

SWALLOWED 731

Chapter 731: Training Way of Life

Luo Feng devoted himself to studying the beast god's seven technique's 1st manual.

The 1st level was a partial fusion of space and gold.

The gold laws...Luo Feng had already received the recognition of the laws, he was close to almost fully comprehending the gold laws. In that sense, he was already adequate enough to reach up to the 5th level of the beast god seven techniques.

In terms of the space laws, the 1st level's requirements were...1st 3 pictures of the 9 universe tablet.

"Xi Luo Duo went through normal comprehension back then too, he didn't truly comprehend all 108 wonders like I will." Luo Feng thought. "However, according to his book, if one fully comprehended all 108 wonders of the space and gold law foundation, then the power of the 1st level would be even greater."

"Hm!"

"I'll first finish up the 108 wonders of the space law." Luo Feng thought.

The path of comprehending the wonders was extremely tough. Luo Feng had the mosha clansman, the golden horned beast and he was sector lord level, hence his training was much faster. The over 180 years of training that he did in the gold horn race world, which was during sector lord level, was worth more than tens of thousands of years of domain lord level training.

Tens of thousands of years of training!

With Luo Feng's talent, if he hadn't studied the wonders of space, and simply studied the basic 9 universe tablet like others, he probably would have finished the 4th picture already.

Back then, Lian Luo took 3,000 years at sector lord level to fully comprehend the 108 wonders.

"Before comprehending the wonders fully, I won't study the 4th or 5th picture...or there will be distractions." Luo Feng took a deep breath.

Choosing this path.

It was set to be tough...

And he even picked a path which was even tougher than simply comprehending the laws...this was the fusion of laws!

"Bring it!"

Luo Feng's eyes gleamed with anticipation.

After which, he began his period of training, sitting crossed legged everyday on his balcony, while looking up occasionally to observe the law revolutions. The golden horned beast kept studying the huge beast god statue, and was also comprehending the beast god presence from the little statue. The mosa clansman on the other hand was studying the space laws.

3 as 1!

With the help of the beast god statue, he was able to observe the law revolutions in the primal universe. He would occasionally head over to the city leader's residence to view the tablet personally...also, he could head over to some emperor level undyings teaching classes. This way, his training speed was many times faster than in the actual universe!

...

Time passed.

His life had turned into a routine of listening to his teacher, attending other emperor level undyings' classes, studying the beast god statue, and training.

Luo Feng was like a well oiled machine continuously growing, like a dry sponge desperately soaking up moisture.

...

In the blink of an eye, close to 90 years had passed, but this was the Primal universe time. As for the actual universe time, it was already close to 300 years.

Primal chaos city, within a majestic ancient residence, there gathered over a thousands warriors who were sitting crossed legged. They listened to an old man covered in green scales with a long beard teach a class.

"So, it's that way."

"Wonderful."

Luo Feng sat crossed legged amidst the others and listened intently. He couldn't help but reveal a look of glee, as the doubts in his mind started clearing up. The old man teaching the class...was one of those that he frequented in this close to 90 years. This warrior was Yan Long emperor, he was well reputed in primal chaos city, as he was definitely a true pinnacle level being amongst the emperor level undyings. In terms of strength alone, he was very close to True Yan emperor.

True Yan emperor and Yan Long emperor along with other pinnacle level emperors would often draw a lot of people to their classes.

Yan Long emperor was from the Virtual Universe Company faction, and he specialized in space and gold laws. Hence, Luo Feng enjoyed his classes and frequented them.

"We will end here today."

The green scaled old man smiled and said, his long beard flowed in the wind as he got up.

"Thank you teacher!"

Over a 1,000 warriors below, and more than half of them were undyings, along with the other geniuses, got up and bowed extremely respectfully as they shouted with gratitude.

These classes were after all free, they were definitely grateful for them.

Yan Long emperor smiled and brought his disciples and left, the crowd down below began to disperse as well.

"Ah, Tuo Ka, that must be Luo Feng. Even though I've heard of his name in the Huge Axe dojo, and know that he's an absolute genius, this is the 1st time I've seen him. Ah, right, he should be a primal region domain lord. You are also a domain lord primal region member, you should be familiar with him right. Tell me about him." In the distance, two men were chatting.

Among these two, one was fatter with 3 soft horns on his forehead, and his skin was red as he smiled at Luo Feng. The other was a skinny cold man in black armor.

"Hm, he is indeed a primal region domain lord. There are a total of 11 people in the domain lord level primal region right now." The skinny man said coldly. "He just rose from the universe level, and he hasn't even taken part in any qualification battles. Hence, I'm not close to him."

"Ah, what a pity." The fatter man shook his head.

"What's there to pity." The skinny man said coldly, "Ti Si Pu Luo, do you really care about him?"

"He is after all a rare genius." The fatter man said.

"Hmph...he just recently became a domain lord, he hasn't even taken part in one qualification battle. And the next domain lord battle will be in 18 years. The primal region universe level members have very low standards, the strongest only passing the 8th level of the heavenly bridge. And at our domain lord level...the lowest primal region members have all passed the 10th level." The skinny man said coldly, "This Luo Feng is set...to be eliminated to the absolute beginning region."

"Newbies. It's normal to be eliminated temporarily." The fatter man said.

"That'll depend on his strength then." The skinny man glanced at Luo Feng and smiled coldly. "My teacher said that he was an absolute genius, he would definitely take the primal region slot in the future. However, I don't believe it...geniuses normally start off fast and slide down slowly...there's so many cases of it."

"That does seem right." The fatter man nodded.

"What's more, our domain lord primal region has 10 seniors. Even though on the surface, only 1 has passed the 11th level, they are all incredibly crafty. Even if they had the ability to pass the 11th, they will all hide it well. This way, they can surprise their opponents during the qualification battles." The skinny man said softly, "I dare guarantee, that there are at least 3 of the seniors that can pass the 11th level. As for the rest, they all have passed the 10th a long time ago...but, they all have their own secret techniques..."

The fatter man nodded.

"The qualification battles 18 years from now will have the 10 seniors and Luo Feng, the single newbie. Just watch, he will lose very badly." The skinny man said confidently.

"Haha..." The fatter man laughed.

...

Luo Feng, who was walking out with the crowd heard everything clearly, it was obvious this Tuo Ka wasn't trying to hide it.

"These bunch of punks...they don't know that I don't even consider them as opponents." Luo Feng thought.

Tuo Ka was one of the 10 seniors of the domain lord primal region members, he was pretty strong.

Actually over so many years...

Luo Feng had discovered that the 10 seniors of the primal region had some conflict with him due to his swift uprising! It made many within the Virtual Universe Company regard him as a rare genius of the past 10,000 eras, and that he would take a spot in the sector lord primal region.

Amongst the four secret regions, the primal region was the most respected and valuable.

Universe level, domain lord level, sector lord!

It was obvious that the competition was most intense at the sector lord level, of which it involved a large amount of resource distribution. As the upper echelon all complimented Luo Feng...it naturally made the similar primal region geniuses all unhappy. All of them were afterall vying for the same sector lord primal region spots!

"Looking down on me?" Luo Feng thought as he shook his head, mocking within, "During the qualification battles in 18 years, I'll give them something to look at."

"Luo Feng."

Babata's voice resounded within his mind, "Even though on the surface you are a domain lord, in truth you are already sector lord level! Your training efficiency for one day equates to their 1 year...and now, with the 3 clones, and the beast god statue, you are already stronger than them. You will simply be bullying them."

"Bully?" Luo Feng laughed.

Indeed.

During the close to 90 years in primal chaos city, Luo Feng had completely comprehended 102 of the 108 wonders. In terms of efficiency...it was 20 times that of Lian Luo! The main thing was that he had 3 clones, all extremely gifted and the heavenly beast god statue, naturally his efficiency was much higher.

"I hope I can finish the 108 wonders before the qualification battles." Luo Feng thought.

The moment he did that.

Then his space law comprehension would be sufficient to pass the 12th level of the heavenly bridge. This was what Lian Luo said back then...and Luo Feng had realized himself as well, that even without relying on his shocking spirit energy amplitude, he could still pass the 11th level already.

"Let's go to the city leader's residence." Luo Feng turned and headed that way.

"Why are we heading there?" Babata asked.

"To study the 9 universe tablet." Luo Feng smiled.

"But you've already used up all your chances." Babata said.

Having been in primal chaos city for close to 90 years, Luo Feng had never once attempted the heavenly bridge. Hence, he only had two chances at studying the tablet, and 30 years ago, he had already used it up.

"Simple, I'll attempt the heavenly bridge." Luo Feng smiled. "My walk from here to the city leader's residence...should be enough for me to pass the 12th level."

Immediately, he sent a thread of consciousness into the virtual universe network.

Standing at the entrance of the heavenly bridge.

Right in the center of the beautiful island stood the watchman Bevin who had been here for countless years. He stood there patiently, suddenly a silhouette appeared out of nowhere in the center, it was a black haired youth.

"Ah, Luo Feng." Watchman Bevin revealed a smile, dressed in a fiery red long robe, he smiled and walked over.

"Watchman Bevin, you've changed your robe." Luo Feng smiled.

"Haha, I can't always be wearing the same thing." He smiled and replied. "I haven't seen you in a long time, ever since you passed the 7th level, you haven't attempted it even once. In the blink of an eye...several hundred years have passed. I know you, the moment you attempt the bridge, it's always shocking. How are you prepared to shock us this time? Passing straight to the 9th? Or...the barrier of the 10th?"

Most of the domain lord primal region members had all only passed the 10th.

Luo Feng had only been training for a few hundred years...

Watchman Bevin was mocking him too, he didn't think Luo Feng was truly that exceptional.

Luo Feng smiled, "I'll surprise you."

"Ah?" Watchman Bevin was shocked, "I'll be waiting."

Luo Feng smiled and became a beam of light flying towards the 9 universe bridge.

Chapter 732: Attempting The Heavenly Bridge

Luo Feng stood before the 9 universe bridge and gazed at the never ending bridge before him. Smiling he said, "Old friend, it's been awhile, naturally I'm going to shock everyone today. It's time to give it my all and show everybody my strength."

Sou!

He instantly became a gold beam of light and disappeared into the distance, beginning his attempt.

...

As he began his attempt, watchman Bevin began sending out a group of mails.

"The absolute genius of the past 10,000 eras Luo Feng sure is watched by many of the upper echelons." Watchman Bevin muttered. "They all ordered me to let them know the moment he attempts the bridge."

In an instant, tens of mails were sent out.

There were 3 exceptional members from Luo Feng's batch of geniuses. One of them was Bolan, another was Rong Jun and the last was Luo Feng! Bolan and Luo Feng were both regarded as geniuses of the past 10,000 eras. Rong Jun however was looked on as a treasure by the upper echelon of the Virtual Universe Company, they even competed against each other to accept him as their disciple.

However at least for now, of the 3 geniuses, Luo Feng was in the lead.

...

Jade emperor extended her crystal like finger and gently tapped open a screen, a mail appeared on it.

"Luo Feng is attempting the heavenly bridge?" Her perfect face revealed a peculiar smile as she said softly, "This punk never rests till he shocks everybody. The other geniuses from his batch that had attempt the bridge regularly, especially that Bolan...he's already passed the 8th level!"

"Who knows how many levels he'll pass this time, 9th? Or...the unbelievable 10th?" Jade Emperor smiled and immediately rushed to the bridge.

In less than 10 seconds, True Yan, Jade, Tie Nan...Bei Cang official and so on, a total of 86 undyings, where over half of them were emperors, and the rest of them were officials, had all gathered at the bridge.

On the island in the center of the heavenly bridge area, True Yan and the other undyings gathered.

"Haha, so many people." True Yan laughed and looked about.

"True Yan, it's your fault for producing such an exceptional disciple." A huge man with a huge golden beard laughed. "The knight ordered me to take note of this punk, I don't dare slack off. The moment I found out he was attempting the bridge, I had to come immediately."

"Yea, I'm here on the knight's orders too." The other emperors along with some officials smiled.

The atmosphere was good.

True Yan laughed as he turned to look at Jade behind him, mocking, "Jade, you have to tell the 9 blade knight the news. With so many of the upper echelon watching him...9 blade sure has pressure on him. When my disciple does well, others may want to steal him away."

"Whatever belongs to the knight is his, no one can take him away." Jade's gaze swept past the group of undyings, making many of them laugh out loud.

The knights (universe country leaders) within the Virtual Universe Company were all competing, and the number of warriors below them...were naturally different. And getting more pinnacle level emperors under them may give them the chance to actually break through to becoming knights.

These naturally formed sects even amongst the knights. There were many situations where the knights couldn't personally attend to, naturally having a powerful warrior under them made a huge difference.

"It's hard enough to get a normal emperor level undying. However as for when Luo Feng will reach emperor level pinnacle like his teacher True Yan, when that time comes, he can form his own sect." A black robed lady with a long snake tail smiled, "9 blade knight won't be able to stop him either. When that happens, the many knights and country leaders will use all methods to attract him...it'll be hard to say who he will go to."

"You seem to really favor him." Jade looked over.

"That is at least a possibility." The black robed lady smiled, "Everybody, how far do you think he'll go this time?"

"At least the 8th! The Bolan from his batch has already passed the 8th."

"From what I see, it may be the 9th, he's used to shocking people."

"Hm, I think it's the 9th too."

"9th is the limit! Every 3 levels is a barrier, it's highly unlikely he passes the 10th."

"9th."

"It may be the 10th, don't get too shocked when he does it."

"True Yan, what do you think."

A big group of emperors and officials representing their knights, even though the officials were weaker in strength, they could still take on such matters. It was obvious they were all trusted aides...hence everybody was carefree about the matter.

"It seems like most think he'll reach the 9th level." True Yan wasn't exactly laughing as he smiled, his gaze sweeping past the crowd, "Everybody will just have to wait and see, ah. The battle's starting!"

After which the 86 undyings all turned to look at the screen.

On it, Luo Feng had just reached the end of the 8th level, the asteroid had just turned into a blue clothed man as they faced off and began.

The battle ensued for just a second before it ended.

He had passed the 8th level!

"He didn't win completely over the 8th, the 9th should be his limit."

"Hm."

86 undyings all watched the screen and commented; however they quickly grew silent.

...

The 9th level's opponent still used the Nan Shen Armament's 6th level Blade world, but it had reached a very high level. Luo Feng used his blade world as well to clash about 10 times, after getting a good grasp on his opponent's attack...only then did he defeat him.

9th level, pass!

...

The 10th level was a yellow clothed man, he used the Nan Shen Armament's 7th level, Land and sky crushing rod. This rod belonged to the extreme high level of the blade world. Luo Feng similarly clashed with him for about 10 times before fiercely crushing him.

10th level, pass!

...

11th level, the yellow clothed opponent used the Nan Shen Armament's 8th level, Space slicing Gold blade, Luo Feng still clashed with him for awhile before killing him.

11th level, pass!

On the island.

The group of undyings were all silent, as all of them were shocked as they stared at the screen, all in disbelief.

Was this possible?

He was initially leading the geniuses by passing the 7th level of the heavenly bridge in the past. But, within just a few hundred years, suddenly he had the strength to pass the 11th level. Also, from what the undyings saw, he was obviously still not giving his all, he would purposely clash a few times with the opponents before killing them. It was obvious the 11th level opponent hadn't even given him much of a challenge.

"My god."

"How is this possible?"

"His improvement is so fast, and he's only a domain lord. Even if he was a sector lord, it's still impossible for him to improve so much in just a few hundred years."

"Terrifying!"

"Too terrifying."

The emperors and officials were all stunned. Luo Feng's improvement speed had far exceeded an absolute genius, even exceeding that of a demon. Hence, they could only call him a monster! one that exceeded all expectations and imaginations, an absolute genius monster!

Just like Ke Di back then...universe level, domain lord, sector lord level, he could all pass the primal region sky mountain. And at sector lord level pinnacle he was akin to an emperor level undying, he could even kill official level undyings!

This was a monster!

In terms of strength, Luo Feng was still far from Ke Di back then. However, his speed improvement over these few hundred years...was definitely not ordinary!

"Will he pass the 12th?"

"Is law comprehension as easy as drinking water to him. How is this even possible? There should be a limit, no?"

"Right now amongst the 10 seniors of the domain lord primal region members, the strongest has only passed the 11th level, and he's already trained for tens of thousands of years. As for this Luo Feng, has he exceeded him from just a few hundred years of training? This is impossible!"

The undyings all held their breaths.

It was pure silence on the island, no one dared say anything, all of them were staring hard at the screen.

...

Levels 7-9 were in space. 10-12 were within a planet itself, the bridge extended into the core and lava region of the planet itself.

Within the planet.

Luo Feng stood at the end of the 12th level, gazing down at the vast land below, "I've finally reached the surface."

There was rumbling from below the ground and a voice resounded, "Pick your opponent, fighter, controller, or hypnotist. Pick one, defeat him and you will pass the 12th level."

"Controller." Luo Feng said.

Rumble...

The ground shook and countless yellow lights shot out from all about below, swiftly gathering in mid air. In an instant, it became a yellow armored mysterious warrior wearing a mask, he carried a dark golden long rod on his back and stood on a dark cloud shuttle. He looked at Luo Feng and said, "To reach the 12th level at domain lord level, you are very exceptional. As of now, none of the domain lord members of the Virtual Universe Company have passed this."

"Then let me break the record." Luo feng smiled.

"You seem confident." The yellow clothed man said coldly. "I'll still be using the Nan Shen Armament's 8th level, Space slicing gold blade. However, it'll be much stronger than the 11th level, you will have to be careful."

"Come." Luo Feng smiled.

Rumble! Rumble!

Luo Feng and the yellow clothed man immediately shot out countless gold lights, every 81 of them swiftly becoming a golden little blade.

The two of them had 108 golden little blades around them. These 108 blades immediately revolved around and shot out many gold threads, as the powerful law ripples filled up their surroundings, space and gold laws, in perfect harmony, swiftly fusing.

"Combine!" Luo Feng and the man shouted simultaneously.

108 gold blades swiftly gathered and became a 2.8m tall gold broadsword.

The two of them floated in mid air with their broadswords.

Weng weng... Luo Feng's broadsword shook before him.

"Spirit energy amplitude! Explode!" Luo Feng could feel his control over the broadsword feeling somewhat taxing. He immediately increased his spirit energy amplitude to 1,200, it was immediately much easier. It was almost like a normal person lifting a barbell, if he had 12 times the strength suddenly...it would suddenly seem much easier.

Chapter 733: Explode! Explode! Explode!

Luo Feng stood on his dark cloud shuttle. 1,200 threads of spirit energy poured into controlling the Nan Shen gold broadsword, precisely controlling the entire blade's complex law engravings, triggering the space and gold laws. Luo Feng looked at the distant yellow clothed man and shouted, "Space slice!"

Hua!

The gold blade was strong and unwavering. The space around it warped as it followed the flow of space itself, almost like it flowed through the most precise path or slit in space. What was visible was a golden thread slicing through space, leaving behind a visible slit as it flew. It was obvious that if it was any stronger, it would instantly tear apart space itself.

"Hua!" The yellow clothed man stood on his dark cloud shuttle as he controlled his blade, fast as lightning.

The two blades instantly clashed in mid air.

It was almost like two absolute swordsmen exchanging blades. Luo Feng and the man had already reached an unbelievable level of control of the gold blades, they were so fast that only gold threads were visible in mid air, which spread throughout the sky and covered the area.

Clashing time and again.

It was very intense.

This scene had completely stunned the group of onlookers watching the broadcast of the battle. This was a scene where the 8th level of the Nan Shen armament had reached an extremely high level...the gold blade was not even clearly visible, one could only see the gold threads move about. And this thread was caused by space being sliced apart.

Luo Feng and the yellow clothed man both were at domain lord level 9. Hence, they only left behind slits in space. If the two of them were sector lords, with their spirit energies 1,000 times stronger...using the space slice gold blade would slice through space like tofu. And only very very few sector lords could reach this level, yet Luo Feng had done it at domain lord level.

"Haha, this sure is savage."

"Not bad."

Clashing tens of times, Luo Feng got a clear grasp of his opponent's ability, he finally smiled widely and increased his spirit energy amplitude to 1,600.

Xiu!

A gold thread got even faster, swiftly passing through the yellow clothed man's body, so fast he couldn't even dodge.

Papapapa...his body was instantly sliced apart like tofu. In an instant, the gold blade's fierce blade energy sliced through and tore his body to shreds, his life core was broken...

12th level!

Passed!

"13th level!" Luo Feng took a deep breath, and his eyes were filled with anticipation and madness.

Rumble...the end of the bridge once again began to extend...

10th level, 11th level, 12th level, these were all within the core of the planet, the lava region and the surface of the planet.

Every three levels was a barrier.

The 13th...

The bridge extended upwards towards a star in space, it was obvious the battle would take place there.

"Star?" Luo Feng followed the never ending bridge up towards the fiery star, smiling as he swiftly flew along to begin the 13th level.

In the island at the center of the bridges.

86 undyings were all watching as Luo Feng once again exchanged blows with his opponent tens of times before killing him, they were all shocked.

"12th level, he has passed the 12th level! This Luo Feng keeps picking the most disadvantaged controller route...and he actually succeeded?" Jade was shocked within. She was completely dumbfounded, Luo Feng's improvement speed had reached an unbelievable level, it completely surpassed her expectations.

"Could, could he..."

Jade looked at Luo Feng on the screen heading towards the 13th level, her eyes were filled with shock, "He's attempting the 13th?"

It was not just Jade at this time, all the undyings including his teacher True Yan were all in shock. True Yan muttered to himself, "Luo Feng frequently demonstrates to me when he asks for guidance, I always felt that he could barely pass the 12th level. However from the looks of it...it wasn't even taxing for him, could he really just pass the 13th? It's not that possible, this is truly quite impossible."

"Impossible."

"How could it be."

The group of undyings all couldn't believe that Luo Feng would be able to pass the 13th level, however no one dared to make a guaranteed bet anymore. Luo Feng had just consecutively passed from the 8th to the 12th level, 5 levels in a row. This level of steadiness, clashing a few times before killing his opponents.

This level of steady self confidence had influenced them, it made them all unsure...of whether he could pass the 13th level.

Theoretically they all felt it was impossible!

...

Every three levels was a barrier, 1-3, 4-6, 7-9, 10-12...

It was obvious that the 12th to the 13th would be a huge difficulty jump, and it was very hard to breakthrough. As for Luo Feng's attempt this time...many undyings had initially thought that he wouldn't even pass the 10th level, yet now he had even passed the 12th.

One had to know that the strongest and most exceptional of the 10 seniors in the primal region domain lords had just passed the 11th, and these seniors had all been training for tens of thousands of years. But, how long had Luo Feng trained for?

It was absurd!

Passing the 12th level alone was crazy, would he really think of being able to pass the barrier, pass the 13th?

The heavenly bridge stretched from the planet all the way to space and into a star.

Luo feng swiftly flew to the surface of the star.

"Pick your opponent, fighter, controller, hypnotist, pick any one and if you defeat him, you will pass the 13th level." A deep voice rumbled from the star.

"Controller." Luo Feng held his breath.

When it came to the 13th level, he didn't have much of a guarantee.

Completely comprehending the 108 wonders of the space laws was only sufficient to pass the 12th level, and right now he had comprehended 102 of the wonders. In terms of the space laws, he only had the capability to pass the 11th. Relying on his 1,600 spirit energy amplitude, only then could he defeat the 12th level.

And the opponent of this 13th level...his power was heavenly.

Could he still win?

"I'll do my best and give it a shot. Let's see if my hard labour for the past 90 years in primal chaos city bore fruit." Luo Feng stared ahead.

Rumble!

The surface flames of the star suddenly shot out a fireball. This fireball floated and gathered on the surface of the star, becoming a red armored masked man. He had fiery red hair and carried a dark golden long rod and stood on the dark cloud shuttle.

His gold eyes stared at Luo Feng.

"To reach the 13th level at domain lord level, it's been too long since this happened." The flame armored man looked at Luo Feng as his powerful voice resounded.

"Then let me break the record." Luo Feng smiled.

"The 13th level is much harder than the 12th. Little punk...let's hope you can take it." The man smiled, "I believe you've guessed it, I use the Nan Shen Armament's 9th and final level...A match against undying."

Luo Feng squinted.

He actually...this punk could actually unleash the last level.

Nan Shen Armament, also known as the Heavenly armament, the full name was 9 levels heavenly armament, which had 9 levels in total. From the 1st level's Illusion blade rising to the final and strongest 9th level A Match against undying. Even many sector lord pinnacle warriors couldn't reach this level. In fact, many undyings couldn't even use this.

"Let's begin." Luo Feng held his breath, "I have to give it my all. Whether I lose or win, it'll depend on luck."

"Very good, you seem to have fighting spirit." The flame armored man laughed.

Rumble!

The flame armored man's dark golden long rod immediately exploded open, and countless little golden blades spread throughout the sky. From there, a peculiar fusion began to occur, it was completely different from the 9th level's combination. It was the final and strongest combination of the Nan Shen Armament!

In an instant!

A completely golden 3.3m blade that seemed normal floated there in space. It seemed like it was there and yet not, almost like it could vanish into space.

Nan Shen Armament's 9th level...A Match against undying!

This was actually called that because if a sector lord pinnacle could use this, it could instantly pass through space like teleportation and vanish, suddenly appearing at any spot and instantly killing the opponent.

The weapon could pass through space and time to appear anywhere. Naturally, it was much simpler than one teleporting himself, hence when one's space comprehension reached the 13th level of the heavenly bridge, along with their gold laws at the extreme, they could barely begin to unleash this move.

Even at the basic level of strength, this move as still called A Match against undying!

That was because, If a sector lord pinnacle could use this move, its powerful force along with its instantaneous ability to attack...even a normal undying would have to be on guard against it and not let it accelerate against him. The moment he got careless and let the sector lord chase up to him with the blade appearing instantly...

Chi, even an undying would be heavily injured, if he wasn't killed. And this would make it so that they would be unable to use their fastest speed to chase the sector lord.

Hence, this move was called A Match against undying.

...

The flame armored man's dark golden long rod exploded behind him, becoming the perfect form of the Nan Shen Armament, a 3.3 m long golden blade.

Luo Feng was going all out.

Rumble. The golden long rod on his back immediately shot out countless gold lights and became 108 little blades before swiftly forming the 2.8m long golden broadsword. It was the 8th form Space slicing gold blade. Afterall, he couldn't unleash the 9th level yet.

"The maximum power of the 8th level can still beat the 9th." Luo Feng howled within.

Rumble!

The golden horned beast in his internal world raised its head and howled, using its natural ability strengthen.

Rumble!

His spirit energy amplitude rose instantly from 1,600 to over 3,200, reaching its limit!

"I spent 90 years in primal chaos city studying the beast god statue hard, also studying the laws and resonating between the two of them. These 90 years add up to over 900 years in the actual universe. After such a long period of training, I can control a bit of the powerful beast god presence. Even though I still don't know how to fuse the laws, after trillions of times imitating it, I can still use some of it." Luo Feng's eyes gleamed with madness.

"Kill!"

His maximum spirit energy unleashed as he controlled the blade.

Searching for that thread of terrifying beast god presence, the 2.8 m broadsword instantly tore through the air. The noiseless and somewhat traceless perfect form of the Nan Shen armament, the 3.3m gold blade instantly flew through the air and the two blades finally clashed for the 1st time.

Neither was prepared to give an inch!

Rumble!

Chapter 734: Huge Shocks

The two blades clashed!

The space around the flames of the star instantly exploded apart, revealing a visible black hole. Many spatial tears appeared throughout with shards of space floating about. The black hole broke open as swiftly as it sealed itself back up.

The broadsword floated in mid air, it was knocked back a few thousand km before once again tearing through space and rushing towards the 3.3m long Nan Shen gold blade.

That blade was knocked back over 10,000 km before it flashed forward again.

"I have the advantage." Luo Feng's eyes gleamed at the situation.

Actually, the opponent had unleashed the Nan Shen's perfect form...using 10,081 little gold blades to form the perfect 3.3.m Nan Shen blade. However, he didn't unleash the legendary teleportation ability, and if his opponent was sector lord pinnacle, using the world energy of a sector lord pinnacle...he could trigger the perfect Nan Shen blade and travel through space, disappearing occasionally, and was also extremely hard to follow and predict.

However, the opponent was only a domain lord level 9, hence he was unable to unleash its full potential!

The theory was simple.

Basic foundation strength was important, if there was a star traveller monster that could unleash the 9th level of the Nan Shen armament, he could at most form it, but with a star traveller's spirit energy, they could only make it fly at a pitiful speed. It could never compare to a sector lord's speed.

The opponent was disadvantaged, but so was Luo Feng.

The body he used in the virtual universe network was that of a basic domain lord level 9 with a domain lord level 9 spirit energy, and that compared to a sector lord pinnacle was a difference of 1,000 times! If Luo Feng reached the sector lord pinnacle, using the terrifying beast god presence in his blade...its power would be absurd!

Rumble! Rumble! Rumble! Rumble! Rumble! Rumble!

In the space above the star, the broadsword and the Nan Shen gold blade clashed over and over.

The gold blade was vicious and piercing, almost like a silent assassin, as it unpredictably flashed about. However, the moment it got an opportunity, it would strike!

The broadsword was brutal and powerful, like a true tyrant. It was infused with a powerful sense of the beast god, almost like a force that rushed forward without any obstruction in space. Of course, in terms of control of the weapon, it seemed simple and brute like, but it had the sense of an unpolished gem.

The two blades clashed, the assassin against the brute.

It was very clear...

The brute was taking the advantage.

"This is the true Space slicing gold blade! It's infused with brutality and will power, slashing through space itself!" Luo Feng was completely immersed in his control of the beast god presence. The broadsword flashed through the space and left behind slits and tears. Everytime they clashed it left behind huge tears in the space around it.

Battle!

The broadsword was obviously winning. With each clash, he was getting better and better, forcing the opponent's Nan Shen gold blade to be knocked back and its area getting smaller.

"Go and die!" Luo Feng's eyes gleamed as he determined he could win.

Xiu!

The broadsword became a piercing gold thread and tore through space, piercing straight at the flame armored man.

The Nan Shen gold blade tried to stop it.

But the broadsword simply dodged it and pierced straight at the man! It was a risky tactic, regardless of the opponent's attack, he would still aim to kill the other.

"No!" The flame armored man retreated quickly on the dark cloud shuttle and controlled the gold blade to pierce at Luo Feng.

It couldn't be helped...

The clashes before had forced the flame armored man into having very little space to move about, hence the broadsword instantly reached him. The Nan Shen gold blade however took quite a while to get to Luo Feng.

With such a gap...

It determined the victor instantly!

Pu Chi! The broadsword flashed past the body of the flame armored man, as countless amounts of blade energy tore his body to shreds and destroyed his life core.

13th level!

Passed!

The 86 undyings standing in the middle of the island of the heavenly bridges all looked up at the broadcast. When Luo Feng finally defeated and passed the 13th level, all of them, including True Yan were completely stunned.

Domain lord passing the 13th level?

How long has it been?

There were definitely such absolute geniuses in history. However, whenever such a person would appear, 99% of them were domain lord geniuses that had trained much longer than Luo feng had. Afterall, to pass the 13th level after a few short hundred years of training was indeed amazing when compared to those that trained for tens of thousands of years and only passed the 11th...and that person was the strongest genius amongst the seniors of the primal region domain lords.

The 11th level compared to the 13th, these were two completely different standards.

Especially since the 12th to the 13th was a barrier, breaking through was extremely hard.

"It's, it's only been a few hundred years."

"This Luo Feng..."

"He actually passed the 13th level!"

"From the 8th to the 13th, 6 levels consecutively?"

The group of undyings including Bevin all held their breaths and watched. No one dared to say anything...they were all stunned by the miraculous run of 6 consecutive levels. Against the appearance of this monster, they couldn't say anything at all.

...

Luo Feng stood at the end of the 13th level, looking ahead as the bridge extended into the star itself.

"I barely won the 13th level. My advantage was very slight, I probably don't have much hope for the 14th. Even though there's no guarantee, I still have to try." Luo Feng swiftly flew to the 14th level and continued, quickly reaching the insides of the star...deep into the sea of flames.

Even though it was extremely hot, it was nothing against a domain lord level 9 body.

A domain lord level 9's flying speed was after all faster than over 10,000 km per second. Even a universe level could fight on a White dwarf star, a domain lord level 9's body was much tougher than that after all.

Chi chi chi...

There were endless flames everywhere.

At the end of the 14th level, Luo Feng stood there and chose controller again as his opponent. The opponent was similarly a flame armored man.

"Passing the 13th level at domain lord level, you have a boundless future." The flame armored man's gold eyes looked at Luo Feng. "If you pick controller, these levels 13 to 15 all use the Nan Shen Armament's 9th level. Although they will all use the same move...the power however is very different, if you didn't have anything in reserve before, then you probably have no chance of victory."

Luo Feng smiled as he listened.

A match against Undying, it was the final and most perfect move of the Nan Shen Armament.

Just like how blade world was used in levels 7-9.

A match against undying was being used from levels 13-15, this was within his expectations.

Rumble!

Both unleashed their Nan Shen Armament simultaneously.

They clashed instantly!

Chi!

The Nan Shen gold blade brushed past Luo Feng's broadsword, shaking slightly, fast as lightning, unpredictable as it instantly pierced through Luo Feng's body, tearing him apart.

Brush, shake and pierce.

Luo Feng didn't even have a fighting chance, he simply lost.

"From the Nan Shen 36 levels, A match against undying is also separated by its power levels." Luo Feng thought before being kicked out of the heavenly bridge.

Luo Feng had lost!

This attempt at the bridge had officially ended, he finally lost at the 14th level.

The 86 undyings in the center island, including the watchman Bevin all watched as he finally lost at the 14th level. Many of them who had held their breaths nervously finally let out a sigh of relief.

"He finally lost."

"He, can lose too."

Many undyings within the group all laughed, even beginning their discussions.

However what followed was a rush of shock over all of them, they were actually pressured by this monster's performance. They couldn't be blamed...his performance was simply too terrifying, just how many levels were there on bridge?

Reaching the 18th level was already the emperor undying level.

Reaching the 15th was the official level undying level.

Reaching the 10th was the most normal undying level.

Of course, law comprehension level didn't represent that a sector lord was weaker than an undying. Many sector lords would immediately become official level the moment they broke through, even emperor level.

Luo Feng had passed up to the 13th level. If a sector lord that had trained for hundreds of thousands of years had passed the 13th level, it wouldn't even be shocking. However, this domain lord that had trained for a few hundred years...this was simply beyond anyone's expectations.

"True Yan, congratulations."

"Haha, you have a good disciple."

"Congratulations."

The group of undyings all laughed.

"Hahaha..." True Yan was extremely happy too, he thought within, "This kid sure knows how to hide. He probably had a few special encounters, he normally displays to only me, his true law comprehension levels. And when he attempted the bridge earlier...he should have used some extra strengthening abilities. Sick, in a few hundred years, he's passed the 13th level. Back when he first came to primal chaos city, he didn't even pass the 1st level."

"Jade." True Yan looked at her, "You have to be careful, there will be many knights after my disciple."

Jade glanced at him.

Shua.

She vanished, obviously rushing to report to 9 blade knight. She was also very clear...that the appearance of such a monster would immediately arouse all the superpowers.

Following her, many other undyings swiftly left too to report to their superiors, True Yan simply laughed loudly and left. Only watchman Bevin was left on the island, he took a deep breath, "This Luo Feng's performance was simply too, too..."

Watchman Bevin secretly sent out a bunch of mails, this monster that probably only appears only once every trillion eras, he didn't dare not to report him.

...

"What did you say?" 9 blade knight sat high up in his throne, he stood up fiercely and gazed down at Jade emperor.

"Luo Feng passed 6 levels consecutively, he's passed the 13th level of the heavenly bridge." Jade said respectfully.

...

"Sir knight, I'm cutting to the chase, Luo Feng has indeed passed the 13th level. I know that the primal region domain lord 10 seniors, even the strongest one has only passed the 11th...you can watch the footage here."

...

"A few hundred years and he's already surpassed the other geniuses that have trained for tens of thousands of years, and is even stronger by a hundred times? Is he another absolute genius like Ke Di?"

...

The group of undyings along with Bevin's report had resulted in almost all the upper echelon of the Virtual Universe Company hearing the news of Luo Feng's heavenly bridge attempt almost immediately.

Chapter 735: Storm

Such a miraculous occurrence, it spread like wildfire. The group of undyings couldn't help but share it with their friends...hence, within a short half an hour, the news of the punk that had only trained for a few hundred years passing the 13th level had already spread throughout...

And the main lead Luo Feng however wasn't in the least bit excited.

"I won't go study the 9 universe tablet yet." He suddenly stopped as he headed towards the city leader's residence. Frowning, "I had some revelation earlier when I passed the 6 levels, I'll first head back to reflect on it before heading out to study the 9 universe tablet."

After which he turned and headed back to this training quarters.

Every level he fought, he had exchanged tens of rounds with his opponents. Hence, he had clearly seen their skill and they way they handled their Nan Shen Armament. All of them had different styles from him, hence it triggered quite a bit of inspiration in him.

...

On the quiet balcony of his training quarters, Luo Feng jumped up and sat crossed legged there, and began to reflect on the many battles. This was very important to him, hence he immediately closed his virtual universe connection to prevent any disruptions.

Hu...hu...

The flow of the primal chaos energies, Luo Feng pondered calmly.

He didn't know that he had created a huge commotion throughout.

Virtual universe, Thunder island, 9 blade knight's palace.

9 Blade knight stood there and frowned, he was dressed in his green armor with purple scales on his head.

"Knight, this Luo Feng is too terrifying. Many absolute geniuses start off strong but slow down towards the back. His improvement however simply gets more shocking...he's only lived for a few hundred years, yet he's already passed the 13th level. He is definitely a rare genius of 10 million eras. The other knights and universe country leaders will definitely want to accept him as their student. When that happens, he may become someone else's underling, you cannot hesitate anymore." Jade stood nervously beside.

9 blade knight gently held out his hand in mid air.

Jade emperor immediately held back whatever else she wanted to say, keeping silent.

"I understand." 9 blade nodded.

"However..." Jade said nervously.

Jade was 9 blade knight's number 1 emperor level undying. Hence they were very close, and the two of them often discussed problems together. Even though it was 9 blade that gave the orders...jade was usually the one that organized and led his armies, along with other duties etc.

9 blade shook his head and smiled, "How can I not be clear about it, that Bolan and him have trained for about the same amount of time. However, he only just passed the 8th level...and yet he's already considered exceptional amongst the universe levels. This Luo Feng however has already passed the 13th level, he is thousands to tens of thousands of times stronger than Bolan. Bolan is a rare genius of 10,000 eras, yet, this Luo Feng naturally is one of one in 10 million eras."

"But look, which of these geniuses of the 10 million eras have never aroused the many powerful people to want them. I'm clear on this, Luo Feng must be clear too." 9 blade shook his head, "Otherwise, he wouldn't have ignored the mail I personally sent to him."

"Knight, you've already sent the mail?" Jade was shocked.

She didn't expect his action to be that fast.

"He didn't reply, how can he dare not to reply?" Jade was shocked.

"He naturally wouldn't dare not to reply me. However, he's closed his connection to the virtual universe network." 9 blade knight shook his head. "Since he's done that...he naturally cannot receive anything, hence I cannot blame him."

Jade was shocked.

Clever punk.

This Luo Feng sure was cunning, he had probably already expected many powerful people to invite him, or have the intention of accepting him as their disciple, and as he was low in position himself, he wouldn't dare reject anyone. Hence he purposely shut off his connections, this would naturally leave him innocent.

Reopening it after awhile after amassing large amounts of mail, he would then be able to pick from the lot.

"Cunning." Jade said softly.

"Such a genius, it's natural he has such smarts about him." 9 blade knight shook his head and smiled. "Relax, I am after all the knight above him and am either directly or indirectly responsible for him. The 1st mail he should receive should still be mine."

After Luo Feng passed the 13th level of the heavenly bridge, a huge storm was caused. It didn't only affect the upper echelons of the Virtual Universe Company, it also reached the other races.

...

In a starfield in desolate universe country, there was a slit in space which held a god country within.

This majestic god country was where the bug clan organization lay in hiding.

Within the god country, there was a mountain range that was over 1 million km high. It was the tallest mountain there, and at its peak...there was a shrine that was over 100,000 km tall. It glowed in a dazzling gold light, shining over the land, and silhouettes could be seen within the shrine.

Humans, intrepid bug soldiers, they worked harmoniously within.

"Master, master."

Within the highest level of the shrine, a gold robed silhouette flashed and appeared within the vast palace, shouting anxiously, "I have important matters to report, important matters."

Howl...howl...Over 10,000 gold bug soldiers (Undying bug soldiers) scattered within the palace immediately raged as they noticed the gold robed man rushing straight in, they let out warning signals to him. Almost like they were saying if he showed anymore disrespect, they would attack him.

"Why the rush, what's there to report." A gentle voice resounded within the hall, a voice that calmed one's entire body.

The gold robed man looked respectfully at the large amount of undying soldiers protecting a 10km tall mother nest. "I just got news that the human genius Luo Feng, no. 3, has just attempted the heavenly bridge today. He's only lived for a few hundred years and yet now he's already passed the 13th level!"

"13th level?"

Her gentle voice had some suspicion within, "Passing the 10th is a normal undying's level. This means that no.3's law comprehension is already akin or even better than a general already."

"Yes master." The man replied respectfully but urgently. "And to reach such a level in a few short years, compared to the most exceptional Bolan that came from the same batch of the genius competition, he

only just passed the 8th level, he cannot compare to Luo Feng at all. That Bolan is already considered a rare genius of the past 10,000 eras, but, this Luo Feng is worthy of being one of the past 10million eras."

10 million eras, that was 100 billion years.

Even though the universe had been around for a long time, 10 million eras was still considered a long period of time. Any genius capable of taking that title, such as Ke Di and Shi Huo knight, even though many had fallen during their time, whoever that didn't...would have shocking achievements!

The absolute genius of 10 million eras that didn't die, the weakest would also be an emperor pinnacle level.

"Rare genius of 10 million eras, comparable to Ke Di?" The gentle voice resounded.

"Yes." The gold robed man said.

"When we got rid of Ke Di's threat back then, our bug clan had spent quite a bit of energy and resources to cause his teacher, the primal chaos city leader to be unable to warp time and space and revive him." The gentle voice resounded. "Raise Luo Feng's position to no.1. I will report this to the race...our organization already doesn't have enough resources to deal with him, you can go."

"Yes."

The gold robed man left respectfully.

The universe was infinitely vast, humanity, bug clan, automaton race etc, all these together still only took up but a small portion of the universe. In the distant regions, there were other incredibly powerful races. Of which, there was a god country hidden in a slit of space there.

This was a god country continent filled with black energy flow.

Within the majestic black shrine.

"Master."

A silhouette covered in black smog knelt respectfully, and within the chilly hall there sat a over 3km tall silhouette formed from countless black rocks. The surface of the rocks burned with red flames, his nose occasionally shot out black flames.

His two horns seemed to be made from a translucent ceramic glaze.

He looked down at the tiny black silhouette.

"Hm?" The majestic silhouette shot out black flames from his nostrils.

"Master, we just got word that the Hong Alliance humanity just produced an absolute genius, he's called Luo Feng. He's only trained for a few hundred years and yet he's already passed the heavenly bridge's 13th level." The little silhouette said respectfully. "He is definitely a rare genius of 10 million eras, however he is currently living in the sacred land of humanity primal chaos city, with their leader guarding there. Hence, our race has no way to infiltrate."

The majestic silhouette gazed down at the silhouette below. Wherever the primal chaos city leader guards, there's no hope. We'll wait, when he becomes sector lord, he will definitely head out to the outer region wars...there'll naturally be a chance to get rid of him!"

Countless crystal metals floated about the majestic god country. The entire diameter of the place was about 3 million km, and was completely formed from a peculiar crystal.

In the core of the area.

A man sat in a jade green throne. He seemed like a perfect crystal carving which had the appearance of a human, and on his forehead he had one gold eye. The formless ripples revolved about his eye as it spread over the diameter of 300km area.

"Ah?"

"The distant Hong alliance human race has actually produced a rare genius of 10 million eras..."

"Looks like the bug clan, the demons and the automaton race will all try and find ways to kill him. Sending out knights to do the job will have a guarantee of killing Luo Feng. However, the price would be that of them sacrificing their knights to the powerful warriors of humanity. Using a knight in place for Luo Feng? No race would do that. However if it's just an undying...trying to assassinate him would be troublesome."

"Interesting, interesting."

"The 4 pinnacle races have territories close to each other, the more they fight the better." The man said to himself softly, after which he closed his 3 eyes.

...

The news of humanity producing an absolute genius had, within one day, spread throughout the universe to countless races.

Chapter 736: Thirst for Talents

Primal chaos city, amongst the countless living quarters, on a particular balcony.

Luo Feng opened his eyes while sitting crossed legged, revealing a smile on his face, "The reflections have given me good benefits."

"Babata." Luo Feng shouted within.

"Here!" Babata said passionately. As Babata had only recognized Luo Feng as his true master only after he hit domain lord level, he was now extremely swift and passionate in all his orders now.

"Open connection to virtual universe network." Luo Feng smiled, "There should be mail from quite a number of powerful people."

"Understood." Babata was very happy.

He immediately opened the network and a flood of mail entered.

"A total of 392 mail and 13 call requests." Babata said.

"So many?" Luo Feng was shocked as he smiled.

When he decided to attempt the bridge earlier he had guessed that passing the 12th and 13th level would create a storm. After all, the strongest of the primal region domain lords that have trained for tens of thousands of years had only reached level 11...

He immediately sent a thread of consciousness into the virtual universe.

...

Virtual universe Yu Xiang mountain primal region, Luo Feng sat at his desk and opened the screen.

On it were many mails and some call requests.

"The main bulk of it is from knights, a total of 322 knights." The others are some powerful undyings, also Wuka and Rong Jun have sent mails. The call requests include those two, ah, and your teacher True Yan's call request is here as well." Babata stood on his shoulder and said.

Shua shua shua...

Luo Feng swiftly read through the mails, his viewing speed was shocking as he finished them quickly.

"The knights don't care about a rare genius of 10,000 eras."

"As for an absolute monster of 10 million eras however, this has aroused them." Luo Feng smiled. He could clearly feel their sincerity as they spoke affectionately to him via the mails, saying how they were willing to accept him as their disciple.

Of course everything was still up to Luo Feng's decision, and these knights didn't bother to force him at all.

"I'll first pay a visit to my teacher." Luo Feng said.

Primal chaos city.

Luo Feng jumped down from his balcony and became a blur, swiftly heading to the not too distant True Yan Emperor's residence.

"Teacher." Luo Feng walked into the yard and bowed respectfully.

"Sit." True Yan had some peculiar wine beside him, he poured a glass for Luo Feng.

"Yes." Luo Feng sat.

"Haha, you really gave me a shock." True Yan glanced at him, after which he laughed, "I'm sure many knights have sent you mails."

Luo Feng nodded, "Yes teacher."

"Hm, your improvement has been shocking. According to the level and speed, even if you slow down slightly in the future...becoming an emperor pinnacle undying shouldn't be too hard." True Yan smiled. "Afterall, a rare genius of 10 million eras, other than falling mid way, the weakest still become emperor pinnacle, and close to 1/3 of them become knights. After discovering your shocking improvement, they will definitely fight to accept you...after all, the student teacher relationship is the most sturdy."

Luo Feng nodded his head heavily.

The strong warriors all had incredibly long life spans, hence their relatives would all die off. Their next closest person would naturally be their teacher.

Respecting their teachers, this was something very important amongst humanity. Even if one of them exceeded his teacher in strength, he still would have to respect him. Because...the teacher was the one who guided and sped up your training, and a true teacher would have helped you time and again, this debt was huge. Naturally respect was a given. Whoever disrespected his teacher would be held with disdain by all the warriors.

This was also why the knights all wanted to accept Luo Feng as their disciple.

As long as he didn't die halfway.

He would at least reach the emperor level pinnacle, and would become someone who is completely able to become their right or left arms! And the moment he became a knight...with a knight disciple, whether it was the wars or exploring the universe secret regions, outer region battles etc, with the student and teacher working together there was a higher guarantee of success. Others may backstab or kill others etc, however these sort of things hardly ever happen between student and teacher.

Whoever dared to kill their teacher, if it was discovered, they would be made a public enemy!

"Have you decided?" True Yan looked at him, "Then, who will you choose be your teacher."

"I..." Luo Feng was hesitating.

"Don't hesitate, which warrior doesn't have a group of teachers." True Yan laughed loudly. "Back then, I too climbed from a weak warrior to having a group of teachers. A teacher's capability is afterall limited. For the sake of humanity's growth, there's naturally no limit to one person having only one teacher, it would only waste your talents."

"Hm." Luo Feng nodded.

"There are many knights, however I don't know which to choose." Luo Feng said.

Within, he was thinking of getting Tian Shi palace's leader.

It couldn't be helped.

Tian Shi palace's leader never sent out any mail. As for the other over 300 knights, Luo Feng mostly didn't even recognize them, he didn't know who was strong or weak. The mail they all sent only briefly explained their abilities, however Luo Feng naturally understood the theory of overselling one self, and that not everything they said could be believed.

"Let me recommend you one." True Yan smiled.

"Hm?" Luo Feng was stunned.

"Primal chaos city leader!" True Yan emphasized.

"Ah." Luo Feng was shocked.

Primal chaos city leader?

The super being that guarded the sacred land of humanity itself? With the trillions of other races eyeing this sacred land constantly, the importance of this location could only be imagined. However after so long, no other race has ever dared come invade this primal chaos city, one could only imagine how powerful this being was.

"However teacher, he didn't send me any mail." Luo Feng said. "Am I to personally go promote myself?"

"No." True Yan shook his head, "Even though he hasn't sent a mail, he sent someone to tell me...that he's willing to take you as a disciple in name."

"Disciple in name?" Luo Feng was stunned.

"Haha...The city leader's position and status is extremely high up. Even though your performance was not bad, you still haven't earned the right to become his true disciple." True Yan laughed loudly. "His disciples are all normally made up of knights. Of course...that Ke Di was his disciple too. But compared to Ke Di, you are still somewhat weaker."

Luo Feng nodded his head and accepted it.

Ke Di had passed the primal region Sky mountain at universe, domain lord and sector lord level.

At sector lord he was akin to an emperor level undying, who was even able to kill official level undyings. It was said that his law comprehension at sector lord level was capable of passing the 20th level...otherwise he wouldn't have been able to use his sector lord body to kill an official level undying.

Such an absolute genius, only he was accepted as a disciple.

"The city leader has also left a primal chaos tablet, do you know which one?" True Yan smiled at Luo Feng.

"52 tablets..." Luo Feng was shocked, in his mind the names of each tablet appeared.

"The universe Tablet." True Yan said.

"The 2nd ranked tablet?" Luo Feng took a deep breath.

52 primal chaos tablets, the huge axe tablet was number 1 and the universe tablet was number 2.

The huge axe tablet was left behind by the creator of the Huge Axe Dojo, and the universe tablet was left by the primal chaos city leader. From this, it could be seen that this city leader should be among the top 3 pinnacle beings of the entire humanity. He guarded primal chaos city for countless eras, making countless other races not dare to enter.

An absolute pinnacle being.

"Even though the other knights will take you as their disciple and the city leader is only taking you in name, however even in name...if you perform exceptionally in the future, you will rise to become his disciple." True Yan smiled. "With him as your teacher, no one in humanity will dare mess with you. Incidents like Yan Zhu emperor messing with you will never happen again. Of course...the warriors of the other races will not care about him."

Luo Feng nodded.

The other races...

Right.

Humanity was but one race, the other races and its warriors, and their great beings akin to the Huge Axe Dojo's founder, they existed. Even the Yan Shen race was left behind by a great being. The demon note inheritance, the ice mountain inheritance...they were probably left by other races too.

The universe was vast with many powerful beings, it was indeed important to always be humble.

"I've decided," Luo Feng nodded, "I will take the primal chaos city leader as my teacher."

"Haha." True Yan nodded satisfied. "However, go see 9 blade knight first and tell him of your decision. He is after all the knight in charge of you. Once he knows you are taking the primal chaos city leader as your teacher, he wouldn't dare say anything either. He is after all one of the top people in the Virtual Universe Company."

"Top person in the Virtual Universe Company?" Luo Feng couldn't take it anymore. He really wanted to see this being personally, who was a true pinnacle being.

Compared to the Huge Axe Dojo founder, he couldn't be too far off.

Otherwise, how could he guard over the sacred land of humanity and stop all other races from invasion?

...

Luo Feng couldn't wait anymore, he quickly first connected to the virtual universe and headed to 9 blade knight's special space, respectfully visiting him.

9 blade knight was a lot more courteous to Luo Feng this time. Of course...once he knew the city leader was taking him as a disciple in name, 9 blade knight was helpless to stop it.

He was after all...the primal chaos city leader!

Even as a disciple in name, Luo Feng's position was still much higher than any other knights' disciples!

"Haha, you seem impatient." 9 blade knight said in the throne above. He gazed down and smiled, "Since the city leader has given the order, then hurry and head over. Remember, there should never be any disrespect before him. He has been the guardian of humanity's sacred land for countless ages, his contribution to humanity is immeasurable."

"Yes, knight." Luo Feng bowed respectfully.

After which he vanished.

At the same time...

Luo Feng walked out of his teacher True Yan's residence and followed the vast walkways to the city leader's residence, from afar, he could already see the majestic palace.

"Primal chaos city leader." Luo Feng muttered to himself softly.

Chapter 737: Primal Chaos City Leader

The main entrance of the city leader's residence was left open with people frequently heading in and out.

Luo Feng followed his usual path in. In the past, he had always been heading towards the 9 universe tablet, this time however, he was heading to visit the city leader.

"The city leader's inner mansion!" Luo Feng took a deep breath and walked towards the highly guarded area.

The outer areas were all lax and free.

The inner areas however had guards all over. With just a glance, one could see that all of them were undyings.

"Clang!" Two guards simultaneously banged their pikes and stopped Luo Feng, looking coldly at him.

"I am Luo Feng, I'm here to visit the city leader." Luo Feng said respectfully.

"The city leader isn't a person you can visit as you will." One of the guards engulfed in lightning looked coldly at him. "Without his order, even a knight won't be able to see him." For him to actually become a guard of the primal chaos city leader, it was something very honorable. This was the primal chaos city leader, the no.1 being in the Virtual Universe Company, a true authority.

The undyings would all fight simply to guard the place, even though they were just guards, their authority allowed them to disregard even knights.

As they represented the primal chaos city leader.

"Please check." Luo Feng smiled, "I did indeed receive his order to come here."

"Ah?"

The surrounding group of undyings all looked at Luo Feng.

Right.

Without the city leader's order, why would this little punk dare come here in the first place.

"Please wait, I'll go check." The guard covered in lightning no longer had a cold expression, he smiled passionately.

"You are Luo Feng?" After awhile, the guard looked shocked at him.

Luo Feng nodded and smiled.

"Go in, Gui Yi knight is waiting for you within." The guard said and withdrew his blockade, allowing Luo Feng to enter.

Luo Feng smiled and entered the mansion, as the group of undying guards about all began to discuss amongst themselves. It was extremely rare, even within the past hundred million years, for a domain lord or sector lord to be able to enter the city leader's residence, this was his living quarters.

Within.

He followed the spacious walkways and quickly reached a primal stone plaza. He glanced into the distance, spotting a fiery red robed bald man. He was smiling indifferently, he seemed calm. Just from looking at this man...Luo Feng couldn't help but calm down, feeling as though he had melded into the spacious and calm space.

Everything about him seemed to vanish, leaving only that bald man.

"Hm?" Luo Feng was stunned as he awoke.

"What a terrifying being, Tian Shi palace, Undying knight, Shi Huo knight, 9 blade knight...I feel like these knights are all incredibly powerful. And even though the emperor level undyings are strong, I can still faintly determine their strength. As for this man before me...I cannot tell at all, he should be a knight." Luo Feng instantly confirmed. "He should be the Gui Yi knight the knights mentioned."

Luo Feng walked towards the red robed bald man.

"I am Gui Yi knight, I'm here to receive you on my teacher's orders." He smiled. The energy he emitted had an immediate influence on Luo Feng's soul.

"Luo Feng greets Gui Yi knight." Luo Feng bowed respectfully.

"Follow me." Gui Yi knight said.

"Yes." Luo Feng said respectfully and followed.

The knight led Luo Feng through the mansion, smiling as he turned towards him, "Teacher is willing to take you as his disciple in name, and from what I see, it seems that you've agreed?"

"Yes." Luo Feng nodded.

"Hm, since you've become his disciple in name, you don't have to call me Gui Yi knight anymore. Just call me 2nd senior instead." Gui Yi knight smiled. "I went under him very early, hence I became the 2nd senior. He has other disciples under him with many of them stronger than even me. However he favors me, hence I get to stay close to him."

Luo Feng said, "Greetings 2nd senior."

"Hm." Gui Yi knight smiled and talked as they walked. "Teacher has 3 great bodies, the one in primal chaos city is here to kill and punish. Hence, you have to be extremely respectful, you cannot offend him."

"Yes." Luo Feng was shocked as he replied.

My god.

That primal chaos city leader actually has 3 bodies, and the one left in the city was for killing and punishment? Just one body of his was enough to guard the entire primal chaos city? If that was so, the strength he had in total was unimaginable.

Actually, the city leader having 3 bodies was not a secret at all. The strong were still the strong, hence he was respected. He had massacred...and killed countless other warriors from other races. His 3 bodies are well known throughout the trillions of races in the universe, every one of them having unbelievable power.

"Primal chaos ruins?" Luo Feng looked into a quiet yard ahead. There was a stone tablet there with three words on it.

"Teacher is within." Gui Yi knight said and brought Luo Feng in.

Luo Feng stepped through.

Rumble...

Time and space warped. Initially, they were in the city leader's residence, however the moment he took a step into the yard, he felt the stars and everything warp, he had entered into a boundless world.

Endless ground before them, with bodies all about. Some were as big as planets, some smaller than humans, however they all emanated terrifying energies. This...was probably the ruins of a terrifying pinnacle battle.

Luo Feng and Gui Yi knight walked through the endless ruins.

"Teacher." Gui Yi knight suddenly shouted.

"Hm?" Luo Feng was shocked to discover a 3 meter tall and sturdy man in the distance. He wore an incredibly complex ancient dark red armor with boots on, and a snake tail extending out of his armor behind.

As Luo Feng's gaze landed on him, he felt his soul shudder within. He had only spotted a silhouette initially, yet now he was looking at endless universe laws...the vast universe laws, and the killing intent emanating from him. It made Luo Feng's soul completely submit.

No sense of resistance.

"Luo Feng?" A very normal voice resounded. The illusion before was completely shattered as Luo Feng once again saw the man standing before them.

This red armored man with a snake tail turned to look at him, there were two red horns on his forehead with peculiar engravings on them. It seemed evil and terrifying, however his eyes were calm like the vast ocean, like the endless space, it made one calm down from within.

"Luo Feng greets Lord city leader." Luo Feng knelt down.

"Terrifying, too terrifying." Luo Feng shuddered within. "That 1st glance, I thought I was staring at the universe laws themselves. Right, this is the level of which one becomes the laws! Xi Luo Duo had said so too...the beast god is fused with the laws, every action triggers them. Even the statue of it has the laws within! And the primal chaos city leader, since he's reached this level, naturally he carries the laws within. Just looking at him, it was like looking at the powerful amount of law energies he has."

This was an extreme realm.

One that definitely exceeded the knights, a true pinnacle being of the vast universe.

"Your performance was not bad, your encounters are quite plenty too." He looked at Luo Feng and smiled.

Luo Feng listened respectfully.

Within however, he was panicking, because he felt like the gaze of the city leader could see through him completely. It was almost like there was no secret he could keep from him, "My moshu body is keeping the core with him and he's hiding in the world ring. I've already refined that ring...I'll know if anybody scans it. And if anybody scans my core, I should know that too. Hm, however this city leader's power is unbelievable, it's hard to say. He is after all the city leader, he wouldn't bother to scan my world ring."

"I've seen the footage of your heavenly bridge attempt, you are almost done with the 108 wonders of the space." The city leader smiled. "And it's been less than 90 years this time in primal chaos city. To almost finish the 108 wonders within this time frame is not bad."

Luo Feng listened obediently.

"You passing the 13th level, it should be from the beast god presence you got from the gold horn race's beast god canyon right." The city leader said.

"Yes." Luo Feng said.

Within however he shuddered.

Terrifying, even though the city leader's guess was somewhat off, it wasn't completely wrong. As Luo Feng had copied the huge sleeping beast god statue trillions of times in the beast god canyon, that was how he got some bit of the presence. The little beast god statue he got couldn't be copied at all. The moment he copied a little too much of it, the universe would punish him, only the statue Xi Luo Duo left behind was possible.

"To be able to comprehend a bit of the presence is not bad already." The city leader said, "Are you willing to be my disciple in name?"

"I'm willing." Luo Feng said respectfully.

The city leader nodded his head.

He, one that stood at the pinnacle of humanity, even though a genius was important, he was very clear that some people may have slow comprehension speeds. Regardless, after constantly break through their boundaries, they too could become knights. Hence unless it was an absolute genius of 10 million eras, he wouldn't care.

Even such a genius, he would still observe for awhile before actually accepting him as a true disciple.

"I know True Yan exchanged the top half of the Nan Shen 7 forms for you." The city leader said. "And since you can actually comprehend a little of the beast god presence, it shows that you have a talent in the fusion of the laws. However...fusion of the laws, is tens of thousands of times harder than simply comprehending one law."

"I'll give you time, 3,000 years." The city leader said.

"If you can finish the 1st form of the Nan Shen 7 forms in 3,000 years here in primal chaos city, I will accept you as my disciple." The city leader said to Luo Feng.

Chapter 738: Completion

"Finish the 1st form of the Nan Shen 7 forms within 3,000 years?" Gui Yi knight who stood beside was shocked within. The Nan Shen 7 forms or Beast god 7 techniques were well known as an extremely valuable manual amongst the pinnacle race humanity's upper echelon. There were two reasons for its reputation. One of them was because the gold horn race's Xi Luo Duo was well known amongst the trillions of races in the universe back then. The second reason was also because of the universe producing such a powerful creature, the Beast god. And because of it, humans back then had sacrificed quite a lot.

The strong were forged.

Xi Luo Duo and the Beast god were like that! And the Nan Shen 7 forms that Xi Luo Duo created was created with the Beast god in mind, naturally this was respected by humanity itself.

When the gold horn race became subservient to humanity, the strongest manual they had was this Nan Shen 7 forms. Naturally, it became humanity's and since then, as they respected Xi Luo Duo and the Beast god, there were many that exchanged for this manual and trained in it.

This training...

Made them discover that the Nan Shen 7 forms were incredibly difficult, it was tens of thousands of times harder than simply training in the space law alone. Especially the 1st level, even some knights have yet to pass this 1st level. Completing this 1st level proved that one had talent in the fusion of the gold and space laws.

"I remember back then, Lian Luo took 3,000 years to completely comprehend the 108 wonders of space laws." Gui Yi knight was shocked within. "And teacher is only giving Luo Feng 3,000 years to comprehend the Nan Shen 7 forms 1st form, that's tough."

"3,000 years?" Luo Feng was nervous within.

Xi Luo duo had mentioned in the 1st volume that this was just the beginning, it was best to completely comprehend the 108 wonders first before trying this out, and the time spent on this would be hundreds to thousands of times longer than the time spent on the 108 wonders!

These were some words left behind by Xi Luo Duo in the manual, casual hundreds to thousands of times.

"I spent over 100 years comprehending the 108 wonders, then wouldn't the time I need be 10,000 to 100,000 years?" Luo Feng thought. "However, I have the little Beast god statue. Since I'm able to study it and imitate the way it fuses the laws...my efficiency will be much higher. If I work hard, I'll definitely be able to finish the Scale section within 3000 years."

...

"I will definitely do my best." Luo Feng stood before this body of the city leader, not daring to show any disrespect.

He nodded.

After which walked into the distance, Gui Yi knight and Luo Feng followed.

"Your 9th senior is here." He said.

"Hm?"

Luo Feng turned around and suddenly amidst a tornado, a 9m tall huge man with 6 arms and 6 eyes walked over. Behind him was a huge gold axe almost as tall as him, it had incomparably complex engravings on it, and powerful energy emanated from it, causing the space around it to tear apart.

He took huge strides over, stepping through some bodies, the space about shook.

"Teacher." The huge man said respectfully as he got closer.

"This is your 9th senior Huge Axe knight." The city leader explained behind Luo Feng.

"9th senior." Luo Feng bowed.

"Your 9th senior Huge Axe knight has trained in the Nan Shen 7 forms before." The city leader revealed a smile. "From today on, within these 3,000 years, I allow you to go visit him for guidance once every decade, whatever questions you have, you can ask him."

Luo Feng was happy.

Even though it was said that no one had comprehended the secret of the sleeping Beast god statue in the gold horn race's beast god canyon, Luo feng had long guessed that there would be some warriors that had seen through it, but had not publicly announced anything. The strong were numerous as the clouds, they even had this manual, there would definitely be many that have tried it.

"Yes." Luo Feng said respectfully, after which he turned to the Huge Axe knight and said respectfully, "I'll be troubling you for the next 3,000 years 9th senior."

"No trouble at all." He laughed and said.

What a joke, the city leader ordered it, would he dare go against it?

"This Nan Shen 7 forms is too hard. Even though I've trained in it before, I can only roughly guide you." Huge axe knight explained. Even though he had tried training it before, he had only reached the 4th level. His body itself however was very strong, after a trillion years of practicing, he realized the gains didn't make up for the losses.

Right now he had completely given up on it, and was focusing on studying time itself.

He was already accomplished in space. Hence, he was waiting for the moment he reached the same level in time as well.

Time and space as one, he would naturally become a universe master!

Training time and space, this was the great path common amongst the universe's trillion races, 99.9% of knights all walked this path.

...

After the city leader ordered Huge axe knight, he turned to Luo Feng, "The way our Virtual Universe Company nurtures its geniuses, is that the higher the talent, the more resources he would receive. Of course, you'll only get these when you reach sector lord level. Since you are under me now, I will naturally give you some resources too."

"Thank you teacher." Luo Feng was glad within.

"I'll give you an extra 20 times to study the 9 universe tablet." The city leader said. "I believe it's what you need the most now, go on, let's hope you'll finish the 1st form within 3,000 years."

"Yes." Luo Feng could barely suppress his joy, bowing respectfully.

Gui Yi knight and Huge axe knight bowed too.

Hua!

The three of them simultaneously vanished and appeared within the Primal chaos ruins yard.

"Space warp?" Luo Feng realized as he stood in the yard, shocked.

"Luo Feng junior, work hard." Gui Yi knight said as he smiled, after which he vanished too.

"I'll visit you in the virtual universe Yu xiang mountain in 10 years." Huge Axe knight's voice rumbled, after which he vanished too.

"3,000 years?" Luo Feng thought, his eyes gleaming with joy, "And another 20 times to study the tablet, it's wonderful."

20 chances to study the 9 universe tablet. Although it seemed normal, in truth, it's worth was priceless.

That was because even with points, it was impossible to exchange for these chances!

Everytime one passed a level in the heavenly bridge, he would get one chance. After passing the 21st level, one would already be a knight. One would only get about 21 times. Every chance itself was extremely valuable...The main reason Luo Feng came to primal chaos city was mostly also to study this 9 universe tablet.

Out of nowhere, he suddenly got 20 more chances! It was even better than the many manuals he had, surprising him more than acquiring any treasure.

...

After exiting the residence, he headed straight to study the tablet.

He currently had a total of 26 times (he had 6 times left from the heavenly bridge and the city leader gave him another 20), using each time wisely would allow his improvement speed to grow extremely fast.

Time passed.

The news of Luo Feng becoming a disciple in name to the city leader was well known amongst the knights. And the Ganwu universe country leader too made a rare order to look after his family well. With that, the many undying families naturally were incredibly passionate to his family.

The Luo family power immediately soared even more, akin to a powerful undying family within the Ganwu universe country.

...

Luo Feng didn't care much about this, he was clear this was the most important period of rising for him. The stronger he got and the higher he climbed, then his family would get even stronger...the moment he fell however, his family too would fall rapidly.

...

10 years later.

"Yes 9th senior."

"Understood."

"Ah."

"Hm."

Within his training grounds in the virtual universe Yu Xiang mountain primal region, Huge axe knight was guiding him, answering the questions he had bottled up for 10 years.

And as one of the early disciples of the city leader, with countless years of guidance from the city leader himself, his strength was no weaker than Shi Huo knight. He was maybe even stronger. His guidance...was naturally solid, easily explaining and making Luo feng smile with delight.

After 3 whole days of guidance.

Huge Axe knight left.

...

Luo Feng continued to sit crossed legged on the balcony, occasionally looking up to the skies, and other times immersed in his thoughts. The golden horned beast and the mosha clan too were training hard.

In a flash, it had been 12 years since he left the city leader's residence after becoming a disciple in name.

"Haha..."

Luo Feng, who sat crossed legged on his balcony suddenly opened his eyes and stood up, he couldn't help but smile excitedly.

"I've finally done it!"

"I've completely comprehended the 108 wonders of space!"

"Lian Luo took 3,000 years!"

"I did it in a little over 100 years." Luo Feng laughed loudly, filled with glee. "I trained with a sector lord body, he did the same. Yet I'm close to 30 times faster than he was. Looks like my speed has exceeded his."

With the separate bodies, Luo feng's speed and talent did exceed Lian Luo's.

However it wasn't as absurd as 30 times more. The main thing was he had the little Beast god statue. To be able to study and feel its presence, it naturally was a huge benefit to his training in the space laws.

"No wonder Lian Luo had said that with the comprehension of these 108 wonders, the 4th and 5th and even the 6th picture would be easier." Luo Feng smiled. "Haha, even though the 4th to the 6th are incredibly complex, in truth, they are a formation of these 108 wonders."

The 108 wonders were like the ingredients.

And all delicacies relied on the most basic ingredients, comprehending the foundation before training the 4th-6th pictures...it was completely unlike the normal warriors with their basic level comprehension.

"The 4th - 6th pictures, I'll at most take a little time with them, they won't be a barrier at all." Luo Feng said confidently.

"Hm."

"However, I'm in no rush to study the 4th picture now...I have to first study the Nan Shen 7 forms...I have to grasp the time." Luo Feng couldn't care less about anything else. He closed his eyes, and in his mind, countless words and training methods etc floated within, this was the Nan Shen 36 forms he had acquired back in the Gold horn race sacred land's Manual tower.

As he read through the Nan Shen 7 forms, he discovered...

The Nan Shen 36 forms was the basic beginners manual to the Nan Shen 7 forms. This was actually said in its detailed introduction back in the Manual tower, that this was Xi Luo Duo's basic manual!

Chapter 739: Domain Lord Qualification Battles

Before, Luo Feng had simply relied on the golden horned beast to grasp the Beast god presence, not trying to comprehend the laws within, but simply imitated it!

At this time, he had truly begun to study the fusion of the laws. Just like how some people were naturally gifted in piano on earth, and some more in the sciences, even though they could achieve anything with effort, the talent was a good stepping stone. And in the difficult path of fusing the laws, one that even many knights weren't able to begin with, and Luo feng had just stepped in...

Was it fast?

Or slow?

It was hard to say before the training began.

Virtual universe, Luo Feng's training grounds.

In the spacious sky above the mountains, Luo feng stood on the Luo Fu Liu board with over 800,000 little blades surrounding him, a blur of blades covered the sky. He used his spirit energy to trigger the blades and through the universe laws, began to unleash his Illusionary blade, Sky piercing blade, Blade domain, Heavenly pillar, Space slicer, Blade world...

Even though these were ordinary blades, with no law engravings on them.

He could still use his moves.

The main advantage of the spirit weapons were that they had fixed law engravings on them. Through some combination work, the moves could be used to trigger them. Simply triggering the law engravings allowed one to use them. But, without the spirit weapons, for Luo Feng to control the blur of blades, and triggering the laws by himself was too tedious.

Using the same move without a spirit weapon, the amount of energy needed alone would be tens to hundreds of times different!

"Space slicing gold blade!"

Countless blades danced in mid air, triggered by the universe laws, they eventually formed one body together. A huge blade with golden energy flow was formed.

Luo Feng's face was flushed red, he stared hard at the huge blade formed by countless little ones.

"If I used the Nan Shen Armament, I can easily unleash this move, and the power will be much stronger." Luo Feng thought. "However, using hundreds of thousands of normal little blades, and triggering the laws for each one of them to eventually connect them with the laws themselves is very tedious. I can barely form this huge blade."

One had to know that Luo Feng had already comprehended the 108 wonders of space, and his space law comprehension had already reached the 12th level of the heavenly bridge. The moment he combined that with his 3,200 spirit energy amplitude...he could already unleash the Nan Shen Armament's 9th level, A match against undying.

With the Nan Shen Armament, he could use the 9th level.

Without it, using countless normal blades, even the 8th level was tedious.

...

Through training in the Nan Shen 36 forms, he had naturally learnt how to control ordinary blades with the laws, triggering the laws to control them was a skill used in creating techniques. Spreading one's attacking technique into hundreds of thousands of little blades, and arranging each and every one of them.

Finally reaching a level of satisfaction.

After which, combining them with the laws themselves, and engraving the required laws within, that way, one didn't need to work so hard when unleashing his move, he just simply needed to trigger them.

Of course.

Luo Feng hadn't reached the level of creating techniques. Training this Nan Shen 36 forms had great benefits for him...it worked well with the Nan Shen 7 forms' 1st level.

"So it's that way."

"Beast god presence, the wonder within is like that."

Luo Feng occasionally had smiles and frowns as he sat on his balcony.

When he first began fusing the laws, he discovered that the little Beast god presence that he had grasped had benefits. This was almost like some car mechanics, even though they didn't know the principles behind the engines, they could still fix them. And when they began to actually study it, it would resonate with their fixing experience, their comprehension would thus speed up.

Luo Feng was that way as well.

He knew how to do it in the past, but he didn't understand it too well.

Now that he began to study it, they worked together and he would be extremely excited whenever it happened.

"So it's that way."

"Haha."

...

During the 6th year after he began the Nan Shen 7 forms.

"Teacher." Luo Feng sat beside his teacher.

"How's the study of the Nan Shen 7 forms, do you have confidence in completing the 1st level within 3,000 years?" True Yan looked at Luo Feng, he knew about his deal with the city leader.

"I'm doing well for now."

Luo Feng smiled, "My first 6 years into it have been smooth, however this Beast god path is extremely profound. Just the 1st Scale portion alone is incredibly complex. According to Xi Luo Duo, it has many barriers within, I don't know whether I'll be able to easily break through them."

"Hm." True Yan nodded.

This was a true high level manual, the moment one finished the 6 levels, he would stand at the pinnacle of humanity. Just like the Huge Axe Dojo founder, primal chaos city leader, void gold master and other few rare existences, he may still be weaker than them but it was still enough to dominate over trillions of races in the universe.

Hence, every level was incredibly difficult.

"Smooth sailing at the start, that's good, it means you fit this path well." True Yan nodded satisfied. There was no way for him to know that the golden horned beast had been imitating the sleeping statue for a long time, studying the little Beast god statue and its special presence which was also infused with the fusion laws, and practicing it with its sky tearing claw over and over.

Amongst Luo Feng's 3 bodies, the earth body and the Mosha body's training in the beast god path was far from the speed of the golden horned beast.

The golden horned beast, the sleeping Beast god statue, the little beast god statue, along with the Nan Shen 7 forms and Nan Shen 36 techniques, these were the ideal combination.

"Hm, a few more days and it'll be the domain lord millennial qualification battles." True Yan laughed, "You must remember to take part."

"I remember." Luo Feng laughed.

Domain lord qualification battles?

The strongest of the 10 seniors had only just passed the 11th level, even if he didn't use the Beast god presence, just using his space laws and 3,200 spirit energy amplitude, he could already easily pass the 13th level.

"Fighting them is simply bullying them, they are no challenge at all." Luo Feng muttered to himself.

Even though it was obviously bullying, the date of the qualification battles still came.

Virtual universe Yu xiang mountain, primal region.

"The primal region domain lord battles are about to begin, all gather." A thick voice resounded within the entire primal region. All 11 members looked up in the sky, gazing at the silhouette in the air, after which they all rushed up into the skies.

Shua!

11 of them gathered in mid air, looking at the purple clothed man.

He was the organizer of the battles sent by the Virtual Universe Company, and also a powerful undying.

"Luo Feng?"

"That's Luo Feng?"

"Tuo Ka, that's Luo Feng, his training speed is absurd." The 10 seniors all seemed to gaze at him. Of the 10, only Tuo Ka was currently in Primal chaos city, the other 9 were elsewhere...and as Luo Feng hardly attended classes in the virtual universe.

He mostly attended them personally in primal chaos city, hence the other 9 weren't familiar with him.

"Interesting." Luo Feng could feel their gaze on him. He smiled, "Forget it, it's no fun if I bully them too much. I'll show them some respect when we fight later. I'll settle them quickly but not too badly."

It was indeed bullying.

Passing the 13th level compared to the 11th...the difference was too huge. It was purely elimination.

Before Luo Feng had consecutively passed the 6 levels, the 10 seniors all thought Luo Feng had some capability, but at least they were still stronger than him...some couldn't wait to fight him. However, now that he had passed the 13th level, the group of seniors were all stunned.

Dumbfounded.

Tuo Ka who was in primal chaos city howled within, "I've trained for 30,000 years, but he's only trained for a few hundred years. How is he so much stronger than me, this is too, unfair."

"Is this another Ke Di?"

"To be in the same generation as a monster, what a tragedy."

The 10 of them couldn't even face him.

Some looked on at him like he was an absolute genius monster. They were very clear about the fact that Luo Feng wasn't on the same level as them at all.

...

The purple clothed man looked at the 11 before him, his gaze landing on Luo Feng. He couldn't help but carefully analyze Luo Feng. He had heard Luo Feng had become the primal chaos city leader's disciple in name, he was filled with envy. His level of undying didn't even have the chance to meet the city leader, he was totally envious.

"Same rules as before." His gaze swept past the 11, expression serious, "Once every millennium, the domain lord qualification battles occur. There are a total of 11 of you this time, everyone will fight against the other 10. In these matches, the victor will get 1 point, the loser will get 0, the final score will rank you all. The top 6 will continue to stay in the primal region...the remaining 5 will compete against the top 5 of the Absolute beginning region domain lords, fighting for the final 4 slots. I'm sure you all understand."

"Understood."

The 11 of them nodded.

Luo Feng was very relaxed. The 10 of them however all felt the pressure. No matter what, Luo Feng had already taken one slot.

The top 5 of the absolute beginning region, the geniuses of over 100 in that region, wouldn't be too far behind. The moment they had to compete against them, it would be extremely intense.

"The battles will all be held in special areas. The virtual universe system will automatically send you in pairs to them, everyone will fight with everyone else, unless your opponent forfeits. Those not in battles can watch the live broadcasts of other battles." He smiled, "Prepare yourselves, and await for the teleportation."

11 members nodded, their gazes changing to that of competition.

Competition!

From the day they stepped into the Virtual Universe Company, this had always been the case.

Luo Feng stood calmly in mid air, as he didn't care about the 10 seniors. He wasn't competing against them, not even the geniuses of his generation. But the great beings of humanity in history, or the absolute geniuses of the other races in the universe.

Hua! Hua! Hua!

10 of the 11 were immediately teleported, leaving only Luo Feng behind.

"The 5 matches that just begun, I'm the only one not taking part." Luo Feng shook his head and laughed.

"Don't be anxious, everyone will fight eventually." The purple clothed man smiled at Luo Feng. "And this is simply just a passing to you, there's no challenge at all."

Luo Feng laughed.

Chapter 740: Star Eating Plant

The domain lord level qualification battles just passed like that. The absolute pinnacle beings of humanity along with the other geniuses weren't even surprised at Luo Feng getting 1st place. They were all very clear that with his training speed, he was bound to become one of the absolute beings of the universe!

Now everybody was just waiting to see...if he was capable of completing the 1st form of the Nan Shen 7 forms in 3,000 years, and whether he'd become a true disciple of the city leader.

...

Within primal chaos city.

"Your majesty Luo Feng." 3 silver armored sector lords walked up to where Luo Feng stayed, they looked up at his balcony where he sat crossed legged.

"Hm?"

On the balcony, Luo Feng opened his eyes to look down, a smile appearing on his face.

Sou!

He jumped down immediately.

"Is it what I ordered?" Luo Feng looked at the 3 sector lords before him.

"Yes." The leader of the 3 silver armored sector lords nodded, he respectfully passed over a world ring. "The items and things your majesty ordered are all within this world ring."

Luo Feng received it and used his spirit energy to scan the world ring. The world within this ring was small, with a diameter of only 10,000 km. However, it was completely filled with large amounts of things. The goods took up over 1,000 km in space, of which the most obvious were the 3 silver boxes within.

"Very good." Luo Feng smiled and nodded, "Thanks for the trouble."

"No problem, no problem."

The 3 sector lords were somewhat taken aback, saying, "We shall not disturb you further, we'll be leaving."

The 3 swiftly left.

Following the spacious walkways, they walked along, discussing, "He's said to be a rare absolute genius of 10 million eras. But, I didn't expect him to be so humble and easy to get along with. When we went to deliver goods to the primal region sector lord before, hmph, he was acting all big and arrogant."

"This is called bearing!"

"Hm."

"I heard his majesty Luo Feng has been accepted as a disciple of the primal chaos city leader."

"I heard he's only a disciple in name."

"Rubbish, he is a true disciple."

"Ah, there may be some miscommunication."

The three of them discussed mentally. Even though they were all sector lords, as they were simply staff of the Virtual Universe Company core, they often heard secrets from their interactions. Most of what they heard had been passed down from many sources, hence they would at most get them 50% right.

Luo Feng held the world ring and immediately walked into his own training quarter's living room.

Sitting in the sofa, he rubbed the world ring and it swiftly refined.

"Come out." Luo Feng's eyes were filled with anticipation, immediately taking out the 3 silver boxes from within the world.

The 3 silver boxes laid out on the dining table.

Every box was about 1m long, half a meter wide, and 30cm tall.

Luo Feng took a deep breath and swiftly opened all 3 of them. "Click! Click! Click!" There was a white plant within each box, they were carefully placed within, 60cm tall, their stolon silver white.

"Star eating plant!" Luo Feng smiled as he looked at the 3 plants, "They've finally come!"

Since 6 years ago, when he first began his training in the Nan Shen 7 form's 1st form, he had studied on his rough power level after completing the 1st form. Hence, he got a clearer idea on what would happen in the future. His training in primal chaos city...was set to be a very long time, hence he had to use the time here wisely.

How?

He had a large amount of Luo Ke holy water, that was a top level treasure for nurturing plant life, hence he had decided to do so.

One had to know that there were many warriors training within primal chaos city, they would often purchase a few treasures, and the Virtual Universe Company's ship would often frequent the place. Naturally they could order things.

Luo feng had ordered 3 infant Star eating plants.

...

Star eating plant: a very special plant life form that was born in the universe. It could be produced on a normal mineral planet. But as it grew, it would swallow the planet's metals, minerals and rocks etc. Normal minerals on the planet were usually enough to let it evolve to universe level, and the mineral planet later collapse and the plant would begin to wander the galaxy with the large amounts of asteroids.

While wandering the universe, it may swallow other special metals and stones, plant life forms etc, evolving further.

...

The plant life forms could be divided into many types.

Like those for defense, or attack, or both, along with others. As there were many many types of plants...their abilities were also countless, even to the point where some plants could produce other living things, while others acted like trees and stayed rooted to the spot. Transplanting them had to be done carefully, not all of them could be moved about like the cloud contact vine.

In all, there were many types with countless abilities.

The most suited was best.

...

Star eating plant: It was named the most sturdy attacking type plant, what 'most sturdy' refers to is only within the plants humanity sells. There are other special and mysterious types of plants in the vast universe that cannot be bought. The star eating plant enjoys swallowing rocks, metal, trees etc, it will make it even sturdier.

Its attack method is very simple.

Just one move, entangle and kill!

The cloud contact vine and star eating plant were very different. The cloud contact vine was mainly for defense, and it's attacking ability was but average.

The star eating plant however is even more expensive than the cloud contact vine. One without position or an avenue...wouldn't even be able to buy an infant star eating plant! This was because it was the 'most sturdy' attacking type plant, hence it was an extremely good assisting life form, during a battle...

It's countless vines could wrap about an opponent, as long as it affected the enemy's speed and attack, the battle outcome could be changed!

The only ability of entangling and killing, had given it the title of most sturdy attacking plant life form, leading to it being in high demand.

3 infant star eating plants, they cost Luo feng close to 900,000 mixed elements.

Of course the infant stage was all the same, the nurturing later on would make them different.

Just like the cloud contact vine, the sector lord weakest had 36 vines, and the strongest with 360 vines. Back then the Yun Mo planet master Hu Yan Bo's cloud contact vine at sector lord level only had 108 vines, yet it still took a whole lot of work for it to breakthrough to undying. Luo Feng's sector lord cloud contact vine had 216 vines, it was more than 10 times harder for his to breakthrough to undying.

The star eating plant, was more expensive than the cloud contact vine.

Of which at sector lord level, the weakest would have 10 vines, the strongest would have 1,000 vines.

"Star eating plant!" Luo Feng looked at the 3 infant plants, smiling.

The 3 star eating plants, plus the huge amount of material to nurture the plants had filled up the entire world ring. All of them added together had come up to close to 2 million mixed elements! Without enough wealth, how could one even begin to dwell on it?

"The cloud contact vine's defense and the star eating plant's attack." Luo Feng thought, "The star eating plant's sturdiness is well reputed, at infant stage it can already swallow a planet..."

"Luo Feng, don't get happy too early."

Babata's voice resounded within his mind. "Your teacher's cloud contact vine only had 108 vines, yet it still required 6.2 million mixed elements and luck for it to finally breakthrough. And it only gave that cloud contact vine an early official undying level of strength. Your cloud contact vine has a total of 216 vines, it'll be 10 times harder than your teacher's! If it's the strongest 360 vines...it'll probably be 10

times harder than the golden horned beast breaking through to undying! And similarly, the moment it broke through to undying, the 360 vines cloud contact vine would have emperor level strength."

"The star eating plant is even more expensive than the cloud contact vine."

"Nurturing the weakest 10 vine plant, to become undying would definitely be easy."

"However, the 500 vines plant, would be akin to the strongest cloud contact vine."

"And the legendary 1,000 vine star eating plant, breaking through to undying, would probably be even harder than a bug clan queen breaking through to undying...the difference would be minimal! Of course the moment it succeeds, an undying 1,000 vine star eating plant would definitely have an emperor pinnacle level of strength."

...

After hearing Babata's words, Luo Feng couldn't help but laugh.

Of course he knew this, the universe had trillions of life forms that were incredibly mysterious. However there was never a free meal! The universe was fair, just like the space beasts, the bug clan queen, breaking through to undying was incredibly difficult. And the plant life forms were the same, the more powerful they were...the more absurd the difficulty of their breakthrough.

If one nurtured a lower level plant life form, it would be easy to breakthrough to undying.

If one nurtured a stronger plant life form, it could never breakthrough to undying.

The choice was all on the person.

"Haha, hence I ordered 3 of them." Luo Feng laughed. "3 star eating plants, I will make one with 100 vines, another with 300 and last one will be the best one with 1000 vines."

He had spent close to 2 million mixed elements. 3 of the infant plants close to 900,000, and over 1.1 million mixed elements in the resources that were required to nurture them.

The main thing was that nurturing the 1,000 vines star eating plant took up over 90% of the resources.

"Luckily."

"Luckily I have the Luo Ke holy water, otherwise producing a sector lord level 1,000 vine star eating plant, would be enough to make an official level undying go bankrupt." Luo Feng thought. "I'm lucky, I only spent 2 million...when I reach sector lord level, the Virtual Universe Company will give me an extra 50 million mixed elements."

Nurturing the star eating plants was very easy. They first had to recognize their master, then the process was simple after. Most of the time the 3 plants would be left in the pond of Luo Ke holy water. With Babata watching over them and observing their evolution process, giving them the required resources when they needed to evolve.

...

"Right now all 3 are in the infant stage. However, I'll be here in primal chaos city for a very long time. When I complete the 1st form the of Nan Shen 7 forms, the 3 would probably have already reached sector lord pinnacle." Luo feng smiled, he didn't think anymore about it, immersing himself in his training of the Nan Shen 7 forms.

Time passed...

He spent long periods of time sitting crossed legged on his balcony, like the other warriors about.

1 year, 10 years, 100 years...time passed continuously...Luo Feng kept improving...
