

The Supreme God

Chapter 281 The Dark Wind Sect Was At The Auction House (Part One)

There was nothing strange in the Ganges Auction House. It was just a normal and peaceful day for everybody.

Austin kept on staring at the giant crystal screen on the wall of his room as he sipped his tea from an antique cup. The crystal screen showed the auction inside the hall on real time.

In fact, Austin wasn't alone in this room. The maid who received Austin tried her best to flirt with him. This woman kept stroking her long, black hair in front of him. Once in a while, she walked back and forth in front of him, wriggling her round hips and swinging her waist all the way, just to attract his attention.

Austin, as a mighty, young man, had gotten into her charming aura. He was attracted to the maid but tried so hard to keep it on himself and pretended that he didn't see anything at all. Austin kept in mind what he was doing here all the time.

He quietly sat there and gently sipped on his tea cup. Austin looked like a decent gentleman in the maid's eyes who did everything to catch his attention. At last, she gave up because she thought that they were not on the same page. Disappointment could be seen in her angelic face. After a while, the maid curled her lips and just sat in the corner.

Then the auction began. It didn't have a strong start and nothing made Austin excited.

Only those people in the hall offered prices while those who sat in the VIP rooms seldom showed their offers.

"Ding!"

A sudden rang from the crystal platform was heard. It caught Austin's attention despite his deep thoughts.

The white headed auctioneer took a small silver plate from one of the maids standing behind him. The gentleman quickly opened his mouth and flashed a wide smile on the audience.

As the silver plate were shown at the auction, Austin found that there were two small and transparent jade bottles on it. There was a pale cerulean elixir that was rolling around inside each bottle.

when the auctioneer took the plate by his hands. Elixirs were equally some of the elixirs could directly improve the cultivation bases. With this, a lot

harder for Earth Realm cultivators to go into the next level every cultivator who had successfully stepped into the Earth the harder would be to break through the barrier and decided to break through, they must have made some achievements in their lives. But if they were able to get such a great elixir, an interest to the Energy-advancing Elixir dominating group among the sects in Violet Orchid Empire. The power of a sect was decided by actual supreme existence because they decided whether their sect could survive.

the Energy-advancing Elixir was one of the most popular way one wanted it. This elixir was so precious because there were only a few refiners in this empire who could make it. Anyone who According to other people, the highest level of refiners found in Violet Orchid Empire was only the third.

Luckily, this Energy-advancing Elixir was exactly a third level one.

This was the reason why lots of sects were willing to purchase it regardless of an expensive price. Not everyone was fortunate to get one because the supply could hardly keep pace with the demand.

"Good day everyone! Ladies and gentlemen, these two Energy-advancing Elixirs were made by the second most famous refiner of our empire, Master Yan. I believe that all of you must have heard of him and know how his capacity is!

I would just let this speak for itself. I need not say any words. It can be guaranteed that the elixirs would be a big help for all aspiring cultivators!" the auctioneer cheerfully added.

The auctioneer paused for a while. Then he waved his right hand and smiled at the audience. He said in a loud and energetic voice, "I officially start the auction for this. The upset price of each Energy-advancing Elixir is three hundred and thirty thousand vital energy crystals. Overall, it will be six hundred and sixty thousand!"

"Seven hundred thousand!"

Hardly had the auctioneer finished his words, someone had shouted his price loudly in the hall.

"One million!"

Another cultivator shouted right after the first one.

A lot in the crowd were shocked as gasps were heard all over the place. The second cultivator quickly added thirty thousand vital energy crystals without any hesitation. It seemed that he was determined to get it, and his wealth obviously gave him more power than others.

And needless to say, he was sitting in one of the VIP rooms.

The Supreme God

Chapter 282 The Dark Wind Sect Was At The Auction House (Part Two)

Energy-Advancing Elixir was not a common thing to see and to have two of it would be phenomenal. Because of this, the cultivators were hyped and in just a minute, one million went far behind other bidders.

Austin looked at the increasing price as he was quietly sitting on his chair. His fingers were crossed as he observed each person in the room.

A hint of amazement could be seen on Austin's face. He bitterly smiled as the auction kept on going.

The popularity of Energy-advancing Elixir was beyond his expectation. He didn't foresee that its price would exceed to one million vital energy crystals in an instant.

Austin underestimated these two small elixirs and did not notice how its price would turn out. Suddenly, everyone inside were thrilled as they witnessed how the auction went on. In the end, Austin understood the position of high level refiners as he saw how cultivators needed elixirs just to rank up.

He thought that it would be convenient if he could be able to refine such elixirs. Whenever he was lack of vital energy crystal, he could easily refine a couple of elixirs. If he could successfully make them, he wouldn't have to worry about being poor the rest of his life.

When he realized it, Austin made up his mind that one of his goals was to take more time to practice his refining skill.

As the realization struck Austin, more cultivators of the Earth Realm were trying to win the auction. Austin already achieved the premium stage of Earth Realm, and these two elixirs were unable to help his cultivation. He was just sitting to observe the crowd.

The voice of bidding kept going. Another voice was heard as the other one finished shouting his price.

All of a sudden, the price of these two Energy-advancing Elixirs reached one million and forty thousand vital energy crystals. At this moment, there were just few cultivators in the hall who were bidding.

But once in a while, someone in the VIP Rooms would shout their new bidding prices. After all, it was a large sum for ordinary Earth Realm cultivators and most of them were unable to afford even half of its price.

"What a nice way to introduce myself. I'm one of the Wolf Generals from the Blood Wolf Team, and I rank at the eighth. I'm offering one million and fifty thousand vital energy crystals for these two elixirs. Please do me a favor today and do the Blood Wolf Team a favor!

Please let me take them with me, and please receive my appreciation in advance.

"Hey you!

Uh-huh. Okay, fine. It seems that you don't know what's better for you, young man. Are you really going to be against our Blood Wolf Team? Are you sure?" the General shouted with threat in his voice.

Austin saw the furious eyes of the General as he turned to look at the direction where the voice came from.

"Ha ha. Mr. General! We're in an auction house now, so we'd better do what we should do here. The elixirs will belong to the person who offers the highest bidding, right? That is the rule here!

And, I didn't hear that there is a rule saying that people should give them away to your Blood Wolf Team at a lower price!

I don't care if you want to put me on your enemy list. Let's see if you can do any harm. The Dark Wind Sect will surely give you what you deserve!"

It was the man's shout all over the place.

The auction house was filled with surprised cultivators. They never expected anyone would be brave enough to answer the Blood Wolf Team in that manner. Also, nobody knew that the Dark Wind Sect would show up in this town.

If it said that nobody was willing to provoke Blood Wolf Team, then it should say that nobody dared to tease the Dark Wind Sect.

Dark Wind Sect was a mysterious organization in this empire, and their disciples were hidden deeply. They had no contact with anyone

and seldom showed up in public places. It was said that there were only few disciples in Dark Wind Sect and maybe just dozens of people.

A lot of people would say that every single person in the Dark Wind Sect was terrible to deal with.

Everyone in this sect already achieved a level of or above the premium stage of Earth Realm. Most of the disciples in the sect were cultivators of the Mysterious Realm, and only a small part of them weren't.

The Eighth General of Blood Wolf Team dared not to continue. He cast a furious glare at him and had to sit back on his chair, getting no other way to go.

The Supreme God

Chapter 283 Clue To Finding The Dark Bone Gloomy Fire (Part One)

Anyone who has lived in the cultivators' world knew what the name "Dark Wind Sect" meant, so when the eighth Wolf General of the Blood Wolf Team heard this, he resigned himself by keeping quiet because no one dared offend the sect. At this point, threatening them with "Blood Wolf Team" was useless.

"One million and 700 thousand vital energy crystals!"

It was with gritted teeth that the eighth Wolf General announced his bid.

"Two million vital energy crystals!" a familiar voice rang out from the Dark Wind Sect's position.

Because the voice was dull, it was impossible to tell if the man was pleasant or angry.

When the eighth Wolf General heard this, he became quite upset. Since he was a cultivator of the medium stage of Earth Realm, owning two Energy-advancing Elixirs would enable him to make a great breakthrough in vital energy cultivation, and allow him entry into the premium stage of Earth Realm.

However, two million vital energy crystals were already beyond his financial capacity since the total amount that the five Wolf Generals brought this time was only 1 million 900 thousand.

So, the two Energy-advancing Elixirs would undoubtedly go to people from the Dark Wind Sect.

The auctioneer was quite pleased with the final bid price. He thought one million vital energy crystals was very satisfactory for the two Energy-advancing Elixirs before the auction started. But two million was twice that amount and already a bonus!

After he announced the result of bidding for the two Energy-advancing Elixirs, a waitress came out holding a black wooden box. Then before the whole audience at the auction, she put the mysterious box on the crystal auction block in front of the auctioneer.

House, managed to find was a clue to finding the

Let's pause awhile to think. Here's what we know so far—each Unearthly Fire is equipped with tremendous power that can destroy heaven and earth. But, even if we know the clue, we don't have the skills nor the expertise to obtain and refine it.

So, we're going to bid out this clue and let cultivators with the skills and ability to search for it. This way, we would not be wasting precious time doing the impossible.

You may have heard that the Unearthly Fires all over the world are divided into two categories—Heavenly Fire and Earth Fire. This time,

we are bidding for the Dark Bone Gloomy Fire, which ranked eighth in the list of the Earth Fire.

This clue of the Dark Bone Gloomy Fire will have a total of five copies to be auctioned by our Ganges Auction House. This means anyone who gets the clue will be facing four competitors in the search. Do you understand?

All right, I have said enough. Dear friends, take time to think about this carefully before bidding."

Among those terribly disappointed by the last announcement was Austin.

And he had reason to be frustrated. First, they were only bidding for a clue and not the real Dark Bone Gloomy Fire. Second, even if he won the bidding, there were still four competitors that he had to face. And last but not the least, the clue only gave a 40 percent chance of finding the Unearthly Fire.

It was truly disturbing news. In the auction house, many people who initially planned to spend a lot of money to bid for the Unearthly Fire promptly canceled their participation.

So, Austin decided to wait and observe the proceedings. It would give him a sense of how much people would be willing to bid to win the clue. If the prices weren't too unreasonable, he would take a chance.

Banging the gavel, the auctioneer started the bidding. "Everyone, the reserve price for the Dark Bone Gloomy Fire is one million vital energy crystals. We shall start the bidding."

He stood and waited for people to make offers.

The Supreme God

Chapter 284 Clue To Finding The Dark Bone Gloomy Fire (Part Two)

But since the Unearthly Fire had little significance for ordinary cultivators, and the only thing being auctioned off was a clue to finding the Dark Bone Gloomy Fire, there were hardly any bidders.

The auctioneer did say earlier that it was only useful for pill refiners and fire cultivators.

So, he was somewhat disappointed over the crowd's lack of enthusiasm.

Just when the auctioneer was starting to think whether the auction of the clue to the Dark Bone Gloomy Fire was going to be a failure, someone spoke up.

The first bid was announced.

"1 million 100 thousand vital energy crystals!"

"1 million 150 thousand vital energy crystals!" a second one called out.

A few moments later, the highest bid was placed at 1 million 500 thousand vital energy crystals.

The number of bidders dwindled, and the interval between each bid became protracted because they needed to wait awhile before starting a new bidding.

Finally, when the bid price came up to 1 million and 530 thousand, the bidding stopped after a very long wait.

When the auctioneer on the crystal stage was about to announce this as the last bid price, Austin finally decided to make an offer.

As a pill refiner, Austin was well aware of what he could gain by obtaining the Dark Bone Gloomy Fire. In case he won the clue and found the Unearthly Fire, he could further enhance his pill refining skill.

Although he would only be bidding for information on how to obtain the Uneathly Fire, he still stood a better chance of finding it than someone who didn't have a clue. It is said gaining wealth involved taking a risk. Maybe if Austin strove hard enough, he would be successful. After all, Austin never lacked spirit when it came to fighting.

"1 million 600 thousand vital energy crystals."

He offered the bid price through an audio button in his room, so no one was aware of his identity.

Everyone was aware that the power of spiritual sense was extraordinary, and was even harder to cultivate than the vital energy.

So, it was quite impressive that Violet improved so quickly in terms of the power of the spiritual sense.

And it seemed she was right about the powerful crystals being so useful in the cultivation of the power of the spiritual sense.

This revelation made Austin quite eager to immediately start training to improve his power of spiritual sense with the powerful crystals.

As Austin communicated with Violet through his mind, five stalkers sneaked up from behind. Now Austin could get a clearer idea of them with his power of spiritual sense.

"Violet, the five stalkers are not weak. One of them is at preliminary stage of Earth Realm, while the rest are medium-stage of Earth Realm cultivators.

Each one is known to have a rich fighting experience, and their vital energy forces have been compacted inside their bodies making them powerful fighters.

I assume that they all belong to the Blood Wolf Team.

So, they will be tough to deal with. I'm afraid I can't do this alone.

While it may not be hard to get rid of them, I am telling you it will not be simple if I want to kill them all.

"Humph! With this never-ending battle with the Blood Wolf Team, I'm certain they want me dead, but I want to kill them even more!"

After saying this, Austin pondered about their situation.

"Hahaha! Master, you can certainly try. We have a premium stage of Earth Realm cultivator, as well as a medium stage of Earth Realm cultivator. Since you're not weak and have several trump cards on hand, there are few opponent in your realm who was able to fight you. Perhaps, we can kill five people altogether."

"A premium stage and medium stage of Earth Realm cultivators?"
Austin mumbled.

Although stunned, Austin immediately understood the implication.

"Violet, do you mean to say that you've made a breakthrough?"

And your strength is equivalent to a medium stage Earth Realm cultivator?"

The Supreme God

Chapter 285 Honey-trap (Part One)

Austin was astonished when he heard Violet had broken through the medium stage of Earth Realm. It was unbelievable that the powerful crystal greatly helped Violet's cultivation. As Austin and Violet communicated internally, the five Wolf Generals of the Blood Wolf Team, who had been trailing them for a long while, were getting closer.

Amongst the five Wolf Generals, Austin's spiritual sense could perceive that one had reached the preliminary stage of Earth Realm while other four were respectively at the medium stage of Earth Realm. Considering the adverse situation—the conflict between the two sides and the significant difference in their numbers—Austin rushed out and run into an isolated alley, aware that the Wolf Generals outnumbered them. The five members of the Blood Wolf Team followed Austin closely, not losing his trail.

At the end of the alley stood a big deserted house. Two stone lions coated with dust which looked imposing squatted on both sides of the entrance. Upon walking into the courtyard, one would be welcomed with such a desolate scene—weeds had swallowed the entire yard, and cobwebs were scattered everywhere. The place looked spooky and totally abandoned.

Finally, on Austin's track, the five Wolf Generals arrived at the entrance of the deserted house. "Is this the place where that guy stays? Look, the house is very dilapidated and looks uninhabited for a long time. Did that guy sense us trailing him so he purposely let us follow him here?" said one of the Wolf Generals. "Hum, Austin is a warrior whose cultivation base is just at the Energy Gathering Realm.

Are we, the five warriors whose cultivation base is at the Earth Realm, afraid of that guy playing some tricks on us? Let's go inside and see what he wants to show us. I bet he is here," another one of the Wolf Generals retorted. They didn't believe that Austin would do something unfavorable. So, they stepped in the house confidently. As they entered the courtyard, they were stunned to see that state of its landscape.

What came into their views was a large piece of land in the courtyard covered by wildflowers and bushes. As it had been deserted for years, shrubs and vines grew freely.

obsolete yard. Such a beautiful young girl! She was beautiful and had a nice figure.

man would wish to sleep with her. The girl looked no more than eighteen years old. Perfect figure, delicate face, and upright breasts—every part of her body was an embodiment of allurements. Her skin was as white as a pearl, and her eyes were big and bright that everyone couldn't help but to stare at her. No one was as beautiful as her! A voluptuous creature! That kind of beauty should only exist in fairy tales, not

enough to lure any man! Every man who would lay his eyes on her would undoubtedly fall in love with her! The moment the girl saw the five Wolf Generals break-in, she uttered "Ahhh!" She was a little afraid at the sight of the

she could only stand frozen, and let fate decide what would happen next. She definitely looked like a helpless kitten, whom everyone would show sympathy for and would want to

Out of fear, the girl asked them a series of questions as if only she and her master lived in that area. For the five Wolf Generals, the only thing that could interest them was to have sex with any beautiful girls, much more with the girl who was

head to foot, and as if magnetized, their eyes instinctively landed on

gives us what we want. How lucky we are! It is a chance of a lifetime to meet such beauty here. Unbelievably, we are such lucky dogs. I can never ever be more fortunate than now!"

her seductive figure. "Miss, do you live here alone? Who is your master?" another Wolf General asked. "My master's name is Austin. I once worked in Pink Delights House, an

One day, I met a man who treated me well and promised to take care of me for the rest of my life. So, he redeemed my freedom from Pink Delights House, and I was placed here. Then he became my master." The girl explained shyly. "Haha. Compared to us, it is Austin who is the lucky dog. It is unbelievable that this guy, a sly old fox, has a beauty to always accompany him. But what annoys me is how he hides her in such an isolated courtyard to avoid being spotted. How mean he is! My beauty, your master, Austin, is a selfish poor man. Why don't you choose me to be your master instead of him? If you do so, I will give you everything you want, and I promise that you will be happier. You don't have to live here and suffer from hunger anymore! Will you be with me?" The twelfth Wolf General swore, patting his chest to look more dignified and make the beauty believe in his words.

"Are you serious? Will you live up to your words? Being alone for years, I have endured contempt and suffered a lot.

What I want is a stable life. In fact, if anyone of you promises to give me a stable life, I will choose you to be my master." The girl looked at the twelfth Wolf General, tears welling up in her eyes. Hearing her plea, the twelfth Wolf General was ecstatic as it seemed that the girl was willing to be with him.

"Is it true that she will be with me? Am I dreaming? If I have her to accompany me for the rest of my life, I will be so happy!" The twelfth Wolf General asserted, deliriously overjoyed at the thought of the girl's company. "You're not dreaming, I am your girl from now on.

Believe it or not, I am standing in front of you and never to leave you." The girl grinned at him. "That makes a deal. Now, you will follow me wherever I go and won't disobey any of my commands. If you really want to be my girl, I want to give you a test. So, will you have sex with me? I can't wait to eat you up!" Heart occupied by sexual desire, the twelfth Wolf General was totally dominated by his lust. The only thing he wanted to do was to immediately take possession of her body. "Don't hurry. I once worked in Pink Delights House, and I know the duties of girls like me. Since you are my master, as you like, I will do anything you want. There is a vacant room on the left. If you really want to take care of me.....then...." A red flush suffused the girl's cheeks as she said that.

The Supreme God

Chapter 286 Honey-trap (Part Two)

Nervous, she fiddled with the corner of her dress and with her head down, afraid of making any sound.

"You four are my great buddies, right? It is time to show the solid friendship between us. Now, I don't want to be disturbed by anyone while I am "cultivating" with my girl. If that jerk, Austin, whose cultivation base is at the Energy Gathering Realm, dares to come here, I am assured that you four can prevent him from spoiling my fun." The twelfth Wolf General grinned at his mates.

As soon as he finished his words, he could not wait to sling the girl over his shoulder and rush into the vacant room.

"My boy, it is not fair that we stay here while you enjoy yourself. There is no such thing as free lunch. We should at least have a bite of your lunch."

One of the Wolf Generals criticized with a smile creeping out of his mouth.

"Okay, it is time to stop joking. I have inspected the area while you four stared and drooled at the girl. I am sure that Austin must have hidden somewhere in the courtyard. We must find the bastard and kill him before we leave. We have no time to waste. The longer we procrastinate, the more likely he might escape."

His words seemed very plausible. All the Wolf Generals except the twelfth Wolf General agreed that the first thing they should do was to find Austin. They walked into the inner courtyard one after another, and cautiously looked around.

Suddenly, a weird feeling loomed above them.

"Be careful. I can sense that there is something unusual. These are signs of array exclusively left by someone whose cultivation base is at the premium stage of Earth Realm."

One of the Wolf Generals warned his teammates.

Hearing his warning, everyone abruptly stopped moving and held their breaths, their eyes opened in case of any dangers.

"Shit, they found out the array in such a short time."

Hiding in the shadows, Austin used Magical Aura-changing Skill to hold his breath as long as he could to avoid being spotted. He had planned to trap and annihilate the four Wolf Generals by using Four-sided and Eight Trigrams Array.

However, things did not turn out as planned. As the four Wolf Generals were about to fall into the Four-sided and Eight Trigrams Array trap set by Austin, his trace had already betrayed his whereabouts.

It was not a bad plan after all. Austin was somehow comforted when he saw that two of the Wolf Generals walking in the front had fallen into the Array.

for the remaining two Wolf Generals who walked

the first two in my array, then I can spare time to defeat the others by hesitation, Austin promptly waved the array flag. Then, the Four-sided and

by cultivators whose cultivation level was below the medium stage of
Earth Realm.

their combined vital energy force was almost equivalent to that of a
cultivator whose cultivation base was at the premium stage of Earth

After all, the four Wolf Generals were much more experienced veteran
generals. When it came to cultivation base, they were all top
cultivators. Countless battles laid a great foundation for them to cope
with any perilous situation.

'In light of the current situation, it is not easy to defeat the four Wolf
Generals if they ally their forces together. They can possibly break my
Four-sided and Eight Trigrams Array anytime soon.

It is unlikely to kill them only by the array. I have to come up with other ideas.

If Violet can do me a favor this time, it shouldn't be hard to defeat them.'

As he thought this, Austin communicated with Violet with inner thoughts.

"Violet, have you finished that Wolf General who is obsessed with you?"

Austin and Violet had a strong spiritual sense, and they were capable of communicating with each other by inner thoughts within a proper distance.

"Don't worry, master. I have completely sucked up his vital energy. He is now useless and cannot threaten us at all.

Master, though you commanded me not to suck human cultivator's vital energy to cultivate, I think you won't mind that I sucked his vital energy for he is our enemy."

Violet's sent his inner thoughts to Austin.

"Violet, I am not stubborn. The reason why I warned you not to do this is that I hope you do not kill people at your own will, lest you should be controlled by evil desire. As for these bad guys grappling with us, you are allowed to suck their vital energy.

This Wolf General is a free resource for you to improve your cultivation base. Enjoy it!" Austin told her, obviously happy at how Violet had done a great job at eliminating one of the Wolf Generals.

"Master, how do you think of my Honey-trap?"

Violet asked proudly as she seemed satisfied with her trap.

Austin smiled. It was undeniable that no man could ever escape Violet's Honey-trap. Her disguise as a seductive damsel was always enough to lure any man.

"All right, let's get down to business. As you have already finished one of them, we have to fight the other four Wolf Generals. Two of them are trapped in my array, while the others are outside my array. Now, we must first work together and defeat the other two outside. Then, the two inside the array can be trounced."

"Okay," Violet responded and acted immediately.

The Supreme God

Chapter 287 Kill Five Wolf Generals! (Part One)

The tenth and eleventh Wolf Generals were fully urging their vital energy force to attack the Four-sided and Eight Trigrams Array deployed by Austin from outside.

Suddenly a cry for help could be heard.

From the left wing-room, a young female with her hair hanging loose on her shoulders rushed toward two Wolf Generals. She was covered by only a few pieces of gauze.

"My lords, the fat is in the fire now! The lord who came with you was discovered. He was wounded by my master who also threatened to kill me for my collusion with outsiders! Please go help him quickly!" She screamed as she ran up to the Wolf Generals.

When the woman stopped in front of them, the eleventh Wolf General spoke, his voice full of rage.

"What happened? Is it Austin? How dare he wound my twelfth younger brother!"

Growling to himself, he added, "Austin, I will kill you with one slap."

He was about to rush forward to the left wing-room, when all of a sudden, the tenth Wolf General saw something suspicious flash across the woman's eyes.

An illusory black fox claw appeared, wrapped in turbulent power, and fixed on the other Wolf General's back as he headed to the left wing-room.

"Watch out, brother! This female is not what she seems to be."

Despite his shouting, it was already late.

Before he could turn around, a surge of power had poured into the eleventh Wolf General's back.

In desperation, he deployed all the surging vital energy force to his back, forming a protection hood.

Boom!

A great force was produced from the clashing of energy, throwing the eleventh Wolf General forward.

Austin knew the tenth Wolf General was in utter amazement as he stood there silently.

Opportunity knocks but once. This was his chance to launch a surprise attack.

Motivating his thought, Austin propelled a Spiritual Sense Flying Needle, aiming it at Wolf General's Soul Sea.

Meanwhile, Violet controlled the huge illusory fox claw, attacking the injured eleventh Wolf General with every stroke, keeping him on the heels.

Violet had also achieved medium stage of Earth Realm in her cultivation base. Born into the Nine-tailed Fox family, she was quite swift in movement and good at casting illusions. Now the eleventh Wolf General was under relentless attack from both fox claw and illusion.

Despite his good battle ability and rich practical experience, he could barely stand his ground due to his serious injury from Violet's sneak attack.

Violet's attack was too fierce for him to withstand and danger was lurking from all sides.

The tenth Wolf General felt a causeless sharp pain whirling in his brain upon being caught by Austin's Spiritual Sense Flying Needle.

It was as if an iron needle were stirring his brain.

Austin seized this opportunity to send his Violet Royal Sword blade forward and employ Illusory Swordsmanship, more than thirty sword-lights sprung out like splashing water.

The tenth Wolf General had barely relieved himself of the sharp pain in his brain when he found another thirty-odd sword-lights approaching him. Panic-stricken, he was forced to fight a life-or-death battle.

In a moment of desperation, he instantly delivered another illusory tiger to defend himself from the sword-lights.

The majestic-looking tiger howled, baring fangs and brandishing sharp claws.

But the sword-lights drew near and hit hard at the illusory tiger before it could fight back.

Bang!

With a crisp sound, the newly-formed illusory tiger couldn't bear the force and quickly vanished into nothingness.

The Supreme God

Chapter 288 Kill Five Wolf Generals! (Part Two)

Crack!

Wrapped with remaining force, the sword-lights moved on to the Wolf General, piercing a dozen deep holes into his body. Blood spurted out in slow continuous pulses.

Losing his momentum, he backed away as fast as he could.

However, Austin continued to cultivate his thought, and a black light flashed in front of him. In the blink of an eye, the tenth Wolf General found one black dagger flying towards his chest like a bolt of lightning.

The dagger appeared so abruptly that the tenth Wolf General could only resign himself to death as he watched it plunge into his chest.

Gritting his teeth, he raised his left hand and tried to block the dagger.

Crack! His right hand flew out in front of him with a stream of blood.

Before he could regain his breath, another dagger appeared, making its way directly towards his chest with tremendous power.

In desperation, he reacted the same way as before and waved his right hand to block it.

The other hand also flew out, accompanied by another stream of blood.

Austin laughed as his body jumped forward. His bones creaked as if firecrackers had been set off. His blood was fully boiled, with 5000 pounds of strength, his fist flew through the air toward the Wolf General's chest. A gust of violent wind howled as his fist passed through the air, like thousands of men and horses galloping forward.

The tenth Wolf General was so severely wounded that he wondered how he could manage to survive this violent blow.

Facing the constriction caused by the fist, he couldn't move any part of his body, nor could he breathe. His will utterly collapse.

spare

ignored his cries for mercy, his fist continued to crush him with the weight of 5, 000 pounds of divine power all pouring into the chest. Immediately, the tenth Wolf General's body exploded with a roaring bang, splintering into several broken pieces that scattered everywhere.

With shock at the news, Blood Wolf Team commander stood up quickly, his face pale.

"That is impossible! You must be wrong. All Soul Badges broken? Did you observe carefully?" commander asked in disbelief.

"It's God's truth! I vouch for what I said, my commander," the reporter said surely.

The broken Soul Badges meant that five Wolf Generals were definitely dead.

Commander was certain that those five Wolf Generals had gone after Austin per his request.

'Could it be possible that Austin is so invincible that he killed multiple members of Blood Wolf Team? He has butchered six warriors with the cultivation base of Earth Realm and a number of men with the cultivation base of Energy Gathering Realm, ' Commander mulled over these startling facts.

"Ha-ha-ha, good, good, good, very good. Young hero! It is true that the younger generation will surpass the older one. I don't believe we have encountered such an outstanding youngster.

But for a young man, showing the full extent of his ability can easily prompt an early death.

Please see to it that everything is prepared. I am going to visit Sun Sect in person. I must urge Sun Sect to hand over Austin!

Or else we, Blood Wolf Team, will vow to avenge our dead brothers on the entire Sun Sect.

A war will be declared if need be!

We will show the world what happens when one irritates the Blood Wolf Team!

We will not budge because of this damn lad with a cultivation base of Energy Gathering Realm!" Commander stood with his head held high as he delivered his passionate speech.

Half a day later, like the wind sweeping the last clouds away, more than a dozen red flood dragon horses galloped from the headquarters of Blood Wolf Team toward Sun Mountain.

The Supreme God

Chapter 289 Refining Of Energy-promoting Elixirs

After killing five Wolf Generals of the Blood Wolf Team, Austin went back to the hotel.

He took out the rag he had bought with over a million vital energy crystals at the auction and began to examine it carefully.

There seemed to be a map on the rag. Although some of the details on the map had started to fade, they were still distinguishable.

On the map, Austin saw rolling mountains with a river on each side. The highest mountain peak was marked with a circle.

'Does this circle indicate the location of the Dark Bone Gloomy Fire?

But there are dozens of these mountains there, so trying to find the Dark Bone Gloomy Fire by just using this map will be like trying to find a needle in a haystack!' Austin thought in frustration.

He continued to stare at the map for a while before putting it away. 'The only way I can find the Dark Bone Gloomy Fire is if I happen upon it by chance. There's a very slim possibility of me finding it with this map.

It seems that I spent over a million vital energy crystals on it for nothing.' He was very disappointed.

There were about ten days left for Austin to retrieve the medicinal materials for cultivating stage three of the Overlord Body-refining Formula from the elixir shop.

During this period, Austin planned to spend most of his time on elixir refining.

Although he had just begun to study this skill, he was already fascinated by it.

Next, Austin spent about six hours on practicing the Golden Sun Scripture formula.

Vital energy cultivation was the foundation for a cultivator, so Austin took some time to cultivate Golden Sun Scripture every day.

However, ever since he had made a breakthrough by reaching the premium stage of Earth Realm, he felt like he had hit a plateau in vital energy cultivation base.

There was no sign of another breakthrough for him.

Austin knew that his progress in vital energy cultivation had been very fast. It had taken him less than a year to advance from grade two of Energy Gathering Realm to the premium stage of Earth Realm.

No one would believe that he had progressed at such a high speed.

Normally, it would take an ordinary cultivator's whole life to make a breakthrough to the premium stage of Earth Realm. In the Sun Sect, many stewards and cultivators at the premium stage of Earth Realm were already forty or fifty years old, and some of them were even about sixty years old.

Austin knew that a cultivator shouldn't only focus on the speed of his progress, but on the stability of the realm and quality of the vital energy as well.

If he pursued the speed of progress alone and neglected the strengthening of the realm he had reached, his cultivation base would be affected.

His capacity and skill wouldn't be on par with the cultivators who had consolidated the cultivation realms they had made a breakthrough to.

Austin wasn't eager to just make a breakthrough. He wanted to keep strengthening his vital energy

Golden Sun Scripture for several Circulations of Vital Energy, Austin took out the herbal pot and the medicinal materials he had bought for Energy-promoting Elixir refining. With the quantity of materials he had, he'd

The moment the snake-shaped fruits hit the flames, they turned into a mass of green liquid with a trace of chill. Austin eliminated the impurities in this liquid and finished extracting the essence of the second medicinal material.

Now, it was time to extract the essence of the third medicinal material, bodhi flower.

Austin threw three bodhi flowers into the herbal pot. After a short while, they were transformed into a drop of light violet liquid.

Now, the essence of all the three medicinal materials for Energy-promoting Elixir cultivation had been extracted successfully.

For the second step of elixir cultivation, Austin needed to mix the essences of the different medicinal materials.

Under his control, the liquid masses in the pot began to blend with one another, creating a series of sizzling sounds.

An hour later, the prototype of an elixir with a rough surface formed in the flames.

'Wow! It's so easy!' Austin thought to himself.

This was the first time Austin was trying to refine Energy-promoting Elixir. He was a little surprised that the first two steps had gone so well.

The third step was to solidify the elixir.

It was a critical step and would need a lot more vital energy than what Austin had used in the first two steps.

He took a deep breath. After several hours of refining, he had consumed about fifty percent of his vital energy to maintain the temperature of the flames in the herbal pot.

He summoned the vital energy stone that was in his belly and a large amount of vital energy gushed from it.

Soon, Austin felt the vital energy in his energy meridians reach its peak again.

He realized that the vital energy stored in the vital energy stone wasn't sufficient for his current vital energy cultivation base.

'It seems I should replenish the vital energy in the vital energy stone,' he thought.

He transferred a stream of vital energy into the herbal pot and the flame inside it immediately intensified.

Under the control of his spiritual sense power, a cluster of boiling flames quickly covered the Energy-promoting Elixir prototype.

Under the pressure of the flames, the elixir began to solidify.

However, after a few seconds, Austin heard a fizzing sound coming from the herbal pot. A cloud of heavy smoke rose from the Energy-promoting Elixir prototype.

'Damn it! The flame is too strong!'

Austin was disappointed by the result.

He had spent so many hours on elixir refining only for it to fail in the end.

Elixir refining was such a tedious job! It seemed that it wouldn't be easy to stick to it if he didn't have enough patience and stress tolerance.

The Supreme God

Chapter 290 Cultivation Of The Spiritual Sense

Austin's first effort to refine the Energy-promoting Elixir had failed. He collapsed to the ground from fatigue. He really needed a rest.

After a long time, he stood up again and began his second experiment.

In this way, he failed three times in succession and wasted three portions of medicinal materials.

However, little by little, he became acquainted with the refining process of the Energy-promoting Elixir. By his third attempt, he had obtained some basic experience on how to control the size and temperature of the flame during the refinement.

An hour later, during his fourth attempt, he found that an elixir was finally taking shape.

The elixir glowed with a beautiful faint blue luster like a diamond.

Austin opened the lid of the herbal pot and picked up the elixir. Then, he carefully put it in a jade bottle.

Finally, he had succeeded in refining an elixir.

He took a deep breath, and then put the jade bottle under his nose and sniffed. The strong fragrance emitting from the elixir was refreshing.

He felt that the quality of the elixir wasn't bad considering it was the first one he had ever refined.

Cheered up by his success, Austin continued his refining of the Energy-promoting Elixirs.

He succeeded the second time.

And then the third.

He kept refining the Energy-promoting Elixirs. . .

The final time was a success too.

In the end, Austin had refined seven Energy-promoting Elixirs from the ten portions of medicinal materials he had procured.

The more he practiced, the better the quality of the Energy-promoting Elixirs he refined became.

This was the result of the continuous improvement of his alchemy.

Austin quickly threw on his disguise so that he could bring these seven Energy-promoting Elixirs to the elixir store where he had sold the muscle-generating powder last time.

Once he left the inn, he cautiously chose an alley with fewer people.

He knew that he had made many enemies recently.

His biggest concern was the Blood Wolf Team since he had killed dozens of its members. All those members hadn't been strong and their cultivation bases had been at Energy Gathering Realm or Earth Realm.

Of course, Austin had also killed Raymond, the grandson of the Chief Elder of the Flaming Sun Valley. Even though he was doing his best to be careful, he was still afraid that the Chief Elder of the Flaming Sun Valley would track him down to avenge his grandson's death.

The Flaming Sun Valley was a big sect that was stronger than the Sun Sect. With its power and resources, the Flaming Sun Valley could easily find out that Austin was involved in Raymond's death.

all her time in cultivation. She hid inside the Illusion Bead every day and seldom contacted Austin unless he took the initiative

"Master, I have completely stabilized at the medium stage of Earth Realm.

Now, I'm gonna get ready for the premium stage of Earth Realm.

Master, do you want to use the powerful crystals to cultivate your spiritual sense?"

Violet was so clever that she could figure out Austin's thoughts at once.

They had found a large number of powerful crystals in the Cloud Cave which were enough to support both of their cultivation at the same time without any conflict.

"Yes. How do I use them?" Austin asked.

"It's very easy. You just need to hold the powerful crystal in your hand and lock it with your spiritual sense so that you can absorb the special energy from it. By using that special energy, you can gradually cultivate your spiritual sense and thus enhance it," Violet explained.

Austin took out a piece of powerful crystal from his Space Ring, placed it in his hand, sat cross-legged, and released his spiritual sense to lock the powerful crystal.

Sure enough, Austin felt a peculiar energy coming from the powerful crystal. As soon as his spiritual sense encountered the special energy, he felt a sense of comfort take over him.

This kind of energy had a very nourishing effect on spiritual sense.

Austin calmed down and let his spiritual sense tightly lock the powerful crystal. After a while, he sensed the peculiar energy contained in the powerful crystal gradually infiltrate his spiritual sense and become the nutrient that strengthened it.

Half a day later, Austin had completely absorbed the energy of the powerful crystal in his hand, and his spiritual sense was also strengthened.

He was delighted to find that after absorbing the energy of a piece of powerful crystal, the range of his spiritual sense had increased to about four hundred and fifty meters.

In other words, the energy contained in a piece of powerful crystal could increase the strength and range of spiritual sense by fifty meters.

Spiritual sense was a special skill that was extremely difficult to cultivate, but the powerful crystal eased the process along. It seemed that Violet was right to value the powerful crystal so highly.

For the next few days, Austin immersed himself wholeheartedly in absorbing the energy of the powerful crystals.

Five hundred meters.

Five hundred and fifty meters.

Six hundred meters.

Six hundred and fifty meters. . . .

Five days later, he found that his spiritual sense could reach a distance of nine hundred meters.

In the process, he absorbed the energy of ten pieces of powerful crystals.

The strength of his spiritual sense had also more than doubled.

Austin was very satisfied with the current strength of his spiritual sense.

Finally, he stood up and stretched his body. He had been sitting motionless for five days.

His eyes brightened when he suddenly remembered what day it was.

Today was the day that Austin had an appointment with the shopkeeper of the elixir store. He could go to the elixir store and collect the medicinal materials needed for his cultivation of the third stage of the Overlord Body-refining Formula.

If one cultivated the third stage of the Overlord Body-refining Formula, his bones, muscles, and veins would be thoroughly reformed and he would be able to resist the invasion of most toxins, so almost no disease could threaten him. Even fire and water wouldn't be able to easily destroy his body. He also would be able to resist the full-fledged attack of a cultivator at the preliminary stage of Earth Realm. His punch would have a force of about eight thousand pounds.
