, chewed, and quickly refining. This

Once, the five **** seas were shot at the same time, killing more than one million mechanical beasts, counting the previous three million, with a total of five million.

In addition, this time, there are more than one million pieces of body pieces of different sizes, which are all made of the top materials. again

Counting the electronic consciousness that is scattered in the fragments of these shells, it can be said that the benefits of the emptiness of the Nether King this time, I am afraid that I still hunted the income of the singular time alone. .

And the official tribe of the emperor's squadron has once again dropped more than one million yuan. Today, there are only over eight million left...

"Roar!"

"Hey..."

"Hey..."

In the next moment when the Nether King and the Blood Mosquito King swallowed the last huge ball, there was a terrifying roar in the void.

The spurt of the emperor splits the body shells and merges with the more than eight million mechanical beasts. with

At the time, Emperor Yi's shocking and screaming sounded, and more than eight hundred mechanical warfare mouths were heard from him, all of which were his voices, gathered together into one, and earth-shattering: "Tianji...changed!"

Chapter 4890: Where is the bottom gas?

"Roar!""

Oh..."

Oh..."

Around the void, suddenly there was a terrible roar and scream... This

At that time, the smashed emperor's body fragments have been merged with the remaining more than eight million mechanical beasts. make

Surprisingly, these eight hundred mechanical warfare beasts are arrogant at the same time, and all that is heard in the mouth is actually the voice of Emperor Yi, gathered together, earth-shattering...

"Tianji...changed!"

"boom!""

Bang..."

"Card..."

In the next moment, the overwhelming roar came and came in all directions, as the tides rushed and rushed, accompanied by the harsh mechanical smoothing of the sound, which made people feel moving.

At this time, Ye Xuan's five avatars are already gathering together. The look on the face is full of dignity. There is no movement. During this period of time, pay attention to the more than eight million mechanical beasts in the surrounding air. Subsequent changes...

In fact, for this scene, Ye Xuan's heart has been speculative.

Because of this kind of scene, and the mechanical integration of the mechanical family under the Emperor's second emperor, it is very similar. Such as

If it is hard to say that it is different, then it is the army of more than 100 million robots under Emperor II. It is under the command of Emperor II, and it is self-integrated, but Emperor II is not involved. but

In the current fusion, Emperor Yi participated in it, and it was not simply to join, but to completely explode his five mechanical parts and turn it into countless body fragments, together with the electronic

consciousness dispersed in it. All are integrated into more than eight million mechanical warfare animals...

You must know that his five powerful mechanical avatars were the black dragons in the battle form of the Heavenly City. Nowadays, all five mechanical shells are exploded, and they are integrated into the more than 800 mechanical warfare animals. This

That means that Tianji City has completely disappeared, and it has been dispersed into more than 800 mechanical beasts. By

This point, Emperor Yi called it a heavenly change, apparently worthy of the name...

Emperor Yi paid such a heavy price, and the exchange of the Tianji nationality was fully integrated, apparently not comparable to the original fusion of the Emperor.

In fact, this is true. At that time, the mechanical family of Emperor II spent a small half of the time before and after completing the seventh fusion. and

Nowadays, with the roar of Emperor Yi, the more than 800 heads of the Tianji mechanical beasts that have been integrated into his body-shaped shells have been moving at the same time, gathering in one direction, like more than 800 meteor, Converging in one place..."

call out! ""

Oh..."

In the air, the overwhelming sound of the sky was so loud that it was extremely harsh, giving a feeling of trepidation in the vagueness. short

Just three short-term interest, these more than 800 mechanical beasts, easy to gather in a virtual space just over 100 billion miles ahead...speed

The degree is too fast, far beyond the mechanical army of the Emperor II. Moreover, the mechanical beasts of the more than 800 heads of the Tianji family are clearly one-time comprehensive integration, and they are not divided into multiple camps.

After they got together, they were short of ten. The more than 800 mechanical beasts were integrated into one, but everything was not over. Vision

In the line, a horrible mechanical beast that is more than 400 million miles in length is slowly stretching its huge limbs, but its body still has a sound of mechanical plucking. very

Obviously, this fusion should have been completed most of the time. At the moment, only some internal fine-tuning continues, and as the fine-tuning of the body unfolds, the surrounding voids begin to faintly tremble.

In the huge horror beast of 400 million miles, the pressure of the spread of power is getting stronger and stronger, and even this piece of shards of the wild land is almost unable to support it...

The feeling is very bad, more and more powerful, so that Ye Xuan's heart is more and more uneasy, because it is clearly getting closer and closer to the real heaven and earth, and the eighth fusion of the mechanical army under the Emperor's second emperor. It feels the same. only

One difference is that the Emperor's mechanical army used the majority of the time to start the eighth integration, and the former Tianzu ethnic group army, with the full participation of Emperor Yi, only used about ten interest. This has reached this level.

However, what makes Ye Xuan puzzled is that he is the one who relies on him?

The eighth fusion of the mechanical army under the Emperor Erzhuo was clearly a forerunner. He dared to attack the real heaven in this sinister world. Where did he come from and confidence? band

With this kind of doubt, Ye Xuan's fine flashing, subconsciously, looked up at the sky above his head and looked over!

The next moment, just like responding to him, the sky at the height of the sky, suddenly came a terrible horror...

"boom!"

"Oh..."

Immediately after the loud noise, the void cracked a crack, and the crack was in black, but there was a huge cyan vertical eye, which suddenly opened...

As Ye Xuan expected, just in the moment when the mechanical behemoth was about to enter the heavens, the accident came again...

The sky was high and the thunder was stunned. After the cracking sound, a black void crack appeared, and there was a huge cyan vertical eye in the crack, which suddenly opened! This

The blue eyes are the eyes of the wilderness! with

Like last time, it should only be a projection of the blind eye of the blue sky, and most of its deities are undergoing some important arrangement, so they can only come by projection. "

Card 嚟..."

boom! "

"Booming..."

Almost in the next moment when this cyan vertical eye appeared, at the height of the sky, suddenly there was a piercing card with a squeaky sound...

In the line, a cyan man's eye shot from the vertical eye in the black crack. early

The beginning is not big, it seems that only about the left, but with the sudden skyrocketing, the speed is too fast, and the short-term interest rate is not enough. This initial blue-light lightning has only become a vast one. Sea of lightning...

Underneath the void, the whole body of the celestial family has a body size of 400 million miles, and the fusion has basically been completed. Only the mechanical behemoth that continues the internal fine-tuning is still in the air. The splendid electric sea that came from it was completely submerged.

The scene was too stunned, the loud noise was so loud, and it was ringing all the time. The blue sea of electricity always had a constant roar of sounds, which made people feel tremble..."

boom....."

At the same time, there was a roar in the sky. turn

Looking forward, the sky at a high altitude shot a blue-colored electric eye that turned into a blue sea with a huge electric sea. It also quietly closed at this moment, and then even the void crack disappeared, as if it never appeared. General...

At this moment, Ye Xuan's whole heart mentioned the eyes of the blind man. He did not know whether the first day of the Emperor's success could be successful. The two different results, the meaning of the representative, were simply judged...
