

# No 1 Supreme Warrior

Chapter 3681

After a brief moment, it formed into 12 golden swords, each one aimed toward them in a semicircle. If it had been two massive swords, they would have been able to avoid them if they were quick enough, but 12 swords sealed off their fate.

Other than retreating, there was nothing else they could do.

When the thought surfaced, a massive wave of murderous intent came from behind them.

The three of them looked over, and Lourain's eyes almost popped out of their sockets as he gulped.

The golden swords were not just in front of them but behind them as well. At that moment, 12 golden swords were charging at them from the front, while two massive golden swords were charging at them from the back, preventing any form of escape. There was no way to avoid the attack.

They only had one choice, which was to face it head-on.

At that moment, Lourain and Marth were both anxious. They finally understood why many failed. It was just the first array, and it was already so difficult.

Lourain mumbled, "We're done for."

The moment he said that, he heard a gust of wind next to him. He looked over and was shocked to notice that Diana was charging right at the 12 swords. The aura around Diana's sword was faint. There was no murderous intent in it at all.

Compared to those 12 swords, Diana was like a fragile egg running toward a wall!

Lourain cursed, "You're crazy! Do you think you can beat twelve swords alone?!"

Lourain estimated that the 12 swords were possibly a lower ultimate god rank technique in power, probably at the second stage. Not only that, but they were probably only a step away from the third stage! The three of them would probably fail fighting against it, even if they worked together!

All that, and Diana ran head-first toward these swords.

Who did he think he was?

He was just a vermin from a third-grade world!

Just as he was about to curse at Diana for being an idiot, Diana's gray sword clashed with the 12 golden swords.

They heard the two forces clash and the golden swords actually shattered by a single slash from Ludwig.

They tore like paper!

Marth and Lourain were in complete disbelief. They thought that Diana would be decimated by the 12 swords or would, at the very least, be rendered incapacitated, too injured to fight. The three of them would be determined to have failed and tossed out.

Not only did this not happen, but the golden swords shattered to pieces and quickly dispersed!

At that moment, Diana shouted at the two of them, "Hurry, get here! There are two behind you!"

Diana spotted the two massive swords coming toward Marth and Lourain when he turned back, yet these two dolts forgot about the impending danger and even gaped at him.

Diana was speechless.

These two were too idiotic that he had no words to describe this feeling. The two of them only reacted when they were shouted at.

They quickly summoned all their true energy swiftly as they rushed toward Ludwig.

Diana used the laws of space under his feet and disappeared. After dealing with the danger in front of them, he had to handle the danger behind them.

He would rather put his hopes on Maurina than on them.

Diana's sword was full of the soul attribute. Soul Sky was a storm god-rank technique.

In Diana's eyes, lower ultimate god-rank techniques were as fragile as paper.
