

The Supreme God

Chapter 241 Entering the Cloud Cave (Part Two)

Now, since brother Bull wants to go inside together; after you, please!"

The Three-eyed Scarlet Bull and Purple Flaming Lion King looked at each other and then the Bull walked towards the gate first with a heavy grunt. Nobody knew what information the two diabolic beasts had exchanged just now.

Elder Guan wasn't willing to be left behind. He quickly reached to the Bull's side in one step and they both entered the cave side by side. That gate was large enough for several people to walk in together.

After that, the Lion King, the three Mysterious Realm Warriors of Medicine Sect and Master Yuan all walked in. Behind them, the disciples of Medicine Sect also rushed into the cave at once.

Austin was also mixed among the disciples and stepped inside with them.

An enormous hall greeted them as soon as they got inside. The ornaments which lay in that hall were gorgeous, refined and glorious. But they weren't treasures by any means. They were just some chairs, tables etc. that adorned the hall.

But there was a corridor which extended backwards on the right side of the hall.

The two diabolic beasts and the three Mysterious Realm Warriors of Medicine Sect had taken the lead and walked towards that corridor.

A large garden appeared in front of them once they reached the end of the corridor. There were a lot of strange flowers and grass growing inside even in the absence of sunlight. The grove was thick and the

bamboo looked refined. A fountain and a waterfall adorned the sides of the bamboo. A path in the middle led to the shadowy parts and from time to time, a fish would leap out of the fountain or an agile rabbit would cross the path.

The garden was really beautiful!

devastating and terrible vital energy force fluctuation of the three Mysterious Realm Warriors crashed into the diabolic beasts' fluctuations violently. In an instant, the wind started howling like a tornado. The grass, the flowers, the trees, the rockeries, and the

However, the medicine garden below the five contestants remained intact and did not seem to have been hurt at all.

Each of these herbs was at the seventh or eighth grade and was valuable enough to be wrested for crazily by those warriors in the outside world. The five creatures fighting for them were all quite wise so they wouldn't destroy such a valuable treasure.

"Brother Scarlet Bull, let's work together and kill these three damn humans and then we will have enough time to split up these herbs. What do you say?"

These herbs are only one of the kinds of treasure that adorn this cave. I'm sure that we can find more valuable treasures if we walk farther inside. If we work together and kill these people, we can patiently take those up for ourselves. That is the best I can think right now."

The Purple Flaming Lion King suggested.

"You're right. We diabolic beasts have been the opponents to these humans since ancient times. Let's kill them first."

The Three-eyed Scarlet Bull agreed at once.

The Three Mysterious Realm Warriors knew that the two diabolic beasts wanted to monopolize the treasures in the Cloud Cave. And

now to protect the treasure, they had no choice but to fight with them and winning was the only option.

Consequently, the fight among the five Mysterious Realm Warriors began.

The Chief Elder started fighting against the Purple Flaming Lion King; and Steward Meng and Elder Guan fought against the Three-eyed Scarlet Bull.

To keep these herbs safe, all of these warriors paid special attention and made special efforts to control their vital energy so that the herbs wouldn't be damaged.

The Supreme God

Chapter 242 The Pill Room

When the five masters of the Mysterious Realm were fighting with each other, the disciples of the Medicine Sect flocked to the garden.

Watching the masters attacking each other with such ferocity instilled a great fear within the onlooking disciples. The five masters were airborne, flying back and forth and putting their brilliant martial art skills to good use. Great volumes of vital energy force were released as the masters fought, each attack generating a power that seemed to be able to destroy the whole world.

The disciples of the Medicine Sect wanted to help, but they knew that their joining the fight would make no sense. In such a battle, more people didn't necessarily mean a greater possibility of winning. There was an impassable gulf that separated the Mysterious Realm from the Earth and Energy Gathering Realms. A warrior who was of the Mysterious Realm could easily kill dozens of Earth Realm warriors.

Austin was also dumbstruck. The battle helped him realize that he was too weak to face the masters of the Mysterious Realm. His cultivation base was way too inferior to theirs.

Austin had been watching the battle for a while, awestruck, when it occurred to him that he could grasp the chance to search for any hidden treasure here rather than just standing here and watching the masters fight with each other.

Once the masters stopped fighting, he wouldn't have a chance to search.

'Just enjoy the battle to the fullest, masters. It's a heaven-sent opportunity for me!' Austin thought.

Austin stealthily moved away from the Medicine Sect's disciples. Using his Wind-commanding Skill, he shifted himself 20 meters forward in each go. After several uses of the Skill, he was at the end of the garden corridor.

Austin was about to disappear around the end, when the Purple Flaming Lion King and the three-eyed scarlet bull discovered him at the same time.

Austin disguised himself as a disciple of the Medicine Sect and the two diabolic beasts took offence as they saw him. The Purple Flaming Lion King put up his right paw and sent a purple fireball at Austin.

The three-eyed scarlet bull blinked his middle eye, causing a ray of laser-like blood-red light to shoot at Austin.

Looking at Austin's back, three warriors of the Medicine Sect who were of the Mysterious Realm, mistakenly identified him as a disciple of their Sect. It made them happy to see that one of their disciples was so clever that he was looking to grab the chance to retrieve the treasures.

These three warriors wanted to help Austin against the Purple Flaming Lion King and the three-eyed scarlet bull, but it was too late.

Austin sensed through his superior spiritual abilities that there was something special going on behind him. It shocked him to know that the two diabolic beasts were trying to attack him.

Boom!

There was a loud sound as the Purple Flaming Lion King's purple fireball and the three-eyed scarlet bull's blood red light came crashing at the ground just a meter behind Austin. Soil splashing and ground cracking, the two forces had created a deep hole that was several meters deep.

The violent shock wave of vital energy force caused Austin to be thrown forward like a bullet shooting out of a gun. In the blink of an eye, he had disappeared around the end of the garden corridor.

Such a pity.

The three masters of the Medicine Sect who were of the Mysterious Realm shook their heads in regret. In their opinion, Austin's intelligence hadn't been able to help him escape from the coordinated attack launched at him by the two beasts.

Compared with the warriors of the Mysterious Realm, warriors like us, who are still at the Earth Realm, are nonentities. I must practice more, learn more and try to reach the Mysterious Realm as soon as possible. If I succeed, people won't dare to look down upon

They then pushed the door of the pill room and walked into the room. The sweet scent of the elixirs met their senses.

It was easy to decipher from the interiors that it was indeed a pill room. It looked like that the Great Sage Cloud was quite interested in making elixirs.

On one side of the pill room, there were two wooden shelves lining the wall. Each of them contained dozens of jade bottles.

Austin walked over and took a larger jade bottle off the shelf. He opened the bottle and saw that there were twenty to thirty elixirs in it.

"Energy-prevailing Elixir!"

Austin cried out softly.

All the pills in the bottle were the Energy-prevailing Elixir. When warriors of the Energy Gathering Realm were close to reaching the Earth Realm, they used the Energy-prevailing Elixir to help them make it. For Austin, these pills were of no value except to provide some vital energy for him to absorb.

But what if he sold these pills to others? He could make a lot of money by selling these! For those warriors wanting to reach the ninth level of the Energy Gathering Realm, Energy-prevailing Elixirs were as precious as their lives. They would, without a doubt, buy one no matter how expensive it was.

Austin opened several jade bottles in succession. Most of the pills in the bottles were new to him. But he could tell that they were valuable by their scents.

Austin stopped opening all of them. Instead, he put all the jade bottles on the shelves into his Space Ring. When he had enough time, he would check them one by one. But now, he needed to hurry up.

After collecting the jade bottles, Austin spotted a herbal pot which sat at the center of the pill room.

The herbal pot was puce and was ancient and heavy. It was neither made of stone nor iron, and Austin couldn't tell what it was made of. There were figures of odd birds and beasts carved on it, some of which Austin didn't know.

There were also mysterious symbols and inscriptions on it, which looked rather uncommon.

The pot wasn't that big in volume either.

Austin thought, 'I am planning to buy a herbal pot anyway. How about taking this one?'

And it belongs to the Great Sage Cloud. It couldn't be of a low grade.

It must be excellent—much, much better than those sold in ordinary weapon stores.'

Thinking about it, Austin stepped forward and transferred the herbal pot to his Space Ring.

Then he threw a last glance across the room to make sure he didn't miss anything valuable. Seeing that he didn't, he turned to Violet.

"Let's go. Maybe we should go to other places and have a look," Austin said to her. They made their way back to the fork. This time, they chose the middle road.

The five masters who were of the Mysterious Realm were still fighting fiercely with each other.

Steward Meng was relatively weak among the five of them. There was blood at the corner of his mouth, his vital energy and blood rolling over irregularly within him.

The Supreme God

Chapter 243 Peculiar Cloud Mansion

Present in the garden were five artists of Mysterious Realm known for their great expertise. They were fighting with great intensity and vigor.

The colossal horn on the head of the three-eyed scarlet bull had the potential of great havoc and great destruction. Added to that was the eye in the middle. It opened once in a while to scatter an emission of light that they found hard to ignore.

Furthermore, the radiant black fur of the giant creature was tremendously strong and hard. It was almost impossible to puncture. Even though the Steward shattered the herbal pot on the animal with immense might for a number of times it did not affect the bull. It simply

took a few steps back and came back with new vigor as if nothing happened.

This is the reason why diabolic beasts like this one were generally stronger than mere human beings when they belonged to the same level. Diabolic beasts are much stronger and firmer than humans because their bodies are not so vulnerable. Such beasts could easily shrug off blows often deadly for humans.

Normally when a human got hurt fighting such an indomitable creature of such high level chances are he would sustain serious injuries. In worse cases the man could succumb to death.

Surprisingly, even after deathly attacks a diabolic beast may still stand straight and strong ready to face more.

Evidently it was not a cakewalk for the three martial arts from the Medicine Sect who wanted to massacre these two invincible beasts in limited period of time.

On the other hand the beast would have a tough time killing these three master martial artists.

The main reason was because of the same cultivation base. Whilst the three martial artists had comparatively weaker bodies compared to the ungodly beasts they were proficient in the techniques of martial arts. Skillfully these three cultivators kept on performing versatile and esoteric movements in order to make it difficult for the creature to fight back.

Besides, the three martial artists of Mysterious Realm consumed many pills that helped them to restore their vitality rapidly during such encounters.

Previously about forty to fifty disciples of the Medicine Sect were severely injured and even suffered some casualties after the rounds of the encounters with such diabolic creatures. The lucky ones who managed to get out alive were forced to go to the Front Hall. It was absolutely difficult for them to go any further.

Therefore, as per the situation only Austin and Violet were left to search for the treasure.

front of a large manor. But from the look of it they could figure out that this was not the main building.

And precisely this is why he could not contain his excitement when he
found "To Pick Shells Among Elixirs" on Great Sage Cloud's study
table. Now he was sure that once he got hold of the recipes he would
always have enough elixirs.

After Austin had this book in his safe possession he started shuffling
through the rest of the books with the hope of finding something even
more exciting. He found out that these books were chests of great
knowledge and dealt with various topics.

To his surprise he found books that were on weapon refinement,
music, farming and even cooking. . The books covered almost every
topic a person could think of. It proved that Great Sage Cloud was
indeed an expert in many fields.

After going through a few of these books he lost his patience and
decided that he needed all of them. So he simply threw it in the Space
Ring.

Then his eyes were fixed on the jade slips.

The slips were dainty little things. They were of the size slightly
smaller than the human palm. They were made of jade. With a glow to
their appearance they were translucent.

To his astonishment, they are books about martial arts!

As Austin already had some knowledge of martial arts that the jade slips recorded he knew approximately what these books were about just by a single look.

"Master, we must hurry up, please! We have what we need—the powerful crystal. Now we should make our way out of the Cloud cave without delay.

We are not sure as to when the five martial artists of Mysterious Realm will stop battling. No matter who wins we won't have an easy escape."

the concerned Violet reminded Austin.

Austin without a jolt understood what he heard. Without a moment's hesitation he dropped everything in his Space Ring.

"Violet let's quickly look around in the next room as well."

The Supreme God

Chapter 244 Great Sage Cloud's Remains

Master, there seems to be a presence of some powerful crystals here. I can feel it.

When they approached the door on the right, Violet told Austin excitedly.

Austin had the same feeling as well. There seemed to be something special in the room and it felt like it was closely related to his spiritual sense. In fact, it seemed that the two things had the same origin.

Spiritual sense power was a special and rare power which was contained in a cultivator's spiritual soul. Compared to the vital energy

which was highly prevalent, spiritual sense was rare and very few people could cultivate it.

Austin could faintly feel that there was an abundance of spiritual sense power in the room.

Without any hesitation, the duo rushed into the room excitedly.

The moment they entered the room, they were shocked.

The room was filled with a brilliant blue light and some sort of smoke seemed to be floating around them. The atmosphere inside was serene and peaceful.

They felt like they had entered a world full of Buddha statues. These Buddha statues looked mighty and stainless and seemed to have been made with blue glaze. A faint fragrance matching orchids or musk lingered in the environment, making the whole room feel like a hermit's house.

Instead of bricks, the wall of the room was made of blue crystals. They emitted an extremely brilliant blue light, which, when mixed with the floating smoke would fill the whole room with a beautiful haze. There were also faint brittle sounds adorning the ambiance.

The room looked mysterious and attractive, as if it was from some sort of mythology.

Austin and Violet felt refreshed, calm, and peaceful on entering the room, as if their spiritual souls had been purified.

Austin was also surprised when he felt that his spiritual sense power had improved a little since entering the room.

Austin's spiritual sense power had extended. It now could cover an area of about four hundred meters

that such a powerful spiritual sense was remarkable and very few Mysterious Realm cultivators had that much area of coverage.

that time. In fact, he had no idea how to be improved in this room. If I can get these powerful crystals and absorb their essence, it's

was examining the bed carefully and she found several lines carved on one side of the bed.

Austin looked along the direction Violet was pointing and he saw them too.

The lines seemed to have been inscribed by Great Sage Cloud himself. He had written, "After I have reached the Holy Realm, nobody was able to match me because of my powerful vital energy. However, when I learned how powerful the Imperial Realm was, I realized that my power and cultivation base were nothing compared to it. Therefore, I began practicing to break through to that realm.

Unfortunately, I tried too hard and over exerted myself, and therefore, the energy in my body deviated. The lack of that energy and the over exertion also caused my hemiplegia. After that, I only had half my vital energy left and I was extremely depressed. After several years of trying, I was unable to get my energy back and now, I feel like I'm going to die in the Cloud Cave.

If by chance, someone happens to reach this place and read my words, please bury my remains under this bedroom only. He will get a big reward in return for his efforts."

Only now did Austin understand the true reason behind Great Sage Cloud's death.

'Imperial Realm? What kind of realm is that? I've never even heard of it!'

Austin wondered. He knew that the Mysterious Realm was higher than the Earth Realm, but when it came to any realms above the former, he knew nothing.

According to Great Sage Cloud, he had already reached the Holy Realm and Imperial Realm was at least one realm higher than Holy Realm. Clearly, both of those were extremely powerful.

It was the first time that Austin had ever heard about these two realms. However, one thing was clear! These two realms were higher than the Mysterious Realm. As for how much higher, he had no idea.

Austin smiled when he saw the last line which promised a reward to the person

who buried Great Sage Cloud.

"Sir, are these powerful crystals the big reward you mentioned? If that is the case, I have already gotten the reward. But since you are such a respected martial arts master, let me fulfill your wish."

With that, Austin pulled out the Violet Royal Sword. He injected his vital energy into the sword and dug a deep hole right in the middle of the bedroom. Then he transferred Great Sage Cloud's remains into the hole.

When he turned around, he suddenly saw that a silver colored ball about the size of a human fist on the bed where the skeleton had been.

The Supreme God

Chapter 245 More Than One Big Breakthrough!

With the vital energy unleashed from the point of the sword and in a respectful manner, Austin moved the bones of the Great Sage Cloud into the grave he had just dug. He then buried the shell of this once powerful cultivator with sand and soil from the cave. A pile of mound was made to serve as his tomb.

To further show his respect for the dead, Austin stepped back and bowed to the heap for a few moments, before he turned his attention to the little silver ball on the bed.

'Could this be some kind of treasure?' he wondered. This might explain why the Great Sage Cloud kept it hidden under his body even during his final moments.

After hesitating for a while, Austin went up and took the ball in his hand, studying it carefully.

However, the very instant when his breath touched the ball, it suddenly started vibrating. A burst of silver light emanated from within. Austin narrowed his eyes in order to see through the dazzling light, and discovered some words hovering in the air.

"He who would help me rest in peace must uphold honesty and faith. All my life I have appreciated the honorable and despise the opposite. An honorarium is thus waiting for you." Austin read the words as the silver light kept illuminating the space.

"This silver ball is a crystallization of my lifetime's achievements. Take it as a reward and use it well."

Before Austin could even digest the words, the words slowly disappeared after lingering in the air for a few more seconds.

'What does he mean, the crystallization of what he has achieved? Does it have something to do with cultivation?'

Questions began erupting inside Austin's head like fireworks. He still stared blankly at the place where those words once rested after they were gone.

The next instant, instead of being enlightened with the words he just saw, Austin was struck by a refreshing wave of light. In his surprise, Austin saw the fist-sized silver ball shake more violently, and suddenly it exploded with a light but clear sound.

The light did not fade away, but the ball turned into a cloud of thick silver smoke that rushed towards Austin, surrounding him and eventually enveloping him.

The next thing he knew, a refined force surged rapidly through his entire body. He could feel that it was a high-quality vital energy force which enveloped him. In the blink of an eye, Austin was unable to move a single muscle.

Then, as Austin struggled to free himself, the silver smoke began to flow, and seeped in his body through his pores and acupoints.

Austin felt that the vital energy quickly accumulated within him before it suddenly permeated into his energy meridians like a

an hour. Surely, Violet realized that he made such breakthrough thanks to the

with a satisfied smile when he

wasn't going to stop there!

From what he could sense, the deluge of powerful vital energy from the silver ball was still pouring into his body, and while he was catching his breath, it had helped him consolidate the realm he had just reached.

From how well the vital energy in his meridians had been refined, Austin was aware that he had accomplished more than he could imagine—Although he had just made the breakthrough, he could already control the vital energy inside him easily, as if he had been at the medium stage of Earth Realm for years! It seemed like his high cultivation speed didn't come at the cost of a solid foundation.

And while he was overwhelmed with excitement and joy, the cultivation didn't stop there. And he found himself already at the peak of the medium stage of Earth Realm in the turn of a hand!

Austin was lost for words. In fact, he never imagined that reaching the highest level of the medium stage of Earth Realm could be this easy, not even in his wildest dream!

Yet the vital energy inside him was shouting the truth, and his body had easily adapted to this high cultivation base, even better than his mind could.

What came next, however, was something even crazier.

To his astonishment, Austin had again sensed that another breakthrough was about to happen!

'How could this be?' Austin was half amazed, half pleasantly surprised now. If this was true, then he was going to reach the premium stage of Earth Realm just like that! ! !

This was no doubt a momentous occasion!

But Austin immediately tried to contain his excitement, for he knew very well that strong emotions could get in the way of cultivating. If a cultivator was too emotional during his refining, then bad things might happen when he tried to make a breakthrough. The worst case

scenario was that one's cultivation base could become dangerously unstable, and he or she might end up with energy deviation, just like what happened to the Great Sage Cloud.

So it was critical for Austin to get a hold of himself and clear his mind during this critical stage. He was experienced enough to know that by now.

To get rid of all the negative emotions, Austin quickly took some time to regulate his breathing. Being a strong-willed cultivator, he was able to calm down and diminish the distracting thoughts in his mind right away.

In an instant, he had driven all worldly distractions and all of his internal demons away. He became so dedicated that he had forgotten all about the outside world and even himself. His sole attention was focused on directing the silver vital energy to run through his body, and to help him with the breakthrough.

Violet, on the other hand, felt ill at ease at that moment. But seeing that Austin was practicing steadily like a monk sitting in meditation, she dared not say a single word which might disturb him, however anxious she was.

Because she knew that this kind of opportunity was hard to come by, therefore Austin would definitely not give it up easily.

But she had every reason to feel worried. Those five powerful cultivators at the Mysterious Realm were at their heels, and could break in the cave any minute. The two of them were still in a precarious situation anyway.

The Supreme God

Chapter 246 Into The Premium Stage Of Earth Realm (Part One)

Austin was sitting in the room and his mind was a complete blank at that moment. It was almost as if he was not a person but some other non-animate object. Silver vital energy covered his entire body and inside of it, a huge amount of vital energy was flowing around powerfully like a great river.

The flow of the silver vital energy was condensed from the energy of the Great Sage Cloud. Since the Great Sage had been at the Holy Realm, his vital energy was obviously much stronger than Austin's. Whenever the silver vital energy met the gold vital energy inside Austin's body, the gold one would retreat back to his elixir field.

However, its retreat did not imply that the light golden vital energy Austin's Golden Sun Scripture had produced was at a lower grade than the silver vital energy of the Great Sage Cloud. In fact, both of these energies possessed the same intensity but Austin had just begun to practice his scripture while the Great Sage Cloud was extremely advanced. Just like a talented kid could not defeat an adult, Austin's early stage energy was less developed than Great Sage's advanced vital energy.

However, Austin's body did not reject the external energy like tissue rejecting foreign object. On the contrary, it gradually assimilated the entire energy bit by bit and nourished every single cell of his body. With time, this external energy became a part of his body.

The Great Sage Cloud had mastered his energy and especially prepared it for a youngster from the next generation. This meant that the energy would have become a part of anyone who was lucky enough to find it and his body would not reject it.

Therefore, it wasn't long before Austin sensed that the silver energy flowing inside his meridian was combining with his own golden energy. His body wasn't rejecting it and it was becoming a part of him. In fact, it would have been difficult to tell them apart now if they weren't of

different colors. The silver and gold strands shone at the same time inside him and nourished him completely.

The glitter this combination was exuding did not confine itself to the inside of his body, but rather, it surfaced out to his skin and he began to glow.

Violet saw to her great astonishment that the silver light surrounding Austin's body was slowly getting absorbed and becoming faint. Suddenly, it vanished in a second and the next moment, a combination of the two energies came out of Austin's body and his aura became stronger. The light was now shining alternatively in silver and gold.

Austin sat still like a god. His entire body was bathed in the double colored light and it was shining brightly and dazzlingly. A deep tune could now be heard faintly

have become a god right now, giving off silver and golden strands of energy which pervaded

Finishing his sentence, he bowed again. After that, he walked out of the room.

"Congratulations, master! So many congratulations for breaking through the premium stage of Earth Realm." Violet excitedly told Austin.

Violet also sensed her master had improved greatly this time. After all, she was Austin's slave and the higher Austin's cultivation base was, the higher would be the benefits she would reap.

Now Austin's cultivation base was several levels higher than that of Violet. She was willing to completely follow him everywhere now.

In this world of Martial Artists, only strength decided everything. The cultivators with greater powers earned respect. The weak had to live under the shadow and protection of these strong people to live a safe life.

Violet, of course, understood this point.

"Yes, yes, thank you. Let's go. We have stayed here for too long. The fight between those warriors at the Mysterious Realm and the two beasts must have ended now. We cannot stay here any longer," Austin told Violet.

The two of them walked outside and traced the path they had followed while coming there and very soon, reached the place where the three roads intersected.

The Supreme God

Chapter 247 Into The Premium Stage Of Earth Realm (Part Two)

Austin and Violet had already checked the left and the middle one out. The right one was new for them.

It was time to go there now.

Austin was eager to try it out. Chances were that more treasures lay behind that path.

"Violet, what do you think of this road on the right? Do you want to go and have a look?"

Austin asked.

"It's up to you, master." Violet answered sincerely.

But she had already sensed the eagerness in her master's mind.

However, Austin frowned suddenly. His sharp spiritual sense warned him that several figures were walking up behind them and would catch up to them soon.

"It's too late. The people from the Medicine Sect have come. Violet, hurry! Hide yourself in the Illusion Bead." Austin hurriedly ordered Violet

as he quickly took out the Illusion Bead from his space ring. It was in the same color as her name, Violet.

Hearing what Austin had ordered, Violet turned herself into a green smoke of light and drifted into the Illusion Bead.

had learned from Violet. It would allow him to cover his own features completely so that others could not

But I also passed out and woke up just before Your Graces arrived.

I am sure that you have killed the two beasts, right?"

Austin replied with great respect.

"Oh, I see. You are really a lucky dog to have survived the two diabolic beasts' attack. No one else would have lived to tell the tale!"

Steward Meng replied and sighed.

"Are you Walker?"

The Chief Elder suddenly asked Austin slowly while staring at him without even blinking. He seemed to have caught on to something.

Austin got nervous at once. 'Why is the Chief Elder staring at me like that? Is it possible for him to sense my identity even with my Aura Changing Skill?' Austin asked himself.

"Yes, Your Grace. I am Walker." Austin tried to be calm.

"You seem to be good at hiding yourself. The attack from the Purple Flaming Lion King and the three-eyed scarlet bull did not hit your body, but I saw it clearly by my eyes that the aftereffect of their vital energy force was quite powerful and wide enough to injure you. But even after that, you merely passed out, even though you're just at the energy gathering realm. You can fool others, not me!

Walker, I am quite certain that you are at least at the Earth Realm! What do you have to say for yourself? Why are you hiding your real cultivation base from Medicine Sect?"

The Chief Elder's gaze was extremely sharp. He was staring at Austin as if he was ready to teach him a tough lesson if the latter could not give him a reasonable and satisfactory reply.

The Supreme God

Chapter 248 Fleeing the Cloud Cave (Part One)

When Steward Meng heard the question of the Chief Elder to Austin, he became shocked. He looked at Austin's eyes with rage. It was a fiery look as if he wanted to kill Austin. He felt betrayed when he was fooled by Austin who used an illusion to look like a disciple in the sect.

"I don't think it's possible, Chief Elder. With all due respect, I have known Walker since childhood and we entered the Medicine Sect together. I know everything about him. His cultivation base is at the fifth level of Energy Gathering Realm. It can't be at the Earth Realm.

A muscular disciple in a black robe stepped forward and said.

"What do you mean to say? Do you think I was wrong with my judgment?"

The disciple lowered his head as he feared the sight of the Chief Elder's intimidating look.

"I apologize if you think I meant it to be that way, Chief Elder. I just felt that Walker seems strange. Since I grew up with him, I think I already know everything about him.

Even with closed eyes, I can surely distinguish if he stands in front of me.

And I know that the Walker we have to this day is not the same person I knew. He seems different. He is a different person from head to toe. The way he speaks, the way he moves, the way he opens his mouth. He is never the same person I have known for so long.

I was in confusion. I don't know why he turned out to be like that."

Austin slightly smiled. He never expected that there would be someone there who knew Walker very well.

illusion used by Violet could only copy the appearance of the person and nothing more. He could never mimic the other person's behavior and manners. That was why it would be easy for people who knew

right hand and a strong stream of vital energy force burst out from his body. It quickly suppressed the sword-lights, sword auras, and sword intents in

On the other hand, the act was just Austin's way to escape the scene. As soon as he launched the strike, he pushed off the ground with his feet and enabled the Wind-commanding Skill. He was able to run 20 meters in a stride. With a flash, he was already 40 meters away from the scene even before the Chief Elder had noticed.

"Haha. I'm sorry but I learned how to choose my battles. I won't waste my time staying there," Austin said as he continued his strides.

"He was at the premium stage of earth Realm."

The Chief Elder and Steward Meng stood there as if they were old trees. Their mouths were open as they didn't expect that Austin would be so decisive. Austin acted so fast that they didn't have their chance to react.

For the sake of escaping, he used all his strength for the strike. He also revealed his power as he was at the premium stage of the Earth Realm. The Chief Elder and Steward Meng thought that Austin was exceptional!

Immediately, the Chief Elder and Steward Meng noticed Austin's real level in cultivation base.

As soon as they noticed that Austin ran away, the Chief Elder and Steward Meng chased Austin. They went to the direction going to the outside of the cave. They traveled as fast as they could that they were like the shadows of two ghosts who just swept by.

"Steward Meng, that man stayed in the cave for a long time. He must have left with some treasures. Don't let him get away!"

The Chief Elder shouted with an angry tone.

The Chief Elder and Steward Meng both consumed much of their vital energy and strength when they fought over the Purple Flaming Lion King and the three-eyed scarlet bull. They already killed the two diabolic beasts in exchange of a great energy loss.

As the Chief Elder and Steward Meng left injured, Elder Guan of the medicine Sect was killed by the three-eyed scarlet bull. The Chief Elder's vital energy was greatly consumed in his final full attack on the Purple Flaming Lion King. With the help of medicinal pills, he recovered his few energy and was able to kill the Purple Flaming Lion King.

The Supreme God

Chapter 249 Fleeing the Cloud Cave (Part Two)

Austin got his chance to escape when he noticed that the Chief Elder and Steward Meng got hurt.

If the two were surely in a good state, and their vital energy was at the peak, it would be a lot more difficult for Austin to escape. The Chief Elder and Steward Meng were two Mysterious Realm masters.

Steward Meng bit his lip. Then he selected several Earth Realm cultivators from the twenty-odd Medicine Sect disciples and chased after Austin. They started the hunt as soon as they were picked.

On the other hand, the Chief Elder led the rest of the disciples and went deeper into the cave.

Austin was over two hundred meters far from the place. All of a sudden, his spiritual sense power told him that the people from the Medicine Sect were coming after him.

He sensed that Steward Meng led the team. Austin began to think of ways to get out of danger.

Moreover, Steward Meng enabled his bodily movement skill and tried to chase Austin. He took a lot of medicinal pills and ran at his full speed. Since Meng was a steward of the Medicine Sect, he always took a lot of medicines and pills to heal wounds and recover vital energy in case of emergencies.

It seemed that the people from the Medicine Sect wouldn't let him go easily. Catching Austin would give their satisfaction.

But Austin understood them. The group was the one who desperately fought the diabolic beasts yet Austin seemed to be the one who got the benefits.

It was the powerful crystal they were looking for. Austin took it at the Cloud Cave when he was still an illusion of Walker.

Quickly, he put the Wind-commanding Skill into full play and ran as fast as he could. He was as fast as a black light traveling through an open space. After a short while, he came to the front hall that was near the entrance of the cave.

that the enhancement of his cultivation base in vital energy would affect the improvement of his speed.

and climbed up. At the same time, the daggers moved upward as they were controlled by Austin's mind.

"Wow. I never thought this would be possible," Austin said to himself.

"Damn it! Where has the brat gone?" At this moment, Steward Meng already reached the slab stone square, but Austin was nowhere to be found.

He used his spiritual sense power to detect Austin. It faintly sensed a black shadow rapidly going upward the cliff.

Steward Meng's spiritual sense power could reach the distance within the scope of 200 meters. It just took him seconds to find the trace of Austin.

After several minutes, some Medicine Sect disciples who were at the Earth Realm rushed out of the cave and joined Steward Meng on the slab stone square.

"Steward Meng, shall we continue?" one of the disciples asked.

"Austin stayed in the Cloud Cave for so long. He surely got something. We have put so much effort just to get this far. No way that brat is taking advantage of our hard work.

One of you will return to notify the Chief Elder about the situation here, and the rest will accompany me to go after that man." Steward Meng replied.

At this time, with a flash of a black light, Austin already reached the ground that was above the cliff.

"Who would think that there is a cave hidden beneath?" Austin couldn't help but wonder when he looked down at the thick fog.

Before he finished wondering, he sensed that some people were approaching him from below. 'It seemed that the warriors of the Medicine Sect would not give up easily, ' he told himself.

Austin wasted no time. He immediately used his Wind-commanding Skill and rushed to Peace Town at full speed. He could not afford to be caught by his enemies.

The Supreme God

Chapter 250 Pursuit And Escape (Part One)

A few seconds after Austin left, a white figure right behind him rushed towards the cliff. He was the Steward Meng of the Medicine Sect.

He searched everywhere all over the cliff. But he only saw dense forest, with gusts of wind blowing through it, beasts roared on the ground and birds flew in the sky. No trace of Austin could be found from that point on.

This cliff was located half-way up the mountain, and there were many mountain roads arranged in a crisscross pattern: left, right, up the mountain and downhills. He had no idea which direction Austin took.

The mountain where the Cloud Cave was situated was hidden in the hills. Mountains rose up and down alternately in the huge green mountain range. The forests were dense and the grass growing there was higher than the average. The area was so complex that it would really close to impossible to locate someone there.

What's more, Austin used his Wind-commanding Skill in full blast, which multiplied his speed to the max in order to escape. The pale golden vital energy gushed out from Austin's body and wrapped around his feet, like a small tornado circling beneath his feet. Wherever he passed by, the grasses below him were broken off and the sand and rocks were broken apart. His every step catapulted him to about thirty meters far. He was running so fast that he was barely seen, like a black streak of lightning rushing forward.

And in order to get rid of the people pursuing him, he chose complex paths in the densest parts of the forest with dangerous terrain in order to hide his trail.

Thus, when the Steward Meng stood on the cliff, he had completely lost track of Austin's whereabouts.

After a while, the disciples of the Medicine Sect went to the cliff separately, they each held iron claws in their hands. Each iron claw

was tied with a rope. It was exactly the tools they had used when they climbed the cliff.

"Steward, which way should we go?"

a disciple of the Medicine Sect, who was in relatively older, asked.

will scatter all over the area. Although that man is quite flexible in bodily movement, he must still be stuck in this mountain range. You divide into four groups

As the distance between he and the Cloud Cave became farther and farther, Austin started to relax and his vigilance gradually subsided.

His trip to the Cloud Cave was definitely fruitful. The most precious gifts among them were undoubtedly these powerful crystals and the vital energy given to him by the Great Sage Cloud.

Moreover, he also obtained a batch of elixirs, secret books and, most importantly, a herbal pot.

While he was calculating his trophies, he suddenly felt a cold tingling at the back of his head. He had no idea what it was. But it was a sense of danger nearby, similar to when a prey had suddenly realized that the hunter had found him.

'Damn it! Has the Steward Meng already sensed my location?'

Austin suddenly deployed his spiritual sense behind him. Everything within 400 meters of the ground could be perceived by his mind.

No one there.

Only some inferior animals and birds inhabited the dense forest behind them. The whole area was silent as well.

However, this feeling of being stared at was getting stronger and stronger, as if a pair of eyes seemed to be watching him closely.

Over the dense forest, the Steward Meng's figure was like an arrow shooting through the clouds. The pair of wings came from a mutant diabolic eagle which was powerful and almost as fast as the true golden eagle when it flew in the sky.

The Steward Meng had been swirling around the dense forest and was able to cover a great area around the Cloud Cave peak in just a short amount of time.
