

No 1 Supreme Warrior

Chapter 3695

He was strong, but the clone was just as strong as he was. If that was the case, then he was completely stuck. If he fought his opponent in an intense fight, then both sides would end up heavily injured. Nori was not even sure if his clone could actually get injured.

After all, that was a clone made out of the water attribute. It was not a real person. Ever since he entered the Whirling World, he had never been caught off guard before. He was in a complete bind, unsure of how he needed to progress.

Right at that moment, he suddenly heard a shout from afar.

Josef was shouting as he fought against his replica. No matter what technique he used, his replica would fight back in the same way. Those techniques would clash in the air with no result at all.

No one could do anything to the other.

Josef was clearly very unhappy with the situation.

He shouted out as he attacked, "What is happening?! This fake me knows my techniques! It's using it in the exact same way as I am! Surely it won't kill me and replace me?"

The more Josef thought about it, the more horrifying it sounded.

He felt like he could be right. If it was really as he said, then it would just be too scary. His true self would tragically die in the killing array while his fake self would replace him!

Nori's lips twitched when he heard what Josef said.

The replica was completely made with the water attribute. The moment it stepped out of the killing array, it would disappear.

There was no way it would be able to replace Josef like what Josef thought. If that array really had the ability, then it would be astounding. However, no matter what, the situation was not progressing well.

Nori did not know what he needed to do at that moment. He did not know how to breakthrough this killing array.

Lydia's face was dark as he fought his own clone as well. Even though he was not shouting around like Josef was, he was worried just the same. However, he was not worried about whether or not his clone would replace him. It was just that the situation would be bad for him if it continued.

Lydia took a deep breath and shouted at Albert, "Albert, our energy is limited. If we keep at this, we'll lose our energy eventually. Then, even trying to pass this stage would be hard, let alone the next one. The gold difficulty really isn't easy. Each stage is harder than the next!"

When Lydia said that, it served as a reminder to Moses.

Lydia was right. There was no way they could drag the situation on. His clone was not a real person, but a clone formed with energy.

His true energy would be spent eventually, but his opponent would never be exhausted. If they dragged things, then they would lose.

Then, they would be tossed out by the Seven Deaths Array. They would be done for. The treasures and the Vibrant Hall would have nothing to do with him. Ever since he found out about the Vibrant Hall, Nori had already made it a goal for himself that he would get inside.

After all, there were amazing treasures that could increase one's potential inside! If he failed to even get into Violet City, then it would all be for naught.

Nori suddenly regretted his choice. It was his first time feeling that remorse.
