

SWALLOWED 691

Chapter 691: Calling

With that formless calling, his skin felt somewhat numb, his cells within boiling, including his bones, organs etc...this level of calling, made Luo Feng's entire body shudder, almost like it was desperately telling him...come, quickly, come here!

"Your majesty Luo Feng, where should we go, there are rubbish mountains all about." The black skinned white robed guide asked.

"There!"

Luo Feng pointed at a distant rubbish mountain.

"Yes!"

The 2 guides complied and used their world energy to wrap Luo Feng, the 3 became a beam of light and headed towards that majestic mountain, it seemed close but was actually very far away, at a speed of 100k km per second, it took over 3 hours to get there.

"Your majesty can enter the mountain to look for treasures, the 2 of us will wait here, when you are done, you can call us." The black skinned guide said respectfully.

"Hm?"

Luo Feng frowned, because he felt that the calling wasn't very strong as he flew towards the mountain...the mountain was like a large planet, with a diameter of hundreds of thousands of km. After flying around, he flew behind the mountain.

Luo Feng looked into the distant space with his back facing the mountain

"It's still further away, the thing that's calling me isn't here in this mountain, but in a much further place!" Luo Feng looked curiously into the distance, there were many goods about, far away, he could faintly see another rubbish mountain...Luo Feng couldn't fully confirm whether the item calling him was in that mountain!

Anyway!

It was in that direction.

...

Sou!

Luo Feng returned to the 2 guides.

"Your majesty is done already?" The 2 were shocked at Luo Feng's return, it was too quick.

"I don't wish to search in this mountain," Luo Feng shook his head and pointed into the distance, "Let's continue in that direction, I'm basing which mountain to search, through my gut feeling."

"These absolute geniuses sure have weird temperaments, using gut feeling to search...he said this mountain earlier, then changed his mind so quickly, seriously! However, it's just our luck it was Long Jue emperor that arranged us for him." The 2 sector lord pinnacle guides muttered within, their expressions however were still passionate and respectful, "Yes your majesty Luo Feng."

They released their world energy again and wrapped Luo Feng, the 3 became a beam of light and flew.

Continuous flying...

Flying over a rubbish mountain, the calling still wasn't from that mountain, they continued...

Mountain after mountain, they flew for 16 days straight, the 2 guides muttered within that this genius was hard to deal with, spending so much time just picking one mountain, however they didn't dare go against him, since it was Long Jue emperor's order, they had to do their job well, flying non stop.

"Rumble..." They flew around a rubbish mountain and the formless calling caused Luo Feng's entire body to shudder, his blood boiled from within, he felt like his body was about to explode.

"Right here!"

"I want to look for treasure here!" Luo Feng flew to their side and said.

The 2 guides glanced at each other and sighed with relief, this Luo Feng had finally decided on a mountain to search, they flew for 16 days straight, maintaining a speed of 100k km per second, how was that easy?

"The 2 of us will wait here for you." The black skinned white robe guide said.

"Hm."

Luo Feng couldn't wait anymore, flying straight into that mountain.

Watching Luo Feng swiftly head towards the mountain becoming a little black dot and entering it, the 2 guides relaxed, stretching their muscles, the green skinned guide said, "We sure are unlucky this time, simply finding this one mountain was this troublesome, the next one will probably be the same."

"Grasp the time to rest, I'm preparing to go play some virtual games." The black skinned guide stood in space, sending a thread of consciousness into the virtual universe network to play some games.

Luo Feng was tunneling through the rubbish mountain, it had a diameter of hundreds of thousands of km, with all sorts of rotten remains mixed within, Luo Feng was like a mole tunneling within.

"It's close."

"Close."

The closer he got, the more he felt the powerful calling, his entire body shuddered.

After tunneling tens of thousands of km deeper, he frowned, he could feel many messed up calls from all over, some from the left, some on the right, some ahead, a total of over 10 calls with different levels of strengths.

There were actually over 10 of them!

"It seems like there's more than 1 item." Luo Feng stopped awhile, picking the strongest one to fly towards, simultaneously using his formless spirit energy to force apart large amounts of remains before him, creating a tunnel, after moving another 30k km, he finally stopped.

Ahead, there floated an armor fragment, the surrounding items were forced apart by his spirit energy.

The ripples emanated from this fragment.

Armor fragment?

"What is this?" Luo Feng carefully examined it, this fragment was about the size of a normal book of earth, it was completely black, floating there.

Luo Feng carefully approached it.

As he reached about 5m away from it, the dead floating fragment suddenly jumped to life, it shook violently and rushed straight at Luo Feng, as fast as lightning, instantly reaching his right hand and touching his skin, trying hard to dig into his body.

"Chi!" A green layer appeared on the surface of his hand, it was the cloud contact armor.

It forcefully prevented the fragment from digging in.

"Hm?"

Luo Feng used his spirit energy to try and force it away, but he was shocked to realize...simply relying on his spirit energy, he wasn't strong enough to even stop it from trying to dig into his body! Immediately, thin vines extended from his fingers, it was one of the main 216 vines.

This slender and thin green vine instantly wrapped about the fragment, its leaves gripping hard on it.

The fragment struggled hard within.

However it was forcefully subdued by the cloud contact vine.

"Just what is this, it looks like something dead, but it tried to dig into my skin when I got close." Luo Feng frowned and pondered, "And it emanates a calling to me, obviously...no one else that came here could feel it, and if they felt it, they would definitely have discovered it, even if they didn't know what it was, they would still have taken it away."

Trillions of years!

Seeing many rotten remains about, it was obvious that this bunch of items deep within this rubbish mountain had been here since ancient times, there had been many people searching for treasures in Wu Long Starfield before, yet none have taken it away.

"Weird."

"Why call out to me? Why can't others feel it?"

Luo Feng frowned, "I'm not that special compared to others, is it the blood river energy? No, there are definitely many from the virtual universe company that have absorbed the energy, is it because I've trained in the nameless manual I discovered on earth? Or is it because I'm from earth?"

He had no way to confirm the reason, however he didn't dare let it enter his body, if it was beneficial that would be good, however if it was bad, it'd be too late to regret it.

"Hm."

He flipped his hand and retrieved a silver world ring, this was the one Long Jue emperor gave him, the world within was 100k km wide and high, he could store whatever he found in the rubbish mountain in it, nothing more than that. And within Wu Long Starfield's surveillance system, it could detect all objects within.

Whatever he took would be calculated and the moment the mass filled up the 100k km area, it would naturally be recorded.

"I'll put the main core in the world first, even if my earth body encounters danger, it's no big deal, I'll just make another body." Luo Feng flipped his hand and a black stone appeared, this was the moshu clansman in the shape of a stone, within it lay the main core.

With a thought, he tossed the stone into the silver world ring.

Luo Feng had already left his soul imprint on this world ring when he was searching for treasure earlier.

"Alright, the main core is in the ring." Luo Feng looked at the black armor fragment, "Come."

The vines swiftly released the fragment and the moment it did, it immediately rushed at Luo Feng's finger, the moment it came in contact with his skin, it became a black liquid that went through his skin, as it went in, Luo Feng could feel a sense of energy from within.

"It's that special?" With a thought, a black armor appeared on his arm, this armor...was exactly the same as the fragment before.

This black armor could change from big to small, the biggest it got was only as big as the original fragment was. It covered his arm almost like a arm protector.

"What power."

Luo Feng could feel like his arm had an incredible power, one punch was akin to a sector lord pinnacle warrior's strength, it was a strength this black armor gave him, even though it came from the armor, it felt like it was a part of him.

Unlike the cloud contact vine's strength, that only the vine could unleash.

This armor...Luo Feng was in total control!

"Just one fragment has the strength of a sector lord level 9 warrior?" Luo Feng was shocked, he couldn't care much about anything else, immediately moving on to search for the others.

...

Sou!

He tunneled through the rubbish mountain and searched through the items, they were all armor fragments, after awhile, he had collected all the special items in this mountain.

"Plus the original one I found, there's a total of 18 black armor fragments, 1 silver fragment." Luo Feng had already stripped naked, allowing the 18 black fragments to enter his body. These 18 became black liquid and the largest armor it formed...a black vest.

However the amount of strength it gave him!

Was akin to over 20 sector lord pinnacle warriors.

"Just what is this special black armor fragment?" Luo Feng looked at the black vest, shocked within, "It actually gives me so much power! This is obviously still only a broken part of it...as for the silver fragment!"

Luo Feng looked at the palm size silver fragment in his hand.

He had already tried, only after forcing all the black fragments out of his body was he able to absorb the silver fragment. Just the palm size fragment alone, gave him the power of 5 sector lord pinnacle warriors.

"The silver fragment has 10 times the effect of the black, it's obviously higher in level."

"However!"

"The 2 obviously don't work well together." Luo Feng thought.

Luo Feng stood naked within the depths of the mountain, looking at the forced out black fragments and the silver arm protector, his eyes gleaming.

Chapter 692: Soldier

"Who knows how long these fragments have been left thrown aside in rubbish mountains." Luo Feng looked at the black fragments, "Yet it was able to call out to me, if it isn't because of me being from earth, it would probably be because of the nameless manual."

He had thoroughly considered his situation.

There were only 2 things special that were different from the other humans that have come to Wu Long starfield, without a doubt, 1 was because he was from earth. The 2nd was the mysterious metal board that held techniques within, its words within from the Flame god race. It was a powerful race independent of humanity in the universe.

As it was a different race, they could naturally have their own training system, armor etc, and one may have to be trained in the nameless manual to be able to use it.

"These are all guesses, I need to test it to verify." The cloud contact vine spread over Luo Feng's body, forming a green armor, he forced out both the black and silver fragments and kept them in his internal world.

...

Flying out of the rubbish mountain, he floated in space and focused on his sensing abilities, seeing if there are any other hints of the fragments calling out to him.

"Hm, there are?" Luo Feng's eyes gleamed, looking in another direction and smiling, "My guess was right, these fragments were probably shipped here after an ancient race war from long ago. And as the machines cannot detect their special qualities, and the one's scanning them would deem them as worthless metals, hence they were placed in rubbish mountain. As there are many rubbish mountains, they could be scattered all over."

There was a very weak feeling from the left side.

"Your majesty Luo Feng."

The 2 guides saw Luo Feng coming over, they bowed respectfully.

"Let's go." Luo Feng said.

"Where to, to the nearest rest top to universe travel, or to continue looking for rubbish mountains?" The 2 guides looked at him, they were most afraid of going on a pointless short trip, the flight back would take ten over days along with universe travel...it was better to continue searching around from nearby rubbish mountains.

That was easiest for the 2 of them.

"Continue looking for rubbish mountains." Luo Feng said.

"Yes." The 2 were gleeful.

"Head in that direction." Luo Feng pointed after determining the calling.

The 2 immediately released their world energy and brought Luo Feng there.

...

After progressing about 3 to 4 days, they realized their joy was short lived, this Luo Feng was extremely hard to please, they flew past many rubbish mountains and yet he didn't even glance at them, they could only keep rushing forward, sending threads of consciousness into the virtual universe to relax within.

After 21 days of flight, Luo Feng finally asked to stop.

After flying 1 round about the floating mountain, Luo Feng determined that there was something calling him from within.

"You 2 can stay here." With that, he tunneled into the mountain and began searching for treasure.

After a while.

Luo Feng had found 9 black fragments and 1 silver fragment, simultaneously gathering a few tens of km in diameter of metal and alloy remains, he had to put on an act, otherwise simply collecting these fragments, how could it fill up the 100 k area world ring.

After which he let the 2 guides bring him again to search for more fragments.

As time passed, the 2 realized it was their bad luck to be placed with Luo Feng, because Luo Feng was purely relying on his senses to find rubbish mountains to search in, they would frequently have trips over 10 days to get to different mountains. After which they would use their ships to go through universe travel, stopping at certain points, not feeling anything, they'd immediately continue on to the next spot.

...

"You 2 can stay here." With those words, Luo Feng headed straight towards another floating rubbish mountain.

Within the mountain.

Luo Feng was already used to the calling of the fragments, he easily found 8 of them, 7 black and 1 silver.

"Currently I have 118 black fragments and 6 silver fragment along with 1 shard." Luo Feng flipped his hand and retrieved the items from his internal world, instantly a blur of black fragments floated before him, along with a few silver fragments and one shard.

Luo Feng looked at the items

The effects of the black and silver fragments, he had some understanding of them, only the shard...it too had the power of calling, it probably came from the same place as the fragments, however he hadn't found a way to use it.

Dripping blood on it?

Touching skin?

Spirit energy?

Luo Feng had tried all methods he had heard and knew on it, however it was useless against it, almost like it was a very normal piece of a shard without any worth, even its sharpness was average. The only special thing about it was its calling ability, hence Luo Feng had collected it.

"No matter, right now I already have 118 black fragments, it almost covered my entire body last time, with these new 7, it should be complete." With a thought, the cloud contact vine swiftly entered within his body.

Sou! Sou! Sou! Sou! Sou! Sou!

Almost like arrows, the 118 fragments shot at Luo Feng and as it touched him, they swiftly became black liquids that entered his skin, beginning to gather within his body. The mysterious black liquids seemed to become one with his skin and muscles.

As they made contact with each other, they swiftly condensed and grew more and more.

Rumble...

A huge change happened.

"What?" Luo Feng was shocked, carefully scanning his body.

When they had condensed to a certain level, a huge change occurred, they forced out the excess black liquid from Luo Feng's body, all purely from the black fragments will. 2 black fragments gradually floated out from Luo Feng's chest, after which they fell.

Saturation!

The black liquid within Luo Feng had reached a level of saturation, they could no longer take in anymore.

"I knew there was no way I could simply keep adding to it, there had to be a limit. Now it's saturated." Luo Feng felt the change happening within, the black liquids rumbled as they reached their limits, it was so clear Luo Feng could hear it in his ears.

The change stopped.

"This is?" Luo Feng looked at his bare chest, on it was a black engraving.

A very complex word, yet he recognized it as that of the Flame god race.

A simply word...Soldier!

"Soldier?" Luo Feng looked at the Soldier print on his chest, after which the word hid itself, even though one couldn't see it visibly, Luo Feng could still feel it hidden in his chest, after all, all of the black liquid's energy was completely infused in the print, and every time Luo Feng had absorbed the fragments, the moment he forced them out of his body, they would automatically break apart into the original fragments.

This time however!

They had completely combined to form the Soldier print.

"Soldier?" Luo Feng frowned, "Flame god words? Looks like it's really because of the nameless manual. This Soldier, is it from the Flame god race, or some mysterious race's lowest level soldier?"

"This mysterious armor, I'll call it the soldier armor then." Luo Feng thought.

With a thought, he triggered the print and immediately black threads covered his entire body, simultaneously a malevolent black armor appeared on his body, with a helmet and boots etc, an incredibly energy poured through his body, the armor felt like his skin.

This strength was just like his own.

With his senses he guessed that, it was probably about 80-90 sector lord pinnacles strength gathered!

"Feels terrible." Luo Feng who was covered in the mysterious armor felt pain throughout his body, after becoming the master of this soldier armor, he knew basic information about it, "This armor, after it

forms the print, only then does it become a perfect armor. It can grow bigger and smaller, infinitely malleable in size. However it all has to be triggered by the body, it has huge requirements on the body. I'm currently only domain lord level 9, my body is too weak...I cannot fully withstand the strength of this mysterious soldier armor."

Soldier armor, it contained energy within.

Just his earth body alone could trigger 80 - 90 sector lord pinnacle warriors' strength! However this was but a part of the armor, the main thing was Luo Feng's body was too weak and had no capability of fully utilizing it.

And however big Luo Feng could grow, the armor would follow.

Naturally because it was controlled by the body.

"My body is weak."

"However, the golden horned beast's body is very strong, and it's also trained in the nameless manual." Luo Feng was happy within, immediately forcing out the armor, a black round ball instantly flew out and on it, there was a faint Soldier print.

With a thought, the Soldier ball vanished into his internal world.

...

Internal world.

The mountain range like golden horned beast was lying in the grass when the Soldier ball appeared.

Howl... The beast extended its right claw at the ball and the ball immediately became a liquid that flowed into the beast's body, as it was a complete soldier ball, naturally...the word Soldier appeared across the beast's scaled chest, after which it disappeared within.

The beast stood up.

He howled and triggered the power of the print.

Chi chi chi...the print shot out trillions of black threads that covered every bit of the golden horned beast, in an instant, all of its scales, including its horns and claws were covered in a very thin layer of black armor, making it look completely black.

Even its gold engravings were completely covered.

Howl...

The golden horned beast felt immense power flowing within, he howled in joy, it could almost feel no stress on its body, getting even more thrilled with the feeling, this was probably the limit of strength the armor could produce, at this time, the amplitude strength of the beast was at a shocking level, it had reached the level of 1,000 sector lord pinnacle warriors, this was the true strength of the armor!

Chapter 693: 2 years

"Deities of the world!" The golden horned beast howled, immediately unleashing its natural ability, its over 1,200 km body and tail began to shrink, getting faster as it shrank, in the blink of an eye, it became a little beast only a 100km long.

As its bone and muscle density, along with its scales etc all rose, its body was naturally much more powerful.

And mixed within each scale and claw was a very thin layer of black armor, the energy it held was infused within the beast's body, it was a terrifying amount of strength!

"It's exactly as I expected." The black clothed Luo Feng stood beneath the huge golden horned beast and looked up, "The beast had already pushed the armor to its limits earlier, even unleashing deities of the world, it still triggers about 1,000 sector lord pinnacle amount of strength from the armor, this is probably its limit."

"Hm."

"However it's already heavenly enough, 1,000 sector lords, its pure strength alone...should be akin to a powerful undying general." The black clothed Luo Feng muttered.

Previously, he had relied on the golden horned beast to fight the flame undying, hence he had a rough understanding of an undying's strength...

That flame undying was a very normal undying, his pure strength alone should be about 100 times a sector lord pinnacle.

And when the golden horned beast unleashed its skills, it was 330 times a sector lord pinnacle.

However the flame undying did have a grasp of the complete flame origin laws, and even though Luo Feng had a rough grasp of the beast god presence, it was still shallow...his origin law comprehension and study time was still too short. Compared to an undying with a full grasp of the laws, the difference was huge.

The difference in the law comprehension made it so that he had to rely on his basics to fight back, hence the 2 were at a stalemate!

A normal undying's strength with his undying energy, which was about 100 times that of a sector lord pinnacle!

He estimated that an undying general close to official level...

Should be about 1,000 times that of a sector lord pinnacle!

Black clothed Luo Feng stood on the grass and pondered as he rubbed his chin, "An official level close to emperor level, just his body strength alone should be about 10,000 times that of a sector lord pinnacle. And a pinnacle emperor...if calculated, his body alone should be able to hit 100,000 sector lord pinnacle level."

Luo Feng knew quite a bit about undyings, even though there was very little about undyings within his inherited memories, just his primal region privilege allowed him to study quite a bit of it.

Undying levels, the difference in their strengths were shocking.

Just their bodies alone had huge differences, because undyings would spend endless amounts of time training their god bodies, firstly reaching the Undying body level, this alone was the dream of many. As their bodies grew stronger, their bodies too would evolve...reaching True Yan emperor's level, his body alone was incredibly intrepid.

Along with origin laws, they could dominate the universe.

"100-1,000 sector lord pinnacle, normal undying."

"1,000-10,000 sector lord pinnacle, official level."

"10,000-100,000 sector lord pinnacle, emperor level." Luo Feng muttered, "This is just my rough estimate, however from the information I've gathered, my accuracy should be over 60%."

Luo Feng's calculation speed was shocking, his reasoning speed was extremely high too, plus he could read up on many things within the virtual universe company network, plus his interaction with his teacher True Yan emperor, interaction with Dylan and fighting the flame undying, thus he came up with this.

Naturally this all involved only the most basic of strength and usage.

In terms of origin law and skills.

To the emperor, official and general level, whether it was the most basic undying body for these 3 levels, or in terms of origin laws, the difference was huge. Hence it created a huge difference between each of the levels.

"If my calculations are correct, early emperor level, just their bodies alone should only be about 10,000-20,000 times that of a sector lord pinnacle." Luo Feng thought, "And I have my million sector lord army, 1 combined attack...the energy produced, even an early level emperor level would have to dodge the attack."

Luo Feng was very happy after acquiring the mysterious Soldier armor, after leaving that rubbish mountain, he continued to search for others.

...

A ship was flying in the dark universe.

Within the control room, 2 white robed guides stood there, occasionally glancing at Luo Feng's gaze, they felt a sense of helplessness.

"Let's stop here, let's go to the nearest stop point." Luo Feng said, full of fighting spirit.

"Your majesty, we cannot stop." The black skinned guide said.

"Hm?" Luo Feng turned to look curiously at them.

Both of them looked back.

"What's going on?" Luo Feng frowned and asked.

Beside, the green skinned guide bowed respectfully, before speaking slowly, "Your majesty, the 2 of us have already accompanied you around the rubbish mountains for a year! Every treasure hunt period is at most a year."

"Ah." Luo Feng was stunned.

His time was up?

"We already received orders from the Wu Long starfield system telling us to bring you and leave." The green skinned guide spoke slowly, he couldn't hide his fatigue.

How could he not be tired?

An entire year, the 2 had almost never rested, following Luo Feng about to search through the mountains, occasionally they would fly continuously for over 20 days, suddenly stopping, however, before even half an hour passed, they would once again head out to a distant mountain.

They hadn't rested properly in a year.

This was the 1st time the 2 had met such a difficult client.

"Ah, so the time limit is up." Luo Feng nodded, "Then let's return."

The 2 exchanged glances.

They were finally free!

"Right, you 2 should also have treasure hunting missions right." Luo Feng frowned, "When I spoke to Long Jue emperor earlier, he had mentioned that other than obtaining the world rings to hunt after purchasing goods, one can come individually to hunt for treasures. It seems that 1 mixed element can buy a small world ring, 10 mixed elements for a medium ring and 100 mixed elements for a large ring. Also, one can also buy extra treasure hunting time...1 year, 10 years, even a 100?"

The 2 guides' expression changed.

Right, there was such a mission, as the rubbish mountains themselves hardly have any profits, and the cost of maintaining them was quite high, hence they came up with such systems for those that wanted to try their luck. It was a win win for everybody, why not?

"Rubbish mountain treasure hunt mission?"

"Ah..." The black skinned guide's expression grew heavy. "Yes, there is."

They didn't dare lie.

"Ah." Luo Feng smiled and nodded, "When we head back, I'll buy a world ring and treasure hunting time, You 2 do a very good job, when I continue my hunt, will you 2 continue to help me lead the way?"

The 2 shuddered within.

This level of fast flying without any rest, was it going to continue? 1 year? 10 years? 100 years? This was hundreds to thousands of times more tedious than their surveillance job.

"Haha..." Luo Feng laughed loudly, "Just joking, maintaining a speed of 100k km per second, and flying for an entire year, anybody would be tired. I'll get another guide."

Only then did the 2 let out sighs of relief.

"Your majesty Luo Feng." The 2 bowed, feeling regretful.

"Humans are not machines, you don't have to say anything." Luo Feng laughed.

...

Over this year, Luo Feng acquired a total of 132 black fragments and 7 silver fragments along with 1 shard, of which the 116 black fragments formed a complete soldier armor. On average, every month he would get about 11 black fragments and half a silver fragment.

"The golden horned beast has a complete soldier armor, my earth body should get one too." Luo Feng thought.

Luo Feng bought a medium world ring and 1 year's time of hunting time, naturally the management arranged for another 2 guides for him.

"Luo Feng, you are currently in the domain lord level, training is the most important at this level." Long Jue emperor looked at Luo Feng, he had come personally to send him off knowing his treasure hunt time was over, he didn't expect Luo Feng to continue his treasure hunt, "Treasure hunting in rubbish mountain is just for fun, don't waste too much time here."

"I understand." Luo Feng smiled and nodded.

"If you get any huge treasure you have to tell me, whatever valuable items you get, I can help you sell at an extremely high price." Long Jue emperor said.

"Definitely."

After exchanging a few more words, he and the 2 new guides once again entered the starfield heading towards more rubbish mountains.

...

Luo Feng had already carefully examined the soldier armor, it was very mysterious, containing power within, however with the main body in control of the strength it supplied, one's body had to be strong enough to fully utilize its power.

Other than that, the armor had the ability to block even spirit energy, meaning spirit attacks would lose about 90% of its power from the armor. Of course whether the omnipotent undying energy would be blocked by the armor...Luo Feng was still unclear.

Luo Feng wasn't an undying yet, he had no way to test it.

"Triggering all of its strength, I require a sector lord pinnacle body." Luo Feng thought, "Obviously this soldier armor was prepared for sector lord pinnacles."

"A sector lord wearing this armor would have strength akin of a normal undying, however...normal sector lords cannot withstand an undying's soul attack, that's probably why this armor also has the ability to weaken soul attacks. Only that way, can a sector lord pinnacle wearing this armor, truly stand up to an undying."

Luo Feng was shocked within.

Just who was it that created this mysterious armor? Just the soldier armor alone was so absurd.

The higher quality silver fragments, what armor would it form?

This was definitely a terrifying race! It was easy to see...that one should never belittle any race surviving in the universe.

"Humanity is a pinnacle race, they should have many trump cards too. It's only because my position is still low and I'm oblivious to them." Luo Feng thought.

...

In the blink of an eye, another year passed and Luo Feng finally decided it was time to leave Wu Long starfield and return to earth.

Chapter 694: Mission with The Highest Points

After saying goodbye to Long Jue emperor, Luo Feng and Dylan sat in the Yun Mo planet ship and left Wu Long star field, heading towards Ganwu universe country.

...

Yan Zhu emperor was lying in his beast fur throne, looking ahead at a screen of information.

Footsteps could be heard, a purple robed man swiftly entered and bowed respectfully, "Lord."

"What's up?" Yan Zhu emperor continued looking at the screen.

"Luo Feng has left Wu Long starfield." He said.

"Ah." Yan Zhu emperor smiled, "This punk has finally left, I still thought he'd stay here in rubbish mountain forever. It's hard to blame him, an aboriginal...anything in rubbish mountain would be considered a treasure. Alright, you can leave."

"Yes Lord."

The purple robed man bowed respectfully and left.

Yan Zhu looked up at the screen, the information on it immediately switched into detailed information of earth, this was the information he had sent someone to go gather.

"An aboriginal planet." He mocked, "Little punk, we may meet very soon."

The Yun Mo planet ship was flying at 50 times light speed in the dark universe, however, to reach earth, it would still take about 1 year and 2 months.

Space travel was extremely dull.

"If that Yan Zhu emperor found out that I had acquired such a treasure, he'd probably be extremely enraged." Luo Feng lay in his cabin bed, looking up at the décor above, he thought of his earnings from rubbish mountain, "2 years time, a total of 232 black fragments and 12 silver fragments, 1 shard."

Combined together.

It formed 2 complete black soldier armor, 3 extra black fragments, 12 silver fragments and 1 shard.

This soldier armor gave one the strength of an undying, it was an extremely heavenly item, in terms of price, even tens of millions of mixed elements wouldn't be able to buy it. It was a pity that this mysterious armor...most of humanity was unable to use it, or even discover its peculiar abilities, obviously it was a battle armor for another race.

"Armor for another race, just which race is it, flame god race? Or some other mysterious race? However, at least the words are from the flame god race." Luo Feng muttered, "It's a pity my moshu body is unable to use it, otherwise I'd definitely make another one for it."

Wu Long star field was simply too vast.

A starfield with a diameter of millions of light years, Luo Feng's 2 years in the sector was probably not even a trillionth of the entire place! Yet he already acquired 2 complete soldier armor sets...if he spent more time, he would definitely get even more, however he wanted to spend more time on training.

"After a while more, I should head towards primal chaos city to train, there I get to visibly see the universe laws, study the 9 universe tablet occasionally, my improvement will be shocking." Luo Feng thought, "I'd probably take a couple of hundred of years in there to fully comprehend the 108 wonders of space."

Over 180 years in beast god canyon, Luo Feng had comprehended the 19 of the 72 most profound wonders.

Luo Feng estimated that it'd take about 700 years for him to fully comprehend the 72 wonders.

This efficiency was already much higher than Lian Luo spending 3,000 years in primal chaos city, if he was in there...it would be even faster, the main thing was Luo Feng had the beast god statue etc, hence the benefits of primal chaos city wasn't as important to him as to others. Within there...the main thing that attracted him was the 9 universe tablet.

"My 3rd volume of the time space scribbles is almost done, I have to buy the 4th, however I require 1 million points...where can I get them?" Luo Feng racked his brains.

Buying the 10,000 soul control technique had already cost him a large amount of points.

He didn't even have enough currently to buy time space scribble's 4th volume.

As time passed, he had spent over 8 months travelling in space.

"Di."

"Mail?"

Sitting in his resting quarters, Luo Feng immediately connected to the virtual universe network.

...

Virtual universe Yu Xiang mountain Primal region, Luo Feng's villa.

Within his study.

Sitting at his desk, he opened his laptop and swiftly opened the mail.

"Hm?" Luo Feng squinted.

The subject of the mail was "Domain lord level mission with the highest points."

"Highest points?" Luo Feng held his breath, he had long heard of the legend of the mission with the highest points, the core members at domain lord level would sometimes get missions from the virtual universe company, and these missions had different amounts of points, of which there was one that was supposedly the highest.

Highest points for the primal region members, naturally the rewards for primal region members were much higher than the absolute beginning, Sky and land and last phase region members!

"How high is it?" Luo Feng stared.

The details were.

"This mission has the highest amount of points for the primal region members (Domain lord level), the entire mission is separated into 4 levels.

1st level, highest points awarded 100,000, given according to the level of completion, if completion rate is 70%, points awarded will be 70,000 (70% of 100,000).

2nd level, highest points awarded 200,000.

3rd level, highest points awarded 300,000.

4th level, highest points awarded 400,000.

Extra reward: If all 4 levels are completed, according to the performance in general of the 4 levels, the virtual universe company will give an extra reward, the lowest being 0 points and the highest at 1 million points.

Hence...

The entire mission, including the extra point rewards, has a total of 2 million points to be awarded!

Warning! Warning!

Every level is determined by the level of completion, minimum required completion for the 1st level is 80%, only then can one proceed on to the 2nd level...if one cannot reach 80%, he cannot move on to the 2nd level, the entire mission would automatically end.

Example: If completion rate of 1st mission is 70%, member would receive 70,000 points and the mission would end there."

"Damn!"

"The requirements are so high, continuous levels? The points are absurd too, the highest being 2 million." Luo Feng looked at the mail and was completely shocked, it was absurd, as even the most dangerous of impossible level missions at universe level, Abyss hell, gave only 1 million points.

And this highest point mission was very peculiar, one had to continuously complete every level to activate the next.

When the 4 levels were completed, there was still an extra reward, and this reward...was according to the overall performance, the virtual universe company would determine how much to give, there wasn't a clear standard.

...

After finishing the mail, Luo Feng looked at the subsidiary message, it's subject was, "Highest point mission 1st level."

Luo Feng gently tapped it and opened the mail.

Its details displayed...

"The 1st level is the highest point mission's 1st step, it is also the most important step! This step will decide whether you move on to the next level, simultaneously, it plays a crucial role in the final step of determining how much extra reward you will receive, hence one has to seriously complete the 1st level.

The details are:

There is a slave trader organization in the Ganwu universe country's Cui Lang starfield, named Flame Wind, the Flame wind organization has a total of 18 members in its upper echelon, other than the normal slave trading, they also had many dark secret business dealings that went against the rules of the universe country laws, hence...Luo Feng, you have to personally deal with all of them.

Also, exact punishments on all 18 of the upper echelon.

There are several choices for punishment: 1, death, 2, Jail for 100 years, 3, Jail for 10,000 years, 4, Jail for a million years.

As to how you punish them, it's completely up to your decision.

You can choose to jail them for a hundred years or even simply dealing them the death sentence.

...

All choices will be in your hands!

When the entire mission is engaged, you have to maintain the synchronized broadcast with the virtual universe network, everything you do has to be broadcasted. Only with detailed understanding of your progress and your punishment decisions...will we be able to give the most accurate grading of your completion.

When you reach 80% completion of the 1st mission, you'll be able to move on to the 2nd level.

If the 2nd mission's completion is below 80%, the entire mission will end immediately.

The final parts of the mail contains the Flame Wind's top 18 executives and their information, if you want more information, you'll have to request it from the information system department.

Remember...from start to end, any killing, capture, punishment, everything has to be done personally by you. You cannot send anybody to do it.

Your guards can only protect you, they cannot help you carry out the mission."

Luo Feng sat before his laptop and frowned as he looked at the 1st level's requests, feeling how troublesome it was.

This mission was completely different from his previous mission.

Back then, his universe level missions had a fixed standard and grading, e.g acquiring one blood river stone or collecting several items...even the hunting undying mission before, its highest points was at 200,000,yet its grading system was extremely clear and precise.

This time however...

There wasn't a clear answer.

"Babata, what's up with this mission?" Luo Feng frowned.

"It is very strange." Babata's piercing voice resounded, "As long as you synchronize and broadcast all your actions, doing everything personally, capturing the 18 executives and exacting their punishment. Whatever punishment and how heavy, everything is up to you. How strange. And the process of this mission, whether it's a mass massacre or protecting the innocents from harm, there's no requirements at all... as long as you finish your mission, the company will give you a judgement of completion!"

Luo Feng nodded.

No precise grading system.

"Slave trading and other dark business, this Flame wind organization sure has the guts to deal in such matters." Luo Feng flipped through the information and shook his head within."

"This mission sure is peculiar."

"They even give me 4 ways to exact punishment, death, 100 years in jail, 10,000 years in jail, a million years in jail, there's no exact number...this mission." Luo Feng frowned.

He had to be extremely careful this 1st level, reaching at least 80% completion.

Otherwise, this mission that reached up to 2 million points would immediately end.

Chapter 695: Bass Planet

He sat before his desk and pondered.

He then contacted the information department and quickly got through.

"Your majesty Luo Feng." A clean voice transmitted over.

"I just received the highest points mission." Luo Feng said, "With regards to the 1st level's Flame Wind organization and its specific details of its 18 executive's, strengths and living locations etc, send them all to me. How long will it take?"

"It's already prepared."

The clean voice replied, "We are sending it over right now."

"Hm." Luo Feng nodded.

Di!

An extremely complex mail with all the detailed information was sent straight to Luo Feng, the entire mail only had the words Flame wind organization as its subject. Luo Feng sat there and opened the information, after reading through, he realized the information they just provided was much more detailed than the mission mail provided.

"This..."

"He really deserves to die!!!" Luo Feng's expression grew uglier as he read, "To actually be this sick, when I was one earth, especially during the Great nirvana period, there were many extreme matters going on, however I didn't expect...that those matters cannot even compare to those of the universe. Corrupt, so corrupt..."

Countless warriors gave up their lives in the race wars to allow such peace in the 1,008 universe countries.

They sacrificed for peace!

These warriors helped protect the entirety of humanity!

With such peaceful lives, some with background and power, like kids with fathers who were domain lords in some lower level civilizations would instantly be tyrannical. After reaching star level and being unable to breakthrough, without any rights to succeed the family, they get lazy without any goals and simply get corrupted.

These rich people that have power but no goal, simply do many unbelievably terrible things.

Cannibalism, eating infants etc, all these were no longer enough to even satisfy these people!

Using all sorts of imagination to torture their slaves, and without any repercussions, they would feel empty again after torturing them...turning their gaze to the civilians after and torturing them too! In all, man's desire was endless, and the Flame Wind organization fulfilled these people's desires and satisfied them.

"If there were such people in my Luo Family, if there's one, I'll kill him. If there were 10, I'd kill all 10. Such a state of corruption, it's better they be dead." Luo Feng's gaze gleamed with ferocity, "However humanity is simply too huge, their numbers are endless, if there are exceptional and elites, there would naturally be scum about!"

18 executives, also known as the Flame Wind organization's 18 board members.

These 18 controlled the entire organization, every 100 years, they would pick one of the 18 to take up the lead position, they all rotated this way.

These 18 executives, were...

Klaus: Domain lord level 9, he was currently living in Bass planet where they nurtured slaves.

Kevin: Domain lord level 8, living in Cui Lang Starfield's Cui Lang planet.

Benedict: Domain lord level 9, living on a tourist planet Fu Di planet.

...

Pan Xi: Sector lord level 3, living in the Flame wind organization's headquarters, minor planets Bei En.

"18." Luo Feng looked at the 18 names and their locations, ordering, "Babata, calculate their locations and determine the closest and most efficient path, I don't want to detour."

"Yes!"

Babata swiftly calculated and instantly replied, "Already done, Luo Feng, if you follow this path, the order should be Klaus first, Kevin...Pan Xi, exactly alike with the order of the namelist given."

Luo Feng's gaze gleamed coldly as he smiled, "Looks like the information department had considered my position well, let's head out towards Bass planet!"

They were originally headed towards the Ganwu universe country's black dragon mountain starfield, the Yun Mo planet ship slightly altered its course within the dark universe.

"It'll take about 5 months and 8 days to reach Bass planet!"

...

After 5 months and 8 days.

Within the Yun Mo planet ship's control room, Luo Feng and Dylan stood there, the room resounded with Babata's countdown, "5...4...3...2...1...universe travel!"

After a while.

They returned to the actual universe, through the external simulator, they could easily see the distant stars and planets about.

"Bass planet." Luo Feng's gaze landed on the closest planet, it was a mesh of white and dark red, the white was the clouds and atmosphere while the dark red was the main color of the planet itself, it was Luo Feng's 1st stop, Bass planet.

"Your majesty, are you prepared?" Dylan looked at Luo Feng.

"Dylan, remember, from start till end, you cannot intervene, I have to do this entire mission on my own." Luo Feng looked at the planet, his eyes gleamed coldly, "As to what to do, I've already decided within."

The highest point mission, it had thrown Luo Feng into a haze and confusion then.

However after considering for awhile, he had almost fully understood, the geniuses of the primal region within the virtual universe company came in all sorts, there would always be the special ones, brutal, cold, gentle, kind, mad...there were countless different types of geniuses in history.

Different personalities would have different ways of dealing with this mission.

The brutal ones would probably immediately give them the death sentence.

And the colder ones, would probably just give the jail sentence to those that they felt the crimes weren't too severe.

Different people would have different choices, they couldn't possibly simply tell everyone to always give the death sentence to everyone, hence...this mission didn't have a fixed answer, it depended on their characters.

And the details of the mission also said... "This 1st level was the 1st step for the entire mission, and also the most important step! This step would determine if one would be able to continue to the next level, also, it was the foundation of for the extra rewards after completion of all 4 levels, hence one had to do it seriously."

Main foundation for verification?

Luo Feng thought that this was the main way for the company to determine the geniuses' character!

"There's no wrong answer."

"Everything was determined by the upper echelon of the virtual universe company, whether they favored your methods, if they did, they would give a high completion rate, giving up to 100%." Luo Feng thought, "Hence one had to keep open synchronized broadcast throughout."

...

The Yun Mo planet ship continued to head towards Bass planet, the upgraded f grade universe ship couldn't be detected by the security system of Bass planet.

As it reached the atmosphere.

Sou!

Luo Feng and Dylan flew out of the ship, Luo Feng kept it within his internal world.

"Babata, open the virtual universe network synchronized broadcast." Luo Feng ordered.

"Yes, it's already open."

From this moment, Luo Feng's every move was recorded, his every action was observed.

"Dylan, let's go." Luo Feng said.

Sou! Sou!

2 beams of light swiftly entered through the planet's atmosphere, with Dylan's undying capabilities, they naturally wouldn't be discovered by anyone on the planet.

Bass planet's east hemisphere, mountain ranges stretched for miles, some of their peaks were already barren, it was obvious the high altitudes made it extremely hard for any life to survive there, and the lower halves of those mountains were covered in red trees and plants, the main color of the vegetation was all red, with many aboriginal civilians walking through the inaccessible pathways, tens of thousands of meters of rocky and sloped mountain paths, it made the jobs of these people picking crops and herbs hard.

The medicinal herb Rainbow flame herb was the main herb of Bass planet.

Slave training and trading of the Rainbow flame herb.

The slaves were the main collectors of the herb, every year each tribe had to collect a certain amount of the herb, the moment it was insufficient, a large amount of the slaves would be taken to be sold as punishment.

And with the strong threat of the slave organization and the technology watching over the entire planet...there wasn't a single tribe that dared go against them.

"Dad, I cannot walk anymore, let's rest awhile."

"Bear with it and go find more herbs, you only managed to find 92 today, less than yesterday, if this goes on, our family won't be given anymore rations and we'll starve."

The slaves walked among the mountains looking hard for the herbs.

Rainbow flame herb was naturally produced in Bass planet, it was troublesome to search for it, if one didn't know the way, they wouldn't be able to spot it easily, after all, there were simply too many types of plants in the forests and mountains.

...

At this time...

Sou! Sou!

2 silhouettes landed from the space above, fast as lightning, instantly landing on a peak.

On that peak.

1 was in silver armor and boots, there was an arm guard on his shoulder, he coldly gazed at the endless land, beside him was a black robed bald man, his eyes indistinct, almost like a god from the universe landing on the planet.

"Those are the slaves of this planet?" Luo Feng stood and gazed far into the distance, the aboriginals appearance, even their facial hairs, were all clear to him.

"Hm." Dylan nodded, "According to the information, these slaves are the natives of this planet, the flame wind organization then bought the planet and they became their slaves, many generations of slaves, with their talents, they have to search for these hard to find rainbow flame herbs."

...

Standing on the peak, Luo Feng's spirit energy swept past thousands of km around, clearly understanding the area.

"Over 1,000 km of area, a total of 8,219 civilians." Luo Feng gazed down at the poor slaves, saying solemnly, "Only 12 of them are star traveller level, and the rest are student level normal people, and there are many surveillance devices about, every action they take is being monitored."

"Slaves..." Luo Feng said softly, "My earth almost became a slave planet back then too."

Dylan looked at him.

Sou!

Luo Feng flashed and instantly reached over hundreds of km, Dylan followed closely.

Chapter 696: God

Hundreds of km away on a flatland, there was a wooden house that stretched forever, it was built with a very commonly seen wood, the countless other wooden houses gathered together forming a tribe, with one look, this tribe probably had up to a million residents, it was a huge tribe.

"Look!"

"There's a ship."

"A ship is here."

"The demon palace ship is here."

The residents of the tribe all looked up and gazed into the skies, disc shaped ships tore through the skies and approached them, these ships were completely red, on their bodies were the logos of the flame wind organization, every one of them had a diameter of 100m, a total of 10 of them appeared in the air above, making the many residents of the tribe hide in their houses and look through their windows.

10 disc shaped ships gradually landed on the flatland.

Hua!

All the cabin doors opened.

1 person walked out of each ship, some as tall as 6m, some with fangs and huge mouths, some were only 1.2m, some with big beards and messy hair, thick powerful looking arms...these people, were all dressed in uniformed armor and their arms all had quantum computers.

"It's the demons."

"The demons are here."

"Demons."

The civilians all looked on with fear at the soldiers of the flame wind organization, every one of them took a disc shaped ship here, all dressed in alloy armors and carrying alloy weapons, equipped with quantum computers. These were invincible demons to the residents, even the strongest warriors in their tribe would be knocked down in one blow by them.

"Huge wood tribe's leader?" The 10 flame wind organization looked coldly at the slave tribe, the leader had special black scales, he roared, "Ask him to come out and meet me."

Hurried footsteps resounded.

Hundreds of people flew over swiftly, as they ran up to the flame wind soldiers, they all quickly knelt down, their heads touching the ground.

"Greetings demon."

Hundreds all knelt there respectfully.

"Huge wood tribe, your collection of the Rainbow flame herb last year only hit 70%, there's still another 30% to be submitted. Thus, according to the rules, 30% of your tribe has to come with us." The leading demon soldier said coldly, "30% of your tribe would mean 1,213,682 people, have you prepared the namelist?"

"It's already prepared." Among the hundreds knelt there, an old man with a helmet said respectfully.

"Hm, hurry up." The leader of the soldiers roared.

"Yes, yes yes."

The tribe leader immediately gave the orders.

The entire tribe immediately rose up and hustled, all sorts of painful cries resounded throughout the tribe, every year, whenever their collection of the rainbow flame herb was insufficient, they'd have to sacrifice some of their tribe people. According to their numbers and percentage...they'd have to give the same number of people.

Those that contributed highly to the numbers could survive and even live their whole lives in the tribe.

Those that contributed lowly would be sent to the demon palace, eventually becoming a slave...sold to other families on other planets, their fates, naturally need not be mentioned.

"Father."

"Big brother."

"Ma Mai." All sorts of cries could be heard throughout, however despite the huge numbers and struggle, countless years of habit had made them realize...it was pointless to resist, they could only follow the rules, 1,213,682 of the tribe gathered and walked towards the disc shaped ships of the demons.

Every ship had a diameter of 100m, their thickness were also 30m.

Enough to cram 30,000-40,000 slaves within.

A total of 48 ships came this type, enough to store over 1.21 million slaves, these civilians all followed the pathways of the ships, with the leadership of the robots within, they entered their chambers, cramming the rooms full. Every level could house up to 10,000 people, a total of 3 levels, they squeezed in 30,000-40,000 people.

As they entered their chambers, they all looked back unwillingly at their tribe.

Goodbye...close ones!

Goodbye...tribe!

"Haha, I didn't expect your tribe to have a star traveller warrior." The leader of the soldiers suddenly laughed loudly, with a flash he became a blur and flew towards the distance, straight towards a very normal looking wooden house, with a rumble, it immediately broke apart.

Within, a youth roared and waved a blade at the soldier.

The soldier extended his hand and broke the blade apart, immediately grabbing the shoulder of the youth, with his powerful genetic energy flowing, he made the youth shudder.

Sou!

The soldier seemed like he was carrying a little chicken as he dragged the youth, swiftly heading towards the ship.

"Dragon Lou!" The elder of the tribe and the others were shocked.

Dragon Lou was a true genius of their Huge wood tribe, his power grew very quickly and he could float in the air, one punch could decimate a mountain, however before the soldiers of the demon palace, he still had no resistance at all. Even using their tribe's secret weapon...the soldier easily grabbed and broke it apart.

"Look at this punk, star traveller level 3, not bad." The leader of the soldiers laughed loudly.

"Without any training manuals, he actually still reached star traveller level 3, captain, this punk can easily reach the star traveller if nurtured, he'll sell for a lot next time."

"Indeed he'll sell well."

The other soldiers of the flame wind organization all said the same thing.

"Demon, release him, we can replace him with other people from the tribe." The elder head of the tribe said nervously.

The soldier raised his hand.

Rumble!

A formless genetic energy came down and the elder immediately imploded, fresh blood spewed in all directions, even the others standing beside him were affected, his blood and bones pierced right through their bodies, some with holes left in their bodies, dying beside him...

Silence, the other tribesmen were all shocked into silence.

"Your Huge wood tribe can get a new elder, he was too stupid." The leader of the soldiers said coldly, "The last time your huge wood tribe produced a star traveller was over 800 years ago, I guess you've all forgotten the rules. Remember! We will take all star travellers produced, going against it means the tribe leader will die!"

"This punk can reach the star level if we train him, his worth would be over a million of you normal folk, you even want to exchange him for others, idiots." The other soldiers all mocked.

Without any guidance or resources, being able to reach star traveller level.

With some guidance and pressure, he'd naturally reach star level, then he'd be able to sell for a high price. And these student level 1, 2 and 3 normal folk, they were cheap and not worth it. Even if a million of student level 9s were added together, it would only be worth about 1 star level 4 warrior, one could easily see the worth of normal people.

...

The flame wind soldiers all laughed loudly, the civilians were all terrified by their presence, looking at their people enter the ships, looking at the bodies and blood, they could only feel pain and fear.

Rumble! Rumble!

2 silhouettes suddenly descended and landed on the ground.

Silence!

The soldiers that were originally laughing casually seemed to suddenly choke, they all stared wide eyed at the sudden appearance of the 2. It wasn't just them, even the civilians and members of the tribe all looked on with shock at them.

2 people, one in silver armor and boots, black short hair, his gaze cold. The other was a bald man in a black long robe, his gaze even colder and profound.

These 2, their formless pressure...

Caused all the tribesmen to shudder within, it caused the soldiers to be filled with fear.

The soldiers all knelt down, incredibly respectful, they were all soldiers from the universe, they'd at least have some perspective. They were clear that if the pressure alone was this terrifying...the 2 before them were definitely absolute warriors of the universe, at least universe level, maybe even stronger, how could they resist?

"A group of star traveller level 9? 1 star level 3?" Luo Feng's cold gaze swept past the soldiers.

The tribesmen could all easily conclude...

This mysterious black short haired man, just the one in the silver armor...he was obviously much more terrifying than all the soldiers.

"We are members of the flame wind organization, why has this lord travelled to Bass planet, if there's any matters, our great lord Klaus is currently here, we can report to him any matters you have." The leading soldier's forehead was perspiring profusely, speaking with fear.

The tribesmen of the Huge wood tribe all looked on with shock at this scene, that powerful soldier...he was so weak and small now?

That...

That mysterious black short haired youth, just what level of being was he?

"No need, I will personally go look for him." Luo Feng said coldly, simultaneously his spirit energy passed through that leading soldier's body and he began to search his soul, with Luo Feng's control in his soul techniques, it was no weaker than a sector lord's touch. Against a star level 3 warrior, a soul search was simple.

In an instant, he knew from the memories he searched through just how corrupt these group of scum were.

"All of you here!"

Luo Feng's gaze swept past the ten soldiers, the soldiers of the flame wind organization, the ones called demons by the tribesmen slaves of Bass planet, they all looked on with fear.

"I sentence you to...death!" Luo Feng raised his right hand.

Xiu! Xiu! Xiu! Xiu! Xiu! Xiu!

Tens of light beams shot out from his right hand, instantly landing on the soldiers, they all didn't even have time to say anything as they stared wide eyed, suddenly "Rumble! Rumble! Rumble! Rumble! Rumble! Rumble!" They all exploded open and became nothing but a mess. Their remains didn't even fly out randomly, they were all left exactly at where they stood.

The tribesmen of the huge wood tribe all looked on with fear at this scene.

Easily killing a group of demons?

What power was that?

"God!" A person shouted from the tribe, immediately the rest all knelt down and shouted in unison.

"God! God! God! God! God! God!"

Millions all knelt down and shouted, rumbling through the skies.

Luo Feng and Dylan watched the scene.

"A warrior from the universe coming here and being called a god. The name god sure is worthless." Luo Feng thought, however...In terms of strength, Luo Feng was truly akin to an undying, hence this title was something he was indeed worth.

Chapter 697: Demon Palace

The Huge wood tribe's millions of tribesmen have been slaves and suppressed for countless generations, it could be said that the thought of the demons being invincible had been ingrained into their minds the moment they were born, it was already common knowledge. And now, there was a mysterious being that actually easily defeated 10 of them, it had left them completely stunned.

God, this was a god!

"It's god." The genius and number 1 warrior Dragon Lou knelt there, looking at the silver armored black haired youth and the black robed bald man, his blood boiling from within!

This, was the strength he was seeking.

A powerful sense of anticipation filled his mind, he knelt there and struck his head hard on the ground, after which he looked up and shouted loudly, "Dragon Lou is willing to serve the god, please...accept and take me in!"

"Hm?"

Luo Feng turned to look at the messy haired youth, a thought appeared in his head, "An absolute genius of a race, the number 1 race, I was the top genius back on earth back then too, however I was much luckier. I have the golden horned beast, the Yun Mo planet inheritance, all these helped me rise up in the universe, all this punk needs is an opportunity."

"Luo Feng." Dylan communicated, "You do not need to care about this punk, since the virtual universe company has given you the mission to deal with the Flame wind organization, then its obvious they want to get rid of it...after everything, the slave planets etc left behind, the company would naturally take care of them and make it so they won't remain as slave planets."

Luo Feng nodded.

Slavery was something many great beings disliked, the virtual universe company was clear on this, however as there were resource limitations and competition within the race itself, slaves had become a very common product, naturally they didn't intervene. However the moment they got rid of some organizations, the slave planets left behind, the company would naturally not cash in on them but actually...help them become normal life planets.

"The virtual universe company will send people over to manage and help revitalize the entire planet, punks with talent like this Dragon Lou will also receive nurturing." Dylan said.

"Hm."

Luo Feng nodded and glanced at Dragon Lou, "This punk will have to depend on himself then."

"Let's go." Luo Feng instantly became a beam of light.

Sou! Dylan followed.

The 2 vanished from the sights of the millions of Huge Wood tribe's people, leaving behind them with their mouths gaping.

"What do we do, what do we do now? Now that the demons have been killed the demon palace will definitely be enraged."

"We are in trouble."

"The demon palace may take it out on us."

The millions of tribe people were in a flurry, all extremely afraid, the many generations of being suppressed had ingrained in their minds that the demon palace was the strongest being out there.

"The god didn't accept me, god..." Dragon Lou knelt there, somewhat lost, however after seeing the bodies of the Flame wind organization's soldiers, he shuddered, "With the demon palace's brutality, when they vent it on our tribe, we will all be killed, what do we do now."

Cold sweat beaded from his forehead.

"Little punk, the demon palace will be destroyed, Bass planet will have an equal chance to develop like the other life planets, just wait for the members of the virtual universe company to come." A voice resounded within his mind.

"It's the god's voice."

Dragon Lou's eyes gleamed and it seemed like he was filled with energy, after which he was curious, "The virtual universe company's members will come to our planet? What is the virtual universe company? Will this company be able to defeat the invincible demon palace?"

If the top 18 executives of the Flame Wind organization had heard this words, they would probably all be shuddering in fear.

Demon palace.

The most terrifying place within Bass planet, the place countless slaves feared. Actually, there was a group of elite guards stationed here by the flame wind organization, it was made of 1 universe level and 50 star levels along with 5,000 star traveller level 9s, hence their strength on this planet was so powerful.

The rainbow flame herb was very valuable, and this planet was the core planet of hundreds around it, hence there was a universe level stationed here!

Universe level warrior, within a normal galaxy, he was already invincible.

...

Klaus of the 18 executives had brought his guard team to Bass planet. He treated it completely as a holiday place, staying within the demon palace, with many female and male staff sent over from the large amount of slave planets around, he led a carefree life.

The 18 executives all had their own temperament.

Klaus enjoyed the feeling of torturing slaves, hence he would frequently head down to the slave planets for periods of time.

The strongest Pan Xi of the 18, he was already sector lord level 3, he was very self disciplined, other than the occasional outburst, he spent most of his time on the minor planet Bei En, that was a cluster of minor planets that was impossible for normal people to survive, that was his training spot.

"Du...du...du..."

The ear piercing warning sound resounded throughout the demon palace, the palace that took up tens of km about a majestic peak was instantly thrown into chaos

"What's going on? What's happening?"

The leader of Bass planet was man with green fur and eyes, he looked like a wolf at first glance, he was the manager of Bass planet and the surrounding hundreds of other slave planets, Moza, a universe level 7 warrior!

"The executive is in my demon palace and an alarm actually goes off, he would definitely be enraged..." Moza was so scared cold sweat covered his body, simultaneously his arm quantum computer connected to the planet's security system and through it, Moza clearly saw what had happened.

The 2 mysterious men, a silver armored youth, a black robed bald man, easily killing a team of his underlings. They had to be at least universe level

"They actually didn't even alert the planet's security system and entered the planet, these, these 2..." Moza was shocked, quickly rushing towards the core of the palace to alert Klaus.

"Lord Klaus."

"Lord Klaus."

Moza rushed towards the core.

Rumble...many silhouettes swiftly flashed through the palace, all dressed in uniformed blood red armor, their powerful energies spread out, these were all universe level 9 in strength they coldly looked at Moza, scaring him so much he didn't dare move anymore.

"Moza, what are you doing?" The leader of the guards, a domain lord level 5 warrior looked on coldly at Moza.

"Lord." Moza said with fear. "There are 2 mysterious warriors that have suddenly come to Bass planet, the planet's security system didn't even detect them, and one of my teams have already been destroyed."

"There isn't a power here in Cui Lang starfield that dares mess with the Flame Wind organization." The vice captain said coldly, "Immediately send all the information in your quantum computer to the lord, you don't have to go disturb him"

"Yes."

Moza said respectfully.

The levels in the organization were very strict, the 18 executives were high above, as a power with sector lord strength, even though they weren't in the top 10 of the Cui Lang starfield, they could still rank in the top 50! This was simply the superficial strength, such an organization, relying on a slave market and other dark methods to rise up...their background wasn't that simple, hence the captain dared to say there wasn't any power in the entire starfield with the strength to mess with the flame wind organization.

It was a pity, this was the virtual universe company sending its people.

Rumble!

In an instant.

A powerful silhouette rushed out, he was over 3m tall and powerfully built, his face was covered in a black beard, his eyes purple, a powerful energy emanated from him, this tall and sturdy man was one of the 18 executives of the Flame Wind organization Klaus, at this time, he said with shock, "Everybody separately take your universe ships and leave Bass planet."

"Yes Lord Klaus." Even though they were puzzled, they all simply complied.

Immediately!

Sou! Sou! Sou! Sou! Sou! Sou!

Over 100 silhouettes flew through the skies out of the demon palace, almost all of them took out a c grade ship from their space rings, Klaus too took out a similar ship, obviously he wanted to lose himself amongst the crowd, making the enemy unable to determine which ship he was in.

"You think you can run?" A cold voice resounded.

Immediately countless glaring gold lights lit up the skies of the demon palace, these gold lights were little golden blades, countless blades swept past the skies and the c grade ships were instantly torn part, all falling from the skies like rain. Over 100 ships immediately crashed into the roof of the demon palace, decorations etc flew in all directions.

Klaus and his guard team all watched in fear at the scene.

After which they looked in the distance...

In the dark night (The demon palace and the huge wood tribe were at different ends of the planet, it was day at the Huge wood tribe and night here) Klaus and his guard team clearly saw 2 silhouettes floating in the night, a silver armored youth and a black robed bald man.

"Gre, greetings undying." Klaus immediately knelt on one foot, saying with fear.

After hearing Lord Klaus speak those words, the guards were all filled with fear, all imitating him and kneeling.

"Greetings undying!"

Their voices resounded across the skies, and the true owner of Demon palace, the universe level Moza and his underlings all looked up and saw this scene. Their revered powerful Lord Klaus was shivering and kneeling with fear, undying?

My god.

"Greetings undying." Moza knelt too, everyone about him did the same.

In the distant skies.

Luo Feng and Dylan began to chat.

"This punk sure has good sight, he can actually tell I'm undying." Dylan laughed and said.

Chapter 698: Luo Feng's Punishment

Klaus knelt in mid air and looked up at the two of them. He said respectfully, "Two Lords, I, Klaus, am one of the executives of the Flame wind organization. 5% of the shares belong to me, and I'm willing to give it all to you two. I also have some connections with a prince of the Ganwu universe country..."

"You mean the 7th prince?" Luo Feng gazed down at him.

Klaus was shocked.

There were many princes within the royal family, and as time passed, many had already died of old age with very few becoming undying.

Of which the 7th prince was one that became undying.

The flame wind organization did have connections with the 7th prince.

"He actually even knows this secret." Klaus was shocked. Yet, he wouldn't have expected that Luo Feng had already gotten incredibly detailed information from the Virtual Universe Company's information department, easily knowing all of their connections. However...within the entire Ganwu universe country, as one of the 4 tycoon heads of the Ganwu department, probably only the Ganwu universe country leader could intimidate Luo Feng. He couldn't care less about anybody else.

"May I know why you two have come to Bass planet? Whatever it is, I will definitely provide my assistance." Klaus said respectfully.

"We came to judge you." Luo Feng said.

Klaus's expression changed immediately. He smiled wryly and said, "The two lords must be joking. I have never met you two before or created any grudge either."

The guards around them were all shocked. The Klaus that they protected was considered as one of the highest standing people within the entire Cui Lang Starfield. He even had connections with the core of the Ganwu universe country. Klaus...was definitely a powerful person here. A single order would cause fear within countless planets, and with just one word, countless heads would roll.

This was Klaus's power!

Just the number of slaves he controlled ranged up to the trillions, and the number of slave planets he owned went up to the tens of thousands too. He was extremely powerful, much more than many basic level civilization emperors. However, at this time, he knelt there in fear.

...

In the air above the demon palace.

Luo Feng said coldly, "3 domain lords, 101 universe levels, 49 star levels, close to 5,000 star travellers."

All the members of the flame wind organization kneeling there were utterly shocked.

This was the strength of the organization there on Bass planet, of which the 3 domain lords and 100 universe levels were Klaus's, guard captain, vice captain and 100 guards.

Rumble!

Luo Feng's eyes gleamed coldly. His formless spirit energy penetrated the 49 star level members' minds, searching their souls! Luo Feng had already killed 1 star level soldier earlier at the Huge Wood tribe. These 50 soldiers were the ringleaders of the force stationed here on Bass planet.

After searching their souls, Luo Feng swiftly understood the 49 star levels and their 100 underlings' situation, he also understood more about their leader Moza.

"Anita!" Luo Feng roared seriously, his voice resounding throughout the entire air above the palace. Immediately a star level lady amongst the others looked up curiously.

"Dai Er!"

A star level 9 soldier looked up.

"Fei En."

A star level 9 soldier looked up.

"Cliff."

Another star level 9 soldier looked up.

"Doug."

A universe level 9 member kneeling in mid air looked up curiously.

5 names, the powerful silver armored man had shouted out 5 names.

"I judge the 5 of you...to be innocent." Luo Feng's gaze swept past the thousands of silhouettes. Whether it was the group of universe level soldiers kneeling in mid air or the many more star traveller level 9s below, they were all shocked.

"Everyone else..." Luo Feng smiled, his eyes flashing with bloodthirst, "Will be given a death sentence!"

"I'll personally execute it!"

The moment his words left his mouth, the thousands around the demon palace were all filled with fear, many shouting out.

"Flee!"

"Disperse and flee."

"Hurry."

No one even thought of resisting, as they all chose to run. Luo Feng stood in mid air and said softly, "Blade world!" The dark golden long rod on his back shot out tens of millions of gold light fragments. Countless little gold blades interweaved with large amounts of law threads, instantly covering the entire area and forming a vast blade world, countless amounts of blade energy swirling within.

Under the pressure of the blade world, no one could run.

The 5 innocent parties were tossed out by Luo Feng's blade energy. Dylan too stood outside, within. Other than Luo Feng, the controller, everyone else was sentenced to death!

"Lord, two lords, spare me." Klaus realized there was nowhere to run, he quickly shouted in fear.

Luo Feng however became a blur and unleashed his teacher Bubu's claw technique, 3,000 space. Within this blade world, Luo Feng chased and killed each and every warrior.

As his claws slashed through a person's head, red blood spewed everywhere like overflowing wine.

As he slashed a person's chest, the slash continued up to the neck and tore apart their heads.

Violent attacks, leaving their heads open like watermelons being smashed.

Hua, with just a wave, a person was torn in half.

...

Fresh blood flowed, and broken armors landed on the ground stained in red. The demon palace had long crumbled from Luo Feng's occasional energy bursts. Parts of the palace were crumbling throughout. As for the bodies, some had scales while others had heavy fur, and at this time, the dead came in all sorts. The less severe ones simply had their heads cut open, while the more severe ones were struck by over

100 claws and howled in pain before dying. The other bodies were split in two, and some were torn apart with broken limbs and internal organs strewn about.

This was a blood world, fresh blood stained the entire ground.

"Madman, it's a true madman, a bloodthirsty madman." Klaus's expression was pale. As he looked on in fear at the scene, he wanted to flee, yet he couldn't break through the blade world's pressure.

Death!

Thousands of them were all killed in just 5 minutes. Luo Feng had killed over 10 people every second, and some even received over 100 claws before they were killed.

Silence!

With the thousands within the blade world killed, only Klaus was left behind.

"Klaus, it's just you left." With a flash, a silhouette appeared before Klaus, it was Luo Feng.

Klaus looked on with fear at the silver armored youth. After massacring so much, even though this youth had fresh blood all over him, his expression was still ice cold, and even his gaze was ice cold. The only thing was...within his gaze there was a sense of mad bloodthirst, obviously the killing had triggered the blood thirst within his bones.

"How thrilling." Luo Feng felt his soul moan, "Massacre sure is addictive."

Howl...

The golden horned beast in the internal world raised its head and howled.

Man is fundamentally good in nature.

The golden horned beast however was fundamentally blood thirsty, it made Luo Feng that way from within his bones.

Klaus was filled with fear, "As a member of the Virtual Universe Company, I am but an ant to you Lord. I am not even worth the thought of killing."

Klaus and the other guard members had already connected to the virtual universe network earlier when they couldn't escape. However, they were shocked to realize that they all couldn't connect, and disallowing the connections of people was something only the Virtual Universe Company had the power to do.

Hence, Klaus had guessed that this was a member of the company.

Luo Feng, who had changed his facial features made it so that Klaus would never have expected...this person before him to be the genius Luo Feng.

"You've guessed about the Virtual Universe Company?" Luo Feng looked at him.

"Lord, please spare my life, I'll do anything." Klaus said.

"Anything? Then...go and die."

Luo Feng waved his right hand fiercely, it became a claw and slashed down from high above. Klaus fought hard before it, wanting to use his genetic energy blade to defend. However, Luo Feng triggered the space and gold laws within his claw...the claw smashed down on the blade and caused it to cut right into Klaus's head.

Rumble!

Klaus was shaken so badly that his entire body crumbled, and even his bones were shattered. At the same time, the blade world and blade energy immediately destroyed his life core.

...

It had ended.

Luo Feng stood in the vast blade world, looking at the blood river around the destroyed demon palace. As he looked at the mangled bodies, he felt a sense of perfection with the scene. "What a heartwarming sight." Blood thirst rose within his body and mind, as he wanted to continue killing.

"The blood of the golden horned beast and its effect on my soul has long entered my bones." Luo Feng shook his head.

Rumble...

The blade world crumbled and countless gold lights returned to the dark golden long rod on his back, with a flash, he returned to Dylan's side.

"You seemed to enjoy that a lot." Dylan looked at Luo Feng. "I feel like you are more suited to the name Blood thirsty than even my teacher the Blood thirsty emperor."

"Ha." Luo Feng laughed.

His 3rd senior, was named bloodthirst emperor.

Luo Feng was different though, whether it was the massacre he did during the genius competition selections, or massacring in reality...he always maintained a state of ice cold. It was almost like killing was as normal as eating and drinking. After all most humans didn't enjoy killing naturally, and very few could actually reach such a state.

"Let's wait, the people of the Virtual Universe Company will come soon and collect Bass planet." Luo Feng said.

"Hm." Dylan nodded.

Luo Feng gazed down at the distant 5 innocent survivors, they were deemed innocent by Luo Feng. At this time they all looked on with fear at the blood river about the demon palace, it was a nightmare. They then looked up at Luo Feng, unable to imagine just how this silver armored youth could turn so terrifying the moment he unleashed his strength.

About half an hour later, a huge universe ship reached Bass planet. It was the Virtual Universe Company's members coming to collect Bass planet.

The 5 survivors were passed on to them by Luo Feng, after which, he then left.

...

Sou!

The Yun Mo planet ship travelled within the dark universe.

"Luo Feng, from start to end, you kept your synchronized broadcast with the virtual universe network. They clearly saw your scene of massacre." Dylan shook his head. "I didn't expect you to not even use the blade energy to kill them, but to kill them personally one by one. Did it feel good?"

"Killing them personally felt better." Luo Feng shook his head. "Let them see everything, I know myself...whatever I do, I'll stay true to it."

"The grandmaster probably favors you because of this." Dylan smiled and nodded.

Chapter 699: Mysterious Pan Xi

Luo Feng had begun his massacre.

On Cui Lang planet within Cui Lang starfield, Luo Feng had killed all of Kevin and his guards, a total of 103 people had died, leaving none behind.

On the same day, he had reached Fu Di planet. Almost all of it had become Benedict's private planet. He had hundreds of thousands of staff, tens of thousands of guards, and his power was heavenly. He lived carefree within his own palace. The massacre on Fu Di planet, Luo Feng had killed a total of 36,237 people. Countless people were shocked at the scene happening in front of them, Benedict himself was punished harshly. Luo Feng had used his blood shadow blade to slash him over ten thousand times before letting him die.

On the 4th day, Luo Feng reached Yi Wei planet, it was also the home of Le Ka, one of the 18 executives. Luo Feng killed Le Ka and his guards, a total of 103 people, one of which Luo Feng deemed innocent and let go.

...

On the 26th day, it was also the craziest massacre of the flame wind organization till date. This time it was on Dripping Planet.

It was a planet completely in the control of one of the 18 executives, Lee. This Dripping planet had incredibly tight security, it was a complete demon hell. This planet was also a favorite place to relax amongst the powerful among the Cui Lang starfield. All sorts of corruption could be seen here, it made these people addicted to the rush.

This time!

Luo Feng had killed a total of about 100,000 people including Lee and his underlings. A larger amount of them were taking their ships and fleeing, while these powerful people were massacred on a large scale, even their guard teams were madly killed. Eventually, even those people were killed. The entire dripping

planet had become a blood ocean. Even the members sent by the Virtual Universe Company were shocked at the bloodbath.

During this battle, Luo Feng had killed a grand total of over 1.02 million people. His blood shadow blade...had killed everyone he had deemed guilty.

...

Among the 18 executives, Luo Feng had already killed 16 of them.

Wei Feng planet.

This was a planet with frequent howling winds. The normal civilians of the planet usually spent most of their lives cooped up within the city, and in the North west region of the planet, there was a luxurious planet that took up over 100km in area. The guards stationed there were over 10,000 in number. The slaves ranged in the tens of thousands, it was the true free and unfettered area of the planet.

"Why do you have to kill me? Why!!!" Amidst the bloody ocean in the palace, the 17th executive Pa Li Man De's eyes flashed coldly staring at Luo Feng.

"You are guilty." Luo Feng wielded his blood shadow blade and stood before him.

That formless blood thirst made him cower in fear.

Luo Feng's massacre over this period of time had indeed reached an insane level, and he didn't even bother to try and suppress it he wanted to clearly see...just how strong his blood thirst within was. Hence, he didn't use the quickest killing methods which was to use his spirit energy weapon. Rather, he simply used his blood shadow blade to kill them one by one.

He had initially wanted to use only his hands, however the numbers were too huge, and his claw efficiency was too low, hence he decided to use his blade!

"I'm guilty? You are a member of the Virtual Universe Company, however you cannot slander me. I have lived here on Wei Feng star from a young age, alone, growing up and working hard. Even after joining the Flame wind organization, I never questioned their doings. Lee was in charge of the business side, and the entire fate is managed by the boss Pan Xi. As for the inhumane practices, I've never dealt in them. Then, why do you say I'm guilty, why?" He roared.

"When the flame wind first began, it faced dangers from all sides." Luo Feng said indifferently. "Back then, the 18 domain lords killed all about, in order to gain portions of the market, and in order to make the powerful people fear you. In 3 short months, you all killed all the 621 powerful people, and their 32,193 underlings."

Pa Li Man De was shocked.

"You all killed whoever stood in the way. And even though you never dealt in the dark dealings, you've allowed them to happen and still gain large amounts of profits from them." Luo Feng said coldly, "You've never been the main dealer, however you have no right to say you are clean of them."

Pa Li Man De choked.

"Even though you aren't as dirty as others, however, you rely on these businesses to gain endless wealth. Hence, you deserve to die even more." Luo Feng said coldly.

"I only relied on the Flame wind organization as a stepping stone to gain more resources to train." Pa Li Man De howled.

Chi!

A blade flashed as Pa Li Man De stared wide eyed, after which he was split in half with his internal organs flowing onto the floor.

"Hmph." Luo Feng flipped the blood shadow blade in his hand and sheathed it, after which he turned and left.

In the dark universe, the Yun Mo planet ship was flying.

In the control room, Dylan and Luo Feng sat there and sipped wine.

"After massacring, you specially pick red wine to drink." Dylan shook his head.

Luo Feng lifted his glass. The red wine shone under the light, reflecting the desires of his heart, Luo Feng said softly, "Drinking wine after massacring sure is a nice feeling."

"I can only sigh at your massacres." Dylan shook his head. "If it weren't for my experiences with my teacher and having seen his bloodthirsty ways, I probably won't be able to get used to your massacres."

"Those that should be killed, I kill. Those that shouldn't, I won't." Luo Feng said.

Just like the 1st time on Bass planet, the detailed information of Klaus and his guards had all been provided by the Virtual Universe Company. As for the large amount of star traveller level 9s of the demon palace, Luo Feng had used his soul techniques to search their souls and understood their pasts.

Those that shouldn't die, Luo Feng didn't kill.

Those that were guilty, he killed them all.

"How do you judge who you should kill and who you shouldn't?" Dylan asked with curiosity. "Are you so sure...that your judgement is right?"

If this question were to be given to a hundred people, there'd probably be 100 answers.

"Dylan, Among the people that I have killed so far, whom do you think I shouldn't have killed?" Luo Feng asked in return. "If there's no reason to, naturally I won't kill them. I always kill with a reason."

Dylan laughed.

Whatever anybody else thought of this was fine, Dylan was pretty satisfied with the answer. As he was an undying and he had battled in the outer region wars before. He was very clear...the race wars were brutal, as long as one was stronger than the other, that would mean he could kill him or capture.

There was no space for leniency! No retreat!

If humanity took a step back, and got weaker. The other races would get stronger and step forward.

In the long run, it would be a slippery slope down for the strength of humanity, as their regions would get smaller and hence...one couldn't be soft.

The bloody race wars would make many of the weaker willed people go crazy and crumble within.

And these were only the normal scenes. Even those that self declared they enjoyed massacre, killing 100s was nothing. Truly killing means to kill tens of thousands to millions, even hundreds of millions of others, especially using all sorts of illusions and bloody battles in the wars. It was easy to be shaken by these type of killings, hence there were many that lost their minds and died within the battlefield!

"Understanding why you kill is very important." Dylan nodded. "Even if your reasons are very simple, you have to have a reason within your heart and determination. If there isn't any determination...when you enter the outer region wars in the future, and get messed up by the illusions and so on, it would be very easy to begin doubting yourself."

"I understand." Luo Feng smiled and nodded.

The wars on earth alone would make many soldiers get mental illnesses and lose their minds.

Much less the outer region wars.

Two days later.

The Yun mo planet ship went through universe travel and arrived at the minor planets Bei En.

Within the control room, Luo Feng and Dylan gazed at the distant space, the little cluster of planets in distance were like messy stones all about.

"Pan Xi." Luo Feng said softly. "The true soul and spirit leader of the Flame wind organization, who had even gotten the recognition of the 7th prince. Compared to Pan Xi...the other 17 were nothing but small fry."

"Hm." Dylan nodded.

The two looked through Pan Xi's information, they couldn't help but respect him.

His experiences were pretty legendary.

Pan Xi was born a slave. However, on the day before he was about to be implanted with the living microchip, he rose up and took over a life planet. After which, he commanded a large amount of underlings to take a ship and leave the slave planet, leaving a large hole in the slave force there.

After fleeing the slave planet, he first dispersed his underlings and obtained a universe civilian identity within Cui Lang Starfield alone.

Living on a normal life planet in the starfield and training for hundreds of years, he waited to show himself again. When he did though, he was already a universe level warrior. With his strength, he began to take revenge on the slave traders from back then, they had some strength too but were later destroyed by Pan Xi.

After which!

Pan Xi took control of his own slave trading ring and became a new slave trader!

With resources in hand, his power rose quickly and he later reached domain lord level. At this time, he contacted the other 17 domain lords and created an alliance! With the 18 of them together...they naturally took a greater control of the market. He had gone through careful consideration before picking his people.

Those with background, those that could fight, those well known in scheming, they were all elites.

With the Flame wind organization behind him, Pan Xi got a large amount of resources and established his power before training seriously. He bought techniques and had begun training and became the only one to reach sector lord level 3. Through his power, he even got to know the 7th prince, and along with the prince's support, his network got even more terrifying!

He, was Pan Xi.

A slave that rose up to become a ruthless and formidable person, a sector lord level 3 warrior! One had to know that the number of sector lords within Cui Lang starfield was probably in the tens, and they mostly had teachers and guides, and among them were even undying. Relying on himself and reaching sector lord level 3, this was unbelievable.

As the spirit leader of the Flame wind organization, he was recognized as its boss.

Pan Xi hardly ever enjoyed his luxurious life. However he secluded himself in training, staying within Bei En planet.

"This Pan Xi." Dylan nodded and smiled, "I respect him."

"I respect him too." Luo Feng nodded and exclaimed. "Being born a slave with nothing, training hard to reach sector lord level now, it is indeed impressive. And training within these minor planets...willpower, ambition, methods, he has everything..."

"Right." Dylan shook his head, "The only thing is he didn't have was a bottom line to his methods. His brutality and ruthlessness had caused trillions to suffer. The Flame wind organization controls tens of thousands of slave planets, many universe civilians leading peaceful lives have had their families broken because of him. Trillions of them being enslaved and sold about, such dark methods...have finally made the Virtual Universe Company have to deal with him."

Luo Feng shook his head within.

"Let's go judge Pan Xi." Luo Feng said.

Sou! The Yun Mo planet ship flew within the minor planet's cluster...

Chapter 700: Sector Lord Level 9

Bei En Minor planets, they were a group of heavenly bodies that revolved about a star. A total of 209 little planets with the smallest having a diameter of 1.2km, and the largest at 898km.

The Yun Mo planet ship was flying amidst the planets.

"Searching through each of the planets, all of them have all been modified." Babata's piercing voice resounded throughout the control room. "They all contain many technological weapons, the entire area can be called an automaton fortress. Even the Cui Lang royal family's fleet would be destroyed."

"Cautious indeed." Luo Feng gazed at the distant planets.

"Would he have been able to get to this level if he wasn't this cautious?" Dylan smiled. "I have a feeling, this time won't be as easy as your past 17."

"Ah?" Luo Feng frowned.

The Yun Mo planet ship continued to fly and search through the planets.

"Signs of life detected." Babata said. "On the 82nd little planet amongst the minor planets.

"Then let's go." Luo Feng's eyes gleamed as he ordered.

...

That particular planet was ranked 3rd in size amongst the rest. It looked very normal from the surface, however as the ship drew close, the entire planet suddenly shook.

Rumble!

Rumble!

Rumble!

3 beams of light suddenly shot into space towards the ship. The ship maneuvered quickly to dodge, however it was brushed by one of the beams...the surface energy barrier rippled slightly without any damage.

Rumble! The ship too shot out a beam of light and it struck the distant little planet.

Rumble!

The little planet with a diameter exceeding 600km instantly exploded, countless fragments flew in all directions, revealing a dark purple blade like ship.

"E9 grade ship?" Luo Feng laughed, ordering, "Babata, ram it!"

"Yes!"

Babata replied happily.

The Yun Mo planet ship immediately accelerated, the triangular ship became a blood colored beam of light rushing towards the other ship. Whether it was, material, energy system, or the overall motors etc within, after the Virtual Universe Company's upgrading, his ship far exceeded that of his enemy.

Rumble! Rumble! The purple ship seemed to panic as it shot out two beams of light before immediately trying to flee.

However in terms of acceleration...

The E9 alloy ship was like a tractor racing a Ferrari compared to the Yun Mo planet ship.

Hua!

As fast as lightning, and definitely impossible to dodge.

The Yun Mo planet ship instantly crashed into the purple ship. With its extremely sharp and piercing sides reinforced by the engravings, it was much more terrifying than when it was piloted by Hu Yan Bo back then! It was almost like a sharp blade slicing through wood, "Chi!" With a brush, it began to slice through the purple ship easily!

Hua La!

The purple ship was sliced clean in two. The alloys warped as it got sliced, the energy system began to send out huge amounts of light.

"Who are you two?" A silhouette flew out from the damaged ship, floating amidst the remains, he stared at the Yun Mo planet ship.

Hua! The cabin door of the Yun Mo planet ship opened.

Luo Feng and Dylan flew out.

...

The two of them stood in space and looked at the man before them, this man was skinny, his eyes were like a wild wolf, filled with a sense of apprehension. However after he saw Luo Feng and Dylan appear, it instantly turned to despair.

"Undying, an undying actually came to capture me." Pan Xi was filled with despair, after which he seemed unwilling to give up. Staring at the two of them, "I don't think I've ever offended you two, and my presence here in the Bei En minor planets is an absolute secret. How did you two know? And what grudge do we have between us?"

"Absolute secret?" Luo Feng laughed.

Against the Virtual Universe Company, what absolute secret could there be? Simply checking his space coordinates from wherever he connected to the virtual universe allowed them to determine his position.

"Pan Xi, I'm here on the Virtual Universe Company's orders to judge your flame wind organization." Luo Feng said fiercely. Since he used his spirit energy as the medium, his voice resounded through the silent space. "The other 17 executives are all dead, you are the only one left."

"Virtual Universe Company?" Pan Xi stared wide eyed with fear.

My god!

When he saw the two earlier, he still had some thoughts of fleeing, he was simply acting like he had given up. However, upon hearing the name of the Virtual Universe Company...he felt completely helpless! That was a leviathan that had the universe countries all in submission.

"No wonder I didn't even get any news of my 17 executives being killed. So, it's the Virtual Universe Company that arranged this." Pan Xi stared at the two of them. Mocking, "The powerful Virtual Universe Company, when did it bother itself with a small figure like me and specially send people to deal with me."

"Cut the crap."

Luo Feng said coldly, "The true leader of the Flame wind organization is you. You have the biggest responsibility on everything it does, I now sentence you...to death! I'll personally execute it!"

"Personally? Domain lord level punk, are you saying you'll personally kill me, or saying...that the undying beside you will stop my movements and make me unable to defend before you make your move?" Pan Xi laughed coldly, he had originally thought of using the 7th prince as his trump card. However, after hearing the name of the Virtual Universe Company.

He knew...

He had to fight for his life!

"I'll personally make my move alone." Luo Feng stared at him, "The undying will definitely not intervene."

"Ah?" Pan Xi's eyes gleamed.

"Die!"

Immediately, countless gold lights shot out from the dark golden long rod on Luo Feng's back. They covered the area instantly, endless blade energy interweaved and engulfed the hundred km area about them, powerful spirit energy controlling them...this blade world pressure was no weaker than a true sector lord's world projection.

Simultaneously, Luo Feng wielded the blood shadow blade and became a blur, rushing at Pan Xi.

"Good, what an idiot, wanting to do close combat with me? My chance has come, as long as I can capture this arrogant punk alive, using him against the undying, I have a chance of fleeing." Pan Xi's eyes gleamed coldly, unleashing his world projection.

Rumble!

The blade world and the world projection clashed.

"7 illusionary blades...Burial!" Luo Feng immediately unleashed his strongest move of the blade techniques, infusing the presence of the Sky tearing claw into his move.

Rumble!

Rumble!

The both of them used blades and as the two worlds clashed, their blades collided as well.

Rumble...A formless invincible energy transmitted over.

"Ah!"

Luo Feng couldn't withstand it, his right hand knocked back so hard that it shattered, his bones shattered and the blood shadow blade was knocked far away. Simultaneously the mysterious soldier armor and the cloud contact vine on the surface of his skin immediately stopped the rest of the attack.

Luo Feng was knocked away.

"Haha, you think you can flee?" Pan Xi's face was malevolent, he waved his arm fiercely.

Hua!

Countless colorful vines shot out from his arm, instantly covering the surrounding area in all sorts of vines. The sturdy vines shot straight at Luo Feng wanting to wrap him within.

"Sector lord level 9 Metal Vine!" Luo Feng's expression changed.

Metal vine.

A very normal plant life form, if one said that the cloud contact vine was a rare existence among the plant life, then this metal vine was considered staple goods and low cost. Same level and grade, but its power was much weaker than the other plant life forms. At most, it was comparable or a little better than a similar leveled human.

Normally, reaching star level 9 was their limit.

It was rare for them to reach universe level.

To nurture them till domain lord level, that was purely luck!

And for it to reach sector lord level 9, this, this was a miracle!

Dylan frowned in the distance.

"Cloud contact vine!" Luo Feng who was seriously injured gazed at the countless vines rushing over, immediately roaring.

Vines immediately shot out from his shoulders and waist, a total of 216 vines, everyone of them grew extremely long instantly. Each vine was sturdy and thick with many leaves, they instantly attacked the Metal vine.

Sector lord level 6 cloud contact vine against a sector lord level 9 metal vine!

The metal vine was cheap.

The cloud contact vine was rare, and to nurture it to such a high level of 216 vines, even at sector lord level 6, it could still easily kill a normal human sector lord level 6.

"Hua hua..." The vines clashed and attacked each other within tens of km in space. Without a doubt...the cloud contact vine had the advantage.

"Hmph."

In the distance, protected within the core of the metal vine, Pan Xi's eyes gleamed. He immediately pointed his left hand at Luo Feng, blood red leaves began to shoot out. In an instant, the area around where the two vines were battling was wrapped in red leaves. Blood red flowers began to bloom throughout, every one of them with a diameter exceeding 1 km, within one could even faintly see black cold teeth.

Sector lord level 9 Sha Luo flower!

If one said the Metal vine was staple goods and cheap, belonging to the lower class of plants, then this Sha Luo flower was one that was comparable to the cloud contact vine. The cloud contact vine was known for its swallowing and cell regeneration. As for the Sha Luo, it was a special plant that enjoyed swallowing blood of other life forms, it was known for its attack and swallowing strength.

Sha Luo flower, if distinguished by earth's standards, could be considered to be a man eating plant.

"Sector lord level 9 Sha Luo flower?" Luo Feng's expression changed. "How did he nurture 2 sector lord level 9 plants?"

"Ah..."

The Sha Luo flower's ear piercing noise resounded from its flowers.

The many bright colored flowers instantly rushed towards Luo Feng, the huge flowers' and their mouths crackled as it crunched its teeth, saliva drooling from within.
