

### **Chapter 1131: The Origin**

The moment Darkness Master set his eyes on someone, a creepy and strange tune would seem to start reverberating in that person's mind. Then, without being able to resist, the person would fall under his influence. The "flow of illusion" consisted of an unconscious penetration of the mind to draw one into an illusion. Darkness Master did not make use of any disguise, and everyone knew about his invisible influence... but pulling away from it was very difficult.

"Luo Feng, this is your Teacher Uncle," Primal Chaos City Leader said.

The moment he spoke, the spookiness in the surroundings became mild, while that creepy, strange force seemed to be wiped out.

"Teacher Uncle," Luo Feng greeted.

"I heard you have cultivated for slightly over a billion years." Darkness Master studied Luo Feng's face and continued, "I am not surprised you have been able to reach this standard within such a short time, since for an endless time, you have been my brother's most outstanding disciple."

Luo Feng replied, "Actually, the time I spent on cultivation was not only slightly over a billion years. I once cultivated for a long time at a place where time flew by extremely fast."

Everyone, including Primal Chaos City Leader, nodded. They were all relieved, but places like House of Time required an alarming amount of energy to sustain revolution, and the greater the rate of time velocity, the more expensive it would cost. Therefore, the more difficult sustenance would be! Furthermore, the evolution of the universe would last for an endless time, and combat was the best method for honing skills and building up bodies. This was why few top powers would send their geniuses to a certain place in isolation to get them to cultivate diligently.

"All right."

Primal Chaos City Leader scanned his surroundings. "As of today, the six leaders of the virtual universe branch are all gathered here."

At the moment, Long Yan Master, Ice Mountain Master, Darkness Master, You Hou Master, and Luo Feng all looked over to listen to what Primal Chaos City Leader had to say. In terms of power and status... Primal Chaos City Leader was unquestionably the leading figure of the virtual universe branch.

"The birth of one more universe master would be a blessing for us in the virtual universe, and it is also a blessing for humanity," said Primal Chaos City Leader with a smile. "And this disciple of mine, when it comes to survival ability, he beats all six of us hands down."

"Oh?" Darkness Master looked over.

Ice Mountain Master also looked at Luo Feng silently.

"Really?" You Hou Master and Long Yan Master asked outright.

Primal Chaos City Leader elaborated. "Luo Feng... For one thing, he has the talent of being able to divide bodies. Two, one of his bodies has a life form that resembles that of Nine Remoteness Master."

"Nine Remoteness Master?"

Darkness Master, Long Yan Master, Ice Mountain Master, You Hou Master all looked over at Luo Feng in surprise.

Luo Feng said, "I was just lucky!" He showed no trace of displeasure toward his teacher's candid approach in pointing out his capabilities, as he was aware that he had to fight for his status with his capabilities! From how things looked to him, the virtual universe branch was the strongest.

His apparent capability should be close to that of You Hou Master, who was the weakest of the lot. So long as he was able to show part of his capability, his status would be different! Moreover... whether his Remote Ocean body was revealed or not would not make much difference. It was just like how Nine Remoteness Master openly made known to the entire universe that no one would be able to do anything to him.

"Luo Feng. How big is the ocean of your godly body?" Darkness Master asked out of curiosity.

It was something the few other universe masters present were curious about, too. After all, Nine Remoteness Master's "ocean godly body" was comparable to a supreme true treasure and was something many great beings were secretly envious of.

"The time I spent on cultivation was short, so the ocean of my godly body is still in the initial stage of expansion," Luo Feng said. "Its diameter is only a couple tens of billions of miles."

"A couple tens of... billions?" You Hou Master took a deep breath.

Darkness Master, Long Yan Master, and Ice Mountain Master were all taken aback.

Gosh! Even the Li Volcano and World Tree, which were considered to have immensely large godly bodies were only slightly past six billion miles. Such godly bodies were more than enough to send great beings into despair, so learning that Luo Feng's ocean godly body was several tens of billions of miles wide was astounding news. Everyone could only stare wide-eyed and mouth agape. The speed at which great beings fought and attacked to cause such an ocean to be used up would never match up to the speed of its self-recovery.

"Amazing!"

"Admirable!"

"What a massive godly body!"

Darkness Master and Ice Mountain Master sang Luo Feng's praises. They were starting to see him in a different light. Previously, their only impression of him was that he was just another universe master of humanity. Luo Feng's combat power was still much lower compared to theirs, but he had a limitless Remote Ocean that they did not possess... and because of this, Luo Feng's status immediately rose up the ranks. The question was, why was Nine Remoteness Master so frightening?

The answer was because Nine Remoteness Master would always make use of his strongest talent technique and risk his life for every fight he was involved in! Even if Nine Remoteness Master were to self-destruct, within a twinkling of the eye, a new Nine Remoteness Master would appear. On the other hand, even if his opponent also had the talent of dividing bodies, to recover from the loss of a strong godly body would entail a hefty price. This was why Nine Remoteness Master became such an intimidating presence within the universe.

"Luo Feng." Darkness Master let out a smile, which was most rarely seen, and said, "With your Remote Ocean body, making use of the strongest technique of a universe master, you self-destructed! This technique alone would enable you to run rampant throughout the universe."

Luo Feng nodded with a smile. Yes. "I Am the Universe" was a technique that was very demanding on one's godly power. When one had reached the undying level, only with the perfect life gene level could he make use of this technique. Upon reaching the universe knight level, Remote Ocean body would need a godly power that was at least ten times stronger to be able to make use of I Am the Universe! With a body that was 5,500 miles tall, one could fully make use of I Am the Universe!

The ultimate attack technique was to directly carry out Destruction of Miniature Universe. His original earthling body and golden horned beast body did not dare to make use of Destruction of Miniature Universe because the explosive power of this technique did not have the ability to differentiate foe from self; there was the possibility of self-annihilation.

Yet Remote Ocean body had nothing to fear. From Luo Feng's point of view, he was now merely a universe knight, for Remote Ocean body to make use of this technique of universe destruction, the power was not strong enough. When he had become a universe master... then this technique would truly instill fear among the other great beings. Remote Ocean body was a trump card that would earn Luo Feng a unique status.

Primal Chaos City Leader smiled and said, "We will be carrying out the highest-level meeting of the human race in a while. But before that, Luo Feng, for your status as universe master, what do you intend to use as your name?"

"My name as a universe master?" Luo Feng mused to himself.

"Blade River Emperor was only one of your disguises previously," Primal Chaos City Leader said. "Now, the whole universe calls you by the name of Blade River Master. You can use Blade River Master, or you can use another name of your choice. Upon becoming a universe master, maybe you will have your own opinions. This is why the majority of universe masters change their names to something new. Like me. When my teacher entrusted me with Primal Chaos City, to constantly remind myself of my teacher's entrustment, I changed my name to 'Primal Chaos City Leader.'"

Luo Feng nodded. He understood. For some universe masters, if they were weaker, they did not dare to give themselves names that sounded overpowering, as this would cause other beings to look down on them. However, as they get more powerful, their ambitious goals would start to change. Therefore, they would change their universe names.

"A name..." Luo Feng said to himself.

Some great beings renamed themselves according to the weapons they were skilled in using. Some renamed themselves something in remembrance of their hometown or something in their hearts they wanted to hold on to. Some renamed themselves purely out of ambitious goals.

Luo Feng smiled and announced, "Milky Way Horde Leader. I shall be called Milky Way Horde Leader."

He could still remember those days on Earth when he looked up at the sky to see the limitless Milky Way filled with stars. The Milky Way, where home was. Making it to where he was today... was it all not for the sake of protecting his loved ones? Was it not for the sake of protecting his hometown? Horde Leader... It also represented his territory, so he needed to defend his own territory!

"Milky Way Horde Leader."

The five universe masters gave his choice some thought, then all nodded in agreement. A name was merely a designation. When one chose to give himself another name, the other great beings would not interfere—unless the name was simply too awful or was a taboo that must be abstained from. Otherwise, regardless of how weird a name was, it truly did not matter.

"Okay," said Primal Chaos City Leader. "So the sixth universe master of the virtual universe branch will be Milky Way Horde Leader." He suddenly stood up and said, "Let's go. We shall go meet the creator of our virtual universe branch now."

"Creator of our virtual universe branch?" Luo Feng felt a little tremor of fear in his heart.

Huge Axe Creator was the creator of Huge Axe Dojo. But the creator of the virtual universe branch...? Who could that be? Luo Feng had tried to search for answers in the past but always ended up with no returns. His authority was limited and thus, insufficient.

Darkness Master also stood up. "Let's go meet Teacher."

"To meet Teacher." Ice Mountain Master followed suit.

\*\*\*\*\*

In an instant, all six universe master ascended to the sky amidst a limitless chaotic airflow and advanced along the path of the airflow.

"Luo Feng," Primal Chaos City Leader said as he flew. "I, Darkness, and Ice Mountain are all Teacher's disciples. Teacher has made great contributions to humanity. If not for him, humanity would never be able to become a pinnacle race so easily. Even Huge Axe Creator had once received Teacher's guidance and kindness. He was humanity's first universe supreme being!"

Following Primal Chaos City Leader's voice, Long Yan Master, who was beside them, also said, "I have also received his kind guidance."

Luo Feng held his breath. He knew he had touched on highly confidential information about humankind. All these years, and he only knew that humanity had Huge Axe Creator. Even Sitting Mountain Guest only knew Huge Axe Creator! The strongest being in humanity that everyone knew of was Huge Axe Creator. They had not heard of another.

"Teacher's name is 'Origin,'" Primal Chaos City Leader said. "Previously, humankind was only a strong race. Under Teacher's guidance, we have grown and gotten stronger. Teacher ran rampant in the universe, roamed the Universe Ocean, and killed countless to eventually build up his reputation! This had allowed humanity to gain power and continue to grow stronger. In the primal universe, there are quite a few universe supreme beings, but Teacher can be said to be incomparable. The other supreme beings keep their distance if they see him from afar."

"All the way across the Universe Ocean... his name is always the most renowned," continued Primal Chaos City Leader. "Invincible! No one is comparable to Teacher."

Primal Chaos City Leader's eyes were filled with admiration as memories of past events came flashing back. Even Darkness Master, Ice Mountain Master, and Long Yan Master fell silent. They were all immersed in their memories of their Teacher.

"Previously, when humanity gained its reputation as a top power, even the Ancestral God School, who has the protection of the universe origin, was reluctant to provoke our race. At that time, we humans were at our prime!"

The six universe masters flew through space together, causing the chaotic airflow in the surroundings to be continuously forced apart. There was absolute silence all around. Only Primal Chaos City Leader's voice could be heard. Luo Feng was also completely immersed in his imagination as he tried to picture the one presence which, from the primal universe all the way across Universe Ocean, was said to be formidable. Even other supreme beings knew to keep their distance.

"We have arrived!" Primal Chaos City Leader said.

Luo Feng raised his head to look and saw that surrounded by the airflow were countless towering statues. There were endless fluctuations in the various laws of gold, wood, water, fire, earth, wind, lightning, light, space, time, golden space, wooden space, water space... Various sorts of laws, to the extent of the fluctuations in the laws of revolution, all seemed to surge out of the countless statues.

With a faraway look in his eyes, Luo Feng seemed to have felt the similarity between these countless towering statues and the 'universe origins.'

### **Chapter 1132: Virtual Universe**

Primal Chaos City Leader, Ice Mountain Master, and Darkness Master were flying in the front while Long Yan Master, Remote Lord Master, and Milky Way Horde Leader Luo Feng flew at the back.

Six beings kept flying. In the boundless space, the towering sculpture looked clearer when they approached it.

The greatest being in human history? thought Luo Feng. The most powerful being in the original universe, and even in the Universe Ocean? Cultivated three universe masters including Primal Chaos City Leader?

Luo Feng gazed at the towering sculpture in the distance. Although he had only heard about him from his teacher, he was already filled with awe and worship. What an incredible being! He had created the virtual universe, and other universe supreme masters could only avoid him, and he made the human

race the strongest power in the universe. Even the Ancestral God School wasn't willing to mess with the human race!

Impressive accomplishments!

"This is Teacher Origin?" Luo Feng kept observing the sculpture.

Teacher Origin was a lanky man wearing a white cape with a smile on his face. Behind his smile was a perfection that could only be attained after fully comprehending everything. Luo Feng raised his head and looked at the sculpture. He saw the trace of a smile on his face, and that smile made Luo Feng completely peaceful. He felt as if he were nestling in his mother's arms again.

He looked as if he had seen through everything in the universe and that there was nothing he didn't know. He looked stalwart—as if he were the pillar of the universe. The universe revolved around him.

"Teacher." Primal Chaos City Leader, Ice Mountain Master and Darkness Master stopped.

Primal Chaos City Leader bowed and said, "There's one more universe master in the virtual universe now, and he's my disciple, Luo Feng. I have brought him here to greet you." Primal Chaos City Leader turned to Luo Feng. "Luo Feng. Greet your teacher, Origin."

Luo Feng walked up beside Primal Chaos City Leader and gave a salutation. "Teacher Origin," he said.

Luo Feng absolutely admired this legendary being, as the human race had risen because of Teacher Origin. He had guided Huge Axe Founder. He had even created the virtual universe. If it weren't for Teacher Origin, the history of Earth might have been different.

Primal Chaos City Leader raised his head and looked at the towering sculpture, and his eyes gleamed. "I follow your order. I've been guarding Primal Chaos City and the humans, and I didn't dare to slack in my duties. Now that Luo Feng has become a universe master, we humans will be stronger! I believe that we will prosper!"

Darkness Master and Ice Mountain Master both bowed and whispered, but their voices were blocked from the outside. It was depressive in front of the sculpture. The atmosphere affected the six universe masters, and even Darkness Master became like a child.

"We'll leave now." Primal Chaos City Leader bowed.

The other universe masters did the same, then they all flew away. The air was flowing, and they disappeared in the airflow.

The towering sculpture stood still, just as it had been doing for an infinity of eras, but its eyes blinked and glanced at the six beings who flew away. A dimming voice said, "Luo Feng?"

\*\*\*\*\*

Six beings kept flying in the airflow. Luo Feng couldn't help asking, "Teacher, why did I feel that there were many law ripples around the sculpture of Teacher Origin, as if it were the land of origin?"

What a powerful place the land of origin was! Even universe supreme masters didn't dare resist it. All the life forms in the universe trained themselves in the universe origin and accomplished everything because of the origin ocean.

Primal Chaos City Leader looked at Luo Feng. "That is the land of origin."

"Yes." Ice Mountain Master, who had thus far been aloof, opened his mouth. "However, that's the land of origin of the virtual universe."

"The land of origin of the virtual universe?" Luo Feng was shocked.

Another universe origin?

"Everything is virtual in the virtual universe, and all the laws can be practiced and comprehended." It was Darkness Master who spoke this time, and his voice sounded wicked but elegant. "Of course, there's a universe origin supporting the virtual universe. You won't be able to practice in a fantasy."

Luo Feng was rendered speechless. That was right. No fantasies allowed great beings to practice.

"You can still practice in a fantasy," said Primal Chaos City Leader, "and you can't even feel the difference. However, only a few universe supreme masters are able to perform those fantasies, and also, only the laws that universe supreme masters can manifest can be practiced. It will consume a great amount of energy for great beings to practice in a fantasy."

"The virtual universe was created by Teacher Origin," said Luo Feng. "Does that mean Teacher Origin knows all the laws? Is it possible? As the virtual universe can form a universe origin."

Luo Feng found it hard to believe. Teacher Origin knew all the merge laws—all the individual laws and even the law operation of the universe?

"No!" Primal Chaos City Leader glimpsed at Luo Feng and smiled. "Remote Lord was also confused like you were when he went to visit Teacher Origin the first time. Remote Lord, why don't you explain it to Luo Feng?"

Remote Lord Master nodded and looked at Luo Feng. "Not necessarily. Besides, the virtual universe is not a fantasy! It's different than a fantasy. It would require a great sum of energies for fantasies to allow great beings to practice laws, but the virtual universe can always be a place for great beings to train themselves, even for universe knights and universe masters."

Luo Feng nodded.

"How much energy do you think would be consumed to allow so many great beings to practice if it's a fantasy?" Remote Lord Master smiled. "Actually, the virtual universe hardly consumes any energy."

"What?" Luo Feng was dazed.

Hardly consumed any energy? It would require a lot of energy to maintain a virtual space, and the virtual universe covered almost the entire universe. Countless humans were connected to the virtual universe every day, but it hardly required any energy?

"Brother Luo Feng," said Remote Lord Master with a smile. "There are countless races breeding and fighting and even consuming the godly power in the origin ocean every day. Do you think the original universe is consuming energy?"

"The energy from the original universe is eternal," said Luo Feng.

"Since the energy of the original universe is never consumed, why are those of virtual universe consumed?" said Remote Lord Master.

Luo Feng was truly amazed. Could the virtual universe rival the original universe?

"Don't look down upon your Teacher Origin," said Primal Chaos City Leader. He looked at Luo Feng, and Darkness Master and Ice Mountain Master looked awed as well.

Darkness Master said, "Humph! No universe supreme masters dared to fight Teacher in the Universe Ocean. If our teacher were still here, the three alliances wouldn't dare to scheme you. If they do, Teacher Origin will attack the three alliances directly, and they can only give valuables to mitigate it."

Luo Feng couldn't help asking, "Then how did Teacher Origin...?"

How did Teacher Origin die? The other five universe masters knew exactly what Luo Feng was about to ask.

"Teacher is still alive!" Primal Chaos City Leader said solemnly.

"Yes! He's still alive!" said Darkness Master.

"Teacher won't die!" said Ice Mountain Master.

Luo Feng was bewildered. Then how come everyone said there was only one universe supreme master within the human race, and he could only visit a sculpture.

"Teacher Origin was almighty, and he's the most powerful universe supreme master!" Darkness Master's eyes gleamed. "No one can match Teacher Origin! However, Teacher Origin still seeks a path to be stronger, which goes against the universe operation law, as he's provoking the universe origin!"

Provoking the universe origin? When Virtual-Real Devil Master went to kill him, he had shown extremely incredible power. Chains had suddenly appeared in the sky and bound Virtual-Real Devil Master. Those chains disappeared only after Virtual-Real Devil Master weakened his power.

"The universe operation law is not allowed to be provoked!"

"However, Teacher Origin was so powerful that he wanted to go against it."

"He provoked it again and again!"

"Then he was punished by the universe origin!" Darkness Master said confidently. "However, Teacher Origin already stood at the top of the universe supreme masters, so even though the universe origin was infuriated and tried to punish him, it still couldn't stop him from advancing.

Luo Feng was shocked. He could only imagine how the universe origin kept punishing Teacher Origin while he kept making breakthroughs.

"Eventually, Teacher Origin fought against the universe origin," Darkness Master said with awe in his eyes. "And the result is that Teacher Origin was suppressed by the universe origin forever."

"Suppressed?" Luo Feng held his breath.

Wow! A universe supreme master dared to fight the universe origin! How insane that was! However, he had been suppressed forever.

"Even though he's suppressed forever," Darkness Master said in his high-pitched voice, "Teacher Origin still performed the technique 'Virtual Universe,' which covers the entire universe. Only other universe supreme masters and the universe origin can slightly hinder it."

Luo Feng nodded. The range controlled by Space Beast Ancestor didn't allow for the virtual universe, as this was the will of Space Beast Ancestor. The virtual universe was also not allowed on the original stars because of the universe origin.

"It covers the entire universe." Darkness Master looked to Luo Feng. "Have you ever heard of a technique that powerful? Teacher Origin even has a universe master slave, and he's a universe master of the automaton race."

"That universe master is the intelligent core of the 'virtual universe,'" Darkness Master went on. "Everyone knows the virtual universe needs to deal with countless programs every day, and it's extremely complicated. Even powerful universe masters won't be able to deal with it. However, the universe master of the automaton race is an intelligent life form himself and can easily maintain it after becoming a universe master. Usually, that universe master deals with everything, and Teacher Origin doesn't care what we're doing. However, we have to go to the land of origin of the virtual universe if we want to meet Teacher Origin."

Luo Feng couldn't help asking, "Are there any ways to save Teacher Origin from the suppression?"

### **Chapter 1133: Rong Jun**

Luo Feng had only gotten to learn some major information about this legendary character today, but that did not stop him from worshipping Teacher Origin then and there.

In Luo Feng's point of view, he had servants that were universe masters, had built the virtual universe, stood at the highest peak, and had gone to war with the universe origin... Finally, he had ended up in eternal suppression. Every event evoked a surge of admiration and respect for such a leader of humanity. If such a leader could appear in the universe once again... it would be one grand occasion for humanity.

"Is there any way out?" Luo Feng looked at the other universe masters.

Darkness Master was silent.

Primal Chaos City Leader sighed and answered, "No."

Long Yan Master's resounding voice was heard. "Huge Axe Creator has thought about it too, but he could not come up with a solution either. The servant of Teacher Origin, who is the core intelligence of the virtual universe, also informed us that Teacher Origin was unable to find any solution."

Luo Feng sighed and nodded. After all, this was eternal suppression by the universe origin! Who could render help?

\*\*\*\*\*

All six universe masters, including Luo Feng, had just returned to Thunder Island when they received mail from Huge Axe Creator, who was inviting them to join in the highest-level meeting of the human race.

"There are two kinds of highest-level meetings," Primal Chaos City Leader said with a grin. "One is a large-scale, highest-level meeting where all universe knights, universe masters, and universe supreme beings will have to attend. Such a large-scale, highest-level meeting would normally be about major happenings or events that would compromise the benefits of universe knights. The other important matters that only concern the race—normally an internal discussion would suffice, and this other kind of highest-level meeting—would be attended by universe masters and universe supreme beings. This was convened by Huge Axe Creator. Thus, it is also known as 'Huge Axe Meeting.'"

"Huge Axe Meeting?" Luo Feng nodded.

The previous highest-level meeting attended by a large number of universe knights was merely an announcement session where they all listened to a universe master issue information. The actual decision-makers were universe masters and universe supreme beings.

This was why Huge Axe Meeting was where decisions for various matters of the race were made.

"Your authority limit has been increased, so you can directly transport over to Huge Axe God Palace," Primal Chaos City Leader said. "The Huge Axe Meeting will be held at Huge Axe God Palace."

"Oh." Luo Feng checked again and realized there were a few additional places he could transport to.

"Let's go," Primal Chaos City Leader said.

Within an instant, the six universe masters of the virtual universe branch disappeared from Thunder Island. For their branch... Primal Chaos City Leader was obviously the one in command.

\*\*\*\*\*

Amidst endless darkness, there were indistinct flashes of starlight from afar.

A simple, plain-looking god palace hung suspended in mid-air. In the empty space in front of the god palace—which was not too big nor too small—there was a long stone table. There was only one stone chair at the position of the host seat, while on either side of the table was a stretch of stone chairs, all occupied by several towering figures.

The universe masters were in discussion. They were divided into several cliques, so it was typical for them to poke fun at each other.

"Haha! Deserted Mirror. Previously, all of you were so unwilling to hand over Earth's ownership rights to Luo Feng! In the end, the final say still lies with Huge Axe... We have said that the day Luo Feng sits with us will be the day we hand him Earth ownership rights. That wasn't too long ago, right? Luo Feng has already earned his place beside us now."

"Didn't you also object to it previously?"

"I have no family ties to worry about, so naturally, I will take a neutral stand. Actually, from how things turn out now, maybe you all should have acceded to Luo Feng's request back then and accepted the Disambiguation Mirror Stone for half of Earth's ownership rights! Now? Now that Luo Feng is on equal footing with us, according to what Huge Axe has said, we must surrender all the ownership rights to Luo Feng, but at the same time, the Disambiguation Mirror Stones are off limits to us."

"Humph."

Hua! Hua! Hua!

Six figures appeared almost simultaneously. They were none other than the six great beings from the virtual universe branch with Primal Chaos City Leader as their leader.

"Primal Chaos City Leader."

"Primal Chaos City Leader, you are here."

"Primal Chaos City Leader."

Almost all the universe masters who were already present greeted Primal Chaos City Leader the moment they saw him. After all, within all of humanity, the ones with the highest status were unquestionably Huge Axe Creator and Teacher Origin, who had been eternally suppressed by the universe origins! Other than these two, Primal Chaos City Leader, who was eternally protecting the primal universe, was right next in line, so naturally, he would be highly respected.

"Darkness, you are here too? It is quite rare to see you making an appearance."

"I didn't expect Darkness to turn up. There have been so many meetings before this, but never once has he turned up."

The universe masters were speaking incessantly while the group of six with their leader, Primal Chaos City Leader, took their seats. The six universe masters of the virtual universe branch sat together in a straight, horizontal row, with Primal Chaos City Leader nearest to the host seat, followed by Long Yan Master, Darkness Master, Ice Mountain Master, You Hou Master, and lastly, Milky Way Horde Leader.

\*\*\*\*\*

Luo Feng sat down and observed the other universe masters as he humbly replied to their conversations.

"Luck! I was lucky to make such accomplishments because I had the chance to cultivate in peace for a long period in places like House of Time. It was just by chance encounter that I managed to create that technique. Haha! The three major alliances were after my life—I needed to be ruthless to save myself!"

As he spoke, he observed meticulously. After all, all those present were already the top-tier beings of humanity. Previously, he had only managed to look up some information, but he had never met them in person before.

Huge Axe Dojo branch has Huge Axe Creator as its leader. Normally, Void Gold Master would be the one managing the dojo, who was previously the substitute teacher for my big brother, Hong, and the creator of the Sky Ruins Tablet.

Luo Feng looked over and saw that Void Gold Master was a towering figure with long, dazzling golden hair. He wore a smile on his face and had eyebrows that were so long they hung all the way down to his chest. In terms of how he carried himself, he was no less charismatic than Primal Chaos City Leader.

The Universe Mercenary Alliance has Deserted Mirror Master as its leader, Luo Feng realized as he observed carefully.

Deserted Mirror Master was hideous-looking, and his body was covered with complicated scales. There were three sharp horns on his head, so at first glance, he looked like a beast in human form. The aura he exuded was equally domineering. Deserted Mirror Master was also observing Luo Feng with due diligence; of all the universe masters present who observing Luo Feng, the number of times he looked over at Luo Feng ranked in the top three.

The Universe First Bank has Qing Dong Master as its leader.

Qing Dong Master was wearing a green armor with a green cape, and on his cape were complicated secret engravings that formed a beautiful beast diagram. That beast did not belong to any species of the Eight Beast Gods.

Universe Star River Bank has Peng Gong Master as its leader.

Luo Feng looked at Peng Gong Master. Of the three universe masters staring at Luo Feng, Peng Gong Master topped the list. He was slightly stout, bald, and had a large beard that drooped. From the aura he exuded, he was by far the weakest universe master present. And the Universe Star River Bank branch he led only had a total of two universe masters, which was the least of the lot. Yet, according to the information that Luo Feng had read up on, Peng Gong Master's power was ranked at the top of humanity. Even Void Gold Master was not his match. He was, in fact, comparable to Primal Chaos City Leader.

Humanity is indeed strong. Luo Feng could not help but sigh. There are more universe masters at the pinnacle level; there were even a few that were at the top-tier level. This is considered extremely high in the universe.

This was based on all the understanding Luo Feng had gained so far. The powers of universe masters could be categorized as "elementary," "ordinary," "pinnacle," and "top-tier."

The elementary category referred to those who had just become universe masters, with a life gene level of 100 times, who had yet to create an ultimate technique of a universe master. This group of universe masters rarely made appearances. They were more inclined to isolate themselves in solitude to devote themselves to honing their power.

The ordinary category referred to those who used a certain amount of resources to get their life gene level to reach a stage whereby it was temporarily difficult to achieve further increase—for example, 1,000 times the life gene level. In addition, they had created their ultimate technique of a universe master and had obtained quite outstanding true treasures.

The pinnacle category was made up of universe masters who might possess very powerful true treasures or created very strong techniques or had life gene levels that might have reached around 10,000 times! Satisfying one of the above, then meeting the requirements of the other two, would just be a matter of time. This was the point where a universe master was almost considered to be at the pinnacle level.

The top-tier category referred to universe masters like Star River Master, Primal Chaos City Leader, and Darkness Master. In terms of life gene level, true treasures and techniques, these masters had attained an extremely high level. That was the only way to be considered top-tier!

The five branches of humanity. From how I see it, the virtual universe branch is the strongest link. Especially the three disciples of Teacher Origin: Teacher, Darkness Master, and Ice Mountain Master. All of them were about the top-tier level.

Luo Feng sighed inwardly as he thought about how truly powerful the disciples under the tutelage of Teacher Origin were. The other four branches seemed to pale in comparison when it came to quality. Even Huge Axe Creator had once received the guidance of Teacher Origin.

As Luo Feng sat contemplating the power of the greatest level of humanity and sighing over how he was the last one in line, Huge Axe Creator finally turned up.

Hua!

With a head of disheveled hair, a wild-looking giant appeared on the host seat. That very instant, the universe masters quietened down as all their expressions registered respect. Only Luo Feng, though also looking respectful, was unable to conceal the hint of surprise he felt. The wild-looking giant looked toward Luo Feng, smiled, and nodded.

"Luo Feng!" he said. "This is the first time you and I have met."

"Huge Axe Creator," Luo Feng replied respectfully while looking at Huge Axe Creator.

The more he looked at this wild-looking giant, the more he noted the striking resemblance between Huge Axe Creator and his good friend from the past, "Rong Jun." Rong Jun may have been a far cry from Huge Axe Creator, but he did carry some charismatic airs, albeit indistinctly. But they both shared the same kind of heroic spirit. Even their looks and disposition...

As distinct as the differences between east and west, Huge Axe Creator and wild man Rong Jun contrasted, but they clearly shared a similar disposition. In terms of looks and appearance, Luo Feng experienced a new feeling... the feeling of being of the same race!

When Rong Jun made his first appearance in Primal Chaos City, he was not outstanding at all, thought Luo Feng. At that time, we were merely a bunch of fellows who just emerged from the War of Talents... Many universe knights paid us no heed. Just like me, now—where would I find the time to care for those young emerging fellows? At that time, even Bo Lan was not taken in as a disciple by any universe knight; on the contrary, Rong Jun was the first to be accepted as a disciple by a universe country master.

When Rong Jun had been accepted as a disciple to a universe country master, many participants of the War of Talents were jealous and reluctant to accept the fact. At that time, Luo Feng had also gritted his teeth and promised himself that, even if Rong Jun did have a universe country master as teacher, he would surpass Rong Jun, somehow. Even then...

Thereafter, when he did succeed in achieving outstanding results, there were still other beings like Heaven Erosion Palace Master who were betting that Luo Feng was still not Rong Jun's match.

"Why are they all in favor of Rong Jun?" Luo Feng muttered under his breath. "It seems highly possible he is from the branch under Huge Axe Creator. Who are the great beings under Huge Axe creator's branch?"

A great deal of information on universe knights came rushing back to Luo Feng's mind as he speedily recalled his memories. However, most universe knights donned armor and boots. There were not many like Rong Jun, who carried the disposition of a wild man...

"There were four to five of them who seem to have such a disposition or character."

Luo Feng tired hard to recall so that he could differentiate something out. He was faintly sure of it. After all, he did take a shorter time to become a great being, so he only had a few good friends like Kuang Zhou Knight. The rest of the universe knights were merely casual acquaintances.

### **Chapter 1134: I've Said So**

Just when Luo Feng was pondering the relationship between Rong Jun and Huge Axe Founder, Huge Axe Founder looked around all the universe masters and smiled. "We haven't seen this for a while. All the universe masters gather here today."

All the 19 universe masters laughed.

"We're here today because we want to give Luo Feng a formal welcome." Huge Axe Founder looked to Luo Feng. "From today on, there'll be one more universe maser within the human race. Luo Feng has the clone technique, and his surviving ability is ranked top ten in the universe... It's lucky for us humans to have him."

Hua.

Most of the universe masters looked to Luo Feng, and some of them transmitted their voices to discuss. Apparently, Huge Axe Founder's assertion that Luo Feng's surviving ability was ranked in the top ten startled them.

It seems Huge Axe Founder knows about my Remote Ocean body, Luo Feng thought. Whereas the universe masters from other streams haven't known about it. Otherwise, they won't be that surprised!

"According to the rules of us humans," Huge Axe Founder said, smiling, "anyone who becomes a universe master can be bestowed a valuable as precious as a top-tier true treasure weapon by our race. Luo Feng, what do you want?"

Luo Feng couldn't help exclaiming. This was one of the differences between the pinnacle race and the weaker ones. Even for the Northern Territory Alliance, which was one of the top nine powers, universe masters wouldn't be bestowed valuables, as there were too many races and great beings—unless some mighty universe masters offered to join the alliance.

"Just name your demand, Luo Feng." Huge Axe Founder looked to Luo Feng.

All the universe masters looked to Luo Feng as well.

Luo Feng turned to Huge Axe Founder and smiled. "I don't want other true treasures, but I do want my territory, the Milky Way, to be reconstructed, and I want to stay there forever. I want to stay in my home forever and make it more stable."

"Stay in the Milky Way forever?" said Primal Chaos City Leader.

The other universe masters were all a bit surprised. Normally, universe masters would choose secret region like the primal secret region. It was unusual for a universe master to be stationed in one galaxy, but Primal Chaos City Leader didn't try to hinder that, as he knew how much Luo Feng valued his home planet, especially since he had named himself Milky Way Horde Leader.

"Luo Feng wants to be stationed in the Milky Way forever?"

The other universe masters were all surprised. However, they didn't voice their confusion, as the universe masters from the virtual universe didn't say much.

"I will, of course, allow that." Huge Axe Founder nodded. "The Milky Way is only one galaxy, and one top-tier true treasure is more than enough to stabilize it."

"It's indeed enough," said Luo Feng.

It would be costly for one universe master to be stationed in the Milky Way and to reconstruct it. Although it was not as valuable as a top-tier true treasure, it wouldn't be much different. Besides, Luo Feng had a great many true treasures with him, so he didn't need ordinary true treasures.

"I remember that Luo Feng wants his home planet, Earth, back," said Huge Axe Founder again.

Luo Feng's eyes immediately gleamed. The other universe masters went silent and all looked to Huge Axe Founder.

"Now that Luo Feng has become a universe master and is sitting with us, I should return the ownership of the Earth to Luo Feng," said Huge Axe Founder.

"Huge Axe," the scaled giant with three horns suddenly said. "Universe masters should make contributions and support an entire race. After being bestowed at the start, universe masters should make contributions before they gain more! True treasures need to be exchanged with true treasure points after contributions! And the same rule applies here. Milky Way Horde Leader shouldn't get anything for free, now. The other half of the ownership of Earth belongs to our race, and Milky Way Horde Leader should contribute valuables as precious as that!"

"Yes, he should give valuables to exchange," agreed some other universe masters.

Luo Feng looked to that scaled giant with the three horns. It was Huang Jian Master. Huang Jian Master even gave Luo Feng a head nod.

Huang Jian!

Primal Chaos City Leader said, "The other half of ownership of Earth is under my virtual universe, and the contract was signed between my virtual universe company and Luo Feng. Although you all have offspring on Earth, those 50 billion mixed elements are paid by my virtual universe company. I can

totally give it back to Luo Feng, as the other half of the ownership belongs to my virtual universe company."

"The virtual universe company is a part of the human race," said Huang Jian Master. "How can the virtual universe company give out an asset like that? He should contribute before he gains!"

"Haha! I bought the earth for 50 billion mixed elements," said Primal Chaos City Leader. "Luo Feng, just pay fifty billion mixed elements to buy the other half of the ownership back."

50 billion mixed elements? Was that a joke?

Any treasure would be much more precious than that. To universe masters, 50 billion mixed elements were like a drop of water, yet the Earth was a boundless ocean! There was no comparison.

"We all know how precious the Earth is," Huang Jian Master said with a frown. "50 billion mixed elements is nothing! Don't mention how you purchased it with 50 billion mixed elements. Firstly, we didn't know about the potential of Earth, and also, Luo Feng was extremely weak. 50 billion mixed elements were enough for him."

"Oh, Huang Jian, are you trying to interfere with the trade of my virtual universe company?" said Primal Chaos City Leader. "You're not the person in charge of the virtual universe company. I am."

"I'm not interfering," said Huang Jian Master, "but we need to have rules. If it were a personal asset of yours, you could deal with it however you want. However, it's an asset of the virtual universe company, and it belongs to Teacher Origin. How can you just give away valuables of the virtual universe company like that?"

They kept arguing. One of them was the person in charge of the virtual universe company while the other was the founder of the Universe Mercenary Alliance. Both of them were top-tier universe masters and held a similar status.

Qing Dong Master and Peng Gong Master stayed silent, sitting aside. After all, they were related to the Earth.

"Okay," Huge Axe Founder said.

Huang Jian Master and Primal Chaos City Leader looked to Huge Axe Founder.

Huge Axe Founder frowned. "I've said so! When Luo Feng is able to sit with me, the other half of the ownership will be returned to Luo Feng! I should live up to my promise! Since the other half of the ownership of the Earth belongs to the virtual universe company, I'll just give a pinnacle true treasure to the virtual universe to cover the loss."

"Huge Axe!"

"Huge Axe," said Huang Jian Master.

"Huge Axe Founder!" even Luo Feng couldn't help shouting.

"It's done," Huge Axe said. He glanced at all the universe masters, and they went silent.

\*\*\*\*\*

The main issue was to welcome Luo Feng. They also talked about the original stars and Universe Ocean before the meeting was over. The universe masters of the virtual universe were dismissed. Only Luo Feng was called by Primal Chaos City Leader.

"Teacher, why does it end with Huge Axe Founder transferring a pinnacle true treasure to the virtual universe company?" Luo Feng couldn't help asking as he felt like he owed Huge Axe Founder.

"Don't overthink it." Primal Chaos City Leader shook his head. "Huge Axe Founder is a universe supreme master within our human race, and he has the greatest number of true treasures! He will just give away true treasures to races! Many powerful true treasures that need to be exchanged in the races are given away by Huge Axe Founder! It's nothing to him to give us one. After this is finished, I'll give the true treasure back to our race."

Luo Feng nodded. It wasn't easy to support an entire race! The weak would be at a disadvantage if they were alone, but lone universe supreme masters could live a relaxing life. They stood among the strongest in the universe and thus were able to obtain many true treasures. However, they only needed several true treasures. Others were useless to them. On the contrary, if the universe supreme masters were related to a race, they not only needed to be careful but also needed to make continuous contributions to the race he belonged to.

"I understand." Luo Feng nodded. He knew that he needed to return the favor from Huge Axe Founder.

"Don't blame Huang Jian Master for trying to obstruct that," said Primal Chaos City Leader. "It's all about interest. Look at other universe masters. Did you wonder why others didn't say anything? Because it's related to the interests of the other four streams as well. Huang Jian Master was basically speaking for them... Almost every issue in the universe has to do with interests, either individual or relating to race."

Luo Feng nodded.

"By the way." Primal Chaos City Leader looked at Luo Feng. "Do you really plan to stay in the Milky Way galaxy forever?"

"Yes." Luo Feng nodded. "Forever!"

"Universe masters in the human race are usually stationed in the important places in the human territory," said Primal Chaos City Leader. "For one thing, there are plenty of universe knights, undying fighters, and talents who need protection from the supreme beings, and for another, there are several universe masters in the important places. They can help each other out if there's a catastrophe. If there's only one of you staying in the Milky Way, other great beings will need to spend some time to get there if other races attack it. Of course, some universe masters choose to have one of their bodies to guard their homes. You're not changing your mind?"

Luo Feng smiled and said, "No. I'll guard the Milky Way forever."

He had fought for such a long time—and even risked his own life—for what? To stand at the top of the universe and protect his home!

### **Chapter 1135: Luo Feng's Order**

Hong! Hong! Hong!

There were volcanoes in the god country, and burning magma burst out of the volcanoes. It was a country of magma! Every moment, there was magma bursting out of the volcanoes. At the center of the god country was a towering godly palace surrounded by endless flames, and there was a sculpture in front of the godly palace. It was a sculpture of Mo Luo.

Shua!

A being showed up in front of the godly palace. It was Mo Luo.

Mo Luo was one of the talents in the virtual universe company and had become undying 30,000 years ago. Although he was only an official level undying, he was a pinnacle official-level undying known as "Wild Beast Official."

After being beaten by Luo Feng, he had been craving to surpass Luo Feng. Unfortunately, not only did he not surpass Luo Feng, but he was now overpowered by Bo Lan and Rong Jun, both of whom were emperor-level undying now. Although he was slightly inferior to Bo Lan and Rong Jun, he still demonstrated great potential, which was why he became a disciple of South Fox Country Master.

Standing in the sky, Mo Luo became startled. "Someone's here."

It was his god country. How could others enter his god country?

Hong!

Three towering beings showed up in a corner of the god country, and they teleported themselves to in front of Mo Luo.

Mo Luo took a look at the three beings and felt relieved. He walked up and said, "Greetings, teacher."

South Fox Country Master looked at him with pity. South Fox Country Master looked to the two universe masters beside him and nodded. "Ganwu, North Larva."

Ganwu Country Master gazed at Mo Luo coldly and shouted, "Mo Luo, are you aware of your crimes?"

"Crimes?"

Luo Feng was terrified. He couldn't help looking to his teacher, South Fox Country Master, who looked gloomy. This told him something was wrong.

"I've been following the rules consistently," he said, "and I haven't done anything against the laws. I don't know what crimes I've committed."

The universe knight in white—emanating sense of indifference—smirked. "South Fox," he said, "your disciple still dares to quibble."

"Not quibbling!" Mo Luo said anxiously. "Please give me the evidence that I've committed crimes, Teacher..." He looked to his teacher ardently.

"You still don't know your crimes?" South Fox Country Master shook his head. "This is an order from Milky Way Horde Leader. If you admit your crimes, you'll be sent to the first star domain prison for 10,000 eras! If you don't, you'll be executed!"

Mo Luo shook his body and looked petrified...

Executed?

"I've committed crimes! I admit it!" Mo Luo yelled. "Teacher, I admit it. You two universe knights, I admit it."

"What crimes?" North Larva Knight asked.

Ganwu Country Master stared at Mo Luo coldly.

"What crimes...?" said Mo Luo. "I don't really know..."

Mo Luo was apprehensive. He started to think quickly; his mind operated faster than it ever had in his life. He had been born an orphan, and after all the life or death experiences, he had formed a mature way of living. He would kill all those who posed a threat to him! And he wouldn't leave any traces.

Now that these seniors from the virtual universe company were here to question him, all the incidents flooded his mind... He had done many cruel things, but, theoretically, he had left no trace of his actions. There were some beings who knew what he had done, but no one had evidence.

Milky Way Horde Leader's order? thought Mo Luo. Who is this Milky Way Horde Leader? Milky Way... A name came to Mo Luo's mind. Luo Feng! Luo Feng's home planet is Earth in the Milky Way. Could he be Milky Way Horde Leader?

Mo Luo was undying, but he was so scared that he was sweating. He'd been following Luo Feng's process and had been terrified when he'd learned that Luo Feng had become a disciple of Primal Chaos City Leader. He was certain that if Luo Feng divulged his actions to Primal Chaos City Leader, he would be doomed. However, Mo Luo had also done his research. He knew Primal Chaos City Leader was famously fair.

He won't prosecute me without evidence, thought Mo Luo.

Initially, he had been scared, but he'd stopped being worried because Luo Feng hadn't revealed anything, even after all this time.

As for Luo Feng's record on the original stars, undying fighters were not qualified to know about the original stars! Only universe masters, universe knights, and incredibly powerful, invincible emperors were qualified to know the truth about Luo Feng.

Mo Luo had no idea what had happened. He didn't know about Luo Feng hunting on the original stars. Neither did he know that Luo Feng had killed more than 6,000 universe knights in one move.

Luo Feng wants me dead?

Mo Luo raised his head and looked at the three universe knights. North Larva Knight and Ganwu Country Master gazed at him coldly while South Fox Country Master kept shaking his head.

"It is him."

Mo Luo looked at South Fox Country Master. "Teacher, even you don't believe me? I didn't do anything! I adventured on Demon Note Mountain before, and we've had a feud since then because of valuables! I

can't believe he still holds such a grudge against me after all these years! Teacher, please, be fair! Show justice!"

North Larva Knight smirked. "You're still quibbling."

"Interesting," said Ganwu Country Master and shook his head.

"It doesn't matter anymore." South Fox Country Master sighed. "Mo Luo, I know that you're decisive, but I can't believe you're so ruthless."

"Teacher, I'm being framed!" said Mo Luo.

He didn't dare to admit it. He would be executed if he admitted it.

"Teacher." Mo Luo clenched his teeth. Tears welled in his eyes and rolled down his face. "I'm being framed! Even if Luo Feng has become a universe knight, how can you allege that I'm guilty just because of what he said? I can only die to prove that I'm innocent."

Weng!

Strong godly power restrained every trace of Mo Luo's godly power. He wasn't even able to self-destruct under such suppression.

Mo Luo couldn't help staring at Ganwu Country Master. "Ganwu Senior, you..."

Mo Luo knew about resurrection and was certain he would be revived if he acted indignantly. However, Ganwu Country Master didn't even give him a chance to self-destruct himself.

"Don't even try," Ganwu Country Master said. "We're here to deal with you under the orders of Milky Way Horde Leader. You'll be executed now, as you didn't admit to your crimes."

Mo Luo's eyes glinted with madness. "Milky Way Horde Leader? Who is this Milky Way Horde Leader?" Mo Luo yelled hoarsely.

"The Mr. Luo Feng you were talking about," said North Larva Knight.

"Luo Feng? Not possible! He just became a universe knight! How long has he been training himself? 100,000 years? How can he command you as only a universe knight?" Mo Luo shook his head, unwilling to believe it. "I know that I'll die, but please tell me who wants me dead!"

Ganwu Country Master gazed at Mo Luo. "It's Mr. Luo Feng. Luo Feng has become a universe master! He's a pinnacle being in our human race."

"A universe master?" Mo Luo opened his eyes wide. "Luo Feng? A universe master?"

The same Luo Feng who had been kicked into the abyss had become a universe master?

"Milky Way Horde Leader is a universe master," said Ganwu Country Master. "How can he frame you? His word is much more adequate than any evidence. You're indeed reckless. You dared to go against the orders of the virtual universe company."

"No! I didn't!" Mo Luo yelled. "I don't believe Luo Feng has become a universe master! Not possible!"

Peng!

Like the ground being cracked, Mo Luo's godly body started to crumble. It turned into dust, vanishing into thin air.

All of a sudden, his god country, which was lively with magma bursting out of volcanoes a moment before, went dead. The volcanoes stopped erupting. And all the volcanoes went dead, and the god country started to turn cold.

If Mo Luo could be resurrected, his god country could come back to life. Unfortunately, Mo Luo would never be revived.

"Let's go!"

Ganwu Country Master, North Larva Knight, and South Fox Country Master teleported themselves out of the dying god country.

\*\*\*\*\*

Earth, just as Mo Luo was executed.

The foreigners living in the floating cities all roared.

"We must all migrate?"

"Who gave the order? I sold the territory of an entire solar system to get the residential right to live on Earth for 1,000 years. Who's going to compensate me?"

"Not possible!"

"You're trying to expel us? I'll report it back to my family and make you all regret it."

After the power of Earth was discovered, residency rights on Earth became incredibly expensive. Only those with solid connections in the five powers could enter. Besides, they all went to Earth to give birth to their children, and after their children were born, they would leave Earth in no time.

Those were all beings with powerful families in the human territory, and they had paid a huge price to come to Earth. But now, they were all going to be expelled?

"Virtual universe company, Huge Axe Dojo, Universe Mercenary Alliance, Universe First Bank, and Universe Star River Bank gave an order at the same time."

"Leave the earth in three days. Otherwise, die."

Those beings with powerful families were nothing in front of a universe master. All they could do was reluctantly leave Earth.

When the enforcement team expelled all the migrants, the pantheon in the solar system also disappeared. From now on, this would be the place where Milky Way Horde Leader guarded forever. And mass construction began in the Milky Way.

"Earth!"

A black-haired man stood in the solar system, looking at the blue planet. He smiled, stepped into the atmosphere of earth, and dived.

### **Chapter 1136: Earth Branch**

100,000 years later, what would Earth be like?

Long grass would be all about. Amidst all the greenery that embellished the surroundings, there were numerous residential buildings of unique structures. Birds were often seen flying in the sky, which was a deep azure blue. The air would be fresh, and if the standards of human domain were to be applied, then Earth would be categorized as a top-tier SSS-grade life planet of the highest standard.

Nature and technology would have achieved perfect harmony. There would be many people—men and women alike—walking along the streets, dressed either in their training gear or just casual clothes. There would not be any public transportation like cars on the roads, and the underground tunnels that connected Earth to the various cities around would be advancing at a speed of 18,000 miles, a speed that allowed the people to arrive at other cities with much ease.

Of course, allowing several large continents to stretch across the seabed to form tunnels would also be possible because of Luo Feng's authority.

"Earth would be entirely different," Luo Feng gasped in admiration.

Xu Xin smiled and replied, "It will be even more different in the future."

They walked along the street as a couple, looking just like any other ordinary husband and wife. The other people could not tell the difference at all. Actually, even if one had seen Luo Feng, their memories of him would vanish immediately in the blink of an eye. There was no way they could remember anything about him.

Luo Feng observed everything around him carefully. Earlier on, he had sent Remote Ocean body to garrison Earth. Yet Remote Ocean body merely sat cross-legged in silence, in a quiet room deep within the Luo's family house. He would only make an appearance if a crucial situation occurred. Except for the other two times when Luo Feng had to accompany his family, Remote Ocean body did not make any move at all.

"Xu Xin, I realized that Star Traveler levels are frequently seen here," said Luo Feng. "I saw many along the way." He could not hold it back longer, so he asked, "Are Star Traveler levels that common?"

"Over 10,000 years, Earth would not have been able to develop so fast where the majority were star traveler levels." Xu Xin shook her head. "Oh well. The mysteries of Earth are top secrets, though they were never disclosed. However, large families of the top five powers like the Virtual Universe Company, the Huge Axe Dojo, and the Universe Mercenary Alliance were all finding ways to enter Earth! You should have figured this out by now. The right to reside on Earth is in hot demand now."

Luo Feng nodded.

"Previously, immigrants of the Earth's ocean would be aliens, while those on land would be us earthlings," Xu Xin said, "Over 10,000 years of development, earthlings are now scattered all over the Ganwu universe, and even in other universes. The numbers are immeasurable."

Luo Feng smiled and nodded. "In the past, the earthling population has never been able to achieve a breakthrough. That was because there was a limitation of land. With the limitation lifted, there was a large quantity of grains as provisions... If there was a rapid multiplication of earthling population thereafter, it would be understandable."

"Hmm," said Xu Xin said. "Just like that, the earthling population has multiplied to such a massive number that it might be incomparable. Putting others aside, just the number of people in our Luo Family is intimidating enough."

Luo Feng nodded. The population in Luo Family had long exceeded the size of one starfield. No matter how development progressed, to increase the population size by 100 million times in 5,000 years was normal, but for a development that had progressed for more than 100,000 years... the population size would be so massive that it sounded exaggerated. Regardless of how much power the Luo Family had, their massive size would still go under the influence of territorial limitations; therefore many members of the Luo Family had to settle down on other planets or even in other universes.

If the massive Luo Family would face such a situation, what would the overall situation on Earth look like?"

At the Earth Management Association level, making use of the virtual universe would still be impossible to create identification records of every earthling. After all, in the vast universe, if unfortunate events like air crashes happen and earthlings were caught and enslaved by mineral planets, in a place where the population was so immense that it was impossible to keep track, the Earth Management Association would not be able to cover everything—or everyone—comprehensively.

"The population is too big," Xu Xin said. "Now we have to authenticate all the earthlings' identities. Firstly, identity registration! More than 99 percent have been documented. Secondly, gene authentication. The earthling branch of the family has a unique kind of gene that is very different from the other races among humanity. On Earth, land domain must be occupied by earthling residents. If it were occupied by the other races, no matter how powerful or wealthy they were, they would not be granted the right of abode.

"Time passed... and the right to reside on Earth is in hot demand now. There are some residents on Earth who yearn for a more luxurious life. Therefore, they sold off their rights of abode and left Earth for another life planet. Maybe this was how some became planet horde leaders. Because the right to reside on the land on Earth can only be traded between earthlings, the price was not as exaggerated as the value that alien immigrants had set. But it was nonetheless extremely high. Wanting to become a planet horde leader, wanting a life with illimitable luxuries, or wanting to become a great being with the ability to purchase great quantities of resources... The bottom line is, the right to reside on land on Earth is continually being traded, as there are some Earth elites with status and power who were continually entering Earth.

"There will be changes from generation to generation. Those who are able to enter Earth are all the cream of the crop. They have roamed the universe and established their business empires, or have become great fighters or great spirit readers. Therefore, more than half of our elites from the trillions of people of our entire Earth branch are gathered here on Earth."

Xu Xin smiled. "Which was why, on Earth, star traveler levels are frequently seen, even star levels to universe levels can often be seen. There are also quite a few undying beings living here on Earth."

Luo Feng sighed and nodded. The undying spirit... It was true that with enough cultivation, the chances of becoming a great being would increase. Now, the earthling branch had a total of 11 undying spirits (including Luo Feng, Hong, and Thunder God). Five were staying on Earth! The number of sector lords was even bigger. With such might and power, it was no wonder universe masters of the five major factions of humanity thought so highly of Earth.

"The right of abode on Earth's land can be freely traded as one pleases?" Luo Feng asked.

"So long as it is a transaction between an earthling and Earth, free trading is the best option" Xu Xin shook her head. "One end is willing to buy, and the other end is willing to sell! Who can stop them? This would help our Earth branch's holy ground to continue rising up the ranks. After all, this is where over half the elites from the Earth branch are gathered. But earthlings of high status and with strong powers would all want their future generations to get stronger, even if those Earthlings were already used to living on other planets. But for their younger generations, they would purchase the right of abode on Earth and send two to three family members over to stay here on Earth. It can also be said this way. Earth is where more than 50 percent of elites of the earthling branch are gathered; out of the first million Earth elites, 99 percent of them hold the right of abode on Earth."

Luo Feng nodded. This was good, too... The longer they took, the higher the status of the holy ground, "Earth," would be. It had only been over 100,000 years of developing since the earthling branch became a universe. There were many aspects of it that were yet to be considered extremely powerful, like the number of great beings, the power of its associations, and many more. As time passed, elites of this branch would gradually emerge into prominence.

According to what the higher-ups of humanity calculated, the earthling branch's continual development would be comparable to at least ten percent of humanity! How many undying spirits would that be? How many universe knights? Clearly, the potential of the earthling branch had just emerged and had yet to be fully unleashed. This unleashing of potential... would need enough time.

"The greatest difficulty now is that the outstanding youths of our earthling branch are unable to receive the best cultivation they could get," Xu Xin said. "Based on the data we retrieved from the alien immigrants, once a wife gets pregnant, she should enter Earth within the first three months of pregnancy. If the entire process from the gestation period of the fetus to the day the baby is born happens under the influence of Earth's environment, then there is bound to be a transformation. Therefore, it is crucial to rush to Earth during the first three months of pregnancy. Any later than that, and the effect will be very different.

"Our Earth Management Association manages a large number of Earthling youths, cultivating them with great care, then singling out the cream of the crop for deeper cultivation. We have wealth. But teaching them required a great deal of resources—for instance, a good teacher and a conducive environment for them to train in. Our family alone is insufficient. What we have come up with so far is nothing compared to the cultivation mechanism of the Ganwu universe. This has, to a certain degree, affected the rising of the earthling branch."

Luo Feng nodded and considered for a while. "I will make arrangements as quickly as I can," he Luo Feng.

Cultivation was very important. Like Luo Feng, Hong, and Thunder God, if they had not stepped off Earth and advanced into the universe... if Luo Feng had not received Yun Mo Star Master's treasure and Babata's guidance, then naturally Golden Horned Beast would be gloriously sacrificed. The three of them would obviously be greatly limited, and the chances of attaining the universe level would also have been very low. Yet the moment they received cultivation... All three each displayed a dazzling light and were completely different right away.

And if the earthling branch wanted to rise up to recognition, cultivating the new and younger generations was obviously crucial.

"The mechanism that other universe masters used to cultivate their younger generations is highly matured," said Luo Feng. I shall take some reference from them and then make use of my own resources to establish my own mechanism. That should do." Luo Feng nodded to himself. "Humanity has many places for cultivating their kind. The only problem is that even universe knights are not qualified to arrange for a large batch of members to undergo training simultaneously."

But a universe master could!

For instance, sending their family members to Blood River World, or some other places... Of course, Luo Feng also needed to pay a small price for it, but to him, it was a piece of cake.

\*\*\*\*\*

After the alien immigrants' major move out of Earth, Earth started to undergo transformation once again. Making use of marine resources, re-coordinating ocean and land, the natural order was enhanced to nearing perfection.

Also, some restructuring was done to the numerous floating cities that were once occupied by alien immigrants to make them more suited for earthlings to live in. The floating cities were normally a few hundred stories to 1,000 stories high. If residing on land was said to be done using one or two stories of land, then on a floating city of an alien immigrant, it would be considered a highly effective use of space!

Adding up the surface area of the vast oceans, the total would come to a much greater amount compared to that of land. Although the distance between floating cities was vast, when all the floating cities suspended in the skies above the vast oceans like the Pacific Ocean, the Atlantic Ocean, and the Indian Ocean were put together, the amount of space could accommodate a few hundred billion people.

"This will be able to accommodate a few hundred billion of people. We can then allow many young earthling mothers-to-be to quickly enter Earth. We should also try our best to get them to arrive here on Earth within the first three months of pregnancy. Earthlings who were born on Earth... their cultivability is much stronger. On the other hand, for earthlings born on extraterrestrial planets, the chances of producing great beings are worrying because they are much too low."

\*\*\*\*\*

Various plans were speedily formulated. Then, one by one, they were implemented.

The first thing Luo Feng did when he returned to Earth was to make use of his power to start boosting the development of the Earth branch! He made a perfect combination out of his resources and the race's resources, which then sped up the rate of development of the earthling branch tremendously. He believed that soon, it would not be wishful thinking for the earthling branch to want to be stronger than the Yan Shen race branch.

"If the earthling branch can have some universe knights and a large number of undying spirits and go on to see the emergence of a universe master, that would be even greater."

Luo Feng secretly looked forward to this. However, it would require a long time.

### **Chapter 1137: Second Form of Shi Wu Wings**

There were several beasts on the farms where weeds were growing. Many varieties of broken cars sat abandoned and ruined on the highway. Some of them were tipped over, and the dust on the highway told its history.

A shadow walked on the highway.

"Reserve?"

Luo Feng walked on the shabby highway, recalling the past a long time ago when he first joined the Fire Hammer Squad and adventured in the wilderness. He remembered Chen Gu who used fiery weapons who was very friendly to him. He remembered Zhang Ke, who lost his arm. The Wei brothers, who were skilled with a scimitar... And of course, that captain Gao who was powerful with hammers...

"It's been more than 100,000 years."

Luo Feng shook his head and smiled. Those were the brothers who had endured troubles with him before. However, Luo Feng had been adventuring through the universe, and he didn't even have time to see his family members. As for those old friends, he had only seen them a few times. Luo's family had been secretly helping those old friends without affecting their lives. Time was cruel, however, and more than half of Luo Feng's friends had died.

Although Luo Feng's family had infinite wealth, it still had control over resources. The family would help their old friends, but they wouldn't improve their friends' power to at universe level or domain-lord level.

There were still many reserves on Earth, which were remains from the era of Headquarter City. Some of the beasts were protected as endangered animals. Those animals were allowed to live in the reserves, on the cracked highways, in rolled-over cars. Ruined buildings in the reserves were renovated. New material was applied—material that could last for a long time.

The surface was deliberately made to look ancient; after all, the concrete used before was not likely to be maintained. Tourists had to view them from spaceships in the sky. The areas could not be trespassed, and the beasts inside were off-limits.

As for Luo Feng, he went in via teleportation. He had the highest access authority to the entire defense system of Earth, so he could get in without any problem.

Sou!

Luo Feng jumped up to the balcony on the sixth floor. He looked down. He could hear faint, beastly roars as he looked at the moon.

"Just like before," whispered Luo Feng. He frowned. "Huh?"

Shua!

He disappeared from the balcony.

\*\*\*\*\*

In a sky around 800 light years away from Earth was a group of towering, resplendent palaces. Powerful guards walked within the palaces. Sector-lord guards and even undying servants were walking through corridors that were tens of millions of miles long. These were Luo Feng's godly palaces.

Inside the tallest main palace, fires burned around 12 gigantic pillars. Suddenly, a giant being showed up on the throne. It was Luo Feng's 6,000-mile-tall body. He looked down at the three beings.

Three beings bowed at the same time. "Milky Way Horde Leader."

"Ganwu, Kuang Zhou, North Larva." Luo Feng smiled and looked down. "You've done a great job."

All of them had dealt with the issues he had asked them to do, and they had finished today. Of course, he needed to meet with the three of them. There was much more he needed these three universe knights to help him with.

"It's our honor to serve Horde Leader," said Kuang Zhou as he raised his head, followed by Ganwu Country Master and North Larva Knight.

Luo Feng smiled and nodded. "From now on, you'll be in charge of everything here. You can connect to the virtual universe if you need me, or you can crush your keepsake."

"Yes." Three universe knights bowed.

Luo Feng nodded and said, "You may go now."

The three universe knights bowed and left the palace.

Luo Feng was 6,000 miles tall. He put his hands on the armrests and raised his head to look at the towering godly palace six million miles tall. Even for Luo Feng, the godly palace felt like an endless sky.

"The godly palaces are all so large," whispered Luo Feng. "Okay. I've been studying the second level of Star Tower. However, I still haven't fully completed the second level of Shi Wu Wings, which is inferior to Star Tower. I'll spend my time on Earth studying the Shi Wu Wings."

Luo Feng disappeared.

He could arrive at Earth within one teleportation, as Earth was less than 1,000 light years away from his godly palaces. As for the three universe knights, undying guards, and sector-lord guards and servants... They had been arranged by the virtual universe company! Generally, a universe master would select some universe knights as their disciples. There were only a few universe masters within the human race,

most of whom were reluctant to take disciples, so most universe knights could be disciples of universe masters.

Primal Chaos City Leader wanted Luo Feng to take disciples. Luo Feng, however, not only needed to train himself but also hadn't reached the universe-master level at law comprehension. That was why he hadn't taken any disciples. Instead, he had chosen three universe knights to deal with his issues.

Those universe knights who worked for Luo Feng directly had Luo Feng as a connection now! Those with connections were on a totally different level than those who didn't have them.

Luo Feng firstly chose Ganwu Country Master and Kuang Zhou Knight, who were close to him. Then Ganwu Country Master had recommended North Larva Knight, who was his friend. Thus, these three universe knights were under Luo Feng, now. Ganwu Country Master would never find himself in an embarrassing situation with Luo Feng as his connection.

"Ganwu, I can go to Horde Leader only because of you..." said North Larva Knight. "I can't even repay you..."

"North Larva, we're best friends," said Ganwu Country Master, "and you've helped me lots of times. This is nothing."

Ganwu Country Master, Kuang Zhou Knight, and North Larva Knight had turned the tables around now. Having connections set them apart. They were bestowed with one ordinary true treasure each when Luo Feng admitted them! It was enough to make other universe knights jealous.

\*\*\*\*\*

Luo Feng made a portal connecting his god country with Earth. He was able to quickly go back to his god country from Earth and to arrive back at Earth from his god country. With that path, even space shock.

Twelve years passed.

"Haha! Shi Wu Wing is more complicated than I thought," said Luo Feng. "I've spent twelve years, and I've finally fully comprehended the second form."

Shua!

Luo Feng teleported from his palace to a silent sky hundreds of light years away. He didn't dare try the second form of the Shi Wu Wings while on Earth. With his power, a slight trace of his Shi Wu Wings could dismantle Earth.

Luo Feng stood in space, his eyes gleaming. "Let me see the power of the second form of Shi Wu Wings."

The four-winged Shi Wu Wings were a top-tier true treasure. The first form of the four-winged Shi Wu Wings was more powerful than the second form of the two-winged Shi Wu Wings. And the second form of the fourth wing should be more powerful than the third form of the two-winged version.

The first form was called "space and time in disorder." But what about the second form?

Chi! Chi! Chi!

Endless burning power flooded Shi Wu Wings along the engraving sculptures, and the power triggered all the sculptures. Instantly, the second level of sculptures on Shi Wu Wings were completely utilized, and the silver wing immediately started to change. The wing became sharper, and golden threads appeared on it. An elegant but powerful force permeated from it. It made Shi Wu Wing stronger than ordinary top-tier true treasures.

Hong!

The sky was enveloped in golden light.

Luo Feng stood in the sky in silence. No matter how powerful the second form of Shi Wu Wings was, Luo Feng wouldn't be overly surprised. Rather, the function of Shi Wu Wings was what thrilled him.

"This, this..." Luo Feng looked around. "There is a star-level strange beast on a planet 1.2 light years away." He looked in another direction. "And there is a construction team 2.9 light years away from me, reconstructing that planet. There's a spaceship 3.8 light years away from me. There's sector-lord team on patrol 19.6 light years away from me."

The 80-square-light-year area was entirely enveloped by the blurry golden light! This area was completely under Luo Feng's control, and he knew everything that was happening within the area.

"How...? How come?" The more Luo Feng sensed everything around him, the more thrilled he got. "Even universe masters aren't able to control such a giant area! Suppression!"

Luo Feng triggered the wing, and the constraining power on the space surged. All the spaceships in this area immediately slowed down. Some stars started to tremble. If Luo Feng didn't control his power intentionally, those stars would've been annihilated.

"Suppression!" Luo Feng pointed to a star in the distance.

Hong!

The star, its three planets, and all the many asteroids held within its gravity were all annihilated under power that could kill a universe knight. A whole solar system vanished from existence just like that.

"So powerful." Luo Feng put all the suppression on himself. He could feel the incredible constraining power. "It's stronger than that of universe masters."

Luo Feng felt constraint akin to a universe master's control over space and time! He could tell clearly that his control over the area of 80 square light years was more powerful than that of universe masters, but, of course, it was still inferior to that of universe supreme masters!

"It's more powerful than that of universe masters! My Shi Wu Wings..." Luo Feng was overjoyed. "The first form can throw time and space into disorder, and the second form can fully control space and time! The control is stronger than that of universe masters, and so is the range."

Luo Feng narrowed the golden light. "I can control the size. Impressive." He smiled. "From now on, I'll have the ability to control space and time. Who will doubt that I'm a universe master? Haha..."

It was within his expectations to discover that the second form had such a function, but it was an exhilarating surprise.

"I'll name the second form of Shi Wu Wings..." whispered Luo Feng, who was covered with golden light, "Golden Country!"

### **Chapter 1138: The Golden Toad**

Form one of Shi Wu Wings: Chaotic Time Space.

Form two of Shi Wu Wings: Golden Kingdom, considered an auxiliary power but very much to Luo Feng's liking. After all, the greatest difference between a universe master and him would be the ability to control time and space. For instance, hunting and fighting used to be disadvantageous for him, but that weak spot had now been remedied.

"A radius of 80 light years," Luo Feng said. "Even a top-tier domain type true treasure like Thousand Treasure River was not as ridiculously immense. If the second form was already so strong, I cannot imagine the third form..."

Luo Feng started to examine the entire Shi Wu Wings with his godly power, covering every inch of the wings. There were some sculptures with secret engravings that appeared in his mind 1,000 times clearer than what the naked eye could see. Luo Feng took one look and immediately felt some disappointment. He understood that for the moment, this was the maximum power of Shi Wu Wings, or at least, the third form of secret engravings of this deformed Shi Wu Wings was originally imperfect.

"Clearly, Shi Wu Wings still lack certain components. At least, that was the case for the sculptures of secret engravings, where a part of the engravings is missing. No matter how powerful I am, it is impossible for me to activate the third form. To activate the third form, I must fulfill two requirements. Firstly, law comprehension acquired by oneself to attain a higher level of accomplishment in the studies of secret engravings; secondly, finding the missing component of Shi Wu Wings to bring it nearer to perfection."

After just one fusion, Shi Wu Wings had reached the level of a top-tier true treasure. If another fusion were to...

"Shi Wu Wings are indeed extraordinary, but I have no idea where I can find that missing component," Luo Feng lamented.

He knew it would not be easy. Shi Wu Wings had belonged to Primal Chaos City Leader for a long time, yet even Primal Chaos City Leader was not able to discover any other components. However, he had not made use of Shi Wu Wings personally, so he would not have known.

Luo Feng did use them, though. In addition, as countless great beings of the universe were gathered in the original star, Luo Feng managed to sense Tian Yang Knight by chance encounter, which was how he learned about the other component of Shi Wu Wings—Flowing Light Wings.

Yet, through these years, as Luo Feng went into the original stars time and time again, he did not sense anything else that was new to him. Wanting to find the next component, the level of difficulty was palpable.

"Yet this feels strange, too. The birth of Shi Wu Wings did not take place on an original star. If it did, then the original star would clearly indicate the level of this treasure. The treasure would have been divided into several components, and its birth would have taken place according to the divided pieces. What

everyone has obtained would only be components, but all would understand how precious each component was. Tian Yang Knight and Teacher each received one wing, yet they did not see the greatness of this true treasure component. When Teacher first gave me his share, he said with surety that throughout the universe, he was the only one who had laid eyes on Shi Wu Wings. No second being had ever seen Shi Wu Wings before."

"Hmm," Luo Feng said to himself. "I have to ask Teacher about it again. I need to find out where exactly he found Shi Wu Wings."

Luo Feng decided that he had to find the other components of Shi Wu Wings. If the power of the second form was this powerful, what would the power of the third form be like...? Luo Feng was really looking forward to finding his answer.

"Time to head back."

Shua!

Luo Feng disappeared into the sky, which was still as quiet as ever. The only problem was, at a distance away, a galaxy was missing.

\*\*\*\*\*

The years of a great being were always so long that they felt like an eternity. The majority of the time passed by peacefully. This peace, however,... was spent preparing for future fights, which always seemed crazier than the preceding ones! The fights could be for their race, for power, or for oneself!

"I can't believe that the Disambiguation Temple is still not open by now."

Luo Feng had been looking forward to the opening of the Disambiguation Temple. After all, it was a pinnacle domain type true treasure... Only Star Tower could surpass it. The other treasures were lacking in comparison; Force Armor and combat blade Absolute Guest were all weaker by a notch.

It was a once in a lifetime opportunity to obtain such a true treasure. Naturally, it evoked an overwhelming sense of competitiveness in Luo Feng.

At that time, Luo Feng was also cultivating the beast god path, which required him to study diagrams of secret engravings. So temporarily, he would be giving up on studying Star Tower, as the third level of secret engravings were shockingly complicated. This was clearly of a far higher level than all that he had studied previously. Only those who were more accomplished in the law comprehension and diagrams of secret engravings would be able to comprehend it.

\*\*\*\*\*

It was 165 years since Luo Feng first became Milky Way Horde Leader. Within the Ancestral God secret region, in an area on Redbud Island that was being enshrouded by the Five-Color Aurora Lake, Luo Feng stood by the railings of a pavilion and looked off into the distance, where he could see the public square in front of the palace of the island master.

In the blink of an eye—shua! He arrived at the fountain resembling a curtain and strode through it to enter the land of inheritance.

A moment later, he stepped out from behind the fountain.

I already know how to use the ultimate technique of a universe master, and I have the heart of Beast God, he thought. Cultivating the Beast God Path can be done at godlike speed! Also, I was fortunate that there is the land of inheritance, where I could always inherit, allowing my efficiency to be maximized.

Luo Feng was clear on the fact that every time he entered the land of inheritance, a large amount of energy would be consumed. That was why the land of inheritance had very stringent control over the number of times one could enter.

Usually, only those who newly joined were entitled to one free inheritance. Other times, everyone had to exchange for the chance to enter and inherit from the land of inheritance. Most of the other heirs could only make an exchange once in a blue moon. However, there was a year when Luo Feng had gone crazy engaging himself in various battles, to the extent of fighting 620,000 battles... This had earned him many glory points, which could be used to exchange for many chances of entry. Usually, one would need to have acquired a new comprehension before another round of inheritance, so the sessions of energy-consuming inheritances were limited to a certain number.

"Luo Feng!" a capacious voice rang by Luo Feng's ears and resonated in his mind.

"Huh?" Standing by the waterfall, Luo Feng turned to look high up into the sky.

Hua!

A light emerged from the depths of Five-Color Aurora Lake that enveloped all that was beneath it. It moved to completely enshroud Luo Feng. One end of this light pillar kept Luo Feng enveloped. Looking carefully at the other end, Luo Feng saw that it was extended deep within the Five-Color Aurora Lake, all the way to the Ancestral God Palace.

"Ancestral God Palace?" Luo Feng looked up and saw the colorful lights separating on their own to create a path for the light pillar to pass.

"Ancestral God," Luo Feng greeted.

He recognized this voice. It was the voice of Double-Face Ancestral God.

"Come to me," the voice said.

Instantly, an intangible power enveloped Luo Feng.

Sou!

The force brought Luo Feng up off Redbed Island and sent him on his way along the path of the light. Luo Feng went flying into the depths of Five-Color Aurora Lake in the direction of the Ancestral God Palace.

At this point, Luo Feng's speed far exceeded the speed of light. Being able to reach such a speed in the primal universe was on thing... Obviously, only a universe supreme being was capable of such manipulation. Luo Feng did not fight this force. Given his power, he could have easily broken free from such restraint.

Flying ahead, he could see the 3,000 stars, which represented 3,000 god worlds. He could also see the 72 general continents, where every continent was vast and imposing. Then he flew past Beast God Palace and the Eight Natural Beasts' God Palace. Surrounding this were 16 other palaces.

"Arrived."

Luo Feng landed on the massive, towering public square of the palace. Looking at this Ancestral God Palace from Redbud Island, the place had seemed immense and towering. Being on it, Luo Feng gained a true appreciation for how intimidating its size was. The entire palace exuded an endless, immensely strong power. This was an eye-opener even for someone like Luo Feng, who had laid eyes on various true treasures.

"This Ancestral God Palace must be a pinnacle flying-palace true treasure." Luo Feng speculated. "No other like the Ancestral God School! Even if humankind's 'Teacher Origin' had yet to be suppressed, he would barely be comparable to this Ancestral God School."

"Luo Feng, come in."

The voice was heard from within the large palace hall. Outside the hall, there were eight guards clad in gold armor. They were all universe knights, and from the power exuded by the treasures they carried on them, their armor and weapons were true treasures. At this moment, all eight knights were looking directly at Luo Feng.

"Yes," Luo Feng answered.

He took a step forward and was instantly at the doorstep of the palace, where he made his way into the spacious hall.

\*\*\*\*\*

In the towering hall were many tall heavenly pillars that seemed never-ending; on every heavenly pillar was a totem engraving where the appearance of every race was engraved. There were sculptures with engravings of humans, bug soldiers, the automaton race... and there were also engravings of many other different races.

Double-Face Ancestral God sat on his throne, the furthest one away. He looked toward Luo Feng and, with a smile, he asked, "According to the information that your fellow humans have openly disseminated, you have fixed your chosen name as... Milky Way Horde Leader?"

"Yes." Luo Feng nodded.

"Milky Way Horde Leader Luo Feng, you have been with the Ancestral God School for some time and also joined our sub-organization," Ancestral God said. "You may be Milky Way Horde Leader now, but the noble universe origin has told me that... you have yet to become a universe master. You are able to make use of the ultimate technique of a universe master because you had an ability of another school of study, which had appeared in the primal universe for the first time."

Luo Feng was secretly taken aback. The Ancestral God School openly made it known that they were the guardians of the universe origin!

Even Primal Chaos City Leader and company said that the universe origin was also reciprocating and guarding over the Ancestral God School... Previously, he had always managed to receive inheritances one after the other. Plus, he had created a technique with the help of another school of study. It seemed the rumors of the relationship between the Ancestral God School and Universe Origin were not unfounded. Both sides knew everything about one another.

"The day you truly become a universe master will be the day you become our 'Guarding Godly Master,'" Ancestral God said, looking at Luo Feng. Then he continued, "Don't overanalyze. Every Guarding Godly Master of the Ancestral God School is a universe master with extremely strong power. Ordinary universe masters will not be able to take up such a role. Every Guarding Godly Master will have a few universe masters under his command."

Luo Feng nodded. He already knew. Sky Beacon Godly Master, Nine Remoteness Godly Master... They were legendary existences in the universe. His current capability was certainly not enough for him to become a Guarding Godly Master and to stand at equal rank as the rest.

"You joined the sub-organization of our Ancestral God School such a long time ago but have yet to receive a single mission." Ancestral God looked at Luo Feng. "Now, I am entrusting you with one. It does not implicate humanity, and the venue is very far away from the human domain. Are you willing to take up the mission?"

"If it does not implicate humanity and my good friends, I would be happy to oblige," Luo Feng said.

He had accepted numerous inheritances and received much kindness from Ancestral God. Earlier on, Ancestral God had even stepped forward personally to protect him from Virtual-Real Demon Master. It was only right to reciprocate with his services.

Hua!

A golden ray flashed and stopped right before Luo Feng. It resembled a statue of a golden toad, and the eyes of the toad were dark gray.

"Take this with you and head over to this domain. Any life form that causes its eyes to turn red must be annihilated." Ancestral God looked down at Luo Feng. "And you will also need to investigate what actually happened. The universe origin has communicated with me over there... Something is happening that bodes ill for our primal universe."

Luo Feng took hold of the golden toad and looked at its pair of eyes. They would turn red?

"Ancestral God, when its eyes turn red, does it represent how far away the life form is that is causing the eyes to turn red?" Luo Feng asked. "How big is its area of surveillance?"

"About 60 million miles," Ancestral God said. "Where your life imprint is. Control it, and you can clearly sense whether the reaction you have detected is caused by an actual life form or a foreign object. If it's an actual life form, no matter who it is... you must annihilate it. If you are unwilling to kill with your own hands, transmit your findings to me, and I shall deploy some other members. This is a new transmission token. The previous one that Nine Remoteness gave you carried a lower authority. You will not be able to connect with me directly using that. With this one, you can."

A golden token drifted over to Luo Feng. He caught hold of it right away. Why did this golden token look so much like the transmission token that his teacher, Sitting Mountain Guest, had made?

"Go," Ancestral God ordered. "For the sake of the noble universe origin, every life form that makes it see red has to be annihilated. Not even one can be spared."

"Understood." Luo Feng bowed.

### **Chapter 1139: Yuan Ao Master**

"According to the area the Ancestral God gave me, it should be in the Yuan Ao Secret Region."

On an arid mineral planet, a silver being broke the hard rocks. The rocks flew around, and the being already stood in space. Luo Feng looked to the sky in the distance, standing in space.

"This is the closest place to the Yuan Ao Secret Region that my slaves are able to transport to."

Luo Feng nodded, then changed his godly body. The original earthling body went back to the world ring while Blood Cloud Palace Leader showed up. Blood Cloud Palace Leader shook his tail, and Blood Cloud Palace showed up.

"Go!"

He entered Blood Cloud Palace Leader and sped up. He immediately entered the dark universe and started to travel quickly through the dark universe toward Yuan Ao Secret Region.

After all, he was only working for the Ancestral God School, and it was not urgent. Luo Feng wouldn't teleport, as it would be tiring to teleport continuously for more than a day; on the other hand, traveling with Blood Cloud Palace was much slower than teleportation but was still comparatively fast in the dark universe.

\*\*\*\*\*

Inside the primal secret region of the human territory, two beings stood near the palace of Primal Chaos City Leader. One was Primal Chaos City Leader, and the other was Huge Axe Founder.

"Chaos!" said Huge Axe Founder. "I decided to go to Universe Ocean. I might be away from the original universe for a long time. From now on, you'll be in charge of the issues in the human race."

"Universe Ocean?" Primal Chaos City Leader frowned. "For a long time?"

For beings like Huge Axe Founder, it would take thousands or even tens of thousands of years for training one time. This was why when Huge Axe Founder said "a long time," it might actually mean a long time. It might even be counted using eras. However, Primal Chaos City Leader was baffled because he didn't think it should take Huge Axe Founder that long to venture to Universe Ocean.

Primal Chaos City Leader looked to Huge Axe Founder in shock. "Is that so?"

"That's right. I decided to venture to Tilted Peak Sector!" Huge Axe Founder said, revealing his true intention.

"Huge Axe!" said Primal Chaos City Leader. "Tilted Peak Sector?"

"I got a Tilted Peak Sector Remnant Diagram," said Huge Axe Founder. "With that remnant diagram, I can inspect some of the areas on that diagram, and if I get lucky, I might obtain a supreme true treasure! Even if I'm not lucky enough, I might also get a pinnacle domain type true treasure."

"Remnant Diagram?" said Primal Chaos City Leader joyfully. "A Remnant Diagram of Tilted Peak Sector?"

"Yes." Huge Axe Founder nodded with a smile.

Even Primal Chaos City Leader was excited by the news. Universe Ocean was a place broader and more dangerous than the original universe. It was boundless! No great beings knew the end of Universe Ocean.

Universe supreme masters were low-key in the original universe. In Universe Ocean, however, they were all fierce and cunning, fighting and seizing at every chance. Universe Ocean was where the most true treasures were born! Almost all the supreme true treasures came from mysterious places in Universe Ocean like Tilted Peak Sector. It was the most dangerous Land of Extremis in Universe Ocean, but there were all sorts of pinnacle true treasures and even supreme true treasures hidden in Tilted Peak Sector! Of course, it was extremely dangerous as well.

Just the possibility of getting lost was enough to terrify universe supreme masters. There were no directions in it, and it was very easy to get lost. Even universe supreme masters who were able to defend themselves against all kinds of dangers might never be able to get out of Tilted Peak Sector.

Even universe supreme masters wouldn't dare adventure there without a map, but no complete map of Tilted Peak Sector existed. Fortunately, there were maps of some areas made by all the great beings who adventured in it, and they combined the maps of those areas into a remnant diagram. Remnant diagrams were highly valued by all the powers in the universe. The rarer a remnant diagram was, the fewer adventurers would be present in the areas depicted, which meant a higher chance of finding true treasures. One remnant diagram was priceless enough to be fought for by universe supreme masters.

"This is a remnant diagram of Tilted Peak Sector," said Huge Axe Founder solemnly. "Based on what I know, there are few adventurers there. I got this remnant diagram by luck, and I have to get there as soon as possible."

"Huge Axe, my original body will go with you," said Primal Chaos City Leader.

"No!" Huge Axe Founder shook his head. "The deeper it is in Tilted Peak Sector, the more dangerous it will be. The 'Ecstasy Sound' alone is able to make a universe master fall into an eternal sleep."

Primal Chaos City Leader was shocked. That was right. The power hidden in Tilted Peak Sector was more terrifying than that of universe supreme masters! Even if he had the clone technique, his other bodies would be affected if one of his bodies' souls was contaminated, at which point he would fall into an eternal sleep, which was not much different from demise.

"I know all the most dangerous areas in Tilted Peak Sector," said Huge Axe Founder. "My life won't be in danger unless I go to those areas! However, I'll strictly follow that remnant picture, and if it's incorrect, I'll go back immediately."

"Okay, be careful," said Primal Chaos City Leader.

"Haha... It's already very fortunate for me to get this remnant diagram, and this diagram covers a large area," said Huge Axe Founder. "It might be made by the powers before the Grant Incarnation. I can search further using the remnant diagram, and if I'm lucky enough, I can get a supreme true treasure by spending enough time. You'll be in charge of everything now."

Hua!

Huge Axe Founder disappeared.

Primal Chaos City Leader stood in the sky for a long time, then nodded. "If Huge Axe Founder can get a supreme true treasure, we humans will be more powerful." He teleported himself back to his palace.

\*\*\*\*\*

Luo Feng moved swiftly through the dark universe via Blood Cloud Palace and arrived at a secret region in a corner of the original universe in eight days. It was Yuan Ao Secret Region.

"Yuan Ao Secret Region."

Luo Feng stood in the space of Yuan Ao Secret Region. He waved his hand, and the golden toad appeared. Its eyes were still grey.

"This must be Yuan Ao Secret Region, based on the information from Ancestral God. There are 12 vast lands in Yuan Ao Secret Region! The smallest has a diameter of one light year, and the largest has a diameter of almost eight light years. There are many life forms of other races living on it." Luo Feng nodded. "The entire secret region belongs to 'Yuan Ao Master.'"

There was a significant number of life forms living in those vast lands, and it was normal that many sector lords were born in those lands. However, only a limited number of special life forms existed in one territory, and the fewer life forms there were, the more nurturing they could receive. Although there were plenty of individuals here, the number of great beings was significantly smaller than those in other territories.

There are so many lives, and it's easy for undying fighters to be born, yet it's difficult for universe knights to be born, thought Luo Feng. And there are no other universe masters in Yuan Ao Secret Region other than Yuan Ao Master. Besides, Yuan Ao Master is a special life form.

Yuan Ao Master was a special life form with an enormous amount of power, and he roamed the universe all alone.

He must have felt lonely, which may have been why he seized life forms in the universe from the weaker races. He seized hundreds of millions of individuals from different races. The most powerful one of those might only be a universe knight who didn't dare to go against a universe master! Besides, Yuan Ao Master only seized hundreds of millions of lives from trillions of life forms within a race.

There were so many races in the universe, and other than pinnacle races and powerful races, there were plenty of ordinary races and weak races. Yuan Ao Master had seized life forms from 100 different races and put them in 12 vast lands for them to breed.

There were more and more lives born in those lands, and Yuan Ao Master kept enlarging the lands. Now, there were zillions of individuals on those lands. There were undying fighters born in those lands, and the ordinary life forms believed in those undying fighters and followed them.

Of course, there was a supreme god on those 12 lands. It was Yuan Ao Supreme God, worshipped by all in the 12 lands.

"Yuan Ao Master seized all those life forms, and he manipulated undying wars using the undying fighters under him," whispered Luo Feng. "Ordinary life forms fight each other in those undying wars where many great beings were born. Thousands of undying fighters manipulated the undying wars, and the wars are like proving grounds. Dozens of universe knights were born in the conflicts, followed by thousands of undying fighters."

Luo Feng smiled. Of course, those universe knights were useless, as he had killed more than 6,000 universe knights with one move. The real value of those universe knights was their potential to become universe masters—even one of them.

"Based on what Ancestral God said, something hazardous to the universe origin is happening here." Luo Feng nodded. "I'll go to those lands and inspect them. After all, all the lives in the secret region are in those lands."

Sou!

Luo Feng teleported himself 1,000 light years away, and instantly, he had already traveled a million light years.

Suddenly, a boundless land appeared before him. It was one of the 12 lands that belonged to Yuan Ao Master.

"This must be Jue An Land."

#### **Chapter 1140: The Dark Continent**

There was a seven-color light membrane that was as thin as a piece of film high up in the sky covering the vast continent. It had an extremely strong resistance, but Luo Feng could easily pass through it.

"This resistance, I think only a sector lord will be able to penetrate."

Luo Feng nodded slightly, then headed downward to the ground. Just being high up in the sky, Luo Feng could feel an extremely strong "suction force" from beneath. It was so strong that Luo Feng was taken aback.

"Such a strong force," he said. "I think only those of universe level would be able to keep flying under such force."

He only flashed about in midair for a short moment before he landed on the vast grounds. The moment his feet touched the ground as he landed, the strong suction force weakened to be almost negligible, all within an instant.

Luo Feng commented lightly, "Yuan Ao Master really put in a lot of thought and effort when he created these twelve continents. One great continent and one seven-color light membrane. There must be a repulsive force between the two so as not to feel such a strong repulsive force upon landing."

Luo Feng could not help but marvel at the capability of Yuan Ao Master, who came to existence during the earliest period after the birth of the universe. At the very least, his efforts were evident in the creation of these twelve continents.

Luo Feng scanned his surroundings. This was a deserted plain in pitch-black darkness. At first glance, there were countless skeletons left lying on the grounds, and many were already decomposing. There were some that were still sturdy and whole; obviously, the death was not too long ago.

"This battlefield occupies a space around 6,000 miles wide," Luo Feng said to himself. "Among the corpses lying around, there are some who were highly skilled, while the others were mediocre. The best around here is merely a sector lord."

With his godly power, he investigated the entire battlefield and discovered the corpses of three sector lords. One was buried deep underground while the other two were hidden deep within the mountains.

On either side of the battlefield, there was an incomparably majestic ancient city. On the wall surrounding both cities, for a distance of at least 6,000 miles, there were large numbers of warriors on patrol. These warriors looked like they all came from different races, and the cities' walls reeked of blood, as though they were telling the cruelest stories found in the history of war.

"Battlefield? Impregnable passes on both sides?"

Luo Feng underwent a rapid transformation where his wings became a dark green color, and his hairstyle became a cropped short and fiery red. His skin also turned dark green. This look resembled the soldiers of one of the races he managed to detect when he investigated the place with his godly power.

"I cannot identify this race at all." He conducted his investigation with his consciousness, rapidly scanning through the virtual universe, but what he found gave him a good shock. "Ka Vulture clan? This weak little race disappeared from the universe a long time ago. Only some remnants of it are left in the Yuan Ao region." Luo Feng sighed. "Previously, when Yuan Ao Master rampantly plundered about, who would have expected him to leave behind a trace of this Ka Vulture clan?"

Shua!

With one step, Luo Feng crossed the majestic frontier of the city, which was more than 6,000 miles away from where he was. Luo Feng appeared in the sky above the incomparably luxurious and vast city where thousands of people were bustling with excitement. Luo Feng was positioned high up in the sky, so naturally, those ordinary life forms would not be able to see him.

Luo Feng checked the golden toad that he held in his left palm. Both eyes were still gray.

"Still gray. Every continent is immeasurably massive. This toad with its gray eyes will only be able to detect if I am within a distance of 60 million miles away from my target. How long will that take?"

Luo Feng took another step forward. He would continue investigating until he reached the 60-million-mile range.

\*\*\*\*\*

Luo Feng embarked on a long period of investigative works. Out of these twelve continents, the one of the smallest diameter would be around one light year, and the biggest could be as big as eight light years!

Every time Luo Feng teleported, he made sure to maintain 60 million miles, so if he were to teleport 10,000 times a day... it would take ten days for him to pass through a continent with a diameter of one light year. And the width itself was already one light year...

"If I had to look into twelve such continents, I'm afraid I would need several tens of thousands of years. Fortunately, the investigative works would only require some efforts on my part."

Therefore, Luo Feng only took out a trace of his consciousness to begin on this long journey of investigative works. The bulk of his consciousness was completely devoted to studying the beast god path and pictures of secret engravings.

\*\*\*\*\*

In the twinkling of an eye, Luo Feng had spent half a year on this continent.

"Nothing. There is nothing here, either. Here... Huh? It's red now!"

After teleporting repeatedly, Luo Feng suddenly stopped. The eyes of the golden toad in his hand turned fiery red. After half a year of probing around, this was the first time the eyes of the golden toad had turned red. Naturally, Luo Feng was so overwhelmed with emotions that his other bodies temporarily stopped cultivating too.

"In that direction."

Luo Feng looked up into the distance. With one teleportation, he reached around one million miles away from his target. Thereafter, Luo Feng started flying...

"One million miles. I can make it there in a split moment. I have to see for myself what the situation is around the target. What could be so highly regarded by Ancestral God of the Ancestral God School—the universe's top power—who even mentioned that something terrible might happen to the primal universe?"

Luo Feng did not dare to be the least bit careless and maintained due vigilance. After all, Ancestral God mentioned that something "bodes ill for the primal universe," so it would be no simple affair, after all.

Flying high in the air, Luo Feng's godly power investigated within 6,000 miles of his surroundings as he did not dare to probe too far away, lest he alerted his target unnecessarily and gave it the chance for escape.

This was Luo Feng's first time investigating a vast continent so meticulously. This task showed him scenes depicting snippets of life on this continent where various events of love and hatred unfolded before him. Luo Feng got to see the uniqueness of the civilization on this "Dark Continent" with his own eyes, and that made him happy.

"Interesting fellow, unlucky fellow."

Luo Feng's power suddenly locked down on a certain spot of this continent.

\*\*\*\*\*

"Mighty Flame family, just you wait! I, Bu Ah, will become the great Holy One, and then I will raze the entire Mighty Flame fortress to the ground!"

A burly rider was seen on the back of his gigantic demon beast with tusks. He was tall, bulky, and his entire body was covered with sturdy armor. By the sides of his demon beast were two large, blood-red axes. On his face, there was a scar slashed across half of his face, adding on to his ferocity.

"How dare you insult me like that! I served him well, fought for him with my life, and yet he dared insult me so. Even my maid was snatched away from me and given to someone else. I will take my revenge, I definitely will! I will be back, and I will come back as the great Holy One and stamp on the entire Mighty Flame fortress until it becomes nothing but a flat piece of land."

The demon beast rider cursed and swore. Then his demon beast took off in a sprint.

Hong! Long! Long!

Rumbling of hooves were heard from behind.

The demon beast rider looked behind, and for the moment, his eyes widened as he went pale. Behind him, an army of at least 100 demon beast riders were charging toward him with murderous intentions.

Gagagaga!

A piercing sound was heard from the sky, causing this demon beast rider, "Bu Ah," to look up. In midair, there was a gigantic beast that was fiery red all over, and its scaled armor and wings were surrounded by a ring of flames.

"Fire pterosaur! There are only nine fire pterosaurs in Mighty Flame fortress, and just to kill me, a fifth-grade rider, they have mobilized a fire pterosaur and 100 demon beast riders."

Bu Ah's eyes revealed a look of insanity as he grabbed a rider's rifle that was a good 36 feet long from the back of his demon beast in one swift move. With both hands, he held the rifle and took aim at the fire pterosaur fast approaching him from high up in the air. Beads of perspiration rolled down Bu Ah's face as his entire body trembled. He gritted his teeth and stared. It was not fear he felt; it was because the fire pterosaur charging down from the sky was overwhelmingly oppressive.

To be a worthy opponent of a fire pterosaur, one needed to be a "ninth-grade rider," which was just second to the level of a Holy One. He was merely a fifth-grade rider... Combining the efforts of 1,000 riders of his level would still be unable to defeat one fire pterosaur!

Hong!

The demon beast he was riding went soft in the knees and fell. Bu Ah fell off its back in midair and crashed to the ground rapidly. Although his body was in a somersault as he fell, his hands were still holding onto the rifle and aiming at midair.

"Mighty Flame family! Mighty Flame family! You wretched beings!" Bu Ah roared. "Even if I, the great Bu Ah, were to perish now, I would come back as a demon rider to haunt you all."

"Hahaha..."

"Demon rider?"

"In your dreams."

The fire pterosaur was hovering in midair while the other demon beast riders caught up at top speed. Soon, Bu Ah was heavily surrounded.

This troop of demon beast riders... Luo Feng judged from where he was, high up in the sky and seemed to consist of three different races; in terms of power, that flying beast should probably be of a "star level seventh-to-eighth grade standard." Although flying was usually only possible for beings of universe level, this beast had wings and the innate ability it could rely on, so flying was already almost possible.

As for those riders, they should mostly be of the star traveler level standard, the highest of the lot would, at most, be at a star traveler level ninth grade standard.

A rider wearing the most elegant armor, who was riding a snow-white, single-horned beast, said, "Bu Ah, I am not going to be a bully. My underlings are not fighting you, only me... I will fight you."

"Come, come, Uncle Bu Ah shall spank your bottom!"

Bu Ah, holding on to his gigantic rifle, grinned. He was like a crazy demon as he stared at the handsome rider. He was aware that before the Mighty Flame family, he was a puny nobody, even though he knew that putting up a resistance would cost him his life, he was not going to take it lying down.

Suddenly... everything between heaven and earth fell into silence. It was as though time stopped. Even the wild grass by the roadside that was bending in the direction of the winds froze in their respective positions. The riders and the beast hovering in mid-air stopped moving too.

"What, what is happening?" Bu Ah was terrified as he held onto his rifle.

A lone figure approached him slowly, a smile on his face as he looked at Bu Ah.

"You shall do," said the man with his dark green wings. He looked at Bu Ah, and an invisible force held Bu Ah captive.

Shua!

Around 600 miles away, in the middle of a deserted plain, Bu Ah was released and fell onto the ground. He immediately stood up, while continuing to blabber, "I must have encountered a ghost. Could Uncle Bu Ah have met with the demon ghost? Hmm... where is the fire pterosaur? Where, where is this? Ah..."

The big, burly man looked at the figure standing in front of him with great terror. The figure wore a black robe that looked harmlessly simple. With his dark green wings and skin and his fiery red, cropped hair, his entire being seemed to exude a faint, mysterious aura.

"Sir." Bu Ah bowed immediately.

Luo Feng looked at Bu Ah. "After arriving at your world, I needed to find a life form to ask about certain things. You are the chosen one. I know you are fearful of that Mighty Flame family. Fret not. The troop that was after you will think you have escaped far away. Oh? You are guessing who I am? A Holy One? A legendary being? A demigod?"

Bu Ah's fear intensified. This being before him knew all the thoughts that were going through his mind.

Luo Feng laughed. Being at universe level, he could easily conduct a soul-search on another being at a star traveler level, given his current power... There was no way the thoughts of such a weak little fellow could escape investigation. Luo Feng teased this fellow for fun, but at the same time, he was speedily scanning through his memories to conduct a meticulous search.

"Interesting world. Interesting young fellow." Luo Feng looked at Bu Ah. At the same time, he turned to look far away into the mountains. "Whatever caused the eyes of the golden toad to turn red is in that direction, and what lives there is actually what the locals call a legendary being. I admire your character, but I am curious to know what you will become if you own great power."

Luo Feng studied Bu Ah, who was in a mixed state of fear and uneasiness. Suddenly, a kiwi fruit seed—something ordinary that came from the universe—appeared on Luo Feng's palm. It was one of the countless materials hidden within Luo Feng's world ring. The next moment, it transformed into a stream of green light and enshrouded Bu Ah.

"Ah!" Bu Ah was in great shock. Within an instant, he was entirely enveloped in that green light.

Under the subtle control of Luo Feng's godly power, Bu Ah's body continuously absorbed the essence of energy and achieved breakthroughs repeatedly. His life gene level was soaring at a frightening speed, almost instantaneously... Within a short moment, a ninth-grade universe level being was born.

Luo Feng smiled as he watched everything happened. Since he had already obtained the information he needed, then what he had done to Bu Ah was merely out of randomness to appease his earlier curiosity. To a great universe master... the value of a small seed taken from the universe could most probably be neglected.

Turning around, Luo Feng stepped forward and left.
