

Chapter 1331: The Five Pairs of Wings

“There is no escape for you!” said Pei Xing Master as he looked at the white jade boat in the distance away. He was filled with fighting spirit, and the four black wings on his back were shooting out five streams of light rays, representing the five laws of gold, wood, water, fire, and earth. The might of these five light rays soared up high in the sky—high like a rainbow—and immediately moved over to enshroud the white jade boat in the distance.

From Pei Xing Master’s point of view, even if the other party stayed hidden within the palace true treasure, he would still be able to trap him by using a restraining technique. Then he could direct the other party to some extremely dangerous environment within the internal domain of Tilted Peak Sector, where he could make use of it to kill the other party. Then the treasure would be without a master. Just the beckoning of mutual attraction between the treasure and him would bring it flying over to him.

“My precious.” Pei Xing Master was looking forward to laying his hands on the treasure.

“Pei Xing Master!” shouted a voice.

“Huh?” Pei Xing Master was shocked. Suddenly, something felt wrong. He could see the white jade boat stopping too, and walking out of it was a man with six silver wings.

Pei Xing Master momentarily rejoiced at the sight of the six silver wings; his wings were originally silver, too. But when he saw the man... his expression changed instantly.

Human. Black hair. Silver wings. It only took a fleeting moment for a name to surface in his mind—Luo Feng!

The one person he was most jealous of! How could he not recognize him?

Without a palace type supreme true treasure in hand, any universe master who crossed paths with Luo Feng had no chance of survival.

“No!” Pei Xing Master turned around and flew straight into the three-story minaret behind him.

He knew there was no escape. But he was reluctant to admit it! He had been in the holy land universe for as long as 18 reincarnation eras—a very long time. And finally, he had made it here to the Universe Ocean. He felt that his name had just started to make an impact within Universe Ocean, so he couldn’t bear the thought of dying now. Although he knew he could not escape, he still longed to run away. He would try his very best to hang on to even the slightest hope of survival.

“Why are you trying to escape?” Luo Feng shook his head. “How nice if we could have a conversation.”

Luo Feng stretched out his left hand, and in the middle of his palm was a miniature Star Tower.

Hua!

Star Tower flew out and expanded rapidly. A deep abyss black hole appeared at the base level and took aim at the faraway Pei Xing Master. An incomparably strong suction power was directly exerted over Pei

Xing Master, causing Pei Xing Master—who had previously been flying toward the three-story minaret right next to him—to instantly let out an anguished howl.

Pei Xing Master, void of any strength for resistance, was pulled toward Star Tower.

“Why—why can’t you give me a chance? Give me a chance for survival!” Pei Xing Master did not even have the motivation to put up a struggle anymore. Previously, he was still hopeful that Luo Feng would not execute any of his killer moves. Then with that little amount of time, he could perhaps try to make a hasty escape.

From a universe master’s point of view, being sucked into Star Tower was an absolute nightmare! He had not expected Luo Feng to execute such a killer move the moment he arrived.

“You are so cooperative,” said Luo Feng. “If only you weren’t from Purple Moon Holy Land, I might still spare your life. What a pity that you are from Purple Moon Holy Land. Your only option is annihilation.”

Luo Feng shook his head. Star Tower, originally exerting a suction force, was instantly driven to the fourth layer of secret engravings by Luo Feng and started executing the technique of “Smashing.”

To make things efficient, Luo Feng also executed Extermination!

Hong!

With extreme might, Star Tower bombarded Pei Xing Master’s four-faced head at lightning speed. Pei Xing Master had 16 arms, and all 16 tried to stop Star Tower at the same time. Unfortunately, they were instantly smashed to ashes, and Star Tower continued smashing all the way to the head of Pei Xing Master. Shortly after...

Peng!

Complete annihilation.

Using power that was at the eighth tier as the top level against Pei Xing Master was immensely effective. He had just come out of his holy land universe without any pinnacle true treasure armor, and his defense level of godly power was barely comparable to a power that was at fourth-tier as the top level. He was simply too weak. Pei Xing Master’s only merit was his ability to restrain. His combat power, defense ability, and other forms of abilities were only at the fourth-tier standard; he was only good at restraining and escaping. These two skills were considered to be at the fifth-tier standard but were not enough to be considered as the fifth-tier as the top standard yet. So by using an eighth-tier as the top level power to kill a universe master who only wielded a fourth-tier as the top level power, the difference was four levels apart.

It was akin to a fifth-stage top-tier existence (like Primal Chaos City Leader) killing a first-stage top-tier existence (like someone who had just become a universe master, whose life gene was merely at 100 times, and who owned true treasures of inferior quality—theoretically speaking, the weakest kind of universe master). Of course, with one swift move, it was an instant kill! After all, it was an attack with a strength that was similar to that used to attack Great Thunder Star Master. Using power at this level to attack a universe master whose defense standard was only at the level of the fourth tier as the top level... Naturally, the task was a piece of cake.

One smash from Star Tower, and instant annihilation was achieved.

Various kinds of true treasures—like a suit of armor, wings, and a three-story minaret—were left floating about the surroundings.

Sou!

Two pairs of wings that had turned back to silver wings instantly transformed into silver light and flew to Luo Feng without further ado.

“Keep.”

With a wave of his hand, Luo Feng claimed the two pair of wings and all other true treasures that had once belonged to Pei Xing Master. For the time being, he was not keen to look into what kind of treasures Pei Xing Master had. After all, how many precious treasures could someone who had just come out of a holy land universe possibly have? To be able to own two pairs of wings was already quite impressive.

“Wings.”

Luo Feng caught hold of the two pairs of wings that were flying toward him. With a grin, he flew back into his little, white jade boat. Shi Wu Wings were a super strong treasure. The combination of the wings exuded an aura with an oppressive force that was extremely strong. It would be better for him to experiment within the Boat of Mausoleum.

Purple Moon Holy Land universe.

“No! Luo Feng!” A bitter and shrill roar was heard, then Pei Xing Master’s avatar, sustained by his godly power, instantly disappeared.

The guards that were standing outside the palace were shocked. Their noble universe master—what had happened? His avatar, sustained by his godly power, had disappeared?

Annihilated?

“Huh?”

In the core region of Purple Moon Holy Land universe—where the universe origin was—a purple figure turned around to look into the distance. His gaze bore through the obstructions in time and space to look at the palace. After all, this was his miniature universe. Everything that happened in this miniature universe, so long as he had the intention of looking into them, could bring about the reversal of time and space to investigate anything that happened.

He held Luo Feng in high regard. Besides, a universe master under his command had been annihilated, and before he was annihilated, he had shouted Luo Feng’s name. Of course, this would raise concern.

“Pei Xing? Annihilated? By Luo Feng?” Purple Moon Ancestor immediately sent his command via voice transmission. “Jue Hua!”

“Ancestor.”

Within his own godly palace, Jue Hua True God suddenly heard a voice ringing in his mind, without further ado, he responded with deference.

Purple Moon Ancestor continued to give his command. "Pei Xing Master has been annihilated, most likely when attacked by Luo Feng. Send my orders... All of my universe masters who are within the surroundings of Pei Xing Master's residence must exercise extreme vigilance."

Jue Hua True God was shocked beyond words. Pei Xing Master was supposed to be in Tilted Sector Region, was he not? And Luo Feng should have been in the Universe Boat, right? Yes, Luo Feng had been missing, without a trace, for a long time. When considering the fastest speed a universe master could travel at, he would most likely make it to the region where Pei Xing Master's place of residence was. Without further ado, he replied, "Yes, Ancestor. I will transmit your orders right away."

The black, little boat was advancing through space at high speed. Obviously, that was Luo Feng, who had once again changed the color of his Boat of Mausoleum.

The reaction that Purple Moon Holy Land would give in response to Pei Xing's annihilation was not Luo Feng's concern. Right now, his focus was entirely on his Shi Wu Wings.

Hong! Long! Long!

Amidst the space of inheritance and within the Boat of Mausoleum, Luo Feng looked up into the sky and saw five huge, outspread wings having a whale of a time. The five pairs of wings were crazily connecting and corresponding with one another, exuding bouts of oppressive force. The oppressive force was getting stronger with the passage of time—even stronger than any other supreme true treasures like Black Prison Tower, Yan Jun Rod, or Great Thunder's battle armor. It was stronger than everything else Luo Feng had encountered so far.

"Only five pairs of wings, yet the oppressive force was so ridiculously strong. How precious indeed."

Luo Feng was in awe.

Everything was within his expectations. After all, the two pairs of wings were only inferior to a supreme true treasure, so what if there were three pairs? Or four pairs? Or even five or six pairs? According to Luo Feng's speculations, it should have been higher than an ordinary supreme true treasure by several levels. After all, these two pairs alone were only second to a supreme true treasure. So, theoretically speaking, three pairs of wings that corresponded to one another should already possess the power of a supreme true treasure.

In midair, the evolution was still in progress. Internally, the five pairs of wings were continuously evolving and combining, which might bring about the integration of various secret engravings to form a more extensive and complex diagram of secret engravings. Then, finally, everything came to a rest.

"Shi Wu Wings." Luo Feng pointed afar, and his godly power was immediately infused into the wings. "Huh?" he whispered. "Indeed, there are injuries."

He would not have known if he had not made the comparison. Compared to the previous two pairs of wings, which had been restored after absorbing the internal blade energy of the 'origin,' these two new

pairs of wings were obviously one notch lower. Especially when godly power was circulating within the two pairs of wings... their powers were obviously greatly reduced.

“The last time, a large amount of internal blade energy of the ‘origin’ was consumed, I was hoping this time would be more energy-saving. And also, the sixth pair of wings is yet to be found.” Luo Feng sighed.

Hong!

Luo Feng had placed the origin within the first pair of wings of Shi Wu Wings. At that moment, as he manipulated the two new pairs of wings into absorbing energy, a tremendous amount of blade energy with extremely terrifying power suddenly came gushing out from the inside the origin.

Streams of blade rays visible to the naked eye came surging out from within. These blade rays were circulating in continuous motion about the surface of Shi Wu Wings—especially before the third and fourth pairs of wings—like water flowing through a dry riverbed. The moment these circulating blade rays touched the two pairs of wings, they would be swallowed.

“I will need to wait slowly.” Luo Feng sat down right away, cross-legged, and waited quietly.

He was experienced. The previous time, to restore the two pairs of wings, swallowing energy from the origin had taken around half a day.

Time passed. After around 35 hours, the frightening ripples within the upper space started to disperse and finally, everything stopped. It was essential to know that every blade ray wielded an attack that was more terrifying than an attack by any universe supreme master. Even a pinnacle palace true treasure, upon being attacked by a blade ray, would be shattered and reduced to ashes. How strong such a ripple was!

“Shi Wu, how much energy from the origin have you consumed?” Luo Feng asked right away.

“Previously, I consumed about two-tenths,” Shi Wu replied. “This time around, the amount should also be around two-tenths.”

Luo Feng heaved a sigh of relief. Still acceptable.

Internally, the amount of blade storm energy of the origin left was still around six-tenths! With only the last pair of wings left, even if it required restoration, there should have been enough energy.

The energy within the origin was infused by an existence that far exceeded a universe supreme master. Whether it exceeded it by one level or even more than one level, one thing was for sure: It was definitely above that of a universe supreme master! Such an existence facilitated the conversion of conserved energy within the origin. It was absolutely the greatest trump card anyone could own. It might have been the most terrifying trump card possible.

Unconsciously, the energy that dispersed in all directions would sweep up everything in its path. It would destroy pinnacle palace true treasures, and if all of this energy were gathered at one point, any supreme true treasure in its way was destined for destruction. Especially when it was executed through blades. Then it would be even more terrifying.

All this while, Luo Feng still had not used it. While he was in the primal universe, he could not bear to use it; yet, when he was in Universe Ocean, there was no need for him to use it.

The primal universe had an ironclad law: Any attack executed by an individual great being, regardless of how powerful it was, would be suppressed to the level of sixth-tier as the top. And once there was an outburst of energy from the origin that originated from any great being, it would be suppressed by the law of the primal universe to the level of sixth-tier as the top. If that happened, Luo Feng would greatly regret this opportunity—would he not?

He might have suspected that the origin of the primal universe could be suppressed, but he was unwilling to take that gamble. After all, this origin within Universe Ocean was certainly powerful enough to sweep up everything.

However, in Universe Ocean, the appropriate opportunity was essential. After all, given Luo Feng's current ability, he was capable of dealing with most of the dangers in his way.

"Come here!"

With a move of intention, the five pairs of wings rapidly descended from the sky above and integrated themselves onto Luo Feng's back. With ten widespread wings on his back, Luo Feng activated his godly power.

Hua! Hua! Hua!

Silver armor extended out of Shi Wu Wings and very quickly moved to entirely envelop Luo Feng.

"Battle armor? At the level of a supreme true treasure?"

Luo Feng was dumbfounded.

Chapter 1332: Luo Feng's Godly Armor

Luo Feng hadn't expected to get his godly armor in this way, even though Peng Gong Master's Yan Jun Rod and Huge Axe Creator's godly axe could both extend and form armor! Luo Feng had owned three pairs of wings before, yet they didn't extend to form armor, so he hadn't expected this. Even though Pei Xing Master had black armor and black wings, Luo Feng hadn't anticipated that the black armor was an extension of the wings.

The five pairs of wings merged with Luo Feng's body. Under Luo Feng's godly power, his wings extended, covered his body, and formed a suit of godly armor.

The spirit of Shi Wu transmitted a message in his mind. "Master, this is the subsidiary armor of Shi Wu Wings. It's a supreme true treasure armor."

The message amazed Luo Feng. "Supreme true treasure?"

"Shi Wu Wings were a machine type valuable used by a being much stronger than universe supreme masters," said the spirit of Shi Wu, sounding upset. "Two pairs of wings are only inferior to supreme true treasures, and three pairs can already rival supreme true treasures. As for four pairs, they are already more powerful. The wings you have now are from the first, second, third, fourth, and sixth pair."

Luo Feng nodded.

He had acquired the first, the second, and the sixth pair before. And he had seized the third and the fourth pair from Pei Xing Master.

“Only adjacent wings can perfectly integrate with each other,” said the spirit of Shi Wu. “There are still some inconsistencies between the sixth pair and the first four pairs... The power can’t multiply well. However, the first four wings are already perfect. They definitely surpass ordinary supreme true treasures, and even the subsidiary armor can rival a supreme true treasure armor.”

Luo Feng rejoiced. He had seen the endless power in the wing space before, and he knew that Shi Wu Wing was extraordinary. With more and more wings being integrated, it was indeed getting stronger.

“Why couldn’t the first two wings form a suit of armor?” asked Luo Feng.

“Master, the wings of Shi Wu Wing have different functions,” replied the spirit of Shi Wu, continuing to send messages. “The first and the second pairs of wings are like the foundation—like the roots of a tree. They are the base. With other wings being integrated, other powers will come. I presume that the third to the fifth pair of wings have subsidiary powers, and the sixth pair is for attack!”

Luo Feng nodded. It made sense. The first and second pairs of wings were like the foundation of a skyscraper—the keel of a ship!

“I see. Attack type supreme true treasures can all extend to form armors!” Luo Feng exclaimed.

“Machine type valuables are quite variable and have all sorts of uses! They’re also good at fighting those above their level! How can they not extend to form armor? I only have the armor now because this machine type valuable isn’t complete yet. Shi Wu, what’s the power of this godly armor? Be more specific.”

“Firstly, attacks under level eight can be completely neutralized by godly armors,” said the spirit of Shi Wu. “Attacks over level eight can be weakened to 1/1,000,000th. Besides, the godly armor has a high limit. At least no universe supreme masters can reach the limit.”

Luo Feng was amazed. Attacks under level eight can be completely neutralized? And attacks over level eight could be weakened to 1/1,000,000th? That wasn’t too amazing. After all, even Crazy Demon Extermination Godly Armor could weaken the power to 1/100,000th.

However, the limit couldn’t even be reached by universe supreme masters. What did it stand for? It meant the weakening power of 1/1,000,000th could be completely utilized! The more powerful an attack was, the less efficient the weakening power of an armor would be. If the enemy was too strong, it might only be able to weaken it to 1/1,000th, 1/100th, or lower, which made him more dangerous.

Crazy Demon Extermination Godly Armor was impressive at the universe master level. However, when fighting universe supreme masters, its limit would often be exceeded.

“1/1,000,000th? Perfectly utilized?” Luo Feng was shocked. “That means universe supreme masters who have supreme true treasure armors can never be killed by material attacks from other universe supreme masters! Right.”

Luo Feng nodded. It seemed to be true. Those with supreme true treasure armor couldn’t be killed by material attacks. Only some dangerous places in the Lands of Extremis could kill them. Teacher Origin was great at soul attacks at top-tier level ten!

“With that subsidiary armor, I won’t need to fear any material attacks anymore.” Luo Feng was the essence of confidence. “However, I can’t get trapped in a fight for too long.”

Attacks were different from defense. Attacks were aided by techniques and true treasures, and they had no upper limit! As for defense, it depended on the armor! Weapons could help sometimes, but the armor was the most vital part. If someone was too weak to defend himself, he had to resort to armor, as only armor could resist material attacks.

Even if the armor can weaken the power to 1/1,000,000th, my godly body will still be consumed, Luo Feng thought. Universe supreme masters have enormous godly bodies and high-level godly power... I have a small godly body and low-level godly power, and I need to maintain Duan Mie. If I get trapped in a long fight, I’ll be doomed.

Luo Feng understood that he needed to finish a fight quickly.

Compared to real universe supreme masters, one of his weaknesses was that he couldn’t get trapped in a long fight. Also, he couldn’t exceed the speed limit. Of course, he had Star Tower, Blood Shadow Blade, the subsidiary armor of Shi Wu Wings, and Boat of Mausoleum to make up for this.

The five wings were open and floating in front of Luo Feng.

He infused his godly power into the wings and studied Shi Wu Wings. He had found that his Shi Wu Wings were very special. Valuables like Star Tower or Black Prison Tower had many different levels of engravings, but his Shi Wu Wings were exceptional and only had four levels of engravings.

The first pair of wings contained the first level of engravings. The second pair contained the second level of engravings. And the fourth pair contained the fourth level of engravings.

There were only four levels. The first level was called space and time in chaos, and the second level was called Golden Country. The third level...

“The third level is beyond complicated.” Luo Feng frowned. He had already spent more than an era studying the engravings in the space of training. “It’s more complicated than the fifth level of engravings of Star Tower.”

That was how it was. As a machine type valuable, there were few levels of engravings, yet the quality was outstanding. Undying-level Luo Feng could have fully comprehended the first level easily.

As for the second level, he had practiced in Beast God Sector for more than 100,000 years and had reached universe master level on the engraving picture path before he had fully comprehended the second level and practiced Golden Country.

As for the third level, it was too complicated even for him. The gap between each level was exceedingly large.

But Luo Feng wouldn’t give up easily. He could sense that the subsidiary armor was only a side power. The engravings contained on the third wing were truly amazing, which was why he devoted lots of his energy to studying them.

Time passed.

Boat of Mausoleum started to leave Tilted Peak Sector. It spent around 300 years to do so, and 300 years was equivalent to 300 eras in the space of training!

Over the course of 300 eras, Luo Feng spent most of his energy studying the godly power path. As for the rest of his energy, he spent it on the third level of engravings of Shi Wu Wings...

“Too difficult... I can’t understand them. I can’t!”

Boat of Mausoleum flew out of Tilted Peak Sector. Luo Feng shook his head. “I think it’s as complicated as the sixth level of engravings of Star Tower.”

The sixth level of Star Tower was at top-tier level eight! Universe supreme masters like Great Thunder Star Master and Father God of the automaton race could understand the engravings at that level. As for those more powerful, like Huge Axe and First True Master, they could comprehend the engravings at top-tier level nine. Teacher Origin was able to comprehend those at top-tier level ten.

“I’m only a universe master. After I created a blade technique at top-tier level seven, I can comprehend engravings at top-tier level seven or level eight.”

Luo Feng understood that he needed to create superior blade techniques to fully comprehend the engravings at top-tier level eight. He needed a fundamental improvement. Could universe masters create blade techniques at level seven?

None of the great beings in Universe Ocean thought it was possible. However, those great beings also thought that universe masters couldn’t even create blade techniques at top-tier level six, yet the selection criterion for Duan Dong River inheritor was to create a blade technique at top-tier level six as a universe master.

“Based on the records, many talents from the ancient civilization created techniques at top-tier level six as universe masters. All the inheritors of Duan Dong River did that. Creating techniques at top-tier level seven as a universe master was rare in the ancient civilization, yet half the inheritors of Duan Dong River did that. Only two inheritors from Duan Dong River created techniques at level eight as universe masters, including the ancestral teachers.”

Luo Feng had made a decision. After creating Nirvana Incarnation, Luo Feng hadn’t created a better technique. He had much better training conditions after getting the inheritance, and it was likely that he could create a technique at top-tier level seven. He had to train himself as a potential talent like those from the ancient civilization.

“It might take me a long time to become a universe supreme master. I’ll try to improve my power as much as possible. I’ll let them know that after getting the inheritance from Duan Dong River, I can be their better even as a universe master.”

He then decided to temporarily give up comprehending the third level of engravings of Shi Wu Wings and to turn to the godly power path and blade technique creation.

“I can now...” In the chaos air, Luo Feng was driving Boat of Mausoleum and going to Universe Boat to get the valuables left by Jie Fan Zi. “I can totally go look for the last pair of wings. One pair has a very

short detection distance. Two pairs of wings can detect through dozens of light years. Three pairs of wings... When I first detected Pei Xing Master, we flew toward each other for around 20 years. The distance must have been thousands of light years, and the summoning was very strong, which means three pairs of wings can detect 10,000 light years.

“That means... For each additional pair of wings, the detection distance must be 1,000 times farther. Four pairs of wings can probably detect tens of millions of light years, and five pairs of wings can probably detect billions of light years.”

Luo Feng was thrilled, as a miniature universe only had a diameter of 100 million light years. The three Lands of Extremis were only 100 million light years. The holy lands were larger but were still only at billions of light years.

“If the last pair of wings is hidden in one of the miniature universes, I’ll be able to sense it if I fly closer to those miniature universes.”

Luo Feng grew even more excited. He only had the last pair of wings left for Shi Wu Wings.

“I’ll go find where the last pair is.”

Luo Feng couldn’t resist the temptation anymore. He immediately drove Boat of Mausoleum and flew toward the nearest miniature universe.

As for valuables left by Jie Fanzi, he would deal with those after getting the sixth pair of wings.

Chapter 1333: The Location of the Last Pair of Wings

The younger a miniature universe was, the closer it was to the original universe, like Primal Chaos City Leader’s, Teacher Origin’s, and Bug Empress’s. They were all very close to the original universe. The miniature universes from the second universe era were farther from the original universe; those from the first universe era were even farther, and the two holy lands were quite distant from the original universe!

“This is the 18th miniature universe I have inspected.” Luo Feng looked at the towering small universe in front of him. The ten silver wings were all wide open, yet he couldn’t sense the calling. “There aren’t any here.”

He shook his head. Fortunately, he had separated a pair of wings and disowned them. After all, the golden horned beast carrying that pair of wings with no master entered the original universe. Luo Feng was staying outside the original universe. He could clearly sense it, even with the entire original universe in the way.

Apparently, the universe couldn’t block the sensing.

“The universe can’t even block the sensing from a communications token, not to mention that of Shi Wu Wings, and it turns out to be true.” Luo Feng looked to the other side. In the distance was the original universe. It seemed to cover half the Universe Ocean. “I’m closer to other small universes. I might just go there.”

Shua!

Luo Feng teleported and disappeared.

In the primal secret region in the human territory, the Remote Ocean seemed tranquil. The waves were almost invisible. However, Remote Ocean was so enormous that those negligible waves were tens of kilometers tall. A silver-armored man walked on the waves, smiling at the space and shouting, "Teacher!"

Primal Chaos City Leader showed up. "You have come back so soon."

"Teacher," said Luo Feng. "Teacher rejected my gift because I didn't have a supreme true treasure armor. Now, I'm handing you the gift again."

Star Tower showed up beside him, and Great Thunder Godly Armor flew out of the side gate.

"You mean..." Primal Chaos City Leader was shocked. He knew what Luo Feng meant.

"I got a supreme true treasure armor." Luo Feng smiled. He infused his godly power into the silver armor on his back, and an ancient yet powerful force permeated. It was even stronger than Yan Jun Rod and Black Prison Tower, as the silver armor was part of his Shi Wu Wings.

That power came from the newly integrated Shi Wu Wing. He only triggered a portion of its power, and it was already this powerful. If he actually triggered all of it, it would be beyond imagination. This was within Remote Ocean, so the force was suppressed so that the great beings outside the ocean wouldn't know about it.

"This armor?" Primal Chaos City Leader felt the force, and he stopped the hesitation. He just got more shocked. "Where, where did you get it?"

There were only a certain number of supreme true treasures in Universe Ocean. A new supreme true treasure from the three Lands of Extremis? Even if there was one newly born, it must have been born in the core area—yet Luo Feng didn't go to the core area at all.

"There's no need for further questions." Luo Feng smirked. "I have armor now. There should be no excuse for saying no to my gift."

Primal Chaos City Leader looked at Luo Feng and could feel his passion. "Okay, I'll take it. However, the human race is in a much better situation now. Even if the situation gets worse, it's just going to be some conflicts between the two teams. From now on, don't give the valuables you obtain after hard work.

Luo Feng nodded. That sounded right. Even those who were powerful found it difficult to attain supreme true treasure. For universe supreme masters, it might be possible for them to defeat other supreme masters, yet it was difficult for them to kill other supreme masters. He only got the subsidiary armor from the extension of Shi Wu Wing.

"Teacher, I still have something to deal with. I should go now," said Luo Feng.

"Go ahead." Primal Chaos City Leader nodded and watched Luo Feng leave.

Primal Chaos City Leader saw the floating Great Thunder Godly armor emanating ancient power, and he couldn't help thinking in amazement that this disciple of his had indeed become an incredible talent after entering Universe Ocean, opposite to being merely an ordinary talent within the human race when he was only in the original universe.

Even Primal Chaos City Leader had to admit that, after getting the Duan Dong River inheritance, Luo Feng—instead of him—held the most important role in the human race.

“He's like Teacher Origin who led the race to its rise,” Primal Chaos City Leader whispered. “He's even more glorious than Teacher Origin. There will be an actual peerless being that was born in the human race...”

Hong!

Luo Feng flew out of the membrane of the original universe.

“I'll go to the 21st miniature universe!”

Luo Feng had just traveled across the entire original universe. It would take too long a time to go around the original universe, yet he could use god country transportation within the original universe.

“Where are the last pair of wings?” he whispered. “Are they in one of the other two Lands of Extremis?”

Each Land of Extremis was around 100 million square light years. If the last pair was in any of the Lands of Extremis, Luo Feng should have been able to sense them if he was in it. He could now confirm that they weren't in Tilted Peak Sector. Instead of rushing to the other two Lands of Extremis, he went to check all the miniature universes.

Time passed. It took Luo Feng two years to travel from one miniature universe to another.

Hong!

A silver-armored being appeared in the chaos air and clenched his teeth. “I've searched all the miniature universes from the three universe eras, and none of them have the wings! They're either in the other two Lands of Extremis or the holy lands... I won't let you go.”

Luo Feng was indeed upset that he had searched for so long but couldn't find anything.

“Purple Moon Holy Land is the closest one.” Luo Feng immediately flew toward Purple Moon Holy Land.

It took him nine days in Universe Ocean.

“Purple Moon Holy Land.”

Luo Feng stood in space, surrounded by chaos air. The giant celestial body in front of him was Purple Moon Holy Land. It was much larger than the miniature universes he had checked before. All the miniature universes from the three universe eras had a diameter of 100 million light years, yet Purple Moon Holy Land had a diameter of 2.1 billion light years.

“I’ll search it first.” Luo Feng teleported and got closer.

Shua! Shua! Shua!

He teleported several times outside Purple Moon Holy Land. He wasn’t sure what the limit of the sensing distance of the five pairs of wings would be when facing such an enormous miniature universe, which was why he had selected several spots for sensing. As he approached the miniature universe—100 million light years away—Luo Feng turned around and looked at his back.

The ten silver wings were open and quivering.

It seemed that a summoning was coming from Purple Moon Holy Land.

“Summoning!” Luo Feng’s eyes gleamed and gazed at the gigantic Purple Moon Holy Land in front of him. “The sixth pair is in Purple Moon Holy Land!”

He had been craving for them for a long time. He wanted to dash in, but he wasn’t stupid enough to do so.

“Motherf*cker!” Luo Feng clenched his teeth. He hadn’t sworn for eras, yet he couldn’t help doing it now. “Why is it in Purple Moon Holy Land? How come? No matter which miniature universe the wings are in, I might be able to get them. Even if it were in Eastern Emperor Holy Land, there would still be hope, but Purple Moon Holy Land...!”

Luo Feng was furious. Purple Moon Holy Land was his mortal enemy now. They had even tried to help other powers in the original universe to suppress the humans, and they had never even attempted to negotiate with him. Besides, he had just killed Pei Xing Master and seized two pairs of wings from him!

“Weird. Pei Xing Master had two pairs. Why didn’t he find the last pair?”

Luo Feng frowned. The sensation power of two pairs was nothing compared to five pairs—only tens of light years. Purple Moon Holy Land had a diameter of 2.1 billion light years, and it had many independent space dimensions. It seemed that the last pair must be in a space where Pei Xing Master had never visited.

No matter what, I can confirm that the last pair of wings is in Purple Moon Holy Land, thought Luo Feng. Besides, that pair of wings has always been in this holy land. There are two possibilities. One, it’s owned by a weak being like an undying fighter or universe knight who isn’t qualified to leave the holy land. Two, some great being put it in its storage.

Nobody had ever seen that wing true treasure in Universe Ocean. After all, one pair was only an ordinary true treasure. Universe masters looked down on true treasures at that level.

“I’m in trouble now.”

Luo Feng started to head to Universe Boat. It was time for him to get valuables of Jie Fan Zi. At the same time, he contacted Primal Chaos City Leader through the virtual universe.

“Teacher, I still have one component for my wing valuable—as in, the last pair of wings! Besides, I know that the last pair is in Purple Moon Holy Land! I can’t do anything about it. Can someone from Hong Alliance help me get it? After all, it’s only a pair of wings, which is at the ordinary true treasure level. Chances are, Purple Moon Holy Land has no idea how precious they are.”

“The last pair of wings?” Primal Chaos City Leader was anxious, too. “Purple Moon Holy Land... That’s indeed a handful. Leave it to me. There are many great beings in the Hong Alliance, so they might succeed. However, those wings have never been out of Purple Moon Holy Land, so I can’t say for sure.”

“It’s better than nothing,” said Luo Feng. “I can’t do anything about it. Teacher, I’ll go to Universe Boat now.”

“Just go and get the valuables of Jie Fanzi. You’ve tried multiple times already,” said Primal Chaos City Leader.

He would leave this issue to the Hong Alliance.

Luo Feng stopped thinking about it and headed off to Universe Boat for the valuables of Jie Fanzi.

Chapter 1334: Jie Fanzi’s Treasure

On board his Boat of Mausoleum, Luo Feng entered the internal region of Universe Boat, persevering through numerous terrifying, dangerous domains. Although he was not afraid, he exercised vigilance and kept himself obscured so that he could grab hold of the opportunity when the great beings from Purple Moon Holy Land unintentionally made a careless move. The moment he discovered one, he would make use of Star Tower to capture that great being right away—mercilessly! This way, not only could he teach those from Purple Moon Holy Land a good lesson, but he could also seize their true treasures.

It was a good idea. The only problem was, even after he had spent close to 900 years traveling to finally reach the domain where the space of the cyan secret chamber was, there was not a single time along the way when he discovered any great being from Purple Moon Holy Land.

“Purple Moon Holy Land is very careful and vigilant. It has been such a long journey, yet not once have I encountered anyone. Seems like the universe masters inside the Universe Boat have all hidden themselves with care.”

Luo Feng could not help lamenting as he shook his head. After all, the Universe Boat was extremely broad, and he had been advancing at a high rate of speed to look around. If his opponent was moving about ostentatiously, he might have discovered them somehow. But if his opponent was cautiously hiding from him, there was no way he could find them anywhere.

Looking ahead into the vast space, he had already arrived at the domain where the space of the cyan token secret chamber was.

Hong!

The small, greenish-black ship shot ahead very quickly. For being able to arrive within a time of close to 900 years, much credit was due to the Boat of Mausoleum. With it, Luo Feng traversed many dangerous

lands by charging his way through with brute force. Even supreme true treasures that could resist a certain amount of danger would be burdened by terrifying environments. Yet the Boat of Mausoleum was very stable, which was why Luo Feng could solely depend on it. Along the way, Luo Feng had specially sought lands that were birthplaces of treasures and was lucky enough to obtain some ordinary pinnacle true treasures, two top-tier true treasures, and a senior true treasure.

Once, during a conversation, Primal Chaos City Leader had told Luo Feng, "The Boat of Mausoleum cannot be shaken. Within the three most dangerous lands, 90 percent of the terrifying dangers had no effect on it. Only the core region is likely able to stop it in its path... Solely relying on this Boat of Mausoleum to search for treasures, your efficiency rate will be higher than any other great being."

"Riding Boat of Mausoleum to roam the three most dangerous lands, I will be able to seek out and obtain many true treasures. How wonderful."

Luo Feng was inside his Boat of Mausoleum, looking far into the distance at the numerous buildings suspended on huge leaves. He drew nearer to try to feel the place out.

"After I obtain the treasures from Jie Fanzhi's legacy, I will roam the three most dangerous lands."

Roaming the three most dangerous lands only required a trace of his consciousness. He mainly focused his spiritual energy on cultivation.

After two days, Luo Feng found the secret chamber within the space of the cyan token that belonged to him.

"This is the one."

The little, greenish-black boat reduced speed and slowly descended on a huge leaf. The cabin doors opened. Luo Feng walked out and raised his head to look at the building before him.

"The secret chamber of the black token and the secret chamber of the cyan token are both so lacking in aesthetics."

With a wave, Luo Feng put away the Boat of Mausoleum. Then he slowly walked toward the ancient building. The moment his body touched it, he felt as though he had touched the surface of water; he penetrated right through to enter the internal space of the secret chamber.

Luo Feng appeared in midair and looked ahead. Amidst the void space, there were nine huge, blazing fireballs, each bigger than any ordinary star by 1,000 times. These nine fireballs were suspended high within the void space, and they were moving in a circular motion.

In the middle of the area they encircled was a suspended continent.

"Hmm?" Luo Feng stood within the void space. With a move of his mind, all ten wings on his back spread wide, and a blurry, golden light radiated outward. In an instant, the entire space was enshrouded, and everything within it fell under his control.

Just one look, and Luo Feng's expression revealed his surprise.

With one step forward, he teleported himself over to the continent. The expanse of the landform was vast. He stood on a deserted land of sandstones and looked up toward the sky, where he could see light rays produced by the nine blazing fireballs being projected onto the land. They intertwined to form a picture scroll containing characters that were made up of fire snakes. The scroll was densely covered with a mass of characters that Luo Feng was not familiar with, yet every character contained ripples that transmitted information, so Luo Feng had no trouble understanding the text.

“I, Jie Fanzi, am a special life form, I became an undying cultivating the water law and have been cultivating since I became a universe supreme master. After I became a universe supreme master... one fine day, while I was living a peaceful life on a certain planet, I was struck by a sudden thought. On this life planet, life required water to survive, so water was the origin of life. But the entire planet needed to rely on the heat of the stars to absorb energy for all life forms to grow.

“The water law and fire law. These are not as simple as how we have all used to comprehend. They were not as simple as two individual laws. Water and fire both involve the origin of life—the origin of all forms of life and the origin of reproduction. Therefore, I have created my own studies, a new body of lost knowledge—Water and Fire Origins.

“I have traversed the primal universe, and when the primal universe came to an end, I moved on to observing Universe Ocean and comprehended two reincarnation eras... Water and Fire Origins was getting more complete, and I believe that if I had been given enough time, I would have been able to attain an even higher level in order to transcend reincarnation. But I did not have enough time... I may have achieved a combat power that was at tenth-tier as the top level, but still, I am not confident of achieving a breakthrough to transcend reincarnation. Water and Fire Origins was created with great efforts. After spending a long time—three reincarnation eras—I am most reluctant to see it disappear. My wish is that any later generations will be able to take on what I have comprehended and continue to pass down this legacy of mine.

“The nine fireballs in the surroundings of void space are unique objects from Tilted Peak Sector of the Universe Ocean. They are nine ‘iced crystals’ that have been transformed into nine fireballs by my Water and Fire Origins. They represented the peak of my accomplishment. Now that the nine fireballs have become one, their might should not be spread to the outside world.

“Under this great continent, there is a pinnacle palace true treasure. Inside the palace, you will find all the treasures I have left behind, and you will also find a low-to-high-level inheritance of the lost knowledge I have created. I truly hope that my descendants will not let my life’s work, my legacy, be lost for good.”

On the scroll high up in the sky, upon seeing the information that was transmitted via the characters made out of fire snakes, Luo Feng took in a deep breath. Tenth-tier as the top? Water and Fire Origins?

“Indeed, every generation will give rise to at least one peerless figure who is unparalleled in demeanor and talent,” said Luo Feng, in awe. “This Jie Fanzi actually possessed combat power at the tenth-tier as the top level. This would have been comparable to what Teacher Origin already achieved previously. He must be one of the greatest figures during his era. No wonder... No wonder he was so fixated on his legacy. It seems like his ‘Water and Fire Origins’ was indeed a body of lost knowledge that he had

created and was incomparably proud of. This must be why he was so reluctant to see his efforts go down the drain and his legacy discontinued.”

Of course, in terms of talent, Jie Fanzi was still no match for Teacher Origin. After all, Teacher Origin had already attained the tenth-tier as the top level when he was still within the primal reincarnation era before being eternally suppressed. On the other hand, Jie Fanzi had taken a total of three full reincarnation eras to reach the tenth-tier as the top level.

However... Throughout the Universe Ocean—other than Teacher Origin and the ancestors of the two holy lands—the next-strongest in line today were all great beings at the level of ninth-tier as the top. This showed how talented Jie Fanzi really had been.

“Water and Fire Origins—the origin of life? The origin of all forms of life and of reproduction?” Even Luo Feng was touched when he learned all this.

Previously, the laws that he had cultivated, whether gold, wood, water, fire, or earth, were the most fundamental laws. Furthermore, he had always cultivated them as individual laws. Never had it crossed his mind that something as simple as an individual set of laws could contain the mystery of the origin of life.

If this body of lost knowledge was merely an ordinary kind of creation, then even if it were to be discontinued, there was no loss worth lamenting. But something as unique as Water and Fire Origins, which far surpassed what other supreme masters had created... Such a body of lost knowledge was truly something worth being proud of.

“A peerless figure in demeanor and talent,” Luo Feng lamented. “Yet he was gone, just like that, without even achieving a breakthrough of a reincarnation era. Transcending reincarnation. Oh, transcending reincarnation! How difficult it truly is! Keep!”

With a random flick of his hand, Star Tower flew up right away. Following the guidance of Luo Feng’s godly power, the nine huge fireballs high up in space were quickly sent right into Star Tower.

“Rise!” Luo Feng looked toward the continent at his side.

Hong! Long! Long!

The continent split apart, and a palace emerged from beneath. Sandstones separated into two sides, revealing a palace in its entirety.

Luo Feng sent a trace of his godly power penetrating through this palace, and soon enough, he had made this palace true treasure recognize him as its master.

“The treasures inside...”

After this pinnacle palace true treasure had recognized Luo Feng as its master, Luo Feng could quickly learn how many treasures were inside. After sorting and summing up everything, he had a clearer picture of the treasures Jie Fanzi had left behind. What he had summed up dealt Luo Feng with a good shock.

Although there were no supreme true treasures, this pile was still much more than what he had gained from killing Great Thunder Star Master (adding on the gains from sweeping through the miniature

universe). There was a total of 32 pinnacle palace type and domain type true treasures. And a total of 91 ordinary pinnacle true treasures (top-tier domain type true treasures were considered to be on this level).

Ordinary top-tier true treasures, senior true treasures, and ordinary true treasures were very few. The total might have only added up to slightly more than 100. Perhaps these did not appeal much to Jie Fanzi, who was simply not interested in them.

As for the large amount of various precious treasures, materials for refining true treasures, treasures for restoring godly bodies, and treasures for increasing the amount of life genes... there were many of all these, too.

“Not even counting the supreme true treasures, these are already riches much greater than the entire wealth of my human race.”

Luo Feng was awestruck.

In fact, this was considered normal. The wealth of a race was mainly created by universe supreme masters. Supreme masters who were lone travelers—regardless of whether it was Jie Fanzi from eras ago, Sitting Mountain Guest, Shi Hu Island Leader, or several others of the current era—had no need to worry for any race. The treasures they obtained were theirs to keep, yet the treasures they had were in no way inferior to those owned by an entire race!

Jie Fanzi’s combat power was at the level of tenth-tier as the top. During his era, he had once swept through the entire Universe Ocean with his great might. His only problem was that he was obsessed with the Water and Fire Origins. He was very ambitious by nature. If he had put his heart into plundering, he would have gained even more treasures.

But the amount of treasures he had was considered normal, as he had been collecting for the long period of three reincarnation eras.

“So many treasures. Therefore, I will be able to repair the final injury on the white wings of my Shi Wu Wings.”

Luo Feng was happy when this realization dawned upon him. With a flip of his hand, a fist-sized, spherical crystal stone appeared in the middle of his palm. The spherical crystal stone stored a large amount of information, and all that information was what Jie Fanzi took great pride in—his Water and Fire Origins.

“Let’s take a look at this Water and Fire Origins.”

The moment Luo Feng laid eyes on it, he was immersed. He was pleasantly surprised at what he saw.

The knowledge of Water and Fire Origins was so mysterious and magical that it qualified to be ranked within the core inheritance of the pulse of Duan Dong River. The pity was, Jie Fanzi had only managed to comprehend the fundamentals of the lost knowledge of Water and Fire Origins. Yet even though the fundamentals were just built, the magical side of this lost knowledge could be subtly observed.

“According to what the lost knowledge of Water and Fire Origins describes...” Luo Feng said to himself. “Reaching the peak of this place, with a single move of intention, and taking the two origins, water and

fire, as the core, I can instantly develop a true universe. When there is a war, the surroundings of my body can instantly become a true miniature universe. Forcing the enemies into this miniature universe, there will be no way they can survive, right?”

Chapter 1335: A Long Time

Luo Feng had been reading it for half a month, and he sighed, shaking his head, “What a shame. A peerless great being just died like that. If he’d had more time, he could’ve transcended incarnation and created another holy land. Unfortunately, that last step... He got stuck at the last step.”

It was almost impossible to transcend incarnation. Otherwise, there would have been more holy lands.

“Jie Fanzi only comprehended the most basic material of Water and Fire Origins. He hadn’t even fully comprehended it. If he had, he might have transcended incarnation already. If someone’s able to comprehend further, he’ll be incredible. If someone can fully comprehend the whole thing...!” Luo Feng could help but exclaim. It was a powerful and special technique that pointed to the origin.

Actually, even turning from true gods (universe supreme masters) to high-level beings didn’t involve universe origin mysteries like life reproduction. Jie Fanzi had tried to study techniques that were far beyond his level, so he had failed. He studied it for three universe eras and still failed.

“However... Jie Fanzi’s technique offers a unique path. After I become a true god, this Water and Fire Origins will be helpful to me on fire and water when I try to transcend incarnations.”

Since Luo Feng had obtained the inheritance from Duan Dong River, he knew exactly what he should do. He would become a true god following the godly power path! After becoming a true god, he would use all the ten basic laws—gold, wood, water, fire, mud, light, thunder, wind, time, and space—to condense a void space.

Water and Fire Origin could help a bit as well. Actually, starting from all the ten basic laws was the most efficient way! It was easier to use all ten basic laws. As for Jie Fanzi, he only used fire and water, so he had encountered too many obstacles and had finally died.

Luo Feng had collected many crystal balls and valuables, at the same time, the mind in the virtual universe also told Primal Chaos City Leader that happy surprise.

“Luo Feng, are you saying that Jie Fanzi alone had 32 pinnacle true treasure palaces? And he had 91 ordinary pinnacle true treasures?” Primal Chaos City Leader was astonished. “We didn’t even get that many true treasures from Thunderstorm Star! That’s far too many!”

“Jie Fanzi was at top-tier level ten!” Luo Feng exclaimed. “He left those valuables because he wanted me to spread the inheritance.”

Undying fighters could already practice inheritance. As long as someone fully comprehended the water law and fire law, he could start comprehending Water and Fire Origins. Based on the records, it was possible to reach the level of a limit universe supreme master. As for transcending incarnations? Jie Fanzi hadn’t succeeded, so that task fell on the shoulders of future generations.

“Jie Fanzi left so many true treasures so that future generations could continue his inheritance. We’ll definitely help.”

There were only 20 universe masters in the human race. It was more than enough.

“However, there will be more and more universe masters in the human race,” said Primal Chaos City Leader. “We need to think about the future as well.”

“I’ll leave all that to you, Teacher.” Luo Feng smiled. “I’ll start practicing now and adventuring in the three Lands of Extremis. I’ll send those valuables back to the race shortly.”

A great being could only use a certain number of true treasures. Jie Fanzi had too many true treasures, so he could only leave them in the storage.

Luo Feng had obtained many true treasures this time, so he would leave several for himself, giving all four of his godly bodies better weapons and armors. However, he alone couldn’t use that many true treasures. He would rather leave them to his race, like Teacher Origin and Huge Axe Creator.

“I’ll start practicing now!” Luo Feng took a step forward and walked out of the green keepsake space. Then he started to tour the three Lands of Extremis by Boat of Mausoleum.

Time passed. 1,000 years, 10,000 years, 100,000 years...

Time passed silently, leaving no traces. During practice, a few thousand years was like a blink of an eye.

Boat of Mausoleum became a silver boat. Luo Feng took the silver boat to the Lands of Extremis. He was well aware that he couldn’t go too deep in the Lands of Extremis, so he only ventured into the inner area. Sometimes, he would tour around at the periphery of the core ground, but he wouldn’t go too deep.

Luo Feng’s chief intention was to practice rather than to adventure!

Tilted Peak Sector was mysterious and variable. Universe Boat was a machine type valuable, and there were billions of areas within it. There were still traces of an intact Universe Boat somewhere. But Flowing Level Mountain was like a maze.

Luo Feng went back to the original universe once to distribute the true treasures during his travels.

The 600,000th year after Luo Feng started to tour Universe Ocean, in Flowing Level Mountain.

Hong! Long! Long!

The water stretched through time and space, and on a stone amid the water stood three beings.

“It’s getting more and more dangerous!” a red rock life form roared. “A true treasure is about to be born.”

“We’ll see which one of us is more powerful after the true treasure is born.”

“It also depends on our power.”

All three universe masters were looking forward to it. They were all nervous, and there was dimming light around them. Apparently, there was a domain true treasure covering the entire area. However, the domain could only cover a certain area. It couldn't cover the tumbling water. They couldn't tell in advance when the true treasures would be born.

Hong! Long!

The water, which had been moving recklessly, suddenly started to move normally. The water started to gather and spin. It connected the sky and land, and there was a waterspout!

“It's right there!”

All the universe masters burnt their godly power and put all their efforts.

Hong!

A white boat burst out of the waterspout, which astounded all three universe masters.

“It's Milky Way Horde Leader!” shouted a black creature with many wrinkles on his face.

The rock great being and the double-faced, four-armed great being were both shocked—especially the double-faced, four-armed great being. He retreated into a palace true treasure and tried to run away.

A white boat? Rumor was spread through the three Lands of Extremis that a human universe master who drove a white boat had appeared in some places where true treasures were born and had seized the true treasures! The three Lands of Extremis were enormous, and true treasures could be born anywhere, yet Luo Feng had seized true treasures dozen of times. Luo Feng was as talented at seizing valuables as five universe supreme masters combined!

He was so efficient because of Boat of Mausoleum. He was able to enter some dangerous places and claim the true treasures when the great beings were still waiting outside.

The black creature with wrinkles and the rock life great being stood aside and glanced at the double-faced, four-armed being trying to flee. “Poor Yu Lan.”

Yu Lan Master was a universe master from Purple Moon Holy Land.

For the past 6,000 years, Milky Way Horde Leader had been journeying through the three Lands of Extremis. He sometimes appeared in Flowing Level Mountain, sometimes in Universe Boat, and other times in Tilted Peak Sector. He always showed up with a great shock. If he met a universe master from Purple Moon Holy Land, he would capture them immediately. Nobody knew whether he captured them or killed them.

In the 6,000 years after Luo Feng killed Pei Xing Master, he had captured three more universe masters from Purple Moon Holy Land. Even though most universe masters from Purple Moon Holy Land had returned to the holy land after the news, some universe masters were reluctant to retreat. Instead, they stayed out and simply tried to be careful.

“Yu Lan has being very careful, and he only showed up because a true treasure is about to be born. We didn’t expect that Milky Way Horde Leader would have his eyes on that true treasure as well... Milky Way Horde Leader must have been in the waters, so they couldn’t detect him. Now that he has emerged, it’s too late.”

The black, wrinkled creature and the rock life both sighed. Everyone knew that Milky Way Horde Leader wouldn’t attack universe masters if they didn’t mess with him. Milky Way Horde Leader only targeted those from Purple Moon Holy Land, the fire origin race, and the dragon rock race. Those from the fire origin race and the dragon rock race had already hidden in the miniature universes. Only those from Purple Moon Holy Land still dared to come out.

“Stop fighting, Yu Lan Master.” The white boat flew over, and a nine-story tower showed up and suddenly expanded. Yu Lan Master was trying to fly away from the abyss at the bottom of the tower.

Star Tower started to suck it in!

Yu Lan Master flew out of his true treasure palace and attempted to flee. “Milky Way Horde Leader, Milky Way Horde Leader! Purple Moon Holy Land won’t let you go! They never will!”

Luo Feng drove his Star Tower again and tried to absorb Yu Lan Master, who had previously targeted the true treasure palace.

“No!” Yu Lan Master tried to get out, but he was still being swallowed. He became smaller as he got closer to the bottom of Star Tower and then was completely swallowed.

A voice came from the white boat. “Two... Sorry, I’m passing by, but I’ll take the true treasure.”

The two universe masters standing at the top of the mountain were both humble. The white boat flew away.

The white boat became black once it flew away. Even its shape changed.

In the space of suppression of Star Tower, Yu Lan Master with two faces and four arms saw the three beings in the distance.

The other three universe masters from Purple Moon Holy Land saw Yu Lan and walked forward.

“Yu Lan! Why are you here?”

“Yu Lan! How were you captured?”

A white-caped being appeared in the space of suppression. It was a young man with black hair.

“Milky Way Horde Leader.”

“Luo Feng.”

All four universe masters, including Yu Lan, glared at him.

The white-caped man shook his head and sighed. “Don’t look at me like that. It’s not that I want to kill you. It’s that your ancestor refuses to save you. Don’t blame me.”

Chapter 1336: Eight Million Years Later

Luo Feng didn't kill any of the universe masters captured.

He knew clearly that even if he killed them, there would be universe-masters-to-be who would become universe masters in no time. Purple Moon Holy Land was far younger than Eastern Emperor Holy Land and didn't have that many universe-masters-to-be, but it could definitely have eight to ten more universe masters, so Purple Moon Holy Land wouldn't be affected at all. He figured he might as well just keep them as leverage against Purple Moon Holy Land.

"It's only a pair of wings, so it's only an ordinary true treasure to Purple Moon Holy Land. I can't believe your ancestor isn't even willing to trade it for four universe masters." Luo Feng shook his head and exclaimed. "He's ruthless, too ruthless! He doesn't even care about you."

All four universe masters were enraged.

"Milky Way Horde Leader," said North Qu Master, who was the most powerful out of the four captured. "Don't waste your energy and time. Purple Moon Ancestor is our ancestor, so nobody dares to disobey his orders. He already knows you want that pair of wings, so no matter how many universe masters you capture, you won't be able to trade us for that pair of wings."

"Don't even think about it, Luo Feng!" Yu Lan Master yelled. "Our ancestor has already told us to go back to the holy land if we can't guarantee survival. We didn't do so, which is why he doesn't care about our lives. You want your wings? Impossible!"

Luo Feng shook his head and sighed. "It's not necessary. It's just a pair of wings, and it's not going to help much with my power. Four universe masters aren't enough for one pair of ordinary true treasure wing."

"That's not an ordinary true treasure!" yelled Yu Lan instead. "It's a component of an exceptional true treasure from the ancient civilization."

"Ah..." Luo Feng sighed. "Then you can just wait here."

Luo Feng then disappeared.

The four universe masters from Purple Moon Holy Land exchanged glances. They looked around the desert space, disappointed—angry yet helpless.

Luo Feng kept touring the three Lands of Extremis in Boat of Mausoleum. He had no idea what to do.

"The last pair of Shi Wu Wings...!" Luo Feng exclaimed. "It's almost impossible to get them."

Based on what the captured universe masters had said, when he was sensing the wings outside Purple Moon Holy Land, a universe knight in Purple Moon Holy Land with wings also sensed that his wing was quivering. He was staying in an independent space of the Purple Moon Holy Land. Besides, the sensing distance was very large—possibly 100 million light years.

That universe knight was dazed! If he could sense it from such a distance, it must have been an exceptional true treasure, which he, as a knight, was not qualified to be a part of. He immediately reported it to his teacher, Feng Hao Master.

Feng Hao Master started to raise questions and asked many universe masters about who had felt the sensing lately. After all, they all belonged to the same power, so it was a win-win. However, he didn't find anyone with another component.

Purple Moon Holy land was the master of the holy land, so he knew everything that happened in the holy universe. Naturally, he knew about the wing, as well. He didn't care about it that much, at first. Afterward, some great beings in the holy land traded away some ordinary true treasures using some secret techniques with those in Universe Ocean.

With everything combined, and after Purple Moon Ancestor did some further research, he had a much better grasp of the whole picture.

First off, Pei Xing Master had been killed by Luo Feng. However, Luo Feng had been in Universe Boat before, but Pei Xing Master was in Tilted Peak Sector. They were very far from each other. However, as soon as Luo Feng killed Great Thunder Star Tower, he must have headed to Tilted Peak Sector at the fastest speed possible and killed Pei Xing Master. Strangely, there were quite a few universe masters from Purple Moon Holy Land in both Tilted Peak Sector and Flowing Level Mountain, and many of them had powerful true treasures. Why would Luo Feng go and kill a new universe master, Pei Xing Master? The time and the choice of victim both indicated that Luo Feng had been targeting Pei Xing Master! Pei Xing Master happened to have two pairs of wings!

Second, the sensation had happened several hundred years after Pei Xing Master died, and it was around the time Luo Feng left Tilted Peak Sector.

Third, some great beings from Universe Ocean tried to get some ordinary true treasures out of the holy land, which might be from the Hong Alliance.

Fourth, Luo Feng indeed had true treasure wings. When he had first risen in the original universe, he had only had one pair. He had then obtained another pair. Some great beings had even seen Luo Feng with three pairs of wings, which meant he had acquired at least two pairs.

Purple Moon Ancestor could tell that Luo Feng had his eyes on that pair of wings. And judging by the sensation, Purple Moon Ancestor could also tell how extraordinary that wing true treasure was.

"Tell Luo Feng to stop wasting his time and energies. That pair of wings will stay in Purple Moon Holy Land forever, and he'll never get it!" Purple Moon Holy Land immediately told an avatar of a captured universe master after confirming Luo Feng's intention.

Luo Feng was deeply upset. Incredible! Purple Moon Holy Land had found out about it.

Actually, it was understandable. Luo Feng knew that the Hong Alliance had proceeded discreetly. However, they had still left some traces, and so had he. Purple Moon Ancestor had learned of his intentions.

Luo Feng started to do it in a blatant way! He started to capture universe masters!

“I’ll keep capturing universe masters and threatening you with the lives of your universe masters... Will you be willing to trade them? Even though universe masters don’t dare to resist Purple Moon Ancestor, given his prestige, they’ll be upset. That means the unity within Purple Moon Holy Land won’t be as strong anymore... I’ll keep doing it! Even if I get the last pair of wings, I can’t fully utilize it. After all, I haven’t even fully comprehended the third level of engravings on Shi Wu Wings.”

Luo Feng didn’t need to rush it. It was going to be a long fight between him and Purple Moon Holy Land.

Time passed.

Luo Feng journeyed in the three Lands of Extremis. 90 percent of the universe masters from Purple Moon Holy Land went back to the holy land after learning that six universe masters had been captured. Those who stayed out were very stubborn. They had eternal lives, and they had lived for so long that they weren’t afraid of death. The pressure from Luo Feng only exhilarated them.

In a remote area of Universe Ocean where no great beings had been before...

Hong!

A human shape larger than a miniature universe lay there, traveling millions of times faster than light speed. The chaos air gleamed under the friction coming from the high speed, leaving a long streak of light in the space. It kept marching toward the original universe.

Ten years, 100 years, 1,000 years, 10,000 years...

100,000 years, a million years...

Luo Feng had been traveling in Universe Boat for more than eight million years when the giant object, which had maintained a speed that no universe supreme masters could ever reach, finally entered the area where there were powers from Universe Ocean.

Eight million years was a long time for ordinary life forms. However, for great beings, eight million years was only a blink of an eye. To Luo Feng, who had only lived for less than 200,000 years (not counting time acceleration), the eight million years was a very crucial period for him, and it was the longest period of his life.

He had been practicing in the space of inheritance for the past eight million years, which was actually eight million eras.

Presently, he was still touring in the inner area of Universe Boat. At the same time, in a remote area of Universe Ocean, a being was teleporting itself.

“I haven’t been to Flowing Level Mountain for a long time, so I’ll go there now.” Demon Beast Ancestor was moving forward relaxedly. He was the enemy of both Space Beast Ancestor and the two ancestors

of the demon race. The united forces alliance and the human team were fighting now, and the human team was at a slight advantage, which pleased Demon Beast Ancestor.

Hong!

A terrifying streak of light flashed beside him.

Hong! Long!

Under that horrifying speed, the shock waves stemming from the chaos air spread to Demon Beast Ancestor, who was still in the distance. Demon Beast Ancestor rolled over tens of billions of kilometers away.

Pu!

Demon Beast Ancestor opened his mouth wide with blood coming out. His body was covered with scales, and it was solid. Dark, golden blood flowed on the scales, and it looked at the golden flowing light in shock. "This, this, this..."

He hadn't expected that only that shock wave could injure him, a universe supreme master! If he had been hit directly, he would have died.

"What is that? What kind of terrifying being is that?" Demon Beast Ancestor was bewildered.

He roamed Universe Boat, and although he was at a disadvantage when fighting Dream Demon Ancestor, Shock Demon Ancestor, and Space Beast because he didn't have supreme true treasure, he could still survive the attacks. He could have even put up a fight against Teacher Origin.

However, that gigantic flying object terrified him and made him desperate. They were definitely not at the same level, and if he was hit by that human shape, he would be killed.

"A chance! An opportunity! A huge opportunity!" Demon Beast Ancestor was excited. Any incredible incident might spell a chance, and based on what had happened, that gigantic flying object had an exceptional opportunity, and supreme true treasures were nothing compared to that.

"I need to seize that chance! Inheritance, great beings, or valuables, I need to seize it! Only after seizing that can I suppress the two idiots from the demon race and Old Beast God. I'll then rule the demon race and Space Beast Alliance. I will be the one true ancestor of the demon beasts!"

Demon Beast Ancestor was overjoyed, and he started to teleport.

Shua! Shua! Shua!

He teleported three times and arrived beside the giant flying object. It resisted the shock waves. Compared to that giant object, Demon Beast Ancestor was like an earthworm looking at a star.

Chapter 1337: Unstoppable

Demon Beast Ancestor maintained a distance from that distant, massive object. He was resisting the ripples of impact acting against him while trying his best to see that object ahead of him.

He could only make out—amidst the dazzling light produced by something flying at an exceptionally fast speed—a faint figure of a humanoid life-form. This humanoid life form was so tall that its height exceeded 100 million light years, and there it was, just lying flat on the ground. No matter how powerful Demon Beast Ancestor was, no matter how he racked his brains, he could not come up with any idea of how he could see better. All he could see was an unclear situation before him. Then, shortly after...

Hong!

At a terrifically fast speed, the massive object vanished from the limits of Demon Beast Ancestor's scope of view.

"Human, human, humanoid life-form?" Demon Beast Ancestor stood rooted to his spot for a long time.

God! In terms of size, this massive object was slightly bigger than a miniature universe, or even the Universe Boat. How could it actually be a humanoid life form? Even if a universe supreme master tried his very best to expand his godly body, reaching the size of one light year already proved to be exhausting. The more a godly body expanded, the more their godly power had to be consumed. Besides, none of them had ever reached a size as big as 100 million light years!

Moreover, it maintained a terrifying speed comparable to uninterrupted teleportation. It might be right to say that universe supreme masters were able to overcome the speed limit, but the faster their speed got, the more of their godly power would be consumed. The pressure that their bodies were subjected to would also become stronger. Such factors accounted for why no universe supreme master could achieve such a feat. And for a godly body to expand to such a massive size, its speed was bound to be reduced.

Bigger than a miniature universe! And a speed that was beyond one's wildest imagination!

"No, it can't possibly be a living soul, nor a great being. There can't be a great being that is so formidable."

Demon Beast Ancestor was in denial, unable to bring himself to believe that such a great being truly existed. How much more powerful would this great being be than him? A mere gaze could have seemingly destroyed him.

"It must be a strange object like the Universe Boat. The only difference is that Universe Boat took the form of a boat, and this object takes the form of a human."

Demon Beast Ancestor willed himself to consider the manner and instantly felt much better.

"Another Universe Boat?" The moment Demon Beast Ancestor considered this, he felt the same suffocating breathlessness again.

The three most dangerous lands... A long time ago, Universe Ocean had not been one of the three most dangerous lands, and the Universe Boat had not existed. The Universe Boat had only appeared much later.

"Another being that was at least at the level of Universe Boat?" Demon Beast Ancestor was highly emotional. "And no other great being has encountered it yet. I am the first. So long as I can grab this opportunity... Catch up with it!"

Demon Beast Ancestor was full of fighting spirit and no longer worried about the dangers involved. After all, whether that was a formidable and terrifying life form or a strange object, nothing would be greatly affected. If it were a formidable and terrifying life form... seeing how it lay flat on the ground, it was either deep in slumber or had been annihilated. If it was a strange object, then all the more, there was nothing to fear.

Shua! Shua! Shua!

After a long-distance teleportation, Demon Beast Ancestor immediately caught up with that massive object that was flying at an extremely fast speed.

Hong!

The massive object continued flying at the same speed, and Demon Beast Ancestor often had to teleport to a much further distance ahead of it to be in the lead. When the other party had overtaken him, he would, without further ado, teleport a great distance ahead to take the lead again.

“Change direction!”

Demon Beast Ancestor executed his endless domain type true treasure, and a blurry black light enshrouded the surrounding region. Then he manipulated the domain under his control and executed his most powerful secret technique. At that moment, close to 90 percent of a boundless domain under his influence converged to form a huge, fuzzy tail. This huge tail lashed at the massive object right away with a loud whistling sound!

A prior calculation of distance had been made, and right away, the tail lashed out at the body of the fast-approaching massive object.

Peng!

The fuzzy tail was immediately shattered to pieces. Yet the massive object continued to advance!

“Seems like... Seems like there is no change in direction at all?”

Demon Beast Ancestor was a tad bewildered. He had intended to change the direction at which that massive object was flying, which explained why he had hit from the side. Apparently, he had not dared to use a true treasure weapon to directly bombard the massive object. He had been worried that the impact of the rebound tremors alone would cause him to sustain another round of heavy injuries. This was why he had used a domain type true treasure, so even if this domain attack were to be destroyed, he would not be greatly affected.

At first, he had thought that this was a non-living object, so bombarding it from the side would have at least caused it to change its direction, even if only to a minor extent.

“Could it be because it is too big? Maybe that’s why it was so stable even when flying.” Demon Beast Ancestor muttered to himself. “I’ll try again.”

Hong!

Hong!

Hong!

Demon Beast Ancestor teleported repeatedly in order to catch up with the extremely fast-moving massive object, and every time, he forcefully attacked it by its side. Almost every day, he would attack up to a few hundred times...

In the blink of an eye, more than 100 years had passed.

“It is not as if my attacks have not caused it to change direction. My attacks did have some influence over it. It’s just that the effect is very, very small.” Demon Beast God was very worked up. “I have been bombarding it continuously for more than 100 years in order to cause it to change direction by only a small degree. The magnitude of that change in direction was so minuscule that even I, a universe supreme master, can barely detect the change.”

Even a universe supreme master could barely detect it. How small a magnitude could that be? Furthermore, he had to spend more than 100 years of continuous bombardment against that massive object in order to achieve such a slight change in direction.

“Continue! I must bring it to a halt before other great beings discover it.”

Demon Beast Ancestor was filled with fighting spirit. He felt that he could still afford to be hopeful, as Universe Ocean was, after all, enormous. Normally, when great beings traveled about within Universe Ocean, they had to depend on natural wormholes. But under such continuous teleportation, based on the direction of that massive object, attempting to fly all the way to arrive at the primal universe would probably take at least one million years.

The patience of a super great being was very strong, so even if Demon Beast God had to keep struggling for millions of eras, he would still do so with much patience, yet he had this incessant worry of being discovered. Although Universe Ocean was vast, other great beings still had to move about through the normal method of using natural wormholes. Therefore the chances of encountering this massive object were extremely low.

Nonetheless, he was still worried!

“I’ll continue to bombard it. Other than the three most dangerous lands within Universe Ocean, there are many other dangerous lands that are one notch less risky. Based on the direction of flight of this massive object, so long as he could bring it to change its course by a few degrees, it would have to pass through a particular dangerous land, Swirling Water River.”

Demon Beast Ancestor was looking forward expectantly as he continued to rain attacks on the massive object. There were many dangerous lands within Universe Ocean.

The most well-known ones were the three most dangerous lands, and there were many other dangerous lands that were a notch less risky. For example, Sitting Mountain Guest’s place of residence within Universe Ocean was one of the dangerous lands.

Another 6,5000 years passed.

“Now the direction is accurate.”

With an undying perseverance that could be likened to that of a worker ant gnawing at a huge mountain, Demon Beast Ancestor persisted for more than 6,000 years and continued to bombard the massive object on its side. Finally, that massive object was made to deviate a little from its original course. This tiny change, coupled with the long flight distance, subsequently accumulated to cause a huge deviation. This would bring the massive object crashing into the dangerous land of Swirling Water River!

“There will always be many great beings in the three most dangerous lands. And the other dangerous lands that are less risky are seldom visited by great beings. As for the most common dangerous lands, there isn’t a single great being to be found. Hopefully, there will be no great being in Swirling Water River.”

Demon Beast Ancestor prayed fervently.

Another three years flew by.

Swirling Water River!

It was a river that rotated consistently, with a total of 12 huge radial arms flowing with water. Amidst the swirling water, were numerous miniature islands. These islands were different in sizes, ranging from a few light years to a few hundred light years or beyond. As for the size of the entire Swirling Water River... its largest diameter could be as big as six million light years! Of course, this was still a lot smaller than the three most dangerous lands.

“Swirling Water River’s diameter is as wide as six million light years.”

Somewhere far away from the edge of Swirling Water River, Demon Beast Ancestor found himself a spot to settle down and keep watch from a far distance away. He had executed an extremely long-distance teleportation, followed by a one-time transit through a natural wormhole to rush over. This was how he had managed to arrive in advance.

“Swirling Water River is so huge, and that massive object’s diameter is over 100 million light years,” Demon Beast Ancestor was muttering to himself. “The difference in size between the two is not too far off the mark. There is a possibility of stopping it with Swirling Water River.”

Although he was muttering about the possibility of a positive outcome, he was still aware that the chances of stopping it were slim! If he could not succeed this time, he was worried that it would be extremely difficult for him to get the massive object to change course and crash into another dangerous land again.

Suddenly—

Hong!

The peaceful Swirling Water River, which was eternally rotating, had 12 huge radial arms of flowing water flow, each of which possessed unfathomable power. Speaking of power, it was more powerful than any other great being by a few thousand or even 10,000 times. This natural power was unbelievably terrifying. The history of its existence was even more ancient than that of the Universe Boat.

At that very moment, a being appeared that was even more massive than the entire Swirling Water River!

Hong!

At a terrifying speed, the humanoid life form with a towering height of over one million light years crashed mercilessly into Swirling Water River with loud rumbles. The 12 radial arms, which originally had been so strong and powerful, were crashed with such force that, within an instant, they were ruptured and scattered all over the place. A large amount of water splashed far out into Universe Ocean.

Peng! Peng! Peng! Peng! Peng! Peng!

The little islands within Swirling Water River—upon being struck by such a high-speed attack—were like eggs exploding one after the other.

“What is happening?”

At that moment, in the deep-water region of Swirling Water River, a universe master who was maneuvering a top-tier palace true treasure was in the midst of exploring through Swirling Water River. To him, exploring Swirling Water River was far easier and safer than exploring the three most dangerous lands. To him, this was a form of relaxation.

Yet he suddenly felt the entire Swirling Water River trembling. Apparently, the high-speed crash brought about an impact that was so strong that the ripples could even cause this palace true treasure to tremble. However, this massive object was too fast to be seen clearly, and this universe master was only left with a glimmer of doubt in his mind. Soon after...

Hong!

The boundless, massive object whistled past in a fleeting moment, and this top-tier palace true treasure, which was even more fragile than the little islands before—instantly exploded. The universe master who was inside the palace true treasure was annihilated right away. An impact of such a level... Even a universe master wearing a supreme true treasure armor would have been annihilated, not to mention this universe master.

It was sweeping up everything.

It was like a vehicle flying through a puddle; the water splashed out in all directions, but the vehicle continued to zoom past the pool at the same rate of speed.

Nothing had changed.

The massive object was still advancing at an extremely terrifying speed. In an instant, it passed through Swirling Water River, causing this dangerous land to be reduced to fragments. Water splashed out into all corners of Universe Ocean. As for that massive object, it was still moving at that terrifying speed, rocketing past Swirling Water Ocean as it left a trail of flowing light in its wake. Soon, it exceeded the limit of Demon Beast Ancestor's scope of view and vanished from sight.

"Er..." Demon Beast Ancestor stared at the scene before him, dumbfounded.

He had fervently hoped that Swirling Water River could stop that massive object. Even if, in his heart, he had known that the chances were not high, he had nonetheless held onto some hope. Reality was always so cruel.

Had the massive object reduced its speed at all? It was simply too fast. Even Demon Beast Ancestor could not judge, but the implications were clear: Even if there had been ten or even 100 Swirling Water Rivers in the way, there still would have been no stopping this massive object.

Within the universe of the Divine Eye Clan's First True Master, an unlucky universe master reported to First True Master, recounting the events he had experienced.

"It was the Swirling Water River! At the time, I was still within my palace true treasure when I felt a strange yet terrifying tremor. I didn't have time to respond when my top-tier palace true treasure was instantaneously ruptured, and my other godly body was annihilated within a fleeting moment. Teacher, this was what happened."

"A top-tier palace true treasure was shattered in an instant?" said First True Master. He also felt as though something bizarre was happening. "Swirling Water River...?"

Chapter 1338: Can't Absorb

Swirling Water River was a second-tier dangerous place.

Someone would suffer losses in Swirling Water River even if he was in a top-tier true treasure palace if he was not reckless. How terrifying that palace was! For top-tier palace true treasures to be instantly annihilated and universe masters to be instantly killed—Swirling Water River couldn't be that dangerous!

"I'll go and check myself," the First True Master sent a message to the other four true masters, then headed off to Swirling Water River.

After only three days...

"Huh?"

The First True Master stood in the chaos air and looked ahead, frowning. Water stretched everywhere in the distance, yet none of the islands in Swirling Water River could be found.

The entire Swirling Water River was destroyed? The First True Master was bewildered. He knew clearly how powerful the natural environment of Universe Ocean could be. Even all the great beings in Universe Ocean combined couldn't destroy a dangerous place, not to mention the entire Swirling Water River.

"I feel that..." The First True Master frowned. "Swirling Water River was destroyed by an exceptional power, and it was hit directly at the front, causing the water in Swirling Water River to blast everywhere while the islands were all destroyed."

The First true master was thrilled. "A chance! A great chance!" He was roaring on the inside. He didn't know what had caused the scene in front of him, but he was pretty sure that it was an existence beyond his imagination, and it was a great opportunity. "We're facing our true death. This unknown object might be the only chance for my race to transcend incarnation."

Weng!

A giant halo suddenly appeared behind his head. There was a gigantic, single eye of flesh and blood in the halo. It glared at the endless space in front of it as if it could see through everything. In that giant, single eye was a blurry trace of light hitting Swirling Water River, making it crumble!

"It's an existence millions of times more terrifying than Swirling Water River. Even I can't reverse the time and space to see how it is. Even if I use both my talents and techniques, I can only locate its direction. It's going that way!" First True Master nodded. "I'll start chasing it!"

Sou!

He teleported and followed in that direction.

One could tell where the giant the giant object was flying to. However, it would take a long time to precisely locate. The First True Master was called "Divine Eye True Master," so he was quite proficient at observation and inspection. He immediately revealed everything.

After a couple of days...

Hong!

The giant object was still flying at its original speed in Universe Ocean.

"That!"

The First True Master was thrilled. Even using all his power, he could barely "see" that the object was a prone, human-shaped creature. It was 160 million light years tall, and it was traveling 120 million times faster than light speed. Only the First True Master, by putting all his power on his divine eye, could tell.

As for Demon Beast Ancestor, who had also been following it, he wasn't able to confirm the speed.

"First True Master! I found it first." Demon Beast Ancestor yelled in anger.

"Hahaha! You? Do you really think you can have this chance all to yourself?" The First True Master didn't give a damn about Demon Beast Ancestor. He had two supreme true treasures while Demon Beast Ancestor had none.

“No, I’m thinking about that. Now that we found this chance together, we’ll own this chance all by ourselves!” Demon Beast Ancestor yelled. “Don’t tell any of the other four true masters to come! If they do, I’ll spread the news and tell the entire Universe Ocean.”

“You...!” The First True Master was furious.

This was indeed a wonderful opportunity, which might help him transcend incarnation. Of course, the First True Master wanted two more true masters to come to help him, but he had to consider the threat of Demon Beast Ancestor. After all, Demon Beast Ancestor’s avatar was in the original universe, which meant he could spread the news in no time.

“Okay!” said the First True Master. “We alone will claim this opportunity.”

The First True Master and Demon Beast Ancestor both tried to stop the giant object. Neither of them dared to even get close to it, given its speed, and the space and time around it had already turned hollow. They could only fly after it.

The shock waves alone could injure them. And if they got closer, they might be killed.

What was worse, before they could even catch up with the object, it had already made it out of their sights.

“Stop!”

“Stop it!”

“Change its direction!”

The First True Master and Demon Beast Ancestor were like two insignificant creatures trying to stop a mountain; clearly, they couldn’t do it.

More than 3,000 years passed, and five more powers had already discovered the giant object. The Divine Eye clan and Demon Beast Ancestor were only two of them. However, Demon Beast Ancestor, the First True Master, and all the other five powers who joined later could only despair.

Hong!

The giant object rushed by and disappeared from the sights of those 18 great beings.

“Useless. We can’t stop it whatsoever.” The First True Master shook his head and sighed. “We’ve already tried everything, and that giant object has already destroyed three dangerous palaces, yet its speed hasn’t changed at all. Apparently, those dangerous places are nothing to it. There are only two ways to slow it down. One, it crashes into the original universe—the original universe is definitely powerful enough to suppress it and slow it down. Two, it is slowed by the three Lands of Extremis! Any of the three Lands of Extremis is certainly as powerful as this object and will likely stop it. What do you think?”

Everyone present looked at each other. They felt helpless.

They could indeed slightly change the direction of the giant object to make it hit some dangerous places, but it was pointless. If it collided with the three Lands of Extremis, all the powers in the Lands of Extremis would gather! If it hit the original universe, the powers in Universe Ocean would have no chance at all.

“We’ll make it known.”

“If it hits any of the three Lands of Extremis, the other powers will know. Besides, if we want to redirect it to one of the three Lands of Extremis, we definitely need help from others.”

“We’ll make it known.”

Everyone felt helpless. They wanted this chance all to themselves, but it was too great for them to keep it to themselves.

I won’t let it crash into the original universe, the First True Master thought. If it got into the original universe, the Divine Eye clan wouldn’t have any shred of a chance.

“We have to redirect it!” Rampaging Devil God yelled. He was the fifth power to join. “If we don’t redirect it, it might affect other miniature universes if it keeps racing toward the original universe. Although miniature universes are enormous, they might not be able to resist it as well as Swirling Water River. They’ll be crushed instantly.”

Everyone nodded. Yes. Universe Boat, Tilted Peak Sector, and Flowing Level Mountain were all indestructible. As for miniature universes, they only belonged to true gods. Although they were too large for other true gods to move, the object was already much stronger than true gods. It would be easy for it to destroy miniature universes. As long as the shock was enough, it could easily destroy the origin of a miniature universe, crushing the entire miniature universe.

If it could easily crush Swirling Water River, it could easily destroy a miniature universe, as well.

All the powers in Universe Ocean were thrilled!

In one of the three Lands of Extremis, in Universe Boat, Luo Feng blinked.

“Teacher,” he said. “Are you saying that a giant object was spotted in Universe Ocean, and it’s flying 20 million times faster than light speed, at a height of 60 million light years? And it’s in humanoid form? Teacher, who’s making up lies? The limit in Universe Ocean is 100 times light speed. As for universe supreme masters, a million times light speed is the limit. 20 million times faster than light speed? And it’s larger than Universe Boat—in humanoid form?”

“It’s not a lie,” said Primal Chaos City Leader. “The news comes not only from one great being but many, including quite a few universe supreme masters. Leave Universe Boat as soon as possible and meet us there.”

“Okay,” said Luo Feng. “It might take me 200 years to get out of Universe Boat. I’ll come back now.”

Luo Feng finished talking with his teacher.

“What are you playing at?” Luo Feng whispered. “A giant object like Universe Boat, Flowing Level Mountain, and Tilted Peak Sector? In the shape of a human?” The very possibility set Luo Feng’s heart on fire. “I’ll go check it out myself. Go!”

Boat of Mausoleum changed direction in the endless black wind and revealed its base form. It flew toward the exit of Universe Boat at its fastest rate of speed. Still, it took him over 200 years to get out of Universe Boat.

The action team of the Hong Alliance immediately sent Luo Feng the coordinates through the virtual universe. “Come, Luo Feng! We are here.”

“I’m coming.”

The coordinates kept changing. Apparently, the strike force from the Hong Alliance was following that giant object. Actually, in the past 200 years, all the powers were rushing toward that giant object, so Luo Feng no longer had any doubts about the authenticity. Although he saw some images of a blurry, humanoid shape through the virtual universe, he wasn’t overwhelmed. He needed to see the real version with his own eyes.

Shua! Shua! Shua!

Luo Feng kept teleporting and caught up with the strike force of the Hong Alliance.

“Luo Feng.”

“Luo Feng.”

“Milky Way Horde Leader.”

“Milky Way Horde Leader.”

More than 180 universe masters from the Hong Alliance, led by Primal Chaos City Leader, had gathered here. Lots of great beings from the united forces alliance had also rushed here. They all knew what was going on and had called a truce during such a crucial moment.

“Luo Feng,” said Primal Chaos City Leader. “Right now, 68 universe supreme masters and more than 3,200 universe masters have gathered here. They’re all the most powerful elites from the powers of Universe Ocean and the two holy lands.”

“This many?” Luo Feng was amazed by the number. He teleported himself following the strike force from the Hong Alliance. “Wow...”

Luo Feng saw a large group of beings in the space of Universe Ocean, all sticking close to one another. The weakest of them was a universe master. It was indeed thrilling.

Luo Feng then turned around and looked into the distance. He teleported himself in the direction where the giant object was moving.

“It’s coming.”

“It’s coming.”

Though none of them could see it, they could sense the invisible shock waves spreading toward them.

Hong!

The horrifying shock waves spread out fully. Then the giant object swept by them like a streak of gleaming light. Even Luo Feng felt that like an ant beneath the weight of a mountain. As he looked at the towering, human-shaped creature, he—as well every other great being in Universe Ocean—felt like an insect.

“It’s too...!” Luo Feng opened his eyes wide, dumbfounded.

Chapter 1339: Hit Universe Boat

Luo Feng was truly thrilled.

He wasn’t sure whether the human figure was a being who was dead or in a state of slumber or just a human-shaped valuable. Based on what he knew about the ancient civilization, there existed valuables in human form—especially machine type-valuables.

“Universe Boat is a boat-shaped valuable of the machine type. That human figure might be a valuable of the machine type.”

Luo Feng was more excited than ever. After all, he felt fortunate just to be able to take a look at it.

“If, instead of a valuable, it’s a great being...”

Luo Feng’s excitement intensified as he considered that possibility. Incredible! Only the ancient civilization had great beings at that level.

Shua! Shua! Shua! Shua! Shua! Shua!

The thousands of great beings in Universe Ocean started to teleport at the same time. They flew to a point ahead of the human-shaped object but remained to the side, as they didn’t dare to fly right in the middle of its path.

The universe supreme masters transmitted their voices again.

“Prepare!”

“Hit it again!”

All the top great beings from Universe Ocean held their power, and soon, the giant being showed up within their sights.

Actually, it wasn’t accurate to say that they showed up within their “sights,” as light speed in Universe Ocean was actually 100 times faster than light speed in the original universe! If they had merely used their eyes to see, it would have been impossible to see the human-shaped object clearly. Rather, Luo Feng and the others all used vibration waves to determine its shape and speed via their control over time and space.

If they only used their eyes to see, by the time the light from the human-shaped object had reached their eyes, it would already have been gone!

They had to use vibration waves to sense the state and position of the human shape, and they could only feel the waves when they were within close proximity. They could only sense the waves for an instant, after which, the human-shaped object would fly past them, producing incredible shock waves.

The shock wave was so strong that even universe supreme masters would be severely injured if they got close.

“Attack!”

“Attack!”

“Attack!”

Following the orders of universe supreme masters, all the thousands of great beings, including Luo Feng, attacked from the side at the same time.

Hong! Long! Long!

All the attacks combined were enough to kill any universe supreme master. The attacks flew 100 times faster than light speed. The combined attacks flew for a long time before they hit the giant object.

The human-shaped object was 160 million light years tall, and its feet were 30 million light years long. Although its flying speed could hit 120 million times faster than light speed, it would take the feet around three months to completely change its position! Unfortunately, it moved too fast. Even though it was right beside him, Luo Feng couldn't see or sense it. Only when the group moved to the side of the front of the human-shaped object could he sense the shock waves for just an instant! In reality, the fact that they could sense a giant object flying 120 million times faster than light speed was worth celebrating.

“Teleportation!”

They all teleported at the same time. They teleported 1,000 light years away, which was nothing compared to the length of the object's feet. Fortunately, it was 120 million times faster than light speed—less than 4 light years per second. They could easily catch up with it by using teleportation, so they could accurately sense the position.

“Attack!”

Hong!

All the thousands of top great beings in Universe Ocean tried together and thought of nothing else. They teleported and attacked again and again.

Luo Feng and the other great beings stayed beside that giant human-shaped object for 3,200 years.

Luo Feng flew out of Universe Boat immediately, so he was much slower. Before he arrived, the powers already decided that they needed to keep changing the direction of the human-shaped object and made

it hit Universe Boat! Redirecting it to Universe Boat required the minimum amount of change out of all the three Lands of Extremis, yet it still required an angle of 15 degrees.

All those great beings had struck the giant object for more than 3,000 years just to gain those 15 degrees. That was why First True Master and Demon Beast Ancestor chose to publicize the news, as the first seven powers who found the human-shaped object couldn't do it at all, and before they could redirect it 15 degrees, it would have already flown away.

"The direction is correct."

"The direction is correct."

"The direction is correct."

Universe supreme masters and universe masters could all tell the direction using the vibration waves. And then they used its relative position of Universe Boat to determine the location.

Luo Feng checked also and nodded. "It will arrive at Universe Boat in around 30,000 years!"

"Hahaha..."

"We're finally going to succeed after all this time."

"That giant object is definitely going to hit Universe Boat."

The top-tier great beings in the space were all relieved. After all, they had been concentrating on this task for more than 3,000 years, and they had been attacking it all this time. Although they didn't attack it very often (they needed to recover their godly power), the pressure still tortured everyone's nerves.

They only relaxed after they knew that they had succeeded.

In the outer area of Universe Boat, one of the three Lands of Extremis.

Thousands of great beings stood in the outer area, looking at Universe Boat in the distance.

"Can Universe Boat stop it?"

"Universe Boat is tens of millions of light years wide and tall, and over 100 million light years long. It's barely the same size as that giant object. It is terrifically fast. Will Universe Boat be blasted away if it was hit?"

"I hope it can stop the giant object."

All those thousands of great beings arrived in advance, waiting for the giant object to hit Universe Boat. However, they were all worried that even if Universe Boat could slow that object down. It wouldn't change much if the giant object only slowed down a little bit instead of stopping. From 120 million times faster than light speed to 30 million times faster than light speed; it was no different from those powers.

"I hope we can succeed."

"If we fail, we have to change its direction again."

“We have to succeed.”

Everyone was looking forward to it.

Luo Feng was in the strike force of the Hong Alliance. He looked at Universe Boat in the distance. It was a giant machine boat that was already wrecked. It kept absorbing the endless chaos air around it, and there were circles of flames around the damaged boat, permeating incredible power. Wind whirlpools and endless electric snakes... There was even one-third of a miniature universe under Universe Boat.

Though Universe Boat is already damaged, it's still swallowing the energies from the outside—even some damaged miniature universes, Luo Feng thought. Apparently, some important parts in Universe Boat are still operating. As a machine-type valuable that's constantly operating, it's very stable. Even though it's hit, it can resist it.

Although Luo Feng thought this way, the human-shaped object was too large and fast!

Time passed. All the thousands of top-tier beings in Universe Ocean were waiting.

“It's coming!”

“It's coming!”

“The giant object is coming!”

They sensed the vibration waves and were excited. Luo Feng, Primal Chaos City Leader and the other great beings from the Hong Alliance were excited as well. They all stayed as far away as possible and hid themselves. They didn't want to be killed by the horrifying shock wave.

“Although we can sense the shock wave, it might take a few years before that giant object hits Universe Boat.”

The strike team from the Hong Alliance was in Boat of Mausoleum, and they were all looking forward to it.

A period of several years was nothing to supreme beings. The human-shaped object was too fast for them to see it, and if they missed the area where vibration waves spread, they couldn't sense it. They could only wait until the impact, when the vibration waves would spread everywhere. Then they would be able to sense them.

Palace true treasures floated. Supreme true treasures, pinnacle true treasures, and Boat of Mausoleum. They were all waiting for it.

Everyone was silent. There were no great beings in Universe Boat.

After a long time—

Weng!

Invisible vibration waves were transmitted in all directions, following the time and space. Those great beings who were hiding in the distance all felt the horrifying vibrations, followed by destructive shock waves. Endless chaos air was torn.

All the great beings felt the waves at the same time and immediately reversed time and tried to watch the scene.

A giant, human-shaped object was flying fast... A gigantic, damaged spaceship didn't move at all. The human-shaped object collided with Universe Boat.

Peng! Peng! Peng!

Some of the fragments around the spaceship were blasted away. The fire, the electric snakes, and the light around the spaceship were also annihilated. Then the human-shaped object struck the ancient spaceship. Its upper half hit the ancient spaceship head-first.

Hong!

The instant the two objects collided, the space and time around them were crushed, exerting horrifying shock waves and vibration waves. The weakest vibration waves at the periphery were transmitted first, followed by the destructive shock waves. The central area of the crash was like a nightmare. The collision was so powerful that even universe supreme masters or supreme true treasures would have been annihilated!

The shock wave spread everywhere—10,000 light years, a million light years, ten million light years. The longer it traveled, the weaker it became. When it spread to the great beings several hundred million light years away, the great beings in the palace true treasures couldn't be harmed anymore. However, the palace true treasures, including supreme true treasures, were still blasted away.

Chapter 1340: Willpower

Inside the Boat of Mausoleum, Luo Feng, Primal Chaos City Leader, and Deserted Mirror Master all stood as they looked out at the numerous palace true treasures rolling and tumbling away.

"We are 500 million light years away from the Universe Boat," said Deserted Mirror Master. "The ripples produced by the impact when the humanoid life form and Universe Boat crashed into one another are being transmitted in all directions. The power is weakening as the ripples travel, but when it reached us, it was still so terrifyingly strong. How terrifying is that!"

"At least for our Universe Ocean, no one would be able to survive in the core area of that impact," Primal Chaos City Leader said in a low voice.

Luo Feng also nodded. Even the Boat of Mausoleum couldn't claim to be able to resist an attack of this intensity. After all, the Boat of Mausoleum had merely undergone Duan Dong River's remodeling. In terms of strength, it would likely be similar to a supreme true treasure; in terms of identity, it merely took on an additional role to be within the "school of automaton."

"I'm not certain whether it will stop it or not," Luo Feng whispered.

"Let's hope it will." Primal Chaos City Leader was also keeping a close watch on the situation outside.

Deserted Mirror Master was very disturbed, too. "If it doesn't stop, we're in trouble."

At that moment, it was not just the Hong Alliance but also various groups of top powers within Universe Ocean—including the two holy lands—who were worried. That humanoid life form was comparable to Universe Boat in size, so if both were to collide, it was difficult to tell whether it could be stopped.

Hong!

The head of the humanoid life form crashed viciously into the Universe Boat at 120 million times light speed. The ancient, damaged ship was sent tumbling and flying through the air due to the great impact. In that endless era, this boat had once been severely damaged, so on its body, were many cracks and crevices. Yet despite the cracks, great beings from the Universe Ocean were still unable to hurt even the damaged parts.

However, this crash caused some fragments left on the surface of the tumbling Universe Boat—originally marked only by a certain degree of damage—to detach and fly off in all directions. Even the internal space of the Universe Boat trembled beneath the impact.

Of course, for an ancient ship like the Universe Boat, its overall structure was unharmed; there was not the slightest dent made to its gigantic shipboards. Apparently, Universe Boat was also an automaton true treasure that was extremely sturdy. One crash could only cause fragments to fall off due to impact. Causing any true harm to it was simply impossible.

Weng!

The deep, internal region of this ancient boat was in continuous operation. Even as it was sent tumbling by the impact, its internal region continued to operate. For an endless time, it had been swallowing so much chaotic airflow that all of that accumulated to become a powerful energy, which was the source of stability of this boat. Even when there was rapid deceleration, the boat was still stable.

After the first wave of impact, the humanoid life form's speed was greatly reduced. After waiting for the Universe Boat to reduce its speed, the humanoid life form dealt the Universe Boat with another impact!

Hong!

It was another earth-shattering impact this time around. However, the power was obviously weakened to a great extent. This time, it was the waist portion of the inclined body of the humanoid life form that struck the ancient ship. The two objects seemed to form a cross, but this time, the impact did not send the Universe Boat tumbling away; the ship merely flew out of the way. As for the humanoid figure, perhaps because its inclined position weighed it down, it tumbled over and flew off in the other direction.

Two impacts, one after another.

From the first impact, the direction of the humanoid life form did not change much, but its speed had been sharply reduced—to less than 20 million times the speed of light. From the second impact, its direction changed drastically, and its speed was further reduced to only 300,000 times the speed of light.

Hong! Hong! Hong!

The humanoid life form was tumbling at a speed that exceeded 300,000 times the speed of light. In the process of tumbling, it faced an obstructing force from the chaotic airflow, which caused its speed to be greatly reduced. Then, gradually, it ceased tumbling and went back to its initial pose of lying flat on the ground.

“It has stopped!”

“The Universe Boat has stopped. It is no longer moving.”

Thousands of great beings in all of Universe Ocean gathered around the Universe Boat. As they looked at its surface, they realized that although the vines, frost, and organisms initially found on the surface of the Universe Boat had been annihilated, the original outer wall color of the Universe Boat was revealed.

Luo Feng and the others were amazed by what they saw.

“Such an impact, yet there isn’t a single dent to be found on the surface of the Universe Boat.” Primal Chaos City marveled. “The Universe Boat has been around the Universe Ocean for so many reincarnation eras since it first appeared and is already so damaged. Yet it was able to take such a terrifying impact. All those injuries that caused it to be so damaged—what could have caused those? I really cannot imagine. Universe Ocean is indeed mysterious beyond words. It holds so many secrets that seem so improbable, like the human-shaped life form that just appeared out of nowhere. Before it appeared, would any one of us have suspected its existence?”

Luo Feng and the surrounding great beings from the Hong Alliance all nodded.

“Let’s go. We shall go after that human-shaped life-form,” Primal Chaos City Leader said.

“Yes, the human figure and Universe Boat have collided twice,” said Luo Feng. “With its speed greatly reduced, getting it to stop is no longer that difficult. The resistance from the chaotic airflow alone will cause it to continue weakening.”

Luo Feng looked forward to the outcome. The strike force from the Hong Alliance that was inside the Boat of Mausoleum started to teleport as a group as they gave chase. The direction the human-shaped life form was heading was easily deduced. Various groups of top powers within Universe Ocean were all going after it, and they caught up easily.

“Haha! It is slowing down by a lot.”

“And it is continuing to reduce its speed.”

“This is getting so much easier.”

At one point, great beings from the various groups of top powers within Universe Ocean were surrounding the human-shaped object—at times teleporting and at times exploring.

At merely 300,000 times the speed of light, it did not constitute a major threat, and the impact of its attack was much weaker. After all, if there was an outburst from a universe supreme master, his speed could go up to 100,000 times or even one million times the speed of light!

Universe Ocean was filled with endless chaotic airflow with an extremely strong resistive force. The ordinary beings who were much weaker would immediately be annihilated in this chaotic airflow, which was why energy had to always be maintained when flying within Universe Ocean. Previously, the humanoid life form had been so fast that the force of its impact was far too strong. Even at that speed, it was able to form an area that was similar to an “absolute domain.”

All around it, everything was shattered; time and space were in shards. The chaotic airflow was in pieces, and nothing was able to get near to it at all! With it traveling at such a speed, the chaotic airflow was so fast that the naked eye would not have even seen it in the form of dust.

Yet at this very moment, it started to slow down, as it was no longer able to go further to reach the level of an absolute domain. The resistive force of the chaotic airflow was constantly exerting its influence over the massive, human-shaped life form to reduce its speed. The slower it moved, the faster it descended! To reduce its speed from more than 300,000 times the speed of light to just 200,000 times the speed of light, it took approximately three days’ time. But after just three more days, there was a sharp decrease to not even 10,000 times the speed of light.

Primal Universe, Ancestral God School, Ancestral God Palace.

Weng!

Intangible willpower fell upon Ancestral God Palace. Three figures were seated on the thrones. They were the three great ancestral gods from the first reincarnation era. Currently, they all wore solemn expressions. With their eyes shut, all of them seemed extremely holy and pure, and they were exuding bouts of a strong yet strange power.

“My children...”

“It... is coming...”

“Crisis...”

“Must...”

“The fourth most dangerous land...”

The ancient willpower was transmitting numerous bits of information being sent to the three ancestral gods. After some time, the strong, intangible willpower finally retreated. The three ancestral gods opened their eyes and looked at one another, shocked.

“Since the day we became ancestral gods, we have not taken a single step out of Universe Ocean,” the ancestral god in the middle said in his old voice. “This time, by the orders of the willpower of the primal universe origin, we can finally leave the primal universe.”

“Let’s go!”

“If we arrive too late, I’m afraid that the various groups of top powers of Universe Ocean will suffer a great loss.”

“So, what if there is a great loss? Even if they are all annihilated, does it matter to us? We should just go at our own pace and do what we are supposed to do. That should be fine.”

“Let’s go!”

Hong! Hong! Hong!

The three ancestral gods transformed into dazzling rays of light and speedily left the ancestral god palace. Then they vanished from within the Ancestral God secret region.

In the vast Universe Ocean, under the obstructions posed by the endless chaotic airflow, the impact of the energy that resulted from the flying of the human-shaped life form was continuously weakening, and its speed was rapidly decreasing. Thus, the various groups of top powers of Universe Ocean were getting less and less afraid of it.

“Charge!”

“Charge!”

Various groups of top powers, on board their palace true treasures, charged straight toward the human-shaped life form.

“Luo Feng, we will join in, too,” Primal Chaos City Leader decided as he looked out and saw the palace true treasures flying past.

“All right.” Luo Feng immediately took control of his Boat of Mausoleum and headed straight for the human-shaped life form.

At high speed, the Boat of Mausoleum advanced. Very soon, it arrived at its destination and started to descend on the expanse of the human-shaped figure’s body. Shortly after—

Hong!

A loud bang sounded. The Boat of Mausoleum had made its landing on the body of the humanoid life form. Standing, it would have been a towering 160 million light years, so even if the Boat of Mausoleum had landed on it in its entirety, it still was like an ant floating in the vast ocean.

“We have landed,” Luo Feng said. “But now, it is moving too quickly. Everyone, please do not rush to exit yet.”

“Understood.”

“Understood.”

Various great beings from the Hong Alliance were very excited because the Boat of Mausoleum had landed on the body of the humanoid life form to get a good look at what was on its surface.

“Look, there is a rolling mountain range on the surface of this humanoid life form.”

“At first glance, there seems to be no end to it.”

“That is not a mountain range,” Primal Chaos City Leader said. “Based on the deductions from the vibrating ripples, it must be the shape of the entire humanoid life form. What might seem like a rolling mountain range to us now is actually the texture of the subtle wrinkles of the ‘clothing’ worn by this humanoid life form!”

“Huh—?”

There was a moment of surprise. Then everyone started to burst out laughing, especially those universe masters who had initially thought the wrinkles were part of a rolling mountain range—laughing at their own silly thoughts.

Even for Luo Feng, by examining the vibrating ripples that were transmitted over—trying to deduce the shape of the human-shaped life-form—it was only possible to conjure a rough image. To deduce that those were the clothes of the life form was a great challenge. Yet a universe supreme master like Primal Chaos City Leader was able to deduce the silhouette of its armor.

“Let’s take a good look first.”

“Milky Way Horde Leader, drive and park your Boat of Mausoleum on the surface of this human life form and advance.”

“Let’s go.”

Everyone was rushing him.

“All right,” Luo Feng said.

He was also filled with curiosity. So, without further ado, he drove the Boat of Mausoleum to the human-shaped life form and latched it onto the surface of its as it advanced forward. Because the Boat of Mausoleum was on its surface, even if the human figure was moving extremely fast, the surface was still relatively stable.

“Luo Feng, the other parts of this human-shaped life form must all be shut, just like the outer walls of the cabin area,” Primal Chaos City Leader said. “Go to where its head is. Where its head is... there should be a passageway in.”
