

# No 1 Supreme Warrior

Chapter 3784

The three-headed silver python's eyes had a cold glint to them as it looked at the tiny human that walked up to it. It retained some of its intelligence.

The python had a special skill, its three pairs of eyes could see through human flesh to see its bones. Thus, as its gaze swept across the people, it could tell how old everyone was judging by their bones.

All these humans were younger than 60 years old. For the three-headed silver python that had lived for hundreds of millennia, it was just pitiful. Those humans were all mere ants!

The python looked over at Anita who was right in front of it, seemingly wondering what a tiny human was trying to do.

Was he challenging itself?

Anita took a deep breath, ignoring what everyone else was saying and planning. At that moment, he only had his eyes on the three-headed python in front of him, and nothing else mattered. Even Anita was not sure if he would manage to kill that beast.

The beast had been restricted by the laws of the Whirling World, so it was not possible that it had the abilities it would have in the outside world.

If he met a mature three-headed silver python in the outside world, Anita would not even have the courage to look at it. After all, it was a beast in the divine solidifying realm. Even if he had a storm god-rank technique, he would still be no match for it. He would not even be able to avoid a single swipe of its tail!

With that in mind, Anita took a deep breath as he stared right at the three-headed silver python.

He started to form seals with his hands, and countless ones condensed in the air. A ring that was glowing in dark red appeared in front of him.

At the same time, a gray figure appeared behind Morten.

That figure was filled with gray energy and looked like it was made of smoke. Upon closer inspection, one could tell that the figure looked similar to Morten.

"Is that a world avatar?" gasped a warrior from a second-grade world, gaping at the sight.

Any warrior that had the slightest bit of knowledge could tell that the figure behind Anita was his world avatar.

Everyone had a different world avatar, and world avatars were reflections of the laws of the world. It would also take on different appearances based on the individual warriors. There were very few world avatars that were the same in the world.

Anita's eyes were fixated on the three-headed python in front of him. He could feel how strong the beast was. Any normal warrior would be shaking in their pants just standing there.

For the sake of more Life Points, Anita did not hold back at all. Even if all his skills were revealed to everyone there, he no longer cared. The badge that led him here was something he had obtained with all his might. It had to be special!

Even though he did not know why the badge led him there, he needed to do everything he could. He was looking forward to a miracle!

These thoughts looped in his mind, and Anita finally tossed away his hesitation.
