

Super Leveling System Chapter 23

C23

Inside the Martial Pavilion.

Rows of shelves were lined with books on cultivation methods and martial skills.

However, they were all covered by spell array, and only the first few pages were visible.

Each person could only choose one martial skill and cultivation method.

"Let me look for the cultivation method first. The abridged version of the Azure Yang Arts is a little too trashy."

Lu Zixuan came to the shelves that held the books on cultivation methods.

The disciples of chores could only cultivate the abridged version of the Azure Yang Arts.

One could imagine the might of a cultivation method at the First Grade of Human Level.

If obtaining the cultivation methods had not required so many points of Exchange Value, he would have already exchanged them in the system.

"The Netherworld Arts, the cultivation method at the Fifth Grade of Human Level."

"After cultivation, the Genuine Qi will become cold and turn into the Netherworld Genuine Qi!"

"Muddy Earth Origin Arts, the Ninth Grade of Human Level."

"After training, the Genuine Qi will thicken and transform into the Muddy Earth Genuine Qi. This will strengthen the Cultivator's defence."

"These cultivation methods of the Human Level are all too trashy."

"I don't know if there's anything better here."

There were a lot of cultivation methods here, but after looking around, Lu Zixuan felt disappointed.

There were so many powerful cultivation methods in the system, and now he had to look at all of these?

It was like letting a man who was used to seeing beautiful women choose his partner from a herd of pigs.

"Eh, the top three treasured cultivation methods of the Azure Yang Sect!"

Lu Zixuan continued to search.

There was no other way.

The items in the system were indeed good.

But the points of Exchange Value they required ...

were just too much!

"The first two levels of the Blue Flame Secret Scripture, from altogether nine levels, the First Grade of Earth Level!"

"The first three levels of the Ice-congealing Mysterious Jade Arts, from altogether nine levels, the Ninth Grade of Yellow Level!"

"The first three levels of the Green Wood Arts. from, a total of nine levels, the Ninth Grade of Yellow Level!"

"These three cultivation methods are not bad!"

"Unfortunately, unlike the rest of the cultivation methods here, they are incomplete!"

"At the first level of the Martial Pavilion, I can only obtain the first few levels of these cultivation methods."

Seeing the three cultivation methods, Lu Zixuan's eyes lit up.

"Let me try if the system can make up the next few levels?!"

Lu Zixuan checked the system.

"Ding!"

"Blue Flame Secret Scripture, first two levels (incomplete). Unable to repair. The complete version can be repaired successfully, and it requires 1000 points of Exchange Value. Unable to upgrade!"

"The Ice-congealing Mysterious Jade Arts, first three levels (incomplete). Unable to repair. The complete version can be repaired successfully, and it requires 1000 points of Exchange Value. Unable to upgrade"

"Green Wood Arts, first three levels (incomplete). Unable to repair. The complete version can be repaired successfully, and it requires 1000 points of Exchange Value. Unable to upgrade!"

"F * ck!"

"You've got to be kidding me!"

A large string of zeros appeared in the column of the Exchange Value required, causing Lu Zixuan to uncontrollably curse out loud.

Right now, only a few pages of the three cultivation methods were visible, and he was unable to repair them.

Although they could be completely repaired once taken out from the spell array, it would cost so many points of Exchange Value that he had better directly exchange them himself!

Moreover, these couldn't be upgraded!

"Let me look at the other cultivation methods!"

"Azure Yang Arts?"

On a wooden shelf at the side, Lu Zixuan saw the Azure Yang Art.

"The complete version of the Azure Yang Arts, the cultivation method at the Ninth Grade of Human Level?"

"It's a bit of trash!"

After seeing the grade of the complete version of the Azure Yang Arts, he was even more disappointed.

"Ding!"

"Congratulations to host 'Lu Zixuan' for finding the complete version of the Azure Yang Art, would you like to cultivate it?!" Cultivation requires 3000 points of Exchange Value.
"

At this moment.

The system's voice resounded once again.

Lu Zixuan was taken aback.

"What's going on?"

Lu Zixuan opened up the system.

"The complete version of Azure Yang Arts, the cultivation method at the Ninth Grade of Human Level, can be upgraded."

The system's description was very simple.

"F * ck, that's it. I can just use Exchange Value to push up its grade!"

Lu Zixuan clenched his teeth, and took out the complete version of Azure Yang Arts from the spell array.

Although the cultivation methods could be changed, once changed, it would have a significant impact on the Cultivator as well.

Unless it was changed to a cultivation method very close to the previous one.

Though the grade of the Azure Yang Arts was not as good as the three cultivation methods...

It could be upgraded.

With the System, Lu Zixuan believed that the upgraded Azure Yang Arts would not be weaker than the three cultivation methods.

"Cultivate!"

"Ding!"

"Congratulations to host 'Lu Zixuan' for learning the Azure Yang Arts. Ninth Grade of Human Level. Able to be upgraded!"

"Ding!"

"Congratulations to host 'Lu Zixuan' for learning the Azure Yang Arts and triggering the 'Nine Yang Divine Arts' mission!"

"The mission to quest for the Golden Crow Fire of Vital Spirit, Rose Finch Fire of Vital Spirit, and Kylin Fire of Vital Spirit for three years!"

Noe: Nine Yang Divine Arts, Divine Level, a cultivation method with extreme Yang nature.

Note: For every Fire of Vital Spirit found and assimilated into one's body, the Azure Yang Arts will be upgraded correspondingly.

Note: If the mission is not completed within three years, it will be cancelled automatically.

Lu Zixuan, who had gritted his teeth and chosen the Azure Yang Arts, was completely stunned at the moment.

"Nine Yang Divine Arts?"

"The cultivation method at the Divine level?"

Lu Zixuan looked at the information displayed on the system and burst out laughing.

"Holy shit, with the Nine Yang Divine Arts in my hands, I could conquer the whole world!"

When he thought about the Nine Yang Divine Arts that Zhang Wuji, the leading character in the novel The Heaven Sword and Dragon Saber, had cultivated, Lu Zixuan became excited.

What did Zhang Wuji count for?

My Nine Yang Divine Arts is even more awesome!

"Oh, I should keep low-profile, low-profile!"

"Find the martial skill first."

After forcing himself to calm down, Lu Zixuan walked over to the wooden shelf that held the martial skills.

"Wait!"

"With the System, even if I can only see a page or two of those martial skills, I might still be able repair them."

"Not like those cultivation methods."

"Even if I can't repair them, I can still learn the incomplete moves!"

"If that's the case ..."

Lu Zixuan's eyes suddenly lit up.

His entire person became excited once again.

Those cultivation methods, under the condition that only one or two pages were visible, were extremely difficult to repair.

But the martial skills were different!

"Ding!"

"Congratulations to host 'Lu Zixuan' for obtaining the Drifting Cloud Move (Incomplete). Able to be repaired, able to be upgraded. Do you want to cultivate it?!" Cultivating requires 110 points of Exchange Value. "

"Cultivate!"

"Ding!"

"Congratulations to host 'Lu Zixuan' for obtaining the Fragmentation Palm (Incomplete). Unable to be repaired, unable to be levelled up. Do you want to cultivate it?! Cultivating requires 80 points of Exchange Value. "

"Cultivate!"

"Ding!"

"Ding!"

Lu Zixuan opened one martial skill book after another. Once the system beep appeared, he chose to cultivate.

"It's a pity that my Exchange Value points are not enough, otherwise I would learn all the martial skills here!"

An hour later.

Lu Zixuan had only fifty or so points of Exchange Value.

However, he'd learned at least twenty different types of martial skills.

"Let's go!"

Lu Zixuan who had returned with a bountiful harvest left the Martial Pavilion with a face full of joy.

"The mission of the Nine Yang Divine Arts will be due in three years. I have to hurry!"

"Although there are also those items in the system, they require too many Exchange Value points."

"Moreover, the mission items are simply impossible to exchange for!"

After registering with the elder, Lu Zixuan started to plan his Nine Yang Divine Arts mission.

Three years seemed quite long.

But for the Nine Yang Divine Arts mission, the things that were required were simply too abnormal.

"Brat, stop right there!"

"You're the one who stole Junior Jiang's cave?"

Lu Zixuan was walking towards the cave and was suddenly stopped by a few people.

"A good dog doesn't block the road, go away!"

"I have a lot of things to do!"

Lu Zixuan, who was thinking about how to complete the mission for the Nine Yang Divine Arts, waved his hand and said.

"F * ck, you want to die!"

"Go, beat him to death!"

Zhang Yue's face darkened as he said ferociously.

"Pah!"

"Pah!"

"Pah!"

The few of them rushed forward, but were instantly slapped flying.

"So it's you, brat?"

"What? Did you call some helpers?"

"Come come come, take out the things on you, or else I'll cripple you!"

Only now did Lu Zixuan see that one of them was the previous owner of the cave he had snatched away.

he said, laughing.

"Brat, just you wait!"

Zhang Yue's eyes were ferocious as he jumped up from the ground and charged forward again.

"You still dare to resist?"

"I have given you some respect!"

"Get down!"

The palm hit Zhang Yue.

Zhang Yue's body was slammed onto the ground, with a sound of 'bang'.
