

SWALLOWED 1341

Chapter 1341: Go In

The head of the giant object was enormous, and there were true treasure palaces on top of it. Almost 90 percent of the great beings in Universe Ocean were around the head.

“It’s enormous.”

“This must be the mouth of that human shape object.”

Boat of Mausoleum landed. Luo Feng, Primal Chaos City Leader, and the other great beings from the Hong Alliance were all looking into the distance, amazed. There was a vast abyss in front of them, and judging by the outer shape of the giant object, it had its mouth closed, yet the abyss was only a crack between its lips.

That abyss was 1.9 million light years long, and it was 120,000 light years at its widest. Even Luo Feng’s domain true treasures could only inspect a small part of it. Ten milky way galaxies could have filled this crack.

Sou! Sou!

Streaks of light appeared above the abyss and shot out.

“Quick, quick. If there are valuables in this giant object, those who find them first can get them! Quick!”

All the powers were nervous. Although they were frightened and intimidated by the giant object, they were still keen to find out more about it, which was why they immediately sent universe masters with multiple bodies to check.

“Let’s go, Luo Feng.”

“Chaos!”

The great beings in the Hong Alliance were nervous as well. The valuables were on a first-come-first-serve base, and everyone knew it. They were nervous upon seeing all the other powers sending great beings.

Primal Chaos City Leader looked around and said, “We know nothing about this giant object. We don’t know how dangerous it is inside. Even universe supreme masters can’t guarantee they can survive it. We’ll send universe masters with multiple bodies in first. Then, even if they die, they will only lose a body and some true treasures. The main entryways of that giant head are the ears, the nostrils, and the crack between the lips. We might enter separately through different portals.”

Nobody knew which entryway led to the valuables, which was why they would need to try all of them.

“Okay. I’ll go.”

“I’ll go, too.”

Great beings were very efficient, and they transmitted their voices using their godly power. Immediately, eight universe masters decided to send bodies in, including Luo Feng.

Primal Chaos City Leader said, "Everyone who's going in, be careful. Also, when you enter, please record your route. Then other great beings from the Hong Alliance can learn from it. Now, everyone, off you go."

"Let's go."

"Go."

The gate of Boat of Mausoleum opened.

Sou! Sou! Sou! Sou! Sou! Sou!

Streaks of light flew out swiftly, including a black, oval-shaped palace. Other great beings from the Hong Alliance were all looking at the great beings of their team, including Primal Chaos City Leader. They all wished that they could get the huge chance contained in that giant object.

Inside the black, oval-shaped palace, Luo Feng stood looking at the outside. He was wearing black armor and carrying a blade. A blurry black light permeated the oval-shaped palace, centered on him. It covered an area of several square light years. This was Luo Feng's Moshu body.

"Inspection," he muttered.

Luo Feng was full of expectation. Actually, he only carried his golden horned beast body and the earthling original body while journeying in Universe Ocean. However, for the present purpose of inspection, he had immediately sent his Moshu body, which had been in the original universe, back to Remote Ocean and killed it. The true treasures carried by his Moshu body had been kept by endless Remote Ocean. Then Luo Feng immediately had spared some godly power from his golden horned beast body and condensed a new Moshu body.

Moshu body had a life gene level of 5,000 times, and it was 10,000 kilometers tall. Its godly power wasn't even 1/1,000th that of his golden horned beast body, so it was okay for the golden horned beast to spare that much.

As for the valuables that Moshu body was carrying now, they had been obtained over the course of the past eight million years. Luo Feng had kept some true treasures he had obtained from Jie Fanzhi after donating most of them to his race. He had also journeyed throughout Universe Ocean in Boat of Mausoleum, so he had obtained quite a few true treasures, meaning it had been easy for him to get a set of true treasures.

The armor and the blade Moshu body was carrying were both pinnacle true treasures, but they were only ordinary pinnacle true treasures. As for pinnacle palace type and domain type true treasures, they were much more precious.

"It's done."

"Let's see what's inside that giant object." Moshu Luo Feng drove the black, oval-shaped palace, performing short-distance teleportation time and time again. Each time, he only teleported within the domain range. He also documented his route while he was moving forward.

In Universe Ocean, three beings walked out of the wormhole shoulder to shoulder.

“Based on Nine Remoteness, the powers from Universe Ocean can’t wait anymore, so they sent some great beings in. Regardless, they were careful enough to only send those with bodies. At least most of them did that.”

“They’ll soon realize how terrifying that fourth Land of Extremis is.”

“Not our business. We’ll just move at normal speed. As for the death toll, it’s their luck. Tell Nine Remoteness and the others. Other than those like Nine Remoteness who are not afraid of death, others can’t go in. Although we know about this fourth Land of Extremis, we can’t spill the secret.”

The three ancestral gods went because they received an order from the original mind. They knew about the secret, yet they didn’t dare to leak it to their great beings. As ancestral gods, they benefited greatly, yet there were still many rules that they needed to follow.

Hong!

The giant object kept slowing down under the chaos air. Eventually—

Hong! Long! Long!

It completely stopped.

“The human-shaped object has fully stopped.”

“That armor... Is it decorative? Or is it a valuable like the armors we’re wearing? Let’s see whether we can make it recognize us as owners.”

The great beings who remained outside had many thoughts. They believed that powerful valuables would recognize masters, so they all endeavored to give it a go. However, before the great beings landed, there were already those who had tried. They had all failed.

That giant armor was like a decoration. It was not subject to master recognition, and no matter how it was attacked, it wasn’t damaged even in the slightest.

Luo Feng entered via the crack between the lips. He was driving a true treasure palace and teleporting at a short distance. He was very fast, and soon enough, he had already traveled ten million light years forward. That giant object had already stopped.

“An endless abyss.”

Inside the palace, Moshu Luo Feng looked down, and he couldn’t see the bottom. He looked to his side, but he couldn’t see the end, either! It appeared endless! He could only see the exit dimming at the front, and using his domain type true treasure, he could tell that there wasn’t any route at the front. He had to go down.

“Go down!”

Hong!

The black, oval-shaped palace immediately dove down, and it started to teleport at a high frequency again.

“Huh? There’s a huge area that my domain true treasure can’t detect,” Mosha Luo Feng said.

He overjoyed. Ever since he started detecting, he hadn’t been able to find anything out of the ordinary. In dangerous places in Universe Boat and Tilted Peak Sector, domain true treasures couldn’t detect them. He had been in this giant object for a long time, and this was the first time his domain true treasure wasn’t able to detect something.

“I’ll go and see.”

He drove the black oval palace and got closer. After half an hour, Mosha Luo Feng looked to the front in the palace.

“That is…”

Hong! Long! Long!

An endless whirlpool appeared in his sight. The whirlpool twisted the space, spreading outward.

“A natural wormhole?”

Mosha Luo Feng could immediately tell that it was a natural wormhole.

“That wormhole is too large and too powerful,” he said. “Only universe masters and those stronger could get through such twisted energies. I haven’t seen a natural wormhole this big in Universe Ocean or in the original universe.”

Mosha Luo Feng was thrilled. Apparently, the natural wormhole led to another area.

“Go. Go deeper.”

Mosha Luo Feng drove the true treasure palace, dodged the natural wormhole, and kept diving.

All great beings who inspected dangerous places knew that there were two ways to move forward in dangerous areas: teleportation and flying! Teleportation could take them to areas that could be inspected, and great beings only did that when they could make sure the area was safe. Flying was far less risky. At least great beings wouldn’t fall into dangerous places without a fight.

As for natural wormholes, nobody knew what was on the other side. Wormholes in Universe Ocean and the original universe were okay. As for those in Universe Boat, Tilted Peak Sector, Flowing Level Mountain, and this giant object, nobody would enter.

“Move forward!”

The abyss seemed to have no end, but it appeared safe. Mosha Luo Feng drove the true treasure palace and kept moving forward, teleporting.

“There’s no end, no end. I’ve been here for 15 days.”

On the 15th day, Mosha Luo Feng lost his patience a bit. After all, there were lots of dangerous areas in the other three Lands of Extremis, yet there seemed to be nothing but an endless abyss in this giant object with nothing in it, and teleportation was allowed everywhere.

Hu!

A freezing breeze suddenly blew by. Even though Luo Feng’s domain true treasure covered an area of several square light years, it couldn’t detect the breeze. It was completely silent.

It blew through the black, oval-shaped true treasure palace, which was suddenly like dust, crumbling and separating, spreading across the ground and disintegrating into nothing. As for Mosha Luo Feng inside the oval palace true treasure, he only felt cold before his godly power was completely frozen.

The blade, the armor, and Mosha Luo Feng himself all turned into dust, spreading, and disintegrating into nothing.

In the endless abyss, there still seemed to be no danger. It was tranquil, and teleportation was still possible everywhere. But Mosha Luo Feng and the true treasure palace he drove had all turned to nothing. It was as if they had never been here.

Chapter 1342: The Other End of the Wormhole

Inside Boat of Mausoleum, Luo Feng looked shocked. His body shook.

Primal Chaos City Leader realized something was wrong. “What happened, Luo Feng?” he asked.

“The Mosha body I sent in died,” said Luo Feng.

He was terrified. Even if there were some dangerous places in Universe Boat and Tilted Peak Sector that couldn’t be inspected, they were vacuums, meaning they couldn’t be inspected. Luo Feng could at least sense that there were dangers.

However, his domain could detect everywhere in that giant object, yet he had still been killed under that situation! And the pinnacle true treasure palace was also shattered without a trace! Even the energies in the origin of Shi Wu Wing made some sort of sound when slashing pinnacle true treasure palaces into pieces.

“Died? How?” asked Primal Chaos City Leader.

“It must be wind,” said Luo Feng.

“Must be?” Primal Chaos City Leader was dazed.

“I didn’t see it at all, so I couldn’t detect it.” Luo Feng shook his head. “My domain type true treasure worked perfectly fine and was able to inspect everywhere. The wind just came out of nowhere. My pinnacle true treasure palace and my godly body were both shattered, and Mosha body died. He couldn’t fight. Not even a little bit.”

Primal Chaos City Leader was shocked. Even pinnacle true treasure palaces couldn't resist it? Then everyone who went would be doomed unless he had a supreme true treasure.

Eight universe masters from the Hong Alliance entered to conduct a search. Luo Feng had gone in through the crack between the lips. He had gone in first and had died first.

The following day, another universe master died. On the fourth day, two other universe masters died. On the fifth day, another universe master died.

In the ten days following Masha Luo Feng's death, the other bodies of the seven universe masters from the Hong Alliance all died. Nobody survived, which terrified all the universe masters from the Hong Alliance. Even the three Lands of Extremis weren't that incredible.

In the palace of Boat of Mausoleum, the last universe master who had gone in had died, and the universe masters were discussing this heatedly.

"Milky Way Horde Leader was met with a wind that couldn't be detected. Once that wind blew, the pinnacle true treasure palace he was in was annihilated. As for Xue He Master, he was met with fire that came out of nowhere, which immediately burned the pinnacle true treasure palace. As for other universe masters..."

By wind, fire, or mist, seven had died instantly without even putting up a fight. One had encountered water stretching out and freezing the time and space around him so that nobody could teleport or flee. The water had easily eroded the pinnacle true treasure palace, killing the universe master sitting inside.

"Everyone," said Primal Chaos City Leader.

They all became quiet and looked at Primal Chaos City Leader.

"Based on the information I have, it's not just the great beings from the Hong Alliance who have died," said Primal Chaos City Leader. "Even great beings from other powers who journeyed in and entered the endless abyss couldn't find the route, and they couldn't clearly see the environment around them. They were all trapped in the abyss and were killed by the fire, wind, or other forces that showed up out of nowhere in the abyss... Even supreme true treasure palaces were destroyed. Not to mention pinnacle true treasure palaces."

"Supreme true treasure palace?" Everyone was stunned.

"I just received the news," said Primal Chaos City Leader. "The skeleton race from the first universe era sent a great being in a supreme true treasure palace. He was met with fire, which burned the palace instantly. He couldn't resist it in the slightest."

Everyone was shocked. Luo Feng sighed. It had burned a supreme true treasure palace? Some designs in Boat of Mausoleum could indeed kill some great beings hiding in supreme true treasure palaces. However, they couldn't destroy a supreme true treasure palace. The abyss in this gigantic object, on the other hand, had done just that.

"Even supreme true treasures can't resist it. What can we do about it?"

“Literally nobody has survived. The death rate isn’t that high even in Lands of Extremis.”

Primal Chaos City Leader suddenly yelled over their panic, “Everyone!”

Luo Feng looked to his teacher in surprise. All the other great beings in the palace did so as well.

“I just heard the news,” said Primal Chaos City Leader. “Several powers from the first universe era have entered the natural wormhole in the endless abyss.”

Luo Feng’s eyes gleamed. While he was inspecting the object, he had also found a natural wormhole, yet he hadn’t dared to go in. Instead, he had kept moving forward.

It seemed that those from the first universe era were in more of a hurry, as they had dared to enter the wormhole. Chances were, it hadn’t ended well. Otherwise, they couldn’t have spread the news.

“What’s on the other side of the natural wormhole?” asked Xue He Master.

The other seven universe masters had also found the natural wormhole. No matter how they entered the giant object—through the ears, the nostrils, or the mouth—they had all entered the endless abyss and continued right past the giant wormhole.

“Enter the natural wormhole!” said Primal Chaos City Leader. “It’ll lead to a secret place full of chaos air with a miniature universe in it.”

“A miniature universe?”

“Miniature universe!”

Everyone was dazed, including Luo Feng. The natural wormhole led to a space where there was a miniature universe?

“We’ve confirmed that the natural wormhole leads to a mysterious space, and it’s in the human-shaped object,” said Primal Chaos City Leader. “Besides, the great beings from the first universe era are also trying to get into that miniature universe. They have arranged their machine puppets, and some of them are even trying to get in themselves... However, when they touched the membrane of the miniature universe, they were annihilated immediately.”

“Ah!”

“The membrane is that powerful?”

“How is it possible?”

Everyone in the palace of the Boat of Mausoleum was shocked. Luo Feng couldn’t even imagine that. Normally, the membranes of a universe couldn’t attack. Some universe supreme masters would try to use their miniature universes to kill enemies, but it was after the enemies had entered the miniature universe, and they used the power of the origin of the miniature universe to do it. It sounded ridiculous that the membrane itself could kill.

Dead! Dead! Dead! Dead! Dead! Dead!

No matter how the powers in Universe Ocean tried, they all died without exception. This 100 percent death rate intimidated all the powers. Even a slight chance of survival would help, but there was none.

Just when giant objects in Universe Ocean were all panicking and feeling helpless, the news was spread that the three ancestral gods were summoning all the powers in Universe Ocean and were going to pass on the message of the original mind.

“What? The three ancestral gods?”

“I thought the ancestral gods from the original universe never left the original universe.”

“A message from the original mind?”

Everyone was surprised. The ancestral gods—who had never set foot in Universe Ocean—arrived and were given the message of the original mind. Both attracted the collective attention of Universe Ocean. Plus, the powers suffered losses when they were inspecting the giant object, so they all gathered around.

Boat of Mausoleum also went along.

“A message from the original mind?” Luo Feng frowned. “This is the first time that the three ancestral gods entered Universe Ocean. What do they want?”

Primal Chaos City Leader looked solemn. “They’re here for a good reason.”

When he was trying to kill Great Thunder Star Master, he was able to perform a power that was exactly the opposite of godly power. That was when Luo Feng realized that there was a hidden secret in Universe Ocean that he didn’t know of.

“This giant object is one of them,” said Luo Feng. He also wanted to know what the ancestral gods had to say.

Hong!

Supreme true treasures went along, and Boat of Mausoleum was among one of them. There were three beings in white capes standing in the space around ten million light years away from the giant head. They stood side by side, and their white capes glowed with colorful light. They were incomparably powerful, and their force permeating everywhere.

Palaces floated around the three beings in white capes, followed by lots of great beings.

Luo Feng and the others walked out of the gate of Boat of Mausoleum. They stood in the space and looked at the great beings in white capes in the distance.

Luo Feng sighed. “What a powerful force,” he said.

He felt like the space and time within hundreds of square light years were controlled by the three ancestral gods, and they were much more powerful than any universe supreme master.

Primal Chaos City Leader transmitted his voice. “Remember, they are the representatives of the original mind. Their power is bestowed by the original mind.”

“Let’s see what they’re going to say.” Luo Feng was staring, too.

The humans didn’t have any emotional attachment to the original mind, as Teacher Origin was suppressed by it.

As time went by, more and more great beings gathered. The ancestral gods were the ones that gleamed the brightest.

“Three universe eras, two holy lands, and all the powers have arrived,” said the one at the center. “We’ll begin. We enter Universe Ocean because of the order from the original mind, and we’re here for that giant object.”

He then pointed at the giant object.

“When you get in, you will find a natural wormhole,” said Ancient Ancestral God. “If you enter the natural wormhole, you’ll be transported to another place. There’s a miniature universe in the space, and it’s called the ‘World of Jin’! That is the only place in that giant object where you can survive.”

Chapter 1343: Tears

The three great ancestral gods, being the spokespeople of the willpower of the primal universe origin, were now surrounded by colorful lights that contained the power of various laws of gold, wood, water, fire, earth, wind, electricity, light, time, and space. And these lights were consistently exuding an endless, oppressive force.

Clearly, this was not something that these three ancestral gods could achieve on their own. This was obviously achieved with the support provided by the willpower of the primal universe origin. To a certain extent, it could also lend credibility to the words of the three great ancestral gods, proving that their claims were not baseless or random.

“That miniature universe we have all tried before. Mere contact with the walls of its membrane will bring one to annihilation.”

“There is simply no way in.”

Right away, great beings began firing persistent questions.

Double-Face Ancestral God, one of the three great ancestral gods, who was seated to the side, spoke up. “If you intend to intrude and barge your way through, then there will certainly not be a way in. This World of Jin is extraordinary... Under normal circumstances, even after thousands and millions of reincarnation eras, it remains unborn. However—when everything in the vast Universe Ocean has a universe law to adhere to, that time will be the time for its proper birth.”

No one bothered asking how they should enter. This information from Double-Face Ancestral God was enough to cause a stir among the various groups of top powers from Universe Ocean!

Proper birth? What did he mean by “proper birth”? Under normal circumstances, even after thousands and millions of reincarnation eras, it would remain unborn?

“What exactly happened?” Luo Feng was taken aback and transmitted a voice message to Primal Chaos City Leader beside him. “Teacher, after hearing what the three great ancestral gods had to say, the birth of this World of Jin seems to have a special meaning to it.”

“Yes.” Primal Chaos City Leader nodded solemnly. “Everything has its own laws. The willpower of the primal universe origin may be very strong, but it is also very detached, so it cannot differentiate between good and bad. It can only adhere to the most fundamental rules. Even when dealing with a single universe master like Yuan Ao Master, or dealing with Great Thunder Star Master, it must draw on the support of other great beings. Obviously, it is not invincible, so even against Teacher Origin, the most the willpower of the origin could do was keep him under suppression. There is no way it could annihilate Teacher Origin.”

Luo Feng nodded. It was true. Everything seemed to have a predestined set of laws to adhere to, and apparently, under normal circumstances, this massive object should not have been born. Yet now, it had undergone a proper birth! Obviously, this meant that this period had entered into a special phase that was different from the other reincarnation eras.

The most handsome ancestral god—a being with fine, delicate features and a red-scaled tail, who looked nothing older than a youth—spoke. “Internally, the World of Jin is fraught with endless predicaments, yet it also contains endless opportunities. It is more special compared to the other three most dangerous lands. That massive object was of no use at all to Universe Ocean. Its true significance lay in the World of Jin that resided within its body. If you want to enter the World of Jin, you must wait for the right opportunity. The power of the universe membrane wall periodically switches from strong to weak. When it turns black, its power is at its strongest; when it turns white, its power is at its weakest. That is when most ordinary universe masters can easily penetrate it. Each cycle... is approximately one era long. Everyone, we just need to wait. Wait for the membrane walls of that World of Jin to turn white. Then we can enter.”

Hearing the words of this ancestral god, the various groups of top powers instantly grew restless and itchy for action.

Periodic cycles? At that point, a handful of great beings wanted to take off and rush into the World of Jin right away. But the moment they heard that a single cycle took as long as an era, they had to suppress their heightened emotions in order to continue listening.

“The World of Jin is mysterious and unpredictable,” the old ancestral god in the middle said. “Within the World of Jin, there are many living souls.”

“Living souls?”

“What!”

“There are living souls there?”

A few thousand top-tier existences from all over Universe Ocean were shocked. Luo Feng was astounded, too. The three most dangerous lands of the Universe Boat did not have any living souls.

“The living souls of the World of Jin can only survive in the World of Jin. They cannot come out,” the old ancestral god continued. “The moment they leave, they are bound to die. If you all enter... what you bring out when you exit will only be lifeless things. If you have brought a living soul out, it will be the same as killing it. Also, the World of Jin... contains a secret on transcending reincarnation.”

Hua!

This gathering was already a powder keg, and now, thousands of beings were getting even more worked up.

The secret on transcending reincarnation... Was this not what they all yearned for?

“Remember!” said the old ancestral god. “The secret to transcending reincarnation is the secret of the World of Jin. Upon entering, you can explore and seek what you yearn for. But the moment you leave the World of Jin, everything you learn from it must be kept to yourself. Absolutely nothing must be leaked to the outside world. Of course... even if you want to, there is no way to leak anything from the World of Jin.”

Everyone seemed to be deep in thought.

Luo Feng understood right away. It was just like how he received the inheritance of the pulse of Duan Dong Rive; he simply could not find anything more profound. It was like how Sitting Mountain Guest had bestowed upon him, the Nine Volume Manual. Sitting Mountain Guest had needed to pay a hefty price before he could impart the manual to a single disciple. Obviously, there was an intangible kind of “law” that was influencing everything.

“The secret of transcending reincarnation? The secret of the World of Jin?” Luo Feng could feel the upsurge of emotions.

He was aware that for many generations of reincarnations, the World of Jin had not been born. This time, its birth was the closest he would likely get to the secret of Universe Ocean.

“World of Jin, the fourth most dangerous land of Universe Ocean,” the old ancestral god said. “All of you must bear in mind... when the opportunity arrives, a crisis also lies in wait. The World of Jin is much more dangerous than even Tilted Peak Sector, Flowing Countless Mountains, and Universe Boat.”

“Let’s go.”

The three ancestral gods looked at one another, then immediately vanished into thin air and left.

The thousands of great beings from Universe Ocean were also incomparably fast in returning to their palace true treasures. The large group of great beings from the Hong Alliance also returned to the Boat of Mausoleum immediately.

The three generations of ancestral gods played the roles of the spokespeople of the willpower of the primal universe origin, and they were mainly tasked with conveying messages and guidance. However,

the various groups of top powers from Universe Ocean did not dare to commit their full belief in everything they received. They still explored cautiously. Suddenly, they discovered that the entire route from the point where they entered until they reached the natural wormhole was danger-free. And the moment they went through the wormhole, they would arrive at a secret space where they would see a miniature universe: the World of Jin.

“Luo Feng, no great being has ever set foot in the World of Jin to explore it, and yet, you are going in now—just like that,” said Primal Chaos City Leader. “It is too dangerous. If an accident happens, the loss you incur will be far too great.”

Luo Feng was carrying numerous true treasures on him. If he were to suffer a loss, it would, indeed, be massive.

“Teacher, I simply cannot bring myself to give up such an opportunity,” Luo Feng said. “Besides, I have other bodies. Even if I fail, I still have the chance to pick myself up from the fall. Teacher, please be at ease.”

Luo Feng divided his force into two different routes. He condensed part of his godly power to form his Mosha body, which would take one of the two routes. Mosha body would take Shi Wu Wings and Star Tower and return to the primal universe. After all, everything about the World of Jin was unknown. If all his true treasures were brought in at the same time, the moment he failed, everything would be lost. By that time, it would be too late for regrets.

His earthling original body and Golden Horned Beast would take Blood Ghost Blade and the Boat of Mausoleum and set off on the other route, preparing to head into the World of Jin.

Following the route along the natural wormhole, they arrived at another space.

The Boat of Mausoleum was suspended in midair as Luo Feng looked out from his location and saw a miniature universe far in the distance. It was dark blue in color—a clear sign that it was not yet the time to enter.

“Even without any true treasure, given my current combat power, I can still stand at the apex of Universe Ocean all the same.”

Luo Feng was full of confidence but was unwilling to put all his true treasures at stake. That was why he had sent Shi Wu Wings and Star Tower back. But he still brought with him Blood Ghost Blade and the Boat of Mausoleum to charge his way through. Those two would be more than enough!

“Wait. Wait for the moment to enter this World of Jin.”

The Boat of Mausoleum waited silently.

Judging by its outer appearance, the dark blue miniature universe seemed to only have a diameter of around ten million light years. However, its power was stronger than any other universe supreme master’s miniature universe by countless times. In its surroundings, numerous palace true treasures were suspended. Great beings from every single group of power from the entire Universe Ocean would be waiting. Of course, this was being treated as a dangerous land that no other great being had ever

dared to explore before, and so, not many groups of powers dared to charge their way in with full force. Most of them had sent a very small number of their great beings to conduct a prior round of exploration.

There were more than 200 great beings (including universe supreme masters), all seeking to be the among the first to explore the World of Jin.

Over 200 great beings were waiting outside the World of Jin, ready to enter to begin their exploration. On the other hand, various groups of top powers from Universe Ocean were mostly on their return journeys. For example, the strike force from the Hong Alliance was heading for the primal universe as fast as they could.

That was why, at that moment, other than the World of Jin—which was contained within its body—the other parts of the gigantic, human-shaped life form had regained peace and quiet and were no longer as boisterous with activities like earlier. Only a few great beings had stationed themselves in the void space.

Hua!

Ripples appeared in the space.

A lone figure appeared out of nowhere. On his forehead was a pair of crystal horns, and he wore a black robe that radiated black light. It was none other than Sitting Mountain Guest.

Sitting Mountain Guest had arrived earlier than any of them, yet no matter who had previously come to explore—or the message that the three ancestral gods had conveyed to the public—not a single one of them noticed Sitting Mountain Guest's presence.

Luo Feng, too, did not realize that Teacher Sitting Mountain Guest was around. He had even tried to ask about Sitting Mountain Guest through his transmission token, but there had been no reply from him.

Sitting Mountain Guest stood amidst the void space and looked quietly at the gigantic, human-shaped life form ahead of him. Silently, he looked at it. His gaze penetrated through time and space to cover every inch of its body. He scrutinized its hair, eyes, nose, ears, mouth, and even the ancient armor it wore.

Thoroughly, he looked at the humanoid life form as though he was observing an incredibly precious treasure.

"Finally..." Sitting Mountain Guest mumbled to himself. "It has arrived."

He made his way forward one step at a time. Teleporting ahead, he very quickly landed on its body.

After his feet touched down on the vast, rolling mountain range, Sitting Mountain Guest took several steps forward. Every step was a teleportation. He reached the finger of the humanoid figure, then went on to the shoulder was, and eventually to the waist. There was a ruptured spot due to a wound—a place where something had broken through the armor.

Sitting Mountain Guest caressed the ruptured spot on the armor. At nine million light years long, it was impossibly huge.

“Ha...!” Suddenly, Sitting Mountain Guest let out a burst of hoarse laughter. “Haha! Hahahaha...!”

Sitting Mountain Guest laughed heartily and loudly. He was laughing so hard that his entire body trembled; he was laughing so crazily that, gradually, the laughter evolved into something bitter, forlorn, and shrill. It contained hysteria steeped in hatred and insanity.

The laughing slowly came to a stop. Sitting Mountain Guest sat down slowly, then caressed the armor. Golden, crystalline tears fell soundlessly.

“It’s here. It has arrived,” he said as he caressed the armor with trembling hands. “World of Jin!”

“The primal universe origin is known as the World of Jin?” Sitting Mountain Guest mumbled to himself. “Jin... Jin... The willpower of the primal universe origin has no emotions. How can it remember ‘Jin’?”

Sitting Mountain Guest raised his head to look at the vast void space overhead.

Hong! Long!

The chaotic airflow in the void space was revolving, and an overpowering willpower lurked there.

“I won’t be as foolish as Teacher Origin,” said Sitting Mountain Guest. “I will give you a chance.”

He shook his head, then took a single step forward and vanished within the void space.

Chapter 1344: Entering the World of Jin

1,800 years passed, and the membrane of the miniature universe, the “World of Jin,” kept changing from dark blue to light blue. And one day, it turned white. True treasure palaces floating outside the World of Jin started to move.

“It’s turned white.”

“We can enter now.”

“Let’s go.”

More than 200 great beings flew toward the World of Jin and tried to use their weapons to poke the membrane first. Then they realized that although the membrane was still exerting great power, godly bodies of universe masters could easily get through.

After confirming that they could get through, the first true treasure palace flew in. Other true treasure palaces followed, including Luo Feng’s Boat of Mausoleum.

The World of Jin seemed to have a diameter of ten million light years from the outside, and the great beings entered it from different areas so they wouldn’t gather.

Hong!

After the silver boat made it through the membrane of the miniature universe, it immediately rushed into the World of Jin.

Luo Feng's godly power sensed the inexplicable force around him. It was a power so pleasing that his entire soul was as cheerful as a fish returning to a lake from a desert. This amazing sensation mesmerized Luo Feng.

"It feels so good! There's no restraint at all." Luo Feng was happily surprised.

Rampaging Devil God was exhilarated.

"Hahaha! This World of Jin is awesome! There's no restraint at all, and I can utilize all my godly power!"

Xiu!

He drove his palace true treasure, diving downward. He landed quickly on an ancient and endless land. There were towering mountains around him. The sky and land were filled with energy, and compared to the chaos air in Universe Ocean, the energies made Rampaging Devil God much more comfortable.

"This is where great beings should live!" Rampaging Devil God was exhilarated. He roared. "How!!"

Hong!

A streak of light flashed, and it was 1,000 times faster than light speed. A being with three heads—one golden one and two silver ones—appeared in front of Rampaging Devil God. All the heads had giant fangs. The three tails were like barbed, metal whips.

The strange, giant beast looked down at Rampaging Devil God and roared, "F*ck off. This is my land!"

Rampaging Devil God could tell from the force of that strange beast that he was also a universe supreme master.

"A universe supreme master?" Rampaging Devil God was astounded. Although the ancestral gods had mentioned that there were creatures in the World of Jin, he was still surprised to discover that the first creature he met was a universe supreme master.

"F*ck off!" the strange beast roared in anger again, giving another alert.

Rampaging Devil God was even more dazed. He could understand the language, but he had no idea how to speak it! The language used by the strange, giant beast was very special; even if one hadn't learned it, he could easily understand its meaning. Rampaging Devil God didn't know how to speak it.

Rampaging Devil God opened his mouth, yet he didn't know what to say. "I... Ah, you. You—I..."

"How!!" The strange giant beast was furious. He didn't attack, as he could tell that Rampaging Devil Master was as powerful as he was, yet this individual—who was gleaming with golden light—ignored him as if he was provoking him!

Hong!

He turned into a streak of light, and three curves of light appeared in the sky left by the three tails of the strange giant beast. They swept toward Rampaging Devil God, who tried to dodge them. Suddenly, three giant gullies showed up on the ground.

Rampaging Devil God grew anxious. He wanted to transmit his voice using his godly power. Under normal circumstances, he could totally transmit his voice to convey what he was thinking. However, his blurry godly power was destroyed by the giant strange beast as soon as it was sent.

The giant strange beast grew more furious. "Soul attack?"

Rampaging Devil God felt helpless. He couldn't even transmit his voice. "I won't fight you," said Rampaging Devil God.

"Howl!" The strange giant beast charged at him.

More than 200 great beings from Universe Ocean arrived. They were exhilarated to get into the World of Jin, as it was a wonderful world. Of course, few were as unlucky as Rampaging Devil God, who had met a true god right as soon as he entered.

Hong!

The silver boat landed on a vast plain. Then it disappeared, and Luo Feng, clad in silver armor, showed up. He wore only Crazy Demon Extermination Godly Armor and he a pinnacle soul true treasure to protect his soul. He was also carrying Blood Shadow Blade. By all appearances, out of all his equipment, only Blood Shadow Blade was special. This was his first time here, so he hadn't brought his most powerful valuables.

"What a beautiful world." Luo Feng took a deep breath. A fresh, powerful force infused his body, and it was turned into godly power. "I can transform something into godly power that easily? In the original universe, I can only do that by using the law ocean. I can't believe I can transform the energies into godly power so easily. It is such a stable world."

Luo Feng's godly power trembled. There weren't even any ripples in the space around him. It was stable beyond Luo Feng's imagination.

"Beautiful, stable, and majestic..." Luo Feng was amazed. It was a perfect world, and it might actually contain the ultimate secret of Universe Ocean.

Sou! Sou! Sou!

A great being flew forward, stepping on the ground. He was fast and landed in front of Luo Feng immediately. It was a child with two black braids in his hair. He clutched a large piece of meat in his hands as he looked at Luo Feng.

"Outsider," said the child, "this is the land of Dry Wilderness Tribe. Why are you here? Are you one of the travelers our elders talk about?"

Luo Feng was shocked by the language spoken by the child. The indigenous being in front of him was very mediocre. He was merely an emperor undying. However, the language he was using was that which

had been used to document the information in the memory stones of Duan Dong River. Apparently, this was the common tongue of the ancient civilization. With the inheritance from the ancient civilization, Luo Feng had easily learned this language.

Luo Feng nodded and spoke in the common tongue. "That's right, I am a traveler."

"Wow! I want to be a traveler as well. However, I need to become a law knight before I can do that." There was envy in the child's eyes.

In the virtual universe, Luo Feng and Primal Chaos City Leader stood at the top of Thunder Island.

"I've entered the World of Jin," said Luo Feng. "I can confirm that it's an incredible and extraordinary world... It's far beyond our imagining, and the language they use is the common tongue of the ancient civilization. I know this language, Teacher. I'll leave the information about the language in the virtual universe."

"The indigenous creatures in World of Jin are using the common tongue of the ancient civilization?" Primal Chaos City Leader was startled. "Then the World of Jin might be a remnant left behind by the ancient civilization. No wonder there are secrets about incarnation transcendence in it. The language is indeed important. It is the most important factor in integrating with the indigenous creatures."

The World of Jin.

Luo Feng carried his blade, and under the invitation of the child, he headed toward Dry Wilderness Tribe. During his conversation with the child, he could tell that there were many beings who started to travel around when they became "law universe knights."

Law knights must be universe knights, thought Luo Feng. Law masters must be universe masters.

"That's our tribe." The child was excited.

"He!"

"Fly!"

Two beings standing 100,000 kilometers tall were fighting in the distance. One held a blade, and the other held a spear. They were hitting each other like gods. One was blasted away, rolled, and hit the mountainside in the distance.

A universe master. Luo Feng was thrilled. It seems they both have perfect life gene levels.

Hong!

"Kill!"

Luo Feng carefully tried to sense the area. He saw there were many more great beings fighting in the distance. They were all universe masters.

“The warriors of my tribe are training,” said the child. “There are a billion creatures in my tribe, and they’re all incredible warriors. They became law masters after countless battles.”

A billion creatures? Thoughts flooded Luo Feng’s mind. Incredible. It seems that it’s also difficult to become a universe master in the World of Jin.

He extrapolated as much as possible while he speaking with the child. After all, he knew nothing about the World of Jin.

Sou! Sou!

Luo Feng and the child kept flying closer to the tribe.

“Huh?” Luo Feng spotted three towering beings standing in the sky. They were all exceptionally powerful. They wore black armor and carried hammers and axes. Their forces permeated the area. “True gods! Three true gods!”

Luo Feng was shocked to have found three true gods so soon after entering the World of Jin. How powerful did that make the rest of the World of Jin? It was such an exceptional world, yet according to ancestral gods, the creatures living here would die instantly if they entered Universe Ocean.

It was a powerful world, yet it was under heavy restraint. There was, indeed, a huge secret behind this place. Luo Feng grew more cautious.

Chapter 1345: Wu and Jin

There were a billion members in the might Dry Wilderness Tribe. They had seen many creatures like Luo Feng who traveled around the world to sharpen themselves. It was so common that he wasn’t even received by the seniors of the tribe. However, he was still warmly welcomed by hundreds of families around the child’s family. Some great beings even came to fight Luo Feng.

“This race is obsessed with fighting,” Luo Feng sighed.

On a towering mountain, the strange giant beast and Rampaging Devil God were fighting each other.

Hong! Hong!

“Moron! Is that all you’ve got?” Rampaging Devil God roared. “Come, come, come!”

“You’ve angered me!” roared the strange, giant beast. “Angered me!”

Rampaging Devil God behaved even more recklessly and didn’t back down. He thought, I learned how to pronounce “anger.”

Great beings had great memories. Nobody had ever spoken that kind of language in Universe Ocean, so Rampaging Devil God couldn’t understand a word of it at the start. He listened to the pronunciation of that strange giant beast, and he could decipher the meaning of the common language of the ancient

civilization; he could infer the meaning that corresponded to each word. It was very easy to learn a language that way.

Rampaging Devil God kept provoking the strange giant beast as he attempted to learn the pronunciation of each word. After half an hour of fighting, he had learned the pronunciation of more than 300 words.

“You’re not strong enough. Not strong enough!” Rampaging Devil God yelled.

“Howl!”

The giant strange beast was furious. This outsider had armor to protect his body, so it was difficult to fight him. As for the giant beast, he moved without any burden, and he didn’t have any precious armor from the land he randomly occupied.

“I’m angering you, angering you, angering you!” Rampaging Devil God roared, using the word he had just learned.

The giant strange beast stopped. “Damn, damn you!”

Rampaging Devil God was joyful. He had just learned the pronunciation of the word “damn.” He wasn’t stupid. He had met a true god instantly after entering the World of Jin. Apparently, the indigenous creatures were powerful beyond imagination. It was important to learn the language, and the best way to learn it was to talk to a certain creature!

I’ll keep bullying you to force you to talk. I only seek to wrong you anyway, Rampaging Devil God thought.

“You... Damn you!” The giant strange beast looked up and roared. “Come here! This guy is a handful, and he has armor. Kill him and divide the trophies!”

The voice was transmitted via godly power, and the limit speed in the World of Jin was 10,000 times faster the speed of light in the original universe. After only a few seconds, great beings burst out from different places in the mountains, and they were all ferocious, strange beasts.

Rampaging Devil God looked around. 12 beings appeared in the sky, and all of them were true gods.

“You ask for help!” Rampaging Devil God roared and tried to retreat like a streak of light.

“Seize him.”

“Don’t let him run!”

“He has armor.”

“Capture him!”

The giant, strange beast and the 12 beings flew in all directions and encircled Rampaging Devil God.

There were many members in the Dry Wilderness Tribe. In one area, two beings were fighting like two streaks of light.

Peng!

Luo Feng's foot bore a gleaming golden light, and it struck the chest of his competitor like a burning star. The giant man rolled over and hit a hill in the distance. Rocks fell from the hill.

"Milky Way!" The rolling man flew over, holding a black stick. He roared, "That was impressive—I couldn't even resist it. I've fought many travelers who came here before, and none of them was as powerful as you."

Hundreds of children watching the fight in the distance all flew over. The leader of the children cheered. "Uncle Milky Way must have been to lots of tribes!"

"Haha!" Luo Feng strolled the leader of the child who was named "Zhen Mo E."

Luo Feng had been in the Dry Wilderness Tribe for three days. In that time, he had pretended to be a common traveler obsessed with fighting. He learned more and more about the World of Jin during this conversations and battles with the warriors from the Dry Wilderness Tribe.

First of all, the World of Jin was an enormous world. Luo Feng didn't know the actual number, but he knew that the World of Jin had a diameter of at least a trillion light years! Although this miniature universe looked small from the outside, it was much bigger inside—much larger than the holy lands. Only the original universe was bigger than World of Jin.

"The World of Jin is indeed incredible." Luo Feng looked at the little child, Zhen Mo E, beside him and sighed.

There were countless tribes in the World of Jin! They fought each other for territory to survive, and their warriors were extraordinary as well. Besides, all creatures born in the World of Jin would become undying when they matured! They took the energies from the World of Jin from birth, and as time went by, they mastered a law.

Everyone could become undying, and after some training, they could become law knights (universe knights). However, it was very difficult to become law masters (universe masters). Normally, only one out of 100 ordinary warriors (law knights) could become a law master.

As for true treasures, it was rarer. And those more powerful than true treasures were exceptional. However, based on his conversations with the locals, there must have been beings more powerful than true gods, as there was one in Dry Wilderness Tribe. He was the greatest being of the tribe, and he was also their pride and joy. It was their leader, "Dry Wilderness"! Because of the power of this leader, the status of Dry Wilderness Tribe was very stable.

"Incarnation transcendence, incarnation transcendence!" Luo Feng was excited upon hearing the news.

Surpassing true gods meant successfully transcending incarnations! There was a powerful being that surpassed true gods in Dry Wilderness Tribe, which meant there must have been lots of beings like this in the World of Jin. It was right for the powers from Universe Ocean to come to the World of Jin to look for chances of transcending incarnations.

On the sixth day of Luo Feng's stay in Dry Wilderness Tribe, he was talking to his best friend here, Northern Wind. "Northern Wind," he said. "I'm leaving."

"Leaving? Are you continuing traveling?" said Northern Wind.

Northern Wind was a highly gifted warrior, and the entire tribe believed he could become a true god! He was also the most powerful universe master that Luo Feng had fought. Of course, Luo Feng could still suppress him, which was why they admired each other.

"No! I'm joining the military this time." Luo Feng looked into the distance.

"The military?" Northern Wind's eyes gleamed.

"Yes." There was a measure of expectation in Luo Feng's voice. "I've been traveling for a long time, so it's time for me to join the military. I want to be stronger, so I want to join the military of the king. That's the best way. That's where countless great beings of the World of Jin gather."

After learning lots of information from the tribe, Luo Feng knew that the tribes in the World of Jin also called this world "World of Jin." Besides, the entire world had a common master, "Majesty of Godly King."

Luo Feng knew that the World of Jin was only one power that belonged to the great Majesty of Godly King, and it was for honing great beings. Only supreme beings were summoned by Majesty of Godly King, left the World of Jin, and fought for him.

To fight for Majesty of Godly King was the desire of all the indigenous creatures in the World of Jin. However, Majesty of Godly King hadn't taken supreme beings from the World of Jin for a long time.

Luo Feng was astounded when he learned this information. The entire World of Jin belonged a single king?

Because of the inheritance from Duan Dong River, Luo Feng knew that there were many powers in the ancient civilization. "Wu" was one such power, and the supreme leader of Wu was the so-called "Majesty." That was the information Luo Feng got from the inheritance.

The previous Duan Dong River was bestowed with the name "Wu," and it was an incredible honor. In the military of the World of Jin, only those most talented and bravest elites could be bestowed the name "Jin." And Majesty of Godly King hadn't summoned warriors from his World of Jin for a long time.

Luo Feng extrapolated that Wu and Jin must be different powers from the ancient civilization. Duan Dong River was from the "Wu" team; the World of Jin was from the "Jin" team.

Majesty of Godly King hadn't summoned great beings for a long time. The World of Jin was in Universe Ocean now, and it was in the human-shaped object. Luo Feng extrapolated that the great Majesty of Godly King from Jin might have died, and that human figure was Majesty of Godly King!

"That godly body is so powerful that it can crash Universe Boat. The shock waves can annihilate supreme true treasures, and the breath inside his body could annihilate supreme true treasures. That's a supreme being from the ancient civilization."

The ancient civilization was mighty. Universe Boat, Duan Dong River, the black-striped stone pillar, Boat of Mausoleum, Shi Wu Wing... He could tell from everything that had been left behind.

But even though the ancient civilization had been powerful, it hadn't ended well. The beings in the World of Jin were lucky to still be alive. However, they couldn't leave the World of Jin at all. If they did, they would die instantly.

The World of Jin was for cultivating great beings for the military, which was why a portion of warriors at the law master level would be taken away! They would spend a long time in the military, after which they could retire. If they were layoffs, however, they would be hunted by the entire World of Jin.

The military was the most powerful force in the World of Jin. There were lots of pieces of armor in the military. The so-called "supreme true treasures" were only outfits for true gods. There were also lots of inheritances. However, the elimination rates in the military were very high. And if someone was eliminated, he would die! It was so ruthless that fewer than five out of 100 who entered the military survived.

There were many benefits to joining the military; 99 percent of the great beings in the World of Jin, including those stronger than true gods, gathered in the military. The core secrets were shared only there, which was why Luo Feng had to go! He believed that with the inheritance from Duan Dong River, he could earn a place in the military!

"Are you going to the military?" Northern Wind roared. "Wait. There will be a group of warriors from my tribe going, and I'll join as well... We can go together."

"Oh?" Luo Feng nodded. "Then let's join the military together."

Chapter 1346: We Are the Rightful Protagonists

So, in order to set off together, Luo Feng waited at Dry Wilderness Tribe. However, what Northern Wind—a warrior from this tribe—meant by "very quickly" was actually a long period of half a year.

In the virtual universe, at the peak of Thunder Island, a group of universe masters from the human race had gathered, ready to discuss their plan of action regarding the fourth most dangerous land, the "World of Jin." Universe masters were steadily arriving, and the atmosphere was filled with enthusiasm.

"Have you heard that there is an existence in the World of Jin that transcends a true god?"

"I heard that within the World of Jin, there are many supreme true treasures!"

"Luo Feng, are there many universe supreme masters over there?"

Every one of these universe masters was extremely excited. Luo Feng was the only one from the human race who had entered the World of Jin this time. The other great beings were in no rush at all.

Hu!

Primal Chaos City Leader appeared. All the universe masters ceased to chatter as the place quietened down. Primal Chaos City Leader sat on the main throne with Luo Feng on one side and Darkness Master on his other side.

“Dear all,” he said. Seated on the main throne, his gaze swept across the crowd. “At this point, the World of Jin has been opened for some time. Other than our Hong Alliance, great beings from the various groups of top powers from Universe Ocean have also entered the World of Jin. The Hong Alliance has collected quite a bit of information; the other groups of powers have also gathered some information. After we have exchanged information and communicated with one another about certain information... Today, I will explain certain things before we decide on what approach we should adopt toward this World of Jin.”

“World of Jin...”

“Incomparably powerful!”

“But, in actual fact, it should be considered a fragment of the world of the ancient civilization,” Primal Chaos City Leader said. “The ancient civilization fell long ago. This World of Jin may be powerful, but its great beings who were natives of that world were eternally kept within the World of Jin. There is no way out alive. The humans... We are the true protagonists of this era.”

Luo Feng’s eyes lit up. In reality, when he had established contact with the World of Jin, he did feel the pressure, but now, hearing this... Indeed, the World of Jin could only be considered a large “cage.” The great beings inside—no matter how impressive they were—could not leave. Their era was a thing of the past. Now, it was his generation’s turn to be the protagonists!

“It, of course, will never truly be as powerful as the world of the ancient civilization in its entirety,” Primal Chaos City Leader said solemnly. “Yet it was, after all, a fragment of that world of the ancient civilization. To us, who are still very tender, this is definitely an opportunity not to be missed—and also, a challenge we should face up to. Now, from the human race, only Luo Feng stands alone in the World of Jin. Over there, universe supreme masters were known as ‘true gods.’ And the existences at this true god level... are aplenty. And of course, since these true god existences were considered to be supreme masters, they can occupy a small territory. But in the World of Jin, there are existences more powerful than true gods! So long as we can achieve that level, we can easily transcend reincarnation.

“Fighting! In the World of Jin, there is fighting everywhere. The core of the World of Jin is none other than its army—an army that belongs to a particular Majesty of Godly King. This army is formed by carrying out brutally stringent selection and elimination processes. Once a great being sets foot in there, all freedom is lost. He must adhere to military orders and undergo various cruel selection tests where the risks of annihilation are extremely high.”

Primal Chaos City Leader added most solemnly, “The various groups of powers of Universe Ocean have sent more than 200 great beings in, but solely from what I know, the number annihilated already exceeds 120!”

“What!”

“Exceeds 120?”

“So many?”

There were exclamations of shock all over the place, even Luo Feng was in shock. Primal Chaos City Leader had not mentioned anything about this to him.

“Yes.” Primal Chaos City Leader nodded. “In World of Jin, there are many tribes established in addition to the countless ancient tribes. There are many kinds of special life forms and various kinds of beasts entrenched in the wilderness. Walking about the lands in the wilderness is dangerous, as you may easily be attacked. The natives know of certain safe routes, but we don’t, which is why more than half the number of great beings were annihilated although they had spent less than half a year in the World of Jin after entering. No one has been accepted into the army yet! And already, more than half have been annihilated!

“If the final selections were made, it was said that the rate of annihilation would exceed 95 percent! Being part of the army, one can have access to the detailed guidance on cultivating to become an existence that surpasses a true god, but judging by the rate of annihilation, it is clear that throughout our entire Universe Ocean, there might not even be one who could finally achieve the level that surpasses a true god.”

Silence. The human universe masters who had been filled with enthusiasm and eagerness earlier all fell silent.

Even without being accepted into the army, many great beings were annihilated.

With the army in the picture... another batch of universe masters hoping to become universe supreme masters (true gods) would be further eliminated, and from true god to an even higher level, the army would not impart their information that easily, so the rate of elimination would be unimaginably high.

How cruel! Even Luo Feng kept mum. Indeed, it would be difficult. But he was confident!

“My human race already has the inheritance of the ancient civilization,” Primal Chaos City Leader said. “In that World of Jin, it qualifies to be regarded as a high-end inheritance. This is why we should not take the risk for now. We should just observe for the time being. With the passing of time, when more things about the World of Jin are unearthed, the secrets of the World of Jin will gradually surface... For those who earnestly want to go ahead, then only those with multiple bodies shall be allowed to venture into the World of Jin.”

“Hmm.”

“We have to be prudent.”

The universe masters started to cool down and were no longer as fervent as before. A true-blue great being was fearless—but not reckless.

Luo Feng also agreed with Primal Chaos City Leader’s suggestion. After all, based on what he had learned, there was no inheritance within the tribes. Should anyone want to become a supreme master, the only way was to be accepted into the army! This was the ironclad law of the World of Jin. Only upon being accepted into the army was one allowed to have the profound inheritance, yet even if they gained guidance, those returning great beings would not dare to impart anything within their tribes.

As for entering the army? It was too dangerous!

The tragic results of the first batch of entrants seemed to have poured a bucket of cold water over the various top powers. They had been filled with enthusiasm and eagerness earlier on, but the reality had awakened them from any wishful thinking.

Inheritance? Within the army, there was a profound inheritance, an inheritance that could allow them to transcend reincarnation, but were they able to survive the tedious selection process to get that inheritance?

Supreme true treasure? There were many in the army, but those were standard pieces of equipment made for true gods. How many true gods were there in the Universe Ocean? Not even 100. And if they were to join the army, more than 90 percent would be annihilated? Would there not be only less than ten true gods left in the entire Universe Ocean? Just to get hold of standard equipment? Just the thought of it could send shivers down one's spine.

"No rush!"

"We can only enter once every era, so we can take it slow."

"So what if the great beings who were natives of the World of Jin were very powerful? They are trapped in there for eternity. Those pitiful natives, still shouting about their loyalty to fight for their Majesty of Godly King. I think their Majesty of Godly King may have already been annihilated."

The various groups of top powers from the Universe Ocean seemed to have realized how powerless they were, so they took it as they were the protagonists of their era, while their opponents were merely pitiful creatures trapped in a large cage. They believed as much purely to console themselves—to feel better about their plight. After all, they were all top-tiered existences to begin with, but when they were in the World of Jin, they became ordinary great beings. Who would not feel terrible when subjected to such an extreme change?

World of Jin, Dry Wilderness Tribe.

Northern Wind was shouting for Luo Feng. "Let's go, Milky Way, let's go. We must set off now."

Luo Feng bade farewell to some friends he had made over the past half a year, then he speedily went over to meet up with Northern Wind.

"You must come back."

"Trust me."

"Do return."

"If you don't become a true god, you can forget about coming back to me."

There was much hustle and bustle as a big crowd of tens of thousands of people gathered consisting of good friends or children who were eager and full of hope. These children yearned to join the army when they grew up. However, the baseline for joining the army was that they needed to be law masters.

“Come up quickly!” roared a true god wearing a helmet. On his helmet was a pair of horns, one of which was broken. “Hurry!”

A dark red, huge ship was suspended above him. This ancient ship exuded a powerful aura. Raising his head to look up, Luo Feng saw that this ancient ship was a supreme true treasure.

“Back when Uncle Northern Rock was in the army, he had made a great achievement,” Northern Wind said with great excitement. “Thus, he earned himself this battleship. With this battleship, we will be much safer on our way to the army base. When I get to the army, I will ask for a bigger and more powerful battleship.”

Luo Feng said, “We should get something better. Much better than this.”

“Yes, something much better.” Northern Wind nodded.

The true god with a helmet, who was gathering his fellow tribespeople, turned back to look. With one wave, he gave Northern Wind a firm pat on his shoulder. His pat was so strong that Northern Wind’s body actually trembled slightly. “Well said. You are doing better than me! Wind! From our family of the Northern name... By far, you are the most outstanding one. Don’t put us to shame.”

“Yes, Uncle,” Northern Wind replied right away.

Luo Feng was a little taken aback by what he saw. How terrifying! One casual pat from this true god who had appeared so suddenly! He was worried that if that had been his shoulder instead, he would not have been able to dodge in time. This was undoubtedly a powerful true god—one who had survived the brutal stages of selection and even worthy enough to earn a reward. What might be a casual pat on the shoulder to this true god, from how Luo Feng saw it, in terms of how impressive its strength was, Luo Feng’s guess was that it would have reached the level of ninth-tier as the top.

“Let’s go!” Northern Wind called out to Luo Feng, who also following Northern Wind into the battleship.

One after another, powerful warriors from the clan were entering the battleship. Some started to howl loudly; apparently, it was a way to show that they were filled with boundless fighting spirit.

A short moment later...

The interior of the battleship was very simple. The huge cabin could house 800 lofty bodies, where each and every one was consistently at a height of 10,000 kilometers. There might even be some who were as tall as 100,000 kilometers tall, but none dared to make any reckless moves.

“This time, from my Dry Wilderness tribe, there will be 800 warriors joining the East Army!” Northern Rock True God stood in the forefront as he spoke in his forceful voice. “This time around, other than our tribe, there will be another brave soul joining us on our adventure—Milky Way! Given Milky Way’s power, among all 800 of you, none is comparable at all. If there is someone here who can get into the army and catch up with Milky Way, I will give this battleship to him!”

Suddenly, many warriors looked toward Luo Feng, and there was an air of provocation.

Luo Feng felt a sense of helplessness. He had become a benchmark. He might have sparred with quite a few great beings these days, but these 800 warriors came from different regions of the entire tribe, so there were many whom Luo Feng had yet to cross paths with.

“What are you all staring at?” roared the gigantic Northern Wind, who stood beside Luo Feng. “Even I am not Milky Way’s match! Let alone all of you!”

“What?”

“Even Northern Wind yourself is not a match?”

The simple-minded warriors who had been more provocative earlier on instantly looked at Luo Feng differently. Many of them were in shock and felt a newfound admiration for Luo Feng. The whole World of Jin was always respectful toward powerful great beings.

Northern Rock True God shouted, “All you young fellows! I’m not afraid to tell you all that back when I was still a law master, I joined the army with a batch of 800 fellow tribesmen, but in the end, only 21 of us made it back alive! And only three of us could finally become true gods! I truly hope that all of you here can be stronger than my batch.”

Instant silence.

Everyone knew how brutal life in the army was, but they were all gathered for the purpose of joining. And now, hearing what Northern Rock True God had to say, the pressure on them grew even heavier.

“True god? Not only must we be true gods, but we must become true gods of the void space!” Northern Wind bellowed.

“True god of the void space.”

“True god of the void space!”

Warriors of the other tribes suddenly started howling one by one. This was their dream. That was every warrior’s dream, and the entire Dry Wilderness Tribe only had one true god of the void space—it was none other than their tribe leader! All of them yearned to become an invincible true god of the void space.

Luo Feng stood aside in silence, with fists clenched, as he listened to the ongoing conversations. A true god of the void space? Based on the information he had, above a “true god,” was a “true god of the void space”!

Northern Rock True God’s lips curved upward as he saw the upsurge of fighting spirit from his tribe’s warriors. Then he shouted, “Let’s set off.”

Hong!

The ancient battleship swept past like flowing light and rapidly disappeared into the sky.

Chapter 1347: East Army

The World of Jin was enormous. The 800 warriors from the Dry Wilderness Tribe, including Luo Feng, sometimes teleported and sometimes flew fast, led by true god "Northern Rock." They met lots of dangers while traveling, and they surprised lots of warriors who hadn't journeyed in the World of Jin for a long time.

"I heard that Nine Smoke Marsh is occupied by the strange beasts of three true gods of void space," Northern Wind looked down and exclaimed. "And they lead many strange beasts. Even warriors from the east army will come to wage wars on Nine Smoke Marsh. No wonder! It's Nine Smoke Marsh!"

Luo Feng looked down as well. It was a vast marsh, and clouds and mist were flowing up in the air. Sometimes, strange beasts appeared in the mist, and there were a great many true gods. It was a power ten times stronger than Dry Wilderness Tribe.

"Three true gods of void space!" Luo Feng exclaimed.

It could be said that there were two kinds of powers in World of Jin: tribes and strange beasts. They all submitted to the armies! Armies were superior, but sometimes, to train the warriors, they would send ordinary warriors to fight those strange beasts and tribes. However, those fights were all just practice, so true gods of void space didn't need to meddle.

They kept moving forward. Even Luo Feng was amazed at how many powerful creatures there were in the World of Jin.

There are around 1,000 true gods in Dry Wilderness Tribe. As for Nine Smoke Marsh, there are 10,000 true gods, Luo Feng thought. There are countless tribes and strange beasts in the World of Jin. How many great beings are there in the army?

Northern Rock True God led the warriors, and they were in supreme true treasure ship, so they didn't encounter any dangers during the trip. However, they witnessed many.

After around three months, Northern Rock True God looked to the sky in the distance and yelled, "We're arriving at the East Army camp."

"East Army camp?"

The warriors all followed, including Luo Feng. They could see that the sky in the distance had forces permeating from it. With the ship moving forward quickly, it became much clearer. They could see the endless army camp.

"It's the East Army camp!"

Luo Feng was elated. He knew that there were four armies in the military: east, south, west, and north. Though they were all loyal to His Majesty the Godly King. And they were also competitors against each other.

"It's enormous!" the warriors from Dry Wilderness Camp all exclaimed.

It was amazing. In the boundless camp, soldiers were everywhere, standing close to each other. The most common ones were universe masters. Other than soldiers, there were also strange beasts who had

joined the army. There were many varieties of strange beasts, which dazed all the warriors, including Luo Feng.

“What’s that?”

“What...?”

“It’s so tall!”

The warriors all noticed those strange objects that were standing. Each was over 100 million kilometers tall. Compared to them, the warriors looked tiny.

“Huh?” Luo Feng also looked at them. They were strange objects over 100 million kilometers tall, and they looked like giant, oval-shaped fortresses. There were tens of thousands of oval-shaped fortresses. Other than those, there were also quite a few strange objects that looked like flying beasts.

“Those are machines!” Northern Rock True God exclaimed. “Those are machines built by machine soldiers.”

“Machines?”

“Machines that can be used by a large group of warriors?”

“Machines that can easily kill true gods of void space?”

The tribe warriors were all excited, and so was Luo Feng. Of course, he knew about machine-type valuables. He had heard about them from the inheritance from Duan Dong River, but he only knew about them. He only saw a few, yet those in the distance were all machine-type valuables.

“Can kill true gods of void space,” confirmed Northern Rock True God with a nod. “That’s right. Look at that oval-shaped machine. It’s called ‘Jin Luo Sky and Land.’ It requires at least one million true gods to fully control it, and it can hold ten million true gods... If it’s used, it can kill a group of true gods of void space.”

Luo Feng was amazed. Ten million true gods? It was a top-tier machine even judging by the standards of the ancient civilization.

“The best machine the World of Jin has made is Jin Luo Sky and Land,” said Northern Rock True God proudly. “The material is very simple, yet the power can reach the apex. Besides, it can be mass produced. The East Army alone has made many versions of Jin Luo Sky and Land. Even the warriors from all the armies need to use them. It’s still more than adequate. There are too many of Jin Luo Sky and Land. They are for His Majesty the Godly King, and they’re meant to be used for fighting outside. However, His Majesty the Godly King hasn’t summoned warriors for a long time.”

Luo Feng nodded.

Jin Luo Sky and Land was used for fighting outside. The fights inside World of Jin wouldn’t involve machines like that.

“See those small machines like flying beasts around Jin Luo Sky and Land? That’s ‘Jiu Xiu.’ It is also one of the best machines the World of Jin has ever made.” Northern Rock True God kept introducing the

machines. “Jiu Xiu needs at least 100 true gods to be driven, and it can hold at least 1,000 true gods. It is known for being fast and flexible! It’s also great at defense. Even though it only has one fighting technique, it’s a very useful machine in a large-scale war.”

Luo Feng nodded. Not all types of machines were suitable for large-scale wars. There were many great beings in the ancient civilization, and the large-scale wars between major powers could be horrifying. Some machines might be destroyed as soon as they entered the war zone. Machines were useful for the weak, but for ancestral teachers and godly kings, they were much less so.

To true gods and true gods of void space, machines were of great use! Great machines that were fit for wars could be mass-produced and some materials were indeed complicated.

His Majesty the Godly King might have died already, Luo Feng thought. Without the summons from His Majesty the Godly King, the army in the World of Jin can only keep making machines based on the previous order. They have to keep preparing and waiting for a summons, yet they might never be summoned. Those machines might be a waste.

Luo Feng shook his head. He didn’t want those machines. After all, they required too many great beings to be used. Jin Luo Sky and Land needed at least a million true gods! How was that possible in Universe Ocean? Even Jiu Xiu required at least 100 true gods, which was still over the capacity of Universe Ocean.

“The ancient civilization is indeed extraordinary.” Luo Feng sighed.

He wasn’t surprised that it was this powerful. The existence of Universe Boat had implied the supreme power of the ancient civilization. If Universe Boat utilized its full power, even 100 million true gods were nothing.

Unfortunately, Universe Boat is broken and has to stay there forever. The human shape, which might be His Majesty the Godly King, may be lying there eternally as well. The inheritors of Duan Dong River have all died, and I’m the only one left...

Luo Feng shook his head. It was cruel. He could still sense the influences of the ancient civilization in the World of Jin.

The East Army camp was enormous. A quarter of the tribes and strange beasts in the World of Jin joined the East Army, so there were warriors joining every day. The process was strenuous, which was why the warriors who came here for assessment formed a long line; there seemed to be no end.

Hong! Hong! Hong!

The spaceship landed on a plain. It could be said that two true treasure palaces landed in the distance as well. Apparently, they were carrying warriors as well.

“Quick! Come out! Hurry! Come out!” Northern Rock True God yelled.

All 800 warriors from Dry Wilderness Tribe and Luo Feng exited the palace. They came to the plain.

“Go and line up there,” yelled Northern Rock True God. “Wait for the elimination. Do not fail to join the army.”

Northern Rock True God was very familiar with the process, so everything went smoothly. The 800 warriors, including Luo Feng, immediately stood at the back of the long line and started to wait for their turn.

“Gosh, how long are we going to wait?” Northern Wind asked.

Luo Feng also looked to the front. There were so many creatures, and other than humanoid creatures, there were also lots of strange beasts in the line. Apparently, it was not only those from the tribes who were joining the army.

“There seem to be 800,000 waiting in line,” said Northern Rock True God, glancing around. “It should take around half a month before it’s your turn. Just wait here. There’s no need to rush. Prepare for everything that’s about to happen. Even the initial screening kills two-thirds of the candidates, and only one-third of them can successfully join the army.”

Luo Feng was astounded. Two-thirds died during the initial screening?

“Do not bring shame upon Dry Wilderness Tribe!” yelled Northern Rock True God. He then left and flew to talk to other true gods from other tribes. “Haha! Zan Xu Tribe, your warriors have also arrived. They seem fine.”

The true gods were talking with each other. Northern Rock True God didn’t rush to leave. He would wait, as he needed to see how many from Dry Wilderness Tribe would be able to join the army.

Time flew by.

The warriors from all the tribes and the strange beasts from all the lands were being screened. Roaring, yelling, and bellowing sounds were transmitted from the front of the line. Apparently, the screening process was ruthless.

Luo Feng was moving forward with the line. After half a month, it was his turn, along with the warriors from Dry Wilderness Tribe.

“Next round, 3,000,” roared a strange beast with a bloody horn. “Come in, all of you.”

3,000 warriors, including Luo Feng and those from Dry Wilderness Tribe, were led in. They were about to start being screened for the army.

Chapter 1348: Battle of Life or Death

All the 3,000 warriors and strange beasts were led by several true gods and headed toward that giant stone arch.

“Milky Way.” Northern Wind’s eyes gleamed, and he transmitted his voice. “Kill as many as possible. If you perform well enough, you’ll be selected into the special army.”

“Special troop?” Luo Feng was startled.

Northern Wind transmitted his voice. "There are many troops in the east army, and 99 percent are in the ordinary troops. Chances are none of the 3,000 candidates can get into the special troop. However, you're very powerful, so there's hope for you. Remember, we need to stay close to each other when we just get in."

Northern Wind and Luo Feng then followed the crowd and entered through that stone arch.

Hong!

The time and space immediately changed after they passed the stone arch. They entered a deserted plain, and there was sand everywhere.

"Where is this...?" Luo Feng looked around, and soon, the other 2,999 warriors and strange beasts also looked around.

They could see clearly an area of 100 million square kilometers, and it was darker in the distance. It was a desert.

The control over the time and space of the ancient civilization is perfect, Luo Feng thought. He was standing right beside Northern Wind, and the other warriors were also staying around them.

As they were looking around, an invisible force arrived, covering the entire desert. All the warriors and strange beasts looked up. A single-horned man in black armor appeared in the sky. He looked down with his cold, golden eyes. Suddenly, two beams of golden light shot out of his golden eyes!

Hong! Hong!

The beams hit the desert, becoming circles around 1,500 warriors and strange beasts. Then the group of warriors and strange beasts encircled on the left had a blurry red light, while those on the right had a blurry yellow light.

An invisible pressure covered everyone, and all were intimidated.

The force wasn't strong, yet its superiority and the trembling of godly power made everyone realize that the being in the sky wasn't a true god. Instead, it must have been someone at a higher level... A true god of void space!

Luo Feng looked up. A true god of void space? A being who could transcend incarnations?

The single-horned man looked down and yelled, "You will be divided into two teams! You'll try to kill each other and to kill as many as possible. When I tell you to stop, those who survive can join the military. Show all your power, and if there are any exceptional ones, you might be able to join the special troop!" Then the single-horned man yelled, "Begin!" and disappeared into the darkness.

Half of the warriors and strange beasts glowed in red light while the other half was yellow. They couldn't help feeling ferocious.

"Damn it." Northern Wind clenched his teeth.

Luo Feng glanced around. Although the warriors from Dry Wilderness Tribe all stayed together, almost 100 warriors were still encircled on the opposite side.

“No wonder Northern Wind told me to stay close to him.” Luo Feng looked around.

“Kill!”

“Howl!”

The warriors and strange beasts all started to roar and turned into streaks of light. The warriors from Dry Wilderness Tribe all knew well enough, not to fight those from the same tribe, and they chose to fight those from other tribes or lands, trying to kill them.

“Special troop?” Luo Feng’s eyes glinted fiercely.

He had three goals he wished to achieve in the World of Jin. The first one was to gather creatures from the World of Jin, especially bodies of true gods, for him to study the composition of creatures. It could help him achieve a life gene level of 90,000 times as soon as possible and become a true god.

The second goal was to learn about the secrets in Universe Ocean. And the third was to gather machine type valuables!

He knew about the ancient civilization, so he knew clearly that for the ordinary class—and even for the great beings class—machine type valuables were highly useful. Only when someone became a supreme being would machine type valuables be rendered useless. The more ordinary someone was, the more useful a machine type valuable would be!

A true god with a precious machine type valuable could rival a true god of void space!

Even though he had Boat of Mausoleum, that was only for defense. Shi Wu Wing was also an assistance type, and it was highly advanced. The complete Shi Wu Wings would be for highly advanced beings to use. Luo Feng needed those most suitable for him!

The east army had a great many machine type valuables—even ones that could be used by millions of true gods all at once, not to mention those used by individuals. Those within the second category were Luo Feng’s target. As long as he could obtain some of them, the humans would have a very strong and stable status in Universe Ocean.

However, he inferred that the original mind knew everything, yet it had still told the ancestral gods to guide them instead of stopping them. That meant the more powerful a machine type valuable was, the more difficult it was to get it. On his trip here, he hadn’t seen any true god obtaining a machine type valuable. That meant only those with special statuses could obtain them, not mediocre ones. Only those in the special troop could obtain them!

There were special forces in the army on the earth, and training was offered in the virtual universe company. The same rule applied here. There were countless soldiers in the army of the World of Jin, and it was normal that there were special troops who were equipped with special valuables.

Broken bodies and blood were scattered everywhere, and the great beings from both teams fought each other crazily.

“Kill!”

Luo Feng held Blood Shadow Blade and rushed toward the warriors and strange beasts. He killed everyone with a red light!

The blade light was gleaming and sweeping across the area. The time and space were very stable, so there were no space ripples even beneath the power so many universe masters fighting each other.

The World of Jin is a world where there is lots of fighting, thought Luo Feng. The ancient civilization has never ended here, so the great beings are generally more powerful than those in Universe Ocean.

He could tell that the weakest ones were at top-tier level four, while most of them could reach level five or even top-tier level five. As for Northern Wind, he was covered in gray, and each attack from him could reach level six. He was the center of Dry Wilderness Tribe, and he had a supreme true treasure armor.

“Kill!”

“Kill!”

During the fight, some great beings from other teams might make sneak attacks, which made the fight furiously! They were all universe masters, so it was difficult to kill someone in one shot. However, universe masters fought at high speed; it was not surprising that two-thirds died within half an hour, meaning the weaker ones needed to be careful and stall for time. All they needed to do was to stay alive.

The weaker ones were careful, but the stronger ones—especially the two with supreme true treasures—were trying to display as much power as they could. They wanted to be selected for the special troop. They included Northern Wind from the yellow-light team and a strange beast from the red-light team.

“Argh!” the strange beast roared and rushed toward Northern Wind. “Die!”

“You’re the one dying!” Northern Wind yelled as he rushed forward.

Hong! Hong!

The two of them fought each other, and after only a few attacks, Northern Wind was hit on the head and rolled away. He immediately stood up and clenched his teeth, shouting, “Burning godly power technique! My father is the master of Northern True Ocean! This is the power burning technique of Northern True Ocean.”

The strange beast with two wings was roaring, which upset Northern Wind.

Luo Feng, who had just killed a warrior from the opposite team, turned around and yelled, “Let me fight him, Northern Wind.”

Hong!

Luo Feng raced forward like a bolt of lightning.

“Great.” Northern Wind retreated. He had found this strange beast to be terrifying during his fight against him. It carried a set of supreme true treasures, and he had the godly power burning technique. Though there were rules in the military, and some inheritance information within the military was forbidden to be leaked, the elements comprehended by individuals were exceptions to the rule.

Northern True Ocean was a superpower among the strange beasts. There were nine true gods of void space in Northern True Ocean, and the leader was a mighty limit true god of void space. They all enjoyed high status in the World of Jin. Compared to them, the Dry Wilderness Tribe were nobodies.

“Die!” the strange beast roared and dashed at Luo Feng.

“Burning godly power technique?” Luo Feng sneered. It wasn’t anything new to him. There were many volumes in Duan Mie created by the three ancestral teachers, and universe supreme masters could learn the first three volumes! It was not uncommon for some great beings to create techniques like those of the first and second volume. After all, the World of Jin contained a rich inheritance from the ancient civilization as well.

“Slash!” Luo Feng’s shadow took on a blurry appearance.

Hua!

Luo Feng went to the back of that strange beast, and his Blood Shadow Blade turned into a thin trace of light. That light immediately expanded and became a miniature universe, enveloping the entire strange beast.

The killings were brutal, and with time passing, warriors and strange beasts died. But the most ferocious fight was the one between Luo Feng and the strange beast.

The strange beast had a set of supreme true treasures, and he had a godly power burning technique. Luo Feng had practiced for over eight million years, and in the space of inheritance, that was more than eight million eras. Over the course of eight million eras of training, his blade techniques and close combat techniques had been greatly enhanced. However, he wasn’t sure about the situation in the army, which was why he didn’t use all his power. After all, it would be incredible if he utilized all his power.

He was a talent that was cultivated by the inheritance from Duan Dong River. And in the World of Jin, all the precious inheritance was in the military. How could he be so powerful without the special inheritance? It was unrealistic! The military might carefully examine his background, which would get Luo Feng into trouble. After he learned more about the military, he could slowly increase the amount of power he demonstrated, improve his power, and get what he wanted.

“Your godly power is under 50 percent now. You’re not my match!”

Luo Feng was mad. His body moved fast as lightning. During those eight million eras, he had created a close combat technique, Flowing Gold, based on the close combat technique Blood Ocean created by the third ancestral teacher from Duan Dong River.

Peng!

The strange beast rolled and hit the endless sand. His godly body was at less than 50 percent, being ten times weaker than it had been at the beginning, and he was not Luo Feng's match.

"Stop!"

A powerful force arrived suddenly.

If the force before had been like a breeze, this one was like a mountain.

Hong! Long!

The universe masters who were fighting all groveled, including Luo Feng. They couldn't resist this power in the slightest.

Is this the power of a true god of void space? Luo Feng wondered in amazement.

The single-horned man walked down and looked around. 921 survived.

"You and you!" The single-horned man pointed at Luo Feng and that strange beast. "You two will join the Python River Army."

Chapter 1349: The Equipment of Python River Army

"Haha! We survived."

"We have made it into the East Army."

"That was one scary fellow with his blade. Luckily, he was engaged in a fight with Wu He from Northern True Ocean. If not, we would have been in deep trouble."

The warriors and beasts who had managed to survive were all highly excitable, with only a handful mourning the deaths of their fellow companions who had been annihilated. Since youth, they had witnessed the annihilation of scores of companions, so this was nothing new.

There was a legend that the whole World of Jin knew: Annihilation was the manifestation of reincarnation. The living souls of the World of Jin knew this by heart, so they would silently send their partners off with blessings and not be overly upset. After all, anyone on the path of great beings was destined for a high probability of annihilation! Just to enter the army, two-thirds would have lost their lives. What might happen thereafter was not a difficult guess.

"Hurry, hurry, hurry!"

"Let's go quickly."

In the desolated desert space, a huge, arched door appeared out of nowhere. From it, three true gods, all shouting at the top of their voices, walked out. The surviving warriors and beasts walked over obediently and immediately; after all, they were about to undergo the next round of selection.

"The two of you," said one of the true god warriors. He was clothed in dark red armor with a large tail and gazed at Luo Feng and his unusual beast companion with the single, red eye on his head. "Follow me. I will bring both of you to Python River Army."

“All right,” Luo Feng replied.

The unusual beast, which was badly battered, also replied, “All right.”

The two followed this true god, who was the first to head outside via the arched door.

“Milky Way, good luck!” Northern Wind shouted.

Luo Feng also turned his head to shout, “Good luck!”

Just like that, the two parted ways. Within the army, it was not up to their will to do as they pleased. Northern Wind’s ability was still far from the expectations of Python River Army. He might have been considered an elite, but he was not considered to be a true genius, so he would not be accepted into the army at the beginning. If he could demonstrate outstanding performance in the period that followed, there was a chance he could still be accepted into the special troop.

The only problem was that by then, it might no longer be the Python River Army but some other special army troop.

Luo Feng and the beast followed behind the single-eyed true god to fly within the vast army camp. They flew at the speed of light.

“All of space is completely sealed.” Luo Feng muttered under his breath. “Seems like within the army camp, it is impossible to teleport.”

“I am Wu He from the Northern True Ocean,” a voice resounded. “My father is the master of Northern True Ocean!”

Luo Feng turned around and grinned. “I am Milky Way! Everywhere can be home to me!”

“Oh!” This beast, “Wu He,” nodded his hideous head to show that he understood.

In the World of Jin, wars between tribes and wars between beasts were common and all too frequent. Some of the tribespeople lost their homes as a result and were forced to become refugees roaming about! Of course, there were some who were willing to roam about to hone their skills and abilities.

“You are very impressive,” Wu He complimented.

Luo Feng smiled and returned the compliment. “You are not too bad yourself.”

“There are many special troops within the East Army. Python River Army is just one of the many,” Wu He explained. “During the initial screening we had to go through when we first join the army, that is when they identify the extraordinary talents. It is extremely rare to be chosen for this special troop. In particular, the others will be further deployed to other troops... which is why, within a short period of time, the new recruits for Python River Army will only be the two of us. For those of us who have just joined the army, the veterans will look down on us. We have to join forces.”

“Join forces?” Luo Feng was shocked.

“The life of a soldier is a life of battle,” Wu He said. “These experienced warriors were accepted into the special troops because they were outstanding to begin with. They had their inheritance of the army and long-term cultivation. With these factors combined—along with the rich experience they gained from life-and-death situations that allowed them to hone their skills whenever they go out to fight battles—indeed, they will be very impressive.”

Luo Feng nodded to show that he understood.

Impressive? What a joke.

The warriors of Python River Army might have been really impressive, but compared to one who owned the inheritance of Duan Dong River, they were still a notch lower—unless they had automaton type treasures that could allow them to bypass levels and unleash stronger powers!

The army camp of the East Army was so massive that it was said to be endlessly vast.

Luo Feng and Wu He followed that single-eyed true god, flying if he flew and traveling via wormhole transportation if he did so. It took around half a day’s time to finally arrive before an incomparably towering hall. Inside, there were many people and beasts all over the place.

“The two of you, wait here,” the single-eyed true god ordered.

Luo Feng and Wu He obediently waited outside the towering hall while the single-eyed true god entered alone.

“What is this place?” Luo Feng asked Wu He, who was right beside him.

“This is one of the military points.” Wu He swayed his head, and the two wings on his neck were set to a fanning motion. “The military supplies for our Python River Army should be found here. Look, there are many warriors going in. They must be here to change their military arms.”

“Change their military arms?” Luo Feng was taken aback.

“Yes!” Wu He nodded his huge head as he said in a low voice, “All warriors relied on the various battles they fought to hone and train their skills! Time and again, training and honing of skills via life-and-death situations have seen to the annihilation of many warriors... For ordinary warriors, their chances of annihilation will be pretty high. But for us, warriors of the Python River Army, if we were subjected to situations involving the same level of danger, I’m afraid, not many will be annihilated. What we have to go through will definitely be more dangerous compared to them! Similarly, the spoils of our victory can be used to change for military credits, which can, in turn, be used to exchange for armaments. The more military credits, the more outstanding one is and the more benefits can be exchanged. You can even exchange for a group of true gods to form your personal team of bodyguards. This is also possible... Of course, the amount of military credits required is a fearsome sum.”

Luo Feng laughed. A personal team of bodyguards? What a pity that the natives would die the moment they stepped out of the World of Jin.

“There are also automaton type treasures here?” Luo Feng asked.

“Of course there are.” Wu He’s cold eyes flashed with a glimmer of excitement as he said, “There are many powerful automaton type treasures, but the amount of military credits required is outrageously high. The more magical these automaton type treasures are, the more precious they are! Back then, my father also managed to seize a powerful automaton type treasure. Even after he had retired from the fighting scene, he was still a dominating figure throughout the Northern True Ocean. However, to seize powerful automaton type treasures, even a true god will need an extremely long time to accumulate military credits. For us—mere law masters—the rate at which we accumulate military credits will be even slower. If we want to obtain those powerful automaton type treasures... It will be very difficult. Even if we manage to, it will take a long, long time.”

Luo Feng took everything to heart. It would take that long?

The World of Jin was an incomparably ancient world to begin with. A single reincarnation era might be regarded as a normal length of time in the World of Jin. After all, there were many true gods here, with quite a handful of true gods of void space. If even Wu He believed that this was a “very, very long” time... it seemed an extremely long period would be required.

And coming from Universe Ocean, time was what Luo Feng lacked.

“It has arrived.” Wu He looked off into the distance.

Luo Feng also looked over. They could see that from the military points of the great hall, the single-eyed true god was walking out. With a single wave, he sent two streams of rays descending to land before Luo Feng and Wu He.

“The two of you might only be law masters,” said the single-eyed true god, “but you are now entering the Python River Army, so you can get this true god level armor—a set of true god level Python River Armor—is actually just Python River Armor.” He gave Luo Feng and the beast, Wu He, a quick look. “It can allow you to stay alive for a longer period in the midst of a life-and-death battle, especially as new recruits. You will need to ensure that you can endure and live on. All right. Now, follow me to Python River Army.”

Luo Feng held the armor, feeling its oppressive force. True god level armor? In Universe Ocean, it would be supreme true treasure armor! Yet in the World of Jin, it was only the standard armor of a true god. Any warrior who was an ordinary law master would not be qualified to own this armor. For a special troop, however, things had to be a little more special.

“Seems like...” Luo Feng said quietly to himself, “battle armor is also divided into different levels, like true god level, true god of void space level... So obviously, supreme true treasures will also be different in strength—strong or weak. This must be an ordinary supreme true treasure. I suppose Black Prison Tower and Yan Jun Rod would both be regarded as ordinary supreme true treasures. Shi Wu Wings and Star Tower are obviously a little more special.”

The single-eyed true god looked behind him and swept through the surroundings. “Quick. Get the armor to recognize you as their masters and put them on! All warriors of Python River Army must wear that.”

“Understood,” Luo Feng replied.

“This is not even as good as mine,” Wu He said, transmitting the message only to Luo Feng.

Luo Feng laughed to himself.

When he had first come in, he did not even bring Shi Wu Wings or Star Tower, which meant he did have an urgent need for this Python River Armor.

“Getting it to recognize its master is easy.” Luo Feng speedily succeeded in getting the treasure to recognize him as its master. It was not very difficult—probably on the same level as Yan Jun Rod.

Hua!

He quickly stored Crazy Demon Extermination Godly Armor while the Python River Armor was rapidly appearing on his body. Soon, the dark red armor had fully appeared over his entire body. On the helmet was a skull modeled into the form of a “strange python.” There were also circular black lines all over the dark red armor.

Beside him, Wu He, the beast, had rapidly transformed into a dark red beast. On the surface of its body were similar black lines.

This time, Luo Feng and the others spent a full three days within the army camp and finally arrived before a vast lake. There were numerous islands on the vast lake—as many as trillions of them—and the diameter of the entire lake was so vast that it had to be measured in light years. At first glance, dark red figures could be spotted.

“One look at them, you know they are warriors of Python River Army,” Luo Feng said to himself.

All of them wore dark red armor, and on their helmets were the same strange python shapes.

“These are your new recruits for your Python River Army!” the single-eyed true god shouted. His powerful voice spread out to transmit the message to every corner of this vast lake. “Divide your large team into six smaller groups and assign them somewhere.” When he finished shouting his message, he shot a quick look at Luo Feng and Wu He. “Hopefully, I will still see you guys the next time around.”

Shua!

He transformed into a streak of flowing light and departed speedily.

Shortly after, numerous figures could be seen flashing in the distance. They appeared to be teleporting. Teleportation was impossible in the main surroundings of the external region, but in a certain area within that lake, it was possible to teleport! More than 20 figures were teleporting over very quickly, and soon, they were suspended in space beside Luo Feng and Wu He. Some were humanoid life forms while others took the form of beasts.

They were all scrutinizing Luo Feng and Wu He.

Wu He lifted his chin proudly as he shouted, “My father is the master of Northern True Ocean.”

Of the 20-plus figures suspended in the space above, a tall and burly man immediately replied, “In the army, your father cannot help you no matter how impressive he is. The two of you, report your names and tell us what you are good at.”

"I am Wu He!" Wu He roared. "I'm skilled in... I'm good in... Well, my godly body is big enough. My godly body is more than one million kilometers in length."

"Yes, you do have quite a big godly body," said the big, burly man. He looked at Luo Feng. "What about you?"

"I am Milky Way," Luo Feng replied. "I am more powerful than Wu He in terms of ability, and I am more skilled in close-combat evasion."

Beneath a gigantic pair of curved horns, the burly man's gray eyes gazed at Luo Feng and Wu He. "Both of you are gifted with talents that can be considered at the ordinary standard of my Python River Army. However, in half a month's time, six of our troops will be going out... It is just your luck. The two of you have to make full use of your time and train to the best of your abilities so you can brush up your skills! The moment you join us, you are met with a mission ranked at a 'catastrophe' level... How unlucky can you be?"

Chapter 1350: Catastrophe Level

"Catastrophe level?" Wu He was shocked.

Luo Feng looked at the group of soldiers in front of him. The giant man in the lead said coldly, "I am the captain of the sixth squad of the first team, and all the rules and knowledge of the army are in here. Learn everything yourself, and if there are no special occasions, don't disturb other teammates."

Then two crystal balls showed up. Each crystal was the size of a finger; Luo Feng and Wu He took them.

"Go back to training! Prepare!" the captain yelled.

"Yes," some soldiers answered, yet some other soldiers didn't respond. Apparently, the captain didn't have enough authority.

"I need to remind you that the catastrophe-level task is coming," said a clear voice. It was a female with green skin and green wings.

"Ku Fa, do you really think those two newbies can survive the catastrophe-level task?"

"Humph!"

"They haven't received the basic inheritance, and they don't have enough time to train themselves. How are they going to pass the catastrophe-level task?"

The other soldiers all shook their heads, teleported, and left. They didn't want to talk with Luo Feng and Wu He.

The captain took a look at Luo Feng and Wu He and said, "Prepare yourselves."

Shua!

He left as well. Only Luo Feng and Wu He stayed.

"It seems that we're unlucky," Luo Feng whispered. "Wu He, what does 'catastrophe-level' tasks mean?"

Wu He bellowed, “We’re very unlucky! The army will go out and do the task prepared every era, and we’ll be ordered to make attacks at a specific place. For every 10,000 eras, there’ll come a task that is very dangerous, and it’s at catastrophe level. For every 100 million eras, there’ll be a task more horrifying—at incarnation level.”

“Incarnation level?” Luo Feng was dazed.

“That means if you’re faced with that task, you’re going for incarnations.” Wu He glanced at Luo Feng.

Luo Feng smiled. Those in the World of Jin treated incarnations as death, which meant the incarnation-level task was indeed full of dangers.

“If we were in the ordinary army, then even the incarnation level would fine for us,” Wu He said nervously. “However, this is Python River Army. The ordinary tasks in Python River Army equal those of the incarnation level of the ordinary army. As for catastrophe level... That means a real catastrophe for talents like us. The incarnation level is a nightmare. Half of experienced soldiers will die during the incarnation-level tasks! By comparison, the survival rate in the ordinary army is much higher. Those who have been training for a long time in the ordinary army can become supreme beings among law universes. Those supreme beings can survive the incarnation-level tasks. The more powerful someone is, the most difficult the tasks will be. At the law-universe level, no matter how powerful we are, there’s a limit. However, the military task is very difficult, and many die!”

Luo Feng felt intimidated. Only a few out of 100 who joined the ordinary army could live long enough to retire. According to Wu He, special armies like Python River Army had an even lower survival rate. His Majesty the Godly King, from the World of Jin, had designed a mad screening process.

“It’s much more dangerous.” Wu He’s eyes glinted madly. “But it’s much easier for us to get a precious inheritance and powerful valuables! Those supreme beings in the World of Jin, like true gods of void space, were all selected from the special armies. As for ordinary armies? They’ll stay mediocre for their entire lives! My father is the master of Northern True Ocean. I need to become as powerful as my father, if not stronger.”

Luo Feng took a look at Wu He and smiled. “Let’s go. We need to choose an island to live on first.”

Complicated information was contained in the crystal balls, but there wasn’t much of it. It simply introduced the military rules and regulations to Luo Feng and Wu He, who immediately grasped them using their godly power. They also knew that this lake belonged to Python River Army.

There were three teams in Python River Army, and each team occupied an area of this lake. There were nine squads in the first team, and each squad had its own area. They could choose any island without an owner for them to practice on.

Hong!

They teleported and became streaks of red light flying across the sky above an island.

“Soldiers in the special army have different treatments, as they can occupy an island while other great beings are banned from entering it.” Luo Feng looked down and felt satisfied. As for Wu He, he chose a more distant island.

Sou!

Luo Feng quickly landed. The island had a diameter of more than 100,000 kilometers. It was only a small island. At the center was a simple, stone-made residence. If he wasn't satisfied with it, he could certainly rebuild it. Luo Feng didn't care about that, as he only needed a place to rest.

“Freeze.” Luo Feng's godly power spread, and he went to the deep area of the island. He touched a prismatic crystal stone and infused his godly power. The crystal stone's color changed.

From now on, the island had an owner!

On the roof of the stone-made house, Luo Feng lay in a stone chair. The stone chair was huge, and Luo Feng's godly body changed to 100 kilometers tall. He lay on the stone chair as if it were a bed. He looked into the distance and could see endless lakes and islands.

“I've entered World of Jin and Python River Army, the special army of the east army. One year later, there will be a task.”

Luo Feng was thinking about his path. Supreme true treasures? Machine type valuables? They both required military credits!

I really need blood and scale armors of true gods, Luo Feng thought. I need to get as many bodies of true gods as possible and take them back to the original universe.

In the past eight million eras, Luo Feng had devoted most of his energy to studying the composition of life forms. Humans were of flesh and blood type, so he would still be a life of flesh and blood type after he became a true god and all his bodies were combined as one. As a result, Luo Feng best understood flesh and blood type life forms. He could change the new Remote Ocean body into a flesh and blood life form using the structure of life genes, and he could make its life gene level reach 10,081 times.

However, Mosha body was an energy type life form, and Luo Feng hadn't spent much time on them. Although he had an elementary understanding, its life gene level was only at 5,000 times.

I've improved too slowly. I haven't even surpassed 10,081 times yet, let alone 90,000 times.

Luo Feng felt nervous. Based on his understanding, the higher a gene level was, the more difficult it was to get a higher gene level. His original life gene level was 10,081 times, so it would only take him a little time to analyze this level. He had succeeded in fully analyzing this level, and he had reorganized Remote Ocean body with a life gene level of 1,000 times. It was like turning wood into a diamond. He had changed the internal composition of Remote Ocean body, making it a powerful godly body at the perfect life gene level. However, surpassing 10,081 times and reaching 15,000 times or higher was much more difficult.

There were several levels. Level one was to surpass the perfect life gene level. Level two was to reach a life gene level of 30,000 times. Level three was to reach 60,000 times. Level four was to reach 90,000 times.

In terms of gene structure, true gods were far more advanced than universe masters, and they could provide more insights in terms of a breakthrough for Luo Feng. However, Luo Feng only had the body of Great Thunder Star Master and the hair and blood of Sitting Mountain Guest and Primal Chaos City Leader. That was far from adequate; he needed much more.

Luo Feng knew exactly the steps he needed to follow. First, he needed to analyze billions of life forms and billions of material structures. Second, he needed to create life forms.

Life forms that could procreate were the most difficult to create! The life forms Nine Remoteness Master created were born in the ocean. They were all energy life forms, so they couldn't procreate. Those were the easiest ones to create. If Luo Feng wanted to create life forms that could procreate, he needed to study the origin of life forms, which was far more complicated. Of course, it would help to analyze many life forms.

Luo Feng estimated that his godly body could at least evolve to a life gene level of 50,000 times. Only after reaching that level could he create life forms that could procreate, which could, in turn, help him move higher on the godly power path.

Bodies of true gods and military credits! Luo Feng thought. I'll go check the basic inheritance now.

Luo Feng, who had been lying on the stone chair, flew away like a streak of light.

There was a basic inheritance of Python River Army at the center of the island.

Sou!

Luo Feng immediately landed. There were pillars all around the island, and each pillar had a crystal ball. Wu He was shaking his head in the distance, and his body was winding around a pillar.

"Milky Way." Wu He let go of the stone pillar. His claws clenched the ground, and the wings on his neck fluttered. He flew toward Luo Feng like a streak of light. "What took you so long? The catastrophe-level task is coming. We need to spend as much time as possible to study the basic inheritance. Although it's a basic inheritance, it's still a lot. That's something even my father couldn't teach me, and it is precious! Those from the army need to exchange the inheritance for military credits. We're in the special army, which is why we can get a free basic inheritance instantly after we enter. However, the more complicated the inheritance was, the more military credits were required to get it. Be quick. I'll continue with my comprehension."

Wu He stopped speaking. Apparently, he wanted to fully utilize the time.

Luo Feng nodded. There were around 100 crystal balls on the island. He immediately spread his godly power and penetrated it into each crystal ball. Information flooded his mind.

"True treasure making, machine making, close combat, illusions, combinations, and burning godly power techniques."

Luo Feng was greatly surprised. He had expected the basic inheritance to be mediocre, but it was, in fact, very useful. Those combat techniques, combination techniques, and burning godly power techniques could all improve his fighting power. As for the training, it only covered how to become a true god.

Burning godly power techniques only had one level, like the first volume of Duan Mie. Based on the instruction, law masters could only learn the first level while true gods could learn the second level.

The inheritance after that required military credits to be obtained.
