

Chapter 1451: The Five Techniques of Sector Beasts

Struck by a thought, Luo Feng speedily deduced and came to an understanding.

Out of 33 Sector Beasts, one higher-stage Sector Beast could be born.

Based on this ratio, out of one billion first-stage Sector Beasts, slightly more than 30 million second-stage Sector Beasts could be born, one million third-stage Sector Beasts could be born, more than 30,000 fourth-stage Sector Beasts could be born, 1,000 fifth-stage Sector Beasts could be born, and slightly more than 30 sixth-stage Sector Beasts could be born.

“For now, the strongest ones within the Sector Beasts’ nest are fourth-stage Sector Beasts, and the majority of them are second-stage.” Luo Feng made a mental calculation. “Indeed, it is still the early stage of the evolution of the Sector Beasts.”

In normal evolution, it was necessary to wait until this reincarnation era was about to come to an end before the last king could be born. Yet the threat posed by Luo Feng accelerated this evolution.

“Morosa.” Luo Feng looked at the Sector Beast before him. “What are the powers of Sector Beasts like? Between the first stage and the sixth stage, what are the differences?”

Morosa replied deferentially, “For every breakthrough to the next stage achieved during evolution, a Sector Beast will get stronger than it was at the preceding stage. When it was just born, that is, at the initial stage after birth, it will only possess some basic means like splitting bodies to escape, or swallowing origins of miniature universes... These are the most basic means that all Sector Beasts are capable of.”

Luo Feng felt a sudden burst of pressure.

“The moment a Sector Beast crossed over to second-stage, its power naturally becomes stronger, and it will gain an additional supernatural prowess,” Morosa explained. “That is the ability to use the blood burning technique.”

“Blood burning technique?” Luo Feng responded. “That was the technique that you used previously, the move of shooting blood light with your eyes.”

He could still remember the first time he’d had to fight Morosa. He had used the Universe Chain to bind him. Yet, with both eyes shooting those bloody lights, Morosa had managed to break through the chains and had escaped. At that time, its power had been different by two levels.

Morosa replied deferentially, “That’s right, my Master. By burning up the blood within the body and transforming it to bloody light, my power will skyrocket! This is a commonly used combat method. Previously, when I crossed paths with Master’s Teacher, Primal Chaos City Leader, and his company, I was merely a Sector Beast at the level of second-stage pinnacle. Therefore, confronting them was extremely toilsome for me, and I had to execute the blood burning technique several times.”

Luo Feng nodded.

“The blood burning technique merely consumes the blood. It is not harmful to its origin,” Morosa said. “If a Sector Beast moves up to the third stage, it will acquire a method that was truly meant for escaping: Sector Light Passageway. This method seems harmless when not executed, yet the moment it is executed, the Sector Beast will be able to escape for sure almost all the time. But this method is, on the contrary, harmful to its origin.”

“This was the passageway that was filled with colored lights,” recalled Luo Feng. “The one that previously allowed you to escape via the method of instant transportation.”

Morosa nodded. “Yes, those colored lights are actually sector lights. The energy released when I blazed the ‘sector’ within my body. This is an energy of time and space, and it could instantly construct a passageway of time and space where I can transport myself away. However, burning up the sector... the sector is the origin of every Sector Beast. That previous time, I had initially thought that declassing myself from a third-stage to second-stage Sector Beast would suffice for me to escape; it had never crossed my mind that Master also has a method that allows you to exert your influence within time and space. Therefore, I was forced all the way back to be a first-stage Sector Beast just so I could escape.”

Luo Feng fell deep into thought. He had relied on “single-thought void space” to keep this Sector Beast suppressed. A single-thought void space had absolute control over that space. Therefore, it was naturally able to exert an influence over the Sector Light Passageway.

“What about stepping up to the fourth stage?” Luo Feng continued to ask.

Enslaving a Sector Beast was advantageous to him, as he could learn every single detail about the Sector Beasts and also understand all the methods they would deploy. Then, as much as he pleased, he could redeem any treasures from the World of Jin that would be useful in subduing the Sector Beasts.

“The moment a Sector Beast progresses to the fourth stage, the sector inside its body gets even more powerful.” Morosa sighed. “Without burning up, the sector light within its body can be dispersed to the outside world, thus affecting the outside world. The region that the sector light is scattered all over is known as Sector Light Domain! Within Sector Light Domain, the Sector Beasts’ control over the area is greatly increased, and their power will be exalted. Thus, humans like Master—yourself—would be bound to feel their influence.”

Sector Light Domain? Luo Feng started to worry. This seemed to be a little like a single-thought void space.

“If a Sector Beast progresses into the fifth stage, it will acquire a killer move with an implicit intention of destroying the origin,” Morosa lamented. “From birth, a Sector Beast never really possesses the true prowess to kill. The methods it knows only involve the consumption of energy, the burning of blood, and escape techniques—until, at this stage, it finally possesses a killer move. It is a technique named Destruction. This is why, advancing from a fourth-stage Sector Beast to a fifth-stage Sector Beast, there is a great leap in power.”

Luo Feng’s expression became solemn.

“How powerful?” Luo Feng asked.

“Once ‘Destruction’ is executed, destroying a miniature universe should be a piece of cake,” Morosa said.

Luo Feng muttered to himself. To destroy the miniature universe of a true god, an outburst of pinnacle combat power of a true god of void space was required. If he had relied on any secret technique on blazing godly power—or relied on Wu Qi God, Blood Ghost Blade, or Shi Wu Wings—he could still attain this level.

“How terrifying.” Luo Feng shuddered at the thought of this.

“This killer move only contained the partial prowess of destroying the origin,” Morosa said. “Only the true and last king of all Sector Beasts wields the complete prowess of destroying the origin. A fifth-stage Sector Beast... when it executes this killer move, it also has to pay quite a heavy price, as this is extremely energy-consuming. It might not be willing to execute it so easily.”

“What about the sixth stage?” Luo Feng persisted in asking about every single detail.

“The sixth stage...” Morosa said, momentarily startled. Then slowly, he said, “The moment a Sector Beast enters the sixth stage, it will almost be as good as telling the other Sector Beasts that all hope is gone. This sixth-stage Sector Beast will eliminate everything that poses a threat to it. Right away, it will kill all other fifth-stage Sector Beasts that might be a threat to it, and it will do so as early as it can. So long as it is not a foolish Sector Beast, the first to enter the sixth stage will almost certainly become the king.”

Even though it had been enslaved, Morosa was still quite obsessed with the title of king of the Sector Beasts. After all, since birth, it had been fated to live with the purpose of becoming king.

Luo Feng was quick to return with another question. “What is special about this sixth-stage Sector Beast?”

“In terms of ability, it would be slightly stronger than the fifth-stage Sector Beasts,” Morosa said. “Because it possesses a much greater amount of power, the technique Destruction can be executed a great number of times.”

“What is special about it?” Luo Feng asked without a pause.

There was something special about these Sector Beasts at each stage; it was no different for the sixth stage Sector Beasts.

“Ten million other bodies,” Morosa responded slowly.

“What?” Luo Feng’s mind blanked out for the moment.

“This is also why the first Sector Beast who becomes a sixth-stage Sector Beast is most certainly going to become the king,” Morosa said. “Crossing over to the sixth stage, the increase in combat power is not considered tremendous, but when equipped with the ability to execute technique of ten million bodies, the Sector Beast will be able to divide its body into ten million other bodies and scatter them all over Universe Ocean in its attempt to hide from enemies. Even if you meet one of the ten million bodies, fighting with it and killing it would only mean that you have gotten rid of one of its other bodies. It

would not have much of an effect on it. But, of course, out of the ten million other bodies, there will still be the original body.”

Morosa continued, “That original body will be the one with the strongest combat power. The other bodies are generally very weak... Those other bodies are not used for the purpose of battle, but rather, more for increasing the chance of survival. So long as there is one other body that remains alive, it will be able to rapidly absorb energy to restore power. Then, once again, it can recover back to the sixth-stage pinnacle. So even if the 100-plus fifth-stage Sector Beasts were to combine forces and kill the original body of a sixth-stage Sector Beast, after a period of time, another body of the sixth-stage Sector Beast, which has been absorbing energy, would once again appear...”

Luo Feng found it all so crazy. A Sector Beast gained a new ability each time it went up one stage. By the time it reached the sixth stage, it would gain the ability to execute “ten million bodies.”

“How do I kill it?” Luo Feng asked.

“First,” Morosa began, “by killing the soul! So long as you manage to attack and kill the soul of any of its bodies, all the other bodies will be annihilated once and for all. And, of course, for the sixth-stage Sector Beast, its soul will be incomparably powerful... Even for you, my Master, it is impossible for you to kill its soul. At least for now.”

Luo Feng nodded.

“Second,” Morosa continued, “kill all the fifth-stage Sector Beasts that pose any threat to you. Killing all the leaders within the pack will ensure that no sixth-stage Sector Beast can be born.”

Luo Feng understood. It was a precautionary measure.

“Third,” Morosa went on, “is through the influence of fate.”

“Fate?” Luo Feng was befuddled.

“Mmm.” Morosa nodded. “The fate for all one billion Sector Beasts is ultimately to give birth to a king, so there are a few ironclad rules that must be adhered to. For instance, after a sixth-stage Sector Beast is born, if another sixth-stage Sector Beast emerges, the two must fight one another to the death. Even all their other bodies must be involved. The victor lives on while the defeated one shall be annihilated. This is why, for sixth-stage Sector Beasts, no matter what, there will only be one who truly lives at any point in time. Two sixth-stage Sector Beasts fighting one another to the death—this is an ironclad rule.

“There is also a specific time limit in which all the living Sector Beasts must fight one another in life-and-death battle. This is the final time limit. Or, for instance, if there are only two Sector Beasts remaining, where one is at the fifth stage and one is at the fourth stage, then they must fight one another... The surviving one becomes king.”

Luo Feng was shocked to learn this. “You are saying that a fifth-stage Sector Beast can also become king?”

“Yes.” Morosa nodded. “Our fate dictates that out of one billion Sector Beasts, the final one standing will be king, regardless of whether it is at the first stage or the sixth stage. In the end, there is one survivor! So long as the others are dead, only one needs to survive. It will be speedily exalted to the

position of king. Of course, under normal circumstances, the final one standing will be a sixth-stage Sector Beast.”

What Morosa said weighed heavily on Luo Feng’s mind. These creatures were truly worthy of representing destruction. Even without a king, they were already so terrifying.

Crossing over to the second stage, there was the blood burning technique. Crossing over to the third stage, there was the Sector Light Passageway technique. Crossing over to the fourth stage, there was the Sector Light Domain technique. Crossing over to the fifth stage, there was the Destruction technique. Crossing over to the sixth stage, there was even the ten million bodies technique.

What would it be like if one of these Sector Beasts actually became king?

“The moment a king is born,” Morosa said with a heavy heart, “no one shall be able to stop it! Master, even if you are ten or 100 times stronger, you will still be unable to stop the final king. This is because the king of Sector Beasts does not actually need to be present to make a move. It is able to breed many powerful warriors, and any single one of these warriors is already more terrifying than a sixth-stage Sector Beast. Even if you managed to defeat one, it would breed another warrior that will be stronger than it was. In the end, you will be the one being annihilated.”

Luo Feng finally understood that the willpower of the origin held him in high regards. Given the potential and power of the Sector Beasts, even without evolution, ten million of them would be able to subject the various races of Universe Ocean to tens or even hundreds of rounds of extermination.

Relying on the other great beings of Universe Ocean, there really was not a trace of hope. Even for him, there was only a single trace of hope! But the greater possibility was extermination.

“Master,” Morosa said solemnly. “I have one more matter I need to inform you about. This matter is of the utmost importance.”

“Hmm?” Luo Feng was taken aback.

Morosa continued gravely. “From the moment I came under your command, millions of Sector Beasts from our Sector Beast nests caught wind of the news. This is because all of us Sector Beasts are able to detect one another, so they are all able to detect current goings-on. From that moment, all the Sector Beasts became extremely angry. They see Master as their greatest enemy! At the same time, I also became their greatest enemy, and everyone will want to kill me and you, my Master. Also, their evolution will certainly be greatly enhanced... Master, you must deal with those Sector Beasts as soon as possible. If we delay for too long, I’m afraid we might allow the births of too many fifth-stage Sector Beasts.”

Chapter 1452: Final Preparation

“The biggest enemy?” Luo Feng was terrified.

“Yes!” said Morosa. “Master, you should know that every Sector Beast is very proud of themselves, as all of them think Sector Beasts are the noblest creatures in Universe Ocean. However, I am working for you

now. Being furious or intimidated by your power, they will treat you as their ultimate enemy, and they might even join forces to fight you. They're already evolving at peak speed now. Master, you can't waste any time."

"How much time do we have?" Luo Feng asked, frowning.

"Originally, it will take at least several trillion eras for the ultimate king to be born," said Morosa. "As for now, it might only take around several hundred thousand eras. Besides... Master, you should act as soon as possible because the Sector Beast standing at the peak grows the fastest. Beddy is now at level four, and if it keeps swallowing, it can totally reach level five in ten eras. And in the next hundred eras, it is likely to reach level six! And when it reaches level six, it'll kill all the other Sector Beasts as soon as possible. Which is why, master, you'd better act soon. Ideally, in the next era. The sooner, the better."

Luo Feng was pondering what Morosa had just said.

"Okay."

In World of Jin, far away the godly powered avatar of Luo Feng was still in the military camp of the East Army.

"Has it begun?" whispered the godly powered avatar. "The five laws of Sector Beasts. It's indeed a catastrophe."

He then triggered the ring of military points on his wrist.

Weng!

The space around him changed, and it became a vast world of military arms. A golden being arrived and said respectfully, "Mister Milky Way."

The godly powered avatar nodded. "Give me a list of all the true god level valuables."

Although there had been more than one trillion eras, Luo Feng hadn't made a large amount of exchanges yet. There were many different valuables within the human race, but those only cost Luo Feng a small part of his military credits. He had obtained a large number of military points from Swan Queen and Fire-Polishing Wu. However, he hadn't exchanged them for valuables yet, as he wanted to prepare for the Sector Beast crisis and obtain valuables that were actually helpful for the situation.

Now, he had obtained lots of information from Morosa, so he could convert the military credits into valuables useful for dealing with Sector Beasts. Besides, he could always resort to the Godly King of Jin in Wu Qi Tower, and it wouldn't be difficult for him to get a valuable.

In Milky Way Holy Land in the original universe.

Hong! Long! Long!

The space cracked as if the apocalypse was coming. A space-and-time portal was formed. Luo Feng, dressed in a white cape, stood there, manipulating everything.

“Freeze.”

A giant but dark door was floating there. It was the entrance of the universe portal, which led to the miniature universe of Luo Feng.

Luo Feng gave an order. “Guard the portals. Don’t let anyone damage it.”

“Yes,” answered the three true gods and over 100 universe masters.

Luo Feng nodded, feeling relieved. In the time since he had enslaved Morosa, he had built three universe portals after returning to the original universe, and they were all portals leading to his miniature universe. To the great beings from the human race, they all thought that Luo Feng had the biggest chance of transcending incarnations!

Luo Feng’s miniature universe was indeed enormous—1,000 times larger than those of great beings at the same level! Which meant it was able to accommodate far more great beings. When this universe era was over, many humans would move to the miniature universe of Luo Feng, so three portals were far from enough.

“You guys are responsible for everything in Milky Way Holy Land now,” said Luo Feng. “You can decide on the common issues, and if something important comes up, report it to Primal Chaos City Leader. From now on, I won’t see anyone until I come out.”

“Yes,” the great beings answered.

Luo Feng turned around, took a step, and disappeared from the space. He had already entered Star Tower, where he began the most crucial training.

Inside Star Tower, Luo Feng sat with his legs crossed, contemplating.

I need to get to the hive of the Sector Beasts as soon as possible, he thought. I’d better leave in one era, and in this era, I must finish “Undying River!”

This crisis concerned billions of races in Universe Ocean. Luo Feng didn’t care about the other races, but he held the human race and the earthlings dear. To protect his teachers and family, Luo Feng was willing to die, if that was what it took.

If I can finish Undying River, I can revive myself even if I get killed. I can’t lose this fight. I have to finish Undying River.

Luo Feng closed his eyes and started to practice one of the three secret techniques of Duan Dong River: Undying River.

Before completing Undying River, Luo Feng wouldn’t dare to journey to the horrendous hive of Sector Beasts. After all, there were over ten million Sector Beasts in the hive. If they teamed up and attacked him, he would be easily annihilated. When the quantity was large enough, it could make up for the quality.

Time passed. One year after another went by.

Beside the black-striped stone pillar, time was passing ten million times faster than outside, and Luo Feng kept exploiting his potential. He kept perfecting his comprehension and techniques, studying the Divine Eye Secret Technique and Lie Yuan Technique. Although he wasn't strong enough to practice Lie Yuan Technique, he needed to comprehend it, and then, when his willpower reached the holy level, he would be able to finish practicing it in one shot.

Wu Qi God, Shi Wu Wing, and Star Tower... These were three of his most important valuables, so he needed to pay more attention to them.

Inside Luo Feng's miniature universe.

Inside the chaos air, Luo Feng, clothed in a white cape, was walking among the air. He quickly entered the origin of the universe.

Luo Feng looked at the 100,000 stars floating in the space of origin, and the whirlpool space at the center of the 100,000 stars. He smiled and waved his hands, and a drop of golden blood appeared. There was golden light gleaming on the blood, and there seemed to be a screen of light covering it. Engravings flowed on the screen.

"This drop of blood contains my complete life imprint," muttered Luo Feng. "If I die, this drop of blood will be able to absorb energy, and I can be revived. I can only make one drop of Undying River blood in over 1,000 years."

Luo Feng looked at that drop of blood, which flew into the whirlpool space. It kept spinning relentlessly in the whirlpool like all those 100,000 stars.

"One drop is enough. Even if I die, I can still be revived with this drop. When I am resurrected, I'll just make another drop of blood."

Luo Feng turned around and left the space of origin.

1,890 years after Luo Feng enslaved the Sector Beast, two beings stood in the space outside Milky Way Holy Land.

"Are you going to go to the hive of the Sector Beasts alone without telling anyone?" Primal Chaos City Leader was surprised.

"No need to tell anyone else." Luo Feng shook his head. "If I succeed, then let's tell others. But if I fail, we had better not tell anyone..."

"Don't you need to say goodbye to your family...?" Primal Chaos City Leader asked, hesitating.

"No need." Luo Feng shook his head. "I am just here to tell you, Teacher, that I'll be alive whether I succeed or not. There's no need to worry my wife and family members. Only you should know about it, teacher."

Primal Chaos City Leader nodded. Luo Feng then stopped talking, then took a step and disappeared.

Primal Chaos City Leader stood in space, silent for a while. Then he whispered, "Please, come back alive!"

Even though Luo Feng had said with certainty that he would come back alive, Primal Chaos City Leader was still worried sick. It was the hive of Sector Beasts, after all.

On that day, Luo Feng left for the hive of the Sector Beasts. Other than Primal Chaos City Leader, none of the great beings in Universe Ocean knew about it.

In the vast Universe Ocean, Star Tower was progressing forward, teleporting. The destination was the fourth Land of Extremis, the World of Jin. He had chosen to go in the 1,890th year because the World of Jin would be opened again at this time, meaning he could enter again. He had decided to go to the World of Jin and convert his military credits into lots of valuables first.

"Morosa." Luo Feng looked at Morosa at his side. Morosa was all he had now.

"Master," said Morosa. "You're going to the World of Jin now. I can travel there with you. However, when you go to the Land of Darkness, I can no longer enter. All the Sector Beasts would be able to sense my presence... If I go there, it means I leak your presence to all the Sector Beasts. I need to stay in Universe Ocean so I can sense the traces of the Sector Beasts. Then I can notify you at any time."

Luo Feng nodded.

After he brought back the valuables from the World of Jin, he would put the Sector Beast in his miniature universe. No matter how far he was from the miniature universe, he could know exactly what happened there. If Morosa spoke in the miniature universe, he would know, even if he was in Land of Darkness.

"Wait," asked Luo Feng. "Morosa, I'm going to the Land of Darkness now. If you're not going with me, you can go to Purple Moon Holy Land. I'll arrange for one of my godly powered avatars to position Boat of Mausoleum outside Purple Moon Holy Land. No one in Purple Moon Holy Land can do anything about Boat of Mausoleum... In your Boat of Mausoleum, just start swallowing—swallowing that Purple Moon Holy Land. As you swallow Purple Moon Holy Land, you can also sense what is going on in the hive of Sector Beasts, and you can also tell my godly powered avatar. When my godly powered avatar knows, I'll know about it as well."

"Okay." Morosa was eager, as it craved delicious food.

Luo Feng's eyes glinted ferociously. Purple Moon Holy Land was of no use when it came to dealing with Sector Beasts. Now that it was useless, and since Purple Moon Holy Land was already his mortal enemy, he would just get rid of it.

"However, it'll take me a long time to swallow the origin of Purple Moon Holy Land," said Morosa. "Purple Moon Holy Land is more powerful than the miniature universes of normal true gods, and it has strong resistance. I can only swallow it 1/100th as fast as miniature universes of true gods, and it's enormous. It might take me a long time to completely swallow it—perhaps 100,000 years."

Chapter 1453: Treasure Evaluation

“So long?” Luo Feng frowned, thinking carefully.

True enough—Purple Moon Ancestor was a true god of void space whose miniature universe must have been bigger than his! Morosa was currently only a second-stage Sector Beast. Its speed of devouring was much slower than before. Indeed, it would require around 100,000 years.

“Master, do you want me to devour the origin of his miniature universe?” Morosa asked, primed for action.

Luo Feng shook his head. “Forget it, for the time being, we will just let him have a good life for a little while longer. Previously, when I was at the Sector Beasts’ nest, there were enemies everywhere. There was no way I could stay for long. After spending a short period of one year there, I had to leave there and return. If I could stay for as long as 100 years, that would have been beyond expectations... Morosa, you shall remain within my miniature universe and be on standby at all times. Wait for me to give orders.”

Although he really wanted to destroy Purple Moon Holy Land, the Sector Beast crisis was his top priority.

“Understood.” Morosa was most reluctant to let things be, but still, he had to respect and obey Luo Feng’s orders.

From inside Star Tower, Luo Feng looked toward the void space in the outside world. He was looking in the direction of Purple Moon Holy Land as he silently said to himself, “For now, time is of the essence. I don’t have time to haggle with you... When I am done with the more important matters, it will still not be too late to eliminate you.”

As for failure? Luo Feng could not be bothered to think about it too much. If he truly failed and his miniature universe devoured, everything would be destroyed. By then, Purple Moon Holy Land would be the least of his concerns. Besides, if there was a great extermination, Purple Moon Holy Land would definitely be wiped out. After all, the Sector Beasts would not take Purple Moon Holy Land in even if Purple Moon Holy Land had decided to seek refuge with them. Purple Moon Holy Land did not have any opponents that appeared to be a threat whatsoever, and such a big holy land universe was definitely going to a delectable feast; why would the Sector Beasts give up such good food?

Shua!

Star Tower executed a super long-distance teleportation and continued to advance toward the World of Jin.

After no longer than half a day, Luo Feng, who was onboard Star Tower, entered the godly body of that massive life form that seemed to be His Majesty the Godly King. He arrived outside the miniature universe of the World of Jin and waited in silence. He was awaiting the moment when the membrane walls would start to turn white.

Time passed. Another half a month had gone by.

“It’s changed.”

Luo Feng looked into the distance. The membrane walls of the miniature universe within the void space had completely changed to white. What was different from before was that, after a trillion eras, the number of great beings entering the World of Jin dwindled to only a few because all those great beings who could obtain treasures had, for the most part, gotten what they needed. Those who were not so powerful had either retreated or been annihilated.

The number had grown fewer, and after so many eras, a great being might only be seen entering the World of Jin once in a blue moon. And these were mostly newly emerged universe masters from the primal universe who had come in search of adventure. This time around, other than Luo Feng, there was no one else.

Sou!

Star Tower flew over rapidly. Right away, it penetrated the membrane wall to enter the World of Jin.

Surrounded by a vast blanket of clouds, Star Tower charged through the mist to make a hasty descent. Not far away, there was a ship parked amidst the clouds.

“Keep.” The white-robed form of Luo Feng appeared. Star Tower fell into his palm, and then Luo Feng headed straight for the ship. The cabin doors automatically opened to welcome him in.

This ship was maneuvered by the godly powered avatar he had left behind in the World of Jin all this time. Naturally, it had brought along a great number of treasures with it.

Inside the cabin room, the godly powered avatar sat cross-legged in a corner. The supposedly empty floor next to it was occupied by a great number of treasures. Most of them were automaton-type treasures. There were also some other supplementary treasures.

Hua!

The moment Luo Feng arrived, with a wave, he stored all these treasures right away.

“With these treasures, in when my battle with the Sector Beasts... success is within my grasp.” Luo Feng revealed a slight smile.

At the same time, he was struck by a thought. Beside him, the ring of the military point on his godly-powered avatar’s wrist was activated right away. Instantly, his surroundings transformed into the World of Military Arms. It was vital to note that so long as one was within the World of Jin and used the ring of the military point, entry into the World of Military Arms was immediate. This was the advantage of the ring of the military point. However, ordinary warriors did not qualify for the ownership of this ring of the military point.

Hua!

There was a change within the surrounding space. Then a golden figure descended from high up in the sky.

“Lord Milky Way,” the golden figure greeted with deference.

Luo Feng nodded. “Please help me to evaluate what level this treasure belongs to.”

A ray of light was detached from Luo Feng's body where it was directly suspended afloat. It had five pairs of wings that were all widely spread, exuding a limitless, oppressive force. This was one of Luo Feng's important treasures: Shi Wu Wings. This was one of Luo Feng's first treasures. He had obtained it a long time ago. Combined with various other components, the strength of power it could demonstrate far surpassed all the treasures he had obtained in the World of Jin.

However, in all this time, Star Tower and Shi Wu Wings had never been evaluated while in the World of Jin; this time around, since Luo Feng was here to take away such a large number of treasures, he decided he might as well have them evaluated. Of course, Luo Feng personally felt that Star Tower and Shi Wu Wings would absolutely surpass Wu Qi God.

"Understood," the golden figure replied respectfully.

Buzz!

Both eyes of the golden figure shot golden rays that shrouded Shi Wu Wings. Streams of rays brushed across every possible spot.

Ang!

The golden figure became a wondrous display with its entire body lit by rays. Countless light rays shot out of it and shrouded every inch around Shi Wu Wings as they probed and explored most thoroughly.

Within Godly King Valley, in the faraway World of Jin, at the top level of Wu Qi Tower.

At that moment, the virtual consciousness of the Godly King of Jin suddenly turned its head, and, deep in thought, it looked far into the distant void space in a particular direction. That direction was where Luo Feng was evaluating his treasures.

"Milky Way?" The Godly King of Jin was shocked. "Other than the treasures from the Jin Dynasty, I did not expect this Milky Way to also possess treasures from the Wu Dynasty... It seems he must have experienced some extraordinary encounters."

"But..." Godly King of Jin smiled. "It is better if he is stronger and has a more complicated background..."

Luo Feng was filled with anticipation as he watched. Up until now, even he did not know where Shi Wu Wings had truly come from.

As for browsing through the information vault of the World of Jin? The quantity of information in that vault was massive. Luo Feng did not have the stamina to go through everything. He had mainly accepted some of the important information about the inheritance, and that had been enough for him.

"Lord Milky Way." The golden figure retracted all the light rays. Then, with great respect, it said, "This wing is an automaton-type treasure. It seems to be a prized possession of the destroyed the 'Wu nation,' and it was originally called 'Chaotic Golden Wings.'"

"Destroyed the Wu nation? Chaotic Golden Wings?" Luo Feng was taken aback.

His Shi Wu Wings had actually originated from the Wu nation? The previous Duan Dong River had been known as Duan Dong River Wu... Yet now, from the sound of it, the Wu nation had been destroyed long ago.

Why would his teacher, Primal Chaos City Leader, come up a name like “Shi Wu Wings” when this was originally a wing from the Wu nation itself? It seemed his teacher had learned something that had benefited him back when he first discovered that first incomplete part of Shi Wu Wings. So, when his teacher had to think of a name for this wing, he had gone to the extent of including the character Wu within the name.

“Chaotic Golden Wings contains a total of six pairs of wings,” the golden figure said most courteously. “It currently consists of five pairs, so it is considered to be in an incomplete state. It is missing its sixth pair of wings.”

“Before it was destroyed,” the golden figure continued to elaborate in a respectful tone, “the Wu nation, during its most prosperous time, was slightly stronger than my Jin nation. The Wu nation was most skilled in creating automaton-type treasures. In the battle of superpowers in that ancient civilization, the outcome mostly depended on the troops. An endless army, paired with a large number of automaton-type treasures... could execute attacks that were so powerful that even those who were regarded as holy existences preferred to steer clear to avoid these powerful attacks.”

Luo Feng nodded, deep in thought. He was already aware of this.

The division of abilities consisted of the levels ranked accordingly: true god, true god of void space, eternal true god, the holy, and the godly king!

The Godly King of Jin was at this level and had been powerful enough to create a nation of his own. The three generations of ancestors from the pulse of Duan Dong River had also been at that level, standing at the highest peak of the ancient civilization. The Rhinoceros Emperor of the Rhinoceros Emperor Game, likewise, had been at that level.

So long as one could reach this level, then single-handedly, one would be able to establish one’s own sect to become an absolute leader and stand proud before any ancient civilization. Construction forces could give rise to an entire nation. Of all the battles of superpowers among the ancient civilization that Luo Feng knew of, the highest level of power among them all was the godly king. Similarly, the Shi nation had been established by three founding monarchs. All of them had been godly kings, thus possessing an ability powerful enough to destroy the Jin nation.

“The warriors in the troops number in the billions,” Luo Feng mumbled to himself. “Relying on automaton-type treasures, even the beings on the level of ‘the holy’ ones are most certainly going to be unstoppable unless the Godly King personally makes an appearance. However, the moment a Godly King goes to battle... it would almost be the same as a battle of nations—a battle of life-and-death.”

The golden figure continued, “Within the troop, the main class of treasures is the group classification, like my race’s ‘Jin Luo Universe.’ There are also more massive, single-body type treasures. Chaotic Golden Wings is considered to be one of the most outstanding treasures belonging to the ancient civilization!”

“The most outstanding treasures belonging to the ancient civilization?” Luo Feng was taken aback

“Automaton-type treasures are not of much use to beings who are at the holy level,” the golden figure said. “For His Majesty the Godly King, they become all the more useless. As for the automaton-type treasures used by eternal true gods, these practically represented the pinnacle of all automaton type treasures. Chaotic Golden Wings was an automaton-type treasure that the Wu nation had specially created for its eternal true gods.”

Luo Feng’s eyes lit up the moment he heard this.

“Chaotic Golden Wings is composed of a total of six pairs of wings, and their effects are all different,” continued the Golden Figure. “With the first pair of wings, one can make use of time and space to accelerate one’s speed of escape. This pair of wings can be used by a portion of geniuses from my ancient civilization. Even the undying fighters and knights are able to use it.

“With the second pair of wings, one can control time and space! This is a simplification of a situation whereby the orders of a true god, once given, have to be strictly enforced. This pair of wings can be used by ordinary law masters.

“With the third pair of wings, one can read a thought in void space. This is a simplification of the reading of thought in void space by a true god of void space. This pair of wings can be used by ordinary true gods.

“With the fourth pair of wings, one can establish a universe with a single thought. This is a simplification of an eternal true god’s skill of establishing a miniature universe with a single thought. This pair of wings can be used by ordinary true gods of void space.

“The fifth pair of wings, to a certain extent, is used to control chaos. This is also how the name ‘Chaotic Golden Wings’ came about. Normally, eternal true gods would be able to use this pair of wings. Then, relying on its power, they can have part of the might of a ‘holy existence.’

“The sixth pair of wings are the wings of attack! This pair is invincible. Its power is very strong, and it’s biased towards the gold of chaos. This set of wings has the ‘origin’ as its center and can unleash a super strong combat power. Out of all the single-body, automaton-type treasures of the Wu nation, this set of wings was regarded as the greatest accomplishment! Compared to all the other treasures in the ancient civilization, it was the most outstanding, too. With its help, eternal true gods can acquire part of the power of a holy existence. Of course, its secret engravings were sorted according to level from low to high, so for those with higher powers—after being activated by the secret engravings—the power stored in the origin will be a notch more superior. The energy stored within the origin is then equivalent to a spare supply of energy. This can also allow eternal true gods to last longer in battle.”

Luo Feng was astonished.

Now, he understood. No wonder the blade power, when released from the origin—even when due to overflowing and not erupting through the sixth pair of wings—could still be so powerful. It was all because the power was obtained after transformation carried out by an eternal true god.

“The third pair of wings allows one to read a thought in void space and can be used by ordinary true gods... But I am not ordinary at all. I could use it even when I was only a universe master.” Luo Feng sighed. No wonder he had taken such a long time to comprehend the third stage of Shi Wu Wings. “The way the wings were designed was such that this third pair of wings was originally meant to be activated

by those at the level of a true god, so for me, as a universe master, the requirements are certainly much higher.”

“The fourth pair of wings is able to establish a universe with a single thought?” Luo Feng said, filled with excitement. “I may be extremely accomplished, but I still feel that there is a shred that cannot be successfully activated to completion.”

This shred was like a deep chasm; it was difficult to achieve the breakthrough. Going to the Sector Beasts’ nest for a life-and-death fight this time around might allow him to break through.

“Evaluate this treasure for me, too,” said Luo Feng.

A small tower appeared in Luo Feng’s palm. Then, soon after, a nine-story tower flew out to hang suspended in midair. This was none other than Star Tower.

Chapter 1454: Star Tower

Luo Feng looked at Star Tower, which was floating. To make Star Tower recognize him as his master, he almost died before, and the more powerful he became, the more mysterious he felt Star Tower was.

“Where does it come from?” Luo Feng was more than confused.

“Yes, mister Milky Way,” the golden light being answered. And then, two traces of light shot out of its eyes and began to inspect Star Tower. Light kept coming from its body, covering Star Tower.

One second, two seconds...

One minute, two minutes...

Luo Feng waited as he watched. However, it would take days for the membrane of the miniature universe to be completely white, so he would be able to make it back. It had been more than five minutes, yet the being of golden light was still inspecting the tower.

“Still not done yet?” Luo Feng couldn’t help asking, as it had only taken it a short while to inspect Shi Wu Wing.

The golden light being didn’t react at all. It was still inspecting the tower.

At the top level of Wu Qi Tower in the World of Jin, the Godly King of Jin Country was looking in that direction. He appeared confused as he said, “This true treasure... I—I’ve never seen it before. It’s so intricate and superlative that I can’t discern anything from it. It’s definitely a valuable that only godly kings would be able to forge—godly kings that are proficient in creating valuables.”

In the ancient civilization, godly kings were the pinnacle beings, akin to the emperors of some civilizations. Like the ancestral teachers of the three generations and the Rhinoceros Emperor, they were all at godly king level. However, they were proficient in different aspects. Some were great at close combat, some were skilled at distant attacks, some were proficient at valuable making, and some were skilled at machines.

“He’s just as great as me, if not better. Who made this valuable? Why didn’t I see this valuable before?”

The Godly King of Jin Country was confused. Although he was only a virtual consciousness, he had all the memories of the real Godly King of Jin, so he knew every single supreme true treasure of the ancient civilization.

Luo Feng was waiting. After a long while, the golden light being took back all the light.

“How was it?” asked Luo Feng. He looked a bit anxious.

The golden light being said respectfully, “I’ve inspected it carefully, but I couldn’t find anything. It’s out of the inspection of my range.”

“Out of your range?” Luo Feng was confused.

“Yes,” said the golden light being. “I can know everything about valuables within the range of eternal true gods. However, when it surpasses the eternal true god level, it’ll be difficult for me. In my opinion, this is a valuable used by beings at the holy level, at least.”

Luo Feng raised his eyebrows, but he wasn’t surprised. Although he wasn’t powerful enough, he could tell that though Shi Wu Wing was incredible, yet it wasn’t even half as mysterious or mystical as Star Tower. Shi Wu Wing was a top-tier machine-type valuable used by eternal true gods, so Star Tower was at least used by beings at the holy level.

“Mister Milky Way,” the golden light being said respectfully. “I just received a message from His Majesty the Godly King. A message about this valuable.”

“His Majesty the Godly King?” Luo Feng was overjoyed.

The Godly King knew a lot, so there was a chance he knew something about this valuable. It wasn’t a surprise he knew about it. After all, the World of Jin was controlled by His Majesty the Godly King.

“What did His Majesty the Godly King say?” asked Luo Feng.

“He said that this tower-type valuable could only have been forged by a godly king,” said the golden light being. “Plus, it’s definitely a top-tier valuable forged by a godly king who was an expert at making valuables, and it was forged after using lots of precious material and a great amount of energy. This tower type valuable is enough for a godly king to use as a major weapon.”

Luo Feng was thrilled. A major weapon of a godly king?

Luo Feng had several valuables personally, but ordinary valuables were only used for play. Only valuables like Shi Wu Wing and Star Tower were used as major weapons. However, the Godly King of Jin Country had said that Star Tower was powerful enough to be a major weapon for a godly king, and it was a top-tier valuable forged by a godly king excellent at making valuables.

“How—how... How did I get this?” Luo Feng found it hard to believe. “It definitely wasn’t made by Sitting Mountain Guest.”

Luo Feng couldn't believe it any longer. Sitting Mountain Guest was only a true god. Perhaps he had met with endless great opportunities, but he was only a true god. No matter how fortunate he was, it was impossible for him to have made a perfect valuable that only a godly king great at making valuables could forge.

"Where does it come from?" asked Luo Feng. "Such a supreme valuable must have been renowned even in the ancient civilization."

The golden light being said respectfully, "The masters of true gods at this level should all be prominent, and the true treasure should also be well-known. However, His Majesty the Godly King said he has never seen a true treasure like this, and he's never heard of a true god at this level in the ancient civilization."

"He hasn't even heard about it?" Luo Feng was confused.

There were several possibilities. One, after Jin Country was destroyed, a true treasure, Star Tower, was born in the ancient civilization, and Sitting Mountain Guest had obtained it somehow.

Another was that long before Jin Country was destroyed, a supreme being in the ancient civilization left Star Tower behind, but it had been a long time ago—so long that even the Godly King of Jin didn't know about it.

Another possibility was that the supreme being who had forged Star Tower had never publicized it.

Teacher Sitting Mountain Guest did meet with great luck, Luo Feng thought. Besides, he must be up to something big. Otherwise, he wouldn't have just cultivated the earthlings to inherit this valuable, only to give up a valuable like Star Tower. I speculated that he was somehow related to Jin Country, or at least related to Jin Country after it was destroyed. However, even the Godly King of Jin doesn't know where Star Tower come from.

Luo Feng was even more confused. Regardless, he had confirmed with the Godly King of Jin Country that Star Tower was a major weapon used by godly kings, and even the Godly King of Jin hadn't been aware of it.

"Can you check this one?" Luo Feng waved his hands and took out Blood Shadow Blade to let the golden light being examine it.

In Godly King Valley, His Majesty the Godly King smiled. "This Milky Way has a lot of valuables."

"Milky Way, this blade is an embryo—an embryo at the godly king level," said the Godly King of Jin. His voice echoed in Luo Feng's ears. "It used a lot of precious materials. However, you need to imprint your own techniques into the blade so that the embryo can become a true weapon, which is something commonly used by supreme beings. After all, it's almost impossible to make a valuable at the level of your tower-type valuables. What's the name of that tower type valuable?"

Luo Feng smiled upon hearing the voice of His Majesty the Godly King. "Your Majesty, the name of this tower is Star Tower."

Luo Feng didn't fear the possibility that the Godly King of Jin craved the valuable. After all, His Majesty the Godly King had died a long time ago, and all that was left of him was a virtual consciousness. Valuables were useless to him! Plus, the Godly King of Jin had been expecting for him for a long time.

"Star Tower?" said the Godly King of Jin, transmitting his voice. "This is a seal-type valuable that can suppress lots of enemies, and it can even enslave the enemies. When you become stronger in the future, you will easily enslave enemies you trap in this Star Tower, and they'll never betray you. Of course, the weaker the great beings are, the easier it is to enslave them. It's mainly used for suppression, but it can also be used for fighting. It's also one of the most precious fighting-type valuables, and it's a major weapon used by godly kings. It's invaluable. Even when your embryo becomes a godly king sword, ten of them can rival one, not to mention an embryo. It's really lucky for you to have gotten that. I'm even more confident that you can achieve my goal."

Luo Feng held his breath as he listened to the Godly King's words. Even when Blood Shadow Blade became a godly king blade, ten of them could rival one?

Suppression? Enslavement? Star Tower can enslave my enemies? Luo Feng thought. It seems I'm too weak to fully exploit Star Tower.

Luo Feng left the World of Jin with many valuables, but he left his godly power avatar in World of Jin.

"Star Tower. Shi Wu Wing."

Luo Feng was smiling; these two valuables were indeed incredible, especially Star Tower. Even if he had already known how special Star Tower was, he was still amazed.

What's your goal, teacher? Luo Feng thought.

Sitting Mountain Guest had spent endless eras... for what? Luo Feng could tell that it was related to some of the deep secrets of Universe Ocean. Even Sitting Mountain Guest had said that he could only talk about it after the crisis of the Sector Beasts was over, which meant it would be pointless to talk about it while the Sector Beasts were still around.

"Haha. If I just stay in Star Tower, even if ten million sector beasts attacked me at the same time, they couldn't hurt me."

Luo Feng was thrilled. Star Tower was a major weapon used by godly kings, and every Sector Beast was only at the true god level, so even if they attacked at the same time, it was nothing to Star Tower.

However, he still needed to be careful. Even though Star Tower was indestructible, Luo Feng would still be unable to resist the attacks from ten million sector beasts. They could just push Star Tower into some out-of-the-way place.

That's the core area of Tilted Peak Sector, after all, thought Luo Feng. Even if I can survive some terrifying places, I'll be trapped there forever, like Three Extremes Abyss. If all the Sector Beasts push my Star Tower into Three Extremes Abyss and I can come back with Undying River, my Star Tower will never make it way back.

He was indeed confident, but he would still lose his life if he wasn't careful enough.

“Fortunately, I have Morosa.”

Luo Feng took a look at the Sector Beast at his side.

In the chaos air in Universe Ocean, Star Tower was moving forward quickly, entering Luo Feng’s miniature universe.

“My avatar will drive this spaceship,” said Luo Feng. “Morosa, stay in the ship and sense everything in the hive of the Sector Beasts.”

“Yes, Master,” answered Morosa.

Luo Feng smiled. “Just do what I said. I’ll go to the hive now, and I’ll capture many Sector Beasts and bring them back for you to swallow.”

“Ah!” Morosa was exhilarated.

If a Sector Beast was suppressed by Star Tower, even level-three Sector Beasts could do nothing but wait to be eaten by Morosa. Even level-four Sector Beasts could still be eaten by Morosa with Luo Feng’s help.

“Just help me, and I’ll give you many perks,” said Luo Feng.

Then he left his miniature universe. As for Morosa, Luo Feng wished to cultivate him as the king of the Sector Beasts!

“The hive of sector beasts!”

Luo Feng looked at the endless space in the distance.

Sou!

Star Tower moved forward toward Tilted Peak Sector in Universe Ocean!

Chapter 1455: Land of Darkness

In less than half a day’s time, Luo Feng arrived at Tilted Peak Sector, which had been surrounded by an endless water domain.

Hua!

Luo Feng dove right into the waters and immediately teleported toward his targeted venue—he advanced towards the “space of wings.”

Earlier on, the “space of wings” was where he had obtained the pair of white wings and the origin! If he had taken the usual route to get to the Land of Darkness, he would have had to enter that mountain peak and charge through the vast region within the peak to finally enter the core. However, by taking another passage via the space of wings, he could reach the core immediately.

“The first time I came here, I was very careful.”

Maneuvering Star Tower, Luo Feng drove through the space of wings and entered another passageway. He was already very familiar with the place. Previously, during the time when he was trying to achieve the breakthrough to get his godly body to the third level, Luo Feng had taken this passageway several times to get to the Land of Darkness.

“Previously, this was where I got the ‘origin.’ If I can get ahold of another origin, that would be great. But such things are always happening by chance. It’s not as though I can simply get one by asking for it.”

Luo Feng shook his head with a sigh. The origin was very powerful; it was important to note that even for a true god of void space, it was a difficult task to destroy a true god weapon (supreme true treasure), yet with the help of Shi Wu Wings, which could release a billion beams of blade rays, the origin was able to destroy such a true god weapon.

Luo Feng definitely wanted to get his hands on more such trump cards. This was why, as early as the billionth era, while he was in the World of Jin, he had once requested that General Harmonious Snow execute his automaton-type treasure to transform and store his godly power, then attempt to bring this stored power out of the World of Jin.

A pity... The moment the power was exposed to the outside world, the transformed power had automatically dispersed and had been annihilated.

“The intangible, supreme universe law exerts its influence over everything,” Luo Feng muttered to himself. “Within the World of Jin, all the great beings were not able to get out. If they set foot outside, they are bound for death. Even the transformed godly power cannot be brought out. Only some lifeless objects—like weapons, treasures, blood, skin, and hair samples—are allowed out of the World of Jin. If only General Harmonious Snow and his warriors could come out, then that great army of Sector Beasts would have been annihilated ages ago.”

The Sector Beasts might have been very powerful, but they were, after all, still in their breeding period. To the various races of Universe Ocean, it was a great crisis. But to the World of Jin... it would have been a breeze. Sending millions of true gods aboard Jin Luo Universe, they could have swept out the entire Sector Beast nest. Or perhaps if eternal true gods were to be sent out instead, they could have swept out everything, too. Unfortunately, all of them were stuck in the World of Jin. Obviously, all of these were under the influence of the intangible, supreme universe law.

“When the Jin nation was destroyed, all lives of the World of Jin became trapped in that miniature universe for eternity, forever void of the chance to come out.” Luo Feng shook his head and lamented.

Sou!

Star Tower barged about in a rampage, at times teleporting, at times flying at high speed, paying no heed to safety or dangers. Of course, there were scary regions that one would not be able to leave the moment they fell within, such as “Three Extreme Abyss” and “Icy Wind Devil Cave.” These were places that even Luo Feng had to take a detour around. These were places known to be the lands of nightmares. Maybe he had the ability to escape upon falling in, but he was not ready to take the gamble! If he was really stuck in there, it would be a dumbfounding turn of events.

Amidst the red-hot lava, Star Tower continued to advance.

Flying out of the layer of lava, far into the distance, it was approaching the endless whirlwind whirlpool. Every whirlwind was like a blade of light from a super great being, with an incredibly powerful tearing force. Star Tower was, undoubtedly, able to charge in easily. Even though it was not affected by the influence of the whirlwind and was able to stay on course, Luo Feng took an extra step in borrowing the strength of these whirlwinds to propel Star Tower ahead at an even faster pace.

“It is the 10,000 Waves water region ahead!” Luo Feng said to himself. “After I get to the 10,000 Waves water region, I will be near the Land of Darkness. Zhen Jia Emperor and Dragon Rock Ancestral God are both at the 10,000 Waves water region.”

Luo Feng had been here multiple times. Secretly, he had chanced upon the discovery that both Zhen Jia Emperor and Dragon Rock Ancestral God were at this place. However, to avoid attracting unnecessary attention from the Sector Beasts, Luo Feng had not made any moves. Compared to the Sector Beast crisis, both Zhen Jia Emperor and Dragon Rock Ancestral God were merely ants that were not worth a dime of attention.

“When I am in a true confrontation with the Sector Beasts, and there is time to spare, I will just end it with you two along the way.”

Hong! Long!

Star Tower flew right into the 10,000 Waves water region without pause, then started to close on the Land of Darkness. The faraway boundary of this vast water region was shrouded in total blackness. It was a kind of darkness that would bring shudders to the human soul. When the Sector Beast was yet to be born, if one were to fall into the deep abyss of this Land of Darkness, they would be lost for eternity. Escape was almost impossible.

Generally, many would just roam about the borders, or if some universe masters had other bodies, they might dare to step into the abyss because even if that body were to die, it would only mean losing one of their multiple bodies.

“Morosa.” Star Tower came to a halt at the border of the Land of Darkness. Luo Feng looked far off into the distance, where the sight of endless darkness greeted him.

Within Luo Feng’s miniature universe...

“Morosa, hand me the star map of the Sector Beasts’ nest,” the godly powered avatar said. “And also, the positions of every single one of those millions of Sector Beasts—indicate them on the map.”

Morosa replied with great deference, “Yes, Master. But Master, I may be able to remotely detect the position of every Sector Beast, but the distance between them is far too great, so the coordinates I give can only indicate an approximate region. It is already scaled down to a smaller area. The degree of precision won’t be very on-point.”

“That will do.” The godly-powered avatar nodded.

As Morosa carefully tried to detect the location of the other Sector Beasts, traces of Sector Beast power also started to dissipate from the surface of his body to be suspended in midair. These traces of Sector Beast power condensed to form a huge sphere with a diameter of around one million kilometers.

“The entire Sector Beast nest has become a sphere,” Morosa explained. “It has the ability to affect all the senses; if any of you true gods from the Universe Ocean fall deep into it, you all be lost within it.”

Thereafter, that sphere, with a diameter of one million kilometers, started to show specks of light, and around every speck was a halo. There were countless such spots.

“Every spot of light here represents one Sector Beast,” said Morosa. “The area that the halo spreads out over is the region where the Sector Beast might possibly be found. This is the best I can provide: an approximate region for every Sector Beasts’ location.”

Shortly after, on the gigantic Sector Beast nest model, some mountain ranges and rivers started to emerge.

“There are other material objects to be found in the Land of Darkness. I may be your servant, but I am unable to detect your whereabouts, my Master.”

The godly-powered avatar nodded. It was difficult to detect one’s whereabouts within Universe Ocean, which was why there were often incidences of individuals getting lost within Universe Ocean. Even though Morosa was Luo Feng’s servant, it was unable to detect the exact location of Luo Feng’s whereabouts. On the contrary, it would be able to detect the locations of all the other Sector Beasts. This was a talent that these Sector Beasts were born with.

“Master, you may want to rely on the mountain ranges, rivers, and gigantic mountain rocks to determine the coordinates of your own whereabouts,” Morosa suggested. “Of course, you can also rely on the location of the Sector Beasts to help determine your own whereabouts. The only problem with this method is that the beasts will discover you easily. Presently, the number of Sector Beasts, excluding myself, reaches a total of more than 9.2 million.”

“Very well,” said the godly powered avatar. “Please mark out and indicate for me the location of 10,000 Waves water region.”

“There is no way I can mark that out,” Morosa said. “After the Land of Darkness takes a spherical form, internally, it is revolving very slowly and continuously every moment. Relative to the revolution on the inside, some mountain ranges do not change locations. But to the outside world... the Land of Darkness is ever-changing. Thus, it is easy to lose one’s way within the Land of Darkness.”

“In that case,” the godly-powered avatar replied immediately, giving its orders, “you must continue to sense them carefully. When those Sector Beasts change location, you have to change the model accordingly to ensure that you are in tune with the changes all the time.”

“Yes, Master.” Morosa showed absolute obedience.

“Go in.”

Star Tower was at the border of 10,000 Waves water region before it finally flew straight into the endless darkness. Star Tower was shrinking.

Luo Feng carefully controlled Star Tower. Although it was said to be darkness, to a strong being like Luo Feng, dark was no different from light. Through his influence over time and space, he could still see clearly what was far in the distance.

“Dead silence.” As though there is nothing at all.”

Luo Feng held his breath. He did not dare to be the least bit careless.

At that very moment, he was very unclear about where he was. He needed to rely on the reference points within the Land of Darkness to understand what was around him and what was happening, but the period before he found those reference points... was the most dangerous time.

“I hope that by being ‘Invisible and Formless,’ will not be discovered by the Sector Beasts. The moment I am discovered, my first plan will have failed.”

After all, there were more than 9.2 million Sector Beasts now. It was too densely populated in the nest. It would be just like how Huge Axe had been annihilated shortly after falling into the Land of Darkness, or how Hong and Eye Devil God were discovered shortly after they entered. It was almost a given fact that Luo Feng was bound to be discovered, too, so he could only pin his hopes on the power of being Invisible and Formless—and seeing if the Sector Beasts would overlook any loopholes.

“Hide!”

Star Tower vanished, and Luo Feng appeared within the void space. Soon after, his body transformed.

“Change!”

A floating stone was charging toward the Land of Darkness, sometimes teleporting, sometimes just floating. This stone was void of life, just like an ordinary mountain rock.

As it was advancing, it was also sensing the space ripples. Luo Feng knew that his teleportation distance could be much further than the Sector Beasts, and naturally, he could detect things over a longer distance. If he did not detect anything amiss, he would continue to teleport again and again.

“Huh?” Luo Feng felt a sudden shock and immediately stopped.

A short moment later—

Hua!

A hideous-looking Sector Beast teleported over. Relying on its ability to detect things in space, it had discovered the presence of the rock right away.

“Eh?” The two singular, bloodshot eyes stared at the rock. “Why is there a rock here, suddenly out of nowhere? Could it be a piece that flew over from the mountains that collapsed and shattered when the other fellows were fighting one another? Humph!”

This hideous-looking beast stomped on the rock without warning. With a loud sound, the rock shattered into many pieces. The Sector Beast displayed indifference and left.

Luo Feng started to detect around him again. After waiting a long while after the Sector Beast left, he said, "Condense!"

The rock condensed again, but this time, upon transformation, it took on a different look.

Shua! Shua! Shua!

Once again, he teleported to advance.

This was how Luo Feng carefully relied on his "Invisible and Formless" power to avoid being discovered by the Sector Beasts. He had encountered three Sector Beasts in total, and based on their locations, he determined his own approximate coordinates. Then, finally, he arrived at a certain spot on that floating mountain range.

This mountain range was a trillion kilometers tall. Rolling on, it floated amid the air in the land of Darkness.

Hu!

A piece of rock fell from the mountain range and instantly took on human form.

Luo Feng heaved a sigh of relief. "My location is now confirmed."

Determining his coordinates was only the first step.

"Depending on my ability to stay Invisible and Formless, the Sector Beasts cannot recognize me," Luo Feng said to himself silently. "However, the moment I start fighting the Sector Beasts... the moment one Sector Beast discovers me, it will be the same as being discovered by all the Sector Beasts. By then, I will be forced to execute another plan.

"It's fate's call. I can only sneak-attack one Sector Beast. In that case... I can destroy the leader, and his gang will be the next to fall. Since I can only sneak-attack one of them, I shall choose 'Beddy'!"

A look of aggressiveness flashed in Luo Feng's eyes. Earlier, Morosa had specially marked out the whereabouts of the 100 most powerful Sector Beasts in the nest, and the most powerful one of them all was none other than Beddy.

Chapter 1456: The Most Powerful

Luo Feng followed his first plan and proceeded toward Beddy's location.

"Beddy!"

In Land of Darkness, a Sector Beast was fleeing in a hurry. As it fled, it roared furiously, "You're already at pinnacle level four, and there are several Sector Beasts in our hive who are already at level four. Why don't you go fight Qi Ya and Mo He? One of them is stronger than 100 of us. If you waste your time chasing us, Mo He and the others will only become stronger, and if they reach level five before you, they'll definitely eat you."

Another Sector Beast was chasing it at high speed, and both the singular eyes on its heads were gleaming belligerently. It said, "You're not qualified to tell me what to do, Ka Qiong."

Sou!

Sector Beast Beddy kept speeding up, moving much faster than the one in front of it. Beddy knew that after it had decided to hunt Sector Beasts, it had lost control over the hive. Some of the other top-tier Sector Beasts were beyond its control. If Beddy still acted as it had before and only targeted the powerful Sector Beasts, they wouldn't even have a chance to improve themselves.

The previous strategy had been simple and would have taken him a long time. The threat from Milky Way Horde Leader Luo Feng had forced Beddy to speed things up. It had to keep swallowing other Sector Beasts to become stronger.

"I'm stronger than Mo He and the others. I keep swallowing and keep evolving. I was the strongest before, and I'll be the strongest forever." Both the singular eyes of Beddy were glinting with madness as it almost managed to slash the Sector Beast in front of it.

Peng!

The fleeing Sector Beast separated its body into 99 parts, and they all fled in different directions. This was a fight between two Sector Beasts, so its survival skill, "Sector Light Passageway," would be interrupted by Beddy; it couldn't be formed, which was why it didn't bother to perform that technique. Even if it was actually able to perform it, it would have been much weaker and would have died even more tragically in the hive.

Weng!

Traces of dimming, colorful light burst out of Beddy's body. The colorful light enveloped space and time. It was the Sector Light Passageway of a level-four Sector Beast. A mighty binding power trapped all 99 bodies as if they were ensnared in a swamp. Their bodies immediately slowed down.

Peng!

Beddy divided his body into 99 parts as well, charging at the 99 bodies of his enemies. All 99 bodies bit through their enemies.

"Beddy!" All the bodies of the fleeing Sector Beast disappeared, and they converged to form the original body.

"Die, Ka Qiong!" The 99 bodies of Beddy also vanished and condensed into its original body.

They were fighting each other, gnashing and rolling everywhere in the Land of Darkness, battling like mad. Their flesh split open, and dark blood burst out.

Beddy was at pinnacle level four while Ka Qiong was only at level three. Beddy also had Sector Light Passageway to help him, so Beddy was crushing Ka Qiong.

Chi!

A bloody light surrounded the claw, which pierced through Ka Qiong's chest instantly. A giant hole appeared on Ka Qiong's chest as it lost its sector. Its body trembled, and it lost all ability to resist.

"You'll die, Beddy! You will!" Ka Qiong glared at Beddy with both its singular eyes. "You're fighting us instead of Mo He and other powerful ones... You'll die! You will die of your stupidity!"

Ka! Cha!

Beddy opened the mouths on both its heads, and they chomped down on the heads of Ka Qiong. It chewed the heads and swallowed them into its stomach. Then it went on to chew up the other parts of the body. Soon, he finished eating an entire Sector Beast.

"Another one." Beddy looked up with his eyes gleaming. "Almost. Almost there."

Sou!

Beddy teleported and disappeared.

After around half a month, Sector Beast Beddy was chasing another Sector Beast again. Beddy clotted the space around it, so nobody could teleport to leave. One was pursuing while the other was fleeing!

"If I eat it, I'll reach level five very soon." Beddy was eager as it chased another Sector Beast.

In the silent Land of Darkness, Luo Feng stood above a tumbling river passing through space. "Why did the location change again? This Sector Beast Beddy keeps changing its location. It moves so fast, yet I have to be careful not to be found by other Sector Beasts..."

Luo Feng was deeply upset.

Far away, in Luo Feng's miniature universe, Morosa said to the godly powered avatar, "Master, I've spread the message. Besides, now that the Sector Beasts have learned I am with you, they're trying to speed up their evolution. Normally, they are very relaxed and only hunt once in a while, but now, they are acting madly and constantly moving around. So is Beddy. Beddy must be chasing its prey now. Other Sector Beasts can sense it, so they can flee as quickly as possible to render its efforts ineffective.

"However, there are far too many Sector Beasts in the hive. If Beddy dashes in a single direction, there could be hundreds of thousands of Sector Beasts there, all of whom are fleeing and even fighting each other, which gives Beddy a great chance. Besides, Beddy can teleport the farthest, so he can still succeed sometimes."

The godly powered avatar nodded. "Mark his location carefully."

"Yes, Master," answered Morosa respectfully.

Luo Feng knew that Beddy was hunting and moving at the same time. However, he didn't dare to wait until Beddy stopped. If it did, it might enter level five very soon.

“I have to catch up with it.”

Luo Feng became a floating rock, teleporting as he approached Beddy.

Luo Feng was able to teleport farther than Beddy. However, Beddy was reckless and went wherever it wanted, yet Luo Feng had to evade many Sector Beasts. When Luo Feng was approaching the Sector Beasts, they could sense the teleportation ripples, and if they couldn't see any Sector Beast after sensing the teleportation ripples, they naturally grew suspicious and rushed toward him. For that reason, Luo Feng had to take many detours.

“Perhaps Beddy will rush in my direction. Then I can go ahead and capture it.”

Luo Feng looked forward to it, while that giant rock kept teleporting again and again in the Land of Darkness.

Time passed. Morosa maintained the standard of the Land of Darkness, tracking all the light spots that represented Sector Beasts. Just by watching those spots, it could tell when Beddy touched one, as the other spot would quickly dissipate. Apparently, Beddy was hunting and eating!

Three months after Luo Feng entered the Land of Darkness, Sector Beast Beddy sat at the top of a strange mountain floating in space. It was holding back its power. However, the energies that leaked all gathered toward Beddy, forming an endless black mist. The Land of Darkness was a hive for the Sector Beasts—a cradle for them—so it also had some special energies.

The black mist surrounded Sector Beast Beddy.

Hu!

“Absorb!”

Black mist sometimes permeated and sometimes shrank. It was like a giant heart pumping relentlessly.

On the other side of the Land of Darkness, Luo Feng found that Beddy had stopped moving. He was thrilled and started to rush in that direction.

“It stopped! Even though it's really far away from me and I need to detour around many areas, it'll take me only half a day to get there.”

Shua! Shua! Shua!

The rock was teleporting and moving forward.

The black mist heart kept pumping. Eventually...

“Absorb!”

The black mist shrank abruptly. It all went into Beddy's nose, flooding inward. A bloody light surrounded its body. Gradually, the light became increasingly dense.

Hong! Long! Hong! Long!

Time and space trembled, and a terrifying and destructive ripple appeared, surrounding Beddy. The bloody light on its body became denser, and its body shape was growing larger and larger. When it came to body size, the more advanced a Sector Beast was, the larger its body would be.

It had been an hour, and the bloody light was gradually reined in. It was attached to its dark skin. Eccentric engravings formed on Sector Beast Beddy's skin, and after a short while, everything disappeared. There were bloody, thread-like engravings all over its body, emanating power that could make one's soul tremble.

Hu!

Sector Beast Beddy exhaled and opened both of his singular eyes. Both its heads smiled, as it felt relaxed and comfortable.

"Finally... Finally, I've entered level five."

Sector Beast Beddy was relieved. After getting the message from Morosa, it had known that Morosa was suppressed and eventually enslaved. Since then, it had enacted a new strategy, never relaxing even for a moment. It knew that it was taking a major risk, and if other Sector Beasts entered level five before it, it would be in big trouble. However, it had to take a chance, as Luo Feng was too great a threat. It had never let up for even a second over the past eras.

"I've finally entered level five. Nobody in the hive of Sector Beasts will be my match now, and if Mo He and the others meet me, they'll be doomed."

Both of the singular eyes of Sector Beast Beddy gleamed crazily. Mo He, Qi Ya, and some others had also entered level four. Beddy had been as at an advantage before, but the best it had been able to do was suppress them. It was difficult for it to kill them, just as it had been difficult for Beddy to kill Morosa when they both had been at level three.

However, things were different now. Beddy had reached level five! This gave it an absolute edge over the other level-four Sector Beasts. Besides, there were only a few of them at level four.

"Mo He..." Sector Beast Beddy teleported and started to act. "My teleportation distance is still the same as when I was at level four, so Mo He and the others have no idea I've entered level five."

"It only now started to move again?" A rock was floating in the space near Beddy. "Too late! I can catch you in five minutes!"

Shua!

The rock approached Beddy as quickly as possible.

Chapter 1457: Pearl of the Golden Ocean

As he approached, Luo Feng transformed from the rock back into a human form in silver armor. There were five shining wings on his back. Luo Feng's eyes looked indifferent at this moment, as nobody could sway his determination to kill Beddy!

Sector Beast Beddy was the strongest Sector Beast. If Luo Feng killed Beddy, it would take much longer for a level-six Sector Beast to be born, which would give the races in Universe Ocean a grace period.

"I have to kill Beddy!" Luo Feng only had one goal in his mind: to kill Beddy!

Shua! Shua! Shua!

After teleporting over 100 times, he finally felt a faint teleportation ripple.

"It's right there!"

Luo Feng teleported and rushed toward the ripple. He then condensed the space so that nobody could teleport and run away.

Beddy had just entered level five and was daring and energetic. He was just about to deal with Sector Beasts at level four. He even tried to limit himself to teleporting only as far he had been able to teleport while at level four.

Suddenly, Beddy felt an approaching ripple. Then the space around it condensed.

"Huh?"

The source of that ripple couldn't even sense the presence of Sector Beasts, which meant it wasn't a Sector Beast that was coming toward him. Apparently, it was a creature from the races of Universe Ocean.

A great being from Universe Ocean had been able to penetrate the core area of Land of Darkness without being noticed? And it was rushing directly at Beddy?

Could it be a coincidence? There were almost ten million Sector Beasts in the Land of Darkness, and they were able to camouflage themselves. If they didn't want other Sector Beasts to find them, it was almost impossible for them to run into Beddy.

"It must be Milky Way Horde Leader, Luo Feng," said Sector Beast Beddy. "Only him. He enslaved Morosa, and that's how he knows where all the Sector Beasts are in Land of Darkness." Beddy suddenly had many thoughts racing through his mind. "Who is it?"

Sector Beast Beddy knew he wouldn't be able to teleport now. He was enraged. He wasn't in a rush but looked toward the ripples with both his heads.

In the distance, a silver-armored human being stood in space. Five pairs of silver wings were open on his back, and he was staring at Sector Beast Beddy with the eyes of a wolf staring at a sheep!

"Are you the number one great being from Universe Ocean, Milky Way Horde Leader Luo Feng?" Sector Beast Beddy asked indifferently.

Beddy was absolutely confident now that it had entered level five. He had felt part of the destruction of the origin. His power had surged, and he was just pretending to be at level four by teleporting shorter distances.

Level five was almost the pinnacle power in the evolution system of Sector Beasts. Compared to level-six Sector Beasts, level five didn't have 10,000 bodies and couldn't pull off a long fight. But other than that, they didn't have many disadvantages.

Luo Feng opened his mouth. "Beddy?"

"You know me?" Both the singular eyes of Sector Beast Beddy glinted with a dim light. "It seems that Morosa told you about me, and you managed to sneak into the Land of Darkness without being noticed by any other Sector Beasts. You're indeed impressive... Even I didn't notice you. Now, you show yourself. It seems you came here to target me."

"That's right." Luo Feng nodded.

The conversation sounded tepid. However, Luo Feng was constantly observing Sector Beast Beddy.

Wasn't Beddy scared at all? Its calmness sharpened Luo Feng's vigilance. Morosa had already given every Sector Beast a message before it was enslaved, and apparently, level-four Sector Beasts weren't Luo Feng's match. Facing an enemy that it couldn't rival, it should have either panicked or attacked.

However, Beddy was oddly calm.

"I had meant to kill you in the future, but now that you're here, I will..." Sector Beast Beddy's eyes gleamed madly.

"It's me who's going to kill you!" Luo Feng yelled.

Hong!

The five pairs of wings on Luo Feng's back suddenly bulged, and at the same time, godly power that was utilized in its entirety was infused into his Shi Wu Wings. He kept performing the first three volumes of Duan Mie. Even in the World of Jin, burning three levels at the true god level was the limit. Luo Feng immediately triggered the third level of engravings of his Shi Wu Wings with his godly power.

All of a sudden, an area of several square light years was covered by vast clouds. It was "single thought void space"!

A strong binding power immediately assaulted Beddy. It only made Beddy laugh.

"Haha! Did you use this move to reduce Morosa to using Sector Light Passageway? Hmm... It's enough to deal with level-three Sector Beasts. However, it's nothing but a joke to me!"

Weng!

Blurry light permeated and relentlessly eroded the area of the single thought void space. The light was stronger; it kept growing, forcing the single thought void space to retreat.

“Huh?” Luo Feng was stunned. “How can the Sector Light Domain be so powerful? The Sector Light Domain of a level-four Sector Beast should be at the same level as my single thought void space. Has Sector Beast Beddy really reached level five?”

Although it was the same move, Sector Light Domain was different when it was performed by level-five Sector Beasts as opposed to level-four Sector Beasts. The power of the technique depended on the “sector” within the Sector Beast, and apparently, level-five Sector Beasts were superior.

“No wonder... It’s Beddy. It’s entered level five.” Luo Feng’s voice sounded cold, but it was spread several light years away.

“Haha! No wonder you’re the first great being in Universe Ocean. You concluded that I’ve entered level five so quickly.” Sector Beast Beddy guffawed cruelly. Luo Feng knew from Morosa that Beddy was ruthless and had a heart of stone. “I’ve indeed entered level five, but you’re here now. You’re being suicidal! This space and time skill of yours can’t compare with my Sector Light Domain. This time...”

But Sector Beast Beddy was suddenly stunned when a radiant pearl flew out of Luo Feng’s palms, giving out golden light.

The golden pearl flew above Luo Feng’s head, and burning godly power kept being infused into it. The golden pearl transformed into vast and mighty golden waves.

Hua! Hua! Hua!

Golden waves suddenly showed up in the area where Luo Feng and Beddy were. The golden waves and single thought void space empowered one another, and the power surged. They immediately suppressed Beddy’s Sector Light Domain, forcing it to back off.

That golden pearl was called the “Pearl of the Golden Ocean.” It was a precious valuable brought by Luo Feng from the World of Jin—a machine-type domain valuable used by true gods of void space. It was only an ordinary treasure for true gods of void space, and mediocre true gods of void space were already able to use it. The limit of ordinary true gods was only at top-tier level nine. When Luo Feng was comprehending the evolution of chaos, he had largely exceeded that limit. He could totally rival ordinary true gods of void space!

That was why he was able to trigger the Pearl of the Golden Ocean. In fact, when Luo Feng had been converting credits into valuables in World of Jin, he had been able to convert the valuables back into military credits as part of the same deal. He had obtained many valuables to see whether he was able to fully comprehend and use them. If he wasn’t able to use them, he would return them. Like Wu Qi God, which was one of the best true god level machine-type valuables and had three levels. The third level was so intricate that it was more difficult to employ than many machine-type valuables at the true god of void space level.

“The engravings in the third level of Shi Wu Wings are relatively plain.” Luo Feng sighed. “I was able to utilize them when I was only a universe master, and even ordinary true gods are able to use them. Besides, my Shi Wu Wings don’t have an ‘origin,’ so the move is indeed weaker than Sector Light Domain.”

The more advanced a technique was, the more powerful it was. The simplified version of “single thought void space” was far from Luo Feng’s true power. Unfortunately, the fourth level of Shi Wu Wing, “establish a universe with a single thought,” was too intricate for Luo Feng to utilize. If he could fully comprehend it and perform its true power, he would exert much more power than at present.

The Pearl of the Golden Ocean was much more complicated than single thought void space, as it could only be triggered by true gods of void space, and it was the most advanced valuable that Luo Feng was able to use. It was also a machine-type valuable. Although it wasn’t as delicate as his Shi Wu Wings, it was still much more powerful than single thought void space.

The endless golden ocean and the single thought void space—both were putting pressure on the Sector Light Domain.

Heng!

Sector Beast Beddy snorted. The Sector Light Domain was now so small that it barely surrounded Beddy’s body like a thin membrane. Even so, that layer was very dense and was capable of defending Beddy against every attack.

“Milky Way Horde Leader Luo Feng.” Sector Beast Beddy snorted. “All you have are valuables. You trapped Morosa in your Star Tower, and eventually, you enslaved it. Without your valuables, you wouldn’t have been able to accomplish that.”

What Beddy said was true. Luo Feng had used single thought void space, the power of space of suppression, and the power of the origin of his miniature universe to completely confine Morosa so that it couldn’t self-destruct.

“I heard that you have an endless ocean body,” said Sector Beast Beddy.

Sector Beast Beddy was exceptionally aloof; he was indeed full of confidence.

Just as he spoke, endless black light shot out and surrounded Luo Feng in the distance. It was so fast that even Luo Feng wasn’t able to dodge it. Endless black threads wound around and enveloped Luo Feng, trapping him in a cocoon.

“However, you’re only a human,” said Sector Beast Beddy, “and you’ve become a true god, which means you now only have a human body. You might have lost your endless ocean body. There’s no need to fight you. All I need to do is to consume your godly power!” Beddy looked at the black mist cocoon in the distance and smirked. “A Sector Beast at level five can exert totally different power than level-four Sector Beasts even when performing the same move. Now, my power is purer and more forceful. The power of my ‘sector’ is much stronger.”

Chi! Chi! Chi!

Luo Feng didn’t even try to get out. Instead, he began burning his godly power, shocking the black mist cocoon. Godly power and the power of the Sector Beasts were consuming each other.

“You want to compete with me in terms of godly power?” Luo Feng said.

He smirked. He could easily transform his godly power into the power of the Sector Beasts instead so that his enemy couldn't do that. However, he preferred to do what he was doing now.

According to Morosa, the godly power of level-five Sector Beasts can rival that of true gods 100 million kilometers tall, Luo Feng thought. However, it's still less than one one-trillionth of mine.

Chapter 1458: The Reincarnation Passageway

Amid the surging golden waves, a gigantic black cocoon floated. Sometimes it would bulge at one side, and at other times, it would bulge at the other side as though a monster was trying its best to burst forth from the cocoon. Opposing forces were frantically trying to annihilate one another.

Sector Beast Beddy was under the suppression of endless waves and a "single thought void space," yet it was not bothered in the least. Looking far into the distance at the black mist cocoon, it broke into a wide smile. As if to publicize its arrogance, it said, "Milky Way Horde Leader, you have fallen, and your godly power is not only used to fight the power of the Sector Beasts but is also constantly being devoured by me. Compared to you, my consumption of power is much smaller. In terms of strength, you are only an ordinary human life form. How can you hold a candle to me—a noble, fifth-stage Sector Beast?"

Beddy was full of confidence.

"Break, break, break!"

The black mist cocoon was bulging repeatedly while vaguely showing the shape of a blade. Apparently, Luo Feng was using his blade to strike at the black mist cocoon in a frantic manner, yet no matter what he did, he could not force his way out.

"Hahaha..." Sector Beast Beddy was all the more arrogant as it watched Luo Feng struggling helplessly.

Within the black mist cocoon, Luo Feng might have appeared to be repeatedly hacking against the black mist cocoon while at the same time blazing his godly power to fight against the Sector Beast, but deep within his heart, he was not the least bit flustered. He kept his cool, as he was aware that the black mist cocoon was very tenacious; if he sought to break it open by force, it would only be possible if both parties were very different in strengths! He could forcibly break open Morosa's black mist cocoon, but he could not do the same to the black mist cocoon set up by this fifth-stage Sector Beast, Beddy.

The best solution was to maintain the maximum consumption of godly power on both sides, and thereafter, strike with a full-force attack. This was the best way to break free and make his escape.

"The consumption of my godly power is only maintained at a relative rate, not a full-force outburst," Luo Feng said to himself. "If not, my godly body would have expanded instantly to a height of one light year. With my mighty godly power, I can instantly annihilate this cocoon."

It was a mutual consumption of power. Blood Ghost Blade was hacking the cocoon, but Luo Feng was maintaining it at a certain degree so that it was revealing adequate power to that degree. He did not want Sector Beast Beddy to become suspicious. However, this would also mean he was unable to charge out of the black cocoon.

“Beddy, as the strongest Sector Beast, how can it be that you are afraid to fight me in battle?” Luo Feng’s face was hideous because of all his angry roaring. He understood that Sector Beasts were able to detect everything that was happening within a short distance, so his expression was definitely visible to Beddy.

“If I am able to kill you so easily, is there any need to put forth the effort to fight you?” said Sector Beast Beddy.

Beddy was, on the contrary, quite at ease. Deep within its heart, its greatest opponent was none other than Milky Way Horde Leader! So long as it killed Milky Way Horde Leader, the other great beings in Universe Ocean were not worth even mentioning... It would become the king of the Sector Beasts easily.

“Break them all!”

Luo Feng was fearsome, going crazy within the cocoon. His blade ray was dazzling white like snow. Again and again, it hacked against the black cocoon.

We are both consuming one another’s power, thought Luo Feng. I have lost half, and it, too, has lost half. But at the moment, it is constantly devouring my godly power and has devoured almost 30 percent so far. The proportion that we are at now, upon comparison, can be seen as such... When I have consumed 80 percent, it will have consumed 50 percent.

Luo Feng was calculating. Although Sector Beast Beddy was constantly devouring his godly power, it still needed time to transform whatever it swallowed! Just like how Morosa required an extremely long time to transform everything it had devoured from one origin each time it swallowed one.

For one Sector Beast to feed on another Sector Beast—both being comprised of the same type of power—what was swallowed could naturally be transformed very rapidly. But to devour the power of another type, the transformation process was much more troublesome...

Eight to five! When Luo Feng had consumed eight parts of his godly power, the Sector Beast would have consumed five parts of its godly power. If this situation persisted...

In the blink of an eye, Sector Beast Beddy power was down by one-tenth. This left it in great shock.

“Why is he not dead yet?” Sector Beast Beddy said, staring at the black cocoon suspended in the distance. The random bulging on all sides continued, so obviously, Luo Feng was still struggling to break out to make an escape. “His godly body, even if he was ten million kilometers tall, ought to be used up by now. Something is wrong. He is only a human; how could his godly body get so big?”

Beddy did not understand. It might have conversed with Zhen Jia Emperor and Dragon Rock Ancestral God about this, but those two fellows had long been ostracized by the various races of Universe Ocean. They had not been to the World of Jin, either, so they were oblivious to any information regarding the third level of the godly body route. Of course, they would not have known that the moment a godly body reached the third level, it would become a limitless godly body.

Beddy might not have known anything either, but it could sense that something was amiss, so it did not dare to continue what it had started.

“Keep!”

Sector Beast Beddy’s two singular eyes were filled with reluctance. Far in the distance, the black cocoon was scattering countless threads and retracting them back into its body.

Luo Feng, garbed in his silver-white armor, stood in the distance. He had five pairs of wings outspread from his back and was holding onto his Blood Ghost Blade.

Luo Feng stared at Beddy. “Why are we not continuing?”

“You are indeed worthy to be called Universe Ocean’s Number One Master,” said Beddy. Now, all the more, Beddy did not dare to belittle this Milky Way Horde Leader. “The godly power you have as reserve far exceeds my wildest imagination. It seems that using such simple moves to kill you is simply impossible.”

With Blood Ghost Blade in his grasp, Luo Feng shook his head with a sigh. “I sought to destroy a good half of your power with this method. I did not expect you to give up so soon.”

“Just as I have guessed, this was only a ruse.” Sector Beast Beddy suddenly let out a low roar. “I can’t be bothered with anything else. I shall just crush you to death right away. That will do.”

A roar followed.

“Roar!”

The blood-colored secret engravings all over Sector Beast Beddy’s entire body suddenly lit up. Then, blood-hued halos started to appear all over its body. Its aura suddenly increased in strength as it charged at Luo Feng with a howl. It was extremely fast—so fast that its speed far exceeded Luo Feng’s.

Holding onto his Blood Ghost Blade, Luo Feng recalled something Morosa had once mentioned to him: “Master, a fifth-stage Sector Beast has acquired a portion of the origin of ‘Destruction.’ In other words, it owns the most powerful technique, Destruction. Even if it chooses not to execute this most powerful technique, its ordinary attacks will still contain the subtle profundity of Destruction. Thus, its power will be greatly enhanced.”

“Then I shall see for myself.”

Luo Feng blazed his godly power to its limit. Instantly, Wu Qi God was infused with some of his godly power.

Having transformed into a silver-white Wu Qi God, Luo Feng’s aura produced an instant outburst. He had already managed to activate the second stage of Wu Qi God, so within that short span of time, his power skyrocketed. All this time, he continued to hold his Blood Ghost Blade.

“Human!”

With its entire being bathed in blood-colored halos, Sector Beast Beddy’s left and right hands stretched out one after the other, as though each held an endless universe. Then the fingers on its right hand started to change one by one. Instantly, a whirlpool passageway appeared amidst the golden waves. Soon after, the fingers on its left hand also started to transform one by one, and another whirlpool passageway emerged.

The walls of the two whirlpool passageways were like mirrors that reflected everything from the outside world. Both passageways were intertwined with one another, becoming a mirror of one another. With both mirrors reflecting off each other, the endless world was reflected.

The two whirlpool passageways were intertwined with one another, yet they seemed to have given rise to an endless world.

“Reincarnation passageway!” Sector Beast Beddy initiated a propulsion with both claws.

Hua!

The two intertwining whirlpool passageways formed an endless world of reflections that emitted a bizarre aura. The world moved to enshroud Luo Feng.

“Huh? What profound mystery of the ‘Destruction of Origin’ is this?” Luo Feng said.

He immediately felt that this move bore a whole new sense of novelty. These two intertwining whirlpool passageways seemed to have given rise to a trillion spaces.

“Annihilation of space.”

Blood Ghost Blade, which Luo Feng had been holding safe within his grasp, seemed to change into fine willows. These willows seemed to do a dance of their own accord, which, in turn, brought about endless space ripples. The endless space ripples gathered and condensed, but in the end, they were all brought to a great, boundless annihilation.

Hong!

Luo Feng’s Blood Ghost Blade formed a vast expanse of nothingness; wherever it touched, the golden waves also transformed into nothingness.

Peng! Peng! Peng!

When the two intertwining whirlpool passageways collided against the oppressive force of this nothingness. Instantly, a loud rumble was heard. The two intertwining whirlpool passageways tried their best to advance over and over again, and the billions of worlds of reflections they unleashed brought about a tremendous outburst of power as they exerted their mighty impact over and over again.

The vast nothingness whipped up by Luo Feng’s Blood Ghost Blade was continuously exerting its oppressive force! Regardless of whether it was 1,000 worlds of reflections, 10,000 of them, or even 100 million, all were annihilated!

Hong!

The final two whirlpool passageways completely collapsed. The oppressive force over the void space persisted for another short area before it dissipated.

“What?” Sector Beast Beddy was stunned. “I am now at a disadvantage?” Sector Beast Beddy hesitated no more. “Go!”

Turning around, Beddy immediately took off and escaped with his speed skyrocketing as he moved. 100 times light speed, 1,000 times light speed...

Sector Beast Beddy was maintaining its Sector Light Domain while executing its blood burning technique. Then it executed the move Reincarnation Passageway, which it had acquired upon breaking through to the fifth stage because it had managed to partially comprehend the move of destroying the origin. The moves it was using were the most powerful moves it could use in the range of not causing any great impact on its strength.

Indeed, it possessed the ability to execute a more formidable technique—the most powerful technique, known as “Destruction.” It did not know why, but it was fully capable of executing it. Once executed, even a miniature universe could be easily annihilated. Yet, likewise, the price to be paid was hefty. A large amount of energy would be consumed upon execution. After all, it had just crossed over to the fifth stage and had yet to reach the top tier of the fifth stage! It was reluctant to execute this move yet.

“Escape!” said Beddy. “I shall escape for now. When my power reaches the top tier of the fifth stage, or even the sixth-stage, I will kill him. That won’t be too much longer, either. He has already become a true god. There is no way he can go any further. But I have more than enough room to go higher.”

Beddy may have thought this way, but in its heart, there was a trace of fear. This was the very first time it had been forced to flee!

To date, no one had ever been able to force it to the point of having to escape, yet Luo Feng had brought it to this sorry state.

“Stop.”

Luo Feng executed Endless Golden Ocean and “single thought void space.” At the same time, he pointed afar, and a nine-story Star Tower flew over right away, emitting a dazzling light. Its base was composed of endless darkness, which shrouded Sector Beast Beddy in the distance.

Hong! Long!

An endless black whirlpool crazily devoured Sector Beast Beddy.

“It’s useless.” Sector Beast Beddy executed its blood burning technique. The blood-colored secret engravings all over its body unleashed rays of light that enabled it to easily resist the Star Tower’s devouring.

“Seems like it is not enough.” Luo Feng shook his head and immediately brought back Star Tower. “Go!”

Luo Feng waved again, and a green, plant-structured treasure floated into view. Right away, millions of branches and vines spread out to fill the surroundings, rapidly obscuring an entire chunk of the world. Almost instantly, the faraway Sector Beast Beddy, who was attempting to escape, was enveloped by this treasure.

“I don’t believe you will be able to escape this,” said Luo Feng. Luo Feng’s eyes were filled with murderous intent. “Thousand Strands of Vines is acting in concert with Endless Golden Ocean and a single thought void space. If you are still able to escape, then something must be seriously wrong.”

With a single thought void space, Luo Feng was able to control time and space. Endless Golden Ocean fell under the category of domain-type treasures. And Thousand Strands of Vines was a spiritual weapon and was also a weapon that had the power to restrain. All three were automaton-type treasures! Among them, Thousand Strands of Vines and Pearl of Golden Ocean were commonly used by true gods of void space. These two wielded extremely strong powers. On the other hand, single thought void space was the weakest among the three.

When the three were superimposed... Sector Beast Beddy was trapped.

“Break open! Reincarnation Passageway!”

Beddy, who was trapped within the passageway, could feel itself being surrounded by the ocean, with time and space suppressing it. Far in the distance, countless branches and leaves were densely tangled around it, containing it within a sealed world. It was now inside this sealed world, with its entire body radiating blood-colored halos, trying its best to execute its attacks. Countless strikes were thrown against the numerous branches and leaves, but the branches and leaves were too strong and sturdy. There was no way to break free from them.

“Roar!”

Sector Beast Beddy raised its head and let out an angry roar. Thick veins were forced around its two necks as both its eyes flashed crazy madness.

No escape at all. Luo Feng’s abilities were more than enough to send it to its doom.

That was why he had to charge out now.

There was no other option. Only his most powerful moves were left.

“You want to die?” said Sector Beast Beddy. “Then I shall grant you death!”

Sector Beast Beddy roared. Immediately, it executed its most powerful technique: Destruction...

Chapter 1459: Comprehension under Destruction

After Sector Beast Beddy entered level five, bloody engravings had formed on his originally black skin. As Beddy screamed and performed his supreme technique “Destruction,” the engravings started to flow on the surface of Beddy’s body. Then they swam out of its skin and started to float behind it.

The giant bloody engraving picture floated behind Beddy. There were no longer any engravings on the surface of its body.

Hou!

An ancient scream rumbled, and the enormous engraving image behind Beddy started to gleam with radiant light. The image was like a skeleton, and the light it produced was like skin and flesh. They quickly clotted, forming the silhouette of a Sector Beast with two heads.

It was a Sector Beast formed by the engraving picture, and it was gleaming, putting out endless light.

“Destruction!” Sector Beast Beddy roared.

“Destruction!” roared the enormous Sector Beast silhouette behind it.

The two voices resonated with each other. The combined yelling made even Luo Feng’s soul tremble as he was watching it with single thought void space.

Beddy suddenly reached out its right hand.

Hua!

All five fingers were moving, triggering the space and time around them.

Hong! Long! Long!

An extensive, gleaming white whirlpool appeared out of nowhere. It was billions of times shinier than a star.

“Go!”

Beddy pushed it with its right hand, and the image of the Sector Beast behind it also pushed. The gleaming white whirlpool spun as it flew forward, destroying everything it touched.

Ang!

As the whirlpool portal moved forward, it was still revolving, and the power from its spinning could mince everything.

Peng!

The huge wall of branches and leaves crumbled and scattered. Countless vines were retracted. The giant, oval-shaped mass of huge vines, branches, and leaves dissipated, turning back into the dark green plant valuable, Thousand Strands of Vines.

The whirlpool portal seemed to be moving slowly. However, that was because of the illusion that time almost stopped. On the contrary, it was moving rapidly. After piercing through Thousand Strands of Vines, it charged at Luo Feng in the distance. There was a nine-level tower standing in the golden waves in the distance. Luo Feng had already entered Star Tower. Even though he was confident that he could resist the attack, Luo Feng still couldn’t afford to be reckless.

“Die!” Sector Beast Beddy gazed at Luo Feng in the distance, its eyes twinkling expectantly.

In Star Tower, Luo Feng watched the glowing whirlpool portal rushing at him.

“Destruction? Is this Destruction? This is the most powerful attack technique out of all the six levels of Sector Beasts, which contains part of the ‘destruction origin.’”

Luo Feng was thrilled. Weaker true gods would only feel that the power was immense and extensive; they wouldn’t have been able to discern the mysteries behind it.

As for Luo Feng, he could understand some of the mysteries! Even though he was also a true god, he was a true god who could create techniques at top-tier level 11, which meant he was already as

powerful as ordinary true gods of void space! If he was willing, he could certainly morph his miniature universe to a higher level, becoming a true god of void space after that!

There was only one threshold to becoming a true god of void space. As long as someone was able to create techniques at top-tier level ten, they would be able to become a true god of void space, just like Teacher Origin.

As for Divine Eye True Master, Jue He True God, and Primal Chaos City Leader, they were only able to create techniques at top-tier level nine. It was exceedingly difficult for them to break through! Similarly, most universe masters could only create techniques at top-tier level five, and it was difficult for them to advance.

Luo Feng had become a true god after his godly body reached 100,000 times, which was more difficult than becoming an eternal true god... Besides, he had a solid foundation and had gained a lot when comprehending the evolution of chaos, so he was able to create techniques at top-tier level 11... Yet Luo Feng didn't dare to become a true god of void space now!

Once he became a true god of void space, he needed to go transcend incarnations within a very short period of time. That meant he would lose the chance to resist the Sector Beasts, and when he was transcending incarnations, Sector Beasts could go and swallow his miniature universe. They would destroy the original universe, and the entire human race would go extinct. The earthlings and all Luo Feng's family members would die. That was something Luo Feng wouldn't allow to happen. No matter how powerful he was now, he didn't dare to achieve a breakthrough. Instead, he remained at the level of a true god. It was the only way he would have enough time to fight the Sector Beasts.

"Is that the destruction origin? And the original universe is the life origin..." Luo Feng was mesmerized by this move. "That whirlpool portal represents part of the destruction origin, yet it's so shiny and bright?"

The white and gleaming whirlpool portal coming at Luo Feng cast a reflection on his eyes. He kept discovering the mysteries of the whirlpool portal, and in the distance, his godly power avatar was studying and comprehending in the space of the black-striped stone pillar, where time moved ten million times faster, to improve himself.

"Destruction..."

He had never met the destruction origin before. He was a creature born in the original universe, so he was totally amazed by this move.

Hong!

Time was almost frozen, and the gleaming whirlpool portal suddenly hit the nine-level tower, blasting the entire Star Tower away.

"What an amazing move." Luo Feng was thrilled. "That Beddy doesn't have Wu Qi God, Shi Wu Wing, and Blood Shadow Blade. All it has is its own power, yet it's still able to put out such power. If I didn't have Star Tower, I would be at a severe disadvantage even if I could resist the attack."

The whirlpool portal struck Star Tower. Luo Feng could clearly sense how powerful the move was, and he could immediately tell that he was able to resist it.

The prerequisite was that he had Wu Qi God and Blood Shadow Blade!

“Hide in Star Tower all you want if you’re such a coward,” Sector Beast Beddy said savagely. The enormous image of the Sector Beast behind it had disappeared while that bloody engraving picture merged with its skin.

Sou!

Sector Beast Beddy turned around and started to flee. It wasn’t stupid. Luo Feng could easily resist Destruction by hiding in Star Tower, so there was no point for it to keep fighting.

“You’re the most powerful Sector Beast, Beddy,” said Luo Feng. “Why are you leaving so soon?”

Star Tower quickly flew toward Beddy.

Hua! Hua! Hua!

Both Pearl of the Golden Ocean and Shi Wu Wing were trying to control the golden waves and the time and space that were frozen in place. They were both constricting Beddy. Luo Feng was already terrifically fast under his limit, and Beddy was strictly suppressed, so they were getting closer and closer.

“Damn it.” Beddy looked ferocious. It was so furious that it was clenching its teeth.

It didn’t bother to separate its body, as it knew that if it did, those 99 bodies wouldn’t be able to resist Star Tower.

Sou!

Star Tower rushed at Beddy, getting closer to it.

“Beddy!” yelled Beddy.

Hong! Long!

A godly power wave immediately rushed out, enveloping Beddy, who was trying to run away. Although godly power itself couldn’t do much to slow it down, it was like tossing red-hot iron into water, and when the godly power ocean surrounded Sector Beast Beddy—

Chi! Chi! Chi!

The godly power and the power of the Sector Beasts kept consuming each other. Beddy was infuriated. It had never been suppressed like this in its life. Now, it understood that the godly power of Milky Way Horde Leader was much greater than he was, which was why he had dared to use that move.

“Do you really think you can kill me with that move?” Beddy looked at Star Tower with both its heads. “Come out and fight me if you dare.”

“Okay.”

A white being flew out of Star Tower.

Beddy was astounded. He hadn't expected Milky Way Horde Leader to be brave enough to fly out of Star Tower.

Isn't he afraid that I'm going to kill him? Beddy wondered, confused.

Beddy had been forced into a difficult situation and had almost decided to use Sector Light Portal to run away, as that was the ultimate means of escape. But once it was performed, it had to burn its own "sector," reducing the level of its sector by at least one full level.

Beddy was a Sector Beast at level five, so if it performed Sector Light Portal, it would at least drop down to level four, which meant it would at least need to eat 30 Sector Beasts at level four to get back to level five. It wouldn't resort to that move unless its very life was threatened.

"Beddy!" Luo Feng flew toward Beddy with Blood Shadow Blade in hand. "I respect you and will kill you in a fight."

"Arrogant!" Beddy grew even angrier.

All of a sudden, bloody engravings appeared on its skin again and were spinning around its godly body. They flew behind its body, and it started to glow. The light quickly condensed. The bloody engravings were like the skeleton, forming a gleaming Sector Beast once again. Beddy and the Sector Beast image utilized the same move. They both reached out their right hands.

"Destruction!"

Beddy performed its most powerful move yet again. Though it also consumed a great deal of energy, it wasn't as relentless as Sector Light Portal.

"Great." Luo Feng stared at the radiant, gleaming whirlpool portal, trying to study it.

Why had Luo Feng come out to fight it? Because he wanted to witness the move "Destruction." Destruction contained part of the destruction origin, and unless he was fighting a Sector Beast, he didn't have any other chance to comprehend it.

"So, that's how it works..."

While Luo Feng was watching it, his godly power body was analyzing it in a place where time moved ten million times faster.

Beddy glared at Luo Feng, clenching its teeth. "Die!"

Hong!

The gleaming whirlpool portal crushed everything in its path and flew at Luo Feng. It destroyed all it touched. Nothing could stop this whirlpool portal that represented destruction, yet Luo Feng stood still with his Blood Shadow Blade, concentrating on the whirlpool portal.

Luo Feng suddenly waved the Blood Shadow Blade in his hands. "Light wing."

Blade light burst forth, and all of a sudden, an enormous white dragon with huge wings appeared. The dragon was over 100 million kilometers long. Its individual scales were distinct. Each scale was brighter

than a star, and the eyes looked indifferent. It shook its wings, then struck the whirlpool portal with its head lowered.

Hong! Hong! Hong!

The whirlpool portal and the light wing dragon suddenly struck each other.

Luo Feng was as powerful as a true god of void space, and he had Wu Qi God, Blood Shadow Blade, and Duan Mie. The attack was just as powerful as a top-tier true god of void space and could have destroyed a miniature universe.

Chapter 1460: Establish a Universe with a Single Thought

Hong!

It was like the destruction of the universe. Endless waves of impact howled, then spread out, sweeping in all directions. A portion of the incomplete whirlpool passageways that collided against the surface of Luo Feng's Blood Ghost Blade sent him rolling and flying into the distance.

Pu!

The strong impact upon being hit caused Luo Feng great discomfort. Instantly, he spat out a mouthful of blood. After becoming a true god, Luo Feng's blood had changed to the normal red color of ordinary blood.

"How mysterious. How very mysterious."

Luo Feng was not the least bit angry. On the contrary, he was filled with delight. The first round, he had merely observed how Star Tower fought and resisted against Destruction. But this time around, he was wielding Blood Ghost Blade with his own hands and resisting Destruction personally. Now, he had a clearer comprehension of the "origin of destruction." Naturally, he had gained much more than before.

As for that mouthful of blood he had spat out? Was it a big deal? It was nothing to worry about at all!

As for the consumption of his godly body, given Luo Feng's massive godly body, it was negligible.

Sector Beast Beddy saw how Luo Feng was able to transform back into a streak of flowing light to charge at it after spitting out a mouthful of blood. It was flabbergasted. "You—you can resist that...?"

It had never occurred to Beddy that Milky Way Horde Leader would actually be able to resist Destruction upfront, without the help of any treasures such as the palace-type treasure, Star Tower.

"Is this your strongest move?" said Luo Feng. "It's so average!"

Luo Feng tore his way through space. Blood Ghost Blade appeared in his hands once again. A blade ray sliced through space. His blade transformed into a gigantic, luminous winged dragon. The resplendent dragon, illuminated with white light, was gracefully flapping its wings as it directed itself towards Beddy. Then, without hesitation, it swooped toward the Sector Beast.

Sector Beast Beddy dared not forcibly resist. It was aware that this move Luo Feng had made was only one notch less superior than Destruction. If Beddy was hit by Luo Feng's attack, the amount of power it would lose would almost be the same as what it required to execute Destruction once. Since the exchange of blows had started up until now, it had already executed Destruction twice. Beddy was merely a Sector Beast that had only just crossed over to the fifth stage—meaning to say that it had yet to reach the top level. If it continued executing this move, then at this rate, Luo Feng need not even lift a finger; Beddy would already be devoid of the strength to resist.

“Split!”

Sector Beast Beddy divided its body into 99 avatars, which then fled in all directions.

Ao!

The dazzling white dragon raised its head and, with a loud roar, was instantly disintegrated into 1,000 streaks of white light. These streaks of light burst out and shot toward the 99 avatars. Then, suddenly, those among the 99 avatars that were bombarded by the streaks of white light were dispersed to nothingness. Eventually, all that was left was the original body of Beddy on the run. Its original body had been hit by three streaks of white light, but Beddy was still on the run, escaping as fast as it could.

“Beddy, I am out now,” said Luo Feng, “yet you reject the chance to do battle?”

Luo Feng's speed obviously surpassed Beddy's, as he was rapidly closing up the distance between them.

Beddy did not make a single utterance in reply. All it did was try its best to escape from Luo Feng.

“How about another round? That move of yours—isn't it meant to be very impressive?”

The closer Luo Feng was, the more he lamented the misfortune. From Morosa, he had learned that the number of ordinary fifth-stage Sector Beasts who were able to execute Destruction was not great to begin with. To execute the move, the amount of power exhausted was too great a toll to pay.

Apparently, at the moment, Beddy was no longer willing to execute the move again.

“If only I could observe it a few more times, it would definitely be a great advantage for me,” Luo Feng complained to himself.

He had felt Destruction twice, and it was a shocking advantage he had gained. He felt that so long as he could digest the information a little more, he would be able to create a secret technique at the 12th tier!

It was important to note that every step forward was only going to get tougher... Besides, Luo Feng had set the reins and limited himself to the true god level, so technically, it was even more difficult for him to level up. True god, true god of void space, and eternal true god—how was he going to ascend to the different levels?

Firstly, through normal comprehension. Secondly, by observing the evolution of his own miniature universe!

If the miniature universe of a true god was too small, the level of insight that its evolution entailed would also be lower. Like the birth and destruction of the primal universe, it was so deeply profound that even countless great beings from the ancient civilization were eager to lay their eyes on it. This was

the exact reason why Sitting Mountain Guest had wanted Luo Feng to make such a request from the willpower of the primal universe origin!

The miniature universe of a true god was the smallest, whereas the miniature universe of a true god of void space was slightly bigger. The internal evolution of a true god of void space involved a deeper level of insight. The miniature universe of an eternal true god was even more massive, and the internal operation was, thus, even more mystical.

He was constantly increasing! If Luo Feng achieved a breakthrough to become a true god, he believed that the improvement he would make in comprehending his miniature universe would be much faster. But he dared not, at the moment, because he needed to limit himself to the level of a true god!

“Since this is what you are going to do, then you only have yourself to blame,” Luo Feng said, letting out a snort. A wave of godly power came surging out and rapidly. It moved to bind Sector Beast Beddy, which was not too far away.

Chi! Chi! Chi!

His godly power and the power of Sector Beast were consuming each other crazily.

The two heads of Sector Beast Beddy turned to look at Luo Feng. It gave Luo Feng a dead stare, and through gritted teeth, it said, “Milky Way Horde Leader, I will remember this.” Sector Beast Beddy raised its head suddenly to let out a roar of reluctance. “Ah!”

Its roar sounded full of madness and sorrow. Along with the roar, its body was radiating rich, colorful lights. The most important “sector” within its body was burning like crazy. This was a recourse that Sector Beasts were most unwilling to take. For the most powerful of all Sector Beasts to have to make this choice meant that if it ever wanted to climb back up to its rank as number one, the difficulty would increase by tens of thousands of times.

“Not good.”

Luo Feng became aware right away that this Sector Beast, Beddy, wanted to execute Sector Light Passageway!

Buzz!

Behind him, five pairs of resplendent wings were outspread. They were all blazing to the maximum limit as they madly infused godly power into Shi Wu Wings. The fourth pair of wings were activated, and instantly, every secret engraving on this fourth pair of wings lit up dazzlingly. A single thought void space dissipated without further delay, while at the same time, a miniature universe with a diameter of up to 10,000 light years was born out of nowhere!

There was chaotic airflow everywhere. The golden waves that were formed by Pearl of the Golden Ocean made up only a small region of the entire miniature universe. This was the fourth stage of Shi Wu Wings: “establish a universe with a single thought”!

“No!” cried Beddy. The Sector Light Passageway, which was about to complete its formation, was suddenly oppressed by the power of the origin of Luo Feng’s miniature universe. Immediately, it

collapsed. This brought a look of terror to Sector Beast Beddy's face. It was reluctant. It went mad, shouting, "Another time, blaze!"

Hong!

The colorful light radiated by Sector Beast Beddy was much richer. It had only intended to lower down to the fourth stage, but now, it could not be bothered with anything else. Even if it had to be lowered to the third stage, it would accept its fate. So long as it could escape, nothing else mattered.

Hong!

Under the pressure exerted by the great origin of the miniature universe, Sector Light Passageway was unable to take form.

"This—this... This..."

Beddy was desperate. It did not have any power left for consumption. This was because, falling from the fifth to the fourth stage, the energy of the sector light produced was most abundant; from the fourth to the third stage, the energy that the sector light produced was much lesser. There was no need to even mention the energy produced for the next transition downward.

It had fallen all the way from the fifth stage to the third stage just like that, and yet was so easily subdued. Such a gap in ability—from resistance to total helplessness... This made it clear to Sector Beast Beddy that even if he were to add more sector light energy, anything he did would be useless.

"How is this possible?" said Sector Beast Beddy. "How can it be that I...? I have already crossed over to the fifth stage..." Beddy found this hard to believe. It looked around at the omnipresent, chaotic airflow, then back at the faraway Luo Feng.

Luo Feng merely smiled. He could execute the move of "establish a universe with a single thought" all thanks to Sector Beast Beddy. Before they had exchanged fire, he had still been a hair's breadth away from fully comprehending the fourth stage of Shi Wu Wings! That tiny margin that separated him from complete comprehension hindered his success of breaking through. And yet, by witnessing Sector Beast Beddy execute Destruction (which was also the first time Beddy had used it), he had been able to gain an understanding, and thus, he could rapidly overcome that tiny margin of comprehension preventing him from learning how to activate the fourth stage of Shi Wu Wings.

And when Sector Beast Beddy executed Destruction the second time, Luo Feng had been able to comprehend even more. To establish a single thought void space! To establish a universe with a single thought!

Both were methods of controlling time and space. While the control utilized by "single thought void space" was considered limited, that of "establish a universe with a single thought" gave rise to control over a miniature universe. It was so strong that it was terrifying. To be able to establish a universe—how could Sector Light Passageway possibly break free?

"Accept death."

Star Tower flew out from the middle of Luo Feng's hand immediately. It hovered suspended in midair, and from its base, endless dark whirlpools were forming to enshroud Sector Beast Beddy in the distance.

Having fallen all the way back to a third-stage Sector Beast, Beddy was simply powerless against the dual controlling powers of Star Tower and Luo Feng's miniature universe.

"You are so vicious!" said Sector Beast Beddy, bound by the dark whirlpool and compelled to fly toward the black hole at the base of Star Tower. It gave Luo Feng, who stood a distance away, a blank stare as it roared, "Milky Way Horde Leader, you are indeed the greatest obstruction in the way of the entire Sector Beast clan! However... no one has ever succeeded at stopping the rise of us Sector Beasts—no one at all! All who try to stop us will all be destroyed by us!"

Sector Beast Beddy stared daggers at Luo Feng.

"You... and all of your race," said Beddy. "It's destiny that all of you will be destroyed! This is your fate, and there is no way you can defy fate. Hahaha..."

Hong!

Sector Beast Beddy's entire being exploded in a loud blast. Then, there was nothingness.

Luo Feng watched the entire scene from afar. Beddy had chosen to self-destruct. There was simply nothing he could do.

Back when Morosa had attempted to self-destruct, he had only been at the level of a second-stage pinnacle Sector Beast. Luo Feng had been able to rely on the suppression power of Star Tower, the power of the origin of his miniature universe, and the power of single thought void space. Superimposing these three layers, he had been able to keep Morosa under suppression so that it was unable to self-destruct. But even if Beddy had been downgraded, it would still have been at the third-stage pinnacle level, while he only had the power of the origin of his miniature universe, which he could use as suppression!

The ability to establish a universe with a single thought—when compared to ordinary true gods' miniature universes—was undoubtedly much more powerful, but it was still a far cry from Luo Feng's formidable and powerful miniature universe.

Beddy was annihilated!

Right before Beddy was annihilated, it would, unquestionably, transmit any information it desired to the other Sector Beasts to know (excluding Morosa) right away. That way, they could detect the news without delay.

The Sector Beasts' nest fell into total darkness. Nearly ten million Sector Beasts were scattered all over. On normal days, these beasts would be fighting one another in life-and-death battles just for the chance to emerge as the final king of the pack. They were natural-born destroyers! Noble as they were, they had never looked up to any of the other races in Universe Ocean. In their eyes, even those in their breeding period, the various other races of Universe Ocean were merely food.

“I am Beddy!” read the message. “Universe Ocean’s Number One Master, Milky Way Horde Leader Luo Feng, has penetrated the heart of our Land of Darkness! He has already entered the heart of our Land of Darkness! I might have crossed over to the fifth stage. But I am still not his match. He is much stronger than any of us expected. All Sector Beasts, our moment of life-and-death crisis has truly arrived... When it comes to confronting this Milky Way Horde Leader, if we do not unite in the face of this enemy, we Sector Beasts will all perish at his hands.

“This is the greatest crisis we Sector Beasts face! All of us must face this crisis together! Abandon all fighting. Together, we must join forces to annihilate Milky Way Horde Leader! I have executed Sector Light Passageway, yet I am still unable to escape. I must self-destruct, but all my fellow Sector Beasts, bear this in mind... I, a fifth-stage Sector Beast, Beddy, have died at the hands of Luo Feng! And all of you have to kill him! Kill Milky Way Horde Leader! Kill Milky Way Horde Leader!”

Sector Beast Beddy’s voice resonated within the hearts of close to ten million Sector Beasts of the Land of Darkness. At that moment, regardless of how wild their ambitious minds were, every single Sector Beast fell silent.

Almost ten million Sector Beasts were densely crowded together, yet at that moment, there was an unprecedented silence, demonstrating that all of them were in unison.

Shortly after, they all came to realize that “Beddy,” whom they had all been able to detect earlier, had suddenly vanished.

Beddy had been annihilated!

“Roar!”

“Roar!”

“Roar!”

Tens of millions of Sector Beasts in the entire Sector Beast nest raised their heads and roared as one. Amidst their roars, was endless rage and madness.

“Kill Milky Way Horde Leader!”

“Kill Milky Way Horde Leader!”

“Kill Milky Way Horde Leader!”

One by one, the Sector Beasts were transmitting their own voices. Every single Sector Beast could hear the countless voices of its fellow Sector Beasts. Tens of millions of them were all transmitting their voices in sync, in the same rhythm and tone, all sending the same message: “Kill Milky Way Horde Leader!”
